“Following more than 30% sales growth in our two previous fiscal years and a 20.5% sales CAGR in the last 10, I’m disappointed with our 7% decrease in 2012, largely driven by a sluggish telecom environment in Europe and China where network operators reduced capital spending and delayed projects,” said Germain Lamonde, EXFO’s Chairman, President and CEO. “I believe we still gained market share in 2012 based on estimates that our end-markets endured double-digit decreases. Amid these challenging market conditions, we implemented a restructuring plan, while enhancing our strategic focus in high-growth areas.”

“In my opinion, several market opportunities, such as 3G and 4G/LTE deployments and 40G /100G network upgrades, remain robust,” Mr. Lamonde added. “The pause in carrier spending cannot last indefinitely, since bandwidth demand in fixed and mobile networks continues to follow a sharp growth curve. I firmly believe EXFO is uniquely positioned to benefit from these opportunities and, as such, we’ve taken a series of measures to rapidly return the company to a growth mode and eventually reach a 15% EBITDA margin in our target operating model.”

FY 2012 Business Highlights

- § Despite adverse economic conditions in fiscal 2012, sales of Protocol-layer products (Layers 1-7) increased 4.4% year-over-year on the strength of market traction in wireless backhaul, 4G/LTE as well as 10G, 40G and 100G network deployments. Sales of Physical-layer solutions (Layer 0, Optical and Copper), decreased 14.5% year-over-year as network operators largely held off on capital-intensive investments in access networks (fiber-to-the-home /curb/node, xDSL, etc.).
- § Given the debt crisis in Europe and ripple effects on other economies in fiscal 2012, sales in Europe, Middle East and Africa (EMEA) dropped 16.4% year-over-year, while the Americas incurred a more modest decrease of 4.6%. Sales in the Asia-Pacific region increased 1.2% year-over-year. EXFO's largest customer accounted for 4.4% of sales in 2012, while the company's top three customers represented 12.0%.
- § EXFO launched 21 new products in fiscal 2012, including two in the fourth quarter. Key product introductions in 2012 included amongst others the 100G Packet Blazer, a multi-rate, multi-service test module within the FTB Ecosystem for characterizing high-speed networks reaching 100G; Ethernet One, a centralized Ethernet service activation and monitoring solution that enables operators to improve the operational efficiency of their networks from the core to the last mile; EXFO Apps, a portal offering software applications that boost the capabilities and productivity of the FTB Ecosystem of platforms and test modules; the QA-805/QA-813 QualityAssurer, the industry's most scalable platform (simulates more than 12 million active mobile subscribers) for load simulation of converged 3G, 4G/LTE and IMS networks; the portable iPro, an intelligent high-performance capture and analysis probe for 3G and 4G/LTE networks up to 10 Gbit/s; and the MaxTester 600 series for cost-effective VDSL2 installation and repair work on copper links.
- § Following the year-end, EXFO announced a strategic partnership with Japan-based Artiza Networks, a technology leader in 4G/LTE very-large-scale radio access network (RAN) simulation and LTE-Advanced RAN testing. Combined with EXFO's solution, it delivers the highest-capacity wraparound testing of the LTE eNodeB — up to 6000 UEs towards the eNodeB — and the most advanced end-to-end portfolio of wireless network simulators, ranging from RF and functional testing to large-scale core network traffic generation. EXFO also announced major contract wins with three Tier-1 North American operators for its new suite of VDSL2 test sets that feature the most advanced technologies for characterizing vectoring and wire-bonding for high-speed 50 Mbit/s and over copper links.

Business Outlook

EXFO forecasts sales between US\$60 million and US\$65 million for the first quarter of fiscal 2013, while IFRS net loss should range between US\$0.05 and US\$0.01 per share.
