UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 29, 2008

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-18914

DORMAN PRODUCTS, INC.
(Exact name of registrant as specified in its charter)

Pennsylvania
(State or other jurisdiction of incorporation or organization)

23-2078856
(I.R.S. Employer Identification No.)

3400 East Walnut Street, Colmar, Pennsylvania
(Address of principal executive offices)

18915
(Zip Code)

(215) 997-1800
(Registrant's telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Edgar Filing: Dorman Products, Inc. - Form 10-Q

Non-accelerated filer (Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 2, 2008 the Registrant had 17,692,131 shares of common stock, \$.01 par value, outstanding.

DORMAN PRODUCTS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THIRTEEN WEEKS ENDED MARCH 29, 2008 AND MARCH 31, 2007 (UNAUDITED)

1. Basis of Presentation

As used herein, unless the context otherwise requires, “Dorman”, the “Company”, “we”, “us”, or “our” refers to Dorman Products, Inc. and its subsidiaries.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. However, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the thirteen week period ended March 29, 2008 are not necessarily indicative of the results that may be expected for the fiscal year ending December 27, 2008. We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter. For further information, refer to the consolidated financial statements and footnotes thereto included in our Annual Report on Form 10-K for the year ended December 29, 2007.

Certain prior year amounts have been reclassified to conform with current year presentation.

2. Sales of Accounts Receivable

We have entered into several customer sponsored programs administered by unrelated financial institutions that permit us to sell, without recourse, certain accounts receivable at discounted rates to the financial institutions. We do not retain any servicing requirements for these accounts receivable. Transactions under these agreements are accounted for as sales of accounts receivable following the provisions of Statement of Financial Accounting Standards (SFAS) No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities - A Replacement of FASB Statement 125.” At March 29, 2008 and December 29, 2007, \$39.7 million and \$39.4 million, respectively, of accounts receivable were sold and removed from the consolidated balance sheets based upon standard payment terms. Selling, general and administrative expenses for the thirteen weeks ended March 29, 2008 and March 31, 2007 include \$0.4 million and \$0.3 million, respectively, in financing costs associated with these accounts receivable sales programs. During the thirteen weeks ended March 29, 2008 and March 31, 2007, we sold \$24.2 million and \$22.5 million, respectively, under these programs.

3. Inventories

Inventories include the cost of material, freight, direct labor and overhead utilized in the processing of our products. Inventories were as follows:

	March 29,	December 29,
(in thousands)	2008	2007

Edgar Filing: Dorman Products, Inc. - Form 10-Q

Bulk product	\$	36,859	\$	34,493
Finished product		45,106		43,212
Packaging materials		2,845		2,860
Total	\$	84,810	\$	80,565

Page 6 of 20

Index

4. Acquisitions

In September 2007, we acquired certain assets including inventory and various intangible assets of the Consumer Products Division of Rockford Productions Corporation (Consumer Division) for \$3.4 million. The consolidated results for the thirteen week period ended March 29, 2008 includes the results of the Consumer Division. We have not presented pro forma results of operations as this result would not have been materially different than actual results for the periods. In connection with the purchase, we recorded \$1.1 million in contract rights, which are included in other assets and are being amortized over a 10 year period.

Goodwill activity during the thirteen week period ended March 29, 2008 is as follows (in thousands):

Balance, December 29, 2007	\$ 26,662
Currency translation	(20)
Balance, March 29, 2008	\$ 26,642

5. Change in Vacation Policy

Effective December 31, 2006, we changed our vacation policy so that vacation is earned ratably throughout the year rather than at the end of the preceding year. This change resulted in a reduction in our vacation accrual of approximately \$1.8 million in 2007. As a result, vacation expense in cost of goods sold and selling, general and administrative expenses was reduced during each of the fiscal quarters in 2007. Results for the three months ended March 31, 2007 include vacation expense reductions of \$0.1 million in cost of goods sold and \$0.3 million in selling, general and administrative expenses.

6. Stock-Based Compensation

Effective May 18, 2000 we amended and restated our Incentive Stock Option Plan (the "Plan"). Under the terms of the Plan, our Board of Directors may grant incentive stock options or non-qualified stock options or combinations thereof to purchase up to 2,345,000 shares of common stock to officers, directors and employees. Grants under the Plan must be made within 10 years of the plan amendment date and are exercisable at the discretion of the Board of Directors, but in no event more than 10 years from the date of grant. At March 29, 2008, options to acquire 355,851 shares were available for grant under the Plan.

Effective January 1, 2006, we adopted SFAS No. 123R "Share-Based Payment," and related interpretations and began expensing the grant-date fair value of employee stock options. We adopted SFAS No. 123R using the modified prospective transition method. Under this transition method, compensation cost associated with employee stock options recognized includes amortization related to the remaining unvested portion of stock option awards granted prior to January 1, 2006, and amortization related to new awards granted after January 1, 2006. In accordance with SFAS No. 123R, cash flows resulting from tax deductions in excess of compensation cost recognized in the financial statements is classified as financing cash flows.

Compensation cost is recognized on a straight-line basis over the vesting period during which employees perform related services. The compensation cost charged against income for our stock-based compensation program for the thirteen weeks ended March 29, 2008 and March 31, 2007 was \$91,000 and \$125,000 before taxes. The compensation cost recognized is classified as selling, general and administrative expense in the consolidated statement of operations. No cost was capitalized during 2008 and 2007. We included a forfeiture assumption of 4.6% in 2008 and 3.5% in 2007 in the calculation of expense.

We use the Black-Scholes option valuation model to estimate the fair value of options granted. Expected volatility and expected dividend yield are based on the actual historical experience of our stock. The expected life represents the period of time that options granted are expected to be outstanding and was calculated using the simplified method prescribed by the Securities and Exchange Commission Staff Accounting Bulletin No. 107. The risk-free rate is based on the U.S. Treasury security with terms equal to the expected time of exercise as of the grant date. There were no stock options granted in the thirteen weeks ended March 29, 2008 or March 31, 2007.

Index

Transactions under the Plan were as follows:

	Shares	Weighted Average Price	Weighted Average Remaining Term (In years)	Aggregate Intrinsic Value
Balance at December 29, 2007	903,150	\$ 5.80		
Exercised	(29,400)	0.94		
Canceled	(50,000)	11.10		
Balance at March 29, 2008	823,750	\$ 5.66	5.0	\$ 4,357,000
Options exercisable at March 29, 2008	646,718	\$ 4.31	4.4	\$ 4,114,000

The total intrinsic value of stock options exercised during 2008 was \$285,000.

As of March 29, 2008, there was approximately \$0.7 million of unrecognized compensation cost related to non-vested stock options, which is expected to be recognized over a weighted-average period of approximately 3.1 years.

Cash received from option exercises during 2008 was \$3,000. The excess tax benefit generated from options granted prior to January 1, 2006, which were exercised during 2008, was \$79,000 and was credited to additional paid in capital.

7. Earnings Per Share

The following table sets forth the computation of basic earnings per share and diluted earnings per share:

(in thousands, except per share data)	Thirteen Weeks Ended	
	March 29, 2008	March 31, 2007
Numerator:		
Net income	\$ 2,682	\$ 4,062
Denominator:		
Weighted average shares outstanding used in basic earnings per share calculation	17,699	17,689
Effect of dilutive stock options	388	410
Adjusted weighted average shares outstanding	18,087	18,099
Basic earnings per share	\$ 0.15	\$ 0.23
Diluted earnings per share	\$ 0.15	\$ 0.22

Options to purchase 173,500 and 163,500 shares were outstanding at March 29, 2008 and March 31, 2007, respectively, but were not included in the computation of diluted earnings per common share, as their effect would have been antidilutive.

8. Common Stock Repurchases

Share Repurchase Plan. On February 22, 2008, we announced that our Board of Directors authorized the repurchase of up to 500,000 shares of our outstanding common stock. Under this program, share repurchases may be made from time to time depending upon market conditions, share price and availability, and other factors at our

discretion. Repurchases will take place in open market transactions or in privately negotiated transactions in accordance with applicable laws. During 2008, we have not made any purchases under the plan.

Purchase and cancellation of common stock. We periodically repurchase and cancel common stock issued to our defined contribution profit sharing and 401(k) plan. For the thirteen weeks ended March 29, 2008, we repurchased and cancelled 16,206 shares of common stock. During 2007, we repurchased and cancelled 90,205 shares of common stock.

Index

9. Related-Party Transactions

We have entered into a noncancelable operating lease for our primary operating facility from a partnership in which Richard N. Berman, our Chief Executive Officer, and Steven L. Berman, our Executive Vice President, are partners. Based upon the terms of the lease, payments in 2008 will be \$1.4 million. Total rental payments to the partnership under the lease arrangement were \$1.3 million in 2007.

10. Income Taxes

We adopted the provisions of Financial Accounting Standards Board Interpretation No.48, "Accounting for Un-certainty in Income Taxes an interpretation of FASB Statement No. 109"("FIN 48") effective December 31, 2006. At March 29, 2008, we have \$1.5 million of net unrecognized tax benefits, \$1.0 million of which would affect our effective tax rate if recognized.

We recognize interest and penalties related to uncertain tax positions in income tax expense. As of March 29, 2008, we have approximately \$0.3 million of accrued interest related to uncertain tax positions.

The last year examined by the IRS was 2004, and all years up through and including that year are closed by examination. The tax year 2005 is currently under examination by the IRS. We are currently under examination for tax years 2003-2006 by one state tax authority to which we are subject tax. The tax years 2004-2007 remain open to examination by the remaining major taxing jurisdictions in the United States to which we are subject. The tax years 2003-2007 remain open to examination in Sweden for our Swedish subsidiary.

11. Comprehensive Income

Pursuant to the provisions of SFAS No. 130, "Reporting Comprehensive Income," comprehensive income includes all changes to shareholders' equity during a period, except those resulting from investment by and distributions to shareholders. Components of comprehensive income include net income and changes in foreign currency translation adjustments. Total comprehensive income was \$3.7 million for the thirteen weeks ended March 29, 2008, and \$3.8 million for the thirteen weeks ended March 31, 2007.

12. New Accounting Pronouncements

In December 2007, the FASB issued SFAS 141 (revised 2007), "Business Combinations" ("SFAS No. 141(R)"). SFAS No. 141(R) changes the requirements for an acquirer's recognition and measurement of the assets acquired and the liabilities assumed in a business combination. SFAS No. 141(R) is effective for annual periods beginning after December 15, 2008 and should be applied prospectively for all business combinations entered into after the date of adoption.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51" ("SFAS No. 160"). SFAS No. 160 requires (i) that noncontrolling (minority) interests be reported as a component of shareholders' equity, (ii) that net income attributable to the parent and to the noncontrolling interest be separately identified in the consolidated statement of operations, (iii) that changes in a parent's ownership interest while the parent retains its controlling interest be accounted for as equity transactions, (iv) that any retained noncontrolling equity investment upon the deconsolidation of a subsidiary be initially measured at fair value, and (v) that sufficient disclosures are provided that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for annual periods beginning after December 15, 2008 and should be applied prospectively. However, the presentation and disclosure requirements of the statement shall be applied retrospectively for all periods presented. The adoption of the provisions of SFAS No. 160 is not

expected to impact the Company's consolidated results of operations and financial position.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." SFAS No. 159 permits companies to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing companies with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. We adopted SFAS No. 159 effective December 30, 2007, which was the beginning of our fiscal year. The adoption of SFAS No. 159 did not have a material impact on our results of operations and financial position.

Index

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, SFAS No. 157 does not require any new fair value measurements. The provisions of SFAS No. 157 are to be applied prospectively and are effective for financial statements issued for fiscal years beginning after November 15, 2007. SFAS No. 157's fair value measurement requirements for non-financial assets and liabilities that are not required or permitted to be measured at fair value on a recurring basis have been deferred until fiscal years beginning after November 15, 2008. We have certain non-financial assets, such as goodwill, intangibles and other long-lived assets, that may be remeasured to fair value on a non-recurring basis. The adoption of SFAS No. 157 did not have a material impact on the Company's consolidated results of operations and financial position.

DORMAN PRODUCTS, INC. AND SUBSIDIARIES

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward Looking Statements

Certain statements in this document constitute "forward-looking statements" within the meaning of the Federal Private Securities Litigation Reform Act of 1995. While forward-looking statements sometimes are presented with numerical specificity, they are based on various assumptions made by management regarding future circumstances over many of which the Company has little or no control. Forward-looking statements may be identified by words including "anticipate," "believe," "estimate," "expect," and similar expressions. The Company cautions readers that forward-looking statements, including, without limitation, those relating to future business prospects, revenues, working capital, liquidity, and income, are subject to certain risks and uncertainties that would cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause actual results to differ from forward-looking statements include but are not limited to competition in the automotive aftermarket industry, concentration of the Company's sales and accounts receivable among a small number of customers, the impact of consolidation in the automotive aftermarket industry, foreign currency fluctuations, dependence on senior management and other risks and factors identified from time to time in the reports the Company files with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. For additional information concerning factors that could cause actual results to differ materially from the information contained in this report, reference is made to the information in Part I, "Item 1A, Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended December 29, 2007.

Overview

We are a leading supplier of Original Equipment (OE) Dealer "Exclusive" automotive replacement parts, automotive hardware, brake products, and household hardware to the automotive aftermarket and mass merchandise markets. Dorman automotive parts and hardware are marketed under the OE Solutions™, HELP!®, AutoGrade™, First Stop™, Conduct-Tite®, Pik-A-Nut®, and Scan-Tech™ brand names. We design, package and market over 92,000 different automotive replacement parts (including brake parts), fasteners and service line products manufactured to our specifications. Our products are sold under one of the seven Dorman brand names listed above. Our products are sold primarily in the United States through automotive aftermarket retailers (such as AutoZone, Advance and O'Reilly), national, regional and local warehouse distributors (such as Carquest and NAPA) and specialty markets including parts manufacturers for resale under their own private labels and salvage yards. Through our Scan-Tech and Hermoff subsidiaries, we are increasing our international distribution of automotive replacement parts, with sales into Canada, Europe, the Middle East and the Far East.

The automotive aftermarket in which we compete has been growing in size; however, the market continues to consolidate. As a result, our customers regularly seek more favorable pricing, product returns and extended payment terms when negotiating with us. While we do our best to avoid such concessions, in some cases pricing concessions have been made, customer payment terms have been extended and returns of product have exceeded historical levels. The product returns and more favorable pricing primarily affect our profit levels while terms extensions generally reduce operating cash flow and require additional capital to finance the business. We expect both of these trends to continue for the foreseeable future. Gross profit margins have declined over the past three years as a result of this pricing pressure. Another contributing factor in our gross profit margin decline is a shift in mix to higher-priced, but lower gross margin products. Both of these trends are expected to continue for the foreseeable future. We have increased our focus on efficiency improvements and product cost reduction initiatives to offset the impact of price pressures.

Index

In addition, we are relying on new product development as a way to offset some of these customer demands and as our primary vehicle for growth. As such, new product development is a critical success factor for us. We have invested heavily in resources necessary for us to increase our new product development efforts and to strengthen our relationships with our customers. These investments are primarily in the form of increased product development resources and awareness programs, customer service improvements and increased customer credits and allowances. This has enabled us to provide an expanding array of new product offerings and grow our revenues.

We may experience significant fluctuations from quarter to quarter in our results of operations due to the timing of orders placed by our customers. Generally, the second and third quarters have the highest level of customer orders, but the introduction of new products and product lines to customers may cause significant fluctuations from quarter to quarter.

We operate on a fifty-two, fifty-three week period ending on the last Saturday of the calendar year.

Acquisitions

In September 2007, we acquired certain assets including inventory and various intangible assets of the Consumer Products Division of Rockford Productions Corporation (Consumer Division) for \$3.4 million. The consolidated results for the thirteen week period ended March 29, 2008 includes the results of the Consumer Division. We have not presented pro forma results of operations as this result would not have been materially different than actual results for the periods. In connection with the purchase, we recorded \$1.1 million in contract rights, which are included in other assets and are being amortized over a 10 year period.

Change in Vacation Policy

Effective December 31, 2006, we changed our vacation policy so that vacation is earned ratably throughout the year rather than at the end of the preceding year. This change resulted in a reduction in our vacation accrual of approximately \$1.8 million in 2007. As a result, vacation expense in cost of goods sold and selling, general and administrative expenses was reduced during each of the fiscal quarters in 2007. Results for the three months ended March 31, 2007 include vacation expense reductions of \$0.1 million in cost of goods sold and \$0.3 million in selling, general and administrative expenses.

Results of Operations

The following table sets forth, for the periods indicated, the percentage of net sales represented by certain items in our Consolidated Statements of Operations:

	Percentage of Net Sales For the Thirteen Weeks Ended	
	March 29, 2008	March 31, 2007
Net Sales	100.0%	100.0%

Index

Thirteen Weeks Ended March 29, 2008 Compared to Thirteen Weeks Ended March 31, 2007

Sales increased 8% to \$80.1 million for the first quarter ended March 29, 2008 from \$74.3 million in the same period last year. The favorable effect of foreign currency exchange and the acquisition of the Consumer Division accounted for approximately 3% of the net sales increase. The remaining increase is primarily the result of increased revenues from new sales.

Cost of goods sold, as a percentage of sales, increased to 69.2% for the thirteen weeks ended March 29, 2008 from 65.3% in the same period last year. The increase is the result of higher material costs caused by higher commodity price increases and general weakness in the U.S. dollar, an increase in customer allowances and returns and a \$0.8 million increase in air freight costs necessary to expedite product to fill past due customer orders. Spending on air freight is expected to return to historical levels by the second quarter of 2008.

Selling, general and administrative expenses for the thirteen weeks ended March 29, 2008 increased 6% to \$20.0 million from \$18.8 million in the same period last year. The increase is the result of higher variable costs related to our sales growth and increased staffing levels to support higher levels of new product development. These increases were partially offset by incentive compensation expense which was \$0.7 lower in the thirteen weeks ended March 29, 2008 than in the prior year due to lower earnings levels in the current year. Results for the thirteen weeks ended March 31, 2007 also include a \$0.3 million reduction in vacation expense due to the vacation policy change mentioned above.

Interest expense, net, decreased to \$0.3 million in the thirteen weeks ended March 29, 2008 from \$0.5 million in the same period last year due to lower interest rates.

Our effective tax rate increased to 39.7% in the thirteen weeks ended March 29, 2008 from 37.2% in the same period last year. The increase is the result of the loss of certain state tax benefits and a \$0.1 million charge to provide a valuation allowance against deferred tax assets of our Canadian subsidiary.

Liquidity and Capital Resources

Historically, we have financed our growth through a combination of cash flow from operations, accounts receivable sales programs provided by certain customers and through the issuance of senior indebtedness through our bank credit facility and senior note agreements. At March 29, 2008, working capital was \$152.0 million, total long-term debt (including the current portion and revolving credit borrowings) was \$26.8 million and shareholders equity was \$177.5 million. Cash and cash equivalents as of March 29, 2008 was \$6.9 million.

Over the past several years we have continued to extend payment terms to certain customers as a result of customer requests and market demands. These extended terms have resulted in increased accounts receivable levels and significant uses of cash flow. We participate in accounts receivable sales programs with several customers which allow us to sell our accounts receivable on a non-recourse basis to financial institutions to offset the negative cash flow impact of these payment terms extensions. As of March 29, 2008 and December 29, 2007, we had sold \$39.7 million and \$39.4 million in accounts receivable under these programs and had removed them from our balance sheets based upon standard payment terms. We expect continued pressure to extend our payment terms for the foreseeable future. Further extensions of customer payment terms will result in additional uses of cash flow or increased costs associated with the sale of accounts receivable.

We have a \$30.0 million revolving credit facility which expires in June 2010. Borrowings under the facility are on an unsecured basis with interest at rates ranging from LIBOR plus 65 basis points to LIBOR plus 150 basis points based upon the achievement of certain benchmarks related to the ratio of funded debt to EBITDA. The interest rate at

March 29, 2008 was LIBOR plus 65 basis points (3.36%). Borrowings under the facility were \$17.8 million as of March 29, 2008. We have approximately \$10.6 million available under the facility at March 29, 2008. The loan agreement also contains covenants, the most restrictive of which pertain to net worth and the ratio of debt to EBITDA.

At March 29, 2008, current portion of long-term debt includes \$8.6 million in Senior Notes that were originally issued in August 1998, in a private placement on an unsecured basis ("The Notes"). The Notes bear a 6.81% fixed interest rate which is payable quarterly. The notes are due in August 2008. The Notes require, among other things, that we maintain certain financial covenants relating to debt to capital ratios and minimum net worth. We were in compliance with all financial covenants contained in the Notes and revolving credit facility at March 29, 2008.

We also have outstanding \$0.5 million under a commercial loan granted in connection with the opening of a new distribution facility which bears interest at 4% payable monthly. The principal balance is paid monthly in equal installments through September 2013. The loan is secured by a letter of credit issued under our revolving credit facility.

Index

Our business activities do not include the use of unconsolidated special purpose entities, and there are no significant business transactions that have not been reflected in the accompanying financial statements.

We reported a net use of cash from our operating activities of \$8.0 million in the thirteen weeks ended March 29, 2008. Net income, depreciation and a \$1.1 million increase in accounts payable were the primary sources of operating cash flow. Accounts payable increased due to an increase in purchase obligations outstanding to support increased inventory levels due to sales growth. The primary uses of cash were inventory and accounts receivable, which increased \$3.8 million and \$7.3 million, respectively. Inventory increased to support seasonal sales growth. Accounts receivable increased due to a promotional program that provided extended dating on first time orders of a new product line, and the extension of payment terms to certain customers.

Investing activities used \$1.5 million of cash in the thirteen weeks ended March 29, 2008 as a result of additions to property, plant and equipment. Capital spending in 2008 consisted of tooling associated with new products, upgrades to information systems and scheduled equipment replacements.

Financing activities generated \$9.0 million of cash in the thirteen weeks ended March 29, 2008. The primary element of our financing activities was \$9.3 million in borrowings under our revolving credit facility.

Based on our current operating plan, we believe that our available sources of capital under our extended revolving credit facility, accounts receivable sales programs and cash generated from operations will be sufficient to meet our ongoing cash needs for the next twelve months.

Foreign Currency Fluctuations

In 2007, approximately 73% of our products were purchased from a variety of foreign countries. The products generally are purchased through purchase orders with the purchase price specified in U.S. dollars. Accordingly, we do not have exposure to fluctuations in the relationship between the dollar and various foreign currencies between the time of execution of the purchase order and payment for the product. However, weakness in the dollar has resulted in materials price increases and pressure from several foreign suppliers to increase prices further. To the extent that the dollar decreases in value to foreign currencies in the future or the present weakness in the dollar continues for a sustained period of time, the price of the product in dollars for new purchase orders may increase further.

The largest portion of our overseas purchases come from China. The value of the Chinese Yuan has increased relative to the U.S. Dollar since July 2005 when it was allowed to fluctuate against a basket of currencies. Most experts believe that the value of the Yuan will increase further relative to the U.S. Dollar over the next few years. Such a move would most likely result in an increase in the cost of products that are purchased from China.

Impact of Inflation

The overall impact of inflation has not resulted in a significant change in labor costs or the cost of general services utilized by the Company. We have experienced increases in the cost of materials and transportation costs as a result of commodity price increases. We have been able to offset a portion of these cost increases through price increases; however, we have not been able to do so completely. As a result, we have been forced to generate other cost reduction activities in order to offset these cost increases. We will continue to mitigate further cost increases by passing along price increases to customers, through the use of alternative suppliers and by resourcing products to other countries. However, there can be no assurance that we will be successful in these efforts.

Related-Party Transactions

We have a noncancelable operating lease for our primary operating facility from a partnership in which Richard N. Berman, our Chief Executive Officer, and Steven L. Berman, our Executive Vice President, are partners. Based upon the terms of the lease, payments in 2008 will be \$1.4 million. Total rental payments to the partnership under the lease arrangement were \$1.3 million in 2007.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities and the reported amounts of revenues and expenses. We regularly evaluate our estimates and judgments, including those related to revenue recognition, bad debts, customer credits, inventories, goodwill and income taxes. Estimates and judgments are based upon historical experience and on various other assumptions believed to be accurate and reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant estimates and judgments used in the preparation of our consolidated financial statements:

Index

Allowance for Doubtful Accounts. The preparation of our financial statements requires us to make estimates of the collectability of our accounts receivable. We specifically analyze accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment patterns when evaluating the adequacy of the allowance for doubtful accounts. A significant percentage of our accounts receivable have been, and will continue to be, concentrated among a relatively small number of automotive retailers and warehouse distributors in the United States. Our five largest customers accounted for 71% and 73% of net accounts receivable as of December 29, 2007 and December 30, 2006, respectively. A bankruptcy or financial loss associated with a major customer could have a material adverse effect on our sales and operating results.

Revenue Recognition and Allowance for Customer Credits. Revenue is recognized from product sales when goods are shipped, title and risk of loss have been transferred to the customer and collection is reasonably assured. We record estimates for cash discounts, product returns and warranties, discounts and promotional rebates in the period of the sale ("Customer Credits"). The provision for Customer Credits is recorded as a reduction from gross sales and reserves for Customer Credits are shown as a reduction of accounts receivable. Amounts billed to customers for shipping and handling are included in net sales. Costs associated with shipping and handling are included in cost of goods sold. Actual Customer Credits have not differed materially from estimated amounts for each period presented.

Excess and Obsolete Inventory Reserves. We must make estimates of potential future excess and obsolete inventory costs. We provide reserves for discontinued and excess inventory based upon historical demand, forecasted usage, estimated customer requirements and product line updates. We maintain contact with our customer base in order to understand buying patterns, customer preferences and the life cycle of our products. Changes in customer requirements are factored into the reserves as needed.

Goodwill. We follow the provisions of SFAS No. 142, "Goodwill and Other Intangible Assets". We employ a discounted cash flow analysis and a market comparable approach in conducting our impairment tests. Cash flows were discounted at 12% and an earnings multiple of 6.25 to 6.5 times EBITDA was used when conducting these tests in 2007.

Income Taxes. We follow the liability method of accounting for deferred income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year and for the change in the deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns. We must make assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income taxes takes into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by tax authorities. Changes in tax laws or our interpretation of tax laws and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements. Our assumptions, judgments and estimates relative to the value of a deferred tax asset takes into account predictions of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years could render our current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates.

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS 141 (revised 2007), "Business Combinations" ("SFAS No. 141(R)"). SFAS No. 141(R) changes the requirements for an acquirer's recognition and measurement of the assets acquired and the liabilities assumed in a business combination. SFAS No. 141(R) is effective for annual periods beginning after December 15, 2008 and should be applied prospectively for all business combinations entered into after the date of

adoption.

Page 14 of 20

Index

In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements -an amendment of ARB No. 51” (“SFAS No. 160”). SFAS No. 160 requires (i) that noncontrolling (minority) interests be reported as a component of shareholders’ equity, (ii) that net income attributable to the parent and to the noncontrolling interest be separately identified in the consolidated statement of operations, (iii) that changes in a parent’s ownership interest while the parent retains its controlling interest be accounted for as equity transactions, (iv) that any retained noncontrolling equity investment upon the deconsolidation of a subsidiary be initially measured at fair value, and (v) that sufficient disclosures are provided that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for annual periods beginning after December 15, 2008 and should be applied prospectively. However, the presentation and disclosure requirements of the statement shall be applied retrospectively for all periods presented. The adoption of the provisions of SFAS No. 160 is not expected to impact the Company’s consolidated results of operations and financial position.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities.” SFAS No. 159 permits companies to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing companies with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. We adopted SFAS No. 159 effective December 30, 2007, which was the beginning of our fiscal year. The adoption of SFAS No. 159 did not have a material impact on our results of operations and financial position.

In September 2006, the FASB issued SFAS No. 157, “Fair Value Measurements.” SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, SFAS No. 157 does not require any new fair value measurements. The provisions of SFAS No. 157 are to be applied prospectively and are effective for financial statements issued for fiscal years beginning after November 15, 2007. SFAS No. 157’s fair value measurement requirements for non-financial assets and liabilities that are not required or permitted to be measured at fair value on a recurring basis have been deferred until fiscal years beginning after November 15, 2008. We have certain non-financial assets, such as goodwill intangibles, and other long-lived assets, that may be remeasured to fair value on a non-recurring basis. The adoption of SFAS No. 157 did not have a material impact on the Company’s consolidated results of operations and financial position.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Our market risk is the potential loss arising from adverse changes in interest rates. With the exception of our revolving credit facility, long-term debt obligations are at fixed interest rates and denominated in U.S. dollars. We manage our interest rate risk by monitoring trends in interest rates as a basis for determining whether to enter into fixed rate or variable rate agreements. Under the terms of our revolving credit facility and customer-sponsored programs to sell accounts receivable, a change in either the lender’s base rate or LIBOR would affect the rate at which we could borrow funds thereunder. A one percentage point increase in LIBOR would increase our interest expense on our variable rate debt and our financing costs associated with our sales of accounts receivable by approximately \$0.6 million annually. This estimate assumes that our variable rate debt balance and the level of sales of accounts receivable remains constant for an annual period and the interest rate change occurs at the beginning of the period.

Item 4. Controls and Procedures

Quarterly Evaluation of Our Disclosure Controls and Internal Controls

We evaluated the effectiveness of the design and operation of our “disclosure controls and procedures” as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (“the Act”), as of the end of the period covered by

this Form 10-Q (“Disclosure Controls”). This evaluation (“Disclosure Controls Evaluation”) was done under the supervision and with the participation of management, including the Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”).

Our management, with the participation of the CEO and CFO, also conducted an evaluation of our internal control over financial reporting, as defined in Rule 13a-15(f) of the Act, to determine whether any changes occurred during the period ended March 29, 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting (“Internal Controls Evaluation”).

Index

Limitations on the Effectiveness of Controls

Control systems, no matter how well conceived and operated, are designed to provide a reasonable, but not an absolute, level of assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. We conduct periodic evaluation of our internal controls to enhance, where necessary, our procedures and controls.

Conclusions

Based upon the Disclosure Controls Evaluation, the CEO and CFO have concluded that the Disclosure Controls are effective in reaching a reasonable level of assurance that (i) information that we are required to disclose in the reports that we file or submit under the Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) information that we are required to disclose in the reports that we file or submit under the Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in internal controls over financial reporting as defined in Rule 13a-15(f) of the Act that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

We are a party to or otherwise involved in legal proceedings that arise in the ordinary course of business, such as various claims and legal actions involving contracts, competitive practices, patent rights, trademark rights, product liability claims and other matters arising out of the conduct of our business. In the opinion of management, none of the actions, individually or in the aggregate, would likely have a material financial impact on us.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item A, Risk Factors" in our Annual Report on Form 10-K for the year ended December 29, 2007, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.
