"Applicable Premium" means, with respect to a Note on any date of redemption, the excess, if any, of (x) the present value as of such date of redemption of (i) 100% of the principal amount of such Note plus (ii) all required interest payments due on such Note through February 1, 2017 (excluding accrued but unpaid interest to the date of redemption), computed using a discount rate equal to the Treasury Rate as of such date of redemption plus 30 basis points, over (y) the then outstanding principal amount of such Note.

"Treasury Rate" means, as of any date of redemption of Notes, the yield to maturity at the time of computation of United States Treasury securities with a constant maturity (as compiled and published in the most recent Federal Reserve Statistical Release H.15 (519) that has become publicly available at least two Business Days prior to the redemption date (or, if such Statistical Release is no longer published, any publicly available source or similar market data)) most nearly equal to the period from the redemption date to February 1, 2017; *provided*, however, that if the period from the redemption date to February 1, 2017 is not equal to the constant maturity of a United States Treasury security for which a weekly average yield is given, the Treasury Rate shall be obtained by linear interpolation (calculated to the nearest one-twelfth of a year) from the weekly average yields of United States Treasury securities for which such yields are given, except that if the period from the redemption date to February 1, 2017 is less than one year, the weekly average yield on actually traded United States Treasury securities adjusted to a constant maturity of one year will be used.
