HARSCO CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

A. Basis of Presentation

The unaudited condensed consolidated financial statements and notes included in this report have been prepared by management of Harsco Corporation (the "Company"). In the opinion of management, all adjustments (all of which are of a normal recurring nature) that are necessary for a fair presentation are reflected in the condensed consolidated financial statements. The December 31, 2009 Condensed Consolidated Balance Sheets information contained in this Form 10-Q was derived from the 2009 audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America for a year-end report. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements, including the notes thereto, included in the Company's 2009 Annual Report on Form 10-K.

The Company is involved in the normal course of business with variable interest entities ("VIE") that are operating entities in the Harsco Infrastructure and Harsco Metals Segments. Generally, VIEs are utilized in countries with foreign ownership requirements or to facilitate the Company's entry into targeted growth markets. The Company is deemed the primary beneficiary in substantially all VIEs in which it is involved and consolidates them in its consolidated financial statements. VIEs in which the Company is not deemed the primary beneficiary are accounted for under the equity method and reported in the Company's Consolidated Balance Sheet as other assets. The Company's maximum exposure to loss with respect to all VIEs is limited to the carrying amounts reported in the Company's Consolidated Balance Sheet and any unfunded commitment. Neither the carrying amounts nor the unfunded commitments related to these VIEs are material.

Segment information for prior periods has been reclassified to conform with the current presentation. The Harsco Rail operating segment, which was previously a component of the All Other Category, is now reported separately.

The Company's management has evaluated all activity of the Company and concluded that subsequent events are properly reflected in the Company's unaudited condensed consolidated financial statements and notes as required by standards for accounting and disclosure of subsequent events.

Operating results and cash flows for the three and six months ended June 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

F. Acquisitions

Edgar Filing: HARSCO CORP - Form 10-Q

In January 2010, the Company acquired Bell Scaffolding Group (Bell), an Australia-based infrastructure solutions provider serving the industrial, infrastructure and commercial construction sectors. Bell 's capabilities range from technical design and support through supply and erect contracts. Bell generated revenues of approximately \$40 million in 2009 and has been included in the Harsco Infrastructure Segment.

Inclusion of the pro-forma financial information for this transaction is not necessary due to the immaterial size of the acquisition.

Certain of the Company 's acquisitions include contingent consideration features for which defined goals must be met by the acquired business in order for payment of the consideration. Each quarter until settlement of the contingency, the Company assesses the likelihood that an acquired business will achieve the goals and the resulting fair value of the contingency. The Company has consummated acquisitions whereby the purchase price included contingent consideration based on the performance of the business during 2010 and 2011. As of June 30, 2010, the Company 's assessment of these performance goals resulted in a reduction to the previously recognized contingent consideration liability of \$1.4 million and \$9.6 million for the three months and six months ended June 30, 2010, respectively. These reductions result from, among other things, difficult end-market conditions for the business, which are expected to continue for the remainder of 2010. In accordance with accounting standards for acquisitions, this adjustment was recognized in operating income in the Condensed Consolidated Income Statement as an increase to the Other (income) expense line item. As the fair value is evaluated on a quarterly basis, any future adjustments (increases or decreases) will also be included in operating income.

Table of Contents

G. Commitments and Contingencies

Environmental

The Company is involved in a number of environmental remediation investigations and cleanups and, along with other companies, has been identified as a potentially responsible party for certain waste disposal sites. While each of these matters is subject to various uncertainties, it is probable that the Company will agree to make payments toward funding certain of these activities and it is possible that some of these matters will be decided unfavorably to the Company. The Company has evaluated its potential liability, and its financial exposure is dependent upon such factors as the continuing evolution of environmental laws and regulatory requirements; the availability and application of technology; the allocation of cost among potentially responsible parties; the years of remedial activity required and the remediation methods selected. The Condensed Consolidated Balance Sheets at June 30, 2010 and December 31, 2009 included accruals in Other current liabilities of \$2.9 million and \$3.1 million, respectively, for environmental matters. The amounts charged against pre-tax income related to environmental matters totaled \$0.4 million for the second quarter and \$0.7 million for the first six months of 2010, respectively. This compares with \$0.8 million and \$1.2 million for the second quarter and first six months of 2009, respectively.

The Company evaluates its liability for future environmental remediation costs on a quarterly basis. Actual costs to be incurred at identified sites in future periods may vary from the estimates, given inherent uncertainties in evaluating environmental exposures. The Company does not expect that any sum it may have to pay in connection with environmental matters in excess of the amounts recorded or disclosed above would have a material adverse effect on its financial position, results of operations or cash flows.

Gas Technologies Divestiture

In October 2009, the Company and Taylor-Wharton International (TWI), the purchaser of the Company's Gas Technologies business, satisfactorily resolved certain claims and counterclaims that had been submitted to arbitration. The claims and counterclaims related both to net working capital adjustments associated with the divestiture and to alleged breach of certain representations and warranties made by the Company. The settlement and related costs and fees were reflected in the \$15.1 million after-tax loss from discontinued operations recorded by the Company for the twelve months ended December 31, 2009.

In November 2009, TWI filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. During its bankruptcy, TWI filed a motion to reject certain executory contracts, including the parties' Asset and Stock Purchase Agreement dated as of December 7, 2007 (the ASPA). TWI, however, did not seek to reject the settlement agreement finalized in October 2009 between the Company and TWI.

In May and June 2010, the bankruptcy court entered orders confirming TWI's plan of reorganization and approving TWI's rejection of certain executory contracts, including the ASPA. On June 15, 2010, reorganized TWI emerged from bankruptcy.

The Company recorded a pre-tax charge of \$5.0 million in the second quarter of 2010 related to potential and contingent claims arising as a result of the rejection of the ASPA. This charge was recorded in Loss from Discontinued Operations. Claims are inherently uncertain and, as a

result, potential claims could be resolved at an amount significantly above the amount charged.

Value-Added Tax Dispute

The Company is involved in a value-added and services (ICMS) tax dispute with the State Revenue Authorities from the State of São Paulo, Brazil (the SPRA). In October 2009, the Company received notification of the SPRA 's administrative decision regarding the levying of ICMS in the State of São Paulo in relation to services provided to one of the Company 's customers in the State between January 2004 and May 2005. The assessment from the SPRA is approximately \$12 million, including tax, penalty and interest and could increase to reflect additional interest accrued since December 2007.

The Company believes that it does not have liability for this assessment and will vigorously contest it under various alternatives, including judicial appeal. Any ultimate final determination of this assessment is not likely to have a material adverse effect on the Company 's annual results of operations, cash flows or financial condition.

Other

The Company has been named as one of many defendants (approximately 90 or more in most cases) in legal actions alleging personal injury from exposure to airborne asbestos over the past several decades. In their suits, the plaintiffs have named as defendants, among others, many manufacturers, distributors and installers of numerous types of equipment or products that allegedly contained asbestos.

Edgar Filing: HARSCO CORP - Form 10-Q

Table of Contents

The Company believes that the claims against it are without merit. The Company has never been a producer, manufacturer or processor of asbestos fibers. Any component within a Company product that may have contained asbestos would have been purchased from a supplier. Based on scientific and medical evidence, the Company believes that any asbestos exposure arising from normal use of any Company product never presented any harmful levels of airborne asbestos exposure, and moreover, the type of asbestos contained in any component that was used in those products was protectively encapsulated in other materials and is not associated with the types of injuries alleged in the pending suits. Finally, in most of the depositions taken of plaintiffs to date in the litigation against the Company, plaintiffs have failed to specifically identify any Company products as the source of their asbestos exposure.

The majority of the asbestos complaints pending against the Company have been filed in New York. Almost all of the New York complaints contain a standard claim for damages of \$20 million or \$25 million against the approximately 90 defendants, regardless of the individual plaintiff's alleged medical condition, and without specifically identifying any Company product as the source of plaintiff's asbestos exposure.

As of June 30, 2010, there are 24,120 pending asbestos personal injury claims filed against the Company. Of these cases, 23,620 were pending in the New York Supreme Court for New York County in New York State. The other claims, totaling 500, are filed in various counties in a number of state courts, and in certain Federal District Courts (including New York), and those complaints generally assert lesser amounts of damages than the New York State court cases or do not state any amount claimed.

As of June 30, 2010, the Company has obtained dismissal by stipulation, or summary judgment prior to trial, in 20,484 cases.

In view of the persistence of asbestos litigation nationwide, the Company expects to continue to receive additional claims. However, there have been developments during the past several years, both by certain state legislatures and by certain state courts, which could favorably affect the Company's ability to defend these asbestos claims in those jurisdictions. These developments include procedural changes, docketing changes, proof of damage requirements and other changes that require plaintiffs to follow specific procedures in bringing their claims and to show proof of damages before they can proceed with their claim. An example is the action taken by the New York Supreme Court (a trial court), which is responsible for managing all asbestos cases pending within New York County in the State of New York. This Court issued an order in December 2002 that created a Deferred or Inactive Docket for all pending and future asbestos claims filed by plaintiffs who cannot demonstrate that they have a malignant condition or discernable physical impairment, and an Active or In Extremis Docket for plaintiffs who are able to show such medical condition. As a result of this order, the majority of the asbestos cases filed against the Company in New York County have been moved to the Inactive Docket until such time as the plaintiffs can show that they have incurred a physical impairment. As of June 30, 2010, the Company has been listed as a defendant in 765 Active or In Extremis asbestos cases in New York County. The Court's Order has been challenged by plaintiffs.

Except with regard to the legal costs in a few limited, exceptional cases, the Company's insurance carrier has paid all legal and settlement costs and expenses to date. The Company has liability insurance coverage under various primary and excess policies that the Company believes will be available, if necessary, to substantially cover any liability that might ultimately be incurred on these claims.

The Company intends to continue its practice of vigorously defending these cases as they are listed for trial. It is not possible to predict the ultimate outcome of asbestos-related lawsuits, claims and proceedings due to the unpredictable nature of personal injury litigation. Despite this uncertainty, and although results of operations and cash flows for a given period could be adversely affected by asbestos-related lawsuits, claims and proceedings, management believes that the ultimate outcome of these cases will not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

The Company is subject to various other claims and legal proceedings covering a wide range of matters that arose in the ordinary course of business. In the opinion of management, all such matters are adequately covered by insurance or by accruals, and if not so covered, are without merit or are of such kind, or involve such amounts, as would not have a material adverse effect on the financial position, results of operations or cash flows of the Company.

Insurance liabilities are recorded when it is probable that a liability has been incurred for a particular event and the amount of loss associated with the event can be reasonably estimated. Insurance reserves have been estimated based primarily upon actuarial calculations and reflect the undiscounted estimated liabilities for ultimate losses including claims incurred but not reported. Inherent in these estimates are assumptions that are based on the Company's history of claims and losses, a detailed analysis of existing claims with respect to potential value, and current legal and legislative trends. If actual claims differ from those projected by management, changes (either increases or decreases) to insurance reserves

Table of Contents

may be required and would be recorded through income in the period the change was determined. When a recognized liability is covered by third-party insurance, the Company records an insurance claim receivable to reflect the covered liability. Insurance claim receivables are included in Other receivables in the Company's Consolidated Balance Sheets. See Note 1, Summary of Significant Accounting Policies, of the Company's Form 10-K for the year ended December 31, 2009, for additional information on Accrued Insurance and Loss Reserves.

H. Reconciliation of Basic and Diluted Shares

(In thousands, except per share amounts)	Three Months Ended June 30		Six Months Ended June 30	
	2010	2009	2010	2009
Income from continuing operations attributable to Harsco Corporation common stockholders	\$ 32,498	\$ 42,077	\$ 40,281	\$ 61,893
Weighted average shares outstanding - basic	80,559	80,289	80,551	80,269
Dilutive effect of stock-based compensation	176	265	188	250
Weighted average shares outstanding - diluted	80,735	80,554	80,739	80,519
Earnings from continuing operations per common share, attributable to Harsco Corporation common stockholders:				
Basic	\$ 0.40	\$ 0.52	\$ 0.50	\$ 0.77
Diluted	\$ 0.40	\$ 0.52	\$ 0.50	\$ 0.77

At June 30, 2010, there were 500 and 18,310 restricted stock units outstanding that were not included in the three month and six months computation of diluted earnings per share, respectively, because the effect was antidilutive. At June 30, 2009, there were 1,999 and 43,709 restricted stock units outstanding that were not included in the three months and six months computation of diluted earnings per share, respectively, because the effect was antidilutive.

Defined benefit plans net periodic pension cost	\$ 1,219	\$ 2,450	\$ 8,815	\$ 7,077

In the quarter ended June 30, 2010, the Company contributed \$0.5 million and \$3.8 million for the U.S. and international defined benefit pension plans, respectively. In the six months ended June 30, 2010, the Company contributed \$0.9 million and \$9.7 million for the U.S. and international defined benefit pension plans, respectively. The Company currently anticipates contributing an additional \$1.3 million and \$18.2 million for the U.S. and international plans, respectively, during the remainder of 2010.

In the quarter ended June 30, 2010, the Company's contributions to multi-employer and defined contribution pension plans were \$6.4 million and \$2.9 million, respectively. In the six months ended June 30, 2010, the Company contributed \$11.1 million and \$5.7 million to multiemployer and defined contribution plans, respectively.

J. Recently Adopted and Recently Issued Accounting Standards

The following accounting standards were adopted in 2010:

On January 1, 2010, the Company adopted changes issued by the Financial Accounting Standards Board (FASB) on accounting for variable interest entities. These changes require an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity; to require ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity; to eliminate the solely quantitative approach previously required for determining the primary beneficiary of a variable interest entity; to add an additional reconsideration event for determining whether an entity is a variable interest entity when any changes in facts and circumstances occur such that holders of the equity investment at risk, as a group, lose the power from voting rights or similar rights of those investments to direct the activities of the entity that most significantly impact the entity's economic performance; and to require enhanced disclosures that will provide users of financial statements with more transparent information about an enterprise's involvement in a variable interest entity. Other than additional disclosure requirements concerning variable interest entities, the adoption of these changes had no impact on the Company's consolidated financial statements.

Effective January 1, 2010, the Company adopted changes to the FASB's previously-issued guidance on accounting for noncontrolling interests in consolidated financial statements. These changes were issued by the FASB on January 6, 2010 and clarify the accounting and reporting guidance for noncontrolling interests and changes in ownership interests of a consolidated subsidiary. An entity is required to deconsolidate a subsidiary when the entity ceases to have a controlling financial interest in the subsidiary. Upon deconsolidation of a subsidiary, an entity

Edgar Filing: HARSCO CORP - Form 10-Q

recognizes a gain or loss on the transaction and measures any retained investment in the subsidiary at fair value. The gain or loss includes any gain or loss associated with the difference between the fair value of the retained investment in the subsidiary and its carrying amount at the date the subsidiary is deconsolidated. In contrast, an entity is required to account for a decrease in its ownership interest of a subsidiary that does not result in a change of control of the subsidiary as an equity transaction. The adoption of these changes had no impact on the Company's consolidated financial statements.

Effective January 1, 2010, the Company adopted changes issued by the FASB on January 21, 2010 related to disclosure requirements for fair value measurements. The changes require a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers. The changes also clarify existing disclosure requirements related to how assets and liabilities should be grouped by class and valuation techniques used for recurring and nonrecurring fair value measurements. The adoption of these changes had no impact on the Company's consolidated financial statements.

Table of Contents

Effective January 1, 2010, the Company adopted changes issued by the FASB on February 24, 2010 to the accounting for and disclosure of events that occur after the balance sheet date, but before financial statements are issued or are available to be issued, generally referred to as subsequent events. These changes clarified that an entity that is required to file or furnish its financial statements with the Securities and Exchange Commission (SEC) is not required to disclose the date through which subsequent events have been evaluated. Other than the elimination of disclosing this date, the adoption of these changes had no impact on the Company's consolidated financial statements.

The following accounting standards have been issued and become effective for the Company at various future dates:

In October 2009, the FASB issued changes related to the accounting for revenue recognition when multiple-deliverable revenue arrangements are present. The changes eliminate the residual method of revenue allocation and require revenue to be allocated using the relative selling price method. This method allows a vendor to use its best estimate of selling price if neither vendor-specific objective evidence nor third-party evidence of selling price exists when evaluating multiple deliverable arrangements. These changes must be adopted no later than January 1, 2011 and may be adopted prospectively for revenue arrangements entered into or materially modified after the date of adoption or retrospectively for all revenue arrangements for all periods presented. Management is currently evaluating the requirements of these changes and has not yet determined the impact on the Company's consolidated financial statements.

In January 2010, the FASB issued changes to disclosure requirements for fair value measurements. The changes require a reporting entity to disclose, in the reconciliation of fair value measurements using significant unobservable inputs (Level 3), separate information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number). These changes become effective for the Company beginning January 1, 2011. Other than the additional disclosure requirements, management has determined these changes will not have an impact on the Company's consolidated financial statements.

K. Derivative Instruments, Hedging Activities and Fair Value

The Company uses derivative instruments, including swaps and forward contracts, to manage certain foreign currency, commodity price and interest rate exposures. Derivative instruments are viewed as risk management tools by the Company and are not used for trading or speculative purposes.

All derivative instruments are recorded on the balance sheet at fair value. Changes in the fair value of derivatives used to hedge foreign-currency-denominated balance sheet items are reported directly in earnings along with offsetting transaction gains and losses on the items being hedged. Derivatives used to hedge forecasted cash flows associated with foreign currency commitments or forecasted commodity purchases may be accounted for as cash flow hedges as deemed appropriate and if the criteria for hedge accounting are met. Gains and losses on derivatives designated as cash flow hedges are deferred as a separate component of equity and reclassified to earnings in a manner that matches the timing of the earnings impact of the hedged transactions. Generally, as of June 30, 2010, these deferred gains and losses will be reclassified to earnings over 10 to 15 years from the balance sheet date. The ineffective portion of all hedges, if any, is recognized currently in earnings.

The fair values of outstanding derivative contracts recorded as assets and liabilities in the accompanying Condensed Consolidated Balance Sheets were as follows:

(In thousands)	Fair Values of Derivative Contracts		
	Other current assets	Other assets	Other current liabilities
At June 30, 2010:			
Derivatives designated as hedging instruments:			
Commodity contracts	\$	\$	\$ 25

(a) These gains (losses) offset foreign currency fluctuation effects on the debt principal.

Derivatives Not Designated as Hedging Instruments

	Location of Gain (Loss) Recognized in Income on Derivative	Amount of Gain (Loss) Recognized in Income on Derivative For the Three months Ended June 30 (a)	
(In thousands)		2010	2009
Foreign currency forward exchange contracts	Cost of services and products sold	\$ 5,406	\$ (3,215)

(a) These gains (losses) offset amounts recognized in cost of service and products sold principally as a result of intercompany or third party foreign currency exposures.

Table of Contents**Derivatives Not Designated as Hedging Instruments**

(In thousands)	Location of Gain (Loss) Recognized in Income on Derivative	Amount of Gain (Loss) Recognized in Income on Derivative For the Six Months Ended June 30 (a)	
		2010	2009
Foreign currency forward exchange contracts	Cost of services and products sold	\$ 8,087	\$ (6,758)

(a) These gains (losses) offset amounts recognized in cost of service and products sold principally as a result of intercompany or third party foreign currency exposures.

Commodity Derivatives

The Company periodically uses derivative instruments to hedge cash flows associated with purchase or selling price exposure to certain commodities. The Company's commodity derivative activities are subject to the management, direction and control of the Company's Risk Management Committee, which approves the use of all commodity derivative instruments.

At June 30, 2010, the Company's open commodity derivative contract positions qualified as cash flow hedges under the requirements for hedge accounting and consisted of unsecured swap contracts maturing in July 2010. The notional value of these contracts is equal to the hedged volume multiplied by the strike price of the derivative and totaled \$0.4 million. All contracts are with major financial institutions. In the event of non-performance by the other parties to the contracts, the Company may be exposed to credit loss. The Company evaluates the credit-worthiness of the counterparties and does not expect default by them. There were no commodity derivative contracts outstanding at December 31, 2009.

Although earnings volatility may occur between fiscal quarters due to hedge ineffectiveness, or if the derivatives do not qualify as cash flow hedges under hedge accounting standards, the economic substance of the derivatives provides more predictable cash flows by reducing the Company's exposure to the commodity price fluctuations.

Foreign Currency Forward Exchange Contracts

The Company conducts business in multiple currencies and, accordingly, is subject to the inherent risks associated with foreign exchange rate movements. The financial position and results of operations of substantially all of the Company's foreign subsidiaries are measured using the local currency as the functional currency. Foreign currency denominated assets and liabilities are translated into U.S. dollars at the exchange rates existing at the respective balance sheet dates, and income and expense items are translated at the average exchange rates during the respective periods. The aggregate effects of translating the balance sheets of these subsidiaries are deferred and recorded in Accumulated other comprehensive loss or income, which is a separate component of equity.

The Company uses derivative instruments to hedge cash flows related to foreign currency fluctuations. At June 30, 2010 and December 31, 2009, the Company had \$178.5 million and \$122.1 million, respectively, of contracted notional amounts of unsecured foreign currency forward exchange contracts outstanding. These contracts are part of a worldwide program to minimize foreign currency exchange operating income and balance sheet exposure by offsetting foreign currency exposures of certain future payments between the Company and its various subsidiaries, vendors or customers. The contracts outstanding at June 30, 2010 mature at various times within five months and are with major financial institutions. The Company may be exposed to credit loss in the event of non-performance by the contract counterparties. The Company evaluates the credit worthiness of the counterparties and does not expect default by them. Foreign currency forward exchange contracts are used to hedge commitments, such as foreign currency debt, firm purchase commitments and foreign currency cash flows for certain export sales transactions.

The following tables summarize, by major currency, the contractual notional amounts of the Company's foreign currency forward exchange contracts in U.S. dollars at June 30, 2010 and December 31, 2009. The Buy amounts represent the U.S. dollar equivalent of commitments to purchase foreign currencies, and the Sell amounts represent the U.S. dollar equivalent of commitments to sell foreign currencies. Recognized gains and losses offset amounts recognized in cost of services and products sold principally as a result of intercompany or third party foreign currency exposures.

Table of Contents**Foreign Currency Forward Exchange Contracts****At June 30, 2010**

(In thousands)	Type		U.S. Dollar Equivalent	Maturity		Recognized Gain (Loss)
British pounds sterling	Sell	\$	25,170	July 2010	\$	(288)

Other currencies	Buy		2,867	January 2010 through March 2010		(12)
Total		\$	122,126		\$	1,583

In addition to foreign currency forward exchange contracts, the Company designates certain loans as hedges of net investments in foreign subsidiaries. The Company recorded a loss of \$32.8 million and income of \$13.0 million during the three months ended June 30, 2010 and 2009, respectively, and a loss of \$52.1 million and a gain of less than \$0.1 million during the six months ended June 30, 2010 and 2009, respectively, in Accumulated other comprehensive loss, which is a separate component of stockholders' equity, related to hedges of net investments.

Cross-Currency Interest Rate Swap

In May 2008, the Company entered into a ten-year, \$250.0 million cross-currency interest rate swap in conjunction with a debt issuance in order to lock in a fixed euro interest rate for \$250.0 million of the issuance. Under the swap, the Company receives interest based on a fixed U.S. dollar rate and pays interest on a fixed euro rate on the outstanding notional principal amounts in dollars and euros, respectively. The cross-currency interest rate swap is recorded in the Condensed Consolidated Balance Sheets at fair value, with changes in value attributed to the effect of the swaps' interest spread recorded in Accumulated other comprehensive loss, which is a separate component of equity. Changes in value attributed to the effect of foreign currency fluctuations are recorded in the Condensed Consolidated Income Statement and offset currency fluctuation effects on the debt principal.

Fair Value of Derivative Assets and Liabilities and Other Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The Company utilizes market data or assumptions that the Company believes market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique.

The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 Inputs that are both significant to the fair value measurement and unobservable.

Table of Contents

In instances in which multiple levels of inputs are used to measure fair value, hierarchy classification is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

The following tables indicate the different financial instruments of the Company at June 30, 2010, and December 31, 2009.

Level 2 Fair Value Measurements

(In thousands)	June 30 2010	December 31 2009
Assets		
Foreign currency forward exchange contracts	\$ 1,385	\$ 2,187
Cross-currency interest rate swap	54,031	7,357
Liabilities		
Commodity derivatives	25	
Foreign currency forward exchange contracts	716	604

Level 3 Fair Value Measurements

(In thousands)	June 30 2010	December 31 2009
Liabilities		
Contingent consideration for acquisitions	\$ 4,722	\$ 9,735

The following table reconciles the beginning and ending balances for liabilities measured on a recurring basis using unobservable inputs (Level 3) for the three months and six months ended June 30, 2010. There were no Level 3 balances for the corresponding periods in 2009.

Level 3 Liabilities - Contingent Consideration

(In thousands)	Three Months Ended June 30 2010	Six Months Ended June 30 2010
Balance at beginning of period	\$ 6,089	\$ 9,735
Acquisitions during the period		4,618
Fair value adjustments included in earnings	(1,367)	(9,631)
Balance June 30, 2010	\$ 4,722	\$ 4,722

Edgar Filing: HARSCO CORP - Form 10-Q

The Company primarily applies the market approach for recurring fair value measurements and endeavors to utilize the best available information. Accordingly, the Company utilizes valuation techniques that maximize the use of observable inputs, such as forward rates, interest rates, the Company's credit risk and counterparties' credit risks, and minimize the use of unobservable inputs. The Company is able to classify fair value balances based on the observability of those inputs. Commodity derivatives, foreign currency forward exchange contracts and cross-currency interest rate swaps are classified as Level 2 fair value based upon pricing models using market-based inputs. Model inputs can be verified, and valuation techniques do not involve significant management judgment.

The carrying amounts of cash and cash equivalents, accounts receivable, accounts payable, accrued liabilities, and short-term borrowings approximate fair value due to the short-term maturities of these assets and liabilities. At June 30, 2010, and December 31, 2009, total fair value of long-term debt, including current maturities, was \$983.5 million and \$965.5 million, respectively, compared to carrying value of \$908.3 million and \$927.5 million, respectively. Fair values for debt are based on quoted market prices for the same or similar issues or on the current rates offered to the Company for debt of the same remaining maturities.

Table of Contents

L. Restructuring Programs

2010 Restructuring Program

As a result of the continued financial and economic crisis, the Company implemented additional actions in 2010 to further reduce its global workforce and close certain facilities. The Harsco Infrastructure and Harsco Metals Segments recorded net pre-tax restructuring charges totaling \$2.9 million and \$12.0 million in the quarter and six months ended June 30, 2010, respectively, in the Other (income) expense line of the Condensed Consolidated Income Statements. These restructuring actions are expected to be completed over the next twelve months, but principally during the remainder of 2010.

Through June 30, 2010, the Company completed workforce reductions related to these actions of 197 employees of a total expected workforce reduction of 387 employees. Remaining workforce reductions and costs to exit activities are targeted for completion during the remainder of 2010.

2008 Restructuring Program

The 2008 program was designed to improve organizational efficiency and enhance profitability and stockholder value by generating sustainable operating expense savings. Under this program, the Company principally exited certain underperforming contracts with customers, closed certain facilities and reduced the global workforce. Restructuring costs were incurred primarily in the Harsco Metals and Harsco Infrastructure Segments and recorded in the Other (income) expense line of the Condensed Consolidated Income Statements. In the fourth quarter of 2008, the Company recorded net pre-tax restructuring and other related charges totaling \$36.1 million, including \$28.0 million in Other expense, \$5.8 million reduction in services revenue, a net \$1.5 million related to pension curtailments and \$0.8 million of other costs.

Through June 30, 2010, the Company has completed substantially all workforce reductions under the 2008 restructuring program totaling 1,429 employees related to this restructuring program. Remaining exit activities relate to the Harsco Metals Segment and are targeted for completion during 2010. These restructuring activities were not completed in 2009 due to continued negotiations with labor unions and customers that resulted in changes to estimates of the amount of restructuring costs and the timing of their settlement. The remaining accrual at June 30, 2010 for the 2008 Restructuring Program is \$0.4 million.

The restructuring accrual at June 30, 2010 and the activity for the six months then ended by segment is as follows:

	Accrual December 31 2009	2010 Restructuring Program Charges	Adjustments to Previously Recorded Restructuring Charges (a)	Cash Expenditures	Remaining Accrual June 30 2010
(In thousands)					

Edgar Filing: HARSCO CORP - Form 10-Q

Harsco Infrastructure Segment					
Employee termination benefit costs	\$	122	\$	5,915	\$ (3,164) \$ 2,873
Cost to exit activities				3,907	(2,682) 1,225
Total Harsco Infrastructure Segment		122		9,822	(5,846) 4,098
Harsco Metals Segment					
Employee termination benefit costs		3,317		2,142	(49) (4,020) 1,390
Cost to exit activities		186		53	(56) (183)
Total Harsco Metals Segment		3,503		2,195	(105) (4,203) 1,390
Total	\$	3,625	\$	12,017	\$ (105) \$ (10,049) \$ 5,488

(a) Adjustments to previously recorded cost to exit activities resulted from changes in facts and circumstances in the implementation of these activities.

The majority of the remaining cash expenditures of \$5.5 million related to these actions are expected to be paid throughout the remainder of 2010.

Table of Contents**M. Income Taxes**

Income tax expense from Continuing Operations increased due to lower earnings from continuing operations in jurisdictions with lower tax rates and an increase in the effective income tax rate from continuing operations. The effective income tax rate relating to continuing operations for the three months and six months ended June 30, 2010 was 27.3% and 26.6%, respectively, compared with 22.5% and 17.9%, respectively, for the three months and six months ended June 30, 2009. The effective income tax rate for the first six months of 2009 reflected net discrete tax benefits recognized in the first quarter related to a change in the permanent reinvestment of prior-year undistributed earnings.

N. Other (Income) Expense

This income statement classification includes restructuring costs for employee termination benefits and costs to exit activities; impaired asset write-downs; net gains or losses on the disposal of non-core assets; and contingent consideration adjustments related to acquisitions by the Company.

(In thousands)	Three Months Ended June 30		Six Months Ended June 30	
	2010	2009	2010	2009
Restructuring costs	\$ 3,080	\$ 3,584	\$ 12,405	\$ 5,188
Gains from sale of non-core assets	(2,177)	(1,351)	(5,854)	(5,786)
Contingent consideration adjustments	(1,367)		(9,631)	
Other	70	103	177	128
Other (income) expense	\$ (394)	\$ 2,336	\$ (2,903)	\$ (470)

For the three months and six months ended June 30, 2010, restructuring costs were incurred principally in the Harsco Infrastructure Segment.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the accompanying unaudited financial statements as well as the Company's annual Form 10-K for the year ended December 31, 2009, which included additional information about the Company's critical accounting policies, contractual obligations, practices and the transactions that support the financial results, and provided a more comprehensive summary of the Company's outlook, trends and strategies for 2010 and beyond.

Throughout this discussion, segment information for prior periods has been reclassified to conform with the current presentation. The Harsco Rail operating segment, which was previously a component of the All Other Category, is now reported separately.

Forward-Looking Statements

The nature of the Company's business and the many countries in which it operates subject it to changing economic, competitive, regulatory and technological conditions, risks and uncertainties. In accordance with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company provides the following cautionary remarks regarding important factors that, among others, could cause future results to differ materially from the forward-looking statements, expectations and assumptions expressed or implied herein. Forward-looking statements contained herein could include, among other things, statements about our management confidence and strategies for performance; expectations for new and existing products, technologies and opportunities; and expectations regarding growth, sales, cash flows, earnings and Economic Value Added (EVA®). These statements can be identified by the use of such terms as may, could, expect, anticipate, intend, believe or comparable terms.

Factors that could cause results to differ include, but are not limited to: (1) changes in the worldwide business environment in which the Company operates, including general economic conditions; (2) changes in currency exchange rates, interest rates, commodity and fuel costs and capital costs; (3) changes in the performance of stock and bond markets that could affect, among other things, the valuation of the assets in the Company's pension plans and the accounting for pension assets, liabilities and expenses; (4) changes in governmental laws and regulations, including environmental, tax and import tariff standards; (5) market and competitive changes, including pricing pressures, market demand and acceptance for new products, services and technologies; (6) unforeseen business disruptions in one or more of the many countries in which the Company operates due to political instability, civil disobedience, armed hostilities, public health issues or other calamities; (7) the seasonal nature of the business; (8) our ability to successfully enter into new contracts and complete new acquisitions or joint ventures in the timeframe contemplated or at all; (9) the integration of the Company's strategic acquisitions; (10) the amount and timing of repurchases of the Company's common stock, if any; (11) the ongoing global financial and credit crisis, which could result in our customers curtailing development projects, construction, production and capital expenditures, which, in turn, could reduce the demand for our products and services and, accordingly, our sales, margins and profitability; (12) the financial condition of our customers, including the ability of customers (especially those that may be highly leveraged and those with inadequate liquidity) to maintain their credit availability; (13) our ability to successfully implement cost-reduction initiatives; and (14) other risk factors listed from time to time in the Company's SEC reports. A further discussion of these, along with other potential factors, can be found in Part I, Item 1A, Risk Factors, of the Company's Form 10-K for the year ended December 31, 2009. The Company cautions that these factors may not be exhaustive and that many of these factors are beyond the Company's ability to control or predict. Accordingly, forward-looking statements should not be relied upon as a prediction of actual results. The Company undertakes no duty to update forward-looking statements except as may be required by law.

Executive Overview

Revenues for the Company during the second quarter of 2010 were \$786.5 million compared with \$777.0 million in 2009. The Company generated higher revenues in the second quarter of 2010 in the Harsco Metals Segment due to an increase in customer steel production offset by weaker global non-residential construction demand within the Harsco Infrastructure Segment. Foreign currency translation decreased revenues by \$14.7 million for the second quarter in comparison with last year. Incremental revenues for the Harsco Infrastructure Segment included \$21.7 million from acquisitions in the Asia-Pacific, Latin America and Middle East and Africa regions for the three months ended June 30, 2010 compared with last year.

Edgar Filing: HARSCO CORP - Form 10-Q

Table of Contents

Revenues by Segment (Dollars in millions)	Three Months Ended June 30			Percentage Change from 2009 to 2010		
	2010	2009	Change	Price/ Volume	Currency	Total
Harsco Infrastructure	\$ 262.7	\$ 308.8	\$ (46.1)	(10.9)%	(4.0)%	(14.9)%
Harsco Metals	316.4	259.5	56.9	22.9	(1.0)	21.9
Harsco Rail	86.3	94.3	(8.0)	(8.3)	(0.2)	(8.5)
All Other Category	121.1	114.3	6.8	5.5	0.4	5.9
Corporate		0.1	(0.1)	(100.0)		(100.0)
Total Revenues	\$ 786.5	\$ 777.0	\$ 9.5	3.1%	(1.9)%	1.2%

Revenues for the first six months of 2010 were \$1.5 billion, \$55.0 million higher than in 2009. The Company generated higher revenues for the first six months of 2010 in the Harsco Metals Segment due to an increase in global steel production and in the Harsco Rail Segment due to shipments under existing contracts. This was offset by weaker demand during the first six months within the Harsco Infrastructure Segment due to distressed market conditions in global non-residential construction. Foreign currency translation increased revenues by \$26.0 million for the first six months of 2010 in comparison with last year. Incremental revenues for the Harsco Infrastructure Segment included \$40.1 million from acquisitions in the Asia-Pacific, Latin America and Middle East and Africa regions for the six months ended June 30, 2010 compared with last year.

Revenues by Segment (Dollars in millions)	Six Months Ended June 30			Percentage Change from 2009 to 2010		
	2010	2009	Change	Price/ Volume	Currency	Total
Harsco Infrastructure	\$ 513.3	\$ 592.5	\$ (79.2)	(13.7)%	0.3%	(13.4)%
Harsco Metals	613.9	497.9	116.0	19.0	4.3	23.3
Harsco Rail	181.7	154.2	27.5	17.0	0.8	17.8
All Other Category	219.9	229.2	(9.3)	(5.0)	0.9	(4.1)
Corporate	0.1	0.1				
Total Revenues	\$ 1,528.9	\$ 1,473.9	\$ 55.0	1.9%	1.8%	3.7%

The following factors contributed positively to the Company's results in the first half of 2010:

- Increased global steel production by our customers served;
- Continued strong performance of Harsco Rail resulting from increased shipments and leaner operations;
- Increased metals pricing benefitting Harsco Minerals;
- A slightly weaker U.S. dollar during 2010 compared with 2009;
- Reductions in capital spending, contributing to discretionary cash flows;
- Further implementation of internal countermeasures to improve efficiency and avoid unnecessary costs; and
- The Company's global continuous improvement initiative.

Edgar Filing: HARSCO CORP - Form 10-Q

These positive factors were partially offset by the following major challenges, emanating from the global recession which began in 2008 and continued to negatively impact the Harsco Infrastructure Segment during the first half of 2010:

- A lack of commercial and multi-family construction activity in the United States and across Europe due to the depressed demand, coupled with poor weather conditions during the early months of 2010;
- Pricing pressures as global customers continued to seek lower cost solutions and increased competition for remaining projects; and
- Postponements, deferrals and cancellation of jobs and projects.

The Company continues to execute on its geographic expansion strategy, as revenues from targeted growth markets were approximately 24% of total revenues in the first six months of 2010, compared with 20% for the first six months of 2009 and 23% for calendar year 2009.

Edgar Filing: HARSCO CORP - Form 10-Q

Total Revenues	\$ 786.5	\$ 777.0	\$ 9.5	3.1%	(1.9)%	1.2%

(a) Includes Mexico.

Revenues by Region (Dollars in millions)	Six Months Ended June 30			Percentage Change from 2009 to 2010		
	2010	2009	Change	Price/ Volume	Currency	Total
Western Europe	\$ 595.5	\$ 613.4	\$ (17.9)	(2.2)%	(0.7)%	(2.9)%
North America	567.1	566.5	0.6	(0.6)	0.7	0.1
Latin America (a)	136.5	81.8	54.7	52.2	14.7	66.9
Middle East and Africa	105.9	112.3	(6.4)	(9.2)	3.5	(5.7)
Asia-Pacific	73.1	47.4	25.7	37.0	17.2	54.2
Eastern Europe	50.8	52.5	(1.7)	(7.3)	4.1	(3.2)
Total Revenues	\$ 1,528.9	\$ 1,473.9	\$ 55.0	1.9%	1.8%	3.7%

(a) Includes Mexico.

Operating income from continuing operations for the second quarter and first six months of 2010 was \$61.9 million and \$90.1 million, respectively, compared with \$70.4 million and \$107.5 million, respectively, for the same periods in 2009. The decrease in operating income was driven by the depressed non-residential construction market and pricing pressures for the first six months of 2010, in addition to poor weather conditions during the first quarter of 2010, in the Harsco Infrastructure Segment. This was partially offset by increased steel production at customer sites in the Harsco Metals Segment and increased shipments in the Harsco Rail Segment coupled with benefits from restructuring actions and countermeasures implemented over the past two years throughout the Company. Diluted earnings per share from continuing operations for the second quarter of 2010 was \$0.40 compared with \$0.52 for the second quarter of 2009. For the first six months of 2010, diluted earnings per share from continuing operations was \$0.50 compared with \$0.77 in 2009.

The Company continues to have significant available liquidity and remains well-positioned from a financial flexibility perspective. Net cash generated from operating activities was \$95.6 million for the three months ended June 30, 2010, compared with \$116.7 million in 2009, primarily due to lower income. For the first six months of 2010, the Company generated net cash from operating activities of \$125.7 million compared with \$156.3 million for the first six months of 2009. Capital expenditures in 2010 were lower than 2009 as the Company continued to effectively utilize the mobility of its asset base to reduce new capital investments. The Company's debt to capital ratio increased from 39.5% at December 31, 2009 (the lowest year-end ratio since 1998) to 40.0% at June 30, 2010, but was lower than the 40.6% at June 30, 2009. Further information in regards to the Company's cash flows is discussed in the Liquidity and Capital Resources section.

Harsco Infrastructure Segment:

The Harsco Infrastructure Segment generated lower revenue and operating income in the second quarter and first six months of 2010 compared with 2009, due principally to lower end-market demand driven by greatly reduced commercial and multi-family construction activity in the

Edgar Filing: HARSCO CORP - Form 10-Q

United States, the United Arab Emirates and across Europe coupled with significant pricing pressures. The lack of available credit to certain customers has resulted in delayed non-residential construction projects.

Table of Contents

Significant Effects on Revenues (In millions)	Three Months Ended June 30	Six Months Ended June 30
Revenues 2009	\$ 308.8	\$ 592.5
Net decreased volume and effect of lower high-margin rentals	(55.3)	(120.8)
Acquisitions	21.7	40.1
Impact of foreign currency translation	(12.5)	1.5
Revenues 2010	\$ 262.7	\$ 513.3

Significant Effects on Operating Income:

- In the second quarter and first six months of 2010, the Segment's operating results decreased due to reduced or deferred or cancelled non-residential, commercial and infrastructure construction spending, exacerbated by ongoing pricing pressures in all major markets globally and lower equipment utilization rates.
- In response to further deterioration of global infrastructure markets during the first half of 2010, this Segment continues to implement additional countermeasures targeting expense reduction, asset optimization and facility rationalization.
- Restructuring costs primarily relating to severance and exit-related costs during the second quarter and first six months of 2010 were \$2.0 million and \$9.8 million, respectively. These were offset by a combination of property gains of \$2.6 million from the first three months of 2010 and contingent consideration adjustments of \$1.4 million during the second quarter of 2010 and \$9.6 million during the first six months of 2010. See Note F, Acquisitions, in Part I, Item 1, Financial Statements for additional information on the contingent consideration adjustments.
- Foreign currency translation in the second quarter and first six months of 2010 decreased operating income for this Segment by \$1.1 million and \$0.7 million, respectively, compared with the second quarter and first six months of 2009.

Harsco Metals Segment:

The Harsco Metals Segment generated higher revenues, operating income and margins in the second quarter and first six months of 2010 compared with 2009 due principally to the increased global steel production of its customers and the overall weaker U.S. dollar.

Significant Impacts on Revenues (In millions)	Three Months Ended June 30	Six Months Ended June 30
Revenues 2009	\$ 259.5	\$ 497.9
Net increased volume	59.4	94.7
Impact of foreign currency translation	(2.5)	21.3
Revenues 2010	\$ 316.4	\$ 613.9

Significant Effects on Operating Income:

Edgar Filing: HARSCO CORP - Form 10-Q

- Customers' production in 2010 increased approximately 43% and 40% compared with the second quarter and first six months of 2009, respectively.
- During the second quarter and first six months of 2010, this Segment's operating income benefited from cost reduction initiatives from sustained benefits from previously implemented restructuring actions and from additional countermeasures implemented throughout 2009 and 2010, which have targeted expense reduction, revenue enhancement and asset optimization.
- Foreign currency translation in the second quarter and first six months of 2010 increased operating income for this Segment by \$0.2 million and \$1.5 million, respectively, compared with the second quarter and first six months of 2009.

Harsco Rail Segment:

The Harsco Rail Segment generated higher revenues, operating income and margins in the first six months of 2010 compared with 2009 due principally to shipments of orders to China and other parts of the world, coupled with cost reduction benefits as a result of continuous improvement initiatives. Quarterly results of this Segment are affected by the timing of completed unit deliveries.

Table of Contents

Significant Impacts on Revenues (In millions)	Three Months Ended June 30	Six Months Ended June 30
Revenues 2009	\$ 94.3	\$ 154.2
Net volume changes	(7.8)	26.4
Impact of foreign currency translation	(0.2)	1.1
Revenues 2010	\$ 86.3	\$ 181.7

Significant Effects on Operating Income:

- This Segment's operating income for the second quarter of 2010 was relatively consistent with 2009, while the first six months of 2010 increased substantially over 2009 due to shipments of equipment under existing contracts to China and other parts of the world, partially offset by lower grinding services and spare parts sales. Shipments to China in the second half of 2010 will be less than in the first half due to the scheduled timing of deliveries. This will result in significantly reduced revenue and operating income for this Segment in the second half of 2010. However, shipments to China will resume in 2011 to approximate the revenue from China recorded in 2010.
- During the second quarter and first six months of 2010, this Segment's operating income and margins also benefited from the implementation of continuous improvement initiatives during 2009. These initiatives are on-going.
- Foreign currency translation in 2010 decreased operating income for this Segment by \$0.2 million for the second quarter and increased operating income by \$0.1 million for the first six months of 2010 compared with the respective periods of 2009.

All Other Category Harsco Minerals & Harsco Industrial:

The All Other Category (Harsco Minerals & Harsco Industrial) generated higher revenues, operating income and operating margins in the second quarter compared with 2009 due primarily to improved volume and higher metals selling pricing in the minerals and recycling technologies business. During the first six months of 2010, the All Other Category generated lower revenues, but increased operating margins and operating income compared with 2009. The decline in revenues for the first six months of 2010 was primarily due to reduced market demand for certain industrial products. However, higher metals selling prices for Harsco Minerals offset the impact of these market conditions within the operating income results.

Significant Impacts on Revenues (In millions)	Three Months Ended June 30	Six Months Ended June 30
Revenues 2009	\$ 114.3	\$ 229.2
Air-cooled heat exchangers	(5.8)	(29.9)
Industrial grating products	(5.2)	(10.9)
Minerals and recycling technologies	16.7	27.8
Impact of foreign currency translation	0.5	2.0
Other changes not individually discussed	0.6	1.7
Revenues 2010	\$ 121.1	\$ 219.9

Significant Effects on Operating Income:

Edgar Filing: HARSCO CORP - Form 10-Q

- The air-cooled heat exchangers business experienced a decrease in operating income in the second quarter and first six months of 2010 due to reduced customer demand within the natural gas industry caused by reduced natural gas prices and unfavorable economic conditions in comparison to the record performance in the second quarter and first six months of 2009. These conditions are currently showing signs of modest improvement.
- Operating income in the industrial grating products business decreased due to lower demand stemming from the economic downturn as compared with the second quarter and first six months of 2009, partially offset by lower raw material costs.
- Operating income for the minerals and recycling technologies business increased in the second quarter and first six months of 2010 due to significantly higher metal prices and higher customer demand.

Table of Contents

- Countermeasures targeting expense reduction, revenue enhancement and asset optimization continue to be implemented in these businesses, partially offsetting declines in operating income and resulting in higher operating margins than the same period of 2009.
- Foreign currency translation did not have a significant effect on this category in the second quarter of 2010.

Outlook, Trends and Strategies

Challenges stemming from the global economic recession and market uncertainty are expected to continue through 2010, especially for the Harsco Infrastructure Segment. In particular, infrastructure project deferrals, postponements and cancellations will continue to impact many of the non-residential and commercial construction markets served by the Harsco Infrastructure business, resulting in increased pricing pressures and lower equipment utilization. Global steel production has recovered from record lows experienced in 2009, but recent activity indicates a leveling off of mill capacity utilization rates and, thus, short-term steelmaking prospects. Certain commodity prices, which affect the Harsco Minerals business, are above last year but have declined from recent highs. The timing of rail equipment deliveries, which was accelerated into the first half of 2010 at the request of a major customer, is expected to result in lower operating income for the Harsco Rail Segment in the second half of 2010. However, shipments are expected to resume at previous annual levels in 2011.

Despite a level of uncertainty remaining in global economic conditions, especially in the Harsco Infrastructure Segment, the Company believes it continues to be well-positioned to capitalize on opportunities in the near- to long-term based on its strong balance sheet, available liquidity and ability to generate strong operating cash flows, as well as its demonstrated ability to execute appropriate countermeasures. Countermeasures such as on-going cost-reduction initiatives; a globally integrated enterprise initiative; and the Company's continuous improvement program have significantly reduced, and should continue to reduce, the Company's cost structure and further enhance its financial strength without sacrificing quality of output. The Company's expansion of its global footprint in targeted growth markets; its diversity of services and products in industries that are fundamental to global growth; its long-term mill services and minerals supply contracts; the portability and mobility of its infrastructure services equipment; and its large infrastructure services customer base help mitigate the Company's overall long-term exposure to changes in the economic outlook in any single economy. However, any further deterioration of global economies could still have an adverse impact on the Company's operating results.

Additionally, the following significant items, risks, trends and strategies are expected to affect the Company for the remainder of 2010 and beyond:

- The near-term outlook for the Harsco Infrastructure Segment is impacted by a continued lack of activity in non-residential, commercial construction markets, particularly in Europe, the United Arab Emirates and the United States. This lack of activity is expected to continue to present challenging business conditions for this Segment. The Company expects the Harsco Infrastructure Segment to experience sequential improvement in the third and fourth quarters of 2010, but to incur operating losses in each of those quarters. Ongoing cost reduction benefits, contribution from targeted growth market expansion, seasonal factors and some increase in overall non-residential construction and industrial maintenance activity as the year progresses are factors in the expectation of some marginal improvement in this Segment. The Company has recently appointed new senior management team additions to this Segment, and a key focus is further evaluation of the Segment's cost structure and strategy to address both current and long-term market conditions. Given the severity and duration of the current economic cycle, after senior management's further evaluation of the cost structure, it is likely that the Company will incur additional costs associated with restructuring actions to further reduce the cost base of this Segment. Based on the above factors, coupled with continuing positive cash flows from operations for this Segment, the Company does not believe a triggering event for impairment testing has occurred as of June 30, 2010. However, should the Company experience a further degradation in the overall markets served by the Harsco Infrastructure Segment, impairment testing of assets associated with this Segment may be required. Any necessary impairment could result in the write down of the carrying value

of goodwill to its implied fair value.

- Steel industry expectations are that steel production will increase in 2010 compared with 2009, but not to levels prior to the beginning of the global recession. Consistent with the industry overall, the Harsco Metals Segment's customers increased their production during the first six months of 2010. Seasonal reductions in customer production volume are expected in the third quarter of 2010 and short-term steelmaking prospects for the industry may be influenced by a recent leveling off of mill capacity utilization rates.
- The Company anticipates that tightening environmental regulations will compel customers to address their production waste streams as an opportunity to maximize environmental compliance. This should provide additional revenue opportunities for the Harsco Metals Segment and for the Harsco Minerals businesses in the All Other Category. The Company will continue to pursue growth opportunities in environmental services as increasing regulatory and public demand for environmental solutions creates additional outsourced opportunities in slag management.
- The Harsco Rail Segment has a strong backlog for 2011 due principally to ongoing production of rail grinding machines under existing orders.

Edgar Filing: HARSCO CORP - Form 10-Q

Table of Contents

- International demand for railway track maintenance services, solutions and equipment is expected to be strong in both the near-term and the long-term. The Harsco Rail Segment expects to develop a larger presence in certain developing countries as track construction and maintenance needs grow. Global bidding activity has been strong.
- In the Harsco Minerals businesses in the All Other Category, improved customer production levels comparable with the prior year should have an overall positive effect on certain reclamation and recycling services in the near-term.
- Also in the All Other Category, the air-cooled heat exchangers business continues to explore international opportunities in addition to further grow in its customary North American markets. Increased industrial use due to improving economic conditions will influence the price and demand for natural gas and, consequently, the demand for heat exchanger equipment. Weather trends can also impact this business as demand for heat exchanger equipment tends to increase in colder weather and decrease in warmer weather.
- The Company announced in January 2010 that it has embarked upon a business transformation initiative designed to create significant operating and cost efficiencies by improving the Company's internal supply chain planning, logistics, scheduling and integration throughout its worldwide operations. This project is expected to contribute to the Company's EVA growth but could result in near-term charges and capital expenditures.
- The Company will continue to place a strong focus on corporate-wide expansion into targeted growth markets to grow and better balance its geographic footprint. More specifically, the Company's global growth strategies include steady, targeted expansion, particularly in the Gulf Region of the Middle East and Africa, Asia-Pacific and Latin America to further complement the Company's already-strong presence throughout Europe and North America. Growth is expected to be achieved through the provision of additional services to existing customers; new contracts in both developed and targeted growth markets; and targeted, strategic acquisitions in strategic countries and market sectors. Additionally, new higher-margin service and sales opportunities in the Harsco Minerals and Harsco Rail businesses will be pursued globally. This strategy is expected to develop a significant increase to the Company's presence in these markets to achieve approximately 30% of total Company revenues from targeted growth markets over the near-term and closer to 40% in the longer-term. Over time, the improved geographic footprint will also benefit the Company through further diversification of its customer base.
- The Company expects continued strong cash flows from operating activities, although 2010 will be less than 2009. The Company also expects to maintain discipline to limit capital expenditures through its ability to redeploy equipment to new projects, without jeopardizing growth opportunities. The Company believes that in the current economic environment, the mobile nature of its capital investment pool will facilitate strategic growth initiatives in the near-term, lessening the need for growth capital expenditures for 2010, particularly for the Harsco Infrastructure business. New or renewed contracts in the Harsco Metals Segment may require higher incremental capital investments.
- Management will continue to be very selective and disciplined in allocating capital, choosing projects with the highest Economic Value Added (EVA®) potential.
- Fluctuations in the U.S. dollar can have significant impacts in the Harsco Infrastructure and Harsco Metals Segments, as approximately 80% to 85% of the revenues generated in these businesses are outside the United States. If the U.S. dollar would strengthen, as it did in the second quarter of 2010 compared with the second quarter of 2009, sales and operating income would generally be reduced. If the U.S. dollar were to weaken, as it did overall in the first six months of 2010 compared with the first six months of 2009, sales and operating income would generally improve.
- Volatility in energy and commodity costs (e.g., diesel fuel, natural gas, steel, etc.) and worldwide demand for these commodities could impact the Company's operations, both in cost increases or decreases to the extent that such increases or decreases are not passed on to customers. However, volatility in energy and commodity costs may provide additional service opportunities for the Harsco Metals Segment and several businesses in the All Other Category as customers may outsource more services to reduce overall costs. Volatility may also provide opportunities in the Harsco Infrastructure Segment for additional industrial plant maintenance and capital improvement projects.
- The Company has maintained a capital structure with a balance sheet debt to capital ratio approximating 40% for the last several years. In October 2010, the Company's 200 million British pound sterling-denominated notes (approximately \$301 million at June 30, 2010) will mature. The Company expects to refinance these notes during 2010 through a combination of new public debt, commercial paper borrowings, revolving credit facility borrowings or internal cash generation.

Edgar Filing: HARSCO CORP - Form 10-Q

- Currently, a majority of the Company's revenue is generated from customers located outside the United States, and a substantial portion of the Company's assets and employees are located outside the United States. U.S. income tax and foreign withholding taxes have not been provided on undistributed earnings for certain non-U.S. subsidiaries, because such earnings are intended to be indefinitely reinvested in the operations of those subsidiaries. Several U.S. legislation proposals have been announced that would have the effect of substantially reducing the Company's ability to defer U.S. taxes on profit permanently reinvested outside the United States. Proposals to date could have a negative impact on the Company's financial position and operating results. Additionally, they could have a negative impact on the Company's ability to compete in the global marketplace. The probability of any of these proposals being enacted cannot be predicted with any certainty. Indications are that substantial reform which may be considered unfavorable to U.S. business interests abroad is not likely in 2010. If reform occurs in 2011, such reform

Table of Contents

may be structured with more of the business community's concerns in mind. The Company is working with legislators with the goal of achieving a balanced and fair approach to tax reform, regardless of when reform occurs. The Company continues to monitor legislation to be in position to structure operations in a manner that will reduce the impact of enacted changes.

- The Company has initiated strategies to reposition the Harsco Infrastructure business and is focusing increasingly on projects in the global industrial maintenance and infrastructure construction sectors; developing this business in economies outside the U.S. and Europe that have greater prospects for both near-term and long-term growth; and reducing the branch structure which will result in costs savings realized mostly in 2011 and beyond.
- In 2010, the Company will fully integrate its recent acquisitions: ESCO, a regional leader in infrastructure services in seven countries in Central and South America, and Bell Scaffolding Group, with operations across the eastern seaboard of Australia. ESCO is expected to provide an opportunity for the Company to scale its operations across the Latin American region, while Bell Scaffolding provides opportunities for further growth throughout Australia and other neighboring regions.
- The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act became law during the first quarter of 2010. These new laws will have an impact on the Company's future costs for providing health care benefits for its employees when the laws begin to impact the company's health care costs in 2013 and beyond. The Company determined that the impact of the new laws on postretirement medical plans will be immaterial to its financial position, results of operations and cash flows. The Company is assessing the extent to which the new laws will affect its future health care and related employee benefit plan costs for active employees.
- The Harsco Minerals business generates value by collecting and processing boiler slag, a coal combustion by-product (CCP) into commercially useful products that put this material to beneficial use such as roofing materials or blasting abrasives. In June 2010, the Environmental Protection Agency (EPA) released a proposed rule that set out two different options with regard to the regulation of CCPs produced by coal-fired utility boilers. One option would regulate CCPs as a special (hazardous) waste when the CCPs are destined for disposal in landfills and surface impoundments. The second option would regulate the disposal of CCPs as solid waste by issuing minimum national criteria for proper management of these nonhazardous, solid wastes. Neither proposal would change the EPA's prior determination that beneficially used CCPs, including the Company's products, are exempt from the hazardous waste regulations. The adoption, terms and timing of any new regulation controlling disposal of CCPs remain uncertain, however, and there can be no assurance that any CCP regulation will continue to provide for an exemption for beneficial use of CCPs. The Company will continue to closely follow the EPA's proposal and file public comments as appropriate.

Table of Contents**Results of Operations****Three Months Ended June 30**

Table of Contents**Comparative Analysis of Consolidated Results****Revenues**

The change in revenues for the second quarter and first six months of 2010 from the second quarter and first six months of 2009 was attributable to the following significant items:

Change in Revenues 2010 vs. 2009

(In millions)	Second Quarter	Six Months
Net increased volumes in the Harsco Metals Segment due principally to increased steel production by the Company's customers.	\$ 59.4	\$ 94.7
Effect of business acquisitions in the Harsco Infrastructure Segment.	21.7	40.1
Net increased revenues in the reclamation and recycling services business due to higher commodity pricing and increased volume.	16.7	27.8
Net changes in revenues in the Harsco Rail Segment due principally to the timing of an overall higher level of rail equipment shipments to China in 2010.	(7.8)	26.4
Effect of foreign currency translation.	(14.6)	26.0
Increased volume in the roofing granules and abrasives business.	1.4	2.9
Decreased revenues of industrial grating products from reduced demand coupled with lower pricing levels.	(5.2)	(10.9)
Reduced demand for air-cooled heat exchangers due to a weaker natural gas market.	(5.8)	(29.9)
Net decreased revenues in the Harsco Infrastructure Segment due to lower rentals and sales, principally due to lower activity levels and project deferrals, postponements and cancellations of non-residential construction activity globally as a result of economic decline.	(55.3)	(120.8)
Other (minor changes across the various units not already mentioned).	(1.0)	(1.3)
Total Change in Revenues 2010 vs. 2009	\$ 9.5	\$ 55.0

Cost of Services and Products Sold

The change in cost of services and products sold for the second quarter and first six months of 2010 from the second quarter and first six months of 2009 was attributable to the following significant items:

Change in Cost of Services and Products Sold 2010 vs. 2009

(In millions)	Second Quarter	Six Months
Effect of business acquisitions.	\$ 17.0	\$ 32.9
Effect of foreign currency translation.	(10.7)	19.8
Increased costs due to changes in revenues coupled with lower high-margin rentals in the Harsco Infrastructure Segment (exclusive of the effect of foreign currency translation and business acquisitions, and including the impact of increased commodity and energy costs included in selling prices).	9.4	8.8
Other, net (due to product mix, stringent cost controls and enterprise business optimization initiatives).	2.2	(1.1)

Edgar Filing: HARSCO CORP - Form 10-Q

Total Change in Cost of Services and Products Sold	2010 vs. 2009	\$	17.9	\$	60.4
--	---------------	----	------	----	------

Table of Contents**Selling, General and Administrative Expenses**

The change in selling, general and administrative expenses for the second quarter and first six months of 2010 from the second quarter and first six months of 2009 was attributable to the following significant items:

Change in Selling, General and Administrative Expenses 2010 vs. 2009

(In millions)	Second Quarter	Six Months
Effect of business acquisitions.	\$ 5.3	\$ 8.5
Effect of foreign currency translation.	(3.3)	3.6
Higher professional fees due to globally integrated enterprise initiatives.	1.5	3.1
Increased travel and entertainment related to growth initiatives.	1.6	2.8
Increased insurance expense.	2.9	2.8
Change in compensation expense, generally due to lower employment levels.	(0.2)	(2.5)
Lower bad debt expense.	(3.9)	(4.0)
Other, net.	(1.0)	(0.1)
Total Change in Selling, General and Administrative Expenses 2010 vs. 2009	\$ 2.9	\$ 14.2

Other (Income) Expense

This income statement classification includes restructuring costs for employee termination benefits and costs to exit activities; impaired asset write-downs; net gains or losses on the disposal of non-core assets; and contingent consideration adjustments related to acquisitions by the Company.

	Three Months Ended June 30		Six Months Ended June 30	
(In thousands)	2010	2009	2010	2009
Restructuring costs	\$ 3,080	\$ 3,584	\$ 12,405	\$ 5,188
Gains from sale of non-core assets	(2,177)	(1,351)	(5,854)	(5,786)
Contingent consideration adjustments	(1,367)		(9,631)	
Other	70	103	177	128
Other (income) expense	\$ (394)	\$ 2,336	\$ (2,903)	\$ (470)

For the three months and six months ended June 30, 2010, restructuring costs were incurred principally in the Harsco Infrastructure Segment.

Interest Expense

This decrease of \$0.1 million and increase of \$0.7 million in the second quarter and first six months of 2010, respectively, compared with 2009 reflects positive effects from foreign currency translation as well as slightly higher overall debt levels in 2010 due to recent acquisitions.

Income Tax Expense from Continuing Operations

This increase was due to lower earnings from continuing operations in jurisdictions with lower tax rates and an increase in the effective income tax rate from continuing operations. The effective income tax rate relating to continuing operations for the second quarter of 2010 was 27.3% compared with 22.5% for the second quarter of 2009. For the first six months of 2010 the effective income tax rate relating to continuing operations was 26.6% compared with 17.9% for the first six months of 2009. The effective income tax rate for the first six months of 2009 reflected net discrete tax benefits recognized in the first quarter related to a change in the permanent reinvestment of prior-year undistributed earnings.

Income from Continuing Operations

This decrease resulted from lower rentals and sales in the Harsco Infrastructure Segment due to decreased global construction activity; partially offset by increased volume in the Harsco Metals Segment resulting from increased steel production, and increased revenues in the Harsco Rail Segment due principally to higher equipment sales to China.

Loss from Discontinued Operations

The loss from discontinued operations was \$2.8 million and \$2.6 million in the second quarter and first six months of 2010, respectively, compared with losses of \$1.5 million and \$2.7 million in the second quarter and first six months of

Table of Contents

2009, respectively. Discontinued operations consisted of the Company's Gas Technologies Segment, the sale of which was completed in December 2007. The loss incurred in 2010 includes a pre-tax charge of \$5.0 million related to potential and contingent claims, as more fully described in Note G, Commitments and Contingencies, in the accompanying Notes to the Condensed Consolidated Financial Statements. The loss incurred in 2009 related to costs associated with then ongoing arbitration proceedings and also reflected a partial settlement of working capital adjustment claims.

Liquidity and Capital Resources

Overview

Global financial markets, which have been under stress since 2008 due to poor financial institution lending and investment practices and sharp declines in real estate values, have started to show signs of improvement for certain highly rated credit issuers. However, during 2009 and continuing into 2010, tightened credit conditions for the funding of non-residential construction projects, particularly commercial construction, restrained growth in that sector. That tight credit market continues today in the non-residential construction sector affecting some of the Company's current and potential customers. In response to these changes in global economic conditions, the Company has undertaken several initiatives to conserve capital and enhance liquidity, including: prudently reducing capital spending to only critical projects where the highest returns can be achieved while redeploying existing capital investments; optimizing worldwide cash positions; reducing or eliminating discretionary spending; and frequent evaluation of customer and business-partner credit risk.

Despite the global financial market environment, the Company continues to have sufficient available liquidity and has been able to obtain any necessary financing. The Company currently expects operational and business needs to be covered by cash from operations for the remainder of 2010 and beyond. During the first six months of 2010, the Company generated \$125.7 million in operating cash, a decrease from the \$156.3 million generated in the first six months of 2009. The results in both 2010 and 2009 reflect lower levels of income generated by the Harsco Infrastructure Segment as a result of the ongoing global economic situation.

In the first six months of 2010, the Company invested \$74.6 million in capital expenditures (55% of which were for revenue-growth projects), compared to the \$82.6 million invested in the first six months of 2009, and paid \$33.0 million in stockholder dividends compared with \$31.7 million paid in the first six months of 2009.

The Company's net cash borrowings increased \$7.3 million in the first six months of 2010. Balance sheet debt, which is affected by foreign currency translation, decreased \$15.5 million from December 31, 2009. The debt to total capital ratio increased from 39.5% at December 31, 2009 (the lowest year-end ratio since 1998) to 40.0% at June 30, 2010 due principally to lower equity levels. The June 30, 2010 ratio was lower than the 40.6% ratio at June 30, 2009.

Despite the ongoing global economic conditions, the Company expects to generate strong operating cash flows for 2010, although less than in 2009. The Company plans to sustain its balanced portfolio through its strategy of redeploying discretionary cash for disciplined organic growth and international or market-segment diversification; for organic growth and strategic acquisitions in the Harsco Rail Segment, but most likely not until 2011 or later; for growth in long-term, high-return and high-renewal-rate services contracts for the Harsco Metals Segment, principally in targeted growth markets or for customer diversification; for organic growth and international diversification in the All Other Category

Edgar Filing: HARSCO CORP - Form 10-Q

(Harsco Minerals & Harsco Industrial) through strategic alliances. The Company also foresees continuing its long and consistent history of paying dividends to stockholders.

The Company continues its focus on improving working capital management. Globally integrated enterprise initiatives are being used to continue to further improve the effective and efficient use of working capital, particularly accounts receivable and inventories in the Harsco Infrastructure, Harsco Metals and Harsco Rail Segments.

Sources and Uses of Cash

The Company's principal sources of liquidity are cash from operations and borrowings under its various credit agreements, augmented periodically by cash proceeds from non-core asset sales. The primary drivers of the Company's cash flow from operations are the Company's sales and income. The Company's long-term Harsco Metals contracts, in addition to the backlog of certain equipment and the long-term nature of certain service contracts within the Harsco Rail Segment, provide predictable cash flows for several years into the future. (See the "Certainty of Cash Flows" section for additional information on estimated future revenues of Harsco Metals and Harsco Rail contracts and order backlogs for the Company's manufacturing businesses.) Cash returns on capital investments made in prior years, for which no cash is currently required, are a significant source of cash from operations. Depreciation expense related to these investments is a non-cash charge. The Company also continues to maintain working capital at a manageable level based upon the requirements and seasonality of the businesses.

Table of Contents

Major uses of operating cash flows and borrowed funds include: capital investments, principally in the Harsco Metals and Harsco Infrastructure Segments; payroll costs and related benefits; dividend payments; pension funding payments; inventory purchases for the manufacturing businesses; income tax payments; debt principal and interest payments; insurance premiums and payments of self-insured casualty losses; and machinery, equipment, automobile and facility rental payments. Cash is also used for targeted, strategic acquisitions as the appropriate opportunities arise.

Resources available for cash requirements The Company meets its ongoing cash requirements for operations and growth initiatives by utilizing cash from operations, by accessing the public debt markets and by borrowing from banks. Public markets in the United States and Europe are accessed through the Company's commercial paper programs and through discrete-term note issuance to investors. Various bank credit facilities are available throughout the world. The Company's 200 million British pound sterling-denominated notes mature in October 2010. The Company expects to utilize both the public debt markets, bank facilities and cash from operations to meet its cash requirements in the future.

The following table details the amounts outstanding under credit facilities and commercial paper programs and available credit at June 30, 2010:

Summary of Credit Facilities and Commercial Paper Programs (In millions)	Facility Limit	June 30, 2010 Outstanding Balance	Available Credit
U.S. commercial paper program	\$ 550.0	\$ 14.6	\$ 535.4
Euro commercial paper program	243.9	42.6	201.3
Multi-year revolving credit facility (a)	570.0		570.0
Bilateral credit facility (b)	30.0		30.0
Totals at June 30, 2010	\$ 1,393.9	\$ 57.2	\$ 1,336.7(c)

(a) U.S.-based program.

(b) International-based program.

(c) Although the Company has significant available credit, for practical purposes, the Company limits aggregate commercial paper and credit facility borrowings at any one-time to a maximum of \$600 million (the aggregate amount of the back-up facilities).

For more information on the Company's credit facilities and long-term notes, see Note 6, Debt and Credit Agreements, to the Company's Form 10-K for the year ended December 31, 2009.

Credit Ratings and Outlook The following table summarizes the Company's debt credit ratings at June 30, 2010:

Edgar Filing: HARSCO CORP - Form 10-Q

	Long-term Notes	U.S.-Based Commercial Paper	Outlook
Standard & Poor's (S&P)	A-	A-2	Negative
Moody's	Baa1	P-2	Negative
Fitch	A-	F2	Stable

The Company's euro-based commercial paper program has not been rated since the euro market does not require it. In May 2010, Standard & Poor's and Moody's reaffirmed the Company's ratings but changed the outlook to negative. Fitch ratings were reaffirmed in August 2009. A downgrade to the Company's credit ratings may increase borrowing costs to the Company, while an improvement in the Company's credit ratings may decrease borrowing costs to the Company. Additionally, a downgrade in the Company's credit ratings may result in reduced access to credit markets.

Table of Contents

Working Capital Position Changes in the Company's working capital are reflected in the following table:

(Dollars are in millions)	June 30 2010	December 31 2009	Increase (Decrease)
Current Assets			
Cash and cash equivalents	\$ 102.5	\$ 94.2	\$ 8.3
Trade accounts receivable, net	644.6	598.3	46.3
Other receivables, net	25.4	30.9	(5.5)
Inventories	262.5	291.2	(28.7)
Other current assets	155.5	154.7	0.8
Total current assets	1,190.5	1,169.3	21.2
Current Liabilities			
Notes payable and current maturities	116.6	83.2	33.4
Accounts payable	220.6	215.5	5.1
Accrued compensation	76.6	67.7	8.9
Income taxes payable	23.4	5.9	17.5
Other current liabilities	344.6	378.8	(34.2)
Total current liabilities	781.8	751.1	30.7
Working Capital	\$ 408.7	\$ 418.2	\$ (9.5)
Current Ratio	1.5:1	1.6:1	

Working capital decreased 2.3% in the first six months of 2010 due principally to the following factors:

- Inventories decreased \$28.7 million due to shipments in the Harsco Rail Segment to satisfy current international contracts, as well as due to foreign currency translation effects.
- Notes payable and current maturities increased \$33.4 million due to higher commercial paper borrowings related to recent acquisitions and the reclassification of a portion of the Company's British pound sterling-denominated 200 million notes as current maturities.
- Income taxes payable increased \$17.5 million due to the overall timing of income tax accruals and payments.

These factors were partially offset by the following:

- Net trade accounts receivable increased \$46.3 million primarily due to higher sales levels, partially offset by foreign currency translation effects.

Edgar Filing: HARSCO CORP - Form 10-Q

- Other current liabilities decreased \$34.2 million due principally to a decrease in customer advance payments in the Harsco Rail Segment as equipment was shipped to the customers and the advances were applied to the customer's account.

Certainty of Cash Flows The certainty of the Company's future cash flows is underpinned by the long-term nature of the Company's metals services contracts, the order backlog for the Company's railway track maintenance services and equipment and the strong discretionary cash flows (operating cash flows in excess of the amounts necessary for capital expenditures to maintain current revenue levels) generated by the Company. Historically, the Company has utilized these discretionary cash flows for growth-related capital expenditures, strategic acquisitions and for debt repayment. As the Company has demonstrated since the end of 2008, it has the ability to substantially reduce its capital expenditures due to the mobility of its existing capital investment base. The existing base can be redeployed for use in growth projects, thus avoiding new investment. The Company has continued to grow in countries with increased demand through prudent redeployment of its existing equipment.

The types of products and services that the Company provides are not subject to rapid technological change, which increases the stability of related cash flows. Additionally, it is believed by the Company that each of the businesses in its balanced portfolio are among the leaders in the industries the Company serves. Due to these factors, the Company is confident in its future ability to generate positive cash flows from operations.

Table of Contents**Cash Flow Summary**

The Company's cash flows from operating, investing and financing activities, as reflected in the Consolidated Statements of Cash Flows, are summarized in the following table:

Summarized Cash Flow Information

(In millions)	Six Months Ended June 30	
	2010	2009
Net cash provided by (used in):		
Operating activities	\$ 125.7	\$ 156.3
Investing activities	(84.2)	(75.1)
Financing activities	(28.9)	(103.1)
Effect of exchange rate changes on cash	(4.3)	0.6
Net change in cash and cash equivalents	\$ 8.3	\$ (21.4) (a)

(a) Does not total due to rounding

Cash From Operating Activities Net cash provided by operating activities in the first six months of 2010 was \$125.7 million, a decrease of \$30.6 million from the first six months of 2009. The decrease resulted primarily from the following:

- Increase in net trade receivables due to higher sales levels,
- Reduction in customer advance payments on contracts due to shipments of equipment by the Harsco Rail Segment in 2010, and
- Lower net income in 2010 as compared with 2009 attributable to the Harsco Infrastructure Segment.

These decreases were partially offset by the following:

- The timing of payments and increased business activity year over year that resulted in higher accounts payable levels in 2010,
- Lower incentive compensation payments in 2010 compared with 2009 due to lower earned incentive compensation.

Edgar Filing: HARSCO CORP - Form 10-Q

Cash Used in Investing Activities In the first six months of 2010, cash used in investing activities was \$84.2 million consisting primarily of capital investments of \$74.6 million and \$27.6 million used for strategic acquisitions. Capital investments declined \$8.0 million compared to the first six months of 2009, reflecting the Company's ongoing initiatives to conserve capital and enhance liquidity through prudent reduction of capital investments. Growth capital constituted 55% of investments made in the first six months of 2010, with investments made predominantly in the Harsco Metals Segment and, to a lesser extent, the Harsco Infrastructure Segment. Throughout the remainder of 2010, the Company plans to continue to manage its balanced portfolio and consider opportunities to invest in value creation projects. Additionally, the Company intends to increase growth investments in the Harsco Rail Segment, most likely in 2011 and beyond, as the business continues to expand globally.

Cash Used in Financing Activities The following table summarizes the Company's debt and capital positions at June 30, 2010 and December 31, 2009.

(Dollars are in millions)	June 30 2010	December 31 2009
Notes Payable and Current Maturities	\$ 116.6	\$ 83.2
Long-term Debt	852.8	901.7
Total Debt	969.4	984.9
Total Equity	1,451.5	1,509.8
Total Capital	\$ 2,420.9	\$ 2,494.7
Total Debt to Total Capital	40.0%	39.5%

The Company's debt as a percent of total capital at June 30, 2010 increased from December 31, 2009. The increase results principally from a decline in overall equity due to negative foreign currency translation effects from the

Table of Contents

strengthening of the U.S. dollar since December 31, 2009. This was partially offset by lower debt due primarily to foreign currency translation resulting from the strengthening of the U.S. dollar in comparison with the British pound sterling.

Debt Covenants

The Company's credit facilities and certain notes payable agreements contain a covenant stipulating a maximum debt to capital ratio of 60%. Certain notes payable agreements also contain a covenant requiring a minimum net worth of \$475 million. In addition, one credit facility limits the proportion of subsidiary consolidated indebtedness to 10% of consolidated tangible assets. At June 30, 2010, the Company was in compliance with these covenants with a debt to capital ratio of 40.0% and total net worth of \$1.4 billion. Based on balances at June 30, 2010, the Company could increase borrowings by approximately \$1.2 billion and still be within its debt covenants. Alternatively, keeping all other factors constant, the Company's equity could decrease by approximately \$805 million and the Company would still be within its debt covenants. Additionally, the Company's 7.25% British pound sterling-denominated notes and its 5.75% notes include covenants that permit the note holders to redeem their notes, at par and 101% of par, respectively, in the event of a change of control of the Company or disposition of a significant portion of the Company's assets in combination with the Company's credit rating downgraded to non-investment grade. The Company expects to continue to be compliant with these debt covenants one year from now.

Cash and Value-Based Management

The Company plans to continue with its strategy of targeted, prudent investing for strategic purposes for the foreseeable future, continuing to make more efficient use of existing investments. The long-term goal of this strategy is to create stockholder value by improving the Company's EVA. Under this program, the Company evaluates strategic investments based upon the investment's economic profit. EVA equals after-tax operating profits less a charge for the use of the capital employed to create those profits. Therefore, value is created when a project or initiative produces a return above the cost of capital. In the first six months of 2010, EVA was lower compared with the first six months of 2009 due to lower operating profits.

The Company currently expects to continue paying dividends to stockholders. In May 2010, the Company paid its 240th consecutive quarterly cash dividend. In June 2010, the Company declared its 241st consecutive quarterly cash dividend.

The Company's financial position and debt capacity should enable it to meet current and future requirements. As additional resources are needed, the Company should be able to obtain funds readily and at competitive costs. The Company is well-positioned financially and intends to continue investing in high-return, organic growth projects and prudent, strategic alliances; to reduce debt and pay cash dividends as a means of enhancing stockholder value.

Recently Adopted and Recently Issued Accounting Standards

Information on recently adopted and recently issued accounting standards is included in Note J, Recently Adopted and Recently Issued Accounting Standards, in Part I, Item 1, Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See Part II, Item 1A, Risk Factors, for quantitative and qualitative disclosures about market risk.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of disclosure controls and procedures as of June 30, 2010. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective. There have been no changes in internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting during the second quarter of 2010.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Information on legal proceedings is included in Note G, Commitments and Contingencies, in Part I, Item 1, Financial Statements.

ITEM 1A. RISK FACTORS

In the normal course of business, the Company is routinely subjected to a variety of risks. In addition to the market risk associated with interest rate and currency movements on outstanding debt and non-U.S. dollar-denominated assets and liabilities, other examples of risk include adverse economic conditions and increased competition in the global non-residential construction markets; customer concentration in the Harsco Metals and Harsco Rail Segments and certain businesses of the All Other Category; collectibility of receivables; volatility of the financial markets and their effect on pension plans and the availability of funding of non-residential construction projects; and global economic and political conditions.

For a full disclosure of risk factors that affect the Company, see the Company's 2009 Annual Report on Form 10-K (Part I, Item 1A).

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) There were no unregistered sales of equity securities during the period covered by the report.

(b) Not applicable.

(c) Issuer Purchases of Equity Securities.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1, 2010 - April 30, 2010				2,000,000
May 1, 2010 - May 31, 2010				2,000,000
June 1, 2010 - June 30, 2010				2,000,000
Total				

Edgar Filing: HARSCO CORP - Form 10-Q

The Company's share repurchase program was extended by the Board of Directors in September 2009. At that time, the Board authorized an increase of 463,353 shares to the 1,536,647 remaining from the Board's previous stock repurchase authorization. The repurchase program expires January 31, 2011. As of June 30, 2010, there are 2,000,000 authorized shares remaining in the program. When and if appropriate, repurchases are made in open market transactions, depending on market conditions. Repurchases may not be made and may be discontinued at any time.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. (REMOVED AND RESERVED)

ITEM 5. OTHER INFORMATION

DIVIDEND INFORMATION

On June 15, 2010, the Company's Board of Directors declared a quarterly cash dividend of \$0.205 per share, payable August 16, 2010, to stockholders of record as of July 15, 2010.
