Quarterly Report
July 31, 2001

Stop Press

Dear Shareholder,

We are greatly saddened by the tragic events that took place on September 11, 2001 and our deepest sympathies go out to the families of all the victims. We wish to acknowledge and thank the members of the emergency response teams whose heroic efforts have been an inspiration to us all.

We would like to take the opportunity to reassure our shareholders of our unwavering commitment to their investment needs during this difficult time. Please let us know if we can be of any assistance as we move forward together in the weeks and months ahead.

Sincerely,

/s/ Martin J. Gilbert

Martin J. Gilbert
Chairman

Highlights

- o 9.5% cash distribution rate for the previous 12 months based on a share price of \$8.80 on July 31, 2001
- o 89.6% invested in securities rated or deemed equivalent to AA/Aa or better
- o 5.5% of total assets invested in Asian debt securities

All amounts in U.S. Dollars unless otherwise stated.

2 Aberdeen Commonwealth Income Fund, Inc.

Letter to Shareholders

September 7, 2001

Dear Shareholder,

We present this Quarterly Report which covers the activities of Aberdeen Commonwealth Income Fund, Inc. (the "Fund") for the quarter ended July 31, 2001. Included in this report is a review of the Australian, Canadian, New Zealand, United Kingdom and selected Asian economies and investment markets, together with an overview of the Fund's investments prepared by the Investment Manager,

Edgar Filing: ABERDEEN COMMONWEALTH INCOME FUND INC - Form N-30B-2

Aberdeen Asset Managers (C.I.) Limited.

High Credit Quality: 89.6% of Securities Rated or Deemed Equivalent to AA/Aa or Better

The Fund's high credit quality has been maintained. Over 89.6% of assets are rated AA/Aa or better, or are considered of equivalent quality by the Investment Manager. An additional 7.0% is held in A rated securities.

Distributions: 9.5% Annual Cash Distribution Rate

Distributions to common shareholders for the twelve months ended July 31, 2001 totaled 84.0 cents per share. Based on the share price of \$8.80 on July 31, 2001, the cash distribution rate over the last 12 months was 9.5%. Since all distributions are paid after deducting applicable withholding taxes, the effective distribution rate may be higher for those US investors who are able to claim a tax credit.

On September 3, 2001, the Board of Directors declared a 7.0 cent per share monthly distribution. It is the Board's policy to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital. The Board intends to review the distribution policy and current monthly distribution rate of 7.0 cents per share on a quarterly basis, with the next scheduled review to take place in December 2001.

Net Asset Value Performance: 5.3% Per Annum Return Since Inception

The Fund's Net Asset Value ("NAV") returned 1.4% over the quarter to July 31, 2001. Since inception, the Fund's NAV has returned 5.3% per annum to July 31, 2001. On July 31, 2001, the Fund's share price was \$8.80, which represented a discount of 9.9% to the NAV of \$9.77.

Aberdeen Commonwealth Income Fund, Inc. 3

Letter to Shareholders (concluded)

Asian Investments: 5.5% of Total Assets Invested in Asian Debt Securities

In March 1999, the Fund's shareholders approved amendments to the Fund's principal investment objective, investment policies and investment restrictions to enable the Fund to invest up to 35% of its total assets in Global Debt Securities. This strategy was proposed to be implemented in two phases. The first phase involved the immediate investment of up to 20% of the Fund's assets in Asian debt markets. On September 3, 2001, the Board of Directors authorized the Investment Manager, in its discretion, to implement the second phase of the global investment strategy. This will now allow the Fund to invest up to 35% of its total assets in Global Debt Securities, with a view to enhancing yield.

As of July 31, 2001, 5.5% of the Fund's total assets were held in Asian debt securities, a sector that presents attractive opportunities. The Fund's ability to increase its investment in Asian markets remains constrained by the potential realization of foreign exchange losses.

For information about the Fund, including weekly updates of share price, NAV, and details of recent distributions, contact Aberdeen Asset Management, Investor Relations, by:

/s/ Martin J. Gilbert

Martin J. Gilbert
Chairman

4 Aberdeen Commonwealth Income Fund, Inc.

Your Board's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital.

The Fund is subject to U.S. corporate, tax and securities laws. Under U.S. tax accounting rules, the amount of distributable income for each fiscal period depends on the actual exchange rates during the entire year between the U.S. dollar and the currencies in which Fund assets are denominated and on the aggregate gains and losses realized by the Fund during the entire year.

Therefore the exact amount of distributable income for each fiscal year can only be determined as at the end of the Fund's fiscal year, October 31.

However, under the U.S. Investment Company Act of 1940, the Fund is required to indicate the source of each distribution to shareholders.

The Fund estimates that the distributions for the fiscal year commencing November 1, 2000, including the distribution to be paid on September 14, 2001, are comprised of 35% net investment income and 65% return of paid-in capital.

This estimated distribution composition may vary from month to month because it may be materially impacted by future realized gains and losses on securities and fluctuations in the value of the currencies in which Fund assets are denominated.

In January 2002, a Form 1099 DIV will be sent to shareholders, which will state the amount and composition of distributions and provide information with respect to their appropriate tax treatment.

Aberdeen Commonwealth Income Fund, Inc. 5

Dividend Reinvestment and Cash Purchase Plan

We invite you to participate in the Fund's Dividend Reinvestment and Cash Purchase Plan ("the Plan") which allows you to automatically reinvest your distributions in shares of the Fund's common stock at favorable commission rates. Distributions made under the Plan are taxable to the same extent as are cash distributions. The Plan also enables you to make additional cash investments in shares of at least \$100 per month. Under this arrangement, the Plan Agent will purchase shares for you on the stock exchange or otherwise on the open market on or about the 15th of each month unless shares of the Fund are

Edgar Filing: ABERDEEN COMMONWEALTH INCOME FUND INC - Form N-30B-2

trading at a premium, in which case, the Fund will issue additional shares. As a participant in the Plan, you will have the convenience of:

Automatic reinvestment--the Plan Agent will automatically reinvest your distributions, allowing you to gradually grow your holdings in the Fund;

Lower costs--shares purchased on your behalf under the Plan will be at reduced brokerage rates. Brokerage on share purchases is currently 2 cents per share;

Convenience--the Plan Agent will hold your shares in non-certificated form and will provide a detailed record of your holdings at the end of each distribution period.

To request a brochure containing information on the Plan, together with an authorization form, please contact the Plan Agent, State Street Bank & Trust Company, P.O. Box 8200 Boston, MA 02266 or call toll free on 1-800-451-6788.

6 Aberdeen Commonwealth Income Fund, Inc.

Report of the Investment Manager

Share Price Performance

On July 31, 2001, the Fund's share price was \$8.80, which represented a discount of 9.9% to the NAV of \$9.77. At the date of this report, the share price was \$9.03 representing a discount of 9.7% to the NAV of \$10.00.

Auction Market Preferred Stock ("AMPS")

The Fund's \$30 million of AMPS continued to be well bid at the weekly auctions. The average interest rate paid was 4.13% over the quarter ended July 31, 2001, compared with 3.93% for 30-day U.S. commercial paper over the same period. These rates have decreased since the quarter ended April 30, 2001, due to the lowering of interest rates by the U.S. Federal Reserve over the period.

On September 3, 2001 the Board of Directors resolved to amend the Fund's policies with respect to derivatives to enable the Investment Manager to use interest rate swaps to hedge up to one third of the Fund's liabilities. This gives the Investment Manager the flexibility to lock in historically low U.S. dollar interest rates with respect to up to one third of the Fund's outstanding Auction Market Preferred Stock.

The most significant type of risk associated with interest rate swaps is the risk that the counterparty may default or go bankrupt, in which case the Fund would bear the risk of loss of the amount expected to be received under the swap agreement. There can be no assurance that the Fund will have an interest rate swap in place at any given time nor can there be any assurance that, if an interest rate swap is in place, it will be successful in hedging the Fund's interest rate risk with respect to the AMPS.

The implementation of this strategy will be at the discretion of the Investment Manager.

The Fund is a leveraged Fund. Over the past year, the U.S. dollar has strengthened against virtually all other currencies in the world. This has resulted in a negative impact for common shareholders. However, in anticipation of an appreciating Australian dollar, the Manager expects that in the medium term this situation will rectify itself and that the outstanding AMPS issue will make a positive contribution to the Fund's performance.

Portfolio Composition

Geographic Composition

The table below shows the geographic composition of the Fund's total investments as of July 31, 2001, compared with the previous quarter and twelve months.

TABLE 1: ABERDEEN COMMONWEALTH INCOME FUND, INC.--

Market Review and Outlook

AUSTRALIA

The benchmark 10-year bond yield rose from 5.78% to 6.09% over the quarter ended July 31, 2001. Bank bill yields rose slightly over the quarter, closing at 5.06%.

Interest rate differentials between U.S. and Australian interest rates have continued to widen, reaching levels not seen since the mid 1990's. As the market continues to anticipate more easing initiatives in the U.S., interest rate differentials should be a key source of support to the Australian dollar in the near term, as will the likelihood of stronger growth momentum in the domestic economy relative to the U.S.

The Australian dollar fluctuated marginally during the quarter to July 31, 2001 closing at US\$0.51.

CANADA

The Bank of Canada ("BoC") expects GDP growth to be between 2%-3% this year, which is above the expected 1.9% growth in the U.S. BoC Governor Dodge has stressed that the main risk to Canada's economic outlook is that the U.S. recovery may be delayed. If external demand remains sluggish, both the inventory build-up and the slowdown in household asset accumulation, which have sustained growth in the face of a deteriorating global economic environment, will become significant liabilities. In such an environment the Investment Manager believes the BoC will have to cut rates more aggressively.

The Canadian dollar remained stable over the quarter, closing at \$0.65.

NEW ZEALAND

With consumer and business confidence strengthening and the outlook for New Zealand's major trading partner, Australia, improving, the Investment Manager expects that a rebound in New Zealand's growth is likely in the medium term. The Reserve Bank of New Zealand ("RBNZ") has seen New Zealand's easing cycle lag the rest of the dollar bloc. Headline inflation pressures appear to be peaking which

Edgar Filing: ABERDEEN COMMONWEALTH INCOME FUND INC - Form N-30B-2

should provide the RBNZ with greater room to move in coming months, while slowing global growth is also likely to remain a key concern.

The New Zealand dollar remained stable over the quarter, closing at \$0.41.

Aberdeen Commonwealth Income Fund, Inc. 11

Market Review and Outlook (concluded)

UNITED KINGDOM

The quarter ended July 31, 2001 saw signs of developing weakness within the UK's consumer related sectors, and the manufacturing sector continued to remain weak. The Investment Manager believes that the Bank of England will continue to ease monetary policy against a background of slow world growth in the second half of the year.

The pound remained stable against the U.S. dollar over the quarter, to close at \$1.43.

ASIA

Domestic and Yankee (U.S.\$ denominated) bonds

Asian domestic bond yields gave a mixed performance over the quarter ended July 31, 2001. While 10-year bond yields rose in Thailand and the Phillipines, those in Malaysia and South Korea fell over the period. U.S.\$ denominated Asian bond yields (Yankees) fell over the quarter ended July 31, 2001, in line with falling U.S. interest rates.

As Asian currencies came under pressure from fears of a harder global landing, Asian credit spreads widened through late 2000. However, the easing of monetary policy by the U.S. Federal Reserve has had a positive influence on riskier investment markets globally, benefiting Asian markets in particular.

Currencies

Asian currencies were lackluster against the U.S. dollar over the quarter. The Malaysian ringgit remained pegged to the U.S. dollar.
