PART I

ITEM 1. BUSINESS
Terminology

As used in this Annual Report, unless we specify otherwise, terms such as *we*, *us*, and *our* refer to United Financial Bancorp, Inc., a Maryland corporation, or United Bank, a federal savings bank and the wholly owned subsidiary of United Financial Bancorp, Inc., as indicated by the context.

Forward Looking Statements

This Annual Report contains certain forward-looking statements that may be identified by the use of words such as *believe*, *expect*, *anticipate*, *should*, *planned*, *estimated* and *potential*. Examples of forward-looking statements include, but are not limited to, estimates with respect to our financial condition, results of operations and business that are subject to various factors that could cause actual results to differ materially from these estimates and most other statements that are not historical in nature. These factors include, but are not limited to, general and local economic conditions, changes in interest rates, deposit flows, demand for mortgage and other loans, real estate values, competition, changes in accounting principles, policies, or guidelines, changes in legislation or regulation, and other economic, competitive, governmental, regulatory, and technological factors affecting our operations, pricing, products and services. Additional factors are discussed in this Annual Report on Form 10-K under *Item 1A. Risk Factors*. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Forward-looking statements speak only as of the date they are made and the Company does not undertake to update forward-looking statements to reflect circumstances or events that occur after the date of the forward-looking statements or to reflect the occurrence of unanticipated events. Accordingly, past results and trends should not be used by investors to anticipate future results or trends.

United Financial Bancorp, Inc.

United Financial Bancorp, Inc. (the *Company*), a Maryland corporation incorporated in 2007, is the holding company for United Bank. The Company's assets consist of its investment in United Bank and its liquid investments. The Company is primarily engaged in the business of directing, planning, and coordinating the business activities of the Bank. The Company's most significant asset is its investment in the Bank.

In 2007, the Company sold 9,564,570 shares of its common stock in connection with the second-step conversion from mutual to stock form of United Financial Bancorp, MHC, a Federal mutual corporation. In connection with the offering, each public stockholder of United Financial Bancorp, Inc., a Federal corporation, (*United Financial Federal*) received 1.04079 shares of the common stock of the Company in exchange for each share of *United Financial Federal*. The Company contributed \$45.1 million of the net proceeds of the offering to United Bank.

On November 30, 2009, the Company completed its acquisition of CNB Financial Corp. (*CNB Financial*), the holding company for Commonwealth National Bank. The transaction qualified as a tax-free reorganization for federal income tax purposes. The consideration paid in the transaction to stockholders of CNB Financial consisted of 943,376 shares of Company common stock and \$12,639,495 in cash. Based upon the Company's \$12.84 per share closing price on November 30, 2009, the transaction was valued at approximately \$24.8 million. As a result of this transaction, the Company added six branches, \$289.3 million in assets, \$242.9 million in loans and \$195.2 million in deposits to its franchise.

The Company is authorized to pursue other business activities permitted by applicable laws and regulations for savings and loan holding companies which may include the acquisition of banking and financial services companies. See *Supervision and Regulation Holding Company Regulation* for a discussion of the

Table of Contents

activities that are permitted for savings and loan holding companies. We currently have no understandings or agreements to acquire other financial institutions. We also may borrow funds for reinvestment in United Bank.

The Company's cash flows depend on earnings from interest-earning deposits and any dividends received from United Bank. The Company neither owns nor leases any property, but instead uses the premises, equipment and furniture of United Bank. At the present time, we employ as officers only certain persons who are also officers of United Bank. However, we use the support staff of United Bank from time to time. These persons are not separately compensated by the Company. The Company may hire additional employees, as appropriate, to the extent it expands its business in the future.

The Company's executive offices are located at 95 Elm Street, West Springfield, Massachusetts, and its telephone number is 413-787-1700.

United Bank

United Bank is a federally chartered savings bank headquartered in West Springfield, Massachusetts. United Bank was originally founded in 1882, as a Massachusetts-chartered cooperative bank. Over the years, United Bank has grown through internal growth as well as through a series of five mutual-to-mutual business combinations that occurred between 1960 and 1994 and the 2009 merger with Commonwealth National Bank as described above. In February 2004, United Bank converted to a federal savings bank and, in April 2004, reorganized into the two-tier mutual holding company structure. In July 2005, United Bank completed a minority public stock offering through its holding company, United Financial-Federal raising net proceeds of \$74.8 million.

United Bank's principal business consists of attracting retail deposits from the general public in the areas surrounding our main office in West Springfield, Massachusetts and our sixteen branch offices located in our Springfield Region (Agawam, Chicopee, East Longmeadow, Feeding Hills, Holyoke, Huntington, Indian Orchard, Longmeadow, Ludlow, Northampton, Springfield and Westfield, Massachusetts as well as our Express Drive-Up branch in Northampton, Massachusetts) and six branches in the Worcester Region (West Boylston, Whitinsville, Worcester and Shrewsbury, Massachusetts). We invest those deposits, together with funds generated from operations, in one- to four-family residential mortgage loans as well as in home equity loans and lines of credit, commercial real estate loans, construction loans, commercial and industrial loans, automobile loans, other consumer loans, and investment securities. In general, we retain in our portfolio all loans that we originate; however, over the past few years we have sold the majority of our 20 and 30 year fixed-rate one- to four-family residential loan production in the secondary market, for strategic reasons, including interest rate risk management objectives. Occasionally, we will also enter into loan participations with other financial institutions. Our revenues are derived principally from interest on loans and securities. We also generate revenues from fees and service charges and other income. United Bank emphasizes exceptional personal service for its customers. Our primary sources of funds are deposits, borrowings and principal and interest payments on loans and securities.

United Bank's executive offices are located at 95 Elm Street, West Springfield, Massachusetts, and our telephone number is 413-787-1700.

Available Information

The Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, are made available free of charge on our website, www.bankatunited.com, as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the Securities and Exchange Commission. The information on our website shall not be considered as incorporated by reference into this Form 10-K.

Table of Contents

Market Area

We are headquartered in West Springfield, Massachusetts. Our primary market area for generating deposits is concentrated in the communities surrounding our main and branch offices. We also maintain two financial services facilities that offer insurance and investment products and financial planning services. These facilities are located in West Springfield and Northampton. Our primary lending area is significantly broader than our deposit market area and includes all of Hampden and Hampshire Counties in Western Massachusetts, Northern Connecticut and Worcester County, Massachusetts. At December 31, 2011, 91.9% of our mortgage loan portfolio consisted of loans secured by real estate located in Hampden and Hampshire Counties, Massachusetts.

Springfield Region. The city of West Springfield is largely suburban and is located in the Pioneer Valley near the intersection of U.S. Interstates 90 (the Massachusetts Turnpike) and 91. Interstate 90 is the major east-west highway that transverses Massachusetts. Interstate 91 is the major north-south highway that runs directly through the heart of New England. West Springfield is located approximately 90 miles west of Boston, Massachusetts, 70 miles southeast of Albany, New York and 30 miles north of Hartford, Connecticut. According to a recent census report, West Springfield's estimated 2010 population was approximately 28,391 and the estimated 2010 population for Hampden and Hampshire Counties was 463,490 and 158,050, respectively. During the past eight years, the populations of Hampden and Hampshire Counties increased by 1.59% and 3.83%, respectively, while the population of the Commonwealth of Massachusetts increased by 3.13%. During the same period, the number of households in Hampden and Hampshire Counties increased by 2.65% and 4.84%, respectively.

The economy of the Springfield Region has benefited from the presence of large employers such as the University of Massachusetts, Baystate Health System, Mass Mutual Financial Group, Big Y Supermarkets, Hasbro Games, Peter Pan Bus Lines, Westover Air Force Base, Smith & Wesson, Yankee Candle and Verizon. Other employment and economic activity is provided by financial institutions, colleges and universities, hospitals and a variety of wholesale and retail trade businesses. The Springfield Region also enjoys a strong tourism business with attractions such as Six Flags amusement park, the Eastern States Exposition, called New England's Great State Fair, the Basketball Hall of Fame and several other notable cultural and recreational areas. According to recent census data, per capita and median household income for Hampden County was \$23,945 and \$46,447, respectively, in 2010, lower than the Commonwealth of Massachusetts (\$33,203 and \$62,072) and the United States (\$26,059 and \$50,046). 2010 per capita and median household income for Hampshire County was \$28,287 and \$58,449 respectively.

The Springfield Region has been showing improvement during the past two years. The unemployment rate in Hampden County decreased from 9.7% in December 2010 to 7.9% in November 2011, which is higher than the unemployment rates for Massachusetts as a whole (6.4%) and lower than the United States (8.5%).

Worcester Region. Located one hour from our corporate headquarters in West Springfield, the city of Worcester is located 30 minutes from Boston's MetroWest area and adjacent to the I-495 Corridor. Worcester is the second largest city in New England with an estimated population of 181,045 in 2010. Worcester County's 2010 population was 798,552, a 6.34% increase from 2000. Households in Worcester County grew from 283,927 in 2000 to 303,080 in 2010, an increase of 6.75%. United Bank's Worcester Region Headquarters is located at 33 Waldo Street in Worcester.

Worcester has a diversified economy. The City of Worcester is home to eight colleges and the University of Massachusetts Medical School, its largest employer. Biotechnology is a major enterprise within the city. Its biotech park is host to several innovative companies including Abbott Laboratories, a leading pharmaceutical research and manufacturing firm. Hanover Insurance maintains its national headquarters in Worcester and a subsidiary of Unum, the Paul Revere Life Insurance Company, is also headquartered in

Table of Contents

Worcester as is the Harleysville Worcester Insurance Company, the oldest life insurance company based in Massachusetts. In addition, Worcester is also home to several libraries and museums. Residents also enjoy access to several performing arts centers and variety of annual music festivals and events.

According to recent census data, per capita and median household income for Worcester County, 2010 per capital and median household income was \$29,316 and \$62,072. The unemployment rate in Worcester County decreased from 8.8% in December 2010 to 6.9% in November, 2011.

Competition

We face intense competition within our market area both in making loans and attracting deposits. Our market area has a high concentration of financial institutions including large money center and regional banks, community banks and credit unions. Some of our competitors offer products and services that we currently do not offer, such as trust services and private banking. As of June 30, 2011, the latest date for which information is available, our market share of deposits represented 12.10%, 1.64% and 1.44% of deposits in Hampden, Hampshire and Worcester Counties, Massachusetts, respectively.

Our competition for loans and deposits comes principally from commercial banks, savings and co-operative institutions, mortgage banking firms and credit unions. We face additional competition for deposits from short-term money market funds, brokerage firms, mutual funds and insurance companies. Our primary focus is to build and develop profitable customer relationships across all lines of business while maintaining our role as a community bank.

Lending Activities

Our principal lending activities are the origination of first mortgage loans for the purchase or refinancing of one- to four-family residential real property, as well as the origination of home equity, commercial real estate and commercial and industrial loans. In general, we retain in our portfolio all loans that we originate; however, over the past few years we have sold the majority of our 20 and 30 year fixed-rate one- to four-family residential loan production in the secondary market, for strategic reasons, including interest rate risk management objectives. At December 31, 2011 and 2010 we had \$53,000 and no loans held for sale, respectively.

Table of Contents

One- to Four-Family Residential Mortgage Loans. One of our primary lending activities consists of the origination of one- to four-family residential mortgage loans, substantially all of which are secured by properties located in our primary market area. At December 31, 2011, \$314.8 million, or 28.1% of our loan portfolio, consisted of one- to four-family residential mortgage loans. In general, we retain in our portfolio all loans that we originate; however, over the past few years we have sold the majority of our 20 and 30 year fixed-rate one- to four-family residential loan production in the secondary market, for strategic reasons, including interest rate risk management objectives. One- to four-family mortgage loan originations are generally obtained from our in-house loan representatives, from existing or past customers, through advertising, and through referrals from local builders, real estate brokers and attorneys, and are underwritten pursuant to United Bank's policies and standards. Generally, one- to four-family residential mortgage loans are originated in amounts up to 80% of the lesser of the appraised value or purchase price of the property, with private mortgage insurance or government guarantees required on loans with a loan-to-value ratio in excess of 80%. We generally will not make loans with a loan-to-value ratio in excess of 95%. Further, we generally limit the loan-to-value ratio to 70% on a cash-out refinance transaction based on updated appraisal information.

Fixed-rate mortgage loans are originated for terms of up to 30 years. Generally, fixed-rate residential mortgage loans are underwritten according to Fannie Mae guidelines, policies and procedures. We also offer adjustable-rate mortgage loans for one- to four-family properties, with an interest rate based on the weekly average yield on U.S. Treasuries adjusted to a constant maturity of one-year, which adjust either annually or every three years from the outset of the loan or which adjust annually after a five-, seven- or ten-year initial fixed-rate period. For the year ended December 31, 2011, we originated \$92.5 million of fixed rate one- to four-family residential loans and \$1.5 million of adjustable-rate one- to four-family residential loans. Our adjustable-rate mortgage loans generally provide for maximum rate adjustments of 2% per adjustment, with a lifetime maximum adjustment up to 6%, regardless of the initial rate. Our adjustable-rate mortgage loans amortize over terms of up to 30 years.

Adjustable rate mortgage loans decrease the risk associated with changes in market interest rates by periodically repricing, but involve other risks because as interest rates increase the underlying payments by the borrower increase, thus increasing the potential for default by the borrower. At the same time, the marketability of the underlying collateral may be adversely affected by higher interest rates. Upward adjustment of the contractual interest rate also is limited by the maximum periodic and lifetime interest rate adjustments permitted by our loan documents and, therefore, the effectiveness of adjustable-rate mortgage loans may be limited during periods of rapidly rising interest rates. At December 31, 2011, \$21.6 million, or 6.8%, of our one- to four-family residential mortgage loans had adjustable rates of interest.

In an effort to provide financing for low- and moderate-income home buyers, we offer a variety of programs to qualified borrowers. These programs include Veterans Administration (VA), Federal Housing Administration (FHA), Massachusetts Housing Financing Agency (MHFA) and several other programs that we have developed in-house. These loans are offered with fixed rates of interest, terms of up to 30 years and are secured by one-to four-family residential properties. All of these loans are originated using agency underwriting guidelines. These loans may be originated in amounts with loan-to-value ratios up to 100%. Private mortgage insurance or government guarantees are required for loans with loan-to-value ratios over 80%. We also offer our own first-time homebuyer loans to qualified individuals. These loans are offered with terms of up to 30 years and fixed or adjustable rates of interest, which may be discounted, and the applicant may not be required to pay certain loan origination fees.

We also offer our employees who satisfy certain criteria and our general underwriting standards fixed- or adjustable rate loan products with reduced interest rates, and reduced application and loan origination fees. Employee and insider loans adhere to all other terms and conditions contained in the loan policy.

All residential mortgage loans that we originate include due-on-sale clauses, which give us the right to declare a loan immediately due and payable in the event that, among other things, the borrower sells or otherwise

Table of Contents

disposes of the real property subject to the mortgage and the loan is not repaid. All borrowers are required to obtain title insurance for the benefit of United Bank. We also require homeowner's insurance and fire and casualty insurance and, where circumstances warrant, flood insurance on properties securing real estate loans.

Commercial Real Estate Loans. We originate commercial real estate loans that are generally secured by five or more unit apartment buildings, industrial properties and properties used for business purposes such as small office buildings, hotels, motels, recreational and retail facilities mainly located in our primary market area. At December 31, 2011, commercial real estate mortgage loans totaled \$450.2 million, or 40.1% of our total loans, compared to \$428.0 million, or 39.9% of our total loans at December 31, 2010. Our real estate underwriting policies provide that such loans may be made in amounts up to 85% of the appraised value of the property, though such loans are generally limited to 80% of the appraised value. In addition, these loans must comply with our loan policy guidelines and with our current loans-to-one borrower limit for these types of loans which is generally 15% of our unimpaired capital and surplus which, at December 31, 2011, was \$31.0 million. Our commercial real estate loans may be made with terms of up to 25 years though generally loan terms do not exceed 10 years and loan amortization periods do not exceed 20 years. Commercial real estate loans are offered with interest rates that are fixed or adjust periodically and are generally indexed to the prime rate as reported in *The Wall Street Journal* or to rates published by the Federal Home Loan Bank of Boston. In reaching a decision on whether to make a commercial real estate loan, we consider the net operating income of the property, the borrower's expertise and credit history, and the profitability of the underlying business and the value of the underlying property. In addition, with respect to real estate rental properties, we will also consider the term of the lease and the credit quality of the tenants. We generally require that the properties securing these real estate loans have stabilized debt service coverage ratios (the ratio of earnings before debt service to debt service) of at least 1.2 times. Environmental surveys are generally required for commercial real estate loans. Generally, commercial real estate loans made to corporations, partnerships and other business entities require personal guarantees by the principals unless certain LTV and debt service coverage thresholds are met.

A commercial borrower's financial information is monitored on an ongoing basis by requiring periodic financial statement updates, payment history reviews and periodic face-to-face meetings with the borrower. We generally require commercial borrowers with loans in excess of \$250,000 to provide annually updated financial statements and federal tax returns. These requirements also apply to the individual principals of our commercial borrowers when they are providing personal guarantees. We also require borrowers with rental investment property to provide us with an annual report of income and expenses for the property, including a tenant list and copies of leases, as applicable. The largest commercial real estate relationship in our portfolio at December 31, 2011 was a combination of loans totaling \$13.1 million secured by two office buildings leased to a Fortune 500 company. The second largest commercial real estate loan at that date was a loan of \$9.0 million secured by a supermarket-anchored retail plaza. All of these loans were performing in accordance with their terms at December 31, 2011.

Loans secured by commercial real estate, including multi-family properties, generally involve larger principal amounts and a greater degree of risk than one- to four-family residential mortgage loans. Because payments on loans secured by commercial real estate often depend on the successful operation or management of the properties, repayment of such loans may be affected by adverse conditions in the real estate market or the economy.

Construction Loans. We originate construction loans for the development of one- to four-family residential properties located in our primary market area. Residential construction loans are generally offered to individuals for the construction of their personal residences. At December 31, 2011, residential construction loans totaled \$1.6 million, or 0.1% of total loans, compared to \$2.7 million, or 0.3% at December 31, 2010. At December 31, 2011, the unadvanced portion of these construction loans totaled \$749,000.

Our residential construction loans generally provide for the payment of interest only during the construction phase, which is usually 12 months. In the case of construction loans to individuals for the construction of their primary residences, our policies require that the loan convert to a permanent mortgage loan

Table of Contents

at the end of the construction phase. Residential construction loans can be made up to a maximum loan-to-value ratio of 90%, provided that the borrower obtains private mortgage insurance if the loan balance exceeds 80% of the appraised value or sales price, whichever is less, of the secured property. Residential construction loans are generally made on the same terms as our one- to four-family mortgage loans.

We also make commercial construction and land development loans for residential and commercial development projects. The projects include single family, multi-family, apartment, industrial, retail and office buildings, and condominium developments. These loans generally have an interest-only phase during construction and then convert to permanent financing. We generally require that a commitment for permanent financing be in place prior to closing the construction loan. The maximum loan-to-value ratio limit applicable to these loans is generally 80%. Before making a commitment to fund a construction loan, we require an appraisal of the property by an independent licensed appraiser. We generally also review and inspect each property before disbursement of funds during the terms of the construction loan. Loan proceeds are disbursed after inspection based on the percentage-of-completion method. Due to current economic conditions, management has become more cautious in evaluating and approving funding for construction loans. At December 31, 2011, commercial construction and land development loans totaled \$28.6 million, or 2.6% of total loans, compared to \$24.8 million, or 2.3% of total loans, at December 31, 2010. At December 31, 2011, the largest outstanding commercial construction loan balance was for \$3.1 million, secured by a retail development in Westfield, Massachusetts. This loan was performing according to its terms at December 31, 2011. At December 31, 2011, the unadvanced portion of all commercial construction and land development loans totaled \$26.7 million.

Construction and development financing is generally considered to involve a higher degree of credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the value of the property at completion of construction compared to the estimated cost (including interest) of construction and other assumptions. If the estimate of construction cost proves to be inaccurate, we may be required to advance funds beyond the amount originally committed in order to protect the value of the property. Additionally, if the estimate of value proves to be inaccurate, the value of the project, when completed, may be insufficient to assure full repayment of the loan.

Home Equity Loans and Home Equity Lines of Credit. We also offer home equity loans and home equity lines of credit, both of which are secured by one- to four-family residences, substantially all of which are located in our primary market area. At December 31, 2011, home equity loans and equity lines of credit totaled \$135.5 million, or 12.1% of total loans. Additionally, at December 31, 2011, the unadvanced amounts of home equity lines of credit totaled \$122.6 million. The underwriting standards utilized for home equity loans and equity lines of credit include a determination of the applicant's credit history, an assessment of the applicant's ability to meet existing obligations and payments on the proposed loan and the value of the collateral securing the loan. The combined (first and second mortgage liens) loan-to-value ratio for home equity loans and equity lines of credit is limited to 80%. Home equity loans are offered with fixed and adjustable rates of interest and with terms of up to 20 years. Our home equity lines of credit have adjustable rates of interest, which are indexed to the prime rate, as reported in *The Wall Street Journal*, interest only draw periods under the lines are limited to 10 years. We originated \$35.2 million under home equity lines of credit and other home equity loans during the year ended December 31, 2011, as compared to total originations of \$39.5 million during the year ended December 31, 2010.

Commercial and Industrial Loans. Commercial and industrial loans have been a substantial part of our lending operations for a number of years. At December 31, 2011, we had \$176.1 million of commercial and industrial loans, which amounted to 15.7% of total loans compared to \$165.3 million, or 15.4% of total loans at December 31, 2010. We make commercial and industrial loans primarily in our market area to a variety of professionals, sole proprietorships and small and mid-sized businesses. Commercial and industrial loan products include term loans and revolving lines of credit. The maximum amount of a commercial and industrial loan is limited by our loans-to-one-borrower limit which is generally 15% of our unimpaired capital and surplus and which, at December 31, 2011, was \$31.0 million. Such loans are generally used for working capital and

Table of Contents

purchasing equipment or furniture. Commercial and industrial loans are made with either adjustable or fixed rates of interest with a maximum term of twenty years. The interest rates for commercial loans are based on the prime rate, as published in *The Wall Street Journal*.

When making commercial and industrial loans, we consider the financial strength and debt service capabilities of the borrower, our lending history with the borrower, the projected cash flows of the business and the value and type of the collateral. Commercial and industrial loans are generally secured by a variety of collateral, primarily accounts receivable, inventory, equipment, savings instruments and readily marketable securities. In addition, we usually require the business principals to execute personal guarantees.

Commercial and industrial loans generally have greater credit risk than residential mortgage loans. Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her employment or other income, and which are secured by real property whose value tends to be more easily ascertainable, commercial and industrial loans generally are made on the basis of the borrower's ability to repay the loan from the cash flows of the borrower's business. As a result, the availability of funds for the repayment of commercial and industrial loans may depend substantially on the success of the business itself. Further, any collateral securing the loans may depreciate over time, may be difficult to appraise and may fluctuate in value. We seek to minimize these risks through our underwriting standards. At December 31, 2011, our largest commercial and industrial loan outstanding was \$6.6 million, which is secured by a certificate of deposit that we maintain. Our largest committed commercial and industrial relationship was \$13.4 million to a manufacturer located in our primary market area. Including an additional \$4.8 million participated out to another bank, the total relationship of \$18.2 million is comprised of \$4.5 million of commercial and industrial loan availability, a \$8.9 million industrial development bond for the construction of a new facility (\$4.8 million of which is participated out) and a \$4.1 million commercial real estate loan on the borrower's secondary facility. The total amount outstanding at December 31, 2011 was \$13.4 million (\$8.6 million net of participation), with no amounts outstanding on the commercial and industrial loans. All loans to these customers were performing in accordance with loan terms at December 31, 2011.

Automobile and Other Consumer Loans. We offer direct automobile loans with terms of up to 60 months. For new cars, our lending policy provides that the amount financed should not exceed 100% of the gross selling price of the vehicle. For used cars, our lending policy provides that the amount of the loan should not exceed the loan value of the vehicle, as established by industry guides. The interest rates offered are the same for new and used automobile loans. Full insurance coverage must be maintained on the financed vehicle and United Bank must be named loss payee on the policy. At December 31, 2011, we had \$7.8 million in automobile loans, which amounted to 0.7% of total loans.

We offer a variety of other consumer loans, principally to existing United Bank customers residing in our primary market area with acceptable credit ratings. Our other consumer loans generally consist of secured and unsecured personal loans, motorcycle and motor home loans, manufactured housing, boat loans and pool and spa loans. Other consumer loans totaled \$7.1 million, or 0.6% of our total loan portfolio at December 31, 2011. At December 31, 2011, \$324,000 of such consumer loans were unsecured.

Consumer loans have greater credit risk than residential mortgage loans, particularly in the case of loans that are unsecured or secured by rapidly depreciating assets such as automobiles, motorcycles, motor homes and boats. In these cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, consumer loan collections depend on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy.

Loan Originations, Purchases, Sales, Participations and Servicing of Loans. Lending activities are conducted primarily by our loan personnel operating at our main and branch office locations. All loans that we

Table of Contents

originate are underwritten pursuant to our policies and procedures. We originate both fixed-rate and adjustable-rate loans. Our ability to originate fixed or adjustable rate loans is dependent upon relative customer demand for such loans, which is affected by current and expected future levels of market interest rates.

Generally, we retain in our portfolio all loans that we originate, however, for strategic reasons, including our interest rate risk management objectives, we periodically sell fixed rate residential mortgage loans which conform to the underwriting standards specified by Federal National Mortgage Association (Fannie Mae) and Massachusetts Housing Financing Authority (MHFA). All one-to four-family loans sold are on a non-recourse basis. Historically, in such instances, our loans have been typically sold to Fannie Mae and MHFA with servicing retained. Depending on interest rate levels at the time of any such sale, loans may be sold at either a net gain or a net loss. Additionally, we may not be able to reinvest the proceeds from any future loan sales at interest rates comparable to the interest rates on the loans that are sold. Reinvestment in loans with lower interest rates would result in lower interest income on the reinvested proceeds compared to the interest income previously generated by the loans that were sold.

The Company was servicing loans sold in the amount of \$68.3 million and \$68.9 million, as of December 31, 2011 and 2010, respectively. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent mortgagors, supervising foreclosures and property dispositions in the event of unremedied defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans. The balance of mortgage servicing rights to these loans was insignificant as of December 31, 2011 and 2010.

From time to time, we will also purchase loans. No loans were purchased during 2011 or 2010.

From time to time, we will also participate in loans, sometimes as the lead lender. Whether we are the lead lender or not, we underwrite our participation portion of the loans according to our own underwriting criteria and procedures. At December 31, 2011, we had \$41.0 million in loan participation interests in which we were the lead bank after \$43.8 million of participations sold, and \$29.1 million in loan participations in which we were not the lead bank.

Table of Contents

The following table shows our loan originations, purchases, sales and repayment activities for the years indicated.

	Years Ended December 31,		
	2011	2010	2009
	(In thousands)		
Total loans at beginning of period	\$ 1,074,111	\$ 1,122,241	\$ 870,488
Loan originations:			
Residential mortgages	93,959	59,992	61,374
Commercial mortgages	68,504	45,164	71,087
Construction (1)	22,147	33,307	15,805
Home equity	35,222	39,528	46,706
Commercial and industrial	57,235	63,412	61,923

Other consumer	481	688	649
Total loans originated	280,174	246,478	264,147
Loans purchased	-	-	10,262
Loans acquired from CNB Financial at fair value	-	-	236,387
Deductions:			
Principal loan repayments	226,610	273,374	230,976
Loan sales	11,214	27,058	29,530
(Increase) decrease due to other items (2)	(5,418)	(5,824)	(1,463)
Total deductions	232,406	294,608	259,043
Net loan activity	47,768	(48,130)	251,753
Total loans at end of period	\$ 1,121,879	\$ 1,074,111	\$ 1,122,241

(1) Includes \$21,022, \$31,978 and \$7,847 of commercial construction loans for the years ended December 31, 2011, 2010 and 2009, respectively.

(2) Includes additional disbursements on home equity and lines of credit, participation loans serviced for others, minor changes and other activity on loans previously originated.

Loan Approval Procedures and Authority. United Bank's lending activities follow written, non-discriminatory underwriting standards and loan origination procedures established by United Bank's Board of Directors. The loan approval process is intended to assess the borrower's ability to repay the loan, the viability of the loan and the adequacy of the value of the property that will secure the loan. To assess the borrower's ability to repay, we review the employment and credit history and information on the historical and projected income and expenses of borrowers.

United Bank's policies and loan approval limits are established by the Board of Directors. The Board of Directors has delegated authority to United Bank's Chief Lending Officer to review and assign lending authorities to certain individuals of United Bank (ranging from senior management to senior loan underwriter) (the "Designated Individuals") to consider and approve loans within their designated authority. In addition the Board has delegated authority at the request of the Chief Lending Officer to an Officers' Loan Committee comprising the Chief Executive Officer, Chief Lending Officer, EVP of Commercial Banking, Chief Credit Officer and SVP of Risk Management. Loans in amounts above the authorized limits of the Officers' Loan Committee and loans outside of the designated authority of the Officers' Loan Committee require the approval of United Bank's Directors' Loan Committee. The Directors' Loan Committee consists of four of our directors, including our Chief Executive Officer. All loans that are approved by the Designated Individuals or the Officers' Loan Committee are still reviewed and ratified by the Directors' Loan Committee and the Board of Directors on a monthly basis.

Table of Contents

All residential mortgage loans (one- to four-family loans, home equity loans, home equity lines of credit, and residential construction loans) may be approved by certain of the Designated Individuals in amounts up to the annually adjusted Fannie Mae and Federal Home Loan Mortgage Corporation (Freddie Mac) secondary market conforming loan limits (Conforming Loans). Residential mortgage loans in excess of the Conforming Loan limit and up to \$1.0 million may be approved by any two of either United Bank 's Chief Executive Officer, Chief Financial Officer or Senior Vice President of Retail Lending. Residential loans in excess of \$1.0 million must be approved by any two of the senior executive officers listed above and United Bank 's Officers' Loan Committee.

All commercial real estate, commercial construction loans and commercial and industrial loans in amounts up to \$1.0 million may be approved by certain of the Designated Individuals. All such loans in excess of \$1.0 million, or additional extensions of credit to existing commercial borrowers that result in liability in excess of \$1.0 million, must be approved by United Bank 's Officers' Loan Committee. All home equity loans and home equity lines of credit up to \$500,000 may be approved by certain of the Designated Individuals. All home equity loans and home equity lines of credit in excess of \$500,000 must be approved by the Officers' Loan Committee. All loans in excess of \$2.0 million, or additional extensions of credit to existing commercial borrowers that result in liability in excess of \$2.0 million, must also be approved by United Bank 's Directors' Loan Committee.

All consumer loans in amounts up to \$100,000 may be approved by certain of the Designated Individuals. All consumer loans in excess of \$100,000 must be approved by the Loan Committee.

We generally require appraisals of all real property securing loans, except for home equity loans and equity lines of credit, in which case we may use the assessed tax value of the property securing such loans. Appraisals are performed by independent licensed appraisers. All appraisers are approved by the Directors' Loan Committee annually. We require fire and extended coverage insurance in amounts at least equal to the principal amount of the loan.

Non-performing and Problem Assets

Asset Quality Process. We have an independent loan review process and our loan review consultants provided two on-site reviews of our commercial portfolio during 2011. All loan relationships in excess of \$1.0 million and all classified loans over \$500,000 were reviewed by the third party consultants.

We initiate collection efforts when a loan becomes ten days past due with system-generated reminder notices. Subsequent late charge and delinquent notices are issued and the account is monitored on a regular basis thereafter. Personal, direct contact with the borrower is attempted early in the collection process as a courtesy reminder and later to determine the reason for the delinquency and to safeguard our collateral. When a loan is more than 60 days past due, the credit file is reviewed and, if deemed necessary, information is updated or confirmed and collateral re-evaluated. We make every effort to contact the borrower and develop a plan of repayment to cure the delinquency. A summary report of all loans 30 days or more past due is reported to the Board of Directors monthly. If no repayment plan is in process, the file is referred to counsel for the commencement of foreclosure or other collection efforts.

Loans are generally placed on non-accrual status when they are more than 90 days delinquent. When loans are placed on a non-accrual status, unpaid accrued interest is fully reversed.

Table of Contents

Non-Performing Assets. The table below sets forth the amounts and categories of our non-performing assets at the dates indicated. As noted, we had three troubled debt restructurings (loans for which a portion of interest or principal has been forgiven and loans modified at interest rates less than current market rates).

	At December 31,				
	2011	2010	2009	2008	2007
	(Dollars in thousands)				
Non-accrual loans:					
Residential mortgages	\$ 1,417	\$ 1,036	\$ 1,190	\$ 1,244	\$ 328
Commercial mortgages	2,124	3,256	10,717	2,544	553

Other consumer	163	55	33	140	-
Total	6,731	7,702	16,287	4,797	1,785
Non-accrual troubled debt restructures:					
Commercial mortgages	860 ⁽¹⁾	860 ⁽¹⁾	-	-	-
Construction	-	872 ⁽²⁾	-	-	-
Commercial and industrial	863 ⁽³⁾				
Total	1,723	1,732	-	-	-
Total non-accrual loans	8,454	9,434	16,287	4,797	1,785
Other non-performing assets:					
Other real estate owned	2,054	1,536	1,545	998	880
Other non-performing assets	69	-	-	-	-
Total	2,123	1,536	1,545	998	880
Total non-performing assets	\$ 10,577	\$ 10,970	\$ 17,832	\$ 5,795	\$ 2,665
Accruing troubled debt restructures:					
Commercial mortgages	\$ 257 ⁽⁴⁾	\$ 3,473 ⁽⁵⁾	\$ -	\$ -	\$ -
Ratios:					
Total non-accrual loans to total loans	0.75%	0.88%	1.45%	0.55%	0.22%
Total non-performing assets to total assets	0.65%	0.69%	1.16%	0.46%	0.25%
Allowance for loan losses to non-performing loans	131.68%	105.86% ⁽⁶⁾	56.36% ⁽⁶⁾	171.98%	432.16%

(1) Represents an \$860,000 troubled debt restructure commercial mortgage loan which was restructured in the second quarter of 2010. There were no additional commitments to this borrower.

(2) Represents an \$872,000 troubled debt restructure construction loan which was restructured in the fourth quarter of 2010. There were no additional commitments to this borrower.

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

- (3) Represents an \$863,000 troubled debt restructure commercial and industrial loan which was restructured in the second quarter of 2011. There were no additional commitments to this borrower.
- (4) Represents a commercial mortgage loan which was restructured in the first quarter of 2011 and was returned to accrual status at September 30, 2011 as the customer has been current on the new payments for six months.
- (5) Represents a commercial mortgage loan which was restructured in the first quarter of 2010 and was returned to accrual status at September 30, 2010 as the customer has been current on the new payments for six months.
- (6) Exclusive of the \$163,000 and \$3.3 million in non-performing loans acquired in acquisition of CNB Financial at December 2010 and 2009, respectively, allowance for loan losses as a percent of non-performing loans would have been 107.72% and 70.44%, respectively.
As noted in the above table, non-accrual loans amounted to approximately \$8.5 million and \$9.4 million at December 31, 2011 and 2010, respectively. There are no loans greater than 90 days past due and still accruing interest as of December 31, 2011. The non-accrual loan total for December 31, 2011 includes two troubled debt restructure loans: an \$860,000 commercial real estate loan which was impaired at March 31, 2010 and was

Table of Contents

restructured during the second quarter of 2010 and a troubled debt restructure commercial and industrial loan for \$863,000 which was restructured in the second quarter of 2011. The non-accrual loan total for December 31, 2010 includes two troubled debt restructure loans: an \$860,000 commercial real estate loan which was impaired at March 31, 2010 and was restructured during the second quarter of 2010 and a troubled debt restructure construction loan for \$872,000 which was restructured in the fourth quarter of 2010. The \$980,000 decrease in total non-accrual loans from December 31, 2010 to December 31, 2011 is mainly due to decreases of \$1.1 million in commercial mortgages and \$952,000 in construction loans, offset by increases of \$619,000 in commercial and industrial loans and \$381,000 in residential mortgages. The non-accrual loan total for December 31, 2009 includes a \$3.5 million commercial real estate loan which was impaired at December 31, 2009 and was restructured during the first quarter of 2010. This loan was classified as a troubled debt restructure and was placed on non-accrual status as of March 31, 2010. As of September 30, 2010, this loan was returned to accruing status as the customer has been current on the revised payment structure for more than six months. Each of the Company's non-performing assets has an active workout plan in place. Additional interest income of approximately \$539,000, \$363,000, \$281,000, \$132,000 and \$69,000, respectively, would have been recorded during the years ended December 31, 2011, 2010, 2009, 2008 and 2007, respectively, if the loans had performed in accordance with their original terms.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

At December 31, 2011 and 2010, the recorded investment in impaired loans was \$8.7 million and \$12.2 million, respectively. A loan reserve of \$235,000 and \$667,000 was established on \$3.5 million and \$3.5 million of the impaired loans at December 31, 2011 and 2010, respectively. In 2009 and in accordance with the Loans and Debt Securities Acquired with Deteriorating Credit Quality section of the Financial Accounting Standards Board Accounting Standards Codification (FASB ASC) for Receivables (Topic 310), the Company recorded a non-accretable credit discount of \$2.3 million related to impaired loans of \$5.2 million acquired from CNB Financial. The average balance of impaired loans was \$10.7 million, \$14.0 million and \$9.3 million for the years ended December 31, 2011, 2010 and 2009, respectively. Interest income recognized on impaired loans during 2010, 2009 and 2008 was not significant.

-------	----	----------	----	----------	----	----------

- (1) Excludes an \$860,000 commercial mortgage loan which was restructured in the second quarter of 2010 and was placed on non-accrual status. Although this troubled debt restructure loan is reported as a non-performing asset, the borrower is delinquent for less than 60 days.
- (2) Excludes an \$872,000 construction loan which was restructured in the fourth quarter of 2010 and was placed on non-accrual status. Although this loan is reported as a non-performing asset, the borrower is current with respect to the restructured payment terms.

Table of Contents

Other Real Estate Owned. Other real estate acquired by us as a result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned until sold. When property is acquired it is recorded at the lower of cost or fair market value at the date of foreclosure, establishing a new cost basis. Holding costs and declines in fair value after acquisition are expensed. At December 31, 2011, we had \$2.1 million of real estate owned.

Classified Assets. Office of the Comptroller of the Currency regulations provide that loans and other assets of lesser quality should be classified as substandard, doubtful or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard, with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets without the establishment of a specific loss reserve is not warranted. We classify an asset as special mention if the asset has a potential weakness that warrants management's close attention. While such assets are not impaired, management has concluded that if the potential weakness in the asset is not addressed, the value of the asset may deteriorate, adversely affecting the repayment of the asset.

We establish general allowances for loan losses in an amount deemed prudent by management for loans classified substandard or doubtful, as well as for other potential problem loans. General allowances represent loss allowances which have been established to recognize the inherent losses associated with lending activities, but which, unlike specific allowances, have not been allocated to particular problem assets. When we classify problem assets as loss, we are required either to establish a specific allowance for losses equal to 100% of the amount of the asset so classified or to charge off such amount. Our determination as to the classification of our assets and the amount of our valuation allowances is subject to review by the Office of the Comptroller of the Currency, which can order the establishment of additional general or specific loss allowances.

The following table shows the aggregate amounts of our classified assets at the dates indicated for loans and foreclosed assets. The total amount of loans in the table below at December 31, 2011 includes fourteen relationships which represent 55% of the classified loans. A \$3.0 million classified asset was paid in full on January 3, 2012. Of the \$2.1 million in other real estate owned, one property for \$600,000 is under a sales contract with a closing scheduled in the first quarter of 2012.

	At December 31,	
	2011	2010
	(In thousands)	
Classified Loans:		
Special mention	\$ 19,804	\$ 27,687
Substandard	39,279	44,113
Doubtful	100	312
Loss	-	-
Total classified loans	\$ 59,183	\$ 72,112
Foreclosed Assets:		
Other real estate owned	2,054	1,536
Other non-performing assets	69	-
Total classified assets	\$ 61,306	\$ 73,648

The loan portfolio is reviewed on a regular basis to determine whether any loans require classification in accordance with applicable regulations. Not all classified assets constitute non-performing assets.

Table of Contents

A loan is classified as a troubled debt restructuring if the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. This usually includes a modification of loan terms, such as a reduction of the interest rate to below market terms, capitalizing past due interest or extending the maturity date and possibly a partial forgiveness of debt. Interest income on restructured loans is accrued after the borrower demonstrates the ability to pay under the restructured terms through a sustained period of repayment performance, which is generally six months.

Allowance for Loan Losses

Our allowance for loan losses is maintained at a level necessary to absorb loan losses that are both probable and reasonably estimable. Management, in determining the allowance for loan losses, considers the losses inherent in our loan portfolio and changes in the nature and volume of loan activities, delinquent and classified loans and charge-offs, along with the general economic and real estate market conditions. A description of our methodology in establishing our allowance for loan losses is set forth in under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation Critical Accounting Policies Allowance for Loan Losses. The allowance for loan losses as of December 31, 2011 was maintained at a level that represents management's best estimate of losses inherent in the loan portfolio. However, this analysis process is inherently subjective, as it requires us to make estimates that are susceptible to revisions as more information becomes available. Although we believe that we have established the allowance at levels to absorb probable and estimable losses, future additions or deductions may be necessary if economic or other conditions in the future differ from the current environment.

In addition, as an integral part of their examination process, the Office of the Comptroller of the Currency has authority to periodically review our allowance for loan losses. Such agencies may require that we recognize additions to the allowance based on their judgments of information available to them at the time of their examination.

Table of Contents

Allowance for Loan Losses. The following table sets forth activity in our allowance for loan losses for the years indicated.

	2011	At or For the Year Ended December 31,				2007
		2010	2009	2008		
		(Dollars in thousands)				
Balance at beginning of period	\$ 9,987	\$ 9,180	\$ 8,250	\$ 7,714	\$ 7,218

Investments

The investment policy is reviewed annually by management and any changes to the policy are recommended to and subject to the approval of the Board of Directors. Authority to make investments under the approved investment policy guidelines is delegated to appropriate officers. While general investment strategies are developed and authorized by the Board of Directors, the execution of specific actions primarily rests with United Bank's Chief Financial Officer. He is both responsible for ensuring that the guidelines and requirements included in the investment policy are followed and that all securities are considered prudent for investment. He and United Bank's Treasurer or his/her designee, under his/her direction is authorized to execute investment transactions (purchases and sales) up to \$10 million per transaction without prior approval and within the scope of the established investment policy. All investment transactions are reviewed and ratified or approved (as the case may be) at regularly scheduled meetings of the Board of Directors. Any investment that, subsequent to its purchase, fails to meet the guidelines of the policy is reported to the Board of Directors at its next meeting where the Board decides whether to hold or sell the investment.

The Company's Board of Directors has adopted an investment policy that is substantially identical to the Bank's policy. Any references herein to the Bank also apply to the Company.

Federally chartered savings banks have authority to invest in various types of assets, including U.S. Treasury obligations, securities of various federal agencies, mortgage-backed securities, certain certificates of deposit of insured financial institutions, overnight and short-term loans to other banks, corporate debt instruments, and Fannie Mae and Freddie Mac equity securities. United Financial Bancorp, Inc., as a savings and loan holding company, may invest in equity securities subject to certain limitations.

The investment policy requires that all securities transactions be conducted in a safe and sound manner. Investment decisions must be based upon a thorough analysis of each security instrument to determine its quality and inherent risks, fit within United Bank's overall asset/liability management objectives, effect on its risk-based capital measurement and prospects for yield and/or appreciation. The investment policy provides that United Bank may invest in U.S. Treasury obligations, U.S. and state agency securities, mortgage-backed securities, corporate debt securities and other conservative investment opportunities.

Securities can be classified as held-to-maturity or available-for-sale at the date of purchase.

Mortgage-Backed Securities. We purchase mortgage-backed securities insured or guaranteed by Fannie Mae, Freddie Mac or Government National Mortgage Association (Ginnie Mae). We invest in mortgage-backed securities to achieve positive interest rate spreads with minimal administrative expense, and to lower our credit risk as a result of the guarantees provided by Freddie Mac, Fannie Mae or Ginnie Mae. Our investment policy also authorizes the investment in collateralized mortgage obligations (CMOs), also insured or issued by Freddie Mac, Fannie Mae and Ginnie Mae.

Mortgage-backed securities are created by the pooling of mortgages and the issuance of a security with an interest rate that is slightly less than the interest rate on the underlying mortgages. Mortgage-backed securities typically represent a participation interest in a pool of single-family or multi-family mortgages, although we focus our investments on mortgage-backed securities backed by one- to four-family mortgages. The issuers of such securities (generally U.S. government agencies and government sponsored enterprises, including Fannie Mae, Freddie Mac and Ginnie Mae) pool and resell the participation interests in the form of securities to investors such as us, and guarantee the payment of principal and interest to investors. Mortgage-backed securities generally yield less than the loans that underlie such securities because of the cost of payment guarantees and credit enhancements. However, mortgage-backed securities are usually more liquid than individual mortgage loans and may be used to collateralize our specific liabilities and obligations.

Table of Contents

At December 31, 2011, our mortgage-backed securities totaled \$301.8 million, or 18.6% of total assets and 20.2% of interest earning assets. Our mortgage-backed securities at December 31, 2011 were classified as both available-for-sale and held-to-maturity. At December 31, 2011, 8.1% of the mortgage-backed securities was backed by adjustable-rate mortgage loans and 91.9% were backed by fixed-rate mortgage loans. The mortgage-backed securities portfolio had a weighted average yield of 3.51% at December 31, 2011. The estimated fair value of our mortgage-backed securities at December 31, 2011 was \$303.8 million, which was \$13.1 million more than the amortized cost of \$290.7 million. Private issue CMOs are included in our mortgage-backed securities portfolio as a result of the acquisition of CNB Financial. At December 31, 2011, private issue CMOs had an estimated fair value and an amortized cost of \$2.3 million, represented 0.8% of total mortgage-backed securities and had a weighted average yield of 6.39%. Investments in mortgage-backed securities involve a risk that actual prepayments may differ from estimated prepayments over the life of the security, which may require adjustments to the amortization of any premium or accretion of any discount relating to such instruments thereby changing the net yield on such securities. There is also reinvestment risk associated with the cash flows from such securities or if such securities are redeemed by the issuer. In addition, the market value of such securities may be adversely affected by changes in interest rates.

Government-Sponsored Enterprises. At December 31, 2011, our U.S. Government-Sponsored Enterprises securities portfolio totaled \$192,000, all of which was classified as available-for-sale. While these securities generally provide lower yields than other investments in our securities investment portfolio, we maintain these investments, to the extent appropriate, for liquidity purposes, as collateral for borrowings and for prepayment protection.

Corporate Bonds. At December 31, 2011, our corporate bond portfolio totaled \$1.6 million, all of which was classified as available-for-sale, consisting of trust preferred securities issued by financial services companies. Although corporate bonds may offer higher yields than U.S. Treasury or agency securities of comparable duration, corporate bonds also have a higher risk of default due to possible adverse changes in the credit worthiness of the issuer. In order to mitigate this risk, our investment policy requires that at the time of purchase corporate debt obligations be rated in one of the four highest categories by a nationally recognized rating service.

Municipal Obligations and Industrial Revenue Bonds. Municipal obligations are securities issued by states, counties and municipalities or their agencies. The industrial revenue bonds in our portfolio are issued by the Massachusetts Health and Educational Facilities Authority, an independent public authority created by Massachusetts to assist nonprofit organizations to borrow funds through tax-exempt bond issuances. Our investment policy requires that the municipal obligations be rated at the time of purchase within the first four rating categories by Standard & Poor's or Moody's. At December 31, 2011, our municipal obligations portfolio consisted of both available-for-sale and held-to-maturity securities.

Table of Contents

Sources of Funds

General. Deposits have traditionally been our primary source of funds for lending and investment activities. We also use borrowings, primarily Federal Home Loan Bank advances, to supplement cash flow needs, to lengthen the maturities of liabilities for interest rate risk management purposes and to manage the cost of funds. Other sources of funds are scheduled loan payments, investment maturities, loan prepayments, retained earnings and income on other earning assets. While scheduled loan payments and income on earning assets are relatively stable sources of funds, deposit inflows and outflows can vary widely and are influenced by prevailing interest rates, market conditions and levels of competition.

Deposits. Our deposits are generated primarily from residents and businesses within our primary market area. We offer a selection of deposit accounts, including demand accounts, NOW accounts, money market accounts, savings accounts, retirement accounts and certificates of deposit. Deposit account terms vary, with the principal differences being the minimum balance required, the amount of time the funds must remain on deposit and the interest rate. We currently do not accept brokered deposits, although we have the authority to do so.

Interest rates paid, maturity terms, service fees and withdrawal penalties are established on a periodic basis. Deposit rates and terms are based primarily on current operating strategies and market rates, liquidity requirements, rates paid by competitors and growth goals. We rely on personalized customer service, long-standing relationships with customers and an active marketing program to attract and retain deposits.

The flow of deposits is influenced significantly by general economic conditions, changes in money market and other prevailing interest rates, and competition. The variety of deposit accounts offered allows us to be competitive in obtaining funds and responding to changes in consumer demand. Based on experience, we believe that our deposits are relatively stable. However, the ability to attract and maintain deposits, and the rates paid on these deposits, have been and will continue to be significantly affected by market conditions. At December 31, 2011, \$421.7 million, or 34.3% of our deposit accounts, were certificates of deposit, of which \$228.2 million had maturities of one year or less.

The following table sets forth the distribution of total deposits by account type, at the dates indicated.

(1) Excludes the fair value adjustment balance of \$3,000, \$115,000 and \$724,000 recorded in connection with the acquisition of CNB Financial at December 2011, 2010 and 2009, respectively.

Table of Contents

As of December 31, 2011, the aggregate amount of outstanding certificates of deposit in amounts greater than or equal to \$100,000 was approximately \$236.2 million. The following table sets forth the maturity of those certificates as of December 31, 2011, in thousands.

Three months or less	\$ 38,722
Over three months through six months	34,755
Over six months through one year	43,591
Over one year to three years	91,110
Over three years	27,995
Total	\$ 236,173

Borrowings. Our borrowings consist of advances from the Federal Home Loan Bank of Boston, collateralized repurchase agreements with our customers and other financial institutions and subordinated debentures. As of December 31, 2011, we had Federal Home Loan Bank advances of \$105.0 million, or 7.5% of total liabilities, with a weighted average maturity of 3.0 years and a weighted average rate of 3.68%. As a member of the Federal Home Loan Bank of Boston, we can currently borrow up to approximately \$224.0 million from the Federal Home Loan Bank.

The following table summarizes information concerning balances and interest rates on our Federal Home Loan Bank advances at and for the periods indicated:

	For the Years Ended December 31,		
	2011	2010	2009
	(In thousands)		
Balance at end of period	\$ 104,984 ⁽¹⁾	\$ 151,282 ⁽²⁾	\$ 205,552 ⁽³⁾

Table of Contents

In addition, the Company had a total of \$20.0 million in structured term repurchase agreements secured through another financial institution. The Company entered into a \$10.0 million repurchase agreement in 2009 due to mature in 2019, is callable in 2014 and has a rate of 2.44%. The Company had previously entered into a \$10.0 million repurchase agreement in 2008 due to mature in 2018, is callable in 2011 and has a rate of 2.73%. All of the repurchase agreements are secured by mortgage-backed securities issued by government sponsored enterprises.

The Company has outstanding subordinated debt in the form of trust preferred securities issued through a private placement offering in the face amount of \$7.7 million, with a remaining unamortized fair value discount of \$2.2 million. The issue has a maturity date of March 15, 2036 and bears a floating rate of interest that reprices quarterly at the 3-month LIBOR rate plus 1.85%. The interest rate at December 31, 2011 was 2.40%. A special redemption provision allowed the issue to be callable at par as of December 31, 2011.

The Company has unused borrowing capacity with the Federal Reserve Bank of approximately \$79.9 million at December 31, 2011.

Subsidiary Activities

UCB Securities, Inc. is a wholly owned subsidiary of United Bank and was established in 1998 as a Massachusetts security corporation for the purpose of buying, selling and holding investment securities. The income earned on UCB Securities, Inc.'s investment securities is subject to a significantly lower rate of state tax than that assessed on income earned on investment securities maintained at United Bank. At December 31, 2011, UCB Securities, Inc. had total assets of \$161.3 million, all of which were qualifying securities under the applicable regulations.

UCB Securities, Inc. II is a wholly owned subsidiary of United Bank and was established in 2010 as a Massachusetts security corporation for the purpose of buying, selling and holding investment securities. The income earned on UCB Securities, Inc. II's investment securities is subject to a significantly lower rate of state tax than that assessed on income earned on investment securities maintained at United Bank. At December 31, 2011, UCB Securities, Inc. had total assets of \$36.1 million, all of which were qualifying securities under the applicable regulations.

UB Properties, LLC is a subsidiary of the Bank formed to hold real estate assets acquired through foreclosure. At December 31, 2011, UB Properties, LLC had total assets of \$3.1 million.

United Wealth Management

United Bank, through its division, United Wealth Management, has a partnership with a registered broker-dealer, NFP Securities, Inc. In 2006, United Bank acquired Levine Financial Group in an effort to expand its customer base with increased opportunities to grow our market share and expand the financial services portion of business in the Northampton market. Together they offer United Bank customers a complete range of non-deposit investment products and financial planning services, including mutual funds, debt, equity and government securities, insurance products, fixed and variable annuities, financial planning for individual and commercial customers and estate planning services. United Bank receives a portion of the commissions generated by United Wealth Management from sales to customers.

Expense and Tax Allocation Agreements

United Bank has entered into an agreement with the Company that generally provides that the Company will pay to United Bank, on a quarterly basis, fees for its use of United Bank's premises, furniture, equipment and employees in an amount to be determined by the board of directors of the Company and United Bank. Such fees shall not be less than the fair market value received for such goods or services. In addition, the Company and

Table of Contents

United Bank entered into a tax allocation agreement as a result of their status as members of an affiliated group under the Internal Revenue Code. The tax allocation agreement generally provides that the Company will file consolidated federal tax income returns with United Bank and its subsidiaries. The tax allocation agreement also formalizes procedures for allocating the consolidated tax liability of the group among its members and establishes procedures for the future payments by United Bank to the Company for tax liabilities attributable to United Bank and its subsidiaries. The financial information and discussion contained in this prospectus primarily relates to the activities of United Bank.

United Charitable Foundation

We established the United Charitable Foundation in 2005 in connection with our minority stock offering. At December 31, 2011, the foundation owned 358,156 shares of our common stock, or 2.2% of the shares outstanding. To maintain favorable tax status, the foundation must make annual grants equal to 5% of its assets, and grants are made to community activities and charitable causes in the communities in which we operate. Six of the foundation's seven directors are directors of United Bank. All shares of common stock owned by the foundation must be voted in the same proportion as all other shares of our common stock are voted on any matter to come before the stockholders.

Personnel

As of December 31, 2011, we had 268 full-time employees and 24 part-time employees. Our employees are not represented by any collective bargaining group. Management believes that we have good relations with our employees.

SUPERVISION AND REGULATION

General

United Bank is subject to extensive regulation, examination and supervision by the Office of the Comptroller of the Currency as its primary federal regulator, and by the Federal Deposit Insurance Corporation, as the insurer of its deposits. This regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the Deposit Insurance Fund, managed by the Federal Deposit Insurance Corporation, and depositors. Under this system of federal regulation, financial institutions are periodically examined to ensure that they satisfy applicable standards with respect to their capital adequacy, assets, management, earnings, liquidity and sensitivity to market interest rates. United Bank also is a member of and owns stock in the Federal Home Loan Bank of Boston, which is one of the twelve regional banks in the Federal Home Loan Bank System. United Bank also is regulated to a lesser extent by the Board of Governors of the Federal Reserve System, governing reserves to be maintained against deposits and other matters. United Bank's relationship with its depositors and borrowers also is regulated to a great extent by federal law and, to a much lesser extent, state law, especially in matters concerning the ownership of deposit accounts and the form and content of United Bank's mortgage documents.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) made extensive changes to the regulation of United Bank. Under the Dodd-Frank Act, the Office of Thrift Supervision was eliminated and responsibility for the supervision and regulation of federal savings banks, such as United Bank was transferred to the Office of the Comptroller of the Currency on July 21, 2011. The Office of the Comptroller of the Currency is the agency that is primarily responsible for the regulation and supervision of national banks. Additionally, the Dodd-Frank Act created a new Consumer Financial Protection Bureau, as an independent bureau of the Federal Reserve Board. The Consumer Financial Protection Bureau assumed responsibility for the implementation of the federal financial consumer protection and fair lending laws and regulations and has authority to impose new requirements. However, institutions of less than \$10 billion in assets, such as United Bank, will continue to be examined for compliance with consumer protection and fair lending laws and regulations by, and be subject to the enforcement authority of, their prudential regulators.

Table of Contents

Certain of the regulatory requirements that are or will be applicable to United Bank and United Financial Bancorp are described below. This description of statutes and regulations is not intended to be a complete explanation of such statutes and regulations and their effects on United Bank and United Financial Bancorp and is qualified in its entirety by reference to the actual statutes and regulations.

Federal Banking Regulation

Business Activities. A federal savings bank derives its lending and investment powers from the Home Owners' Loan Act, as amended, and the regulations of the Office of the Comptroller of the Currency. Under these laws and regulations, United Bank may invest in mortgage loans secured by residential real estate without limitations as a percentage of assets and non-residential real estate loans which may not in the aggregate exceed 400% of capital, commercial business loans up to 20% of assets in the aggregate and consumer loans up to 35% of assets in the aggregate, certain types of debt securities and certain other assets. United Bank also may establish subsidiaries that may engage in activities not otherwise permissible for United Bank, including real estate investment and securities and insurance brokerage.

The Dodd-Frank Act authorizes depository institutions to pay interest on business demand deposits effective July 31, 2011. Depending upon competitive responses, that change could have an adverse impact on United Bank's interest exposure.

Capital Requirements. Applicable capital regulations require savings associations to meet three minimum capital standards: a 1.5% tangible capital to total assets ratio; a 4% tier 1 capital to assets leverage ratio (3% for institutions receiving the highest rating on the CAMELS financial institution examination rating system); and an 8% risk-based capital ratio. In addition, the prompt corrective action standards discussed below also establish, in effect, a minimum 2% tangible capital standard, a 4% leverage ratio (3% for institutions receiving the highest examination rating) and, together with the risk-based capital standard itself, a 4% Tier 1 risk-based capital standard. The regulations also require that, in meeting the tangible, leverage and risk-based capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities as principal that are not permissible for a national bank.

The risk-based capital standard for savings associations requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital, less certain specified deductions from total capital such as reciprocal holdings of depository institution capital instruments and equity investments) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet activities, recourse obligations, residual interests and direct credit substitutes, are multiplied by a risk-weight factor of 0% to 100%, assigned by the capital regulation based on the risks believed inherent in the type of asset. Core (Tier 1) capital is generally defined as common stockholders' equity (including retained earnings), certain non-cumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital (Tier 2 capital) include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets, and up to 45% of unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital.

The Office of the Comptroller of the Currency also has authority to establish individual minimum capital requirements in appropriate cases upon a determination that an institution's capital level is or may become inadequate in light of the particular circumstances. At December 31, 2011, United Bank's capital exceeded all applicable requirements.

Loans-to-One Borrower. Generally, a federal savings bank may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus. An additional amount

Table of Contents

may be loaned, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate. As of December 31, 2011, United Bank was in compliance with the loans-to-one borrower limitations.

Qualified Thrift Lender Test. As a federal savings bank, United Bank must satisfy the qualified thrift lender, or QTL, test. Under the QTL test, United Bank must maintain at least 65% of its portfolio assets in qualified thrift investments in at least nine months of the most recent 12 months. Portfolio assets generally means total assets of a savings institution, less the sum of specified liquid assets up to 20% of total assets, goodwill and other intangible assets, and the value of property used in the conduct of the savings bank's business.

A savings bank that fails the qualified thrift lender test must either convert to a bank charter or operate under specified restrictions. The Dodd-Frank Act also makes noncompliance with the QTL test subject to agency enforcement action for a violation of law and subject to dividend limitations. At December 31, 2011, United Bank satisfied this test.

Capital Distributions. Federal regulations govern capital distributions by a federal savings bank, which include cash dividends, payments to repurchase its shares and other transactions charged to the capital account. Savings banks must file an application for approval of a capital distribution if:

the total capital distributions for the applicable calendar year exceed net income for that year to date plus retained net income for the preceding two years;

the savings bank would not be at least adequately capitalized following the distribution;

the distribution would violate any applicable statute, regulation, agreement or Office of the Comptroller of the Currency imposed condition; or

the savings bank is not eligible for expedited treatment of its filings (*i.e.*, generally, examination and Community Reinvestment Act ratings in top two categories).

Even if an application is not otherwise required, every savings bank that is a subsidiary of a holding company must still file a notice with the Board of Governors of the Federal Reserve System at least 30 days before the Board of Directors declares a dividend or approves a capital distribution.

The Office of the Comptroller of the Currency may disapprove a notice or application if:

the association would be undercapitalized following the distribution;

the proposed capital distribution raises safety and soundness concerns; or

the capital distribution would violate a prohibition contained in any statute, regulation or agreement.

In addition, the Federal Deposit Insurance Act provides that an insured depository institution may not make any capital distribution, if after making such distribution the institution would be undercapitalized.

Community Reinvestment Act. All savings banks have a responsibility under the Community Reinvestment Act and related regulations to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. A savings bank's failure to comply with the provisions of the Community Reinvestment Act could result in denial of certain corporate applications such as branches or mergers, or in restrictions on its activities. United Bank received a satisfactory Community Reinvestment Act rating in its most recent examination.

Table of Contents

Transactions with Related Parties. Federal law limits a federal savings bank's authority to engage in transactions with its affiliates (e.g., a company that controls, is controlled by, or is under common control with an insured depository institution such as United Bank, including United Financial Bancorp). In general, loan transactions between an insured depository institution and its affiliate are subject to certain quantitative and collateral requirements. Transactions between an insured depository institution and its affiliate are limited to 10% of the institution's unimpaired capital and unimpaired surplus for transactions with any one affiliate and 20% of unimpaired capital and unimpaired surplus for transactions in the aggregate with all affiliates. Collateral in specified amounts ranging from 100% to 130% of the amount of the transaction must usually be provided by affiliates to receive loans from the savings bank. In addition, applicable regulations prohibit a savings bank from lending to any of its affiliates that are engaged in activities that are not permissible for bank holding companies and from purchasing the securities of any affiliate, other than a subsidiary. Transactions with affiliates must be consistent with safe and sound banking practices, not involve low-quality assets and be on terms that are as favorable to the institution as comparable transactions with non-affiliates.

The Sarbanes-Oxley Act of 2002 generally prohibits loans by United Financial Bancorp to its executive officers and directors. However, the law contains a specific exception for loans by a depository institution to its executive officers and directors in compliance with federal banking laws. Under such laws, United Bank's authority to extend credit to executive officers, directors and 10% shareholders (insiders), as well as entities such persons control, is limited. The laws limit both the individual and aggregate amount of loans that United Bank may make to insiders based, in part, on United Bank's capital level and requires that certain board approval procedures be followed. Such loans are required to be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for loans made pursuant to a benefit or compensation program that is widely available to all employees of the institution and does not give preference to insiders over other employees. Loans to executive officers are subject to additional limitations based on the type of loan involved.

Enforcement. The Office of the Comptroller of the Currency has primary enforcement responsibility over federal savings banks and has the authority to bring enforcement action against the institution and all institution-affiliated parties, including stockholders, and attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order, to removal of officers and/or directors to the appointment of a receiver or conservator or termination of deposit insurance. Civil penalties cover a wide range of violations, and range up to \$25,000 per day, unless a finding of reckless disregard is made, in which case penalties may be as high as \$1 million per day. The Federal Deposit Insurance Corporation also has the authority to recommend to the Office of the Comptroller of the Currency that enforcement action be taken with respect to a particular savings institution. If action is not taken by the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation has authority to take action under specified circumstances. Federal law also establishes criminal penalties for certain violations.

Standards for Safety and Soundness. Federal law requires each federal banking agency to prescribe certain standards for all insured depository institutions. These standards relate to, among other things, internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, compensation, and other operational and managerial standards as the agency deems appropriate. The federal banking agencies adopted Interagency Guidelines Prescribing Standards for Safety and Soundness to implement the safety and soundness standards required under federal law. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. The guidelines address internal controls and information systems, internal audit systems, credit underwriting, loan documentation, interest rate risk exposure, asset growth, compensation, fees and benefits. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to meet these standards, the appropriate federal banking agency may require the institution to submit a compliance plan.

Table of Contents

Prompt Corrective Action Regulations. Under the prompt corrective action regulations, the Office of the Comptroller of the Currency is required to take supervisory actions against undercapitalized savings banks, the severity of which depends upon the institution's degree of undercapitalization. For this purpose, a savings bank is placed in one of the following five categories based on the savings bank's capital:

well-capitalized (at least 5% leverage capital, 6% Tier 1 risk-based capital and 10% total risk-based capital);

adequately capitalized (at least 4% leverage capital, 4% Tier 1 risk-based capital and 8% total risk-based capital);

undercapitalized (less than 3% leverage capital, 4% Tier 1 risk-based capital or 8% total risk-based capital);

significantly undercapitalized (less than 3% leverage capital, 3% Tier 1 risk-based capital or 6% total risk-based capital); and

critically undercapitalized (less than 2% tangible capital).

Subject to a narrow exception, the Office of the Comptroller of the Currency is required to appoint a receiver or conservator for a savings bank that is critically undercapitalized within specific time frames. The regulations also provide that a capital restoration plan must be filed with the Office of the Comptroller of the Currency within 45 days of the date a savings bank receives notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Any holding company for the savings bank required to submit a capital restoration plan must guarantee the lesser of an amount equal to 5% of a savings bank's assets at the time it was notified or deemed to be undercapitalized or the amount necessary to restore the savings bank to adequately capitalized status. This guarantee remains in place until the Office of the Comptroller of the Currency notifies the savings bank that it has maintained adequately capitalized status for each of four consecutive calendar quarters, and the Office of the Comptroller of the Currency has the authority to require payment and collect payment under the guarantee. Failure by a holding company to provide the required guarantee will result in certain operating restrictions on the savings bank, such as restrictions on the ability to declare and pay dividends, pay executive compensation and management fees, and increase assets or expand operations. The Office of the Comptroller of the Currency may also take any one of a number of discretionary supervisory actions against undercapitalized savings banks, including the issuance of a capital directive and the replacement of senior executive officers and directors. Significantly and critically undercapitalized institutions are subject to additional mandatory and discretionary measures.

At December 31, 2011, United Bank met the criteria for being considered well-capitalized.

Insurance for Deposit Accounts. United Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation. Under the Federal Deposit Insurance Corporation risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other factors, with less risky institutions paying lower assessments. An institution's assessment rate depends upon the category to which it is assigned. Effective April 1, 2009, assessment rates ranged from seven to 77.5 basis points. On February 7, 2011, the Federal Deposit Insurance Corporation issued final rules, effective April 1, 2011, implementing changes to the assessment rules resulting from the Dodd-Frank Act. Initially, the base assessment rates will range from two and one half to 45 basis points. The rate schedules will automatically adjust in the future when the Deposit Insurance Fund reaches certain milestones. No institution may pay a dividend if in default of the federal deposit insurance assessment.

The Federal Deposit Insurance Corporation imposed on all insured institutions a special emergency assessment of five basis points of total assets minus Tier 1 capital as of June 30, 2009 (capped at ten basis points of an institution's deposit assessment base), to cover losses to the Deposit Insurance Fund. That special

Table of Contents

assessment was collected on September 30, 2009. In lieu of further special assessments, the Federal Deposit Insurance Corporation required insured institutions to prepay estimated quarterly risk-based assessments for the fourth quarter of 2009 through the fourth quarter of 2012. That prepayment, which included an assumed annual assessment base increase of 5%, was recorded as a prepaid expense asset as of December 30, 2009. As of December 31, 2009, and each quarter thereafter, a charge to earnings is being recorded for each regular assessment with an offsetting credit to the prepaid asset.

Due to the recent difficult economic conditions, deposit insurance per account owner was recently raised to \$250,000. That limit was made permanent by the Dodd-Frank Act. In addition, the Federal Deposit Insurance Corporation adopted an optional Temporary Liquidity Guarantee Program by which, for a fee, noninterest-bearing transaction accounts would receive unlimited insurance coverage until December 31, 2010, and certain senior unsecured debt issued by institutions and their holding companies between October 13, 2008 and June 30, 2010 would be guaranteed by the Federal Deposit Insurance Corporation through June 30, 2012, or in some cases, December 31, 2012. United Bank opted to participate in the unlimited noninterest-bearing transaction account coverage and United Bank and the Company opted to participate in the unsecured debt guarantee program.

The Dodd-Frank Act increased the minimum target Deposit Insurance Fund ratio from 1.15% of estimated insured deposits to 1.35% of estimated insured deposits. The Federal Deposit Insurance Corporation must seek to achieve the 1.35% ratio by September 30, 2020. Insured institutions with assets of \$10 billion or more are supposed to fund the increase. The Dodd-Frank Act eliminated the 1.5% maximum fund ratio, instead leaving it to the discretion of the Federal Deposit Insurance Corporation.

Federal Home Loan Bank System. United Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank provides a central credit facility primarily for member institutions. United Bank, as a member of the Federal Home Loan Bank, is required to acquire and hold shares of capital stock in that Federal Home Loan Bank. United Bank was in compliance with this requirement with an investment in Federal Home Loan Bank stock at December 31, 2011, of \$15.4 million. Federal Home Loan Bank advances must be secured by specified types of collateral.

Federal Reserve System

Federal Reserve Board regulations require savings banks to maintain noninterest-earning reserves against their transaction accounts, such as negotiable order of withdrawal and regular checking accounts. The regulations generally provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$58.8 million; a 10% reserve ratio is applied above \$58.8 million. The first \$10.7 million of otherwise reservable balances (subject to adjustments by the Federal Reserve Board) are exempted from the reserve requirements. The amounts are adjusted annually and, for 2012, require a 3% ratio for up to \$71.0 million and an exemption of \$11.5 million. At December 31, 2011, United Bank was in compliance with these reserve requirements. In October 2008, the Federal Reserve Board began paying interest on certain reserve balances.

Other Regulations

Interest and other charges collected or contracted for by United Bank are subject to state usury laws and federal laws concerning interest rates. United Bank's operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Home Mortgage Disclosure Act, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Table of Contents

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act, governing the use and provision of information to credit reporting agencies;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies;

Truth in Savings Act; and

rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The operations of United Bank also are subject to the:

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E promulgated thereunder, which govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services;

Check Clearing for the 21st Century Act (also known as Check 21), which gives substitute checks, such as digital check images and copies made from that image, the same legal standing as the original paper check;

The USA PATRIOT Act, which requires savings banks to, among other things, establish broadened anti-money laundering compliance programs, due diligence policies and controls to ensure the detection and reporting of money laundering. Such required compliance programs are intended to supplement existing compliance requirements, also applicable to financial institutions, under the Bank Secrecy Act and the Office of Foreign Assets Control regulations; and

The Gramm-Leach-Bliley Act, which places limitations on the sharing of consumer financial information by financial institutions with unaffiliated third parties. Specifically, the Gramm-Leach-Bliley Act requires all financial institutions offering financial products or services to retail customers to provide such customers with the financial institution's privacy policy and provide such customers the opportunity to opt out of the sharing of certain personal financial information with unaffiliated third parties.

Holding Company Regulation

The Company is a unitary savings and loan holding company, subject to regulation, examination and supervision by the Federal Reserve Board. The Federal Reserve Board has enforcement authority over the Company and its non-savings institution subsidiaries. Among other things, this authority permits the Federal Reserve Board to restrict or prohibit activities that are determined to be a risk to United Bank. Under federal law and regulations and policy, the business activities of the Company are limited to those activities permissible for financial holding companies under Section 4(k) of the Bank Holding Company Act and certain additional activities that have been authorized for savings and loan holding companies by regulation.

Federal law prohibits a savings and loan holding company from directly or indirectly, or through one or more subsidiaries, acquiring more than 5% of the voting stock of another savings institution or savings and loan holding company, without prior written approval of the Federal Reserve Board or from acquiring or retaining, with certain exceptions, more than 5% of a non-subsidiary holding company or savings association. A

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

savings and loan holding company is also prohibited from acquiring more than 5% of a company engaged in activities other than those authorized by federal law or acquiring or retaining control of an institution that is not federally

Table of Contents

insured. In evaluating applications by holding companies to acquire savings institutions, the Federal Reserve Board must consider, among other things, the financial and managerial resources and future prospects of the savings institution and company involved, the effect of the acquisition on the risk to the insurance fund, the convenience and needs of the community and competitive factors.

The Federal Reserve Board is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions:

1. the approval of interstate supervisory acquisitions by savings and loan holding companies; and
2. the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisition.

The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Capital. Savings and loan holding companies are not currently subject to specific regulatory capital requirements. The Dodd-Frank Act, however, requires the Federal Reserve Board to promulgate consolidated capital requirements for depository institution holding companies that are no less stringent, both quantitatively and in terms of components of capital, than those applicable to institutions themselves. That will eliminate the inclusion of certain instruments, such as trust preferred securities from Tier 1 capital. Instruments issued before May 19, 2010 will be grandfathered for companies with consolidated assets of \$15 billion or less. There is a five-year transition period from the July 21, 2010 date of enactment of the Dodd-Frank Act before the capital requirements will apply to savings and loan holding companies.

Source of Strength. The Dodd-Frank Act also extends the source of strength doctrine to savings and loan holding companies. The regulatory agencies must issue regulations implementing the source of strength policy that holding companies act as a source of strength to their subsidiary depository institutions by providing capital and other support to their subsidiary institutions in times of financial distress.

Dividends and Stock Repurchases. The Federal Reserve Board has issued a policy statement regarding the payment of dividends and the repurchase of shares of common stock by bank holding companies that it has made applicable to savings and loan holding companies as well. In general, the policy provides that dividends should be paid only out of current earnings and only if the prospective rate of earnings retention by the holding company appears consistent with the organization's capital needs, asset quality and overall financial condition. Regulatory guidance provides for prior regulatory review of capital distributions in certain circumstances such as where the company's net income for the past four quarters, net of dividends previously paid over that period, is insufficient to fully fund the dividend or the company's overall rate of earnings retention is not consistent with the company's capital needs and overall financial condition. The ability of a holding company to pay dividends may be restricted if a subsidiary bank becomes undercapitalized. Moreover, a company should inform the Federal Reserve Board reasonably in advance of declaring or paying a dividend that exceeds earnings for the period for which the dividend is being paid. The policy statement also provides for regulatory review prior to a holding company redeeming or repurchasing regulatory capital instruments when the holding company is experiencing financial weaknesses or redeeming or repurchasing common stock or perpetual preferred stock that would result in a net reduction as of the end of a quarter in the amount of such equity instruments outstanding compared with the beginning of the quarter in which the redemption or repurchase occurred. These regulatory policies could affect the ability of the Company to pay dividends, repurchase shares of common stock or otherwise engage in capital distributions.

Federal Securities Laws

The Company's common stock is registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934. As a result, the Company files quarterly and annual reports with the Securities and Exchange Commission and is subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act.

Table of Contents

Federal Taxation

General. The Company and United Bank are subject to federal income taxation in the same general manner as other corporations, with some exceptions discussed below. The following discussion of federal taxation is intended only to summarize certain pertinent federal income tax matters and is not a comprehensive description of the tax rules applicable to United Financial Bancorp, Inc. or United Bank.

Method of Accounting. For federal income tax purposes, the Company currently reports its income and expenses on the accrual method of accounting and uses a tax year ending December 31 for filing its federal and state income tax returns.

Bad Debt Reserves. Historically, United Bank has been subject to special provisions in the tax law regarding allowable bad debt tax deductions and related reserves. Tax law changes were enacted in 1996, pursuant to the Small Business Protection Act of 1996 (the 1996 Act), that eliminated the use of the percentage of taxable income method for tax years after 1995 and required recapture into taxable income over a six year period all bad debt reserves accumulated after 1988. United Bank recaptured its reserves accumulated after 1988 over the six-year period ended December 31, 2001.

Currently, the Company s consolidated group uses the specific charge off method to account for bad debt deductions for income tax purposes.

Taxable Distributions and Recapture. Prior to the 1996 Act, bad debt reserves created prior to November 1, 1988 were subject to recapture into taxable income if United Bank failed to meet certain thrift asset and definitional tests.

At December 31, 2011, United Bank s total federal base year reserve was approximately \$2.6 million. However, under current law, base-year reserves remain subject to recapture if United Bank makes certain non-dividend distributions, repurchases any of its stock, pays dividends in excess of tax earnings and profits, or ceases to maintain a bank charter.

Alternative Minimum Tax. The IRC imposes an alternative minimum tax (AMT) at a rate of 20% on a base of regular taxable income plus certain tax preferences (alternative minimum taxable income or AMTI). The AMT is payable to the extent such AMTI is in excess of an exemption amount and the AMT exceeds the regular income tax. Net operating losses can offset no more than 90% of AMTI. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. The Company and United Bank have not been subject to the alternative minimum tax and have no such amounts available as credits for carryover.

Corporate Dividends-Received Deduction. The Company may exclude from its federal taxable income 100% of dividends received from United Bank as a wholly owned subsidiary. The corporate dividends-received deduction is 80% when the dividend is received from a corporation having at least 20% of its stock owned by the recipient corporation. A 70% dividends-received deduction is available for dividends received from corporations owned less than 20% by the recipient corporation.

State Taxation

Beginning in 2009, due to a change in law, the Company and United Bank filed a combined Massachusetts return. The security corporation subsidiaries continue to file separately. The Company state tax returns, as well as those of United Bank and its subsidiaries, are not currently under audit. The years after 2007 are open for exam.

United Financial Bancorp and United Bank file combined Massachusetts financial institution income tax returns and are subject to an annual Massachusetts tax at a rate of 9.5% of their net income in 2011. Massachusetts net income is defined as gross income, other than 95% of dividends received in any taxable year beginning on or after January 1, 1999 from or on account of the ownership of any class of stock if the institution

Table of Contents

owns 15% or more of the voting stock of the institution paying the dividend, less the deductions, but not the credits allowable under the provisions of the Internal Revenue Code, as amended and in effect for the taxable year. The dividends must meet the qualifications under Massachusetts law. Deductions with respect to the following items, however, are not allowed except as otherwise provided: (a) dividends received, except as otherwise provided; (b) losses sustained in other taxable years; (c) taxes on or measured by income, franchise taxes measured by net income, franchise taxes for the privilege of doing business and capital stock taxes imposed by any state; or (d) the deduction allowed by section 168(k) of the Code.

Due to the legislative change, beginning in 2010, the Massachusetts financial institution tax rate decreases by 0.5% each year for three years until 2012, when it will become 9% and will remain at that rate.

As a Maryland business corporation, United Financial Bancorp is required to file annual returns and pay annual fees to the State of Maryland.

United Bank's subsidiaries, UCB Securities, Inc. and UCB Securities, Inc. II, are taxed as Massachusetts security corporations, and are subject to a state tax rate of 1.32% of its gross income.

Beginning in 2010, United Bank began filing corporation income tax returns in Connecticut due to its lending activity within the State.

Executive Officers of the Registrant

The executive officers of the Company and the Bank are elected annually by the Board of Directors and serve at the Board's discretion. The executive officers of the Company and the Bank are:

Name	Position
Richard B. Collins	President and Chief Executive Officer of the Company and the Bank
Keith E. Harvey	Executive Vice President and Chief Operating Officer of the Bank
Mark A. Roberts	Executive Vice President and Chief Financial Officer of the Company
	and the Bank
J. Jeffrey Sullivan	Executive Vice President and Chief Lending Officer of the Bank
Charles R. Valade	Executive Vice President, Commercial Lending/Worcester Region, of
	the Bank
John J. Patterson	Senior Vice President, Risk Management, of the Bank
Dena M. Hall	Senior Vice President, Marketing and Community Relations, of the

Bank

Below is information regarding the executive officers who are not also directors. Unless otherwise stated, each executive officer has held his current position for at least the last five years. Ages presented are as of December 31, 2011.

Keith E. Harvey is the Executive Vice President and Chief Operating Officer of the Bank. Mr. Harvey joined the Bank in 1984. Age 64.

Mark A. Roberts is the Executive Vice President and Chief Financial Officer of the Company and the Bank. He joined the Company and the Bank in 2006. Before that, he served as the Vice President and Controller for The Connecticut Bank and Trust Company in Hartford, Connecticut and was the Vice President of Finance at Woronoco Savings Bank for six years. Age 48.

J. Jeffrey Sullivan is Executive Vice President and Chief Lending Officer of the Bank. Mr. Sullivan joined the Bank in 2003. Age 47.

Charles R. Valade is Executive Vice President, Commercial Lending/Worcester Region, of the Bank. Before joining the Bank in connection with the Company's acquisition of CNB Financial in November 2009, Mr. Valade served as President and Chief Executive Officer of CNB Financial since its formation in 2005. Age 60.

Table of Contents

John J. Patterson is Senior Vice President, Risk Management of the Bank. Mr. Patterson joined the Bank in 1993. Age 65.

Dena M. Hall is the Senior Vice President of Marketing and Community Relations of the Bank. She joined the Bank in 2005. Previously, she was the Director of Marketing for Woronoco Savings Bank for seven years. Age 38.

ITEM 1A. RISK FACTORS

An investment in our common stock involves risk. You should carefully consider the risks described below and all other information contained in this Annual Report on Form 10-K before you decide to buy our common stock. It is possible that risks and uncertainties not listed below may arise or become material in the future and affect our business.

A Return To Recessionary Conditions Could Result In Increases In Our Level Of Non-Performing Loans And/Or Reduce Demand For Our Products And Services, Which Would Lead To Lower Revenue, Higher Loan Losses And Lower Earnings.

Following a national home price peak in mid-2006, falling home prices and sharply reduced sales volumes, along with the collapse of the United States subprime mortgage industry in early 2007, significantly contributed to a recession that officially lasted until June 2009, although the effects continued thereafter. Dramatic declines in real estate values and high levels of foreclosures resulted in significant asset write-downs by financial institutions, which have caused many financial institutions to seek additional capital, to merge with other institutions and, in some cases, to fail. Concerns over the United States credit rating (which was recently downgraded by Standard & Poor's), the European sovereign debt crisis, and continued high unemployment in the United States, among other economic indicators, have contributed to increased volatility in the capital markets and diminished expectations for the economy.

A return of recessionary conditions and/or continued negative developments in the domestic and international credit markets may significantly affect the markets in which we do business, the value of our loans and investments, and our ongoing operations, costs and profitability. Further declines in real estate values and sales volumes and continued high unemployment levels may result in higher than expected loan delinquencies, increases in our levels of nonperforming and classified assets and a decline in demand for our products and services. These negative events may cause us to incur losses and may adversely affect our capital, liquidity, and financial condition.

Future Changes in Interest Rates Could Reduce Our Profits

Our ability to make a profit largely depends on our net interest income, which could be negatively affected by changes in interest rates. Net interest income is the difference between the income we earn on our interest-earning assets, such as loans and securities and the expense we pay on our interest-bearing liabilities, such as deposits and borrowings.

The rates we earn on our assets and the rates we pay on our liabilities are generally fixed for a contractual period of time. Like many savings institutions, our liabilities generally have shorter contractual maturities than our assets. This imbalance can create significant earnings volatility because market interest rates change over time. In a period of rising interest rates, the interest income earned on our assets may not increase as rapidly as the interest paid on our liabilities. Additionally, increases in interest rates may decrease loan demand and/or make it more difficult for borrowers to repay adjustable-rate loans. In a period of declining interest rates, the interest income earned on our assets may decrease more rapidly than the interest paid on our liabilities, as borrowers prepay mortgage loans, and mortgage-backed securities and callable investment securities are called or prepaid thereby requiring us to reinvest those cash flows at lower interest rates. See Management's Discussion and Analysis of Financial Condition and Results of Operations Management of Market Risk.

Table of Contents

Changes in interest rates also affect the current fair value of our securities portfolio. Generally, the value of securities moves inversely with changes in interest rates. At December 31, 2011, the fair value of our available-for-sale securities portfolio, consisting of agency securities, mortgage-backed securities, corporate debt obligations, municipal obligations and preferred stock, totaled \$221.8 million. Unrealized net gains on these available-for-sale securities totaled \$11.8 million at December 31, 2011 and are reported as a separate component of stockholders' equity. Decreases in the fair value of securities available for sale in future periods would have an adverse effect on stockholders' equity.

We evaluate interest rate sensitivity using income simulation models that estimate the change in United Bank's net interest income over a range of interest rate scenarios. Net income at risk measures the risk of a decline in earnings due to potential short-term and long term changes in interest rates. At December 31, 2011, in the event of an immediate 200 basis point increase in interest rates, the model projects that we would experience a 0.29% decrease in net interest income over the following 12 months.

Our Increased Emphasis on Commercial Real Estate and Commercial and Industrial Lending May Expose Us to Increased Lending Risks.

At December 31, 2011, our portfolio of commercial real estate loans totaled \$450.2 million, or 40.1% of our total loans, and our portfolio of commercial and industrial loans totaled \$176.1 million, or 15.7% of our total loans. These loans have increased as a percentage of our total loan portfolio in recent years and generally have more risk and require a commensurately higher loan loss allowance than one- to four-family residential mortgage loans. Because the repayment of commercial real estate and commercial and industrial loans depends on the successful management and operation of the borrower's properties or related businesses, repayment of such loans can be affected by adverse conditions in the real estate market or the local economy. Many of our borrowers also have more than one commercial real estate or commercial and industrial loan outstanding with us. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to significantly greater risk of loss compared to an adverse development with respect to a one- to four-family residential mortgage loan. Finally, if we foreclose on a commercial real estate or commercial and industrial loan, our holding period for the collateral, if any, typically is longer than for one- to four-family residential mortgage loans because there are fewer potential purchasers of the collateral. Because we plan to continue to increase our originations of these loans, it may be necessary to increase the level of our allowance for loan losses because of the increased risk characteristics associated with these types of loans. Any such increase to our allowance for loan losses would adversely affect our earnings.

Our Emphasis On Residential Mortgage Loans and Home Equity Loans And Lines Of Credit Exposes Us To Lending Risks.

At December 31, 2011, \$314.8 million, or 28.1%, of our loan portfolio consisted of one- to four-family residential mortgage loans and \$135.5 million, or 12.1%, of our loan portfolio consisted of home equity loans and lines of credit. Recent declines in the housing market have resulted in declines in real estate values in our market areas. These declines in real estate values could cause some of our mortgage and home equity loans and lines of credit to be inadequately collateralized, which would expose us to a greater risk of loss if we seek to recover on defaulted loans by selling the real estate collateral.

Income From Secondary Mortgage Market Operations is Volatile, and We May Incur Losses or Charges With Respect to Our Secondary Mortgage Market Operations Which Would Negatively Affect Our Earnings.

We generally sell in the secondary market the fixed-rate residential mortgage loans that we originate, earning non-interest income in the form of gains on sale. When interest rates rise, the demand for mortgage loans tends to fall and may reduce the number of loans available for sale. When interest rates fall, the demand for fixed-rate mortgage loans also tends to fall and may reduce the number of loans available for sale. In addition to interest rate levels, weak or deteriorating economic conditions also tend to reduce loan demand. Although we sell

Table of Contents

loans in the secondary market without recourse, we are required to give customary representations and warranties to the buyers. If we breach those representations and warranties, the buyers can require us to repurchase the loans and we may incur a loss on the repurchase. Because we generally retain the servicing rights on the loans we sell in the secondary market, we are required to record a mortgage servicing right asset, which we test quarterly for impairment. The value of mortgage servicing rights tend to increase with rising interest rates and to decrease with falling interest rates. If we are required to take an impairment charge, that would hurt our earnings.

If Our Allowance for Loan Losses is Not Sufficient to Cover Actual Loan Losses, Our Earnings Could Decrease.

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loss and delinquency experience, growth of our loan portfolio, changes in the composition of our loan portfolio and the volume and trends in our non-performing and classified loans and charge-offs. We also evaluate economic conditions and general market collateral valuations. Because of the degree of uncertainty and susceptibility of these factors to change, our actual losses may vary from our current estimates. If our assumptions are incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to our allowance. Our allowance for loan losses was 0.99% of total loans and 131.7% of non-performing loans at December 31, 2011, compared to 0.93% of total loans and 105.86% of non-performing loans at December 31, 2010. Material additions to our allowance could materially decrease our net income.

In addition, bank regulators periodically review our allowance for loan losses and may require us to increase our provision for loan losses or recognize further loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities may have a material adverse effect on our financial condition and results of operations.

Further Declines in the Value of Certain Investment Securities Could Require Write-Downs, Which Would Reduce Our Earnings.

At December 31, 2011, our investment portfolio included \$1.6 million in trust preferred securities and \$15.0 million in municipal bonds. In addition, we have two cost basis investments totaling \$1.0 million. We review our investment securities portfolio at each quarter and reporting period to determine whether the fair value is below the current carrying value. When the fair value of any of our investment securities has declined below its current carrying value, we are required to assess whether the decline is other than temporary. During 2011 and 2010 management determined that an impairment indicator existed on two cost basis investments and that the investments suffered impairment that was considered other- than- temporary. The cost basis of the investments were written down by \$99,000 and \$145,000, in 2011 and 2010, respectively, to fair value as a new cost basis and the write down was accounted for as a realized loss and was included in earnings. During 2009 we recognized an \$82,000 charge for the other-than-temporary impairment of a certain trust preferred security. A number of factors or combinations of factors could cause us to conclude in one or more future reporting periods that an unrealized loss that exists with respect to these securities constitutes an impairment that is other than temporary. These factors include, but are not limited to, changes in the expected cash flows, failure to make scheduled interest payments, an increase in the severity of the unrealized loss on a particular security, an increase in the continuous duration of the unrealized loss without an improvement in value or changes in market conditions and/or industry or issuer specific factors that would render us unable to forecast a full recovery in value. An other-than-temporary impairment write-down would reduce our earnings.

Recently Enacted Regulatory Reform May Have a Material Impact on Our Operations.

On July 21, 2010, the President signed into law The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). The Dodd-Frank Act restructured the regulation of depository

Table of Contents

institutions. Under the Dodd-Frank Act, the Office of Thrift Supervision, which formerly regulated United Bank, was merged into the Office of the Comptroller of the Currency, which regulates national banks. Savings and loan holding companies became regulated by the Board of Governors of the Federal Reserve System. The Dodd-Frank Act also created a new federal agency to administer consumer protection and fair lending laws, a function that was formerly performed by the depository institution regulators. The federal preemption of state laws that was formerly accorded federally chartered depository institutions was reduced as well, and State Attorneys General now have greater authority to bring a suit against a federally chartered institution for violations of certain state and federal consumer protection laws. The Dodd-Frank Act also imposed consolidated capital requirements on savings and loan holding companies effective in five years. The Dodd-Frank Act contains various other provisions designed to enhance the regulation of depository institutions and prevent the recurrence of a financial crisis such as occurred in 2008-2009. The full impact of the Dodd-Frank Act on our business and operations will not be known for years until regulations implementing the statute are written and adopted. The Dodd-Frank Act may have a material impact on our operations, particularly through increased regulatory burden and compliance costs.

In addition to the enactment of the Dodd-Frank Act, the federal regulatory agencies recently have begun to take stronger supervisory actions against financial institutions that have experienced increased loan losses and other weaknesses as a result of the recent economic crisis. The actions include the entering into written agreements and cease and desist orders that place certain limitations on their operations. Federal bank regulators recently have also been using with more frequency their ability to impose individual minimal capital requirements on banks, which requirements may be higher than those imposed under the Dodd-Frank Act or which would otherwise qualify the bank as being well capitalized under the Office of the Comptroller of the Currency's prompt corrective action regulations. If we were to become subject to a supervisory agreement or higher individual capital requirements, such action may have a negative impact on our ability to execute our business plan, as well as our ability to grow, pay dividends or engage in mergers and acquisitions and may result in restrictions in our operations.

We Operate in a Highly Regulated Environment and We May be Adversely Affected by Changes in Laws and Regulations.

We are subject to extensive regulation, supervision and examination by the Federal Reserve Board and the Office of the Comptroller of the Currency, our primary federal regulators, and the Federal Deposit Insurance Corporation, as insurer of its deposits. Such regulation and supervision governs the activities in which an institution and its holding company may engage, and are intended primarily for the protection of the insurance fund and the depositors and borrowers of the Bank rather than for holders of our common stock. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including the imposition of restrictions on our operations, the classification of our assets and determination of the level of our allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation or supervisory action, may have a material impact on our operations.

Increased and/or Special FDIC Assessments Will Hurt Our Earnings.

The recent economic recession has caused a high level of bank failures, which has dramatically increased FDIC resolution costs and led to a significant reduction in the balance of the Deposit Insurance Fund. As a result, the FDIC has significantly increased the initial base assessment rates paid by financial institutions for deposit insurance. Increases in the base assessment rate have increased our deposit insurance costs and negatively impacted our earnings. In addition, in May 2009, the FDIC imposed a special assessment on all insured institutions. Our special assessment, which was reflected in earnings for the quarter ended June 30, 2009, was \$538,000. In lieu of imposing an additional special assessment, the FDIC required all institutions to prepay their assessments for all of 2010, 2011 and 2012, which for us totaled \$4.8 million. Additional increases in the base assessment rate or additional special assessments would negatively impact our earnings.

Table of Contents

Strong Competition Within Our Market Area May Limit Our Growth and Profitability.

We face intense competition in making loans and attracting deposits. In our market area, we compete with commercial banks, savings and cooperative institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. The competition has made it more difficult for us to make new loans and at times has forced us to offer higher deposit rates. Price competition for loan and deposits might result in us earning less on our loans and paying more on our deposits, which could reduce net interest income. Some of our competitors have substantially greater resources and lending limits than we have, have greater name recognition and market presence that benefit them in attracting business, and offer certain services that we do not or cannot provide. In addition, larger competitors may be able to price loans and deposits more aggressively than we do. Our profitability depends upon our continued ability to successfully compete in our market area. The greater resources and deposit and loan products offered by some of our competitors may limit our ability to increase our interest-earning assets.

If Our Investment in the Federal Home Loan Bank of Boston is Classified as Other-Than-Temporarily Impaired or as Permanently Impaired, Our Earnings and Stockholders' Equity Would Decrease.

We owned \$15.4 million in common stock of the Federal Home Loan Bank of Boston at December 31, 2011. We hold this stock to qualify for membership in the Federal Home Loan Bank System and to be eligible to borrow funds under the Federal Home Loan Bank of Boston's advance program. There is no market for our Federal Home Loan Bank of Boston common stock. Published reports indicate that certain member banks of the Federal Home Loan Bank System may be subject to accounting rules and asset quality risks that could result in materially lower regulatory capital levels. In an extreme situation, it is possible that the capitalization of a Federal Home Loan Bank, including the Federal Home Loan Bank of Boston, could be substantially diminished. If the Federal Home Loan Bank of Boston is unable to meet minimum regulatory capital requirements or is required to aid the remaining Federal Home Loan Banks, there is a risk that our investment in Federal Home Loan Bank of Boston common stock could be impaired at some time in the future. If this occurs, it would cause our earnings and stockholders' equity to decrease by the after-tax amount of the impairment charge.

Our Wholesale Funding Sources May Prove Insufficient to Replace Deposits at Maturity and Support Our Future Growth.

We must maintain sufficient funds to respond to the needs of depositors and borrowers. As a part of our liquidity management, we use a number of funding sources in addition to core deposit growth and repayments and maturities of loans and investments. As we continue to grow, we are likely to become more dependent on these sources, which include Federal Home Loan Bank advances, borrowings from the Federal Reserve Bank, reverse repurchase agreements, brokered CDs and proceeds from the sale of loans and securities and liquidity resources of the holding company. Our financial flexibility will be severely constrained if we are unable to maintain our access to funding or if adequate financing is not available to accommodate future growth at acceptable interest rates. Finally, if we are required to rely more heavily on more expensive funding sources to support future growth, our revenues may not increase proportionately to cover our costs. In this case, our operating margins and profitability would be adversely affected.

Our Future Growth May Require Us to Raise Additional Capital in the Future, But That Capital May Not Be Available When It Is Needed.

We are required by regulatory authorities to maintain adequate levels of capital to support our operations. We believe that our current capital levels will satisfy our regulatory requirements for the foreseeable future. We may at some point, however, need to raise additional capital to support our continued growth. Our ability to raise additional capital will depend, in part, on conditions in the capital markets at that time, which are outside our control, and on our financial performance. Accordingly, we may be unable to raise additional capital,

Table of Contents

if and when needed, on terms acceptable to us, or at all. If we cannot raise additional capital when needed, our ability to further expand our operations through internal growth and acquisitions could be materially impaired. In addition, if we decide to raise additional equity capital, your interest in our common stock could be diluted.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

Table of Contents

ITEM 2. PROPERTIES

The Company conducts its business through its executive office at 95 Elm Street, West Springfield, Massachusetts, its 22 full service branch offices, a loan production office, two financial services facilities, and two drive-up branches. Of the 22 full service branch offices, seven are owned and 15 are leased, one of the financial services facilities is owned and one is leased, and one of the drive-up branches is owned and one is leased. The Company also has two remote ATM locations, one of which is leased. Lease expiration dates range from 2012 to 2034 with renewal options ranging from five to ten years. *See Note E in the Company's Consolidated Financial Statements for more information.*

ITEM 3. LEGAL PROCEEDINGS

United Bank, as successor in interest to Commonwealth National Bank, is involved in litigation relating to its foreclosure on a certain loan property. The litigants claim that Commonwealth National Bank acted in bad faith and in violation of applicable law and that its actions resulted in a sale of the underlying property for less than its market value, thereby causing damage to the parties. A trial was held in the third quarter of 2011 and the judge ruled in United Bank's favor. The litigants have appealed the decision. United Bank believes these claims and the appeal are without merit and is vigorously defending the litigation. No estimate of any reasonably possible loss or range of loss to United Bank can be made at this time.

In addition, the Company and its subsidiary are subject to various legal actions arising in the normal course of business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material adverse effect on the Company's financial condition, results of operations or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Our shares of common stock are traded on the Nasdaq Global Select Market under the symbol UBNK. The approximate number of holders of record of United Financial Bancorp, Inc.'s common stock as of March 5, 2012 was 2,851. Certain shares of the Company are held in nominee or street name; accordingly, the number of beneficial owners of such shares is not known or included in the foregoing number.

The following table presents quarterly market information and dividends declared for the common stock of the Company for the years ended December 31, 2011 and 2010. The high and low sales prices for the quarterly periods noted below were obtained from the NASDAQ Global Select Market.

	Price Per Share		Cash Dividend Declared
	High	Low	
2011			
Fourth quarter	\$ 17.02	\$ 13.49	\$ 0.09
Third quarter	16.75	13.68	0.09
Second quarter	16.76	14.35	0.08
First quarter	16.51	13.84	0.08
2010			
Fourth quarter	\$ 15.46	\$ 13.39	\$ 0.08

Set forth hereunder is a stock performance graph comparing (a) the cumulative total return on the common stock for the period beginning on December 31, 2005 through December 31, 2011, (b) the cumulative total return on stocks included in the SNL Thrift Index over such period and (c) the cumulative total return on stocks included in the Russell 2000 Index over such period.

The cumulative total return on the common stock was computed assuming the reinvestment of cash dividends during the period and is expressed in dollars based on an assumed initial investment of \$100.

On January 23, 2012, the Board of Directors of United Financial Bancorp, Inc. declared a cash dividend of \$0.09 per share. The dividend will be payable on March 2, 2012 to shareholders of record as of February 9, 2012.

The Company's Board of Directors expects that comparable cash dividends will continue to be paid by the Company in the future; however, future dividends necessarily depend upon earnings, financial condition, appropriate legal restrictions and other factors in existence at the time the Board of Directors considers a dividend policy. In addition, future dividends are dependent primarily on cash flows from the investment portfolio, debt service payments from United Bank in connection with its loan to the Employee Stock Ownership Plan, and dividends or capital distributions from United Bank.

For a discussion of United Bank's ability to pay dividends, see Part I Item 1. Business Supervision and Regulation Federal Banking Regulation and Holding Company Regulation.

Table of Contents

(b) Not Applicable.

(c) The following table provides certain information with regard to shares repurchased by the Company in the fourth quarter of 2011.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid Per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (1)
October 1 - 31, 2011	27,500 ⁽²⁾	\$ 14.40	27,335	406,271
November 1- 30, 2011	44,768	15.42	44,768	361,503
December 1 - 31, 2011	36,101 ⁽³⁾	15.57	31,400	330,103
Total	108,369	\$ 15.21	103,503	

(1) On October 26, 2010, the Board of Directors approved a plan to repurchase up to 5%, or approximately 807,803 shares, of the Company's common stock. Under the plan, the Company intends to repurchase shares from time to time, depending on market conditions and will continue until it is completed. As of December 31, 2011, the Company repurchased 477,700 shares at a cost of approximately \$7.1 million and an average price of \$14.83, under this plan.

(2) Includes the withholding of 165 shares at \$16.14 per share as payment of taxes due upon the vesting of the restricted stock awards under the United Financial Bancorp, Inc. 2006 Stock-Based Incentive Plan.

(3) Includes the withholding of 4,701 shares at \$16.10 per share as payment of taxes due upon the vesting of the restricted stock awards under the United Financial Bancorp, Inc. 2006 Stock-Based Incentive Plan.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The summary financial information presented below is derived in part from the consolidated financial statements of the Company. The following is only a summary and you should read it in conjunction with the consolidated financial statements and notes beginning on page F-1. The information at December 31, 2011 and 2010 and for the years ended December 31, 2011, 2010 and 2009 is derived in part from the audited consolidated financial statements of the Company that appear in this Annual Report on Form 10-K. The information for the years ended December 31, 2008 and 2007 is derived in part from audited consolidated financial statements that do not appear in this Annual Report on Form 10-K.

Number of full service customer facilities	22	22	22	15	13

- (1) The allowance for loan losses at December 31, 2011, 2010, 2009, 2008 and 2007 was \$11.1 million, \$10.0 million, \$9.2 million, \$8.3 million and \$7.7 million, respectively.
- (2) Non-performing assets consist of non-performing loans, foreclosed other real estate owned (OREO) and other non-performing assets. Non-performing loans consist of non-accrual and accruing loans 90 days or more overdue, while OREO consists of real estate acquired through foreclosure and real estate acquired by acceptance of a deed-in-lieu of foreclosure.
- (3) Exclusive of the \$819,000 and \$2.5 million (after tax) in acquisition related expenses for the years ended December 31, 2010 and 2009, respectively, and a \$318,000 (after tax) special FDIC insurance assessment for the year ended December 31, 2009, net income would have been \$10.9 million and \$8.7 million, respectively.
- (4) Exclusive of the \$1.4 million OTTI charge and related tax effect of \$550,000, net income in 2008 would have been \$8.1 million.
- (5) The Company issued 17,205,995 shares of common stock in its July 2005 initial public offering, including 9,189,722 shares held by United Mutual Holding Company. In December 2007, the Company completed a second step conversion and offering in which each outstanding minority share was exchanged for 1.04079 shares and 9,564,570 shares were sold in a subscription and syndicated offering. All earnings per share data and share information have been adjusted by the exchange ratio for 2007 and all periods prior.
- (6) Asset Quality Ratios and Regulatory Capital Ratios and the tangible equity to tangible assets ratio are end-of-period ratios. With the exception of end-of-period ratios, all ratios are based on average monthly balances during the indicated periods and are annualized where appropriate.

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

- (7) Exclusive of the \$819,000 and \$2.5 million (after tax) in acquisition related expenses for the years ended December 31, 2010 and 2009, respectively, and a \$318,000 (after tax) special FDIC insurance assessment for the year ended December 31, 2009, the return on average assets would have been 0.71% and 0.68% and average equity would have been 4.85% and 3.97%, respectively.
- (8) Excludes the impact of goodwill and other intangible assets of \$8.9 million at December 31, 2011, \$9.2 million at December 31, 2010 and \$8.8 million at December 31, 2009.
- (9) The interest rate spread represents the difference between weighted-average yield on interest-earning assets and the weighted-average cost of interest-bearing liabilities.

Table of Contents

- (10) The net interest margin represents net interest income as a percent of average interest-earning assets.
- (11) Exclusive of the \$1.1 million and \$2.9 million in acquisition related expenses for the years ended December 31, 2010 and 2009, respectively, and a \$538,000 special FDIC insurance assessment for the year ended December 31, 2009, non-interest expense to average total assets would have been 2.78% and 2.64% and the efficiency ratio would have been 69.55% and 68.49%, respectively.
- (12) The efficiency ratio represents non-interest expense divided by the sum of net interest income and non-interest income and excludes gains/losses on sales of securities and loans and impairment charges on securities.
- (13) Exclusive of the \$1.4 million OTTI charge and related tax effect of \$550,000, the return on average assets and average equity would have been 0.68% and 3.59%, respectively.
- (14) Regulatory Capital Ratios are reported for United Bank only.
- (15) Exclusive of the \$148.9 million, \$209.8 million and \$242.9 million in loans acquired from CNB Financial and \$19.1 million, \$21.4 million and \$22.7 million in loans purchased from other financial institutions, allowance for loan losses as a percent of total loans would have been 1.17%, 1.18% and 1.07% at December 31, 2011, 2010 and 2009, respectively.
- (16) Excluding the \$163,000 and \$3.3 million in non-performing loans acquired from CNB Financial, allowance for loan losses as a percent of non-performing loans would have been 107.72 and 70.44% at December 31, 2010 and 2009, respectively.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion and analysis reflects our consolidated financial statements and other relevant statistical data, and is intended to enhance your understanding of our financial condition and results of operations. The information in this section has been derived from the audited consolidated financial statements, which appear beginning on page F-1 of this Annual Report. You should read the information in this section in conjunction with the business and financial information regarding the Company provided in this Annual Report on Form 10-K.

Overview

Our results of operations depend primarily on our net interest income. Net interest income is the difference between the interest income we earn on our interest-earning assets, consisting primarily of loans, investment securities (including mortgage-backed securities, other securities and corporate and municipal bonds) and other interest-earning assets (primarily federal home loan bank stock and cash and cash equivalents), and the interest paid on our interest-bearing liabilities, consisting primarily of savings accounts, money market accounts, transaction accounts, certificates of deposit and Federal Home Loan Bank advances.

Our results of operations are also affected by our provision for loan losses, non-interest income and non-interest expense. Non-interest income consists primarily of deposit account fees, financial services fees, increases in cash value-insurance, gains and losses on the sales of loans and of securities, impairment charges for securities and miscellaneous other income. Non-interest expense consists primarily of compensation and employee benefits, data processing, occupancy, marketing and public relations, professional services, printing and office supplies, and other operating expenses. Our results of operations also may be affected significantly by general and local economic and competitive conditions, changes in market interest rates, governmental policies and actions of regulatory authorities.

Critical Accounting Policies

The SEC defines critical accounting policies as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in future periods. The Company's significant accounting policies are described in Note 1 to the consolidated financial statements. Please see those policies in conjunction with this discussion. Management believes that the following policies would be considered critical under the SEC's definition:

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

Allowance for Loan Losses. The allowance for loan losses is the amount estimated by management as necessary to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses which is charged against income. The methodology for

Table of Contents

determining the allowance for loan losses is considered a critical accounting policy by management due to the high degree of judgment involved, the subjectivity of the assumptions utilized and the potential for changes in the economic environment that could result in adjustments to the amount of the recorded allowance for loan losses.

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. We consider a variety of factors in establishing this estimate including, but not limited to, prior loss experience, current economic conditions, trends in nonperforming loans and delinquency rates, the adequacy of the underlying collateral, the financial strength of the borrower, results of internal loan reviews and other relevant factors. This evaluation is inherently subjective as it requires material estimates by management that may be susceptible to significant change based on changes in economic and real estate market conditions. The allowance consists of a specific and a general component, as further described below.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired.

The Company periodically may agree to modify the contractual terms of loans. When a loan is modified and a concession is made to a borrower experiencing financial difficulty, the modification is considered a troubled debt restructuring (TDR). All TDRs are initially classified as impaired.

Specific component. The specific component relates to loans that are classified as impaired. Impairment is measured on a loan by loan basis for the commercial segment (commercial and industrial, commercial real estate and construction) by either the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent. A specific allowance is established when the discounted cash flows (or collateral value) of the impaired loan is lower than the carrying value of the loan. Groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual loans in the consumer segment (residential real estate, home equity and consumer loans) for impairment disclosures, unless such loans are subject to a troubled debt restructuring agreement.

General component. The general component is based on historical loss experience adjusted for qualitative factors stratified by each of the loan classes: commercial and industrial, commercial real estate, construction, residential real estate, home equity and consumer. Management uses an average of historical losses based on a time frame appropriate to capture relevant loss data for each loan class. This historical loss factor for each loan class is adjusted for the following qualitative factors: the levels/trends in delinquencies and nonaccruals; levels and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of changes in risk selection and underwriting standards and other changes in lending policies, procedures and practices; experience, ability and depth of lending management and staff; national and local economic trends and conditions; industry conditions; and effects of changes in credit concentrations. This analysis establishes factors that are applied to each loan class to determine the amount of the general component of the allowance for loan losses.

Evaluation of the Investment Portfolio for Other-Than-Temporary Impairment. The evaluation of the investment portfolio for other-than-temporary impairment is also a critical accounting estimate. On a quarterly basis, we review securities with a decline in fair value below the amortized cost of the investment to determine whether the decline in fair value is temporary or other than temporary. Declines in the fair value of marketable equity securities below their cost that are deemed to be other than temporary based on the severity and duration of the impairment are reflected in earnings as realized losses. In estimating other than temporary

Table of Contents

impairment losses for held to maturity and available for sale debt securities, impairment is required to be recognized (1) if we intend to sell the security; (2) if it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost basis. For all impaired held to maturity and available for sale securities that we intend to sell, or more likely than not will be required to sell, the full amount of the other than temporary impairment is recognized through earnings. For all other impaired held to maturity or available for sale securities, credit-related other than temporary impairment is recognized through earnings, while non-credit related other than temporary impairment is recognized in other comprehensive income, net of applicable taxes.

Income Taxes. The Company uses the asset and liability method of accounting for income taxes in which deferred tax assets and liabilities are established for the temporary differences between the financial reporting basis and the tax basis of the Company's asset and liabilities. The realization of the net deferred tax asset generally depends upon future levels of taxable income and the existence of prior years' taxable income, to which carry back refund claims could be made. A valuation allowance is maintained for deferred tax assets that management estimates are more likely than not to be unrealizable based on available evidence at the time the estimate is made. Significant management judgment is required in determining income tax expense and deferred tax assets and liabilities. In determining the valuation allowance, the Company uses historical and forecasted future operating results, based upon approved business plans, including a review of the eligible carryforward periods, tax planning opportunities and other relevant considerations. These underlying assumptions can change from period to period. For example, tax law changes or variances in future projected operating performance could result in a change in the valuation allowance. Should actual factors and conditions differ materially from those considered by management, the actual realization of the net deferred tax asset could differ materially from the amounts recorded in the financial statements. If the Company is not able to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset valuation allowance would be charged to income tax expense in the period such determination was made.

Goodwill and Identifiable Intangible Assets. Goodwill and identifiable intangible assets are recorded as a result of business acquisitions and combinations. These assets are evaluated for impairment annually or whenever events or changes in circumstances indicate the carrying value of these assets may not be recoverable. If the carrying amount exceeds fair value, an impairment charge is recorded to income. The fair value is based on observable market prices, when practicable. Other valuation techniques may be used when market prices are unavailable, including estimated discounted cash flows and market multiples analyses. These types of analyses contain uncertainties because they require management to make assumptions and to apply judgment to estimate industry economic factors and the profitability of future business strategies. In the event of future changes in fair value, the Company may be exposed to an impairment charge that could be material.

Fair Valuation of Financial Instruments. The Company uses fair value measurements to record fair value adjustments to certain financial instruments and to determine fair value disclosures. Trading assets, securities available for sale, and derivative instruments are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, or to establish a loss allowance or write-down based on the fair value of impaired assets. Further, the notes to financial statements include information about the extent to which fair value is used to measure assets and liabilities, the valuation methodologies used and its impact to earnings. Additionally, for financial instruments not recorded at fair value, the notes to financial statements disclose the estimate of their fair value. Due to the judgments and uncertainties involved in the estimation process, the estimates could result in materially different results under different assumptions and conditions.

Business Strategy

Our business strategy is to operate as a well-capitalized and profitable community bank dedicated to providing exceptional personal service to our individual and business customers. Over the past several years, we have emphasized the origination of commercial and industrial loans and loans secured by commercial real estate,

Table of Contents

and we intend to increase our origination of these loans in the future. In addition, we intend to expand our branch network in our primary market area, which consists of Hampden, Hampshire and Worcester Counties, Massachusetts. We also intend to evaluate opportunities to expand into new markets, including Northern Connecticut. We may not be able to successfully implement our business strategy.

Highlights of our business strategy are as follows:

Remaining a Community-Oriented Financial Institution. We were established in 1882 and have been operating continuously since that time, growing through internal growth and acquisitions. We have been, and continue to be, committed to meeting the financial needs of the communities in which we operate, and we are dedicated to providing quality personal service to our customers. We provide a broad range of individualized consumer and business financial services.

Expanding our Branch Network. We currently operate from 22 full-service banking offices, a loan production office, and two drive-up branches. We also maintain two financial services facilities that offer insurance and investment products and financial planning services. We intend to evaluate new branch expansion opportunities, through acquisitions and *de novo* branching, to expand our presence within and outside our primary market area, including Central Massachusetts and Northern Connecticut. During the second quarter of 2012 we intend to open a full-service branch in Northborough, Massachusetts. Our current business plan also calls for the acquisition and establishment of additional branch offices. In addition, we intend to evaluate acquisitions of other financial institutions, as opportunities present themselves.

Increasing our Commercial Real Estate and Commercial and Industrial Lending. We intend to continue to increase our origination of higher-yielding commercial real estate and commercial and industrial loans as a means of increasing our interest income and improving our net interest margin. We have supplemented our existing staff of commercial loan officers, increased our credit analysis resources and enhanced the outside loan review process. We originated \$68.5 million of commercial real estate loans and \$57.2 million of commercial and industrial loans during the year ended December 31, 2011. At December 31, 2011, our commercial real estate loans and commercial and industrial loans totaled \$450.2 million and \$176.1 million, respectively. Originating more commercial real estate loans and commercial and industrial loans exposes us to increased risks, as discussed in the Risk Factors section of this Annual Report.

Maintaining High Asset Quality. We have emphasized maintaining strong asset quality by following conservative underwriting criteria and by originating loans secured primarily by real estate. We will continue to focus on maintaining high asset quality as we seek to expand our commercial lending activities. Our loan portfolio has no exposure to sub-prime borrowers. In addition, net charge-offs have increased from 0.13% of average loans outstanding for the year ended December 31, 2010 to 0.19% of our average loans outstanding for the year ended December 31, 2011. Continued weakness or further deterioration in the economy and the real estate market may lead to future increases in non-performing assets and net charge-offs.

Increasing our Share of Lower-Cost Deposits. We remain committed to gathering lower cost and more stable core deposits. We attract and retain core deposits with competitive products and rates, excellent customer service, a comprehensive marketing program and a well-established incentive-based cross-sales program. Our efforts to attract and retain core deposits have resulted in an increase in core account balances and total number of accounts during 2011. At December 31, 2011, core deposits (demand deposits, NOW accounts, money market accounts and savings accounts) totaled \$808.2 million, or 65.7% of total deposits, compared to \$680.7 million, or 59.5% of our total deposits, at December 31, 2010.

Table of Contents

Increasing and Diversifying our Sources of Non-interest Income. In order to reduce our reliance on net interest income and the impact of market rates on our financial results, we have sought to diversify our revenue stream. In connection with our success in growing our deposit base, our fee income derived from deposits has increased. Through United Wealth Management Group, a division of United Bank, we offer United Bank customers and others a complete range of non-deposit investment products and financial planning services, including mutual funds, debt, equity and government securities, insurance products, fixed and variable annuities, financial planning for individual and commercial customers and estate planning services. United Wealth Management Group offers these services through its partnership with NFP Securities, Inc. We have also invested in bank-owned life insurance for certain executive officers and directors, providing another source of non-interest income through the recognition of the growing cash surrender value of this insurance over time.

Comparison of Financial Condition at December 31, 2011 and 2010

Balance Sheet Summary. Total assets increased \$38.9 million, or 2.5%, to \$1.624 billion at December 31, 2011 from \$1.585 billion at December 31, 2010 reflecting growth in securities available for sale, net loans and bank owned life insurance, partially offset by a decrease in interest-bearing deposits and held to maturity investment securities. Securities available for sale increased \$16.0 million, or 7.8%, to \$221.8 million at December 31, 2011 from \$205.9 million at December 31, 2010 primarily due to purchases of fixed-rate agency mortgage-backed securities totaling \$79.6 million, partially offset by maturities, calls and repayments of government-sponsored agency debt and mortgage-backed securities of \$66.3 million. Net loans increased \$46.7 million, or 4.4%, to \$1.113 billion at December 31, 2011 from \$1.066 billion at December 31, 2010 reflecting healthy origination activity, partially offset by normal amortization and repayments. Bank owned life insurance increased \$11.5 million, or 39.4%, reflecting an additional investment of \$10.0 million in the second quarter of 2011. Interest-bearing deposits decreased \$31.5 million, or 43.2%, reflecting the use of excess cash to fund purchases of available for sale securities and retire maturing FHLBB advances. Securities held to maturity decreased \$16.6 million, or 12.5%, as a result of repayments of government-sponsored agency debt and mortgage-backed securities. At year end, the Company continued to have considerable liquidity consisting of significant balances at the Federal Reserve, a large amount of marketable loans and investment securities, substantial unused borrowing capacity at the Federal Home Loan Bank and the Federal Reserve Bank and access to funding through the repurchase agreement and brokered deposit markets. The Company's balance sheet is also supported by a strong capital position, with total stockholders' equity of \$227.4 million, or 14.0% of total assets, at December 31, 2011.

Loans. Net loans increased \$46.7 million, or 4.4%, to \$1.113 billion at December 31, 2011 from \$1.066 billion at December 31, 2010. Commercial real estate loans increased \$22.2 million, or 5.2%, to \$450.2 million, and commercial and industrial loans increased \$10.8 million, or 6.5%, to \$176.1 million, primarily attributable to business development efforts, competitive products and pricing and the establishment of a loan production office in Beverly, Massachusetts during the second quarter of 2011. One- to four-family residential mortgage loans increased \$19.1 million, or 6.5% to \$314.8 million due to originations of 10- and 15-year loans as a result of promotional efforts and continued lower market interest rates, partially offset by payments and sales of 30-year fixed rate loan originations. Construction loans increased \$2.7 million, or 9.9%, to \$30.3 million, due to an increase in commercial and residential funding, successful business development efforts and the relatively low interest rate environment. A significant portion of these loans mature in less than a year and will either convert to permanent financing or pay-off in full. Automobile loan balances declined \$3.2 million or 29.0%, to \$7.8 million reflecting a slow-down in demand in connection with weaker car sales and payments on existing loans. We continued to focus our efforts on growing the commercial real estate and commercial and industrial loan portfolios in order to increase our interest income and improve our net interest rate spread.

Asset Quality. Throughout 2011, economic conditions improved modestly which was reflected in lower delinquency and non-performing assets at December 31, 2011. Our asset quality has also been impacted by a strategy adopted several years ago to emphasize the origination of commercial and industrial loans and commercial mortgages. These loans have increased as a percentage of our total loan portfolio in recent years and

Table of Contents

generally have more risk than one- to four-family residential mortgage loans. Because the repayment of commercial and industrial loans and commercial mortgages depends on the successful management and operation of the borrower's properties or related businesses, repayment of such loans can be affected by adverse conditions in the real estate market or the local economy.

As a result of modest improvements in the economy and the resolution of several classified loans, we experienced a decrease in non-performing loans and classified assets in 2011. Non-performing loans decreased \$980,000 to \$8.5 million, or 0.75% of total loans, at December 31, 2011 compared to \$9.4 million, or 0.88% of total loans, at December 31, 2010 mainly due to decreases of \$1.1 million in commercial mortgages and \$244,000 in commercial and industrial loans, slightly offset by an increase of \$381,000 in residential mortgages. Our loan portfolio has no exposure to sub-prime borrowers. In addition to the non-performing loans, the Company has identified \$61.3 million of classified assets at December 31, 2011 compared to \$73.9 million at December 31, 2010, a decrease of \$12.3 million or 16.8%. The decrease in classified assets is mainly due to the reduction of \$7.9 million in special mention assets and a reduction of \$4.8 million in substandard assets, slightly offset by an increase of \$587,000 in other real estate owned and other non-performing assets. The reduction in special mention assets was largely due to the upgrade of several loan relationships and the reduction in substandard assets was the result of liquidation of some accounts and out placement of a larger commercial mortgage credit and a commercial and industrial credit. Classified assets include loans that are currently performing, are of lesser quality and are reported as special mention, substandard, doubtful or loss, as well as other real estate owned. At December 31, 2011 and 2010, classified loans primarily consisted of special mention and substandard commercial business loans and commercial mortgages. Other real estate owned totaled \$2.1 million at December 31, 2011 and was comprised of two residential properties and three commercial properties. Management cannot predict the extent to which economic conditions may worsen or other factors may impact borrowers and the classified assets. Accordingly, there can be no assurance that additional loans will not become 90 days or more past due, be placed on nonaccrual status, become classified or restructured, or require increased allowance coverage and provision for loan losses.

Deposits and Other Funding Sources. Total deposits increased \$86.7 million, or 7.6%, to \$1.230 billion at December 31, 2011 from \$1.143 billion at December 31, 2010, primarily due to growth in core deposits accounts of \$127.6 million, or 18.7%, to \$808.2 million at December 31, 2011 from \$680.7 million at December 31, 2010. The growth in core deposit account balances was driven by competitive products and pricing, attention to excellence in customer service and targeted promotional activities. The increase in core deposits was partially offset by a decrease in certificates of deposit of \$40.9 million, or 8.8%, to \$421.7 million at December 31, 2011 compared to \$462.6 million at December 31, 2010 as a result of customer preferences for savings and money market accounts due to the low rate environment.

FHLB Advances. FHLB advances decreased \$46.9 million, or 30.6% to \$106.4 million during 2011 mainly due to the use of positive cash flows to retire maturing debt.

Total Stockholders' Equity. Total stockholders' equity increased \$4.8 million, or 2.1%, to \$227.4 million at December 31, 2011 from \$222.6 million at December 31, 2010 as a result of net income of \$11.2 million, other comprehensive income of \$1.9 million, stock-based compensation credits totaling \$1.9 million and ESOP compensation credits of \$1.1 million. These increases were partially offset by repurchases of common stock totaling \$6.8 million and cash dividend payments amounting to \$5.1 million.

Comparison of Operating Results for the Years Ended December 31, 2011 and 2010

Net Income. Net income for the year ended December 31, 2011 totaled \$11.2 million, or \$0.74 per diluted share, compared to net income of \$10.0 million, or \$0.65 per diluted share, for the same period in 2010. Excluding acquisition-related expenses of \$1.1 million (\$819,000 net of tax benefit), net income would have been \$10.9 million, or \$0.70 per diluted share, in 2010. The 2011 results were impacted by a decrease in net interest income, a higher provision for loan losses, increases in non-interest income and expense, and a lower effective tax rate.

Table of Contents

Average Balances and Yields. The following table sets forth average balance sheets, average yields and costs, and certain other information for the periods indicated. No tax-equivalent yield adjustments were made, as the effect thereof was not material. Loan fees are not included in interest income amounts. All average balances are daily average balances. Non-accrual loans were included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield.

Net Interest Income Before Provision for Loan Losses. Net interest income before provision for loan losses decreased \$98,000, or 0.2%, to \$52.8 million for the year ended December 31, 2011 from \$52.9 million for 2010 as a result of net interest margin compression partially offset by an increase in average interest earning assets. Net interest margin decreased 14 basis points to 3.51% for the for the year ended December 31, 2011 from 3.65% for the prior year period primarily attributable to a decrease of \$897,000 in amortization of certain acquisition accounting adjustments to \$1.7 million for the 2011 period from \$2.6 million for the same period in 2010, as well as the downward repricing of certain fixed rate loans and investments as a result of the lower interest rate environment. These items were partially offset by lower funding costs. Total average interest-earning assets increased \$54.1 million, or 3.7%, to \$1.504 billion for the year ended December 31, 2011 mainly due to growth in investment securities.

Interest Income. Interest income decreased \$2.8 million, or 3.8%, to \$71.1 million for the year ended December 31, 2011 from \$73.9 million for the prior year due to a decrease in the yield on earning assets partially offset by an increase in average interest-earning assets. The yield on average interest-earning assets decreased by 37 basis points to 4.73% in connection with the lower interest rate environment and a reduction of

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

\$400,000 in the accretion of certain loan fair value accounting adjustments to \$1.1 million for the year ended December 31, 2011 from \$1.5 million for the same period in 2010. The decrease in market rates contributed to the downward repricing of a portion of the Company's existing assets and to lower rates for new assets.

Table of Contents

Interest Expense. Interest expense decreased \$2.7 million, or 12.8%, to \$18.3 million for the year ended December 31, 2011 from \$20.9 million for the prior year due to a decrease in the average rate paid on interest-bearing liabilities, partially offset by growth in average interest-bearing liabilities. The average rate paid on interest-bearing liabilities declined 29 basis points to 1.56% for the year ended December 31, 2011 reflecting the repricing of savings, money market, NOW account and certificate of deposit balances in response to the lower interest rate environment as well as a \$497,000 reduction in interest expense associated with the amortization of certain deposits and borrowings fair value accounting adjustments. Average interest-bearing liabilities increased \$38.9 million, or 3.4%, to \$1.173 billion for the year ended December 31, 2011 reflecting growth in interest-bearing deposits. Total average interest-bearing deposits increased \$75.0 million, or 8.2%, to \$990.8 million for the year ended December 31, 2011 due to growth in savings, money market and NOW account balances attributable to attractive products, competitive pricing and excellent customer service. These increases were partially offset by a decrease in average FHLBB advances as a result of retirements of maturing debt.

Provision for Loan Losses. We establish provisions for loan losses, which are charged to operations, at a level necessary to absorb known and inherent losses that are both probable and reasonably estimable at the date of the financial statements. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, trends in nonperforming loans and delinquency rates, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, peer group information and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur. The provision for loan losses was \$3.2 million for the year ended December 31, 2011 as compared to \$2.3 million for 2010. The increase in the 2011 provision is primarily the result of an increase in net charge-offs, reserves for classified loans, and growth in net loan originations. The allowance for loan losses was \$11.1 million, or 0.99% of loans outstanding, at December 31, 2011. Excluding the impact of the \$148.9 million of loans acquired from CNB Financial and \$19.1 million of loans acquired from other financial institutions, the ratio of the allowance for loan losses to total loans would have been 1.17%.

Non-interest Income. Non-interest income increased \$637,000, or 7.3%, to \$9.4 million for the year ended December 31, 2011. Excluding impairment charges of \$99,000 in 2011 and \$145,000 in 2010, and losses on sales and calls of securities of \$185,000 in 2010, non-interest income would have increased \$406,000, or 4.5%. Bank-owned life insurance increased \$252,000, or 18.1%, due to the purchase of \$10.0 million of insurance policies in the second quarter of 2011. Fee income on depositors' accounts increased \$227,000, or 4.3%, due to higher ATM and debit card income in connection with growth in transaction accounts and volume. Wealth management income increased \$165,000, or 21.9%, as a result of growth in commissions from annuity sales and fees from assets under management. These items were offset in part by a \$299,000 reduction in gains from sales of loans due to a decrease in the volume of loan sales.

Non-interest Expense. Non-interest expense increased \$221,000, or 0.5%, to \$44.1 million for the year ended December 31, 2011, from \$43.8 million for the prior year. Excluding acquisition-related expenses of \$1.1 million in 2010, total non-interest expenses would have increased \$1.4 million, or 3.2%. Other expenses increased \$1.2 million, or 20.6%, primarily as a result of low income housing tax credit fund write-downs of \$837,000, compared to \$181,000 in 2010, as well as higher levels of other real estate owned costs, write-downs of mortgage servicing rights and branch related expenses. Total salaries and benefits increased \$762,000, or 3.2%, mainly driven by annual wage increases, staffing costs for a new loan production office opened in 2011 and higher ESOP expense due to an increased stock price, partially offset by lower stock-based compensation. Professional services expenses increased \$362,000, or 20.0%, due to expanded legal costs incurred of \$170,000 in connection with litigation, and \$125,000 in consulting fees in connection with third party loan review, risk management consulting, and other corporate activities. These items were partially offset by a \$441,000, or 30.0%, decrease in FDIC premium expense, which reflects the positive impact of the new assessment calculation which was effective April 1, 2011. In addition, marketing expenses decreased \$294,000, or 14.1%, reflecting the cost of promotional activities in 2010 to support the Company's entry into the Worcester market and a decrease in the usage of direct mail in 2011.

Table of Contents

Income Tax Expense. Income tax expense decreased \$1.8 million to \$3.7 million for the year ended December 31, 2011 from \$5.5 million for the comparable 2010 period primarily due to a lower effective tax rate. The effective tax rate decreased from 35.3% in the 2010 period to 24.8% for the year ended December 31, 2011 largely as a result of tax credits from an investment in a low income housing tax credit fund and an increase in tax exempt municipal investment income in 2011.

Comparison of Operating Results for the Years Ended December 31, 2010 and 2009

Net Income. Net income for the year ended December 31, 2010 totaled \$10.0 million, or \$0.65 per diluted share, compared to net income of \$5.8 million, or \$0.38 per diluted share, for the same period in 2009. Excluding acquisition-related expenses of \$1.1 million (\$819,000 net of tax benefit), net income would have been \$10.9 million, or \$0.70 per diluted share, in 2010. Excluding acquisition-related expenses totaling \$2.9 million (\$2.5 million net of tax benefit), net income would have been \$8.3 million, or \$0.55 per diluted share, for 2009.

(1) Includes loans held for sale.

Net Interest Income Before Provision for Loan Losses. Net interest income before provision for loan losses increased \$11.9 million, or 29.0%, to \$52.9 million for the year ended December 31, 2010 from \$41.0 million for 2009 reflecting growth in average earning assets and net interest margin expansion. Average earning assets increased \$242.3 million, or 20.1%, to \$1.5 billion mainly due to the Company's acquisition of CNB Financial Corp. in the fourth quarter of 2009. Net interest margin increased 26 basis points to 3.65% for the year ended December 31, 2010 from 3.39% for the prior year reflecting amortization of certain acquisition accounting adjustments totaling \$2.6 million and improved spreads.

Interest Income. Interest income increased \$10.9 million, or 17.3%, to \$73.9 million for the year ended December 31, 2010 from \$63.0 million for the prior year reflecting an increase in average interest-earning assets, partially offset by a decrease in the yield on earning assets. Total average interest-earning asset balances increased \$242.3 million, or 20.1%, to \$1.5 billion during 2010, due in large part to the Company's acquisition of

Table of Contents

CNB Financial Corp. in the fourth quarter of 2009 and, to a lesser extent, organic loan origination activity and an increase in excess cash balances. These items were partially offset by loan and investment security sales and prepayments and normal amortization of the existing loan and mortgage-backed securities portfolio. The yield on average interest-earning assets decreased 13 basis points to 5.09% for the year ended December 31, 2010 in connection with the lower interest rate environment, partially offset by accretion of certain loan fair value accounting adjustments totaling \$1.5 million. The decrease in market rates contributed to the downward repricing of a portion of the Company's existing assets and to lower rates for new assets.

Interest Expense. Interest expense decreased \$1.0 million, or 4.7%, to \$20.9 million for the year ended December 31, 2010 from \$22.0 million for the prior year due to a decrease in the average rate paid on interest-bearing liabilities, partially offset by growth in average interest-bearing liabilities. The average rate paid on interest-bearing liabilities declined 53 basis points to 1.85% for the year ended December 31, 2010 reflecting the repricing of savings, money market and certificate of deposit balances in response to the lower interest rate environment as well as a \$1.1 million reduction in interest expense associated with the amortization of certain deposits and borrowings fair value accounting adjustments. Average interest-bearing liabilities increased \$211.5 million, or 22.9%, to \$1.1 billion for the year ended December 31, 2010 reflecting growth in interest-bearing deposits and other interest-bearing liabilities due in large part to the Company's acquisition of CNB Financial Corp. in the fourth quarter of 2009 and organic growth in the Springfield and Worcester markets. Total average interest-bearing deposits increased \$200.4 million, or 28.0%, to \$915.8 million for the year ended December 31, 2010 mainly attributable to an increase in savings, money market and certificate of deposit balances related to our new Worcester market, attractive products, competitive pricing and excellent customer service. Other interest-bearing liabilities increased \$14.8 million or 41.0% reflecting growth in customer repurchase agreement balances.

Provision for Loan Losses. We establish provisions for loan losses, which are charged to operations, at a level necessary to absorb known and inherent losses that are both probable and reasonably estimable at the date of the financial statements. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, trends in nonperforming loans and delinquency rates, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, peer group information and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur. The provision for loan losses was \$2.3 million for the year ended December 31, 2010 as compared to \$3.0 million for 2009. The decrease in the 2010 provision reflects the impact of improving asset quality, a decrease in net loan originations and loan sales. The allowance for loan losses was \$10.0 million, or 0.93% of loans outstanding, at December 31, 2010. Excluding the impact of the \$209.8 million of loans acquired from CNB Financial and \$21.4 million of loans acquired from other financial institutions, the ratio of the allowance for loan losses to total loans would have been 1.18%.

Non-interest Income. Non-interest income increased \$40,000, or 0.5%, to \$8.7 million for the year ended December 31, 2010 mainly attributable to growth in deposit service charges of \$450,000, or 9.2%, as a result of growth in accounts and transactions and an increase of \$210,000, or 57.9%, on gains from sales of lower coupon, fixed rate residential mortgages. These items were partially offset by losses totaling \$185,000 from sales of substandard municipal securities as well as Fannie Mae and Freddie Mac stock in 2010 compared to gains of \$543,000 from sales of securities in 2009 and an other-than-temporary impairment charge of an equity security of \$145,000 in the first quarter of 2010.

Non-interest Expense. Non-interest expense increased \$7.0 million, or 18.9%, to \$43.8 million for the year ended December 31, 2010, from \$36.9 million for the prior year. Excluding acquisition-related expenses of \$1.1 million in 2010 and \$2.9 million in 2009, total non-interest expenses would have increased \$8.7 million, or 25.6%. Total salaries and benefits increased \$5.1 million, or 26.9%, mainly due to costs incurred to support our new Worcester operations and, to a lesser extent, annual wage increases and a larger incentive accrual due to improved operating performance. Occupancy costs grew \$786,000, or 30.1%, principally attributable to expenses

Table of Contents

incurred to operate our new Worcester facilities. Data processing costs increased \$661,000, or 19.2%, reflecting expenses for our new Worcester accounts and a larger loan and deposit account base in our Springfield market. Marketing expenses increased \$621,000, or 42.2%, in connection with advertising and promotional expenses focused on our Worcester market. Professional service costs increased \$453,000, or 33.3%, as a result of increases in audit and accounting, legal and consulting costs related to the new Worcester operations and, to a lesser extent, expenses associated with loan workout activities and third party loan reviews. Other expenses increased \$1.2 million, or 24.9%, primarily attributable to increases in costs to operate in Worcester including equipment maintenance, depreciation, telephone, postage and supplies as well as a \$181,000 operating loss from an investment in a low income housing tax credit fund. These items were partially offset by a decrease of \$76,000 in FDIC insurance premiums due to a one-time special assessment of \$538,000 incurred in 2009 partially offset by a higher deposit base in 2010.

Income Tax Expense. Income tax expense increased \$1.5 million, or 36.2%, to \$5.5 million for year ended December 31, 2010 from \$4.0 million for the comparable 2009 period due in large part to an increase in income before income taxes offset by a decrease in the effective rate from 40.9% to 35.3%. The higher effective tax rate in 2009 was primarily driven by non-deductible merger expenses.

Management of Market Risk

General. The majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk (IRR). Our assets, the largest portion of which are mortgage loans, have longer maturities than our liabilities, consisting primarily of deposits. As a result, a principal part of our business strategy is to manage IRR and reduce the exposure of our net interest income (NII) to changes in market interest rates. Accordingly, our Board of Directors has established an Asset/Liability Management Committee, which is responsible for evaluating the IRR inherent in our assets and liabilities, for determining the level of risk that is appropriate given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the Board of Directors. With the assistance of an IRR management consultant, the committee monitors the level of IRR on a regular basis and meets at least quarterly to review our asset/liability policies and IRR position.

Economic Value of Equity Simulation Analysis. We have sought to manage our IRR in order to minimize the exposure of our earnings and capital to changes in interest rates. As part of our ongoing asset-liability management, we currently use the following strategies to manage our IRR: (i) using alternative funding sources, such as advances from the FHLBB, to match fund certain longer-term loans; (ii) continued emphasis on increasing core deposits; (iii) offering adjustable rate and shorter-term residential real estate, home equity loans, commercial real estate loans, construction loans and commercial and industrial loans; (iv) offering a variety of consumer loans, which typically have shorter-terms; (v) investing in mortgage-backed securities with variable rates or fixed rates with shorter durations; and (vi) sales of thirty year fixed rate residential real estate loans. Reducing the average maturity of our interest-earning assets by increasing our investments in shorter-term loans and securities, as well as loans and securities with variable rates of interest, helps to better match the maturities and interest rates of our assets and liabilities, thereby reducing the exposure of our NII to changes in market interest rates.

Table of Contents

Net interest income at-risk measures the risk of a decline in earnings due to potential short-term and long term changes in interest rates. The table below represents an analysis of our IRR as measured by the estimated changes in NII for the following twelve months, resulting from an instantaneous and sustained parallel shift in the yield curve of +200 and -100 basis points at December 31, 2011 and 2010.

Change in Interest Rates	Net Interest Income At-Risk	Estimated Increase (Decrease)
	Estimated Increase (Decrease) in NII	Estimated Increase (Decrease) in NII
(basis points)	(December 31, 2011)	(December 31, 2010)
-100	(3.9)%	(1.1)%
Stable	0.0%	0.0%
+200	(0.3)%	0.5%

The preceding income simulation analysis is for United Bank and its subsidiaries only and does not represent a forecast of NII and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions, which are subject to change, including: the nature and timing of interest rate levels including the yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, reinvestment/replacement of asset and liability cash flows, and others. Also, market conditions, prepayment/refinancing levels, the varying impact of interest rate changes on caps and floors embedded in adjustable rate loans, early withdrawal of deposits, changes in product preferences, and other internal/external variables and other factors may vary significantly from assumptions used.

Economic Value of Equity Simulation Analysis. The computation of amounts by which the net present value of an institution's cash flows from assets, liabilities and off balance sheet items (the institution's economic value of equity or "EVE") would change in the event of a range of assumed changes in market interest rates. The model has estimated the economic value of each type of asset, liability and off-balance sheet contract under the assumption that the United States Treasury yield curve increases or decreases instantaneously by 100 to 300 basis points in 100 basis point increments. However, given the low level of market interest rates, an economic value of equity calculation for an interest rate decrease of greater than 100 basis points was not prepared. A basis point equals one-hundredth of one percent, and 200 basis points equals two percent. An increase in interest rates from 3% to 5% would mean, for example, a 200 basis point increase in the "Change in Interest Rates" column below.

Table of Contents

The tables below set forth, at the dates indicated, the estimated changes in our economic value of equity that would result from the designated instantaneous changes in the United States Treasury yield curve. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied upon as indicative of actual results. This data is for United Bank and its subsidiary only and does not include any yield curve changes in the assets of the Company.

December 31, 2011					
Change in	EVE as a Percentage of Present			Value of Assets (3)	
Interest Rates	Estimated Increase (Decrease) in			Increase	
(basis points) (1)	Estimated	Amount	Percent	EVE Ratio (4)	(Decrease)
	EVE (2)	(Dollars in thousands)			(basis points)
+300	\$ 183,875	\$ (53,540)	(23)%	12.06%	(241)
+200	213,647	(23,768)	(10)	13.61	(86)
+100	231,936	(5,479)	(2)	14.42	(6)
0	237,415			14.47	
-100	239,393	1,978	1	14.38	(10)

December 31, 2010					
Change in	EVE as a Percentage of Present			Value of Assets (3)	
Interest Rates	Estimated Increase (Decrease)			Increase	
(basis points) (1)	Estimated	Amount	Percent	EVE Ratio (4)	(Decrease)
	EVE (2)	(Dollars in thousands)			(basis points)
+300	\$ 146,150	\$ (64,887)	(31)%	9.99%	(334)
+200	170,561	(40,475)	(19)	11.34	(198)
+100	193,589	(17,448)	(8)	12.53	(80)
0	211,036			13.32	
-100	227,944	16,908	8	14.11	78

(1) Assumes an instantaneous uniform change in interest rates at all maturities.

(2) EVE is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts.

(3) Present value of assets represents the discounted present value of incoming cash flows on interest-earning assets.

(4) EVE ratio represents EVE divided by the present value of assets.

The tables above indicate that at December 31, 2011 and 2010, in the event of a 300 basis point increase in interest rates, United Bank would experience a 23% and 31%, respectively, decrease in economic value of equity. In the event of a 100 basis point decrease in interest rates at December 31, 2011 and 2010, United Bank would experience a 1% and 8%, respectively, increase in economic value of equity.

Certain shortcomings are inherent in the methodology used in the above interest rate risk measurement. Modeling changes in economic value of equity require making certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the economic value of equity table presented assumes that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or repricing of specific assets and liabilities. Accordingly, although

the economic value of equity table provides an

Table of Contents

indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

Liquidity and Capital Resources

Liquidity is the ability to meet current and future financial obligations of a short-term nature. Our primary sources of funds consist of deposit inflows, loan repayments, maturities and sales of securities and sales of loans. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit flows, mortgage prepayments and loan and security sales are greatly influenced by general interest rates, economic conditions and competition. Our Asset/Liability Management Committee is responsible for establishing and monitoring our liquidity targets and strategies in order to ensure that sufficient liquidity exists for meeting the borrowing needs of our customers as well as unanticipated contingencies. We seek to maintain a liquidity ratio (defined as liquid assets less short-term liabilities) of 10% or greater. At December 31, 2011, our liquidity ratio was 21.00%.

We regularly adjust our investments in liquid assets based upon our assessment of (1) expected loan demand, (2) expected deposit flows, (3) yields available on interest-earning deposits and securities, and (4) the objectives of our asset/liability management program. Excess liquid assets are invested generally in interest-earning deposits and short- and intermediate-term securities.

Our most liquid assets are cash and cash equivalents. The levels of these assets are dependent on our operating, financing, lending and investing activities during any given period. At December 31, 2011, cash and cash equivalents totaled \$61.5 million. Securities classified as available-for-sale and held-to-maturity, which provide additional sources of liquidity, totaled \$221.8 million and \$115.9 million, respectively, at December 31, 2011. In addition, at December 31, 2011, we had the ability to borrow a total of approximately \$224.0 million from the Federal Home Loan Bank of Boston. On that date, we had \$105.0 million in advances outstanding.

Our cash flows are derived from operating activities, investing activities and financing activities as reported in our Consolidated Statements of Cash Flows included in our Consolidated Financial Statements.

At December 31, 2011, we had \$32.7 million in loan commitments outstanding. In addition to commitments to originate loans, we had \$250.0 million in unused lines of credit to borrowers. Certificates of deposit due within one year of December 31, 2011 totaled \$228.2 million, or 18.6% of total deposits. If these deposits do not remain with us, we will be required to seek other sources of funds, including other certificates of deposit, Federal Home Loan Bank advances, borrowings from the Federal Reserve Bank, reverse repurchase agreements and brokered deposits. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before December 31, 2012. We believe, however, based on past experience, a significant portion of our certificates of deposit will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activities are the origination of loans and the purchase of securities. In 2011, we originated \$280.2 million of loans and purchased \$96.0 million of securities. In 2010, we originated \$246.5 million of loans and purchased \$140.2 million of securities.

Financing activities consist primarily of activity in deposit accounts and Federal Home Loan Bank advances. We experienced a net increase in total deposits of \$86.7 million and \$104.4 million for the years ended December 31, 2011 and 2010, respectively. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors and other factors.

Liquidity management is both a daily and long-term function of business management. If we require funds beyond our ability to generate them internally, borrowing agreements exist with the Federal Home Loan

Table of Contents

Bank of Boston, which provide an additional source of funds. Federal Home Loan Bank advances decreased \$46.9 million and \$54.9 million for the years ended December 31, 2011 and 2010, respectively, reflecting the use of cash flows received from the loan and investment portfolios to pay down maturing Federal Home Loan Bank advances. Federal Home Loan Bank advances have primarily been used to fund loan demand and to purchase securities. Our current asset/liability management strategy has been to match-fund certain longer-term commercial real estate loans and one- to four-family residential mortgage loans with Federal Home Loan Bank advances. United Bank's unused borrowing capacity with the Federal Home Loan Bank of Boston, excluding its available line of credit balance of \$12.0 million at December 31, 2011 and \$2.0 million at December 31, 2010, was approximately \$107.1 million at December 31, 2011 and \$219.9 million at December 31, 2010. At December 31, 2011 and 2010, United Bank had no borrowing against the line of credit. We also have access to funding through the repurchase agreement and brokered CD markets as well as the Federal Reserve Bank discount window. United Bank's unused borrowing capacity with the FRB was approximately \$79.9 million at December 31, 2011.

The Company is a separate legal entity from United Bank and must provide for its own liquidity. In addition to its operating expenses, United Financial is responsible for paying any dividends declared to its shareholders. The Company also has repurchased shares of its common stock. At December 31, 2011, the Company had liquid assets of \$5.2 million.

United Bank is subject to various regulatory capital requirements, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At December 31, 2011, United Bank exceeded all regulatory capital requirements. United Bank is considered well-capitalized under regulatory guidelines. See Item 1. Business Supervision and Regulation Federal Banking Regulation Capital Requirements and Note O of the Notes to the Consolidated Financial Statements.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Commitments. As a financial services provider, we routinely are a party to various financial instruments with off-balance-sheet risks, such as commitments to extend credit, standby letters of credit and unused lines of credit. While these contractual obligations represent our future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded to loans made by us. We consider commitments to extend credit in determining our allowance for loan losses. For additional information, see Note M, Commitments and Contingencies, to our Consolidated Financial Statements.

Contractual Obligations. In the ordinary course of our operations, we enter into certain contractual obligations. Such obligations include operating and capitalized leases for premises and equipment.

Table of Contents

The following table summarizes our significant fixed and determinable contractual obligations and other funding needs by payment date at December 31, 2011. The payment amounts represent those amounts due to the recipient and do not include any unamortized premiums or discounts or other similar carrying amount adjustments.

	Payments Due by Period (In Thousands)				
	Less Than One Year	One to Three Years	Three to Five Years	More than Five Years	Total
<u>Contractual Obligations:</u>					
Certificates of deposit	\$ 228,196	\$ 152,250	\$ 41,291	\$ -	\$ 421,737
Federal Home Loan Bank advances	9,697	54,500	17,787	23,000	104,984
Repurchase agreements	17,260	-	-	20,000	37,260
Subordinated debentures	-	-	-	7,732	7,732
Standby letters of credit	4,004	-	-	-	4,004

Total	\$ 317,732	\$ 1,022	\$ -	\$ -	\$ 318,754

Recent Accounting Pronouncements

In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-02, *Receivables (Topic 310), A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. This ASU provides additional guidance and clarification to help creditors in determining whether a creditor has granted a concession and whether a debtor is experiencing financial difficulties for purposes of determining whether a restructuring constitutes a troubled debt restructuring (TDR). This ASU is effective for the first interim or annual period beginning on or after June 15, 2011, with retrospective application to the beginning of the annual period of adoption. The measurement of impairment should be done prospectively in the period of adoption for loans that are newly identified as TDRs upon adoption of this ASU. This ASU was adopted in the second quarter of 2011 and did not have a significant impact on the Company's consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820), Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. The guidance clarifies and expands the disclosures pertaining to unobservable inputs used in Level 3 fair value measurements, including the disclosure of quantitative information related to (1) the valuation processes used, (2) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, and (3) use of a nonfinancial asset in a way that differs from the asset's highest and best use. The guidance also requires disclosure of the level within the fair value hierarchy for assets and liabilities not measured at fair value in the statement of financial position but for which the fair value is disclosed. The amendments in this Update are to be applied prospectively, effective during interim and annual periods beginning after December 15, 2011. Early application is not permitted. The Company does not expect this pronouncement to have a material effect on its consolidated financial statements.

Table of Contents

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income (Topic 220), *Presentation of Comprehensive Income*. This ASU amends the disclosure requirements for the presentation of comprehensive income. The amended guidance eliminates the option to present components of other comprehensive income (OCI) as part of the statement of changes in stockholder's equity. Under the amended guidance, all changes in OCI are to be presented either in a single continuous statement of comprehensive income or in two separate but consecutive financial statements. The changes are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early application is permitted. In December 2011, the FASB issued ASU 2011-12 to defer changes that relate to the presentation of reclassification adjustments but the other requirements of ASU 2011-05 remain in effect. There will be no impact to the consolidated financial results as the amendments relate only to changes in financial statement presentation.

In September 2011, the FASB issued ASU 2011-08, Intangibles—*Goodwill and Other* (Topic 350), Testing Goodwill for Impairment. This ASU is intended to reduce the complexity and cost of performing an evaluation of impairment of goodwill. Under the new guidance, an entity will have the option of first assessing qualitative factors (events and circumstances) to determine whether it is more likely than not (meaning a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying amount. If, after considering all relevant events and circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test will be unnecessary. The amendments will be effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption will be permitted. There will be no impact to the consolidated financial statements in connection with the adoption.

Impact of Inflation and Changing Prices

The consolidated financial statements and related notes of United Financial Bancorp, Inc. have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). GAAP generally requires the measurement of financial position and operating results in terms of historical dollars without consideration for changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of our operations. Unlike industrial companies, our assets and liabilities are primarily monetary in nature. As a result, changes in market interest rates have a greater impact on performance than the effects of inflation.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

United Financial Bancorp, Inc.

We have audited the accompanying consolidated balance sheet of United Financial Bancorp, Inc. and subsidiary (the Company) as of December 31, 2011, and the related consolidated statements of income, stockholders' equity and comprehensive income and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of United Financial Bancorp, Inc. and subsidiary as of December 31, 2011, and the results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), United Financial Bancorp, Inc. and subsidiary's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 12, 2012 expressed an unqualified opinion on the effectiveness of United Financial Bancorp, Inc.'s internal control over financial reporting.

Report of Independent Registered Public Accounting Firm on Financial Statements

To the Board of Directors of

United Financial Bancorp, Inc.

We have audited the accompanying consolidated balance sheet of United Financial Bancorp, Inc. and subsidiary as of December 31, 2010, and the related consolidated statements of income, stockholders' equity and comprehensive income, and cash flows for each of the two years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of United Financial Bancorp, Inc. and subsidiary as of December 31, 2010, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America.

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements include the accounts of United Financial Bancorp, Inc. and its wholly-owned subsidiary, United Bank (the "Bank"). UCB Securities, Inc. and UCB Securities, Inc. II are subsidiaries of the Bank and are engaged in buying, selling and holding of securities. UB Properties, LLC is a subsidiary of the Bank formed to hold real estate assets acquired through foreclosure. All significant intercompany accounts and transactions have been eliminated in consolidation. These entities are collectively referred to herein as the "Company".

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America ("U.S. GAAP") and general practices within the banking industry.

Use of Estimates

In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change are the determination of the allowance for loan losses, other than temporary impairment of securities, goodwill, fair value of financial instruments, and income taxes.

The following is a description of the Company's more significant accounting policies:

Cash and Cash Equivalents

The Company classifies cash and due from banks, interest-bearing deposits in other banks and overnight funds sold as cash and cash equivalents as these liquid assets have maturities at date of purchase of 90 days or less.

Investment Securities

Debt securities that management has the positive intent and ability to hold to maturity are classified as "held to maturity" and recorded at amortized cost. Securities not classified as held to maturity or trading, including equity securities with readily determinable fair values, are classified as "available for sale" and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income.

Table of Contents

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

Purchase premiums and discounts are recognized in interest income using the level yield method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Each reporting period, the Company evaluates all securities classified as available-for-sale or held-to-maturity, with a decline in fair value below the amortized cost of the investment to determine whether or not the impairment is deemed to be other-than-temporary (OTTI).

OTTI is required to be recognized (1) if the Company intends to sell the security; (2) if it is more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis; or (3) for debt securities, the present value of expected cash flows is not sufficient to recover the entire amortized cost basis. Marketable equity securities are evaluated for OTTI based on the severity and duration of the impairment and, if deemed to be other than temporary, the declines in fair value are reflected in earnings as realized losses. For impaired debt securities that the Company intends to sell, or more likely than not will be required to sell, the full amount of the depreciation is recognized as OTTI through earnings. For all other impaired debt securities, credit-related OTTI is recognized through earnings and non-credit related OTTI is recognized in other comprehensive income, net of applicable taxes.

Federal Home Loan Bank stock

The Company, as a member of the Federal Home Loan Bank of Boston (the FHLBB), is required to maintain an investment in capital stock of the FHLBB. Based on redemption provisions of the FHLBB, the stock has no quoted market value and is carried at cost. At its discretion, the FHLBB may declare dividends on the stock. Management reviews its investment in FHLBB stock for other than temporary impairment based upon an assessment of the ultimate recoverability of the par value. Based upon the most recent review, management concluded that no other than temporary impairment charge was necessary as of December 31, 2011.

Significant Group Concentrations of Credit Risk

A substantial portion of the Company's loans are secured by real estate in Hampden, Hampshire and Worcester Counties of Massachusetts. Accordingly, the ultimate collectability of the Company's loan portfolio is susceptible to

changing conditions in these market areas. Note D discusses the types of lending that the Company engages in. The Company does not have any significant concentrations in any one industry or customer.

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

Loans

The Company's loan portfolio includes commercial and consumer segments. The Commercial loan segment includes classes for Commercial & Industrial loans (C&I), Commercial Real Estate, and Construction. The Consumer loan segment includes classes for Residential Real Estate, Home Equity, and Consumer (including automobile, manufactured home, and other personal loans).

Loans are stated at their unpaid principal balance net of unearned loan fees and costs and the allowance for loan losses.

Interest on most loans is included in income as earned based upon interest rates applied to unpaid principal using the simple interest method. Accrual of interest on loans is discontinued when in the judgment of management the collectibility of principal or interest becomes doubtful or when a loan becomes contractually past due 90 days with respect to principal or interest. Past due status is based on the contractual terms of the loan. The accrual of interest on residential mortgage loans, however, may continue even though they are 90 days past due if management deems it appropriate, provided that the loans are well secured and in the process of collection. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

When a loan is placed on nonaccrual status, all interest previously accrued is reversed against current period interest income. Interest subsequently received on nonaccrual loans is either applied against principal or recorded as income based on management's judgment as to the collectibility of principal. Interest accruals are resumed on such loans only when they are brought fully current as to principal and interest and when, in the judgment of management, the loans are estimated to be fully collectible.

Loan origination and commitment fees and certain direct loan origination costs are deferred and the net amount is amortized over the contractual term of the loan as an adjustment of yield. In addition, discounts related to fair value adjustments for loan receivables acquired in a business combination or asset purchase are accreted into earnings over the contractual term as an adjustment of yield. If acquired loans experience credit quality deterioration after acquisition, the Company evaluates the difference between the contractually required payments at acquisition and the cash flows expected to be collected. Changes in the expected cash flows from the date of acquisition will impact the

accretable yield and may also result in a charge to the provision for loan losses to the extent the cash flow shortfall is greater than the nonaccretable difference.

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The adequacy of the allowance for loan losses is evaluated on a quarterly basis by management. Factors considered in evaluating the adequacy of the allowance include prior loss experience, current economic conditions and their effect on borrowers, the composition and size of the loan portfolio, trends in nonperforming loans, classified assets, and delinquency rates and the performance of individual loans in relation to contractual terms. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on judgments different from those of management.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

The Company periodically may agree to modify the contractual terms of loans. When a loan is modified and a concession is made to a borrower experiencing financial difficulty, the modification is considered a troubled debt restructure (TDR). This usually includes a modification of loan terms, such as a reduction of the interest rate to below market terms, capitalizing past due interest or extending the maturity date or a partial forgiveness of debt.

Restructured loans are returned to accrual status after the borrower demonstrates the ability to pay under the restructured terms through a sustained period of repayment performance, which is generally six months. All TDRs are initially classified as impaired.

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

The allowance consists of a specific and a general component, as further described below.

Specific component

The specific component relates to loans that are classified as impaired. A specific allowance is established when the discounted cash flows (or collateral value) of the impaired loan is lower than the carrying value of the loan. Groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual loans in the Consumer segment (residential real estate, home equity and consumer loans) for impairment disclosures, unless such loans are subject to a troubled debt restructuring agreement.

General component

The general component is based on historical loss experience adjusted for qualitative factors stratified by each of the loan classes: C&I, commercial real estate, construction, residential real estate, home equity and consumer. Management uses an average of historical losses based on a time frame appropriate to capture relevant loss data for each loan class. This historical loss factor for each loan class is adjusted for the following qualitative factors: the levels/trends in delinquencies and nonaccruals; levels and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of changes in risk selection and underwriting standards and other changes in lending policies, procedures and practices; experience, ability and depth of lending management and staff; national and local economic trends and conditions; industry conditions; and effects of changes in credit concentrations. This analysis establishes factors that are applied to each loan class to determine the amount of the general component of the allowance for loan losses.

The qualitative factors are determined based on the various risk characteristics of each loan class. Relevant risk characteristics are as follows:

Commercial and industrial loans Loans in this class are made to businesses. Generally these loans are secured by assets of the business and repayment is expected from the cash flows of the business. A weakened economy, and resultant decreased consumer and/or business spending, may have an effect on the credit quality in this loan class.

Commercial real estate Loans in this class include income-producing investment properties and owner-occupied real estate used for business purposes. The underlying properties are generally located in our primary market area. The cash flows of the income-producing investment properties may be adversely impacted by a downturn in the economy as vacancy

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

rates may increase, which in turn, will have an effect on credit quality. Generally management obtains annual financial information for borrowers with loans in excess of \$250 in this class. In the case of owner-occupied real estate used for business purposes a weakened economy and resultant decreased consumer and/or business spending may have an adverse effect on credit quality.

Construction loans Loans in this class primarily include land loans to local individuals, contractors and developers for developing the land for sale or for making improvements thereon. Repayment is derived from sale of the lots/units including any pre-sold units. Credit risk is affected by market conditions, time to sell at an adequate price and cost overruns. To a lesser extent this class includes commercial development projects we finance which in most cases have an interest-only phase during construction and then convert to permanent financing. Credit risk is affected by cost overruns, market conditions and the availability of permanent financing, to the extent such permanent financing is not being provided by us.

Residential real estate Loans in this class are made to and secured by one- to four-family owner-occupied residential real estate and repayment is dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, may have an effect on the credit quality in this loan class. The Company generally does not originate loans with a loan-to-value ratio greater than 80 percent and does not grant subprime loans.

Consumer loans Loans in this class may be either secured or unsecured and repayment is dependent on the credit quality of the individual borrower and, if applicable, sale of the collateral securing the loan (such as automobile, mobile home). Therefore the overall health of the economy, including unemployment rates and housing prices, may have an effect on the credit quality in this loan class.

Loans acquired with evidence of credit quality deterioration since origination and for which it is probable at purchase that the Company will be unable to collect all contractually required payments are accounted for as required by and in accordance with the Receivables Topic of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC), Loans and Debt Securities Acquired with Deteriorating Credit Quality (ASC 310). Evidence of credit quality deterioration as of the purchase date may include statistics such as past due status, refreshed borrower credit scores and refreshed loan-to-value (LTV), some of which are not immediately available as of the purchase date.

The Company continues to evaluate this information and other credit-related information as it becomes available.
ASC 310 addresses accounting for differences between contractual cash flows and cash flows

F-13

Table of Contents

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

expected to be collected from the Company's initial investment in loans if those differences are attributable, at least in part, to credit quality.

The initial fair values for loans within the scope of ASC 310 are determined by discounting both principal and interest cash flows expected to be collected using an observable discount rate for similar instruments with adjustments that management believes a market participant would consider in determining fair value. The Company estimates the cash flows expected to be collected at acquisition using internal credit risk, interest rate and prepayment risk models that incorporate management's best estimate of current key assumptions, such as default rates, loss severity and payment speeds.

Goodwill

Goodwill is measured as the excess of the cost of a business acquisition over the sum of the amounts assigned to identifiable tangible and intangible assets acquired less liabilities assumed. Goodwill is not amortized but is reviewed for impairment annually as of the end of November or more frequently if circumstances warrant. The goodwill impairment analysis is a two-step test.

The first step (Step 1) is used to identify potential impairment, and involves comparing the reporting unit's (the consolidated Company, in our case) estimated fair value to its carrying amount, including goodwill. If the estimated fair value of the reporting unit exceeds its carrying amount, goodwill is not deemed to be impaired. Should the carrying amount of the reporting unit exceed its estimated fair value, an indicator of impairment is deemed to exist and a second step is performed to measure the amount of such impairment, if any. The second step (Step 2) involves calculating the implied fair value of goodwill. The implied fair value of goodwill is determined in a manner similar to how the amount of goodwill is determined in a business combination (i.e. by measuring the excess of the estimated fair value, as determined in Step 1, over the aggregate estimated fair values of the individual assets, liabilities, and identifiable intangibles as of the impairment testing date). If the implied fair value of goodwill exceeds the carrying amount of goodwill assigned to the reporting unit, no impairment exists. If the carrying amount of goodwill exceeds the implied fair value of the goodwill, an impairment loss is recorded in an amount equal to such excess. An impairment loss cannot exceed the carrying amount of goodwill, and the loss (write-down) establishes a new carrying amount for the goodwill. Subsequent reversal of goodwill impairment losses is not permitted. Application of the

goodwill impairment test requires significant judgments including estimation of future cash flows, which are dependent on internal forecasts, estimation of the long-term rate of growth, the period over which cash flows will occur, and determination of our cost of capital. Changes in these estimates and assumptions could materially affect the

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

determination of fair value and/or conclusions related to goodwill impairment. For the year ended December 31, 2011, the Company had no goodwill impairment.

Business Segments

As a community oriented financial institution, substantially all of the Company's operations involve the delivery of loan and deposit products to customers. Management makes operating decisions and assesses performance based on an ongoing review of these community-banking operations, which constitutes the Company's only operating segment for financial reporting purposes.

Bank-owned Life Insurance

Bank-owned life insurance policies are reflected on the consolidated balance sheet at cash surrender value net of any deferred fees or loans. Changes in the net cash surrender value of the policies, as well as insurance proceeds received, are reflected in non-interest income on the consolidated statements of income and are not subject to income taxes.

Off-balance Sheet Financial Instruments

In the ordinary course of business, the Company enters into off-balance sheet financial instruments, consisting primarily of credit related financial instruments. These financial instruments are recorded in the consolidated financial statements when they are funded or related fees are incurred or received.

Earnings Per Share

Basic earnings per share have been calculated by dividing net income by weighted average shares outstanding before any dilution and adjusted to exclude the weighted average number of unallocated shares held by the United Bank Employee Stock Ownership Plan (the "ESOP"). Diluted earnings per share have been calculated by dividing net income by weighted average shares outstanding after giving effect to the potential dilution that could occur if potential common shares were converted into common stock using the treasury stock method.

Other Real Estate Owned

Other real estate owned (OREO) is comprised of properties acquired through foreclosure proceedings or acceptance of a deed in lieu of foreclosure. OREO is held for sale and is initially recorded at fair value, less cost to sell, at the date of foreclosure, establishing a new cost basis. Losses arising from the acquisition of such properties are charged against the

F-15

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

allowance for loan losses. Operating expenses are charged to current period operations as incurred. Gains and losses upon disposition are reflected in income as realized.

Foreclosed assets held for sale are recorded at the lower of fair value less estimated costs to sell or cost. Subsequent changes in the fair value of the foreclosed assets are reflected through a valuation allowance.

Premises and Equipment

Land is carried at cost. Buildings and equipment are stated at cost less accumulated depreciation. Depreciation is computed for financial reporting purposes on the straight-line method over the estimated useful life of each type of asset. Leasehold improvements are amortized on the straight-line method over the shorter of the lease term, including consideration of renewal options, or the estimated useful life of the asset. The cost of maintenance and repairs is charged against income as incurred. The Company reviews for possible impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Transfers of Financial Assets

Transfers of an entire financial asset, a group of entire financial assets, or a participating interest in an entire financial asset are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets.

During the normal course of business, the Company may transfer a portion of a financial asset, for example, a participation loan or the government guaranteed portion of a loan. In order to be eligible for sales treatment, the transfer of the portion of the loan must meet the criteria of a participating interest. If it does not meet the criteria of a participating interest, the transfer must be accounted for as a secured borrowing. In order to meet the criteria for a participating interest, all cash flows from the loan must be divided proportionately, the rights of each loan holder must have the same priority, the loan holders must have no recourse to the transferor other than standard representations and warranties and no loan holder has the right to pledge or exchange the entire loan. At December 31, 2011, there

was one transfer of a financial asset that was accounted for as a secured borrowing in the amount of \$440.

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

Securities Sold Under Agreements to Repurchase

The Company accounts for securities sold under agreements to repurchase as secured borrowings as the Company maintains effective control over the transferred assets. Securities sold under agreements to repurchase are reflected at the amount of cash received in connection with the transaction. The Company may be required to provide additional collateral based on the fair value of the underlying securities.

Retirement Benefits

The Company has established a defined contribution plan for eligible employees. The Company matches employee contributions up to 5% of an employee's qualified compensation.

In 2007, the Company established an unfunded Supplemental Executive Retirement Plan (SERP) for certain employees that provides benefits that cannot be paid from a qualified retirement plan due to Internal Revenue Code restrictions. This plan is nonqualified under the Internal Revenue Code and assets used to fund benefit payments are not segregated from other assets of the Company; therefore, in general, a participant's or beneficiary's claim to benefits under these plans is as a general creditor.

The Company recognizes the plan's under-funded status as a liability with an offsetting adjustment to Accumulated Other Comprehensive Income (AOCI). Actuarial gains and losses and prior service costs or credits are recognized as a component of AOCI.

Income Taxes

The Company recognizes income taxes under the asset and liability method. Under this method, deferred tax assets and liabilities are established for the tax consequences attributable to the temporary differences between the financial statement carrying amount and the tax bases of the Company's assets and liabilities and certain tax carryforwards at enacted tax rates.

The provision for deferred income taxes is the result of changes in deferred tax assets and liabilities. A valuation allowance is recorded against deferred tax assets when management deems a portion of the asset to be more likely than not unrealizable. The Company's valuation allowance is reviewed and adjustments are made to the valuation allowance based on management's judgments relating to the realizability of the deferred tax asset. It is management's belief that it is more likely than not that the reversal of deferred tax liabilities and results of future operations will generate sufficient taxable income to realize the deferred tax assets. Therefore, no valuation allowance was necessary at December 31, 2011 or 2010 for deferred tax assets.

F-17

Table of Contents

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

The Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate resolution. The Company reports interest and penalties associated with tax obligations in other non-interest expense. The Company does not have any uncertain tax positions at December 31, 2011 and 2010 which require accrual or disclosure.

The Company recognized interest and penalties in the amount of \$0, \$0 and \$40 for the years ended December 31, 2011, 2010 and 2009, respectively.

The Company's income tax returns are subject to review and examination by federal and state taxing authorities. The Company is currently open to audit under the applicable statutes of limitations by the Internal Revenue Service for the years ended December 31, 2008 through 2011. The years open to examination by state taxing authorities vary by jurisdiction; no years prior to 2008 are open.

Stock Compensation Plan

Share-based compensation costs are based on the grant date fair value and these costs are recognized over the requisite vesting period. For all of our stock option grants, the fair value of each grant was estimated at the date of grant using the Black-Scholes option pricing model. Black-Scholes utilizes assumptions related to volatility, the risk-free interest rate, the dividend yield and employee exercise behavior. Expected volatilities utilized in the model are based on the historic volatility of the Company's stock price. The risk free interest rate is derived from the U.S. Treasury Yield curve in effect at the time of the grant. The model incorporates exercise and post-vesting forfeiture assumptions based on an analysis of historical data.

Employee Stock Ownership Plan

Compensation expense for the ESOP is recorded at an amount equal to the shares allocated by the ESOP multiplied by the average fair market value of the shares during the period. The Company recognizes compensation expense ratably over the year based upon the Company's estimate of the number of shares expected to be allocated by the ESOP.

Unearned compensation applicable to the ESOP is reflected as a reduction of stockholders' equity in the consolidated balance sheet. The difference between the average fair market value and the cost of the shares allocated by the ESOP is recorded as an adjustment to additional paid-in capital. Cash dividends received on shares held in suspense are applied to the scheduled annual debt payment.

Recent Accounting Pronouncements

In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-02, Receivables (Topic 310), *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. This ASU provides additional guidance and clarification to help creditors in determining whether a

creditor has granted a concession and whether a debtor is experiencing financial difficulties for purposes of determining whether a restructuring constitutes a troubled debt restructuring (TDR). This ASU is effective for the first interim or annual period beginning on or after June 15, 2011, with retrospective application to the beginning of the annual period of adoption. The measurement of impairment should be done prospectively in the period of adoption for loans that are newly identified as TDRs upon adoption of this ASU. This ASU was adopted in the second quarter of 2011 and did not have a significant impact on the Company s consolidated financial statements.

Table of Contents

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Concluded

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820), Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. The guidance clarifies and expands the disclosures pertaining to unobservable inputs used in Level 3 fair value measurements, including the disclosure of quantitative information related to (1) the valuation processes used, (2) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, and (3) use of a nonfinancial asset in a way that differs from the asset's highest and best use. The guidance also requires disclosure of the level within the fair value hierarchy for assets and liabilities not measured at fair value in the statement of financial position but for which the fair value is disclosed. The amendments in this Update are to be applied prospectively, effective during interim and annual periods beginning after December 15, 2011. Early application is not permitted. The Company does not expect this pronouncement to have a material effect on its consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220), Presentation of Comprehensive Income*. This ASU amends the disclosure requirements for the presentation of comprehensive income. The amended guidance eliminates the option to present components of other comprehensive income (OCI) as part of the statement of changes in stockholder's equity. Under the amended guidance, all changes in OCI are to be presented either in a single continuous statement of comprehensive income or in two separate but consecutive financial statements. The changes are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early application is permitted. In December 2011, the FASB issued ASU 2011-12 to defer changes that relate to the presentation of reclassification adjustments but the other requirements of ASU 2011-05 remain in effect. There will be no impact to the consolidated financial results as the amendments relate only to changes in financial statement presentation.

In September 2011, the FASB issued ASU 2011-08, *Intangibles—Goodwill and Other (Topic 350), Testing Goodwill for Impairment*. This ASU is intended to reduce the complexity and cost of performing an evaluation of impairment of goodwill. Under the new guidance, an entity will have the option of first assessing qualitative factors (events and circumstances) to determine whether it is more likely than not (meaning a likelihood of more than 50 percent) that the fair value of a reporting unit is less than its carrying amount. If, after considering all relevant events and circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test will be unnecessary. The amendments will be effective

for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption will be permitted. There will be no impact to the consolidated financial statements in connection with the adoption.

Total	\$ 132,475	\$ 1,002	\$ (1,451)	\$ 132,026

The Company's portfolio of mortgage-backed securities, which represent interests in pools of residential mortgage loans, consists of securities issued by the Federal Home Loan Mortgage Corporation (Freddie Mac), the Federal National Mortgage Association (Fannie Mae), and the Government National Mortgage Association (Ginnie Mae), all of which are federal government owned or sponsored agencies.

As of December 31, 2011, the Bank has pledged securities with an amortized cost of \$119,025 and a fair value of \$125,767 to secure municipal deposits, reverse repurchase agreements, treasury, tax and loan deposits at the Federal Reserve Bank of Boston and customers' repurchase agreements. Additionally, there is a blanket lien on certain securities to collateralize borrowings from the FHLBB, as discussed further in Note G.

NOTE C INVESTMENT SECURITIES Concluded

comprehensive income. Management based its assessment on the issuers' credit ratings, credit outlook, payment status and financial condition, the length of time the bonds have been in a loss position, the size of the loss position and other meaningful information.

In its evaluation, management considered the types of securities, including if the securities were U.S. Government issued, the credit rating on the securities, credit outlook, payment status and financial condition, the length of time the bond has been in a loss position, the size of the loss position, our intent and ability to hold the securities to expected recovery of value and other meaningful information. The Company does not intend to sell any debt securities and is unlikely to be required to sell any security before its maturity or market price recovery.

Realized gains and losses and the proceeds from sales of securities available for sale are as follows for the years ended December 31:

	2011	2010	2009
Proceeds from sales/calls	\$ 2,500	\$ 11,586	\$ 31,808
Gross gains	1	88	556
Gross losses	-	(273)	(13)

The scheduled maturities of debt securities held to maturity and available for sale at December 31, 2011, are shown below. Actual maturities will differ from contractual maturities because issuers generally have the right to call or prepay obligations with or without call or prepayment penalties.

	At December 31, 2011			
	Securities Available for Sale		Securities Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ -	\$ -	\$ 520	\$ 525
Due from one year to five years	285	298	498	527

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

Due from five years to ten years	5,015	5,411	1,356	1,481
Due after ten years	4,099	4,433	23,405	23,662
	\$ 9,399	\$ 10,142	\$ 25,779	\$ 26,195
Mortgage-backed securities	200,573	211,671	90,118	92,116
	\$ 209,972	\$ 221,813	\$ 115,897	\$ 118,311

Maturities are based on the final contractual payment dates, and do not reflect the impact of potential prepayments or early redemptions. Such securities have been classified within the category that represents the final maturity date.

Commercial and industrial	176,086	165,335
Automobile	7,843	11,051
Consumer	7,142	8,167
Total loans	1,121,879	1,074,111
Net deferred loan costs and fees	2,194	2,073
Allowance for loan losses	(11,132)	(9,987)
Loans, net	\$ 1,112,941	\$ 1,066,197

The Company's lending activities are conducted principally in Hampden, Hampshire and Worcester counties of Massachusetts. The Company grants single family and multi-family residential loans, commercial real estate loans, commercial loans, and a variety of consumer loans. In addition, the Company grants loans for the construction of residential homes, multi-family properties and commercial real estate properties. Most loans granted by the Company are collateralized by real estate. The Company also from time-to-time purchases commercial loans secured by real estate. The ability and willingness of the single family residential, commercial and consumer borrowers to honor their repayment commitments is generally dependent on the level of overall economic activity within the borrowers geographic areas and real estate values. The ability and willingness of commercial real estate and construction loan borrowers to honor their repayment commitments is generally dependent on the health of the real estate economic sector in the borrowers geographic areas and the general economy.

The Company has transferred a portion of its originated commercial real estate and commercial and industrial loans to participating lenders. The amounts transferred have been accounted for as sales and are therefore not included in the Company's accompanying consolidated balance sheets. The Company and participating lenders share ratably in any gains or losses that may result from a borrower's lack of compliance with contractual terms of the loan. The Company

continues to service the loans on behalf of the participating lenders and, as such, collects cash payments from the borrowers, remits payments (net of servicing fees) to participating lenders and disburses required escrow funds to relevant parties. At December 31, 2011 and 2010, the Company was servicing loans for participants aggregating \$43,780 and \$44,444, respectively.

NOTE D LOANS, NET Continued

Certain officers and directors of the Company and certain corporations and individuals related to such persons, incurred indebtedness, in the form of loans, as customers. These loans were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time or comparable transactions with other customers and did not involve more than the normal risk of collectibility.

The following table summarizes the Company's lending activity with its directors and executive officers all of which was conducted with terms consistent with those offered to unrelated parties:

	December 31,	
	2011	2010
Beginning balance	\$ 1,737	\$ 1,571
New loans	1,076	576
Repayments	(583)	(410)
Ending balance	\$ 2,230	\$ 1,737

In 2011, the Company recognized proceeds of \$11,488 from sales of residential mortgage loans originated for the purpose of reselling them in the secondary market. In 2010, the Company recognized proceeds of \$17,906 from sales of residential mortgage loans originated for the purpose of reselling them in the secondary market and \$9,725 from sales of residential mortgage loans held in its portfolio. Loans serviced by the Company for others totaled \$68,270 and \$69,006 at December 31, 2011 and 2010, respectively. The balances of mortgage servicing rights related to such loans were insignificant at December 31, 2011 and 2010.

A summary of changes in the allowance for loan losses for the years ended December 31 follows:

	2011	2010	2009
Balance at beginning of year	\$ 9,987	\$ 9,180	\$ 8,250

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

Provision for loan losses	3,242	2,285	2,998
Charge-offs	(2,392)	(1,637)	(2,163)
Recoveries	295	159	95
Balance at end of year	\$ 11,132	\$ 9,987	\$ 9,180 ⁽¹⁾

(1) In accordance with FASB ASC 805 Business Combinations the Company recorded loans acquired from CNB Financial at fair value and as such no allowance for loan losses for these loans existed as of the acquisition date of November 30, 2009.

NOTE D LOANS, NET Continued

The following table represents modifications that were deemed to be troubled debt restructures for the year ended December 31, 2011:

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
<u>Troubled Debt Restructurings</u>			
Commercial:			
Commercial and industrial	1	\$ 863	\$ 863
Commercial real estate	1	248	263
Commercial and residential construction	-	-	-
Consumer:			
Residential real estate	-	-	-
Home equity	-	-	-
Consumer	-	-	-
Total	2	\$ 1,111	\$ 1,126

The modification on the commercial and industrial loan provided a twenty month principal moratorium. The modification to the commercial real estate loan provided additional funds to sustain operations. Management performs a discounted cash flow calculation to determine the amount of impaired reserve required on each of the troubled debt restructures. Any reserve required is recorded through the provision for loan losses.

The following is a summary of troubled debt restructurings that have subsequently defaulted within one year of modification:

	Number of Contracts	Recorded Investment
<u>Troubled Debt Restructurings That Subsequently Defaulted</u>		

Commercial:

Commercial and industrial	-	\$	-
Commercial real estate	1		860
Commercial and residential construction	1		872

Consumer:

Residential real estate	-		-
Home equity	-		-

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE D LOANS, NET Continued

The defaults on the commercial real estate and commercial construction troubled debt restructures were the result of the borrower's delinquent loan payment. As of December 31, 2011 the commercial real estate loan was current and accruing interest, and the commercial and residential construction was current and on non-accrual. The Company evaluates the levels/trends in delinquencies and non-accruals as part of the qualitative factors within the allowance for loan loss framework.

CREDIT QUALITY INFORMATION

The Company utilizes a nine grade risk rating system for commercial and industrial, commercial real estate and construction loans as follows:

Pass: Loans in these five categories are considered low to average risk.

Special Mention: Loans in this category portray one or more weaknesses that may be tolerated in the short run. Assets in this category are currently protected but are potentially weak and are being closely monitored by management.

Substandard: Loans in this category are considered inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged. There is a distinct possibility that the Company will sustain some loss if the weakness is not corrected.

Doubtful: Loans in this category have all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses make the collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, however, its classification as an estimated loss is deferred until a more exact determination of the extent of the loss is ascertained.

Loss: Loans in this category are considered uncollectible and of such little value that their continuance as loans is not warranted.

The Company does not assign risk ratings to residential real estate, home equity and mobile home consumer loans unless they are contractually past due 90 days or more or where legal action has commenced against the borrower. All

other consumer loans are charged off when they become contractually past due 120 days. Those loans not assigned a rating are considered pass .

On an annual basis, or more often if needed, the Company formally reviews the ratings on all commercial and industrial, commercial real estate and construction loans. Semi-annually, the

NOTE D LOANS, NET Continued

The following is a summary of acquired impaired loan information for CNB Financial as of December 31, 2011:

	Contractual Required Payments Receivable	Cash Expected To Be Collected (1)	Non- Accretable Difference	Accretable Yield	Loans Receivable
Balance at acquisition date of November 30, 2009	\$ 5,178	\$ 3,079	\$ 2,099	\$ 13	\$ 3,066
Recognition of additional non-accretable yield	-	(250) ⁽²⁾	250	-	-
Balance as of December 31, 2009	5,178	2,829	2,349	13	2,816
2010 Collections	(3,645)	(2,264)	(1,381)	(13)	(2,251)
Transfer to OREO	(393)	(393) ⁽³⁾	-	-	(393)
Accretable yield recognized in earnings	-	-	-	(348) ⁽⁴⁾	-
Balance as of December 31, 2010	1,140	172	968	-	172
2011 Collections	(37)	(37)	-	-	(37)
Impairment	-	(135) ⁽⁵⁾	-	-	(135)
Transfer to accretable yield	-	-	(100)	100	-
Accretable yield recognized in earnings	-	-	-	(100)	-
Disposition	(1,103)	-	(868)	-	-
Balance as of December 31, 2011	\$ -	\$ -	\$ -	\$ -	\$ -

(1) The Company has not factored any prepayments into the expected cash flows.

(2) During the third quarter of 2010, the Company increased its non-accretable difference, with a corresponding increase to goodwill, by \$250,000, based upon information obtained in the third quarter about conditions existing at the acquisition date.

Edgar Filing: United Financial Bancorp, Inc. - Form 10-K

(3) The reduction in the carrying amount and the cash expected to be collected was due to one loan that was foreclosed upon and transferred to OREO. Prior to acquisition of CNB, a portion of this loan was charged off in order to adjust the loan to its fair value; therefore, there was no non-accretable difference recorded against this loan on the acquisition date.

(4) The transfer from non-accretable yield was due to repayment received in excess of cash expected to be collected, net of selling costs.

(5) Amount represents a full reserve against the remaining net book value of the loan due to uncollectibility.

The excess of cash flows expected at acquisition over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loans. The difference between contractually required payments at acquisition and the cash flows expected to be collected at acquisition is referred to as the non-accretable difference. Changes in the expected cash flows from the date of acquisition will either impact the accretable yield or result in a charge to the provision for credit losses. Subsequent decreases to expected

(Dollars in thousands, except per share amounts)

NOTE D LOANS, NET Concluded

principal cash flows will result in a charge to the provision for credit losses and a corresponding increase to the allowance for loan losses. Subsequent increases in expected principal cash flows will result in recovery of any previously recorded allowance for loan losses, to the extent applicable, and a reclassification from non-accretable difference to accretable yield for any remaining increase. All changes in expected interest cash flows will result in reclassifications to/from non-accretable differences. Disposition represents the reduction of the remaining contractual required payments receivable and non-accretable yield due to uncollectibility.

Acquired loans that are modified subsequent to acquisition are reviewed to compare modified contractual cash flows to the carrying value. If modified cash flows are lower than the carrying value, the loan is removed from the acquired loans pool at its carrying value, as well as the related allowance for loan losses, and is classified as a troubled debt restructure. At December 31, 2011, the Company had one acquired loan that was a troubled debt restructure.

NOTE E BANKING PREMISES AND EQUIPMENT

The composition of banking premises and equipment is as follows at December 31:

	2011	2010	Estimated Useful Lives
Land and improvements	\$ 2,427	\$ 2,426	
Buildings and improvements	10,237	8,857	25 - 40 Years
Leasehold improvements	1,798	1,394	Lesser of useful life or term of lease
Furniture and equipment	4,630	3,141	3 - 10 Years
Assets under capitalized leases	5,359	5,359	Lesser of lease term or useful life
	24,451	21,177	
Less accumulated depreciation and amortization	(8,013)	(5,612)	
	\$ 16,438	\$ 15,565	

Depreciation and amortization expense, including amortization for capitalized leases, totaled \$1,320, \$1,504 and \$1,119 for the years ended December 31, 2011, 2010 and 2009, respectively.

The Company leases fifteen of its branches, two ATM facilities and two financial services offices (all operating leases). Rent expense for the years ended December 31, 2011, 2010 and 2009 amounted to \$1,302, \$1,334 and \$757, respectively. The leases, which are non-cancelable, expire at various dates through 2034. The Company also entered into a capital lease obligation for three of its branches.

Certificates of deposit	8,633	9,848	10,617
Total	\$ 12,449	\$ 13,847	\$ 14,295

NOTE G SHORT-TERM BORROWINGS**Federal Home Loan Bank of Boston Advances**

There were no FHLBB advances with an original maturity of less than one year at December 31, 2011 and 2010. The Company has an available line of credit with the FHLBB at an interest rate that adjusts daily. There were no borrowings against the line of credit at December 31, 2011 and 2010. All borrowings from the FHLBB are secured by a blanket security agreement on qualified collateral, principally mortgage loans and U.S. Government and federal agency securities in an aggregate amount equal to outstanding advances. The Company's unused borrowing capacity with the FHLBB, excluding its available line of credit balance of \$12,000 at December 31, 2011 was approximately \$107,058.

Repurchase Agreements

Securities sold under agreements to repurchase include funds borrowed from customers on an overnight basis. These customer repurchase agreements amounted to \$17,260 and \$21,029 at December 31, 2011 and 2010, respectively, at weighted average rates of 0.57% and 0.84%, respectively. Interest expense for 2011, 2010 and 2009 was \$121, \$185, and \$122, respectively. All of the repurchase agreements are secured by government-sponsored and government-guaranteed mortgage-backed securities.

(Dollars in thousands, except per share amounts)

NOTE H LONG-TERM DEBT**Federal Home Loan Bank of Boston Advances**

Advances outstanding (together with year of maturity) at December 31, 2011 and 2010 consisted of the following:

	2011		2010	
	Amount (1)	Weighted Average Rate	Amount (1)	Weighted Average Rate
2011	\$ -	-	50,341	4.07%
2012	9,697	4.24%	11,902	4.26%
2013	41,500	4.04%	43,025	4.04%
2014	13,000	2.90%	13,000	2.90%
2015	7,655	3.42%	9,767	3.41%
2016	10,132	1.55%	247	6.65%
Thereafter	23,000	4.24%	23,000	4.24%
	\$ 104,984	3.68%	\$ 151,282	3.96%

(1) Excludes the fair value adjustment of \$1,433 and \$2,025 at December 2011 and 2010, respectively, recorded in connection with the acquisition of CNB Financial.

At December 31, 2011, advances in the amount of \$43,000 are callable at the option of the FHLBB at various dates through 2013.

At December 31, 2011, the Company had a secured borrowing in the amount of \$440.

Reverse Repurchase Agreements

The Company secured two structured term reverse repurchase agreements for \$10,000 through another financial institution in 2008 and 2009. The reverse repurchase agreement entered into in 2008 for \$10,000 matures in 2018, was callable in 2011 and has a rate of 2.73%. The reverse repurchase agreement entered into in 2009 for \$10,000 matures in 2019, is callable in 2014 and has a rate of 2.44%. Interest expense for 2011, 2010 and 2009 was \$538, \$517 and \$512, respectively. All of the repurchase agreements are secured by government-sponsored and

government-guaranteed mortgage-backed securities.

Subordinated Debentures

The Company has outstanding subordinated debt in the form of trust preferred securities issued through a private placement offering in the face amount of \$7,732. The Company recorded a fair value acquisition discount of \$2,383 in connection with the acquisition of CNB

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE I INCOME TAXES Concluded

A summary of the change in the net deferred tax asset is as follows:

	At December 31,	
	2011	2010
Balance at beginning of year	\$ 11,029	\$ 11,295
Provision (benefit) for prepaid taxes	4,199	(672)
Tax effect of changes in accumulated other comprehensive income	(1,222)	406
Balance at end of year	\$ 14,006	\$ 11,029

The Bank's base year reserve for loan losses (as of December 31, 1995) will not be recaptured unless the reserve is used for purposes other than for loan losses, such as in a distribution in liquidation or otherwise. Accordingly, the Bank has not recorded a deferred tax liability of approximately \$1,043 relating to approximately \$2,600 of cumulative tax deductions related to loans generated prior to December 31, 1995.

NOTE J EARNINGS PER SHARE

The calculation of basic earnings per common share and diluted earnings per common share for the years ended December 31, 2011, 2010 and 2009 is presented below.

	Years Ended December 31,		
	2011	2010	2009
Net income	\$ 11,184	\$ 10,032	\$ 5,806
Weighted average common shares applicable to basic EPS (1)	14,929,714	15,302,505	15,265,192
Effect of dilutive potential common shares (2) (3)	268,988	92,256	8,183
Weighted average common shares applicable to diluted EPS	15,198,702	15,394,761	15,273,375

Earnings per share:				
Basic	\$	0.75	\$	0.66
Diluted	\$	0.74	\$	0.65
			\$	0.38

- (1) Share-based compensation awards that qualify as participating securities (entitled to receive non-forfeitable dividends) are included in basic EPS using the two-class method.
- (2) For the years ended December 31, 2011, 2010 and 2009, options to purchase 233,390, 1,405,286 and 1,604,850 shares, respectively, were not included in the computation of diluted earnings per share because they were antidilutive, meaning the exercise price of such options exceeded the market value of the Company's common stock.
- (3) Includes incremental shares related to dilutive stock options.

NOTE K STOCK-BASED INCENTIVE PLANS

The Company's 2008 Equity Incentive Plan (the "2008 Incentive Plan") was approved by the shareholders at the Company's Annual Meeting held in June 2008. The 2008 Incentive Plan will remain in effect for a period of ten years and authorizes the issuance of up to 1,258,534 shares of Company common stock pursuant to grants of restricted stock awards, restricted stock unit awards, incentive stock options, non-statutory stock options and stock appreciation rights; provided, however, that no more than 898,953 shares may be issued or delivered in the aggregate pursuant to the exercise of stock options or stock appreciation rights, and no more than 359,581 shares may be issued or delivered pursuant to restricted stock awards or restricted stock unit awards.

Employees and outside directors of the Company are eligible to receive awards under the 2008 Incentive Plan. The holders of restricted stock awards also have full voting rights beginning on the grant date. Upon the occurrence of an event constituting a change in control of the Company, as defined in the 2008 Incentive Plan, all outstanding stock options will become fully vested, and all stock awards then outstanding will vest free of restrictions.

The Company's 2006 Stock-Based Incentive Plan (the "2006 Incentive Plan") was approved by shareholders at the Company's Annual Meeting held in July 2006. The 2006 Incentive Plan will remain in effect for a period of ten years and provides for the issuance of up to 1,180,330 shares of Company common stock pursuant to grants of incentive and non-statutory stock options, stock appreciation rights and restricted stock awards, provided that no more than 337,237 shares may be issued as restricted stock awards, and no more than 843,093 shares may be issued pursuant to the exercise of stock options. As of a result of the Company's second step conversion and offering completed in December 2007 and in accordance with provisions in the 2006 Incentive Plan, the Board of Directors voted to adjust the total number of shares authorized for grant, the number of stock options outstanding and the exercise prices for outstanding options by the exchange ratio of 1.04079. Employees and outside directors of the Company are eligible to receive awards under the 2006 Incentive Plan. The holders of restricted stock awards also have full voting rights beginning on the grant date. Upon the occurrence of an event constituting a change in control of the Company, as defined in the 2006 Incentive Plan, all outstanding stock options will become fully vested, and all stock awards then outstanding will vest free of restrictions.

Under the incentive plans, stock options are granted at an exercise price equal to the fair value of the underlying shares at the date of grant and have a contractual life of ten years. Stock options vest based on continued service with the Company over the five year period following the grant date. The compensation cost related to stock options is based upon the fair value for each option as of the date of the grant determined using the Black-Scholes option pricing model. The Black-Scholes model requires the Company to provide estimates of the expected

F-44

(Dollars in thousands, except per share amounts)

NOTE K STOCK-BASED INCENTIVE PLANS Continued

term, volatility of the underlying stock, the stock's dividend yield and the discount rate. The Company intends to repurchase shares in the open market to satisfy stock option exercises.

The compensation cost related to restricted stock awards is based upon the Company's stock price at the grant date. Restricted stock awards generally vest based upon continuous service with the Company over the five year period following the grant date. During the vesting period, participants are entitled to dividends for all awards.

A combined summary of activity in the Company's incentive plans for the years ended December 31, 2010 and 2011 is presented in the following table:

	Shares Available for Grant	Stock Awards Outstanding Number of Shares	Weighted- Average Grant Value	Stock Options Outstanding Number of Shares	Weighted- Average Exercise Price
Balance at December 31, 2009	327,822	436,546	\$ 12.04	1,809,885	\$ 12.36
Granted	(38,500)	3,000	14.34	35,500	14.70
Stock options exercised	-	-	-	(73,955)	12.10
Shares vested	-	(132,924)	12.30	-	-
Forfeited	6,800	-	-	(6,800)	13.85
Cancelled	-	-	-	-	-
Balance at December 31, 2010	296,122	306,622	\$ 12.15	1,764,630	\$ 12.42
Granted	(52,500)	17,500	15.93	35,000	15.93
Stock options exercised	-	-	-	(60,720)	12.60
Shares vested	-	(130,060)	12.32	-	-
Forfeited	74,086	(27,012)	12.16	(47,074)	12.31
Cancelled	30,921	-	-	(30,921)	15.36
Balance at December 31, 2011	348,629	167,050	\$ 12.42	1,660,915	\$ 12.43

During 2011 the Company granted 35,000 stock options and 17,500 restricted shares to certain employees under the 2008 Incentive Plans. The stock options had a weighted average value of \$4.00 per share, with a total grant date fair value of \$140. The restricted shares had a weighted average value of \$15.93 per share, with a total grant date fair value of \$279.

During 2010 the Company granted 35,500 stock options and 3,000 restricted shares to certain employees under the 2008 Incentive Plans. The stock options had a weighted average value of \$3.77 per share, with a total grant date fair value of \$134. The restricted shares had a weighted average value of \$14.34 per share, with a total grant date fair value of \$43.

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE K STOCK-BASED INCENTIVE PLANS Concluded

The Company's total compensation cost for shared-based payment arrangements was \$1,891 in 2011, \$2,383 in 2010 and \$2,281 in 2009. The Company recorded excess tax benefits on stock compensation plans of \$91 in 2011, \$115 in 2010 and \$34 in 2009 related to the recognition of the shared-based compensation expense. As of December 31, 2011, compensation costs related to non-vested stock awards totaling \$2,731 have not been recognized. These costs will be recognized over an estimated weighted average period of 2.1 years.

The following table presents the assumptions used to compute the fair value of options using the Black-Scholes option pricing model for stock options granted during 2011, 2010 and 2009.

	2011	2010	2009
Weighted average fair value	\$ 4.00	\$ 3.77	\$ 4.16
Expected term (short-cut method)	6.50 years	6.50 years	6.50 years
Volatility	28.76%	28.13%	35.33%
Expected dividend yield	2.25%	2.12%	2.18%
Weighted average risk-free interest rate	2.14%	2.76%	3.28%

A summary of stock options outstanding and exercisable at December 31, 2011 is as follows:

	Stock Options	
	Outstanding	Exercisable
Total number of shares	1,660,915	1,226,612
Weighted average exercise price	\$ 12.43	\$ 12.44
Aggregate intrinsic value	\$ 6,078	\$ 4,489
Weighted average remaining contractual term	5.8 years	5.3 years

NOTE L EMPLOYEE BENEFIT PLANS**Senior Executive Retirement Plan**

The Company has entered into Executive Supplemental Compensation Agreements (the Agreements) with certain of

its current and former officers. The estimated amount to be paid under the Agreements is accrued over the executive's active employment from the time the agreement is signed to the date of full eligibility. Effective October 1, 2007, the Company consolidated the Agreements of current senior executives into a SERP. The Company continues to maintain the Agreements for certain former officers. The liability associated with the Agreements was \$734 and \$747 at December 31, 2011 and 2010, respectively, and is included in accrued expenses and other liabilities in the consolidated balance sheets. The expense for the Agreements was \$36, \$46 and \$18 for the years ended December 31, 2011, 2010 and 2009, respectively.

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE L EMPLOYEE BENEFIT PLANS Continued

The SERP provides that each executive will receive supplemental benefits, to the extent vested, commencing 180 days following separation from service. The supplemental benefit will be equal to the percentage of the executive's final average compensation set forth in each executive's participation agreement, multiplied by a fraction, the numerator of which is the executive's years of credited service with the Company and the denominator of which is set forth in the executive's participation agreement. The supplemental benefit will commence on the executive's normal benefit date and will be payable in a lump sum, unless the executive has elected, at the time of execution of the participation agreement, to receive an annuity or other form of benefit. The SERP is unfunded and is considered a nonqualified plan under the Internal Revenue Code.

Directors Fee Continuation Plan

The Company sponsors a Directors Fee Continuation Plan under which a Director will annually receive \$15 (\$24 for former chairpersons) for ten years beginning upon attaining the normal retirement date. The benefit is reduced for directors serving fewer than 15 years. In the event of the participant's death prior to receiving the full benefits of the plan, any unpaid benefits will be paid to the beneficiary. The Company recognizes expense under this plan on a ratable basis such that the present value of the liability is fully accrued at each director's normal retirement date. Effective October 1, 2007, the Board of Directors adopted a Director Retirement Plan to replace the Directors Fee Continuation Plan. Current directors who are participants in the Directors Fee Continuation Plan, the predecessor plan, will participate in the plan from the effective date. Additional directors will begin participation in the plan as of the first day of the plan year in which they become members of the board of directors. Retired directors will continue to receive benefits under the Directors Fee Continuation Plan. At December 31, 2011 and 2010, the Company's recorded liability for this plan amounted to \$300 and \$356, respectively, and is included in accrued expenses and other liabilities in the consolidated balance sheets. The Company was not required to record an expense for the years ended December 31, 2011, 2010 and 2009.

Director Retirement Plan

The Director Retirement Plan will provide for the payment of normal retirement benefits upon the director's separation from service on or after attainment of his normal retirement age (age 72 or age 65 with 10 years of service). The normal retirement benefit will generally be equal to 70% of the average annual director's fees over the highest three

years during a Director's final 10 years of service, and will be payable in 10 annual installments commencing within 60 days after the director's separation from service.

F-47

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE L EMPLOYEE BENEFIT PLANS Continued

In the event a participant has a separation from service prior to his normal retirement date (other than due to termination for cause, disability or death), the participant will be entitled to a lesser benefit payable in ten annual installments commencing at age 65. The amount payable will be determined by multiplying the normal retirement benefit by the director's benefit percentage, which is 10% for each year of service, up to 100%. The supplemental benefit will commence on the director's normal benefit date and will be payable in a lump sum, unless the director has elected, at the time of execution of the participation agreement, to receive an annuity or other form of benefit. A director's benefit percentage will accelerate to 100% upon the director's separation from service due to death, disability or a change in control. Effective December 1, 2011 the Board of Directors elected to freeze the Director Retirement Plan to new members of the Board of Directors. The Director Retirement Plan is accounted for as a defined benefit plan.

The following table summarizes the changes in the projected benefit obligation (PBO), the funded status of the PBO and the weighted average assumptions used to determine the benefit obligation for the SERP and Director Retirement Plan at December 31, 2011 and 2010. These plans had no assets at December 31, 2011 and 2010. Amounts recognized at December 31, 2011 and 2010 are reflected in accrued expenses and other liabilities on the consolidated balance sheets.

	At or For the Years Ended December 31,

NOTE L EMPLOYEE BENEFIT PLANS Continued

At December 31, 2011, the benefit payments expected to be paid in each of the next five years and the aggregate for the five fiscal years thereafter are as follows:

	SERP	Director Retirement Plan
<u>Years ending December 31,</u>		
2012	\$ 642	\$ 422
2013	2,763	211
2014	-	25
2015	-	26
2016	1,021	242
2017 through 2021	-	305
Years after 2021	3,586	788
Total expected benefit payments	\$ 8,012	\$ 2,019

Except for the benefit payments expected to be paid, the Company does not expect to make contributions to these plans in 2012.

Employee Stock Ownership Plan

In connection with the Company's 2005 initial public offering, the Bank established an ESOP for the benefit of each employee that has reached the age of 21 and has completed at least 1,000 hours of service in the previous twelve-month period. The Company issued 641,301 shares of common stock to the ESOP in exchange for a twenty-year note. In connection with the Company's second step conversion, the number of shares in the plan has been adjusted by the exchange ratio of 1.04079 to total 667,458 shares. The loan amount was approximately \$6,413 and was recorded as Unearned Compensation within stockholders' equity. The loan bears interest equal to the prime rate in effect at January 1st of each year and provides for annual payments of principal and interest. Prior to January, 2008, the Board of Directors voted to accelerate its Employee Stock Ownership Plan benefit from a twenty (20) year to a fifteen (15) year allocation period.

As part of the Company's 2007 second step conversion and offering, an additional 753,834 shares of common stock were contributed to the ESOP in exchange for a twenty-year note. The loan amount was approximately \$7,538 and was recorded as Unearned Compensation within stockholders' equity. The loan bears interest equal to the prime rate in effect at January 1st of each year and provides for annual payments of principal and interest. The Board of Directors voted to use a twenty (20) year allocation period for the related ESOP benefit beginning in 2008.

F-50

Table of Contents**UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY**

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE L EMPLOYEE BENEFIT PLANS Concluded

The Company has committed to make contributions to the ESOP sufficient to support the debt service of the loan. The loan is secured by the shares held by the plan trustee in a suspense account for allocation among the participants as the loan is repaid. The Company reports compensation expense equal to the average daily market price of the shares as they are committed to be released from the suspense account. Total compensation expense applicable to the ESOP amounted to \$1,114, \$965 and \$954 for the years ended December 31, 2011, 2010 and 2009, respectively.

Shares held by the ESOP, adjusted by the exchange ratio of 1.04079, include the following:

	December 31,		
	2011	2010	2009
Allocated	308,915	249,607	181,587
Committed to be released	71,709	71,709	71,709
Unallocated	1,021,504	1,093,212	1,164,922
	1,402,128	1,414,528	1,418,218

Cash dividends received on allocated shares are allocated to participants and cash dividends received on shares held in suspense are used to fund the scheduled annual debt payment. The fair value of unallocated shares at December 31, 2011, 2010 and 2009 was \$16,436, \$16,693 and \$15,272, respectively.

NOTE M COMMITMENTS AND CONTINGENCIES**Financial Instruments With Off-Balance Sheet Risk**

The Company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans and standby letters of credit. The Company does not record a liability for the fair value of the obligation undertaken in issuing standby letters of credit unless it becomes probable that the Company would have to perform under the guarantee. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount

recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for loan commitments and standby letters of credit is represented by the contractual or notional amounts of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

F-51

Table of Contents**UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY**

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE M COMMITMENTS AND CONTINGENCIES Continued

Financial instruments with off-balance sheet risk at December 31, 2011 and 2010 are as follows:

	2011	2010
Unused lines of credit	\$ 250,034	\$ 233,403
Amounts due mortgagors	27,495	26,500
Standby letters of credit	4,004	4,382
Commitments to originate loans	32,689	27,068

Included in commitments to originate loans at December 31, 2011 and 2010 are fixed rate commitments in the amount of \$23,648 and \$24,116, at interest ranges of 3.125% to 6.25% and 3.40% to 7.00%, respectively.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis.

The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds residential or commercial real estate, accounts receivable, inventory and equipment as collateral supporting those commitments for which collateral is deemed necessary. The extent of collateral held for those commitments at December 31, 2011 and 2010 exceeds 100%.

The Company has also committed to invest up to \$10,000, representing 25% of the Class A or senior investor balance, in a low income housing tax credits fund by the end of 2014. At December 31, 2011, the Company has invested

\$5,117 in the fund, which has been reduced by net operating losses of \$1,017. The net carrying balance of \$4,100 is included in other assets on the consolidated balance sheet. As a Class A investor, the Company has the right to transfer its investment to the fund's Class B investor at the end of 10 years at which time the Company would have no compliance requirements or interest in the fund. The fund structure contemplates that the Class A investors will receive 95% of the tax credits and tax benefits

F-52

NOTE M COMMITMENTS AND CONTINGENCIES Concluded

from net operating losses for a period of eight years or until the minimum investment return has been met. Tax benefits in the form of net operating losses are recognized as they are incurred and recorded in non-interest expense.

Employment and Change in Control Agreements

The Company has entered into a three-year employment agreement with its President and Chief Executive Officer expiring in 2013. This agreement generally provides for a base salary and the continuation of certain benefits currently received. Annually the Company may extend the agreement for an additional year. Under certain specified circumstances, the employment agreement requires certain payments to be made for certain reasons other than cause, including a change in control as defined in the agreement. However, such employment may be terminated for cause, as defined, without incurring any continuing obligations.

The Company also entered into three-year change in control agreements with certain executive officers, none of whom are covered by an employment agreement. The change in control agreements are renewable on an annual basis and generally provide a severance payment and the continuation of certain benefits currently received following a change in control as defined in the agreements.

Litigation

United Bank, as successor in interest to Commonwealth National Bank, is involved in litigation relating to its foreclosure on a certain loan property. The litigants claim that Commonwealth National Bank acted in bad faith and in violation of applicable law and that its actions resulted in a sale of the underlying property for less than its market value, thereby causing damage to the parties. During the third quarter of 2011 the judge issued a ruling in favor of United Bank. The litigants have appealed the decision. United Bank believes these claims and the appeal are without merit and is vigorously defending the litigation. No estimate of any reasonably possible loss or range of loss to United Bank can be made at this time.

In addition, the Company is subject to various legal actions arising in the normal course of business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material adverse effect on the Company's financial condition, results of operations or cash flows.

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE N FAIR VALUES OF FINANCIAL INSTRUMENTS

The Company groups its financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

Level 1 Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Level 1 also includes U.S. Treasury and other U.S. government and government-sponsored enterprises that are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities and are not adjusted by the Company.

Level 2 Valuations for assets and liabilities traded in less active dealer or broker markets. Level 2 includes U.S. government and mortgage-backed securities issued by government-sponsored enterprises. Valuations are obtained from third party pricing services for identical or comparable assets or liabilities and are not adjusted by the Company.

Level 3 Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker-traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets and liabilities.

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE N FAIR VALUES OF FINANCIAL INSTRUMENTS Continued

The Company may be required, from time to time, to measure certain other financial assets on a nonrecurring basis in accordance with generally accepted accounting principles. These adjustments to fair value usually result from application of lower-of-cost-or-fair value accounting or write-downs of individual assets. The following table summarizes the fair value hierarchy used to determine the adjustment and the carrying value of the related assets as of and for the years ended December 31, 2011 and 2010.

December 31, 2011	Level 1	Level 2	Level 3	Total Gains/(Losses)
Assets:				
Loans	\$ -	\$ -	\$ 3,309	\$ 432
Other real estate owned	-	-	750	(130)
Other assets	-	-	501	(99)
Total assets	\$ -	\$ -	\$ 4,560	\$ 203

December 31, 2010				
Assets:				
Loans	\$ -	\$ 3,489	\$ -	\$ (156)
Other assets	-	-	545	(145)
Total assets	\$ -	\$ 3,489	\$ 545	\$ (301)

The amount of loans represents the carrying value and related write-down and valuation allowance of impaired loans for which adjustments are based on the estimated fair value of the underlying collateral. The other real estate owned amount represents the carrying value for which adjustments are also based on the estimated fair value of the property. Included in other assets is a venture capital investment carried at cost. In the second and third quarter of 2011 management determined that an impairment indicator existed and that the investment suffered impairment that was considered other-than-temporary. The cost basis of the investment was written down by \$59 in the second quarter and \$40 in the third quarter to fair value as a new cost basis and the write down was accounted for as a realized loss and was included in earnings. Also included in other assets is private company stock which is carried at cost. In 2010

management determined that several impairment indicators existed and that the investment was impaired. In its evaluation, management considered the investee's earnings performance, credit rating, asset quality, regulatory, economic, or technological environment operating environment, and the investee's ability to continue as a going concern. The cost basis of the individual security was written down by \$145 to fair value as a new cost basis and the amount of the write-down was accounted for as a realized loss and was included in earnings.

UNITED FINANCIAL BANCORP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

December 31, 2011, 2010 and 2009

(Dollars in thousands, except per share amounts)

NOTE N FAIR VALUES OF FINANCIAL INSTRUMENTS Continued

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because a market may not readily exist for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The following methods and assumptions were used by the Company in estimating fair values of its financial instruments:

Cash and Cash Equivalents and Short-term Investments

The carrying amounts of cash and short-term instruments approximate fair values based on the short-term nature of the assets.

Investment Securities and FHLBB Stock

The fair value of securities to be held to maturity and securities available for sale is estimated based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. Ownership of FHLBB stock is restricted to member banks; therefore, the stock is not traded. The estimated fair value of FHLBB stock is equal to its carrying value, which represents the price at which the FHLBB is obligated to redeem its stock.

Loans

For valuation purposes, the loan portfolio was segregated into its significant categories, which are residential mortgage, commercial real estate, commercial and consumer. These categories were further segregated, where appropriate, into components based on significant financial characteristics such as type of interest rate (fixed or

adjustable). Fair values were estimated for each component using assumptions developed by management and a valuation model provided by a third party specialist.

The fair values of residential mortgage, commercial real estate, commercial and consumer loans were estimated by discounting the anticipated cash flows from the respective portfolios. Estimates of the timing and amount of these cash flows considered factors such as future loan

F-57

(Dollars in thousands, except per share amounts)

NOTE N FAIR VALUES OF FINANCIAL INSTRUMENTS Continued

prepayments. The discount rates reflected current market rates for loans with similar terms to borrowers of similar credit quality. The fair value of home equity lines of credit was based on the outstanding loan balances. Fair values for non-performing loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposits

The fair value of deposits with no stated maturity, such as demand deposits, NOW, regular savings, and money market deposit accounts, is equal to the amount payable on demand. The fair value estimates do not include the benefit that results from the generally lower cost of funding provided by the deposit liabilities compared to the cost of borrowing funds in the market. The fair value estimate of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits having similar remaining maturities.

Short-term borrowings

For short-term borrowings maturing within ninety days, carrying values approximate fair values. Fair values of other short-term borrowings are estimated using discounted cash flow analyses based on the current incremental borrowing rates in the market for similar types of borrowing arrangements.

Long-term debt

The fair values of the Company's long-term debt are estimated using discounted cash flow analyses based on the current incremental borrowing rates in the market for similar types of borrowing arrangements.

Repurchase Agreements

The Company enters into overnight repurchase agreements with its customers. Since these agreements are short-term instruments, the fair value of these agreements approximates their recorded balance. The Company also secures term repurchase agreements through other financial institutions. The fair value of these agreements are determined by discounting the anticipated future cash payments using rates currently available to the Bank for debt with similar

terms and remaining maturities.

Subordinated Debentures

The Company has outstanding subordinated debt in the form of trust preferred securities issued through a private placement offering. The fair value estimate is determined by

(Dollars in thousands, except per share amounts)

NOTE N FAIR VALUES OF FINANCIAL INSTRUMENTS Concluded

discounting the anticipated future cash payments by using the rates currently available to the Company for debt with similar terms and remaining maturities.

Off-Balance Sheet Instruments

Fair value of off-balance-sheet mortgage lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. In the case of the commitments discussed in Note M, the fair value equals the carrying amounts which are not significant.

Summary of Fair Values of Financial Instruments

The estimated fair values, and related carrying or notional amounts, of the Company's financial instruments are as follows. Certain financial instruments and all nonfinancial instruments are exempt from disclosure requirements. Accordingly, the aggregate fair value amounts presented herein do not represent the underlying fair value of the Company.

	2011		2010	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value

NOTE O STOCKHOLDERS' EQUITY

Regulatory Capital

The Bank is subject to various minimum regulatory capital standards promulgated by the Office of the Comptroller of the Currency (the "OCC"). Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. The Company is not separately subject to capital guidelines.

The minimum capital standards of the OCC generally require the maintenance of regulatory capital sufficient to meet each of three tests, hereinafter described as the total risk-based capital requirement, the Tier I risk-based capital requirement and the Tier I or leverage capital requirement. The Tier I risk-based and Tier I leverage capital requirements provide for minimum core capital (tangible capital plus certain forms of supervisory goodwill and other qualifying intangible assets) generally equal to 4.0% of risk-weighted assets and to 4.0% of adjusted total assets, respectively, except for those banks with the highest examination rating and acceptable levels of risk. The risk-based capital requirement provides for the maintenance of core capital plus general loss allowances equal to 8.0% of risk-weighted assets. In computing risk-weighted assets, the Bank multiplies the value of each asset on its balance sheet by a defined risk-weighting factor, e.g., one- to four-family residential loans carry a risk-weighted factor of 50%.

The OCC capital rules also require savings associations to hold a ratio of 1.5% tangible capital to tangible assets. Tangible equity is defined as core capital less tangible assets. Tangible assets are defined as adjusted total assets less intangible assets.

As of December 31, 2011, the most recent notification from the OCC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as adequately capitalized the Bank must maintain minimum ratios as set forth in the accompanying table. There are no conditions or events since that notification that management believes have changed the Bank's category.

NOTE O STOCKHOLDERS EQUITY Concluded

Common Stock Repurchase Plans

On October 26, 2010, the Board of Directors approved a plan to repurchase up to 5%, or approximately 807,803 shares, of the Company's common stock through open market purchases. Stock repurchases are accounted for as treasury stock, carried at cost, and reflected as a reduction in stockholders' equity. As of December 31, 2011, the Company repurchased 477,700 shares at a cost of approximately \$7,086 and an average price of \$14.83, under this plan.

On October 16, 2009, the Board of Directors approved a plan to repurchase up to 5%, or approximately 798,055 shares, of the Company's common stock through open market purchases or privately negotiated transactions. The Company completed its repurchase of 798,055 shares of its outstanding common stock, at a cost of approximately \$10,779 and at an average price of \$13.51, on October 26, 2010.

On February 19, 2009, the Board of Directors approved a plan to repurchase up to 5%, or approximately 841,138 shares, of the Company's common stock through open market purchases or privately negotiated transactions. The Company completed its repurchase of 841,138 shares of its outstanding common stock, at a cost of approximately \$10,832 and at an average price of \$12.88, on November 30, 2009.

On November 20, 2008, the Board of Directors approved a plan to repurchase up to 5%, or approximately 885,379 shares, of the Company's common stock through open market purchases or privately negotiated transactions. The Company completed its repurchase of 885,379 shares of its outstanding common stock, at a cost of approximately \$12,376 and at an average price of \$13.98, on February 3, 2009.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the fiscal year (the Evaluation Date). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective.

(b) Management's report on internal control over financial reporting.

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting.

The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011, based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control - Integrated Framework*. Based on that assessment, management concluded that, as of December 31, 2011, the Company's internal control over financial reporting was effective based on the criteria established in *Internal Control - Integrated Framework*. Management's evaluation of internal control over financial reporting as of December 31, 2011

Our internal control over financial reporting as of December 31, 2011 has been audited by Wolf & Company, P.C., an independent registered public accounting firm, as stated in their report which is included herein.

(c) Attestation report

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

United Financial Bancorp, Inc.

We have audited United Financial Bancorp, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. United Financial Bancorp, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Also, because management's assessment and our audit were conducted to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), our audit of United Financial Bancorp, Inc.'s internal control over financial reporting included controls over the preparation of financial statements in accordance with the instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C). A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, United Financial Bancorp, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the December 31, 2011 consolidated financial statements of United Financial Bancorp, Inc. and our report dated March 12, 2012 expressed an unqualified opinion.

/s/ Wolf & Company, P.C.

Boston, Massachusetts

March 12, 2012

Table of Contents

(d) Changes to internal controls

There were no changes made in our internal controls over financial reporting that occurred during the quarter ended December 31, 2011 that could materially affect, or are reasonably likely to materially affect, our internal control over financial reporting.
