letter to Shareholders

=====

March 16, 2001

Dear Shareholder,

We present this Quarterly Report which covers the activities of The First Commonwealth Fund, Inc. (the "Fund") for the three months ended January 31, 2001. Included in this report is a review of the Australian, Canadian, New Zealand, United Kingdom and selected Asian economies and investment markets, together with an overview of the Fund's investments prepared by the Investment Manager, Aberdeen Asset Managers (C.I.) Limited.

Edgar Filing: FIRST COMMONWEALTH FUND INC - Form N-30B-2

High Credit Quality: 88.2% of Securities Rated or Deemed Equivalent to AA/Aa or Better

The Fund's high credit quality has been maintained. Over 88.2% of assets are rated AA/Aa or better, or are considered of equivalent quality by the Investment Manager. An additional 9.4% is held in A rated securities.

Distributions: 9.0% Annual Cash Distribution Rate

Distributions to common shareholders for the year ended January 31, 2001 totaled 85.5 cents per share. Based on the share price of \$9.46 on January 31, 2001, the cash distribution rate over the last 12 months was 9.0%. Since all distributions are paid after deducting applicable withholding taxes, the effective distribution rate may be higher for those US investors who are able to claim a tax credit.

On March 15, 2001, the Board of Directors declared a 7.0 cent per share monthly distribution. It is the Board's policy to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital. The Board intends to review the distribution policy and the current monthly distribution rate of 7.0 cents per share on a quarterly basis, with the next scheduled review to take place in June 2001.

Net Asset Value Performance: 6.2% Per Annum Return Since Inception

The Fund's Net Asset Value (NAV) returned 6.6% over the three months to January 31, 2001. Since inception, the Fund's NAV has returned 6.2% per annum to January 31, 2001. On January 31, 2001, the Fund's share price was \$9.46, which represented a discount of 11.67% to the NAV of \$10.71.

Asian Investments: 5.8% of Total Assets Invested in Asian Debt Securities

As of January 31, 2001, 5.8% of the Fund's total assets were held in Asian debt securities, a sector that presents attractive opportunities. The Fund's ability to increase its investment in Asian markets remains constrained by currency repatriation issues.

Board Approval of Buy-Back Program

At the special Board Meeting held on March 1, 2001, the Fund's Board of Directors approved a buy-back program with the objective of improving shareholder value.

Board Approval of Change to Fund Name

Following the acquisition of the Fund's investment manager and investment advisor by Aberdeen Asset Management, PLC ("Aberdeen"), the name of the investment manager was changed to Aberdeen Asset Managers (C.I.) Limited, and the name of the investment advisor was changed to Aberdeen Asset Management Limited. In order to reflect this change in ownership, the Board has approved that the Fund's name will be changed to Aberdeen Commonwealth Income Fund, Inc., effective on May 1, 2001.

1

The First Commonwealth Fund, Inc.

=====

Edgar Filing: FIRST COMMONWEALTH FUND INC - Form N-30B-2

Worldwide, the Aberdeen Group manages funds in excess of US\$40 billion, with offices in the U.K., U.S., Europe, Hong Kong, Australia and Singapore. With an extensive global coverage and depth of experience, Aberdeen brings invaluable skills and expertise to the management of the Fund.

Appointment of new Chairman and President

The Board has appointed Mr. Martin Gilbert as the new Chairman of the Fund and Mr. Hugh Young as President, and wish to extend their sincere thanks to the outgoing Chairman and President, Messrs. Brian M. Sherman and Laurence S. Freedman, who have provided the Fund with their invaluable skills and expertise since the Fund's inception.

For information about the Fund, including weekly updates of share price, NAV, and details of recent distributions, contact Aberdeen Asset Management, Investor Relations, by:

- o calling toll free on 1-800-552-5465 or 1-212-968-8800 in the United States,
- o email to InvestorRelations@equitilinkny.com, or
- o visiting the website at www.equitilink.com.

Yours sincerely,

/s/ Martin J. Gilbert

Martin J. Gilbert
Chairman

COMMONWEALTH
FUND, INC.

=====

Your Board's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital.

The Fund is subject to U.S. corporate, tax and securities laws. Under U.S. tax accounting rules, the amount of distributable income for each fiscal period depends on the actual exchange rates during the entire year between the U.S. dollar and the currencies in which Fund assets are denominated and on the aggregate gains and losses realized by the Fund during the entire year.

Therefore the exact amount of distributable income for each fiscal year can only be determined as of the end of the Fund's fiscal year, October 31.

However, under the U.S. Investment Company Act of 1940, the Fund is required to indicate the source of each distribution to shareholders.

The Fund estimates that distributions for the fiscal year commencing November 1, 2000, including the distribution paid on March 9, 2001 are made up of 64.2% net investment income, 2.5% realized capital gains and 33.3% return of paid-in capital.

This estimated distribution composition will vary from month to month because it may be materially impacted by future realized capital gains and losses on securities and fluctuations in the value of currencies in which Fund assets are denominated.

In January 2002, a Form 1099 DIV will be sent to shareholders, which will state the amount and composition of distributions and provide information with

Edgar Filing: FIRST COMMONWEALTH FUND INC - Form N-30B-2

respect to their appropriate tax treatment.

=====

2

Dividend Reinvestment and Cash Purchase Plan The First Commonwealth Fund, Inc.
=====

We invite you to participate in the Fund's Dividend Reinvestment and Cash Purchase Plan ("the Plan") which allows you to automatically reinvest your distributions in shares of the Fund's common stock at favorable commission rates. Distributions made under the Plan are taxable to the same extent as are cash distributions. The Plan also enables you to make additional cash investments in shares of at least \$100 per month. Under this arrangement, the Plan Agent will purchase shares for you on the stock exchange or otherwise on the open market on or about the 15th of each month. As a participant in the Plan, you will have the convenience of:

Automatic reinvestment--the Plan Agent will automatically reinvest your distributions, allowing you to gradually grow your holdings in the Fund;

Lower costs--shares purchased on your behalf under the Plan will be at reduced brokerage rates. Brokerage on share purchases is currently 2 cents per share;

Convenience--the Plan Agent will hold your shares in non-certificated form and will provide a detailed record of your holdings at the end of each distribution period.

To request a brochure containing information on the Plan, together with an authorization form, please contact the Plan Agent, State Street Bank & Trust Company, P.O. Box 8200 Boston, MA 02266 or toll free on 1-800-451-6788.

3

Report of the Investment Manager The First Commonwealth Fund, Inc.
=====

Share Price Performance

On January 31, 2001, the Fund's share price was \$9.46, which represented a discount of 11.67% to the NAV of \$10.71. At the date of this report, the share price was \$9.38 representing a discount of 7.77% to the NAV of \$10.17.

Auction Market Preferred Stock (AMPS)

The Fund's \$30 million of AMPS continued to be well bid at the weekly auctions. The average interest rate paid was 6.29% over the quarter, compared with 6.28% for 30-day U.S. commercial paper over the same period. These rates have decreased since the last quarter, due to the lowering of interest rates by the U.S. Federal Reserve during the quarter.

The Fund is a leveraged Fund. Over the past year, the U.S. dollar has strengthened against virtually all other currencies in the world. This has resulted in a negative impact for common shareholders. However, over this quarter, the AMPS contributed positively to the Fund's NAV as a result of the appreciating Australian dollar.

Edgar Filing: FIRST COMMONWEALTH FUND INC - Form N-30B-2

The Manager expects that in the medium to longer term this situation will rectify itself and that the AMPS process will be a positive contribution to Fund performance.

4

7

Market Review and Outlook The First Commonwealth Fund, Inc.

Australia

As economic growth moderated in Australia during the second half of 2000, the composition of growth changed, with a strong external sector taking over

Edgar Filing: FIRST COMMONWEALTH FUND INC - Form N-30B-2

from the slowing domestic interest sensitive sectors. It is likely that the sources of growth will rotate again as export growth eases, and the housing sector builds on recent signs of recovery. The Australian economy appears set to maintain a more moderate pace of growth in coming months.

After maintaining steady policy since mid-2000, The Reserve Bank of Australia (RBA) has commenced its easing cycle, cutting its benchmark interest rate half a percentage point to 5.75%. In line with other global central banks, the RBA has communicated a willingness to ease monetary policy in order to sustain economic growth within a softer global economic environment. It is anticipated that a more moderate pace of growth than the RBA has previously expected will result in further easings in 2001.

Bonds have strengthened over the quarter, as US activity data suggested a deceleration in GDP. The benchmark ten-year bond closed at 5.35%, from 6.19% on October 31, 2000. Bank bill yields fell in line with official interest rates, closing the quarter at 5.82%.

With the US Federal Reserve having already announced 100 basis points of monetary easing, short-term interest rate differentials have now moved back in the Australian dollar's favor. As the market anticipates a more aggressive easing cycle in the US than domestically, it is expected that interest rate differentials will continue to lend support to the currency in 2001. The Australian dollar strengthened over the quarter, closing at \$0.55.

The current account position has improved considerably. After peaking in late 1999 at 6% of GDP, it is now running at a pace of only 3% of GDP. This has been aided by robust export demand over the quarter, with a strong external sector taking over from the slowing domestic interest sensitive sectors of construction and consumption.

Canada

As the US economy slows, Canadian GDP growth is expected to slow below trend during 2001. Inflation has been well contained however, with core inflation remaining benign at the center of the Bank of Canada's 1-3% target band. This has allowed the bank to initially ease monetary policy by 25 basis points, and will allow for further policy easings to combat slowing production.

Canada's employment growth was recorded at 2.2% year-on-year in January. Bonds strengthened over the quarter, with yields falling from 5.81% to 5.39%.

Cash interest rates in Canada are now in line with US rates, and as a result some of the pressure on the Canadian dollar has been removed. The Canadian dollar appreciated over the quarter, closing at \$0.67.

8

Market Review and Outlook (concluded) The First Commonwealth Fund, Inc.
=====

New Zealand

Business and consumer confidence in New Zealand have recovered sharply over recent months, with the Reserve Bank of New Zealand's survey showing the strongest quarterly rebound in its 31 year history. As the New Zealand bond market anticipated cuts in interest rates, bond yields strengthened over the period, falling from 6.69% to 6.07%. Moderate inflation pressures are expected to result in further monetary policy tightening in 2001.

Edgar Filing: FIRST COMMONWEALTH FUND INC - Form N-30B-2

The New Zealand dollar has strengthened, closing the quarter at \$0.44. Current growth is being underpinned by a strong external sector, although this combination is likely to shift further into the year as export growth moderates and domestic demand improves.

United Kingdom

The impact of the earlier strength of the Sterling on the UK economy's export and production sectors was reflected in GDP growth, which moderated through 2000 to around its long-run trend level of 2.9%.

Inflation pressures have continued to ease in the UK, with 19 consecutive readings below the Government's 2.5% target. The symmetry of the inflation target has allowed The Bank of England to take swift policy action, recently easing policy by 25 basis points, with further easings of this magnitude expected. An impending General election may anticipate a recycling of budget surplus via tax cuts.

The pound appreciated against the US dollar, to close at \$1.46.

Asia

Domestic and Yankee (\$US denominated) bonds

With slowing global activity, Asian bonds underperformed the strong rally in global bond markets during the quarter.

Signs of economic slowdown have emerged in Asia over the quarter, reflected in wider credit spreads through late 2000. The easing of monetary policy by the US Federal Reserve however, allowed a sharp contraction in credit spreads during January.

Asian Yankee bond yields fell over the quarter.

Currencies

Most Asian currencies appreciated against the US dollar, with the exception of the South Korean Won. The Malaysian Ringgit remains pegged to the US dollar.

9

Summary of Key Rates

The First Commonwealth Fund, Inc.

The following table summarizes the movements of key interest rates and currencies over the last three and twelve month periods.
