**1. ORGANIZATION**

Ares Capital Corporation (the "Company" or "ARCC" or "we") is a specialty finance company that is a closed-end, non-diversified management investment company incorporated in Maryland. We have elected to be regulated as a business development company under the Investment Company Act of 1940 (the "Investment Company Act"). We were incorporated on April 16, 2004 and were initially funded on June 23, 2004. On October 8, 2004, we completed our initial public offering (the "IPO"). On the same date, we commenced substantial investment operations.

The Company has elected to be treated as a regulated investment company, or a "RIC", under subchapter M of the Internal Revenue Code of 1986, as amended (the "Code") and operates in a manner so as to qualify for the tax treatment applicable to RICs. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases includes an equity component like warrants, and, to a lesser extent, in equity investments in private middle market companies.

We are externally managed by Ares Capital Management LLC (the "investment adviser"), an affiliate of Ares Management LLC ("Ares Management"), an independent international investment management firm. Ares Operations LLC ("Ares Administration" or the "administrator"), an affiliate of Ares Management, provides the administrative services necessary for us to operate.

Interim financial statements are prepared in accordance with generally accepted accounting principles in the United States ("GAAP") for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Articles 6 or 10 of Regulation S-X. In the opinion of management, all adjustments, consisting solely of normal recurring accruals considered necessary for the fair presentation of financial statements for the interim period, have been included. The current period's results of operations will not necessarily be indicative of results that ultimately may be achieved for the fiscal year ending December 31, 2009.

**2. SIGNIFICANT ACCOUNTING POLICIES**

***Basis of Presentation***

## Edgar Filing: ARES CAPITAL CORP - Form 10-Q

The accompanying consolidated financial statements have been prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States, and include the accounts of the Company and its wholly owned subsidiaries. The consolidated financial statements reflect all adjustments and reclassifications which, in the opinion of management, are necessary for the fair presentation of the results of the operations and financial condition as of and for the periods presented. All significant intercompany balances and transactions have been eliminated.

### *Cash and Cash Equivalents*

Cash and cash equivalents include short-term, liquid investments in a money market fund. Cash and cash equivalents are carried at cost which approximates fair value.

### *Concentration of Credit Risk*

The Company places its cash and cash equivalents with financial institutions and, at times, cash held in money market accounts may exceed the Federal Deposit Insurance Corporation insured limit.

### *Investments*

Investment transactions are recorded on the trade date. Realized gains or losses are computed using the specific identification method. Investments for which market quotations are readily available are typically valued at such market quotations. In order to validate market quotations, we look at a number of factors to determine if the quotations are representative of fair value, including the source and nature of the quotations. Debt and equity securities that are not publicly traded or whose

Table of Contents

market prices are not readily available (i.e., substantially all of our investments) are valued at fair value as determined in good faith by our board of directors, based on the input of our management and audit committee and independent valuation firms that have been engaged at the direction of the board to assist in the valuation of each portfolio investment without a readily available market quotation at least once during a trailing 12 month period, and under a valuation policy and a consistently applied valuation process. The valuation process is conducted at the end of each fiscal quarter, with approximately 50% (based on value) of our valuations of portfolio companies without readily available market quotations subject to review by an independent valuation firm each quarter.

As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments: the enterprise value of a portfolio company (an estimate of the total fair value of the portfolio company's debt and equity), the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison of the portfolio company's securities to publicly traded securities, changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation.

Because there is not a readily available market value for most of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by our board of directors, based on the input of our management and audit committee and independent valuation firms under a valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may fluctuate from period to period. Additionally, the fair value of our investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize. Further, such investments are generally subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. If we were required to liquidate a portfolio investment in a forced or liquidation sale, we may realize significantly less than the value at which we have recorded it.

In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than would be realized based on the valuations currently assigned.

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

- Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals responsible for the portfolio investment in conjunction with our portfolio management team.
- Preliminary valuation conclusions are then documented and discussed by our management.
- The audit committee of our board of directors reviews these preliminary valuations, as well as the input of independent valuation firms with respect to the valuations of approximately 50% (based on value) of our portfolio companies without readily available market quotations.

- The board of directors discusses valuations and determines the fair value of each investment in our portfolio without a readily available market quotation in good faith based on the input of our management and audit committee and independent valuation firms.

Effective January 1, 2008, the Company adopted Accounting Standards Codification ( ASC ) 820-10 (previously Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( SFAS 157 )), which expands the application of fair value accounting for investments (see Note 8 to the consolidated financial statements).

#### ***Interest Income Recognition***

Interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis. Discounts and premiums on securities purchased are accreted/amortized over the life of the respective security using the effective yield

Table of Contents

method. The amortized cost of investments represents the original cost adjusted for the accretion of discounts and amortization of premiums.

Loans are generally placed on non-accrual status when principal or interest payments are past due 30 days or more or when there is reasonable doubt that principal or interest will be collected. Accrued interest is generally reversed when a loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment regarding collectability. Non-accrual loans are restored to accrual status when past due principal and interest is paid and, in management's judgment, are likely to remain current. The Company may make exceptions to this if the loan has sufficient collateral value and is in the process of collection. As of September 30, 2009, seven loans or 5.3% of total investments at amortized cost (or 1.7% at fair value), were placed on non-accrual status. As of December 31, 2008, six loans or 4.4% of total investments at amortized cost (or 1.6% at fair value), were placed on non-accrual status.

***Payment-in-Kind Interest***

The Company has loans in its portfolio that contain payment-in-kind (PIK) provisions. The PIK interest, computed at the contractual rate specified in each loan agreement, is added to the principal balance of the loan and recorded as interest income. To maintain the Company's status as a RIC, this non-cash source of income must be paid out to stockholders in the form of dividends even though the Company has not yet collected the cash. For the three and nine months ended September 30, 2009, \$10,825 and \$33,021, respectively, in PIK income was recorded. For the three and nine months ended September 30, 2008, \$9,735 and \$22,614, respectively, in PIK income was recorded.

***Capital Structuring Service Fees and Other Income***

The Company's investment adviser seeks to provide assistance to our portfolio companies in connection with the Company's investments and in return the Company may receive fees for capital structuring services. These fees are generally only available to the Company as a result of the Company's underlying investments, are normally paid at the closing of the investments, are generally non-recurring and are recognized as revenue when earned upon closing of the investment. The services that the Company's investment adviser provides vary by investment, but generally consist of reviewing existing credit facilities, arranging bank financing, arranging equity financing, structuring financing from multiple lenders, structuring financing from multiple equity investors, restructuring existing loans, raising equity and debt capital, and providing general financial advice, which concludes upon closing of the investment. Any services of the above nature subsequent to the closing would generally generate a separate fee payable to the Company. In certain instances where the Company is invited to participate as a co-lender in a transaction and does not provide significant services in connection with the investment, a portion of loan fees paid to the Company in such situations will be deferred and amortized over the estimated life of the loan. The Company's investment adviser may also take a seat on the board of directors of a portfolio company, or observe the meetings of the board of directors without taking a formal seat.

Other income includes fees for asset management, consulting, loan guarantees, commitments, and other services rendered by the Company to portfolio companies. Such fees are recognized as income when earned or the services are rendered.

***Foreign Currency Translation***

## Edgar Filing: ARES CAPITAL CORP - Form 10-Q

The Company's books and records are maintained in U.S. dollars. Any foreign currency amounts are translated into U.S. dollars on the following basis:

- (1) Market value of investment securities, other assets and liabilities at the exchange rates prevailing at the end of the period.
- (2) Purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions, income or expenses.

Results of operations based on changes in foreign exchange rates are separately disclosed in the statement of operations. Foreign security and currency translations may involve certain considerations and risks not typically associated with investing in U.S. companies and U.S. government securities. These risks include, but are not limited to, currency fluctuation and revaluations and future adverse political, social and economic developments, which could cause investments in foreign markets to be less liquid and prices more volatile than those of comparable U.S. companies or U.S. government securities.

Table of Contents

*Accounting for Derivative Instruments*

The Company does not utilize hedge accounting and marks its derivatives to market through operations.

*Offering Expenses*

The Company's offering costs, excluding underwriters fees, are charged against the proceeds from equity offerings when received. For the nine months ended September 30, 2009, and September 30, 2008, the Company incurred approximately \$806 and \$1,414 of offering costs, respectively.

*Debt Issuance Costs*

Debt issuance costs are being amortized over the life of the related credit facility using the straight line method, which closely approximates the effective yield method.

*U.S. Federal Income Taxes*

The Company has elected to be treated as a RIC under subchapter M of the Code and operates in a manner so as to qualify for the tax treatment applicable to RICs. In order to qualify as a RIC, among other things, the Company is required to timely distribute to its stockholders at least 90% of investment company taxable income, as defined by the Code, for each year. The Company, among other things, has made and intends to continue to make the requisite distributions to its stockholders, which will generally relieve the Company from U.S. federal income taxes.

Depending on the level of taxable income earned in a tax year, we may choose to carry forward taxable income in excess of current year dividend distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that the Company determines that its estimated current year annual taxable income will be in excess of estimated current year dividend distributions, the Company accrues excise tax, if any, on estimated excess taxable income as taxable income is earned. For the three months ended September 30, 2009, no amount was recorded for U.S. Federal excise tax. For the nine months ended September 30, 2009, a net benefit of \$30 was recorded for U.S. Federal excise tax. For the three months ended September 30, 2008, the Company recorded a benefit of \$135 for U.S. Federal excise tax. For the nine months ended September 30, 2008, the Company recorded a benefit of approximately \$434 for U.S. Federal excise tax.

Certain of our wholly owned subsidiaries are subject to U.S. Federal and state income taxes. For the three and nine months ended September 30, 2009, we recorded tax expenses of approximately \$454 and \$593, respectively, for these subsidiaries. For the three and nine months ended September 30, 2008, we recorded tax provisions of approximately \$17 and \$132, respectively, for these subsidiaries.

***Dividends***

Dividends and distributions to common stockholders are recorded on the record date. The amount to be paid out as a dividend is determined by the board of directors each quarter and is generally based upon the earnings estimated by management. Net realized capital gains, if any, are generally distributed at least annually, although we may decide to retain such capital gains for investment.

We have adopted a dividend reinvestment plan that provides for reinvestment of any distributions we declare in cash on behalf of our stockholders, unless a stockholder elects to receive cash. As a result, if our board of directors authorizes, and we declare, a cash dividend, then our stockholders who have not opted out of our dividend reinvestment plan will have their cash dividends automatically reinvested in additional shares of our common stock, rather than receiving the cash dividend. While we generally use primarily newly issued shares to implement the plan (especially if our shares are trading at a premium to net asset value), we may purchase shares in the open market in connection with our obligations under the plan. In particular, if our shares are trading at a significant enough discount to net asset value and we are otherwise permitted under applicable law to purchase such shares, we intend to purchase shares in the open market in connection with our obligations under our dividend reinvestment plan.

***Use of Estimates in the Preparation of Financial Statements***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of actual and contingent assets and liabilities at the date of the financial statements and the reported amounts of income or loss and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include the valuation of investments.

***New Accounting Pronouncements***

In June 2009, the Financial Accounting Standards Board ( FASB ) issued ASC 860 (previously SFAS No. 166, *Accounting for Transfer of Financial Assets*, which amends the guidance in SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*). It eliminates the qualifying special-purpose entities ( QSPEs ) concept, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, clarifies the derecognition criteria, revises how retained interests are initially measured, and removes the guaranteed mortgage securitization recharacterization provisions. ASC 860 requires additional year-end and interim disclosures for public and nonpublic companies that are similar to the disclosures required by FSP FAS 140-4 and FIN 46(R)-8. ASC 860 is effective as of the beginning of a company's first fiscal year that begins after November 15, 2009 (January 1, 2010 for calendar year-end companies), and for subsequent interim and annual reporting periods. ASC 860's disclosure requirements must be applied to transfers that occurred before and after its effective date. Early adoption is prohibited. We are currently evaluating the effect that the provisions of ASC 860 may have on our financial condition and results of operations.

In June 2009, FASB issued ASC 810 (previously SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, which amends the guidance in FASB Interpretation No. ( FIN ) 46(R), *Consolidation of Variable Interest Entities*). It requires reporting entities to evaluate former QSPEs for consolidation, changes the approach to determining the primary beneficiary of a variable interest entity (a VIE ) from a quantitative assessment to a qualitative assessment designed to identify a controlling financial interest, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a VIE. It also clarifies, but does not significantly change, the characteristics that identify a VIE. ASC 810 requires additional year-end and interim disclosures for public and non-public companies that are similar to the disclosures required by FSP FAS 140-4 and FIN 46(R)-8, *Disclosures by Public Entities (Enterprises) about Transfers of Financial Assets and Interests in Variable Interest Entities*. ASC 810 is effective as of the beginning of a company's first fiscal year that begins after November 15, 2009 (January 1, 2010 for calendar year-end companies), and for subsequent interim and annual reporting periods. All QSPEs and entities currently subject to FIN 46(R) will need to be reevaluated under the amended consolidation requirements as of the beginning of the first annual reporting period that begins after November 15, 2009. Early adoption is prohibited. We are currently evaluating the effect that the provisions of ASC 810 may have on our financial condition and results of operations.

In June 2009, FASB issued ASC 2005, (previously SFAS NO. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles ( GAAP ) a replacement of FASB Statement No. 162 ( Codification )*). This Codification will become the source of authoritative U.S. GAAP recognized by FASB to be applied by nongovernmental entities. Once the Codification is in effect, all of its content will carry the same level of authority, effectively superseding SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. In other words, the GAAP hierarchy will be modified to include only two levels of GAAP: authoritative and nonauthoritative. The Codification is not intended to change GAAP, but it will change the way GAAP is organized and presented. The Codification is effective for financial statements issued for interim and annual periods ending after September 15, 2009. In order to ease the transition to the Codification, the Company has provided the Codification cross-reference alongside the references to the standards issued and adopted prior to the adoption of the Codification.

**3. AGREEMENTS**

***Investment Advisory and Management Agreement***

## Edgar Filing: ARES CAPITAL CORP - Form 10-Q

The Company is party to an investment advisory and management agreement (the "investment advisory and management agreement") with Ares Capital Management. Subject to the overall supervision of our board of directors, Ares Capital Management provides investment advisory services to the Company. For providing these services, Ares Capital Management receives a fee from us, consisting of two components: a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.5% based on the average value of our total assets (other than cash or cash equivalents but including assets purchased with borrowed funds) at the end of the two most recently completed calendar quarters. The base management fee is payable quarterly in arrears.

The incentive fee has two parts. One part is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the quarter. Pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees such as commitment, origination, structuring, diligence and consulting fees or other fees that we receive from portfolio companies but excluding fees for providing managerial assistance) accrued during the calendar quarter, minus operating expenses for the quarter (including the base management fee, any expenses payable under the administration agreement, and any interest expense and dividends paid on any outstanding preferred stock, but excluding

Table of Contents

the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature such as market discount, debt instruments with payment-in-kind interest, preferred stock with payment-in-kind dividends and zero coupon securities, accrued income that we have not yet received in cash. The investment adviser is not under any obligation to reimburse us for any part of the incentive fee it received that was based on accrued interest that we never actually receive.

Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the incentive fee, it is possible that we may pay an incentive fee in a quarter where we incur a loss. For example, if we receive pre-incentive fee net investment income in excess of the hurdle rate (as defined below) for a quarter, we will pay the applicable incentive fee even if we have incurred a loss in that quarter due to realized and/or unrealized capital losses. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets (defined as total assets less indebtedness and before taking into account any incentive fees payable during the period) at the end of the immediately preceding calendar quarter, is compared to a fixed hurdle rate of 2.00% per quarter. If market interest rates rise, we may be able to invest our funds in debt instruments that provide for a higher return, which would increase our pre-incentive fee net investment income and make it easier for our investment adviser to surpass the fixed hurdle rate and receive an incentive fee based on such net investment income. Our pre-incentive fee net investment income used to calculate this part of the incentive fee is also included in the amount of our total assets (other than cash and cash equivalents but including assets purchased with borrowed funds) used to calculate the 1.5% base management fee.

We pay the investment adviser an incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

- no incentive fee in any calendar quarter in which the pre-incentive fee net investment income does not exceed the hurdle rate;
- 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.50% in any calendar quarter. We refer to this portion of our pre-incentive fee net investment income (which exceeds the hurdle rate but is less than 2.50%) as the catch-up provision. The catch-up is meant to provide our investment adviser with 20% of the pre-incentive fee net investment income as if a hurdle rate did not apply if this net investment income exceeds 2.50% in any calendar quarter; and
- 20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.50% in any calendar quarter.

These calculations are adjusted for any share issuances or repurchases during the quarter.

The second part of the incentive fee, the Capital Gains Fee, is determined and payable in arrears as of the end of each calendar year (or, upon termination of the investment advisory and management agreement, as of the termination date), and is calculated at the end of each applicable year by subtracting (a) the sum of our cumulative aggregate realized capital losses and aggregate unrealized capital depreciation from (b) our cumulative aggregate realized capital gains, in each case calculated from October 8, 2004. If such amount is positive at the end of such year, then the Capital Gains Fee for such year is equal to 20.0% of such amount, less the aggregate amount of Capital Gains Fees paid in all prior years. If such amount is negative, then there is no Capital Gains Fee for such year.

The cumulative aggregate realized capital gains are calculated as the sum of the differences, if positive, between (a) the net sales price of each investment in our portfolio when sold and (b) the accreted or amortized cost basis of such investment.

**8. FAIR VALUE OF FINANCIAL INSTRUMENTS**

Effective January 1, 2008, the company adopted ASC 825-10 (previously SFAS No. 159, *the Fair Value Option for Financial Assets and Liabilities*), which provides companies the option to report selected financial assets and liabilities at fair value. ASC 825-10 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect of the company's choice to use fair value on its earnings. ASC 825-10 also requires entities to display the fair value of the selected assets and liabilities on the face of the balance sheet. The Company has not elected the ASC 25-10 option to report selected financial assets and liabilities at fair value. As a result, with the exception of the line items entitled other assets and debt, which are reported at cost, all assets and liabilities approximate fair value on the balance sheet. The carrying value of the line items entitled interest receivable, receivable for open trades, payable for open trades, accounts payable and accrued expenses, management and incentive fees payable and interest and facility fees payable approximate fair value due to their short maturity.

Table of Contents

Effective January 1, 2008, the Company adopted ASC 820-10 (previously SFAS No. 157, *Fair Value Measurements*), which expands the application of fair value accounting. ASC 820-10 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles and expands disclosure of fair value measurements. ASC 820-10 determines fair value to be the price that would be received for an investment in a current sale, which assumes an orderly transaction between market participants on the measurement date. ASC 820-10 requires the Company to assume that the portfolio investment is sold in a principal market to market participants, or in the absence of a principal market, the most advantageous market, which may be a hypothetical market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact. In accordance with ASC 820-10, the Company has considered its principal market as the market in which the Company exits its portfolio investments with the greatest volume and level of activity. ASC 820-10 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. In accordance with ASC 820-10, these inputs are summarized in the three broad levels listed below:

- Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.
  
- Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.
  
- Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

In addition to using the above inputs in investment valuations, we continue to employ the valuation policy approved by our board of directors that is consistent with ASC 820-10 (see Note 2). Consistent with our valuation policy, we evaluate the source of inputs, including any markets in which our investments are trading (or any markets in which securities with similar attributes are trading), in determining fair value. Our valuation policy considers the fact that because there is not a readily available market value for most of the investments in our portfolio, the fair value of the investments must typically be determined using unobservable inputs.

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may fluctuate from period to period. Additionally, the fair value of our investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize. Further, such investments are generally subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. If we were required to liquidate a portfolio investment in a forced or liquidation sale, we may realize significantly less than the value at which we have recorded it.

In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than would be realized based on the valuations currently assigned.

The following table presents fair value measurements of cash and cash equivalents and investments as of September 30, 2009:

Our affiliate, IHAM, is party to a separate services agreement, referred to herein as the services agreement, with Ares Capital Management. Pursuant to the services agreement, Ares Capital Management provides IHAM with office facilities, equipment, clerical, bookkeeping and record keeping services, services of investment professionals and others to perform investment advisory, research and related services, services of, and oversight of, custodians, depositories, accountants, attorneys, underwriters and such other persons in any other capacity deemed to be necessary. Under the services agreement, IHAM will reimburse Ares Capital Management for all of the costs associated with such services, including Ares Capital Management's allocable portion of overhead and the cost of its officers and respective staff in performing its obligations under the services agreement. The services agreement may be terminated by either party without penalty upon 60-days' written notice to the other party. For the three and nine months ended September 30, 2009, IHAM incurred such expenses payable to the investment adviser of \$0 and \$538, respectively. No such expenses were payable for the three and nine months ended September 30, 2008.

In June 2009, because of a shift in activity from being primarily a manager with no dedicated employees and of funds in which the Company has invested debt and equity, to a manager with individuals dedicated to managing an increasing number of third party funds for which the Company has limited or no investment, we concluded that GAAP requires the financial results of IHAM to be reported as a portfolio company in our schedule of investments rather than as a consolidated subsidiary in the Company's financial results. The Company made an initial equity investment of \$3,816 into IHAM in June 2009.

For the three months ended September 30, 2009, the Company received a \$2,240 distribution from IHAM consisting of \$1,510 of dividend income and a \$730 return of the Company's investment which resulted in a \$494 realized gain. ## 15. SUBSEQUENT EVENTS

On October 26, 2009, we entered into a definitive agreement to acquire Allied Capital Corporation ( Allie Capital ) in an all stock transaction (the Allie Acquisition ) valued at \$648 million, or approximately \$3.47 per Allie Capital share as of October 23, 2009. The boards of directors of both companies have each unanimously approved the Allie Acquisition.

Under the terms of the transaction, each Allie Capital stockholder will receive 0.325 shares of our common stock for each share of Allie Capital common stock then owned by such stockholder. In connection with the Allie Acquisition, approximately 58.3 million shares of Ares Capital common stock (not including the effect of outstanding in-the money options) will be issued to Allie Capital s existing stockholders, thereby resulting in existing Ares Capital stockholders owning approximately 65% of the combined company and existing Allie Capital stockholders owning approximately 35% of the combined company. Consummation of the Allie Acquisition is subject to Allie Capital stockholder approval, Ares Capital stockholder approval, customary regulatory approvals, certain Ares Capital and Allie Capital lender consents and other closing conditions. The transaction is expected to close by the end of the first quarter of 2010. However, there can be no assurance that the Allie Acquisition will be consummated within this time frame, or at all.

In a separate transaction, on October 30, 2009, we completed our acquisition of Allie Capital s interests in the Senior Secured Loan Fund LLC (the SL Fund, formerly known as the Unitranche Fund) for \$165 million in cash. The SL Fund was formed in December 2007 to invest in unitranche loans of middle-market companies and has approximately \$3.6 billion of committed capital (approximately \$350 million of which would be funded by us), approximately \$900 million in aggregate principal amount of which is currently funded.

## OVERVIEW

We are a specialty finance company that is a closed-end, non-diversified management investment company incorporated in Maryland. We have elected to be regulated as a business development company (a BDC) under the Investment Company Act of 1940 (the Investment Company Act). We were founded on April 16, 2004 and were initially funded on June 23, 2004 and on October 8, 2004 completed our initial public offering (the IPO).

Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases includes an equity component like warrants. To a lesser extent we

make equity investments.

We are externally managed by Ares Capital Management LLC (the "Investment Adviser" or the "investment adviser"), an affiliate of Ares Management LLC, an independent international investment management firm, pursuant to an investment advisory and management agreement (the "Advisory Agreement"). Ares Operations LLC ("Ares Administration"), an affiliate of Ares Management LLC, provides the administrative services necessary for us to operate.

As a BDC, we are required to comply with certain regulatory requirements. For instance, we generally have to invest at least 70% of our total assets in "qualifying assets," including securities and indebtedness of private U.S. companies, cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less.

The Company has elected to be treated as a regulated investment company, or a RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code") and operates in a manner so as to qualify for the tax treatment applicable to RICs. To qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements and timely distribute to our stockholders at least 90% of our investment company taxable income, as defined by the Code, for each year. Pursuant to this election, we generally will not have to pay corporate level taxes on any income that we distribute to our stockholders.

(3) When we refer to the weighted average yield at fair value in this report, we compute it with respect to particular securities by taking the (a) annual stated interest rate or yield earned plus the net annual amortization of original issue discount and market discount earned on accruing debt included in such securities, and dividing it by (b) total debt and income producing securities at fair value included in such securities. When we refer to the weighted average yield at amortized cost in this report, we compute it with respect to particular securities by taking the (a) annual stated interest rate or yield earned plus the net annual amortization of original issue discount and market discount earned on accruing debt included in such securities, and dividing it by (b) total debt and income producing securities at amortized cost included in such securities.

The investment adviser employs an investment rating system to categorize our investments. In addition to various risk management and monitoring tools, the investment adviser grades the credit status of all investments on a scale of 1 to 4 no less frequently than quarterly. This system is intended to reflect the performance of the portfolio company's business, the collateral coverage of the investment and other relevant factors. Under this system, investments with a grade of 4 involve the least amount of risk in our portfolio. This portfolio company is performing above expectations and the trends and risk factors are generally favorable, including a potential exit. Investments graded 3 involve a level of risk that is similar to the risk at the time of origination. This portfolio company is performing as expected and the risk factors are neutral to favorable. All new investments are initially assessed a grade of 3. Investments graded 2 involve a portfolio company performing below expectations and indicates that the investment's risk

Table of Contents

has increased materially since origination. This portfolio company may be out of compliance with debt covenants, however, payments are generally not more than 120 days past due. For investments graded 2, our investment adviser increases procedures to monitor the portfolio company and will write down the fair value of the investment if it is deemed to be impaired. An investment grade of 1 indicates that the portfolio company is performing materially below expectations and that the investment risk has substantially increased since origination. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. Investments graded 1 are not anticipated to be repaid in full. Our investment adviser employs half-point increments to reflect underlying trends in portfolio company operating or financial performance, as well as the general outlook. As of September 30, 2009, the weighted average investment grade of the investments in our portfolio was 3.0 with 5.3% of total investments at amortized cost (or 1.7% at fair value) on non-accrual status. The weighted average investment grade of the investments in our portfolio as of December 31, 2008 was 2.9. The distribution of the grades of our portfolio companies as of September 30, 2009 and December 31, 2008 is as follows (dollar amounts in thousands):

**Investment Income**

For the three months ended September 30, 2009, total investment income decreased \$1.2 million, or 2%, over the three

Table of Contents

months ended September 30, 2008. For the three months ended September 30, 2009, total investment income consisted of \$56.9 million in interest income from investments, \$2.2 million in dividend income and \$1.6 million in other income. There were no capital structuring service fees for the three months ended September 30, 2009 compared to \$3.3 million for the same period in 2008. The decrease in capital structuring service fees was primarily due to the significant decrease in new investment commitments for the three months ended September 30, 2009 as compared to the three months ended September 30, 2008. Dividend income increased \$1.4 million or 186% to \$2.2 million for the three months ended September 30, 2009 from \$0.8 million for the comparable period in 2008 primarily due to the dividend from Ivy Hill Asset Management, L.P ( IHAM ) as a result of treating IHAM as a portfolio company (see Note 10 to the consolidated financial statements). Additionally, other income increased \$0.9 million or 120% to \$1.6 million for the three months ended September 30, 2009 from \$0.7 million for the comparable period in 2008 primarily due to miscellaneous amendment fees received during the period.

For the nine months ended September 30, 2009, total investment income decreased \$1.7 million, or 1%, over the nine months ended September 30, 2008. For the nine months ended September 30, 2009, total investment income consisted of \$163.2 million in interest income from investments, \$1.8 million in capital structuring service fees, \$3.4 million in dividend income, \$4.4 million in other income and \$2.7 million in management fees. Capital structuring service fees decreased \$16.7 million, or 90%, to \$1.8 million for the nine months ended September 30, 2009 from \$18.6 million for the comparable period in 2008. The decrease in capital structuring service fees was primarily due to the decrease in new investment commitments for the nine months ended September 30, 2009 as compared to the nine months ended September 30, 2008. Interest income from investments increased \$11.3 million, or 7%, to \$163.2 million for the nine months ended September 30, 2009 from \$151.9 million for the comparable period in 2008. The increase in interest income from investments was primarily due to the increase in the size of the portfolio. The average investments, at amortized cost, for the period increased from \$2.2 billion for the nine months ended September 30, 2008 to \$2.3 billion for the comparable period in 2009. Other income increased \$2.0 million or 82% to \$4.4 million for the nine months ended September 30, 2009 from \$2.4 million for the comparable period in 2008, primarily due to miscellaneous amendment fees received during the period. Dividend income increased \$1.5 million or 77% to \$3.4 million for the nine months ended September 30, 2009 from \$1.9 million for the comparable period in 2008, primarily due to the dividend from IHAM.

**Operating Expenses**

## Edgar Filing: ARES CAPITAL CORP - Form 10-Q

For the three months ended September 30, 2009, total expenses decreased \$1.8 million, or 6%, over the three months ended September 30, 2008. Interest expense and credit facility fees decreased \$3.8 million, or 40%, to \$5.7 million for the three months ended September 30, 2009 from \$9.5 million for the comparable period in 2008, primarily due to the lower average cost of debt. The average cost of debt for the three months ended September 30, 2009 was 2.16% compared to the average cost of debt of 3.74% for the comparable period in 2008 due to the significant decrease in LIBOR over the period. There were \$831 million in average outstanding borrowings during the three months ended September 30, 2009 compared to average outstanding borrowings of \$883 million in the comparable period in 2008. For the three months ended September 30, 2009, the Company incurred \$2.0 million in professional fees related to the Allied Acquisition that were not incurred in the comparable period in 2008.

For the nine months ended September 30, 2009, total expenses decreased \$2.8 million, or 3%, over the nine months ended September 30, 2008. Interest expense and credit facility fees decreased \$8.0 million, or 30%, to \$18.6 million for the nine months ended September 30, 2009 from \$26.6 million for the comparable period in 2008, primarily due to the lower average cost of debt. The average cost of debt for the nine months ended September 30, 2009 was 2.21% compared to the average cost of debt of 3.71% for the comparable period in 2008 due to the significant decrease in LIBOR over the period offset by a higher spread for the CP Funding Facility. There were \$865 million in average outstanding borrowings during the nine months ended September 30, 2009 compared to average outstanding borrowings of \$794 million in the comparable period in 2008. The decrease in total expenses was partially offset by the increase in administrative expense, which increased \$1.2 million, or 71%, to \$2.9 million for the nine months ended September 30, 2009 from \$1.7 million for the comparable period in 2008. This increase was primarily due to the expenses incurred by IHAM pursuant to the separate services agreement with Ares Capital Management LLC. There was no such agreement in place in the comparable period in 2008. Additionally, professional fees increased \$1.4 million, or 32%, to \$5.7 million for the nine months ended September 30, 2009 from \$4.4 million for the comparable period in 2008. This increase was primarily due to a rise in legal and valuation costs. For the three months ended September 30, 2009, the Company incurred \$2.0 million in professional fees related to the Allied Acquisition that were not incurred in the comparable period in 2008.

### FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Since the Company's inception, the Company's liquidity and capital resources have been generated primarily from the net proceeds of public offerings of common stock, the Debt Securitization, advances from the CP Funding Facility and Revolving Credit Facility, each as defined below (together with the CP Funding II Facility (as defined below), the Facilities), as well as cash flows from operations.

As of September 30, 2009, the Company had \$61.5 million in cash and cash equivalents and \$767.9 million in total indebtedness outstanding. Subject to leverage restrictions, the Company had approximately \$453.9 million available for additional

Table of Contents

borrowings under the Facilities as of September 30, 2009.

Due to volatility in global markets, the availability of capital and access to capital markets has been limited. Until constraints on raising new capital ease, we intend to pursue other avenues of liquidity such as adjusting the pace of our investments, becoming more selective in evaluating investment opportunities to ensure appropriate risk-adjusted returns, pursuing asset sales, and/or recycling lower yielding investments. As the global liquidity situation evolves, we will continue to monitor and adjust our funding approach accordingly. However, given the unprecedented nature of the volatility in the global markets, there can be no assurances that these activities will be successful. Moreover, if current levels of market disruption and volatility continue or worsen, we could face materially higher financing costs. Consequently, our operating strategy could be materially and adversely affected. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments. A failure to enter into definitive documentation on the Revolving Facility (as defined below) could have a material adverse impact on our business, financial condition and results of operations.

(1) Subject to borrowing base and leverage restrictions.

The weighted average interest rate and weighted average maturity of all our outstanding borrowings as of September 30, 2009 were 2.02% and 4.8 years, respectively. The weighted average interest rate and weighted average maturity of all our outstanding borrowings as of December 31, 2008 were 3.03% and 4.9 years, respectively.

The ratio of total debt outstanding to stockholders' equity as of September 30, 2009 was 0.63:1.00 compared to 0.83:1.00 as of December 31, 2008.

In December 2005, we entered into a senior secured revolving credit facility, referred to as the Revolving Credit Facility, under which, as amended, the lenders have agreed to extend credit to the Company in an aggregate principal amount not exceeding \$525.0 million at any one time outstanding. As of September 30, 2009, there was \$271.1 million outstanding under the Revolving Credit Facility (see Note 7 to the consolidated financial statements for more detail on the Revolving Credit Facility arrangement). The Revolving Credit Facility also includes an accordion feature that allows us to increase the size of the Revolving Credit Facility to a maximum of \$765.0 million under certain circumstances.

In October 2004, we formed Ares Capital CP Funding LLC (Ares Capital CP), a wholly owned subsidiary of the Company,

Table of Contents

through which we established a revolving facility, referred to as the CP Funding Facility, that, as amended, allows Ares Capital CP to issue up to \$350.0 million of variable funding certificates. On May 7, 2009, as part of the amendment to the CP Funding Facility, we reduced the total availability of the CP Funding Facility to \$225.0 million, of which the entire amount was outstanding as of September 30, 2009 (see Note 7 to the consolidated financial statements for more detail on the CP Funding Facility arrangement).

On July 21, 2009, we entered into an agreement with Wachovia Bank N.A. ( Wachovia ) to establish a new revolving facility (the CP Funding II Facility ) whereby Wachovia has agreed to extend credit to us in an aggregate principal amount not exceeding \$200 million at any one time outstanding. The CP Funding II Facility will expire three years after the closing thereof (plus two one-year options, subject to mutual consent) and the interest charged on the CP Funding II Facility will be based on LIBOR plus 4.00%. We are required to pay a commitment fee on any unused portion of the CP Funding II Facility of between 0.50% and 2.50% depending on the usage level and we paid a structuring fee of 1.5% of the total facility amount, or \$3.0 million.

In July 2006, through our wholly owned subsidiary, ARCC CLO 2006 LLC, we completed a \$400.0 million debt securitization, referred to as the Debt Securitization. As part of the Debt Securitization, \$314.0 million principal amount of asset-backed notes (including \$50 million of revolving notes, all of which had been drawn as of September 30, 2009) (the CLO Notes ) were issued to third parties and secured by a pool of middle market loans that had been purchased or originated by the Company. As of September 30, 2009, we also owned approximately \$120.8 million aggregate principal amount of certain AA, A, BBB and non-rated securities that we retained in the Debt Securitization or purchased in the open market. As of September 30, 2009, there was \$273.8 million aggregate principal amount of CLO Notes outstanding. The CLO Notes mature on December 20, 2019.

The CP Funding Facility was initially scheduled to expire on July 21, 2009. On May 7, 2009, as part of the amendment to the CP Funding Facility, we extended the maturity of the CP Funding Facility to May 7, 2012. The Revolving Credit Facility expires on December 28, 2010. Our ability to execute on our business plan relies to a certain extent on our ability to refinance/renew these facilities. However, there can be no assurance that we will be able to renew or refinance these facilities on acceptable terms or at all.

As of September 30, 2009, we had a long-term issuer rating of Ba1 from Moody's Investor Service and a long-term counterparty credit rating from Standard & Poor's Ratings Service of BBB.

**Portfolio Valuation**

Investments for which market quotations are readily available are typically valued at such market quotations. In order to validate market quotations, we look at a number of factors to determine if the quotations are representative of fair value, including the source and nature of the quotations. Debt and equity securities that are not publicly traded or whose market prices are not readily available (i.e., substantially all of our investments) are valued at fair value as determined in good faith by our board of directors, based on the input of our management and audit committee and independent valuation firms that have been engaged at the direction of the board to assist in the valuation of each portfolio investment without a readily available market quotation at least once during a trailing 12 month period, and under a valuation policy and a consistently applied valuation process. The valuation process is conducted at the end of each fiscal quarter, with approximately 50% (based on value) of our valuations of portfolio companies without readily available market quotations subject to review by an independent valuation firm each quarter.

## Edgar Filing: ARES CAPITAL CORP - Form 10-Q

As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments: the enterprise value of a portfolio company (an estimate of the total fair value of the portfolio company's debt and equity), the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, a comparison of the portfolio company's securities to publicly traded securities, changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation.

Because there is not a readily available market value for most of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by our board of directors, based on the input of our management and audit committee and independent valuation firms under a valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may fluctuate from period to period. Additionally, the fair value of our investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize. Further, such investments are generally subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. If we were required to liquidate a portfolio investment in a forced or liquidation sale, we may realize significantly less than the value at which we have recorded it.

Table of Contents

In addition, changes in the market environment, such as inflation, and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than would be realized based on the valuations currently assigned. See the risk factors included in our annual report on Form 10-K for the fiscal year ended December 31, 2008, including the Risk Factor entitled "Risk Factors - Risks Relating to our Investments." Price declines and illiquidity in the corporate debt markets have adversely affected, and may continue to adversely affect, the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

- Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals responsible for the portfolio investment in conjunction with our portfolio management team.
- Preliminary valuation conclusions are then documented and discussed by our management.
- The audit committee of our board of directors reviews these preliminary valuations, as well as the input of independent valuation firms with respect to the valuations of approximately 50% (based on value) of our portfolio companies without readily available market quotations.
- The board of directors discusses valuations and determines the fair value of each investment in our portfolio without a readily available market quotation in good faith based on the input of our management and audit committee and independent valuation firms.

Effective January 1, 2008, the Company adopted Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( SFAS 157 ), which expands the application of fair value accounting for investments (see Note 8 to the consolidated financial statements).

**OFF BALANCE SHEET ARRANGEMENTS**

Total revolving commitments	\$	295.4	\$	419.0
Less: funded commitments		(90.4)		(139.6)
Total unfunded commitments		205.0		279.4

## Edgar Filing: ARES CAPITAL CORP - Form 10-Q

Less: commitments substantially at discretion of the Company	(10.0)	(32.4)
Less: unavailable commitments due to borrowing base or other covenant restriction	(89.0)	(64.5)
Total net adjusted unfunded revolving commitments	\$ 106.0	\$ 182.5

Of the total commitments as of September 30, 2009, \$174.2 million extend beyond the maturity date for our Revolving Credit Facility. Additionally, \$104.4 million of the total commitments or \$6.5 million of the net adjusted unfunded commitments are scheduled to expire in 2009. Included within the total commitments as of September 30, 2009 are commitments to issue up to \$24.3 million in standby letters of credit through a financial intermediary on behalf of certain portfolio companies.

Under these arrangements, the Company would be required to make payments to third parties if the portfolio companies were to default on their related payment obligations. As of September 30, 2009, the Company had \$21.4 million in standby letters of credit issued and outstanding on behalf of the portfolio companies, of which no amounts were recorded as a liability. Of these letters of credit, \$0.3 million expire on January 31, 2010, \$0.2 million expire on February 28, 2010, \$3.7 million expire on March 31, 2010, \$8.0 million expire on July 31, 2010 and \$9.0 million expire on September 30, 2010. These letters of credit may be extended under substantially similar terms for additional one-year terms at the Company's option until the Revolving Credit Facility, under which the letters of credit were issued, matures on December 28, 2010.

As of September 30, 2009 and December 31, 2008, the Company was subject to subscription agreements to fund equity investments in private equity investment partnerships, substantially all at the discretion of the Company, as follows (in millions):

Total unfunded private equity commitments	\$ 419.1	\$ 423.6

**RECENT DEVELOPMENTS**

On October 26, 2009, we entered into a definitive agreement to acquire Allied Capital Corporation ( Allied Capital ) in an all stock transaction (the Allied Acquisition ) valued at \$648 million, or approximately \$3.47 per Allied Capital share as of October 23, 2009. The boards of directors of both companies have each unanimously approved the Allied Acquisition. We believe that the Allied Acquisition presents an opportunity for value creation for both Ares Capital and Allied Capital stockholders and creates a middle-market capital provider with leading market coverage, access to capital, scale and diversification.

Under the terms of the transaction, each Allied Capital stockholder will receive 0.325 shares of our common stock for each share of Allied Capital common stock then owned by such stockholder. In connection with the Allied Acquisition, approximately 58.3 million shares of Ares Capital common stock (not including the effect of outstanding in-the money options) will be issued to Allied Capital's existing stockholders, thereby resulting in existing Ares Capital stockholders owning approximately 65% of the combined company and existing Allied Capital stockholders owning approximately 35% of the combined company. Consummation of the Allied Acquisition is subject to Allied Capital stockholder approval, Ares Capital stockholder approval, customary regulatory approvals, certain Ares Capital and Allied Capital lender consents and other closing conditions. The transaction is expected to close by the end of the first quarter of 2010. However, there can be no assurance that the Allied Acquisition will be consummated within this time frame, or at all. See also Part II, Item 1 (Legal Proceedings).

In a separate transaction, on October 30, 2009, we completed our acquisition of Allied Capital's interests in the Senior Secured Loan Fund LLC (the SL Fund, formerly known as the Unitranche Fund) for \$165 million in cash. The SL Fund was formed in December 2007 to invest in unitranche loans of middle-market companies and has approximately \$3.6 billion of committed capital (approximately \$350 million of which would be funded by us), approximately \$900 million in aggregate principal amount of which is currently funded.

As of November 4, 2009, we made \$214.0 million of investments since September 30, 2009. Of these investments, 77% was for the investment in the SL Fund and the remaining 23% was in first lien senior secured debt. The SL fund has a stated rate of Libor plus 8.0% as well as rights to the excess cash flow of the SL Fund, subject to certain criteria. Of the first lien senior secured debt investments, all bear interest at floating rates with a weighted average yield at amortized cost of 13.2%. As of November 4, 2009, we exited \$5.2 million of investments since September 30, 2009. Of these investments, 36% was in first lien senior secured debt and 64% was in senior subordinated debt. The weighted average yield at amortized cost of these investments is 14.6%, and 64% bear interest at fixed rates.

In addition, as of November 4, 2009, we had an investment backlog and pipeline of \$33 million and \$105 million, respectively. We expect to syndicate a portion of these investments and commitments to third parties. The consummation of any of the investments in this backlog and pipeline depends upon, among other things: satisfactory completion of our due diligence investigation of the prospective portfolio company, our acceptance of the terms and structure of such investment and the execution and delivery of satisfactory transaction documentation. We cannot assure you that we will make any of these investments or that we will syndicate any portion of such investments and commitments.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

We are subject to financial market risks, including changes in interest rates and the valuations of our investment portfolio.

***Interest Rate Risk***

Interest rate sensitivity refers to the change in earnings that may result from changes in the level of interest rates. Because we fund a portion of our investments with borrowings, our net investment income is affected by the spread between the rate at which we invest and the rate at which we borrow. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income.

As of September 30, 2009, approximately 57% of the investments at fair value in our portfolio were at fixed rates while approximately 30% were at variable rates and 13% were non-interest earning. Additionally, 11% of the investments at fair value or 37% of the investments at fair value with variable rates contain interest rate floor features. The Debt Securitization, the CP Funding Facility and the Revolving Credit Facility all feature variable rates.

We regularly measure our exposure to interest rate risk. We assess interest rate risk and manage our interest rate exposure on an ongoing basis by comparing our interest rate sensitive assets to our interest rate sensitive liabilities. Based on that review, we determine whether or not any hedging transactions are necessary to mitigate exposure to changes in interest rates.

In October 2008, we entered into a two-year interest rate swap agreement for a total notional amount of \$75 million. Under the interest rate swap agreement, we will pay a fixed interest rate of 2.985% and receive a floating rate based on the prevailing three-month LIBOR. We believe that this agreement will enable us to mitigate interest rate risk and remain match funded.

While hedging activities may mitigate our exposure to adverse fluctuations in interest rates, certain hedging transactions that we may enter into in the future, such as interest rate swap agreements, may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio investments.

## PART II OTHER INFORMATION

### Item 1. Legal Proceedings.

On or about October 30, 2009, Elliot Sandler filed a shareholder derivative action allegedly on behalf of Allied Capital Corporation against the members of Allied Capital's Board of Directors, Ares Capital Corporation and nominally Allied Capital in the Superior Court of the District of Columbia. The action alleges that members of Allied Capital's Board failed adequately to discharge their fiduciary duties to the company and its shareholders by failing to adequately value and obtain fair consideration for Allied Capital's shares in the proposed merger between Ares Capital and Allied Capital. The complaint also alleges that the proposed merger may extinguish shareholder standing to pursue derivative claims related to certain alleged improprieties of Allied Capital's Board in connection with several matters including, among other things, the operation of one of Allied Capital's affiliate companies, Ciena Capital LLC, and the alleged improper valuation of Allied Capital's portfolio assets. A purported claim is asserted against Ares Capital for aiding and abetting Allied Capital's directors' alleged breaches of their fiduciary duties.

On or about November 3, 2009, James Harris and Robert Kieseewetter filed a putative class action and derivative complaint on behalf of themselves, a class of Allied Capital's shareholders and derivatively on behalf of Allied Capital, against the members of Allied Capital's Board of Directors and certain of its officers, Ares Capital Corporation, ARCC Odyssey Corp. and Allied Capital in the Circuit Court of Montgomery County, Maryland. The lawsuit alleges that the proposed merger between Ares Capital and Allied Capital is the product of a flawed sales process and that Allied Capital's directors and officers breached their fiduciary duties by agreeing to a structure that was not designed to maximize the value of Allied Capital's shares. In addition, the lawsuit asserts that Allied Capital, Ares Capital and ARCC Odyssey Corp. aided and abetted Allied Capital's officers' and directors' alleged breaches of their fiduciary duties.

Ares Capital believes that these claims are without merit and intends to vigorously defend against them.
