Notes to the Condensed Financial Statements
September 30, 2007
(Unaudited)

Note 1– Basis of Presentation and business operations

Basis of presentation – Going concern

The financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the liquidation of liabilities in the ordinary course of business. As shown in the accompanying financial statements, we had assets of \$426,117, a working capital deficit of \$322,600 and an accumulated deficit of \$2,796,014 at September 30, 2007. As a result, substantial doubt exists about our ability to continue to fund future operations using its existing resources.

In the past our operations were funded through private placement of common equity, the sale of certain assets and loans from related parties. Although the amounts due to related parties are reflected as current liabilities, there are no specific repayment terms. In order to ensure the success of the new business, we will have to raise additional financing to satisfy existing liabilities and to provide the necessary funding for future operations.

The accompanying condensed unaudited financial statements of Lumonall, Inc. (the “Company”) have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and Item 310(b) of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management of the Company, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the six month period ended September 30, 2007 are not necessarily indicative of the results that may be expected for the year ending March 31, 2008. For further information, refer to the financial statements and footnotes thereto included in the Company’s annual report on Form 10-KSB for the year ended March 31, 2007.

Business operations

We were originally incorporated in the State of Colorado on May 1, 1996 as Grand Canyon Ventures Two, Incorporated. The Company changed its name to Azonic Engineering Corporation on September 23, 1998. On November 12, 1999 it was re-domiciled to the State of Nevada by merging into its wholly owned subsidiary Azonic Corporation, a Nevada corporation. On July 21, 2005 the Azonic Corporation changed its name to Midland International Corporation. On August 7, 2007 we changed our name from Midland International Corporation to Lumonall, Inc. (referred to herein as “Lumonall,” the “Company,” Registrant” and “Issuer”).

In February 2007, we adopted a new business plan. To implement this new business plan we acquired the United States licensing, North American manufacturing and Canadian non-government distribution rights to a process for photo luminous pigments and production of foil used in manufacturing of photo luminous materials. We also made a 30% investment in an entity that holds the world-wide intellectual property rights to certain photo luminous materials

Index

Note 2 – Recent developments

Name Change and Increase in Authorized Share Capital

On August 7, 2007, we filed amendments to our Articles of Incorporation to increase our authorized capital stock from 105,000,000 shares, consisting of 100,000,000 shares of Common Stock having a par value of \$.001 per share and 5,000,000 shares of Preferred Stock having a par value of \$.001 per share, to 205,000,000 shares of authorized capital, consisting of 200,000,000 shares of Common Stock having a par value of \$.001 per share and 5,000,000 shares of Preferred Stock having a par value of \$.001 per share, and to change our name to “Lumonall, Inc.”

On August 16, 2007 we were notified that the name change had been approved and that the trading symbol was changed to “LUMN” effective August 17, 2007.

Appointment of New Directors and Officers

At a meeting of the Board of Directors on August 28, 2007, we appointed four additional new members to the Board, Mr. Geir Drangsholt, Mr. Michael Hetherman, Mr. Frank Høyen and Mr. Bjørn Pedersen. With these new appointments the Board consists of 6 directors, including Ms. Carrie Weiler and Mr. John Simmonds.

With regard to Board appointments, Messrs. Drangsholt, Høyen and Pedersen will be considered independent directors. Mr. Hetherman was also appointed President and Chief Operating Officer of Lumonall Inc. and therefore will be considered a non-independent executive director.

Mr. Gary Hokkanen was appointed Chief Financial Officer of the Company.

Distribution Chain Developments

During the previous quarter, we signed a number of distributors to take this new PLM product to market. Those partners, covering a majority of North America, include the Willis Group of Companies in Canada, and Designer Building Solutions, Butler-Johnson Corporation, Hallmark Building Supplies and Parksite, Inc. in the United States. As of September 30, 2007, we received deposits totaling \$190,000 for future orders of PLM product from most of our distributors.

We held a distributors meeting in Chicago, Illinois at the end of August. The purpose of the meeting was to train distributor sales and marketing managers to start major metro penetration across North America, and included strategy and training sessions led by Geir Drangsholt, as well as one of our directors and ProLink International AS Sales and Development Manager, Bjørn Pedersen.

National Research Council Report

The National Research Council of Canada report studying the effectiveness of PLM products was recently released. The study, jointly funded by Public Works and Government Services Canada and the NRC, was done with our support and confirmed the value and importance of PLM Safety Way Guidance Systems (SWGS) as an effective and improved means of evacuation in emergency conditions.

Index

Conducted in the C.D. Howe building in Ottawa, Ontario, a 13-story building that is home to Industry Canada and the Office of the Auditor General, the report included two other PLM manufacturers in addition to us.

According to the report (entitled “Evaluation of the effectiveness of different photoluminescent stairwell installations for the evacuation of office building occupants”), “Renovations to the Pentagon following the September 11, 2001 attack included the addition of a PLM [Safety Way Guidance System] in corridors and stairs, while the United Nations installed such a system in 2003. New York City recognized as a result of the events of September 11, 2001, and the blackout of August 2003, that a PLM [Safety Way Guidance System] is an essential component to ensure occupant safety in high-rise structures.” New York City officially passed Local Law 26 on May 31, 2005, which required all existing or new high-rise office buildings over 75-feet-tall to install a PLM SWGS by July 2006.

Furthermore, according to the report, “other building codes are also in the process of adopting measures to use photoluminescent safety markings as a means of better defining escape routes, and this technology will continue to be developed and used.”

Geir Drangsholt Retained as Consultant and Advisor

Geir Drangsholt is considered an authority on PLM and Safety Way Guidance Systems. An engineer by trade, Mr. Drangsholt has been instrumental on a global level for developing standards and principles for PLM Safety Way Guidance Systems and other fire safety models.

In 1997, the need for universal exit path marking systems in buildings was deemed by the International Organization for Standardization (ISO) as one of the most critical applications for standardized signage. For six years, a multidisciplinary committee of the world's experts in evacuation systems and graphical symbols, which included Mr. Drangsholt as a Norwegian delegate, met several times a year to develop ISO 16069. The result, published in 2003, is a standard that sets forth the basic principles for designing egress path marking systems for buildings.

Geir Drangsholt is also head of the Norwegian group writing the Norwegian Standard for SWGS, based on ISO 16069. He has also been Managing Director and Senior Engineer of TekOk AS, a private fire consultant company in Norway, since 2000.

New Head Office

Effective September 17, 2007, we relocated our head office to 3565 King Road, Suite 102, King City, Ontario, L7B 1M3, Canada, (telephone 905-833-9845, fax 905-833-9847). The new office will contain the latest and most up to date technology in photoluminescent signage and provides a good example of what their products are capable of.

Index

Note 3 – Summary of Significant Accounting Policies

The financial statements have been prepared in accordance with generally accepted accounting principles in the United States.

The financial statements have, in management's opinion been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates, and such differences could be material.

Cash and cash equivalents

Cash and cash equivalents include time deposit, certificates of deposits, and all highly liquid debt instruments with original maturities of three months or less. The Company maintains cash and cash equivalents at financial institutions, which periodically exceed federal insured amounts.

Development stage

The Company has operated as a development stage enterprise since its inception by devoting substantially all of its efforts to financial planning, raising capital, research and development, and developing markets for its products. Accordingly, the financial statements of the Company have been prepared in accordance with the accounting and reporting principles prescribed by SFAS No. 7, "Accounting and Reporting by Development Stage Enterprises," issued by FASB.

The Company was substantially inactive from May 1, 1996 through September 30, 2004. Activities began on or about October 1, 2004.

Fair value of financial instruments

The carrying value of receivables, bank indebtedness, accounts payable and accrued liabilities, income taxes payable, and customer deposits approximates fair value because of the short maturity of these instruments. The carrying value of long-term debt and due to and from related parties also approximates fair value. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risk arising from these financial instruments.

Income taxes

The Company provides for income taxes using the asset and liability method as prescribed by Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes". Under the assets and liability method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases.

Index

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Additionally, a valuation allowance is established when necessary to reduce deferred income tax assets to the amounts expected to be realized. Under Statement 109, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Basic and diluted earnings (loss) per share

The Company reports basic earnings (loss) per share in accordance with Statement of Financial Accounting Standards No. 128, "Earnings Per Share". Basic earnings (loss) per share is computed using the weighted average number of shares outstanding during the year. Diluted earnings per share includes the potentially dilutive effect of outstanding common stock options and warrants which are convertible to common shares.

Recent issued accounting standards

In February 2007, the FASB issued FASB Statement NO. 159, "The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115" ("SFAS 159"). The fair value option established by SFAS 159 permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity will report unrealized gains or losses on items for which the fair value option has been elected in earnings (or another performance indication if the business entity does not report earnings) at each subsequent reporting date. The fair value option: (a) may be applied instrument by instrument, with a few exceptions, such as investments otherwise accounted for by the equity method; (b) is irrevocable (unless a new election date occurs); and (c) is applied only to entire instruments and not to portions of instruments. FASB No. 159 is effective as of the beginning of the fiscal years beginning after November 15, 2007. The adoption of SFAS 159 is not expected to be material to the Company's financial statements.

Note 4 – Related Party Transactions

Periodically expenses of the Company are paid by related parties on behalf of the Company. These transactions result in non-interest bearing payables to related parties with no specific terms of repayment other than as described below. At September 30, amounts due to related parties amounted to \$145,080 and amounts due from related parties totaled \$169,744. Related parties of the Company include entities under common management.

The Company is obligated to pay \$150,000 to Wireless Age Communications, Inc. (an entity that has certain common officers and directors) over a six month period beginning June 2007 as repayment of the principal under promissory note plus accrued and unpaid interest. As of September 30, 2007, the remaining amount owed was \$75,000.

The Company is obligated to pay Simmonds Mercantile and Management Inc. ("Simmonds Mercantile") \$20,000 per month for certain executive level management services. The Company's head office was also located at the offices of Simmonds Mercantile. Simmonds Mercantile is solely owned by the Company's CEO John Simmonds. During the year ended March 31, 2007, Simmonds Mercantile agreed to forgive unpaid management fees (and other related parties of Simmonds Mercantile) of approximately \$175,000 as part of a commitment to issue 35,000,000 common shares for debt forgiveness to a group of investors led by an officer and director. As of September 30, 2007, 30,200,000 common shares had been issued.

Index

Pursuant to the Company's acquisition of the US licensing and manufacturing rights the Company agreed to fund the payment of certain cash obligations of Prolink North America Inc. As at September 30, 2007, the Company had advanced \$166,103 to Prolink North America Inc. for such purposes. In addition 4,800,000 shares of the Company's common stock, valued at \$70,080 had not been issued to Lumonall Canada Inc. and has been recorded as current related party liability.

At September 30, 2007, the amounts due to related parties were:

Wireless Age Communications, Inc.	\$ 75,000
Lumonall Canada Inc.	70,080
	\$ 145,080

At September 30, 2007, the amounts due from related parties were:

Prolink North America Inc.	\$ 166,103
Lumonall Canada Inc.	3,641
	\$ 169,744

Note 5 – Investments

Pursuant to an agreement entered into on February 13, 2007, the Company issued 20,000,000 shares of its common stock to acquire a 30% interest in PPRAS a newly formed private entity based in Norway. PPRAS holds the intellectual property rights for PLM pigments and production of foil used in the manufacturing of photo luminous materials ("PLM").

The Company has significant influence over the business affairs of PPRAS and accordingly accounts for the investment using the equity method.

The Company valued the initial investment in PPRAS at \$100,000. The Company's carrying value of its investment in PPRAS can be summarized as follows:

Initial investment	\$ 100,000
Less:	
Equity share of earnings (losses) from inception to September 30, 2007	(623)
	\$ 99,377

The carrying value of the investment exceeds the proportionate share of net assets of the investee by approximately \$80,000. The investee was recently incorporated and has not placed any material value on the worldwide intellectual property rights. Management believes the carrying value of its investment in PPRAS as at September 30, 2007, is valued appropriately.

PPRAS assets totaled \$18,916 at September 30, 2007 and there are no liabilities. The losses since incorporation to September 30, 2007 have been \$2,076.

Index**Note 6 – Licensing and Manufacturing Rights**

Pursuant to an agreement entered into on February 6, 2007, the Company acquired the USA licensing, North American manufacturing and Canadian non-government distribution rights of PLM from a related party known as Lumonall Canada Inc. Lumonall is considered a related party by virtue of certain common officers and directors. Lumonall obtained the North American PLM rights from PPRAS. The PLM rights are indefinite lived assets and have been valued initially at \$100,000. The Company conservatively estimates the useful life of the rights at 5 years and accordingly is amortizing the initial value on a straight line basis over the estimated useful life.

The Company's carrying value of the intangible assets is summarized as follows:

Initial investment in rights	\$ 100,000
Less:	
Amortization to September 30, 2007	10,000
	\$ 90,000

Under the terms of the acquisition the Company agreed to pay the following royalties to Prolink North America:

1. A sign royalty of approximately \$2.01 (CAD\$2.00) per sign, capped at approximately \$1,005,200 (CAD\$1,000,000),
2. Non-sign 1% royalty on net sales from all other photo luminous products,

The Company also became obligated to provide a secured non-interest bearing demand loan to Prolink North America Inc. to pay certain historic amounts owed by Prolink North America Inc. to Prolink International AS. As of September 30, 2007, the Company had advanced approximately \$166,103 under the requirement. The Company does not anticipate making further loans to Prolink North America Inc.

The Company agreed to pay the following further royalty to Lumonall Canada Inc:

1. A further royalty of \$500,000 from future profits, payable as 15% of earnings before interest taxes depreciation and amortization ("EBITDA") quarterly in arrears.

Pursuant to the terms of the acquisition the Company agreed to issue a \$100,000 note payable to Lumonall Canada Inc. (Note 7).

Note 7 – Note Payable – Related Party

	2007	2006
Note payable, unsecured, non-interest bearing, repayable in two instalment payments of \$25,000 on November 30, 2007 and February 28, 2008 (principal \$50,000).	\$ 50,000	\$ -
Less: current portion:	(50,000)	-

Item 2. Management's Discussion and Analysis or Plan of Operation.

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this Annual Report may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and as such may involve risks and uncertainties. These forward-looking statements relate to, among other things, expectations of the business environment in which the Company operates, projections of future performance, perceived opportunities in the market and statements regarding the Company's goals. The Company's actual results, performance, or achievements expressed or implied in such forward-looking statements may differ.

BACKGROUND

The Company was incorporated in the State of Colorado on May 1, 1996 as Grand Canyon Ventures Two, Incorporated. The Company changed its name to Azonic Engineering Corporation on September 23, 1998. On November 12, 1999, it was re-domiciled to the State of Nevada by merging into its wholly owned subsidiary Azonic Corporation ("Company"), a Nevada corporation. On July 21, 2005 the Company officially changed its name to Midland International Corporation. On August 7, 2007 we changed our name from Midland International Corporation to Lumonall, Inc.

As of February 2007, we adopted a new business plan. We acquired the United States licensing, North American manufacturing and Canadian non-government distribution rights of photo luminous pigments and production of foil used in manufacturing of photo luminous materials ("PLM") and made a 30% investment in an entity that holds the world wide intellectual rights to these PLM products.

RESULTS OF OPERATION

Comparison of Results of Operations for the Three Month Period Ended September 30, 2007 and 2006

We generated no revenues in the three-month periods ended September 30, 2007 and 2006. The new PLM business plan was begun during the fourth quarter of fiscal 2007 and did not result in any revenues.

We incurred management fees of \$55,000 in the three-month period ended September 30, 2007, compared to nil in the same period ended September 30, 2006. Management fees during the current period were for the services of John Simmonds, our CEO, and Carrie Weiler, our Corporate Secretary.

We incurred office and general expenses of \$102,920 in the three-month period ended September 30, 2007 compared to \$7,702 in the same period ended September 30, 2006, an increase of approximately \$95,000. Office and general expenses include travel and auto, occupancy and communications and other similar costs associated with operating the business in its current state of evolution. During the three month period ended September 30, 2007 travel and auto costs totaled \$50,481, occupancy costs totaled \$15,029, advertising and promotional costs were \$8,950, and foreign exchange translation costs were \$8,779. We expect operating costs to increase as we pursue the new business.

Index

We also incurred professional and consulting fees of \$386,125 in the three-month period ended September 30, 2007, compared to \$17,500 in the same period ended June 30, 2006. Professional and consulting fees during the current year included various fees associated with the new business opportunity, including general management, technical, political lobbyist and marketing functions. Professional and consulting fees in the current period included services valued at \$240,000 paid with warrants to acquire 12,000,000 common shares.

We incurred interest expense of \$8,564 during the three month period ended September 30, 2006 compared to nil during the three month period ended September 30, 2007. Interest expense arose from an 8% promissory note issued to Wireless Age Communications, Inc. for unpaid management fees.

As a result, we incurred a net loss of (\$33,766) during the three month period ended September 30, 2006, (approximately \$0.001 per share) compared to a net loss of (\$549,045) in the same period ended September 30, 2007 (approximately \$0.005 per share)

Management expects the operating losses to continue until breakeven operations are achieved under the PLM business plan. Additional financing will be required in order to offset pre-breakeven operating losses.

Comparison of Results of Operations for the Six Month Period Ended September 30, 2007 and 2006

We generated no revenues in the six-month periods ended September 30, 2007 and 2006. The new PLM business plan was begun during the fourth quarter of fiscal 2007 and did not result in any revenues.

We incurred management fees of \$115,000 in the six-month period ended September 30, 2007, compared to nil in the same period ended September 30, 2006. Management fees during the current period were for the services of John Simmonds, our CEO, and Carrie Weiler, our Corporate Secretary.

We incurred office and general expenses of \$344,351 in the six-month period ended September 30, 2007 compared to \$9,429 in the same period ended September 30, 2006, an increase of approximately \$335,000. Office and general expenses include travel and auto, occupancy and communications and other similar costs associated with operating the business in its current state of evolution. During the six month period ended September 30, 2007 travel and auto costs totaled \$87,043, occupancy costs totaled \$33,415, advertising and promotional costs were \$61,480, legal and accounting costs of \$51,023 and foreign exchange translation costs were \$7,585. We expect operating costs to increase as we pursue the new business.

We also incurred professional and consulting fees of \$538,415 in the six-month period ended September 30, 2007, compared to \$63,927 in the same period ended September 30, 2006. Professional and consulting fees during the current year included various fees associated with the new business opportunity, including general management, technical and marketing functions, including services valued at \$135,000 for which we paid with 2,700,000 shares of our common stock and services valued at \$240,000 for which we issued warrants to purchase 12,000,000 common shares.

Index

We incurred interest expense of \$17,317 during the six month period ended September 30, 2006 compared to nil during the six month period ended September 30, 2007. Interest expense arose from an 8% promissory note issued to Wireless Age Communications, Inc. for unpaid management fees.

Prolink Property Rights AS, an entity in which we have a 30% interest, generated losses of \$2,077, of which \$623 is our share during the six month period ended September 30, 2007.

As a result, we incurred a net loss of (\$90,673) during the six month period ended September 30, 2006, (approximately \$0.002 per share) compared to a net loss of (\$1,007,766) in the same period ended September 30, 2007 (approximately \$0.010 per share)

Management expects the operating losses to continue until breakeven operations are achieved under the PLM business plan. Additional financing will be required in order to offset pre-breakeven operating losses.

PLAN OF OPERATION

We hold the USA licensing, North American manufacturing and Canadian non-government distribution rights of photo luminous pigments and production of foil used in manufacturing of photo luminous materials ("PLM"). and we made a 30% investment in an entity that holds the world wide intellectual rights to these PLM products. We anticipate beginning to realize on these rights and this investment in fiscal 2008.

With the rights to Prolink International's PLM formulation, and a North American distribution network in place, we have cleared some hurdles already. Looking forward, the keys to success will be to further train and equip that network for anticipated sales, add a North American manufacturing plant to service our customers' needs here, as well as complementing the Norwegian production base, and continue to develop awareness and educate the public on the benefits of PLM with regard to safety and energy conservation.

We will shortly be unveiling a media strategy to improve awareness regarding PLM Exit Signs and Safety Way Guidance Systems ("SWGS"), as well as lobbying all levels of government to further effect both energy saving legislation, in addition to building safety requirements.

Our online presence will also be growing, aiding in the education process for both our distributors and the general public. The new site will provide improved services for our distribution network, as well as the general public. This will likely include streaming video demonstrations (for both Exit Signs and SWGS), an on-line product catalogue, product FAQs, and a marketing materials database.

These measures, in the short term, address the North American marketplace and our presence here. As we develop our infrastructure and grow in sales, we will start capitalizing on our worldwide opportunities.

Following that, we are continuing with research and development in order to further identify other products and applications for PLM.

Index

We will need to raise additional cash to continue to pay its operating expenses in the next twelve months until the revenues of the new venture exceed the day to day operating costs. We also plan to seek other opportunities in North America.

We plan to raise additional funds, in the next twelve months, through the issuance of its common stock or through a combination of equity and debt security instruments. It is anticipated that the debt security instruments will have conversion features that would cause further dilution to existing shareholders.

LIQUIDITY AND CAPITAL RESOURCES

Our total assets increased from \$306,189 at March 31, 2007 to \$426,117 at September 30, 2007. The increase is primarily the result of increased activity associated with the PLM business.

We hold a 30% interest in Prolink Intellectual Properties Inc. which we value at \$99,377 and also hold intangible assets (USA licensing, North American manufacturing and Canadian non-government distribution rights to PLM products) valued at \$90,000. In addition we advanced \$169,744 to related parties (including \$166,103 to Prolink North America Inc. as part of our agreements under the new business plan).

Our total liabilities decreased from \$686,793 at March 31, 2007 to \$559,340 at September 30, 2007. The decrease is primarily the result of due to related parties balances decreasing from \$437,453 at March 31, 2007 to \$145,080 at September 30, 2007. Due to related party amounts do not have specific repayment terms and it is expected that these amounts will be repaid as the financial position of the Company improves. Accounts payable and accrued liabilities increased from \$149,340 at the beginning of the year to \$174,260 at the end of the current quarter. We also repaid \$50,000 of a \$100,000 promissory note to Lumonall Canada Inc. We are obligated to repay the remaining note over a one year term.

The stockholders' deficiency decreased from (\$380,604) at March 31, 2007 to (\$133,223) at September 30, 2007. The increase is attributable to private placements generating net proceeds of \$845,000 during the six month period ended June 30, 2007, the issuance of 2,450,000 common shares, valued at \$35,770 as consideration for assisting in certain related party debt forgiveness, the issuance of 2,700,000 common shares, valued at \$135,000 for consulting services provided the issuance of warrants to acquire 12,000,000 common shares and our loss of \$1,007,766 for the first half of fiscal 2008. (See Statement of Stockholders' Deficiency contained in the financial statements).

At September 30, 2007, we had a working capital deficit of \$322,600. We had cash balances of \$55,614 at September 30, 2007 and we are largely reliant upon our ability to arrange equity private placements or alternatively advances from related parties to pay expenses as incurred. In addition to normal accounts payable of \$174,260 we also owe related companies \$145,080 (some of is without specific repayment terms) and \$50,000 through a promissory note which has regular quarter repayment dates over the next year. Our only source for capital could be loans or private placements of common stock.

During the six month period ended September 30, 2007 we; 1) used \$419,228 in cash in operating activities arising primarily from operating losses, and 2) generated \$473,775 in cash from financing activities. Financing activities included cash proceeds of \$845,000 from private placements of common stock, partially offset by repayments of amounts to related parties of \$321,225 and repayment of related party notes payable of \$50,000.

Index

We remain in the development stage and, since inception, have experienced significant liquidity problems and have no significant capital resources now at September 30, 2007.

Our current cash resources may not be insufficient to support the business over the next 12 months and we are unable to carry out any plan of business without funding. We estimate that we may need additional debt or equity capital to fully implement our business plan in the future and there are no assurances that we will be able to raise this capital when needed. However, while there are no definitive agreements in place as of the date of this report, we are currently engaged in various discussions with interested parties to provide funds or otherwise enter into a strategic alliance to provide such funding. The inability to obtain sufficient funds from external sources when needed will have a material adverse affect on our results of operations and financial condition.

We cannot predict to what extent our current lack of liquidity and capital resources will impair our new business operations. However management does believe we will incur further operating losses. There is no assurance that we can continue as a going concern without substantial funding. Management has taken steps to begin sourcing the necessary funding to begin to execute the business plan.

We estimate it will require additional financing to cover legal, accounting, transfer, consulting, management fees and the miscellaneous costs of being a reporting company in the next fiscal year. We do not intend to pursue or fund any research or development activities during the coming year. We do not intend to add any additional part-time or full-time employees until our activities can support it. Our business plan calls for us to not make any large capital expenditures in the coming year.

Going concern qualification: We have incurred significant losses from operations for the six month period ended June 30, 2007, and such losses are expected to continue. In addition, we have a working capital deficit of \$322,600 and an accumulated deficit of \$2,796,014. The foregoing raises substantial doubt about the Company's ability to continue as a going concern. Management's plans include seeking additional capital and/or debt financing. There is no guarantee that additional capital and/or debt financing will be available when and to the extent required, or that if available, it will be on terms acceptable to us. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

We have a debt obligation to repay a \$50,000 promissory note in quarterly payments of \$25,000 on November 30, 2007 and February 28, 2008. We also hold deposits of \$190,000 from our distributors for future orders of PLM products.

Under the terms of the acquisition of the USA licensing, North American manufacturing and Canadian non-government distribution rights to PLM products, the Company agreed to pay the following royalties to Prolink North America:

1. A sign royalty of approximately \$2.01 (CAD\$2.00) per sign, capped at approximately \$1,005,200 (CAD\$1,000,000).
2. Non-sign 1% royalty on net sales from all other photo luminous products.

We also became obligated to provide Prolink North America a non-interest bearing secured demand loan to pay certain historic amounts owed by Prolink North America Inc. to Prolink International AS. As of June 30, 2007, we had

advanced approximately \$166,103 under the requirement. Management does not anticipate making further loans to Prolink North America Inc..

We agreed to pay the following further royalty to Lumonall Canada Inc:

1. A further royalty of \$500,000 from future profits, payable as 15% of earnings before interest taxes depreciation and amortization ("EBITDA") quarterly in arrears.

Item 3. Controls and Procedures

a. Evaluation of Disclosure Controls and Procedures:

Disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time period specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports filed under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon and as of the date of that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports the Company files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required.

b. Changes in Internal Control over Financial Reporting:

There were no changes in the Company's internal control over financial reporting identified in connection with the Company evaluation of these controls as of the end of the period covered by this report that could have significantly affected those controls subsequent to the date of the valuation referred to in the previous paragraph, including any correction action with regard to significant deficiencies and material weakness.
