(a)	Indicates a variable rate security. The maturity date presented for these instruments is the later of the next date on which the security can be redeemed at par or the next date on which the rate of interest is adjusted. The interest rate shown reflects the rate in effect at January 31, 2015.
(b)	Perpetual bond. This is a bond that has no maturity date, is redeemable and pays a steady stream of interest indefinitely.
(c)	The maturity date presented for these instruments represents the next call/put date.
(d)	Denotes a restricted security, see Note (c).
(e)	Security is in default.
(f)	Flat traded rate security. This bond traded without accrued interest.
(g)	Illiquid security.
(h)	This security is government guaranteed.
(i)	Inflation linked security.
(j)	Indicates a stepped coupon bond. This bond was issued with a low coupon that gradually increases over the life of the bond.
(k)	Payment-in-kind. This is a type of bond that pays interest in additional bonds rather than in cash.

Summary of Significant Accounting Policies

a. Security Valuation:

The Fund values its securities at current market value or fair value consistent with regulatory requirements. Fair value is defined in the Fund s valuation and liquidity procedures as the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between willing market participants without a compulsion to contract at the measurement date.

Long-term debt and other fixed-income securities are valued at the last quoted or evaluated bid price on the valuation date provided by an independent pricing service provider. If there are no current day bids, the security is valued at the previously applied bid. Short-term debt securities (such as commercial paper, and U.S. treasury bills) having a remaining maturity of 60 days or less are valued at the last quoted or evaluated bid price on the valuation date provided by an independent pricing service, or on the basis of amortized cost if it represents the best approximation of fair value. Debt and other fixed-income securities are generally determined to be Level 2 investments.

Exchange traded derivatives are generally Level 1 investments and over-the-counter derivatives are generally Level 2 investments. Forward foreign currency contracts are generally valued based on the bid price of the forward rates and the current spot rate. Forward exchange rate quotations are available for scheduled settlement dates such as 1,3,6,9,12 month periods. An interpolated valuation is derived based on the actual settlement dates of the forward contracts held. Futures contracts are valued at the settlement price or at last bid if no settlement price is available. Interest rate swaps agreements are generally valued by an approved pricing agent based on the terms of the swap agreement (including future cash flows).

In the event that a security s market quotations are not readily available or are deemed unreliable, the security is valued at fair value as determined by the Fund s Pricing Committee, taking into account the relevant factors and surrounding circumstances using valuation policies and procedures approved by the Board. A security that has been fair valued by the Pricing Committee may be classified as Level 2 or 3 depending on the nature of the inputs.

In accordance with the authoritative guidance on fair value measurements and disclosures under accounting principles generally accepted in the United States of America (GAAP), the Fund discloses the fair value of its investments using a three-level hierarchy that classifies the inputs to valuation techniques used to measure the fair value. The hierarchy assigns Level 1 measurements to valuations based upon unadjusted quoted prices in active markets for identical assets, Level 2 measurements to valuations based upon other significant observable inputs, including adjusted quoted prices in active markets for identical assets, and Level 3 measurements to valuations based upon unobservable inputs that are significant to the valuation. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability, which are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. A financial instrument s level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement. The three-level hierarchy of inputs is summarized below:

- Level 1 quoted prices in active markets for identical investments;
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, and credit risk); or
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments).

A summary of standard inputs is listed below:

Security Type	Standard Inputs
Debt and other fixed-income securities	Reported trade data, broker-dealer price quotations, benchmark yields, issuer spreads on
	comparable securities, credit quality, yield, and maturity.
Forward foreign currency contracts	Forward exchange rate quotations.

Swap agreements

Market information pertaining to the underlying reference assets, i.e., credit spreads, credit event probabilities, fair values, forward rates, and volatility measures.

For movements between the Levels within the fair value hierarchy, the Fund has adopted a policy of recognizing transfers at the end of each period. During the period ended January 31, 2015, there were no transfers between Levels 1, 2 and 3. For the period ended January 31, 2015, there have been no significant changes to the fair valuation methodologies.

b. Repurchase Agreements:

The Fund may enter into repurchase agreements under the terms of a Master Repurchase Agreement. It is the Fund s policy that its custodian/counterparty segregate the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. The repurchase price generally equals the price paid by the Fund plus interest negotiated on the basis of current short-term rates. To the extent that any repurchase transaction exceeds one business day, the collateral is valued on a daily basis to determine its adequacy. Under the Master Repurchase Agreement, if the counterparty defaults and the value of the collateral declines, or if bankruptcy proceedings are commenced with respect to the counterparty of the security, realization of the collateral by the Fund may be delayed or limited. Repurchase agreements are subject to contractual netting arrangements with the counterparty, Fixed Income Clearing Corp. For additional information on the Fund s repurchase agreement, see the Portfolio of Investments. The Fund held a repurchase agreement of \$876,000 as of January 31, 2015. The value of the related collateral exceeded the value of the repurchase agreement at January 31, 2015.

c. Restricted Securities:

Restricted securities are privately-placed securities whose resale is restricted under U.S. securities laws. The Fund may invest in restricted securities, including unregistered securities eligible for resale without registration pursuant to Rule 144A and privately-placed securities of U.S.

and non-U.S. issuers offered outside the U.S. without registration pursuant to Regulation S under the Securities Act of 1933, as amended (the 1933 Act). Rule 144A securities may be freely traded among certain qualified institutional investors, such as the Fund, but resale of such securities in the U.S. is permitted only in limited circumstances.
