(a) Non-GAAP measure. For further information see the paragraph "Non-GAAP measures" on page 18.

(b) Attributable to Eni's shareholders.

(c) Non-GAAP measure. Net cash provided by operating activities before changes in working capital excluding inventory holding gains or losses and certain non-recurring items. For further information see page 14.

(d) Include capital contribution to equity accounted entities.

(e) Net of the entry bonus relating to the acquisition of two Concession Agreements in the UAE, the development capex incurred in 2018 on a 10% interest in the Zohr project which were reimbursed by the acquirer of the interest and the collection of trade advances intended to fund the Zohr project.

Yesterday, Eni's Board of Directors approved the Group results for the second quarter and first half of 2018 (unaudited). Commenting on the results, Claudio Descalzi, CEO of Eni, remarked:

"Eni recorded another period of strong profitability in the second quarter. In the context of a 38% rise in the price of Brent, Eni reported a 152% increase in operating profit, driven by the performance of the Exploration & Production business, which more than tripled its contribution. Our cash generation also grew significantly, driven by the price of Brent and increased production levels, contributing to \$20 per barrel, allowing us to confirm the lowering of our cash neutrality to \$55 per barrel for 2018. The Gas & Power segment also reported excellent results, thanks to the strong integration of the LNG business with upstream activities and the positive impact of the restructuring carried out over the last years. A deterioration in Refining and Chemicals environment – which runs counter-cyclically to the price of Brent – meant a reduction in the contribution of these businesses, albeit remaining positive thanks to recent restructuring. There was significant progress in our portfolio management this quarter with the creation of Vår Energi in Norway as well as the funds received for the sale of Eni's 10% stake in the Zohr field to Mubadala. As a result, net debt fell below €10 billion – the lowest level in 11 years. Consequently I will propose an interim dividend of €0.42 per share at the Board meeting on 13 September."

Highlights

Exploration & Production

Strong growth reported in hydrocarbon production at 1.86 million boe/d (in both the reporting periods): up by 5.2% q-o-q, up by 4.6% in the first half. Net of price effects in PSAs, the growth rate was 6.6% in the quarter and 5.4% in the first half;

production growth fueled by the **ramp-up of giant projects**, recently started up: Zohr, Noroos, Jangkrik, OCTP, Ochigufu, Nenè phase 2; higher production at the Kashagan and Val d'Agri fields (the latter shutdown in the second quarter 2017) and the entry in Abu Dhabi;

main start-ups: Ochigufu offshore Block 15/06 in Angola, maintaining the production plateau at 150 kboe/d; Phase 2 of the giant Bahr Essalam gas field in Libya, just three years after the final investment decision.

Strengthened Eni presence in Norway following the agreement to merge the subsidiary Eni Norge AS with Point Resources. The combined entity will be a leading Norwegian upstream company producing around 180 kboe/d in 2018. Closing is expected by the end of 2018.

Significant progress has been made towards the final investment decision of the Rovuma LNG project to monetize the gas reserves of Area 4 in Mozambique. The development plan of the first phase of the project has been submitted to the Mozambique government. Under negotiation Rovuma LNG sales and purchase agreements. The final investment decision is expected in 2019.

Zohr ramp-up in Egypt: the fourth treatment unit started up in record time increasing installed capacity to approximately 1.6 bscfd (220 kboe/d). Expected in September the start-up of the fifth treatment unit, for a total capacity of approximately 2 bscfd.

Dual exploration model: the divestment to Mubadala Petroleum of a 10% stake in the **Shorouk** concession in offshore Egypt, where the super-giant Zohr gas field is producing, was finalized.

Exploration:

Oil exploration successes at the Block 15/06 in **Angola**, as well as at two exploration prospects located in the Faghur basin, in the South West Meleiha license in **Egypt**.

New exploration acreage: awarded 100% interest in the East Ganai deepwater exploration block, in Indonesia. In the first half, awarded new mineral licences in Mexico, Lebanon and Morocco, a total of 22,000 square kilometers.

Resource base: in the first half of 2018 added approximately 280 million boe.

A cooperation agreement with Sonatrach was finalized to develop new gas resources in conjunction with existing assets.

Exploration & Production adjusted operating profit: €2.74 billion in the second quarter, a more than three-fold increase q-o-q; €4.83 billion in the first half, more than doubling y-o-y.

Gas & Power

Robust recovery in profitability due to the restructuring of the portfolio of long-term gas contracts, a growing LNG business and optimizations in power and logistics: in the second quarter, **adjusted operating profit** of €0.11 billion, compared to a loss of €0.15 billion in the second quarter of 2017; more than doubling at €0.43 billion in the first half of 2018 (€0.19 billion in the first half of 2017).

Finalized an **agreement with Sonatrach** for gas supplies in the 2018-2019 thermal year.

LNG sales: up by 54% to 5.40 bcm in the first half of 2018, more than half sold on the Asian markets leveraging on supplies of upstream equity gas in Indonesia, as result of the improved integration across businesses.

Retail business: continuous increase in the customer base, excluding the impact of the divestments.

Finalized the **divestment** of gas distribution activities in **Hungary**.

Refining & Marketing and Chemicals

Improved refinery utilization rates: 87% in the second quarter, 92% in the first half of 2018 (up by 4 and 6 percentage points, respectively).

Petrochemical sales up by 12.5% in the second quarter of 2018 (up by 7% in the first half of 2018), driven by an improvement in plant performance.

Refining & Marketing adjusted operating profit: €61 million, down by 63% q-o-q (€79 million for the first half, down by 66%) due to an unfavorable trading environment.

Chemicals adjusted operating profit: €6 million in the second quarter, negatively affected by rapidly-escalating costs of oil-based feedstock, not yet fully recovered in product prices; €65 million in the first half (down by 79%).

Group results

Adjusted operating profit: €2.56 billion, up by 152% on a quarterly basis; €4.94 billion in the first half (up by 73% vs. first half of 2017).

Adjusted net profit: €0.77 billion, up by 66% q-o-q; €1.74 billion, up by 45% in the first half of 2018.

Net profit: €1.25 billion in the second quarter (€2.20 billion in the first half).

- **Strong cash flow from operations:** €3 billion (up by 12% q-o-q); €5.2 billion in the first half (up by 13%).

Adjusted cash flow from operations¹ before changes in working capital at replacement cost at €2.82 billion in the second quarter, €5.99 billion in the first half (up by 21% q-o-q and y-o-y).

- **Net capex:** €3.67 billion in the first half; more than funded by organic cash flow.

- **Net borrowings:** €9.9 billion.

- **Leverage:** 0.20, lower than the level of December 31, 2017 (0.23).

- **2018 interim dividend proposal:** €0.42 per share², out of a full-year dividend of €0.83 per share.

¹ See table on page 14.

² See details on page 1, footnote (d).

³ Dividends are not entitled to tax credit and, depending on the receiver, are subject to a withholding tax on distribution or are partially cumulated to the receivers' taxable income.

Outlook 2018

Exploration & Production

Hydrocarbon production: the Company is forecasting a 4% increase for the FY 2018 vs. 2017 at a Brent price scenario of 60 \$/bbl, equalling to a production level of about 1.9 million boe/d. This growth is expected to be driven by: continuing production ramp-up at the fields started up in 2017, particularly in Egypt, Indonesia and Ghana, a larger contribution from the Kashagan, Goliat and Val d'Agri fields, new fields start-ups in Angola, Libya and Ghana, as well as the contribution of the new venture in UAE. These increases are expected to be partly offset principally by mature fields declines.

Gas & Power

Revised upwardly the guidance of the FY adjusted operating profit at €400 million, notwithstanding the business seasonality with the third quarter being the weaker in the year.

Gas sales: expected to decline in line with an expected reduction in long-term contractual commitments both to procure and to supply gas. An increase in nearly 9 million tons of LNG contracted volumes expected by 2018 year-end.

Refining & Marketing and Chemicals

A projected refining break-even margin of approximately 3 \$/barrel by the end of 2018, leveraging on the restart of the EST unit, at the Sannazzaro refinery.

Refining throughputs on own accounts expected to be flat compared to 2017, due to better performance at the Sannazzaro and Livorno refineries because of unplanned shutdowns in 2017, offset by reductions at the Taranto and

Milazzo plants. Green diesel productions are expected to grow at the Venice plant. A higher refineries utilization rate is projected.

Retail sales were substantially unchanged y-o-y in Italy and in European markets. The market share in Italy is expected to be stable at around 24%.

Versalis: spreads of the main commodities, which were negatively affected by rapidly-escalating oil-based feedstock costs in the second quarter 2018, are expected to normalize. Sales volumes are expected to grow in all business lines driven by higher product availability and by fewer planned standstills and upsets.

Group

Cash neutrality: funding of capex for the FY and the dividend is confirmed at a Brent price of approximately 55 \$/bbl in 2018.

2018 FY Capex expected to be €7.7 billion, in line with the guidance.

-4-

Sustainability and Energy Solution business development

		IH		
		2018	2017	Ch. %
Total recordable injury rate (TRIR)	(total recordable injury rate/worked hours) x 1,000,000	0.29	0.35	(17.1)
Direct GHG emissions	(mmtonnes CO ₂ eq.)	21.14	20.53	3.0
- of which CO ₂ eq from combustion and process		16.28	15.88	2.5
- of which CO ₂ eq from methane fugitive		0.67	0.51	31.4
- of which CO ₂ eq from flaring		3.37	3.27	3.1
- of which CO ₂ eq from venting		0.82	0.87	(5.7)
Direct GHG emissions E&P/production	(tonnes CO ₂ eq./toe)	0.153	0.164	(6.7)
Oil spills due to operations (>1 barrel)	(barrels)	653	2,829	(76.9)
Water reinjection	(%)	60	60	..

Energy Solution business development:

- Signed the **final investment decision** with the Kazakh Energy Minister to build, develop and operate a **50 MW wind farm** to supply renewable energy to the Country;
- Eni and GSE presented a **26 MWp photovoltaic plant** in the Assemini industrial area in the province of Cagliari. The plant is part of Progetto Italia, a pool of Eni initiatives designed to create sustainable value by revamping neglected industrial hubs, mainly in Southern Italy.

The **total recordable injury rate** improved by 17.1% y-o-y.

- **Direct GHG emissions/operated hydrocarbon production:** 0.153 tCO₂eq/toe, an improvement of 6.7% y-o-y.

Direct GHG emissions from combustion and process increased by 2.5% reflecting higher production level mainly in the E&P segment due to the ramp-ups and restart of certain plants, partially offset by lower power production in the G&P business.

Emissions from methane fugitive: up by 31.4% due to higher upstream productions.

Emissions from flaring in the E&P segment are up by 3.1% due to temporary commissioning activities relating to new projects started at the end of 2017 and the restart of operations in Libya.

Water reinjection rate at the E&P segment is unchanged at 60%, mainly benefitting from the positive trend in performance reported by fields in Egypt and Ecuador.

Business segments operating review**Exploration & Production****Production and prices**

IQ		IIQ				IIIQ			
2018		2018	2017	%	Ch.	2018	2017	%	Ch.
Production									
885	Liquids	kbbbl/d	881	827	6.5	883	830	6.4	
5,358	Natural gas	mmcf/d	5,359	5,152	4.1	5,359	5,203	3.4	
1,867	Hydrocarbons	kboe/d	1,863	1,771	5.2	1,865	1,783	4.6	
Average realizations									
61.17	Liquids	\$/bbl	69.17	45.29	52.7	65.35	46.90	39.3	
4.50	Natural gas	\$/kcf	4.52	3.45	31.2	4.51	3.53	28.0	
42.34	Hydrocarbons	\$/boe	47.62	32.05	48.6	45.02	32.73	37.5	

In the second quarter of 2018, **oil and natural gas production** averaged 1,863 kboe/d, up by 5.2% from the second quarter of 2017 (1,865 kboe/d in the first half of 2018; up by 4.6%). This performance was driven by the ramp-up at fields started up in 2017, mainly in Indonesia, Egypt, Congo and Ghana and the 2018 start-ups (with a total contribution of 287 kboe/d), as well as higher production at the Kashagan and Val d'Agri fields (the latter shutdown in the second quarter 2017) and the acquisition of the two Concession Agreements Lower Zakum (5%) and Umm Shaif/Nasr (10%) producing offshore in the United Arab Emirates. These positives were partly offset by negative price effects at PSAs contracts, lower production as a result of planned and unplanned shutdowns in Libya, the United Kingdom and Norway, as well as declines from mature fields. When excluding price effects to PSAs contracts (approximately 25 kboe/d and 14 kboe/d in the quarter and the first half, respectively), hydrocarbons production increased by 6.6% and 5.4% in the quarter and the first half of 2018, respectively.

Liquids production (881 kbbbl/d) increased by 54 kbbbl/d, or 6.5% from the second quarter of 2017 (883 kbbbl/d in the first half of 2018, up by 6.4%) due to production ramp-ups of the period and the acquisition in the United Arab Emirates partially offset by price effect and mature fields decline.

Natural gas production (5,359 mmcf/d) increased by 207 mmcf/d, or 4.1% compared to the second quarter of the previous year (5,359 mmcf/d in the first half, up by 3.4%). Start-ups and ramp-ups of producing assets were partly offset by planned and unplanned shutdowns.

Results

IQ		IIQ			IH		
2018	(€ million)	2018	2017	% Ch.	2018	2017	% Ch.

(1,140)	Income taxes	(1,504)	(425)		(2,644)	(1,284)	
55.2	tax rate (%)	58.1	43.1		56.8	51.9	
924	Adjusted net profit (loss)	1,084	561	93.2	2,008	1,191	68.6
	Results also include:						
75	Exploration expenses:	86	113	(23.9)	161	321	(49.8)
64	- prospecting, geological and geophysical expenses	64	74		128	139	
11	- write-off of unsuccessful wells	22	39		33	182	
2,368	Capital expenditure	1,693	1,909	(11.3)	4,061	4,615	(12.0)

In the second quarter of 2018, the Exploration & Production segment reported an **adjusted operating profit** of €2,742 million, a more than threefold increase from the second quarter of 2017 (€845 million). This improvement reflected sharply higher crude oil prices (with the Brent price up by 49% in dollar terms) and higher hydrocarbon production, partly offset by currency headwinds (with the EUR/USD exchange rate up by 8% q-o-q). In the first half of 2018, adjusted operating profit was €4,827 million, more than doubling y-o-y, driven by the same trends mentioned above.

In the second quarter of 2018, **adjusted net profit** was €1,084 million, up by €523 million or 93.2% compared to the second quarter of 2017 (€2,008 million in the first half of 2018, up by €817 million y-o-y). This was due to higher operating performance partly offset by the write-off of financing receivables taken in connection with an unsuccessful exploration project executed by a joint venture in the Black Sea (€200 million). Results were also impacted by an increased adjusted tax rate (up by 15 and 5 percentage points in the quarter and first half, respectively) due to a higher share of taxable profit reported in Countries with higher taxation as well as the non-deductible expense related to the unsuccessful initiative above mentioned. Cash tax rate was 32.7% and 28.4% in the two reporting period.

For the disclosure of the business segment special charges/gains see page 11.

22.44	Worldwide gas sales		18.08	18.63	(3.0)	40.52	41.91	(3.3)
2.70	<i>of which: LNG sales</i>		2.70	1.50	80.0	5.40	3.50	54.3
9.22	Power sales	Twh	8.49	8.39	1.2	17.71	17.76	(0.3)

In the second quarter of 2018, **natural gas sales** were 18.08 bcm (40.52 bcm in the first half), down by 3% from the second quarter of 2017. Sales in Italy were up by 2.8% to 9.77 bcm, due to higher sales to wholesalers and the residential segment, partly offset by lower spot sales. Sales in European markets (5.65 bcm) decreased by 23% reflecting the termination of some long-term and short-term contracts mainly in Germany/Austria, as a result of portfolio rationalization.

Power sales were 8.49 TWh in the second quarter of 2018, up by 1.2% mainly due to higher volumes sold in France. In the first half, sales volumes remained almost unchanged (17.71 TWh).

42 Capital expenditure	55 30 83.3	97 49 98.0

In the second quarter of 2018, the Gas & Power segment reported an **adjusted operating profit** of €108 million, a significant improvement compared to the loss of €146 million reported in the second quarter of 2017. This result reflected the overall restructuring of the portfolio of long-term gas supply contracts, including lower logistic costs and optimizations in the power business. These positives were offset by lower non-recurring gains relating to retroactive effects of the renegotiations performed in 2017 and lower gas volumes sold. In the first half of 2018, adjusted operating profit amounted to €430 million, representing an increase of €238 million compared to the first half of 2017.

Adjusted net profit amounted to €57 million in the second quarter of 2018, reverting a loss of €133 million reported in the previous year (a profit of €272 million in the first half of 2018).

For the disclosure on business segment special charges see page 11.

1,236	Sales of petrochemical products	ktonnes	1,304	1,159	12.5	2,540	2,374	7.0
80	Average plant utilization rate	%	79	76		79	77	

In the second quarter of 2018, **Eni's Standard Refining Margin** – SERM – was 4.1 \$/barrel, down by 22.6% from the second quarter of 2017, due to lower relative prices of products compared to the cost of the petroleum feedstock (-24.8%; 3.5 \$/barrel in the first half) reflecting the strong increase of oil prices.

Eni refining throughputs were 5.60 mmt tonnes, a slight decrease from the second quarter of 2017 (up by 3% in the first half), reflecting lower volumes processed at the Sannazzaro and Milazzo refineries due to planned standstills, offset by higher volumes at the Taranto refinery due to a downtime at the topping unit in the same period of the previous year and the planned standstill at the Bayern Oil refinery occurred in 2017.

Volumes of biofuels produced at the Venice Green refinery were barely unchanged from the second quarter of 2017 (up by 30% compared to the first half of 2017).

Retail sales in Italy of 1.48 mmt tonnes declined by 4.1% in the quarter (2.88 mmt tonnes, down by 2.7% in the first half of 2018), due to lower volumes sold to all market segments on the back of declining consumptions and increasing competitive pressure. Eni's retail market share for the quarter was 24.1%, lower than in the second quarter of 2017 (24.4%).

Wholesale sales in Italy were 1.89 mmt tonnes, declining by 4.7% from the second quarter of 2017 (down by 2.5% from the first half of 2017) mainly due to lower sales of gasoil, bunker and jet fuel, partly offset by increased sales of fuel oil and bitumes.

Retail and wholesale sales in the rest of Europe decreased by 1.4% q-o-q (unchanged in the first half of 2018), due to lower sales volumes in France and Switzerland, partly offset by higher sales in Spain.

Sales of petrochemical products of 1,304 ktonnes increased by 12.5% and 7% in the second quarter and first half of 2018 respectively, mainly due to higher sales of intermediates driven by fewer shutdowns as well as elastomers due to higher product availability.

In the second quarter of 2018, the Refining & Marketing and Chemicals segment reported an **adjusted operating profit** of €67 million (€144 million in the first half), down by 81% from €352 million reported in the second quarter of 2017 (down by 73.4% from the first half of 2017).

The **Refining & Marketing** business reported an adjusted operating profit of €61 million, down by 63% q-o-q (€79 million in the first half of 2018; down by 65.8%) due to an unfavorable trading environment with the refining margin declining by 23%, reflecting higher oil feedstock costs which were not passed onto product prices, and the appreciation of the euro against the US dollar (up by 8%). Moreover, performance was negatively affected by operating difficulties in the oxygenate business in Venezuela. In the first half of 2018, the overall result benefitted from a lower number of unplanned shutdowns. The negative scenario was partly offset by plants and supply optimizations. The marketing performance was substantially unchanged q-o-q.

The **Chemical** business reported an adjusted operating profit of €6 million, down by 96.8% q-o-q (€65 million in the first half of 2018; down by 79% from the first half of 2017). This decrease was driven by lower margins on sales of intermediates and polyethylene, due to rapidly-escalating costs of oil-based feedstock unable to recover in final prices and mounting competitive pressures from cheaper product streams from the Middle-East and the USA. Furthermore, it is worth mentioning that first half of 2017 results benefitted from peak prices recorded for intermediates, mainly butadiene and benzene, reflecting one-off effects (product shortages in the USA and Asian markets).

Adjusted net profit amounting to €19 million in the second quarter of 2018 decreased by 91.6% q-o-q (€86 million in the first half of 2018; down by 75.7%) due to lower operating performance.

For the disclosure on business segment special charges see page 11.

(b) Unrealized intragroup profit elimination mainly pertained to intra-group sales of commodities and services recorded in the assets of the purchasing business segment as of the end of the period.

Adjusted results

In the second quarter of 2018, Eni's consolidated **adjusted operating profit** of €2,564 million more than doubled compared to the second quarter of 2017. The improvement was driven by a robust performance in the E&P segment (the adjusted operating profit was €2,742 million, a three-fold increase q-o-q) due to sharply higher crude oil prices (the Brent benchmark in dollar terms was up by 49%) and production growth, partly offset by a weaker dollar (the EUR/USD exchange rate was up by 8%). The G&P segment reported an adjusted operating profit of €108 million compared to the operating loss of €146 million in the second quarter of 2017. This result reflected further actions concerning long-term supply contracts, a reduction in logistic costs and an improved performance in the power and LNG businesses. The R&M and Chemicals segment reported a decrease of 81% in operating performance due to an unfavorable trading environment, partly offset by continued efficiency initiatives and plant optimizations as well as better utilization rates.

In the first half of 2018, the consolidated adjusted operating profit of €4,944 million was up by 73%. The €2.1 billion increase was comprised of a €1.4 billion increase from scenario effects and a €0.7 billion increase from production growth and efficiency and optimization gains. Second quarter results benefitted from scenario effects for €0.9 billion and an improved performance for €0.6 billion.

Adjusted net profit for the quarter was €767 million, up by 66% q-o-q. The operating performance was partly offset by lower income from investments and financial items and an increased tax rate (65% in the second quarter of 2018, up by approximately 12 percentage points) mainly in the E&P segment driven by a higher share of taxable profit reported in Countries with higher taxation and non-deductible expenses related to unsuccessful exploration initiative. In the first half of 2018, an adjusted net profit of €1,745 million was reported, increasing by 45%. Adjusted tax rate was 60.7%, up by 5 percentage points.

Special items

The **breakdown by segment of special items of operating profit** (a net charge of €184 million in the quarter and €260 million in the first half) is the following:

E&P recorded net charges of €140 million (€259 million in the first half) mainly due to the outcome of an arbitration proceeding relating a long-term contract to purchase regasification services, which

established the termination of the contract and of the related annual fees charged to Eni. It also awarded the counterpart equitable compensation of €282 million (plus financial interests of €18 million), an impairment loss for a gas asset to align its book value to fair value (€58 million), a risk provision relating to a contractual litigation (€45 million); an allowance for doubtful accounts as part of a dispute to recover investments towards a State counterparty to align the recoverable amount with the expected outcome of an ongoing renegotiation. The main gains were recorded on the disposal of a 10% interest in the Shorouk concession, offshore of Egypt, to Mubadala Petroleum, a UAE-based company (€323 million net of assignment bonus and other charges).

G&P: net gains of €49 million (€125 million in the first half) were mainly driven by: the effects of fair-value commodity derivatives that lacked the formal criteria to be accounted as hedges under IFRS (net gains of €103 million in the quarter and €170 million in the first half) and an impairment relating to the alignment of the book value of the Hungarian gas distribution activity to its fair value, divested in June 2018 (€6 million in the first half). The G&P adjusted operating result also includes the positive balance of €56 million related to derivative financial instruments used to manage margin exposure to foreign currency exchange rate movements and exchange translation differences of commercial payables and receivables.

R&M and Chemicals: net charges of €69 million (€107 million in the first half) mainly comprising of: the write-down of capital expenditure relating to certain Cash Generating Units in the R&M business, which were impaired in previous reporting periods and continued to lack any profitability prospects (€20 million and €35 million in the quarter and the first half of 2018, respectively) and environmental provision (€46 million and €79 million in two reporting periods)

Non-operating special items included the tax effects relating to operating special items, Eni's interest of extraordinary charges/impairment recognized by the Saipem subsidiary (€102 million) in the first half of 2018 as well as an impairment reversal (€423 million) at the Angola LNG equity-accounted entity due to improved project economics.

Reported results

In the first half of 2018, **net profit attributable to Eni's shareholders** was €2,198 million, more than doubled compared to the first half of 2017 (€983 million). This performance was driven by a robust operating performance of the E&P segment due to strengthening crude oil prices (up by 36% from the first half of 2017 for the Brent crude oil benchmark) on the back of a global economic recovery, and production growth. These positives were partly offset by a weaker USD (the EUR/USD exchange rate appreciated by 12% on average). The G&P segment reported a significant improvement driven by further actions at long-term supply contracts, the reduction in logistic costs and an improved performance in the power and LNG businesses, the latter also combining with the upstream segment.

The R&M and Chemicals segment was weighted down by an unfavorable trading environment due to increased oil-based feedstock costs, which were not reflected in selling prices and the competitive pressure from cheaper products streams coming from the Middle East and the USA. This negative trend which accelerated in the second quarter caused sharply lower refining margins (down by 25% q-o-q) and spreads vs. the feedstock of the main petrochemicals commodities (cracker margin down by 44% and polyethylene down by 52%). This trend was partly offset by plant optimizations and lower plant shutdowns, allowing a recovery in produced volumes, as well as by efficiency actions.

Net profit benefitted from the improved operating performance (up by €2,364 million) and the increase in finance income and net income from investments (up by €191 million) driven by an impairment reversal of the Angola LNG entity were partly offset by the write-off of a financing receivable related to an unsuccessful exploration initiative executed by a joint venture in the Black Sea. Net profit was negatively impacted by higher income taxes (up by €1,335 million), notwithstanding a 3 percentage points decrease in the group reported tax rate (54.9%) due to higher non-taxable gains.

(362)	CHANGE IN NET BORROWINGS	1,381	(536)	1,917	1,019	(691)	1,710

Net cash flow from operating activities amounted to €5,220 million in the first half 2018. Cash flow from operating activities was also influenced by a lower level of receivables due beyond the end of the reporting period being sold to financing institutions, compared to the amount sold at the end of the fourth quarter 2017 (approximately €700 million).

Net cash flow from operating activities before changes in working capital at replacement cost was €5,542 million, up by 14% compared to the first half of 2017 (€4,881 million). This performance was negatively affected by an expense recognized in connection with the final outcome of an arbitration proceeding (€300 million), an extraordinary allowance for doubtful accounts in the E&P segment (€69 million) and charges related to the sale of 10% interest in Zohr, to be substantially considered as a reduction of the proceeds from the asset disposal. Net of these charges, cash flow from operating activities before changes in working capital at replacement cost is re-determined at €5,989 million (see reconciliation table on the next page).

Capital expenditure for the period, including investments, was €4,612 million. Net capex amounted to approximately €3.67 billion and excluding the following items: an entry bonus paid in connection with the award of the two Concession Agreements in the UAE (€723 million); the share of the 2018 capex pertaining to a 10% divested interest in the Zohr project (€159 million), which were reimbursed to Eni by the buyer at the transaction date (end of June). Also the Company collected €50 million as an advance on future gas supplies to Egyptian state-owned partners which were intended to finance the capex of Zohr. The self-financing ratio of net capex was 142% in the first half of 2018.

Cash flow from disposals (€1,261 million) mainly related to the sale of the 10% interest in the Zohr project, non-strategic assets in the E&P segment and gas distribution activities in Hungary. Other cash flow related to capital expenditure, investments and disposals (€672 million) included the collection of the deferred tranches of the consideration on the sale of 10% and 30% interests in the Zohr project finalized in 2017 (€439 million) and increased payables related to capital expenditure following the progress in the development of Zohr.

Cash flow from operations in excess of these outflows and the payment of the 2017 final dividend to Eni's shareholders (€1,443 million) amounted to approximately €1.1 billion and was utilized to reduce finance debt.

As of June 30, 2018, **fixed assets** decreased by €3,082 million to €68,333 million mainly due to the reclassification of Eni Norge assets as held for sale following the merger agreement signed in July with the shareholders of Point Resources. The increase of capital expenditure for the period (€4,502 million) and positive currency movements (€1,351 million) were partly offset by DD&A (€3,708 million). The increase in "Equity-accounted investments and other investments" was €1,104 million due to a new accounting of equity instruments required by IFRS 9 and impairment reversal of the Angola LNG entity.

Net working capital (-€8,834 million) increased by €2,800 million mainly as a result of a decrease in risk provisions due to the reclassification of Eni Norge decommissioning provision in the disposal group

held for sale, as well as an estimate revision to the decommissioning provision due to higher discount rates.

Shareholders' equity including non-controlling interest was €50,471 million, up by €2.392 million. This was due to net profit for the period and positive foreign currency translation differences (€1,194 million) reflecting the appreciation of the dollar compared to the euro (up by 3%; EUR/USD exchange rate of 1.165 at June 30, 2018 compared to 1.2 at December 31, 2017), partly offset by the payment of the 2017 final dividend (€1,443 million).

Net borrowings⁴ at June 30, 2018 was €9,897 million, lower than 2017 (down by €1,019 million).

As of June 30, 2018, the ratio of net borrowings to shareholders' equity including non-controlling interest – **leverage** – was 0.20, down from 0.23 as of December 31, 2017.

⁴ Details on net borrowings are furnished on page 26.

⁵ Non-GAAP financial measures and other alternative performance indicators disclosed throughout this press release are accompanied by explanatory notes and tables in line with guidance provided by ESMA guidelines on alternative performance measures (ESMA/2015/1415), published on October 5, 2015. For further information, see the section “Non-GAAP measures” of this press release. See pages 18 and subsequent.

Other information, basis of presentation and disclaimer

Article No. 15 (former Article No. 36) of Italian regulatory exchanges (Consob Resolution No. 20249 published on December 28, 2017).

Continuing listing standards about issuers that control subsidiaries incorporated or regulated in accordance with laws of extra-EU countries.

Certain provisions have been enacted to regulate continuing Italian listing standards of issuers controlling subsidiaries that are incorporated or regulated in accordance with laws of extra-EU countries, also having a material impact on the consolidated financial statements of the parent company. Regarding the aforementioned provisions, the Company discloses that:

- as of June 30, 2018, ten of Eni's subsidiaries: Eni Congo SA, Eni Norge AS, Eni Petroleum Co Inc, Nigerian Agip Oil Co Ltd, Nigerian Agip Exploration Ltd, Eni Finance USA Inc, Eni Trading & Shipping Inc, Eni Canada Holding Ltd, Eni Turkmenistan Ltd and Eni Ghana Exploration and Production Ltd - fall within the scope of the new continuing listing standards;

- the Company has already adopted adequate procedures to ensure full compliance with the new regulations.

This press release on Eni's results of the second quarter of 2018 and the first half of 2018 has been prepared on a voluntary basis according to article 82-ter, Regulations on issuers (Consob Regulation No. 11971 of May 14, 1999 and subsequent amendments and inclusions). The disclosure of results and business trends on a quarterly basis is consistent with Eni's policy to provide the market and investors with regular information about the Company's financial and industrial performances and business prospects considering the reporting policy followed by oil&gas peers who are communicating results on quarterly basis.

Results and cash flow are presented for the first and second quarter of 2018, the first half of 2018 and for the second quarter and the first half of 2017. Information on the Company's financial position relates to end of the periods as of June 30, 2018 and December 31, 2017.

Accounts set forth herein have been prepared in accordance with the evaluation and recognition criteria set by the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and adopted by the European Commission according to the procedure set forth in Article 6 of the European Regulation (CE) No. 1606/2002 of the European Parliament and European Council of July 19, 2002. These criteria are unchanged from the 2017 Annual report on form 20-F filed with the US SEC on April 6, 2018, which investors are urged to read, excepted for the adoption of IFRS 9 and 15.

Adoption of IFRS 9 and IFRS 15

Effective January 1, 2018, the new accounting standards IFRS 15 “Revenue from Contracts with Customers” and IFRS 9 “Financial instruments” are current. For both standards Eni elected to apply the cumulative effect method, whereby the retrospective re-measurement of net equity is recognized as restatement of the opening balance of net equity at January 1, 2018, considering the transactions current at that date, without restating the comparative reporting periods.

Further details are disclosed in the Annual report on Form 20-F 2017, in the note 7 “IFRSs not yet adopted” of the Consolidated financial statements. The table below summarizes the impacts of these IFRSs on the opening balances as of January 1, 2018. No effects were recorded at the Group net borrowings.

Disclaimer

This press release, in particular the statements under the section “Outlook”, contains certain forward-looking statements particularly those regarding capital expenditure, development and management of oil and gas resources, dividends, allocation of future cash flow from operations, future operating performance, gearing, targets of production and sales growth, new markets and the progress and timing of projects. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that will or may occur in the future. Actual results may differ from those expressed in such statements, depending on a variety of factors, including the timing of bringing new fields on stream; management’s ability in carrying out industrial plans and in succeeding in commercial transactions; future levels of industry product supply; demand and pricing; operational issues; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; development and use of new technology; changes in public expectations and other changes in business conditions; the actions of competitors and other factors discussed elsewhere in this document. Due to the seasonality in demand for natural gas and certain refined products and the changes in a number of external factors affecting Eni’s operations, such as prices and margins of hydrocarbons and refined products, Eni’s results from operations and changes in net borrowings for the quarter of the year cannot be extrapolated on an annual basis.

Alternative performance measures (Non-GAAP measures)

Management evaluates underlying business performance on the basis of Non-GAAP financial measures, not determined in accordance with IFRS (“Alternative performance measures”), such as adjusted operating profit and adjusted net profit, which are arrived at by excluding from reported operating profit and net profit certain gains and losses, defined special items, which include, among others, asset impairments, gains on disposals, risk provisions, restructuring charges and, in determining the business segments’ adjusted results, finance charges on finance debt and interest income (see below). In determining adjusted results, also inventory holding gains or losses are excluded from base business performance, which is the difference between the cost of sales of the volumes sold in the period based on the cost of supplies of the same period and the cost of sales of the volumes sold calculated using the weighted average cost method of inventory accounting as required by IFRS, except in those business segments where inventories are utilized as a lever to optimize margins.

Management is disclosing Non-GAAP measures of performance to facilitate a comparison of base business performance across periods, and to allow financial analysts to evaluate Eni’s trading performance on the basis of their forecasting models.

Non-GAAP financial measures should be read together with information determined by applying IFRS and do not stand in for them. Other companies may adopt different methodologies to determine Non-GAAP measures. Follows the description of the main alternative performance measures adopted by Eni. The measures reported below refer to the performance of the reporting periods disclosed in this press release:

Adjusted operating and net profit

Adjusted operating and net profit are determined by excluding inventory holding gains or losses, special items and, in determining the business segments’ adjusted results, finance charges on finance debt and interest income. The adjusted operating profit of each business segment reports gains and losses on derivative financial instruments entered into to manage exposure to movements in foreign currency exchange rates, which impact industrial margins and translation of commercial payables and receivables. Accordingly, also currency translation effects recorded through profit and loss are reported within business segments’ adjusted operating profit. The taxation effect of the items excluded from adjusted operating or net profit is determined based on the specific rate of taxes applicable to each of them. Finance charges or income related to net borrowings excluded from the adjusted net profit of business segments are comprised of interest charges on finance debt and interest income earned on cash and cash equivalents not related to operations. Therefore, the adjusted net profit of business segments includes finance charges or income deriving from certain segment operated assets, i.e., interest income on certain receivable financing and securities related to operations and finance charge pertaining to the accretion of certain provisions recorded on a discounted basis (as in the case of the asset retirement obligations in the Exploration & Production segment).

Inventory holding gain or loss

This is the difference between the cost of sales of the volumes sold in the period based on the cost of supplies of the same period and the cost of sales of the volumes sold calculated using the weighted average cost method of inventory accounting as required by IFRS.

Special items

These include certain significant income or charges pertaining to either: (i) infrequent or unusual events and transactions, being identified as non-recurring items under such circumstances; (ii) certain events or transactions which are not considered to be representative of the ordinary course of business, as in the case of environmental provisions, restructuring charges, asset impairments or write ups and gains or losses on divestments even though they occurred in past periods or are likely to occur in future ones; or (iii) exchange rate differences and derivatives relating to industrial activities and commercial payables and receivables, particularly exchange rate derivatives to manage commodity pricing formulas which are quoted in a currency other than the functional currency. Those items are reclassified in operating profit with a corresponding adjustment to net finance charges, notwithstanding the handling of foreign currency exchange risks is made centrally by netting off naturally-occurring opposite positions and then dealing with any residual risk exposure in the exchange rate market. As provided for in Decision No. 15519 of July 27, 2006 of the Italian market regulator (CONSOB), non-recurring material income or charges are to be clearly reported in the management's discussion and financial tables. Also, special items allow to allocate to future reporting periods gains and losses on re-measurement at fair value of certain non-hedging commodity derivatives and exchange rate derivatives relating to commercial exposures, lacking the criteria to be designed as hedges, including the ineffective portion of cash flow hedges and certain derivative financial instruments embedded in the pricing formula of long-term gas supply agreements of the Exploration & Production segment.

Leverage

Leverage is a Non-GAAP measure of the Company's financial condition, calculated as the ratio between net borrowings and shareholders' equity, including non-controlling interest. Leverage is the reference ratio to assess the solidity and efficiency of the Group balance sheet in terms of incidence of funding sources including third-party funding and equity as well as to carry out benchmark analysis with industry standards.

Gearing

Gearing is calculated as the ratio between net borrowings and capital employed net and measures how much of capital employed net is financed recurring to third-party funding.

Free cash flow

Free cash flow represents the link existing between changes in cash and cash equivalents (deriving from the statutory cash flows statement) and in net borrowings (deriving from the summarized cash flow statement) that occurred from the beginning of the period to the end of period. Free cash flow is the cash in excess of capital expenditure needs. Starting from free cash flow it is possible to determine either: (i) changes in cash and cash equivalents for the period by adding/deducting cash flows relating to financing debts/receivables (issuance/repayment of debt and receivables related to financing activities), shareholders' equity (dividends paid, net repurchase of own shares, capital issuance)

and the effect of changes in consolidation and of exchange rate differences; (ii) changes in net borrowings for the period by adding/deducting cash flows relating to shareholders' equity and the effect of changes in consolidation and of exchange rate differences.

Net borrowings

Net borrowings is calculated as total finance debt less cash, cash equivalents and certain very liquid investments not related to operations, including among others non-operating financing receivables and securities not related to operations. Financial activities are qualified as "not related to operations" when these are not strictly related to the business operations.

Leverage and net borrowings

Leverage is a measure used by management to assess the Company's level of indebtedness. It is calculated as a ratio of net borrowings to shareholders' equity, including non-controlling interest. Management periodically reviews leverage in order to assess the soundness and efficiency of the Group balance sheet in terms of optimal mix between net borrowings and net equity, and to carry out benchmark analysis with industry standards.

(*) Net cash used in investing activities included investments and divestments (on net basis) in held-for-trading financial assets and other investments/divestments in certain short-term financial assets. Due to their nature and the circumstance that they are very liquid, these financial assets are netted against finance debt in determining net borrowings. Cash flows of such investments were as follows:

2,541	Cash out in net cash flow from investments	1,961	2,092	(6.3)	4,502	4,923	(8.6)

In the first half of 2018, capital expenditure amounted to €4,502 million (€4,923 million in the first half of 2017) and mainly related to:

- development activities (€3,158 million) deployed mainly in Egypt, Ghana, Norway, Libya, Congo, Italy and Angola. The acquisition of proved and unproved reserves of €723 million relates to the entry bonus in two producing concession agreements in the United Arab Emirates;
- refining activity in Italy and outside Italy (€223 million) aimed at reconversion of Gela refinery into a bio-refinery, reconstruction works of the EST conversion plant at the Sannazzaro refinery, maintain plants' integrity, as well as initiatives in the field of health, security and environment; marketing activity, mainly regulation compliance and stay in business initiatives in the refined product retail network in Italy and in the Rest of Europe (€34 million);
- initiatives relating to gas marketing (€82 million).

Cash-outs comprised in net cash from operating activities (€128 million) relate to geological and geophysical studies as part of the exploration activities, which are charged to expenses.
