997 Lenox Drive, Building 3

Lawrenceville, NJ 08648

(609) 896-3600

Approximate date of commencement of proposed sale to the public: As soon as practicable following the effectiveness of this Registration Statement.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Amount of Shares to be Registered	Proposed Maximum Offering Price Per Share	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee
Shares of Common Stock Issuable Upon Conversion of Series A-1 Convertible Preferred Stock ⁽²⁾	30,000,000	\$ 0.165 ⁽¹⁾	\$ 4,950,000	\$ 498.47
Shares of Common Stock Issuable Upon Conversion of Series B-1 Convertible Preferred Stock ⁽²⁾	35,000,000	\$ 0.165 ⁽¹⁾	\$ 5,775,000	\$ 581.54
Total	65,000,000		\$ 10,725,000	\$ 1,080.01 ⁽³⁾

Estimated pursuant to Rule 457(c) for the purpose of calculating the registration fee based on the average of the ⁽¹⁾high and low prices per share of the registrant's common stock as reported on the QB tier of the OTC Marketplace on December 21, 2015.

Represents shares of common stock issuable upon the conversion of preferred stock issued in private placement transactions in October and November, 2016. Pursuant to Rule 416, there are also being registered such ⁽²⁾indeterminable additional securities as may be issued to prevent dilution as a result of stock splits, stock dividends, or similar transactions. Proposed maximum offering price per share is based on the conversion price of the preferred stock in accordance with Rule 457(g).

⁽³⁾ Previously paid.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. The selling security holders may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED JANUARY 14, 2016

PRELIMINARY PROSPECTUS

65,000,000 shares of common stock

The 65,000,000 shares of our common stock, \$.0001 par value per share, are being offered by the selling security holders identified in this prospectus. The shares of common stock offered by the selling security holders consist of:

30,000,000 shares of common stock issuable upon conversion of Series A-1 Convertible Preferred Stock issued in our October 2015 and November 2015 private offerings; and

35,000,000 shares of common stock issuable upon conversion of Series B-1 Convertible Preferred Stock issued in our November 2015 private offering.

The selling security holders may sell the shares covered by this prospectus through public or private transactions at prevailing market prices or at privately negotiated prices. We will not receive any part of the proceeds from sales of these shares by the selling security holders.

Our common stock trades on the QB tier of the OTC Marketplace ("OTCQB") under the symbol "BKYL." The closing price of our common stock on the OTCQB on January 13, 2016, was \$0.17 per share.

Investing in our common stock involves a high degree of risk. See “Risk Factors” beginning on page 2 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2016.

You should rely only on the information contained in or incorporated by reference into this prospectus. We have not authorized anyone to provide you with different information. We are not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information provided in this prospectus is accurate as of any date other than the date on the front of this prospectus.

PROSPECTUS SUMMARY

This summary highlights selected information contained elsewhere in this prospectus. This summary does not contain all of the information that you should consider before investing in the common stock. You should read carefully the entire prospectus, including “*Risk Factors*” and the financial statements and notes thereto, before making an investment decision.

Unless otherwise indicated or the context otherwise requires, all references to the “Company,” the “registrant” “we,” “us” or “our” and similar terms in this prospectus refer to BIO-key International, Inc. and its subsidiaries.

BIO-key International, Inc.

We were founded in 1993 as a fingerprint biometric technology company. Biometric technology is the science of analyzing specific human characteristics which are unique to each individual in order to identify a specific person from a broader population.

We develop and market advanced fingerprint biometric identification and identity verification technologies, cryptographic authentication-transaction security technologies, as well as related identity management and credentialing software solutions. We were pioneers in developing automated, finger identification technology that supplements or compliments other methods of identification and verification, such as personal inspection identification, passwords, tokens, smart cards, ID cards, PKI, credit cards, passports, driver’s licenses, OTP or other form of possession or knowledge-based credentialing. Advanced BIO-key® technology has been and is used to improve both the accuracy and speed of competing finger-based biometrics.

In partnerships with OEMs, integrators, and solution providers, we provide biometric software solutions to private and public sector customers. We provide the ability to positively identify and authenticate individuals before granting access to valuable corporate resources, web portals or applications in seconds. Powered by our patented Vector Segment Technology™, or VST™, WEB-key® and BSP development kits are fingerprint biometric solutions that provide interoperability with all major reader manufacturers, enabling application developers and integrators to integrate fingerprint biometrics into their applications. Our turnkey hardware and software solutions, including compact finger readers which can be used to log onto any device with a USB port, provide cost effective easily deployable user authentication systems to commercial and government customers. Our software is also integrated with Windows 10 to deliver fast, secure and convenient access to authorized users.

We have developed what we believe is the most discriminating and effective commercially available finger-based biometric technology. Our primary focus is in marketing and selling this technology into commercial logical and physical privilege entitlement and access control markets. Our primary market focus includes mobile payments and credentialing, online payments and credentialing, and healthcare record and payment data security, among other things. Our secondary focus includes government markets, primarily law enforcement forensic investigation, and the Department of Homeland Security. More specifically, our solutions are used by hospitals, clinics and private practices to secure access to patient records, by blood centers to identify donors, by schools to identify students for attendance, lunch programs and transportation, by standardized testing organizations to identify exam candidates, governmental agencies to register recipients and control the distribution of governmental benefits, and financial institutions to authenticate ATM transactions and mobile transactions.

We continue to research and develop advancements in our capabilities, as well as exploring and developing potential strategic relationships, including potential business combinations and acquisitions, which could help us leverage our capability to deliver our solutions. We have built a direct sales force of professionals and also team with resellers, integrators and partner networks with substantial experience in selling technology solutions to government and corporate customers. We recently entered the Asian market through an exclusive licensing arrangement with China Goldjoy Group Limited, a Hong Kong based public company engaged in technology development, including biometric security.

Our principal executive offices are located at 3349 Highway 138, Building A, Suite E, Wall, NJ 07719, and our telephone number is (732) 359-1100. We maintain a website at www.bio-key.com. Information contained on our website does not constitute part of this prospectus.

The Offering

This prospectus covers the public sale of 65,000,000 shares of common stock to be sold by the selling security holders identified in this prospectus, which consist of 30,000,000 shares of common stock issuable upon conversion of Series A-1 Convertible Preferred Stock issued in our October 2015 and November 2015 private offerings and 35,000,000 shares of common stock issuable upon conversion of Series B-1 Convertible Preferred Stock issued in our November 2015 private offering. We will not receive any proceeds from the sale of the common stock by the selling security holders.

The selling security holders may sell the shares covered by this prospectus through public or private transactions at prevailing market prices or at privately negotiated prices. We will not receive any part of the proceeds from sales of these shares by the selling security holders.

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should carefully consider the following risk factors in addition to other information in this prospectus before purchasing our common stock. The risks and uncertainties described below are those that we currently deem to be material and that we believe are specific to our company, our industry and our stock. In addition to these risks, our business may be subject to risks currently unknown to us. If any of these or other risks actually occurs, our business may be adversely affected, the trading price of our common stock may decline and you may lose all or part of your investment.

Business and Financial Risks

Based on our lack of significant revenue and recurring losses from operations since inception, our auditors have included an explanatory paragraph in their opinion as to the substantial doubt about our ability to continue as a going concern.

Due to, among other factors, our history of losses and limited revenue, our independent auditors have included an explanatory paragraph in their opinion for the year ended December 31, 2014 as to the substantial doubt about our ability to continue as a going concern. Our financial statements have been prepared in accordance with accounting principles generally accepted in the United States, which contemplate that we will continue to operate as a going concern. Our financial statements do not contain any adjustments that might result if we are unable to continue as a going concern.

Since our formation, we have historically generated minimal revenue and have sustained substantial operating losses which may continue.

As of September 30, 2015, we had an accumulated deficit of approximately \$58 million. In order to increase revenue, we have developed a direct sales force and anticipate the need to retain additional sales, marketing and technical support personnel and may need to incur substantial expenses. We cannot assure you that we will be able to secure these necessary resources, that a significant market for our technologies will develop, or that we will be able to achieve our targeted revenue. If we are unable to achieve revenue or raise capital sufficient to cover our ongoing operating expenses, we will be required to scale back operations, including marketing and research initiatives, or in the extreme case, discontinue operations.

Our biometric technology has yet to gain widespread market acceptance and we do not know whether a significant market will develop for our technology.

Biometric technology has received only limited market acceptance, particularly in the private sector. Our technology represents a novel security solution and we have not yet generated significant sales. Although recent security concerns relating to identification of individuals and appearance of biometric readers on popular consumer products, including the Apple iPhone 5S®, have increased interest in biometrics generally, it remains an undeveloped, evolving market. Biometric based solutions compete with more traditional security methods including keys, cards, personal identification numbers and security personnel. Acceptance of biometrics as an alternative to such traditional methods depends upon a number of factors including:

national or international events which may affect the need for or interest in biometric solutions;

the performance and reliability of biometric solutions;

marketing efforts and publicity regarding these solutions;

public perception regarding privacy concerns;

costs involved in adopting and integrating biometric solutions;

proposed or enacted legislation related to privacy of information; and

competition from non-biometric technologies that provide more affordable, but less robust, authentication (such as tokens and smart cards).

For these reasons, we are uncertain whether our biometric technology will gain widespread acceptance in any commercial markets or that demand will be sufficient to create a market large enough to produce significant revenue or earnings. Our future success depends, in part, upon business customers adopting biometrics generally, and our solution specifically.

Biometric technology is a new approach to Internet security which must be accepted in order for our WEB-key® solution to generate significant revenue.

Our WEB-key® authentication initiative represents a new approach to Internet security which has been adopted on a limited basis by companies which distribute goods, content or software applications over the Internet. The implementation of our WEB-key® solution requires the distribution and use of a finger scanning device and integration of database and server side software. Although we believe our solutions provide a higher level of security for information transmitted over the Internet than existing traditional methods, unless business and consumer markets embrace the use of a scanning device and believe the benefits of increased accuracy outweigh implementation costs, our solution will not gain market acceptance.

The market for our solutions is still developing and if the biometrics industry adopts standards or a platform different from our standards or platform, our competitive position would be negatively affected.

The market for identity solutions is still developing. The evolution of this market may result in the development of different technologies and industry standards that are not compatible with our current solutions, products or

technologies. Several organizations set standards for biometrics to be used in identification and documentation. Although we believe that our biometric technologies comply with existing standards, these standards may change and any standards adopted could prove disadvantageous to or incompatible with our business model and current or future solutions, products and services.

Our software products may contain defects which will make it more difficult for us to establish and maintain customers.

Although we have completed the development of our core biometric technology, it has only been used by a limited number of business customers. Despite extensive testing during development, our software may contain undetected design faults and software errors, or “bugs” that are discovered only after it has been installed and used by a greater number of customers. Any such defect or error in new or existing software or applications could cause delays in delivering our technology or require design modifications. These could adversely affect our competitive position and cause us to lose potential customers or opportunities. Since our technologies are intended to be utilized to secure physical and electronic access, the effect of any such bugs or delays will likely have a detrimental impact on us. In addition, given that biometric technology generally, and our biometric technology specifically, has yet to gain widespread acceptance in the market, any delays would likely have a more detrimental impact on our business than if we were a more established company.

In order to generate revenue from our biometric products, we are dependent upon independent original equipment manufacturers, system integrators and application developers, which we do not control. As a result, it may be more difficult to generate sales.

We market our technology through licensing arrangements with:

Original equipment manufacturers, system integrators and application developers which develop and market products and applications which can then be sold to end users; and

Companies which distribute goods, services or software applications over the Internet.

As a technology licensing company, our success will depend upon the ability of these manufacturers and developers to effectively integrate our technology into products and services which they market and sell. We have no control over these licensees and cannot assure you that they have the financial, marketing or technical resources to successfully develop and distribute products or applications acceptable to end users or generate any meaningful revenue for us. These third parties may also offer the products of our competitors to end users. While we have commenced a significant sales and marketing effort, we have only begun to develop a significant distribution channel and may not have the resources or ability to sustain these efforts or generate any meaningful sales.

We face intense competition and may not have the financial and human resources necessary to keep up with rapid technological changes, which may result in our technology becoming obsolete.

The Internet, facility access control and information security markets are subject to rapid technological change and intense competition. We compete with both established biometric companies and a significant number of startup enterprises as well as providers of more traditional methods of access control. Most of our competitors have substantially greater financial and marketing resources than we do and may independently develop superior technologies, which may result in our technology becoming less competitive or obsolete. We may not be able to keep pace with this change. If we are unable to develop new applications or enhance our existing technology in a timely manner in response to technological changes, we will be unable to compete in our chosen markets. In addition, if one or more other biometric technologies such as voice, face, iris, hand geometry or blood vessel recognition are widely adopted, it would significantly reduce the potential market for our fingerprint identification technology.

We depend on key employees and members of our management team, including our Chairman of the Board and Chief Executive Officer and our Chief Technology Officer, in order to achieve our goals. We cannot assure you that we will be able to retain or attract such persons.

Our employment contracts with Michael W. DePasquale, our Chairman of the Board and Chief Executive Officer, and Mira LaCous, our Chief Technology Officer, expire in each year, and renew automatically for successive one year periods unless notice of non-renewal is provided by the Company. Although the contracts do not prevent them from resigning, they do contain confidentiality and non-compete clauses which are intended to prevent them from working for a competitor within one year after leaving our Company. Our success depends on our ability to attract, train and retain employees with expertise in developing, marketing and selling software solutions. In order to successfully market our technology, we will need to retain additional engineering, technical support and marketing personnel. The market for such persons remains highly competitive and our limited financial resources will make it more difficult for us to recruit and retain qualified persons.

We cannot assure you that the intellectual property protection for our core technology provides a sustainable competitive advantage or barrier to entry against our competitors.

Our success and ability to compete is dependent in part upon proprietary rights to our technology. We rely primarily on a combination of patent, copyright and trademark laws, trade secrets and technical measures to protect our propriety rights. We have filed a patent application relating to both the optic technology and biometrics solution components of our technology wherein several claims have been allowed. The U.S. Patent and Trademark Office has issued us a series of patents for our Vector Segment fingerprint technology (VST), and our other core biometric analysis and identification technologies. However, we cannot assure you that we will be able to adequately protect our technology or other intellectual property from misappropriation in the U.S. and abroad. Any patent issued to us could be challenged, invalidated or circumvented or rights granted thereunder may not provide a competitive advantage to us. Furthermore, patent applications that we file may not result in issuance of a patent or, if a patent is issued, the patent may not be issued in a form that is advantageous to us. Despite our efforts to protect our intellectual property rights, others may independently develop similar products, duplicate our products or design around our patents and other rights. In addition, it is difficult to monitor compliance with, and enforce, our intellectual property rights on a worldwide basis in a cost-effective manner. In jurisdictions where foreign laws provide less intellectual property protection than afforded in the U.S. and abroad, our technology or other intellectual property may be compromised, and our business would be materially adversely affected. If any of our proprietary rights are misappropriated or we are forced to defend our intellectual property rights, we will have to incur substantial costs. Such litigation could result in substantial costs and diversion of our resources, including diverting the time and effort of our senior management, and could disrupt our business, as well as have a material adverse effect on our business, prospects, financial condition and results of operations. We can provide no assurance that we will have the financial resources to oppose any actual or threatened infringement by any third party. Furthermore, any patent or copyrights that we may be granted may be held by a court to infringe on the intellectual property rights of others and subject us to the payment of damage awards.

We may be subject to claims with respect to the infringement of intellectual property rights of others, which could result in substantial costs and diversion of our financial and management resources.

Third parties may claim that we are infringing on their intellectual property rights. We may violate the rights of others without our knowledge. We may expose ourselves to additional liability if we agree to indemnify our customers against third party infringement claims. While we know of no basis for any claims of this type, the existence of and ownership of intellectual property can be difficult to verify and we have not made an exhaustive search of all patent filings. Additionally, most patent applications are kept confidential for twelve to eighteen months, or longer, and we would not be aware of potentially conflicting claims that they make. We may become subject to legal proceedings and claims from time to time relating to the intellectual property of others in the ordinary course of our business. If we are found to have violated the intellectual property rights of others, we may be enjoined from using such intellectual property, and we may incur licensing fees or be forced to develop alternative technology or obtain other licenses. In addition, we may incur substantial expenses in defending against these third party infringement claims and be diverted from devoting time to our business and operational issues, regardless of the merits of any such claim.

In addition, in the event that we recruit employees from other technology companies, including certain potential competitors, and these employees are used in the development of portions of products which are similar to the development in which they were involved at their former employers, we may become subject to claims that such employees have improperly used or disclosed trade secrets or other proprietary information. If any such claims were to arise in the future, litigation or other dispute resolution procedures might be necessary to retain our ability to offer our current and future services, which could result in substantial costs and diversion of our financial and management resources. Successful infringement or licensing claims against us may result in substantial monetary damages, which may materially disrupt the conduct of our business and have a material adverse effect on our reputation, business, financial condition and results of operations. Even if intellectual property claims brought against us are without merit, they could result in costly and time consuming litigation, and may divert our management and key personnel from operating our business.

If we are unable to effectively protect our intellectual property rights on a worldwide basis, we may not be successful in the international expansion of our business.

Access to worldwide markets depends in part on the strength of our intellectual property portfolio. There can be no assurance that, as our business expands into new areas, we will be able to independently develop the technology, software or know-how necessary to conduct our business or that we can do so without infringing the intellectual property rights of others. To the extent that we have to rely on licensed technology from others, there can be no assurance that we will be able to obtain licenses at all or on terms we consider reasonable. The lack of a necessary license could expose us to claims for damages and/or injunction from third parties, as well as claims for indemnification by our customers in instances where we have a contractual or other legal obligation to indemnify them against damages resulting from infringement claims. With regard to our own intellectual property, we actively enforce and protect our rights. However, there can be no assurance that our efforts will be adequate to prevent the misappropriation or improper use of our protected technology in international markets.

We face inherent product liability or other liability risks that could result in large claims against us.

We have inherent risk of exposure to product liability and other liability claims resulting from the use of our products, especially to the extent customers may depend on our products in public safety situations that may involve physical harm or even death to individuals, as well as exposure to potential loss or damage to property. Despite quality control systems and inspection, there remains an ever-present risk of an accident resulting from a faulty manufacture or maintenance of products, or an act of an agent outside of our or our supplier's control. Even if our products perform properly, we may become subject to claims and costly litigation due to the catastrophic nature of the potential injury and loss. A product liability claim, or other legal claims based on theories including personal injury or wrongful death, made against us could adversely affect operations and financial condition. Although we may have insurance to cover product liability claims, the amount of coverage may not be sufficient.

We expect that we will need to obtain additional financing to execute our business plan over the long-term, which may not be available. If we are unable to raise additional capital or generate significant revenue, we may not be able to continue operations.

We have historically financed our operations through access to the capital markets by issuing secured and convertible debt securities, convertible preferred stock, common stock, and recently through factoring receivables. We estimate that we currently require approximately \$512,000 per month to conduct our operations, a monthly amount that we have been unable to consistently achieve through revenue generation. During the first nine months of 2015, we generated approximately \$3,591,000 of revenue, which is below our average monthly requirements. With the addition of the dividend obligations for the Series A-1 and B-1 shares, our monthly amount will increase by approximately \$63,000. With our recent fourth quarter capital raise, we believe our current cash resources are sufficient to fund our operations for at least the next twelve months. If we are unable to generate sufficient revenue to cover operating expenses and fund our business plan, we will need to obtain additional third-party financing to (i) conduct the sales, marketing and technical support necessary to execute our plan to substantially grow operations, increase revenue and serve a significant customer base; and (ii) provide working capital. We may, therefore, need to obtain additional financing through the issuance of debt or equity securities. We cannot assure you that we will be able to secure any such additional financing on terms acceptable to us or at all. If we cannot obtain such financing, we will not be able to execute our business plan, will be required to reduce operating expenses, and in the extreme case, discontinue operations.

We may not achieve sustainable profitability with respect to the biometric component of our business if we are unable to maintain, improve and develop the wireless data services we offer.

We believe that our future business prospects depend in part on our ability to maintain and improve our current services and to develop new ones on a timely basis. Our services will have to achieve market acceptance, maintain technological competitiveness, and meet an expanding range of customer requirements. As a result of the complexities inherent in our service offerings, major new wireless data services and service enhancements require long development and testing periods. We may experience difficulties that could delay or prevent the successful development, introduction or marketing of new services and service enhancements. Additionally, our new services and service enhancements may not achieve market acceptance. If we cannot effectively develop and improve services, we may not be able to recover our fixed costs or otherwise become profitable.

If we fail to adequately manage our resources, it could have a severely negative impact on our financial results.

We could be subject to fluctuations in technology spending by existing and potential customers. Accordingly, we will have to actively manage expenses in a rapidly changing economic environment. This could require reducing costs during economic downturns and selectively growing in periods of economic expansion. If we do not properly manage our resources in response to these conditions, our results of operations could be negatively impacted.

Our business could be negatively impacted by security threats, including cybersecurity threats, and other disruptions.

As a technology company, we face various security threats, including cybersecurity threats to gain unauthorized access to sensitive information. Although we utilize various procedures and controls to monitor these threats and mitigate our exposure to such threats, there can be no assurance that these procedures and controls will be sufficient in preventing security threats from materializing. If any of these events were to materialize, they could lead to losses of sensitive information, critical infrastructure, personnel or capabilities, essential to our operations and could have a material adverse effect on our reputation, financial position, results of operations, or cash flows.

Cybersecurity attacks in particular are evolving and include but are not limited to, malicious software, attempts to gain unauthorized access to data, and other electronic security breaches that could lead to disruptions in critical systems, unauthorized release of confidential or otherwise protected information and corruption of data. These events could damage our reputation and lead to financial losses from remedial actions, loss of business or potential liability.

Risks Related To Our Common Stock

We have issued a substantial number of securities that are convertible into shares of our common stock which could result in substantial dilution to the ownership interests of our existing stockholders.

As of the date of this prospectus, approximately 90,038,417 shares of our common stock were reserved for issuance upon exercise or conversion of outstanding stock options, convertible preferred stock and warrants. The exercise or conversion of these securities will result in a significant increase in the number of outstanding shares and substantially dilute the ownership interests of our existing stockholders.

The availability of a substantial number of shares of our common stock for public sale may cause the price of our common stock to decline.

This prospectus covers the public resale of 65,000,000 shares of our common stock, including 30,000,000 shares of common stock issuable upon conversion of Series A-1 Convertible Preferred Stock issued in our October 2015 and November 2015 private offerings and 35,000,000 shares of common stock issuable upon conversion of Series B-1 Convertible Preferred Stock issued in our November 2015 private offering. The Series A-1 Convertible Preferred Stock and Series B-1 Convertible Preferred stock are each subject to a “blocker provision” which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. Absent such blocker provisions, the shares of common stock being offered by the selling security holders represent approximately 98% of our outstanding shares. In addition, we have effective registration statements covering the public resale of an aggregate of 18,061,172 shares of common stock issuable upon exercise of warrants exercisable between \$0.30 and \$0.50 per share, and 17,581,618 shares of issued and outstanding common stock. The availability of these shares for sale to the public, whether or not sales have occurred or are occurring, and the sale of such shares in the public markets could have an adverse effect on the market price of our common stock. Such an adverse effect on the market price would make it more difficult for us to raise additional financing through the sale of equity or equity-related securities in the future at a time and price that we deem reasonable or appropriate.

Applicable SEC Rules governing the trading of “penny stocks” limits the trading and liquidity of our common stock, which may adversely affect the trading price of our common stock and the ability to sell our shares.

Our common stock currently trades on the OTCQB. Since our common stock continues to trade below \$5.00 per share, our common stock is considered a “penny stock” and is subject to SEC rules and regulations, which impose limitations upon the manner in which our shares can be publicly traded. These regulations require the delivery, prior to any transaction involving a penny stock, of a disclosure schedule explaining the penny stock market and the associated risks. Under these regulations, certain brokers who recommend such securities to persons other than

established customers or certain accredited investors must make a special written suitability determination regarding such a purchaser and receive such purchaser's written agreement to a transaction prior to sale. These regulations have the effect of limiting the trading activity of our common stock and reducing the liquidity of an investment in our common stock.

We intend to raise additional funds in the future through issuances of securities and such additional funding may be dilutive to stockholders or impose operational restrictions.

We expect that we will need to raise additional capital in the future to help fund our operations through sales of shares of our common stock or securities convertible into shares of our common stock, as well as issuances of debt. Such additional financing may be dilutive to our stockholders, and debt financing, if available, and may involve restrictive covenants which may limit our operating flexibility. If additional capital is raised through the issuance of shares of our common stock or securities convertible into shares of our common stock, the percentage ownership of existing stockholders will be reduced. These stockholders may experience additional dilution in net book value per share and any additional equity securities may have rights, preferences and privileges senior to those of the holders of our common stock.

Because we do not expect to pay dividends on our common stock for the foreseeable future, investors seeking cash dividends should not purchase shares of common stock.

We have never declared or paid any cash dividends on our common stock. Our Series A-1 Convertible Preferred Stock accrues dividends at the rate of 6% per annum payable quarterly on April 1, July 1, October 1 and January 1 of each year, payable in cash through October 1, 2017 and thereafter, in cash or kind through the issuance of additional shares of common stock. Our Series B-1 Convertible Preferred Stock accrues dividends at the rate of 2.5% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash. Following the payment of dividends on our Series A-1 and B-1 Convertible Preferred Stock, we currently intend to retain future earnings, if any, to finance the expansion of our business. As a result, we do not anticipate paying any cash dividends on our common stock in the foreseeable future. Our payment of any future dividends will be at the discretion of our board of directors after taking into account various factors, including but not limited to our financial condition, operating results, cash needs, growth plans and the terms of any credit agreements that we may be a party to at the time. Accordingly, investors seeking cash dividends should not purchase shares of our common stock.

Provisions of our certificate of incorporation, bylaws and Delaware law may make a contested takeover of our Company more difficult.

Certain provisions of our certificate of incorporation, bylaws and the General Corporation Law of the State of Delaware ("DGCL") could deter a change in our management or render more difficult an attempt to obtain control of us, even if such a proposal is favored by a majority of our stockholders. For example, we are subject to the provisions of the DGCL that prohibit a public Delaware corporation from engaging in a broad range of business combinations with a person who, together with affiliates and associates, owns 15% or more of the corporation's outstanding voting shares (an "interested stockholder") for three years after the person became an interested stockholder, unless the business combination is approved in a prescribed manner. Our certificate of incorporation also includes undesignated preferred stock, which may enable our board of directors to discourage an attempt to obtain control of us by means of a tender offer, proxy contest, merger or otherwise. Finally, our bylaws include an advance notice procedure for stockholders to nominate directors or submit proposals at a stockholders meeting. Delaware law and our charter may, therefore, inhibit a takeover.

The trading price of our common stock may be volatile.

The trading price of our shares has from time to time fluctuated widely and in the future may be subject to similar fluctuations. The trading price may be affected by a number of factors including the risk factors set forth in this prospectus as well as our operating results, financial condition, announcements of innovations or new products by us or our competitors, general conditions in the biometrics and access control industries, and other events or factors. We cannot assure you that any of the broker-dealers that currently make a market in our common stock will continue to serve as market makers or have the financial capability to stabilize or support our common stock. A reduction in the number of market makers or the financial capability of any of these market makers could also result in a decrease in the trading volume of and price of our shares. In recent years broad stock market indices, in general, and the securities of technology companies, in particular, have experienced substantial price fluctuations. Such broad market fluctuations may adversely affect the future-trading price of our common stock.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

The information contained in this prospectus contains certain forward-looking statements. All statements other than statements of historical facts contained or incorporated by reference in this prospectus, including statements regarding our future financial position, business strategy and plans and objectives of management for future operations, are forward-looking statements. The words "anticipate," "believe," "estimate," "will," "may," "future," "plan," "intend," "expect" and similar expressions generally identify forward-looking statements. These forward-looking statements are not guarantees and are subject to known and unknown risks, uncertainties and assumptions that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Although we believe

that our plans, intentions and expectations reflected in the forward-looking statements are reasonable, we cannot be sure that they will be achieved. Particular uncertainties that could cause our actual results to be materially different than those expressed in our forward-looking statements include: our history of losses and limited revenue; our ability to raise additional capital; our ability to protect our intellectual property; changes in business conditions; changes in our sales strategy and product development plans; changes in the marketplace; continued services of our executive management team; security breaches; competition between us and other companies in the biometric technology industry; market acceptance of biometric products generally and our products under development; delays in the development of products, and statements of assumption underlying any of the foregoing, as well as other factors set forth under the caption “**Risk Factors**” on page 2 of this prospectus. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the foregoing. Except as required by law, we undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations, and other parts of this prospectus contain forward-looking statements that involve risks and uncertainties. All forward-looking statements included in this prospectus are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of a number of factors, including those set forth in the section captioned "Risk Factors" on page 2 of this prospectus. The following should be read in conjunction with our audited financial statements and the accompanying notes included elsewhere herein.

OVERVIEW

We develop and market advanced fingerprint biometric identification and identity verification technologies, cryptographic authentication-transaction security technologies, as well as related identity management and credentialing software solutions. We were pioneers in developing automated, finger identification technology that supplements or compliments other methods of identification and verification, such as personal inspection identification, passwords, tokens, smart cards, ID cards, PKI, credit cards, passports, driver's licenses, OTP or other form of possession or knowledge-based credentialing. Advanced BIO-key® technology has been and is used to improve both the accuracy and speed of competing finger-based biometrics.

In partnerships with OEMs, integrators, and solution providers, we provide biometric software solutions to private and public sector customers. We provide the ability to positively identify and authenticate individuals before granting access to valuable corporate resources, web portals or applications in seconds. Powered by our patented Vector Segment Technology™ or VST™, WEB-key® and BSP development kits are fingerprint biometric solutions that provide interoperability with all major reader manufacturers, enabling application developers and integrators to integrate fingerprint biometrics into their applications. Our turnkey hardware and software solutions, including compact finger readers which can be used to log onto any device with a USB port, provide cost effective easily deployable user authentication system. Our software is also integrated with Windows 10 to deliver fast, secure and convenient access to authorized users.

We have developed what we believe is the most discriminating and effective commercially available finger-based biometric technology. Our primary focus is in marketing and selling this technology into commercial logical and physical privilege entitlement & access control markets. Our primary market focus includes, among others, mobile payments & credentialing, online payments and credentialing, and healthcare record and payment data security. Our secondary focus includes government markets, primarily law enforcement forensic investigation and Homeland

Security. Our solutions are used by hospitals, clinics and private practices to secure access to patient records, by blood centers to identify donors, by schools to identify students for attendance, lunch programs and transportation, by standardized testing organizations to identify exam candidates, and financial institutions to authenticate ATM transactions and mobile transactions.

STRATEGIC OUTLOOK AND RECENT DEVELOPMENTS

Historically, our largest market has been access control within highly regulated industries such as healthcare. However, we believe the mass adoption of advanced smart-phone and hand-held wireless devices have caused commercial demand for advanced user authentication to emerge as viable. The introduction of smart-phone capabilities, like mobile payments and credentialing, could effectively require biometric user authentication on mobile devices to reduce risks of identity theft, payment fraud and other forms of fraud in the mobile or cellular based world wide web. As more services and payment functionalities, such as mobile wallets and near field communication (NFC), migrate to smart-phones, the value and potential risk associated with such systems should grow and drive demand and adoption of advanced user authentication technologies, including fingerprint biometrics and BIO-key solutions.

In October 2013, Apple Computer Corporation released the Apple iPhone 5s smartphone (“5s”). We believe the 5s to be the first broadly distributed smartphone to incorporate fingerprint biometrics in the phone. Since that time, HTC Corporation has also released a fingerprint biometric enabled smartphone. We believe other smartphone, tablet, laptop and related smart-device manufacturers will additionally make fingerprint-enabled smart devices available for consumer applications. As devices with onboard fingerprint sensors continue to deploy to consumers, we expect that third party application developers will demand the ability to authenticate users of their respective applications (app’s) with the onboard fingerprint biometric. We further believe that authentication will occur on the device itself for potentially low-value, and therefore low-risk, use-transactions and that user authentication for high-value transactions will migrate to the application provider’s authentication server, typically located within their supporting technology infrastructure, or cloud. We have developed our technology to enable, on-device authentication as well as network or cloud-based authentication and believe we may be the only technology vendor capable of providing this flexibility and capability.

We believe there is potential for significant market growth in three key areas:

corporate network access control, including corporate campuses, computer networks and applications;

consumer mobile credentialing, including mobile payments, credit and payment card programs, data and application access, and commercial loyalty programs; and

government services and highly regulated industries, including Medicare, Medicaid, Social Security, drivers licenses, campus and school ID, passports/visas.

In the near-term, we expect to grow our business within government services and highly-regulated industries in which we have historically had a strong presence, such as the healthcare industry. We believe that continued heightened security and privacy requirements in these industries will generate increased demand for security solutions, including biometrics.

Over the longer term, we intend to expand our business into the cloud and mobile computing industries. The emergence of cloud computing and mobile computing are primary drivers of commercial and consumer adoption of advanced authentication applications, including biometric and BIO-key authentication capabilities. As the value of assets, services and transactions increases on such networks, we expect that security and user authentication demand should rise proportionately. Our integration partners include major web and network technology providers, who we believe will deliver our cloud-applicable solutions to interested service-providers. These service-providers could include, but are not limited to, financial institutions, web-service providers, consumer payment service providers, credit reporting services, consumer data service providers, healthcare providers and others. Additionally, our integration partners include major technology component providers and OEM manufacturers, who we believe will deliver our device-applicable solutions to interested hardware manufacturers. Such manufacturers could include cellular handset and smartphone manufacturers, and tablet manufacturers.

We recently entered the Asian market through a licensing arrangement with affiliates of China Goldjoy Group Limited, a Hong Kong based public company engaged in technology development, including biometric security ("CGG"). Under this arrangement, our Hong Kong subsidiary has secured exclusive rights to CGG's point-to-point identification solutions using biometric encryption & decryption technologies, known as FingerQ. This portfolio includes 16 patents focused on, among other things, mobile payment systems and mobile payment methods based on biometric authentication as well finger print authentication systems and a finger print authentication method based on NFC. The license arrangement also allows us to create new, innovative solutions to address the growing demand for secure mobile transactions.

RESULTS OF OPERATIONS

**Three Months Ended September 30, 2015, compared to the Three Months Ended September 30, 2014
(Unaudited)**

<i>Total COGS</i>	<i>\$ 374,840</i>	<i>\$ 243,954</i>	<i>\$ 130,886</i>	<i>54</i>	<i>%</i>

Revenues

For the three months ended September 30, 2015 and 2014, service revenues included approximately \$229,000 and \$179,000, respectively, of recurring maintenance and support revenue, and approximately \$21,000 and \$317,000 of non-recurring custom services revenue, respectively. Recurring service revenue increased 28% during the current period primarily due to the maintenance agreement from the large shipment in the second quarter of 2015. The non-recurring custom services decreased 93% due to a customer project that was completed at year-end 2014.

License and other revenue (comprised of third party hardware and royalties) decreased during the three months ended September 30, 2015. The decrease consisted of an approximate \$605,000 or 97% decrease in our core software, offset by a \$234,000 or 164% increase in third party hardware sales as a result of increased OEM demands, selling sensors to a reader manufacturer, and a variety of smaller proof of concept trial orders, offset by a 15% increase in royalty revenue from another OEM arrangement.

Costs of goods sold

During the three months ended September 30, 2015, cost of services decreased approximately \$114,000 from the corresponding period in 2014 due to decreased associated requirements for non-recurring custom services revenue.

License and other costs for the three months ended September 30, 2015 increased \$245,000 from the corresponding period in 2014 due to the hardware sold and associated cost.

Selling, general and administrative

Three months ended

September 30,

2015	2014	\$ Change	% Change
-------------	-------------	----------------------	---------------------

Selling, general and administrative	\$1,013,778	\$989,521	\$24,257	2	%
--	-------------	-----------	----------	---	---

Selling, general and administrative expenses increased 2% during the three months ended September 30, 2015 from the corresponding period in 2014. Increases consisted of increased professional fees and costs related to the settlement of the LifeSouth lawsuit, and factoring fees, offset by lower commissions related to decreased sales.

Research, development and engineering

	Three months ended		\$	%	
	September 30, 2015	September 30, 2014			
			Change	Change	
Research, development and engineering	\$368,788	\$324,992	\$43,796	13	%

During the three months ended September 30, 2015, research, development and engineering costs increased 13% over the corresponding period in 2014. During 2014, some of the R&D projects were paid for by a third party and, therefore, the associated costs were reclassified resulting in a decrease in research, development and engineering costs of approximately \$100,000. Accordingly, total R&D costs were reduced for the current quarter by approximately \$56,000 due to reduced temporary personal costs, offset by increased personnel costs in 2015.

Other income and expense

	Three months ended		\$	%	
	September 30, 2015	September 30, 2014			
			Change	Change	
Interest income	1	2	(1)	-50	%
Interest expense	(20,000)	-	(20,000)	100	%
Gain on derivative liabilities	27,975	223,892	(195,917)	-88	%
Income taxes	-	(800)	800	-100	%

Total	\$7,976	223,094	\$(215,118)	-96	%
--------------	---------	---------	-------------	-----	---

Interest income for the quarter ended September 30, 2015 and September 30, 2014 consisted of bank interest.

Interest expense for the quarter ended September 30, 2015 represents the amortized portion of the original issue discount of and the interest charge the loan.

During the fourth quarters of 2013 and 2014 and third quarter of 2015, we issued various warrants that contained derivative liabilities. Such derivative liabilities are required to be marked-to-market each reporting period.

NINE MONTHS ENDED SEPTEMBER 30, 2015 AS COMPARED TO SEPTEMBER 30, 2014

<i>Total COGS</i>	<i>\$659,590</i>	<i>\$522,429</i>	<i>\$137,161</i>	<i>26</i>	<i>%</i>

Revenues

For the nine months ended September 30, 2015 and 2014, service revenues included approximately \$506,000 and \$472,000, respectively, of recurring maintenance and support revenue, and approximately \$250,000 and \$555,000, respectively, of non-recurring custom services revenue. Recurring service revenue increased 7% from 2014 to 2015 as we continued to expand our customer base. The non-recurring custom services decreased 55% due to a customer project that was completed at year-end 2014.

For the nine months ended September 30, 2015, license and other revenue (comprised of third party hardware and royalty) increased approximately 40% as a result of several contributing factors. Software license revenue increased approximately \$516,000 or 32% as a result of licenses purchased for both new and existing customers. This included one large order shipped in the second quarter and continued expansion of biometric ID deployments with commercial partners LexisNexis, Educational Biometric Technology, and Identimetrics, and continued expansion of our footprint in the healthcare market. Third-party hardware sales increased by approximately \$273,000 or 79%, as a result of increased OEM demands, selling sensors to a reader manufacturer, and a variety of smaller proof-of-concept trial orders. Finally, royalty income increased 35% to approximately \$81,000 from \$62,000 during the corresponding period in 2014 due to an additional OEM contract.

Costs of goods sold

For the nine months ended September 30, 2015, cost of service decreased approximately \$142,000 from the corresponding period in 2014 primarily as a result of costs associated with non-recurring custom services decreased revenue. License and other costs for the nine months ended September 30, 2015 increased approximately \$279,000 from the corresponding period in 2013, due to the increase in third party hardware revenue.

Selling, general and administrative

Nine months ended					
September 30,					
	2015	2014	\$ Change	% Change	
Selling, general and administrative	\$3,034,318	\$2,741,665	\$292,653	10	%

Selling, general and administrative expenses for the nine months ended September 30, 2015 increased 10% from the corresponding period in 2014. Increases included factoring fees, litigation settlement costs, and sales recruiting costs.

Research, development and engineering

Nine months ended					
September 30,					
	2015	2014	\$ Change	% Change	
Research, development and engineering	\$1,169,427	\$1,282,536	\$(113,109)	-9	%

During the nine months ended September 30, 2015, research, development and engineering costs decreased 9% from the corresponding period in 2014, due to reduced temporary outside services for specific projects. Some of the projects were paid for by a third party in 2014 and, therefore, the associated costs were reclassified and are not included in the 9% decrease.

Other income and expense

Nine months ended	
September 30,	
2015	2014

			\$ Change	% Change

<i>Total COGS</i>	<i>\$748,750</i>	<i>\$387,028</i>	<i>\$361,722</i>	<i>93 %</i>

Revenues

For the years ended December 31, 2014 and 2013, service revenues included approximately \$627,000 and \$662,000, respectively, of recurring maintenance and support revenue, and approximately \$863,000 and \$326,000, respectively, of non-recurring custom services revenue. Recurring service revenue decreased 5% from 2013 to 2014 as the increase in bundled maintenance agreements to our expanding customer license base was offset by the delay in a large deployment renewal. Non-recurring custom services increased 165% due to a customer project that was completed at the end of 2014.

For the years ended December 31, 2014 and 2013, license and other revenue (comprised of third party hardware and royalty) increased approximately 152% as a result of several contributing factors. Software license revenue increased by approximately \$1,474,000 or 300% during the year ended December 31, 2014 compared to December 31, 2013, as we expanded our relationship with NCR, developed new partnerships, continued to ship orders from Aesynt (formerly McKesson) for their continued deployment of our identification technology in their AccuDose® product line, and for ongoing expansion of biometric ID deployments with commercial partners LexisNexis, Educational Biometric Technology, and Identimetrics. Third-party hardware sales increased by approximately \$72,000 (18%), as a result of new and expanding healthcare industry deployments. Royalty income, from an OEM agreement, for the year ended December 31, 2014, decreased 24% to approximately \$87,000 from \$115,000 during the corresponding period in 2013, due to a cancelled international contract.

Costs of goods sold

For the year ended December 31, 2014, cost of service increased approximately \$300,000 primarily as a result of costs associated with non-recurring custom services revenue. License and other costs for the year ended December 31, 2014 increased approximately \$62,000 due primarily to the increase in third party hardware revenue.

Selling, general and administrative**2014 - 2013**

	2014	2013	\$ Chg	% Chg
Total	\$3,670,090	\$2,776,559	\$893,531	32 %

Selling, general and administrative expenses for the year ended December 31, 2014 increased 32% from the corresponding period in 2013. Increases were driven by expanded sales and marketing personnel, channel marketing and commission expense associated with increased revenue, trade show attendance, travel, factoring fees, and non-cash compensation from the issuance of stock options. The forgoing increases were offset by a decrease in legal fees.

Research, development and engineering**2014 - 2013**

	2014	2013	\$ Chg	% Chg
Total	\$1,626,136	\$1,344,070	\$282,066	21 %

For the year ended December 31, 2014, research, development and engineering costs increased 21% as we engaged temporary outside consulting services, and hired additional personnel for specific projects.

Other income and expense**2013-2014**

	2014	2013	\$ Chg	% Chg
Interest income	\$7	\$7	\$—	—
Interest expense	—	(136,484)	136,484	100 %
Income tax	(1,712)	(2,805)	1,093	-39 %
Gain on derivative liabilities	157,253	78,812	78,441	100 %
	\$155,548	\$(60,470)	\$216,018	357 %

The interest expense for the fiscal year ended 2013 was attributable to the related party note payable and the InterDigital Note, both of which were repaid in full during the year. Interest expense in 2013 also included the amortization of deferred costs with respect to the issuance of the InterDigital Note in February 2013 in the amount of \$107,203. As the note and all accumulated interest payable were repaid by the Company in November 2013, the remaining deferred cost balance was expensed at that time.

Interest income for the years ended December 31, 2014 and 2013 consisted of bank interest.

During the fourth quarter of 2013, we issued various warrants that contained derivative liabilities. Such derivative liabilities are required to be marked-to-market each reporting period.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

Net cash used for operations during the nine months ended September 30, 2015 was approximately \$974,000. The cash used in operating activities was primarily attributable to the following items:

Positive cash flows related to an increase in accounts payable, as well as adjustments to depreciation, amortization, share-based compensation, and amortization on note payable discount of approximately \$1,281,000.

Negative cash flows related to an increase in accounts receivable, net of due to factor of approximately \$930,000, due to working capital management.

Net cash used for investing activities during the nine months ended September 30, 2015 was approximately \$2,000 and related to capital expenditures.

Net cash provided by financing activities during the nine months ended September 30, 2015 was approximately \$204,000. \$250,000 was due to the issuance of a promissory note partially offset by \$58,000 of costs to issue common stock.

Net working capital deficit at September 30, 2015 was approximately \$512,000 as compared to net working capital of approximately \$485,000 at December 31, 2014.

Capital Resources

Since our inception, our capital needs have been principally met through proceeds from the sale of equity and debt securities. We expect capital expenditures to be less than \$100,000 during the next twelve months. We do not currently maintain a line of credit or term loan with any commercial bank or other financial institution.

The following sets forth our primary sources of capital since January 1, 2013:

As of December 2011, we entered into a 24-month accounts receivable factoring arrangement with a financial institution (the “Factor”). Pursuant to the terms of this arrangement, from time to time, we sell to the Factor certain of our accounts receivable balances on a non-recourse basis for credit approved accounts. The Factor remits 35% of the foreign and 75% of the domestic accounts receivable balance to the Company (the “Advance Amount”), with the remaining balance, less fees to be forwarded to the Company once the Factor collects the full accounts receivable balance from the customer. In addition, the Company, from time to time, receives over advances from the factor. Factoring fees range from 2.75% to 21% of the face value of the invoice factored, and are determined by the number of days required for collection of the invoice. In April 2012, the terms were updated from monthly to quarterly, and the 24-month arrangement was extended to August 1, 2014. In July of 2014, the arrangement was extended to July 31, 2016. We expect to continue to use this factoring arrangement periodically to assist with our general working capital requirements due to contractual requirements.

On February 26, 2013, we issued a promissory note in the principal amount of \$497,307 (the “InterDigital Note”) to DRNC. The InterDigital Note accrued interest at a rate of 7% per annum and was scheduled to mature on December 31, 2015. A portion of the proceeds from the sale of the InterDigital Note was used to repay the Colatosti Note in full, and the remaining proceeds were used for general corporate purposes. On November 22, 2013, we repaid in full the

\$497,307 balance due under the InterDigital Note.

On February 26, 2013, we issued 2,013,468 shares of common stock to DRNC for an aggregate purchase price of \$402,693. On February 26, 2013, we also issued 2,500,000 shares of common stock to a limited number of investors for an aggregate purchase price of \$500,000.

On July 23, 2013, we issued units to certain investors consisting of 1,750,003 shares of our common stock and warrants to purchase an additional 1,750,003 shares of our common stock at a purchase price \$0.60 per unit, for an aggregate purchase price of \$1,050,000. The warrants were originally exercisable at \$0.80 per share and expire five years after the date of the grant. On December 2, 2013, we agreed to reduce the exercise price of the warrants to \$0.50 per share.

On October 25 and November 8, 2013, we issued an aggregate of 12,323,668 units consisting of 12,323,668 shares of common stock and warrants to purchase an additional 12,323,668 shares of common stock at a purchase price \$0.30 per unit for an aggregate purchase price of \$3,697,100 prior to a deduction for placement agent fees and expenses. The warrants are exercisable at \$0.50 per share and expire three years after the date of the grant.

In November 2014, we issued an aggregate of 7,974,999 shares of our common stock and warrants to purchase an additional 11,962,501 shares of common stock for an aggregate purchase price of \$1,595,000. The warrants have a term of five years and an exercise price of \$0.30 per share.

On September 23, 2015, we issued a promissory note and a warrant to purchase 833,333 shares of common stock for an aggregate principal sum of \$250,000. The warrants have a term of five years and have an exercise price of \$0.30 per share. The note was repaid in full in October 2015.

On October 22 and 29, 2015, we issued 84,500 shares (the “Series A-1 Shares”) of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for aggregate gross proceeds of \$8,450,000. The Series A-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share, subject to adjustment for stock dividends, stock splits, combinations, and reclassifications of our capital stock, and subject to a “blocker provision” which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. The Series A-1 Shares accrue dividends at the rate of 6% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash through October 1, 2017 and thereafter, in cash or kind through the issuance of additional shares of common stock having a value equal to the volume weighted average trading price of the Company’s common stock for the ten (10) days preceding the applicable dividend payment date.

On November 11, 2015, we issued 105,000 shares (the “Series B-1 Shares”) of Series B-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross proceeds of \$10,500,000, and 5,500 additional shares of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross cash proceeds of \$550,000. The Series B-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share, subject to adjustment for stock dividends, stock splits, combinations, and reclassifications of our capital stock, and subject to a “blocker provision” which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. The Series B-1 Shares accrue dividends at the rate of 2.5% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash.

Liquidity outlook

As of September 30, 2015, our total cash and cash equivalents were approximately \$72,000, as compared to approximately \$844,000 at December 31, 2014.

As discussed above, we have historically financed our operations through access to the capital markets by issuing secured and convertible debt securities, convertible preferred stock, common stock, and recently through factoring receivables. We estimate that we currently require approximately \$512,000 per month to conduct our operations, a monthly amount that we have been unable to consistently achieve through revenue generation. During the first nine months of 2015, we generated approximately \$3,591,000 of revenue, which is below our average monthly requirements. With the addition of the dividend obligations for the Series A-1 and B-1 shares, our monthly amount will increase by approximately \$63,000. With our recent fourth quarter capital raise, we believe our current cash resources are sufficient to fund our operations for at least the next twelve months.

If we are unable to continue to generate sufficient revenue to meet our goals, we will need to obtain additional third-party financing to (i) conduct the sales, marketing and technical support necessary to execute our plan to substantially grow operations, increase revenue and serve a significant customer base; and (ii) provide working

capital. We may, therefore, need to obtain additional financing through the issuance of debt or equity securities.

Due to several factors, including our history of losses and limited revenue, our independent auditors have included an explanatory paragraph in their opinion related to our annual financial statements as to the substantial doubt about our ability to continue as a going concern. Our long-term viability and growth will depend upon the successful commercialization of our technologies and our ability to obtain adequate financing. To the extent that we require such additional financing, no assurance can be given that any form of additional financing will be available on terms acceptable to us, that adequate financing will be obtained to meet our needs, or that such financing would not be dilutive to existing stockholders. If available financing is insufficient or unavailable or we fail to continue to generate sufficient revenue, we may be required to further reduce operating expenses, delay the expansion of operations, be unable to pursue merger or acquisition candidates, or continue as a going concern.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements that have, or are in the opinion of management reasonably likely to have, a current or future effect on our financial condition or results of operations.

CRITICAL ACCOUNTING POLICIES

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. We evaluate our estimates and assumptions on an ongoing basis. Our actual results may differ significantly from these estimates under different assumptions or conditions. There have been no material changes to these estimates for the periods presented in this prospectus.

We believe that of our significant accounting policies, which are described in Note A of the notes to our consolidated financial statements included in this prospectus, the following accounting policies involve a greater degree of judgment and complexity. Accordingly, these are the policies we believe are the most critical to aid in fully understanding and evaluating our financial condition and results of operations.

1. Revenue Recognition

Revenues from software licensing are recognized in accordance with ASC 985-605, "Software Revenue Recognition. Accordingly, revenue from software licensing is recognized when all of the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is probable.

We intend to enter into arrangements with end users for items which may include software license fees, and services or various combinations thereof. For each arrangement, revenues will be recognized when evidence of an agreement has been documented, the fees are fixed or determinable, collection of fees is probable, delivery of the product has occurred and no other significant obligations remain.

Multiple-Element Arrangements: For multiple-element arrangements, we apply the residual method in accordance with ASC 985-605. The residual method requires that the portion of the total arrangement fee attributable to the undelivered elements be deferred based on its VSOE of fair value and subsequently recognized as the service is delivered. The difference between the total arrangement fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements, which is generally the software license. VSOE of fair value for all elements in an arrangement is based upon the normal pricing for those products and services when sold separately. VSOE of fair value for support services is additionally determined by the renewal rate in customer contracts. The Company has established VSOE of fair value for support as well as consulting services.

License Revenues: Amounts allocated to license revenues are recognized at the time of delivery of the software and all other revenue recognition criteria discussed above have been met.

Revenue from licensing software, which requires significant customization and modification, is recognized using the percentage of completion method, based on the hours of effort incurred by us in relation to the total estimated hours to complete. In instances where third party hardware, software or services form a significant portion of a customer's contract, we recognize revenue for the element of software customization by the percentage of completion method described above. Otherwise, third party hardware, software, and services are recognized upon shipment or acceptance as appropriate. If we make different judgments or utilize different estimates of the total amount of work expected to be required to customize or modify the software, the timing and revenue recognition, from period to period, and the margins on the project in the reporting period, may differ materially from amounts reported. Anticipated contract losses are recognized as soon as they become known and are estimable.

Service Revenues: Revenues from services are comprised of maintenance and consulting and implementation services. Maintenance revenues include providing for unspecified when-and-if available product updates and customer telephone support services, and are recognized ratably over the term of the service period. Consulting services are generally sold on a time-and-materials basis and include a range of services including installation of software and assisting in the design of interfaces to allow the software to operate in customized environments. Services are generally separable from other elements under the arrangement since performance of the services are not essential to the functionality of any other element of the transaction and are described in the contract such that the total price of the arrangement would be expected to vary as the result of the inclusion or exclusion of the services. Revenues from services are generally recognized as the services are performed.

We provide customers, free of charge or at a minimal cost, testing kits which potential licensing customers may use to test compatibility/acceptance of our technology with the customer's intended applications.

Costs and other expenses: Includes professional compensation and other direct contract expenses, as well as costs attributable to the support of client service professional staff, depreciation and amortization costs related to assets used in revenue-generating activities, and other costs attributable to serving our client base. Professional compensation consists of payroll costs and related benefits including stock-based compensation and bonuses. Other direct contract expenses include costs directly attributable to client engagements, such as out-of-pocket costs including travel and subsistence for client service professional staff, costs of hardware and software and costs of subcontractors. The allocation of lease and facilities charges for occupied offices is included in costs of service.

We account for our warranties under the FASB ASC 450 "Contingencies." We generally warrants that our products are free from defects in material and workmanship for a period of one year from the date of initial delivery to our customers. The warranty does not cover any losses or damage that occurs as a result of improper installation, misuse or neglect or repair or modification by anyone other than us or our authorized repair agent. Our policy is to accrue anticipated warranty costs based upon historical percentages of items returned for repair within one year of the initial sale. Our repair rate of products under warranty has been minimal, and a historical percentage has not been established. Our software license agreements generally include certain provisions for indemnifying customers against liabilities if our software products infringe upon a third party's intellectual property rights. We have not provided for any reserves for warranty liabilities as it was determined to be immaterial.

2. Impairment or Disposal of Long Lived Assets, including Intangible Assets

We review our long-lived assets, including intangible assets subject to amortization, whenever events or changes in circumstances indicate that the carrying amount of such an asset may not be recoverable. Recoverability of these assets is measured by comparison of their carrying amount to the future undiscounted cash flows the assets are expected to generate. If such assets are considered impaired, the impairment to be recognized is equal to the amount by which the carrying value of the assets exceeds their fair value determined by either a quoted market price, if any, or a value determined by utilizing a discounted cash flow technique. In assessing recoverability, we must make assumptions regarding estimated future cash flows and discount factors. If these estimates or related assumptions change in the future, we may be required to record impairment charges. Intangible assets with determinable lives are amortized over their estimated useful lives, based upon the pattern in which the expected benefits will be realized, or on a straight-line basis, whichever is greater. We did not record any impairment charges in any of the years presented.

3. Research and Development Expenditures

Research and development expenses include costs directly attributable to the conduct of research and development programs primarily related to the development of our software products and improving the efficiency and capabilities of our existing software. Such costs include salaries, payroll taxes, employee benefit costs, materials, supplies, depreciation on research equipment, services provided by outside contractors, and the allocable portions of facility costs, such as rent, utilities, insurance, repairs and maintenance, depreciation and general support services. All costs associated with research and development are expensed as incurred.

4. Income Taxes

The provision for, or benefit from, income taxes includes deferred taxes resulting from the temporary differences in income for financial and tax purposes using the liability method. Such temporary differences result primarily from the differences in the carrying value of assets and liabilities. Future realization of deferred income tax assets requires sufficient taxable income within the carryback, carryforward period available under tax law. We evaluate, on a quarterly basis whether, based on all available evidence, if it is probable that the deferred income tax assets are realizable. Valuation allowances are established when it is more likely than not that the tax benefit of the deferred tax asset will not be realized. The evaluation, as prescribed by ASC 740-10, "Income Taxes," includes the consideration of all available evidence, both positive and negative, regarding historical operating results including recent years with reported losses, the estimated timing of future reversals of existing taxable temporary differences, estimated future taxable income exclusive of reversing temporary differences and carryforwards, and potential tax planning strategies which may be employed to prevent an operating loss or tax credit carryforward from expiring unused. Because of our historical performance and estimated future taxable income a full valuation allowance has been established.

5. Accounting for Stock-Based Compensation

We account for share based compensation in accordance with the provisions of ASC 718-10, “Compensation — Stock Compensation,” which requires measurement of compensation cost for all stock awards at fair value on date of grant and recognition of compensation over the service period for awards expected to vest. The majority of our share-based compensation arrangements vest over either a three or four year vesting schedule. We expense our share-based compensation under the ratable method, which treats each vesting tranche as if it were an individual grant. The fair value of stock options is determined using the Black-Scholes valuation model, and requires the input of highly subjective assumptions. These assumptions include estimating the length of time employees will retain their vested stock options before exercising them (the “expected option term”), the estimated volatility of our common stock price over the option’s expected term, the risk-free interest rate over the option’s expected term, and the Company’s expected annual dividend yield. Changes in these subjective assumptions can materially affect the estimate of fair value of stock-based compensation and consequently, the related amount recognized as an expense in the consolidated statements of operations. As required under the accounting rules, we review our valuation assumptions at each grant date and, as a result, are likely to change our valuation assumptions used to value employee stock-based awards granted in future periods. The values derived from using the Black-Scholes model are recognized as expense over the service period, net of estimated forfeitures (the number of individuals that will ultimately not complete their vesting requirements). The estimation of stock awards that will ultimately vest requires significant judgment. We consider many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience. Actual results, and future changes in estimates, may differ substantially from our current estimates.

RECENT ACCOUNTING PRONOUNCEMENTS

Effective January 1, 2014, we adopted Accounting Standards Update (“ASU”) No. 2013-11, “Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists” (“ASU 2013-11”). ASU 2013-11 is expected to reduce diversity in practice by providing guidance on the presentation of unrecognized tax benefits and will better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. The amendments in this update should be applied prospectively for annual and interim periods beginning after December 15, 2013. The adoption of ASU 2013-11 did not have a material effect on our consolidated financial statements.

In May 2014, ASU No. 2014-09, “Revenue from Contracts with Customers” was issued. The comprehensive new standard will supersede existing revenue recognition guidance and require revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the Company expects to be entitled in exchange for those goods or services. The guidance will also require that certain contract costs incurred to obtain or fulfill a contract, such as sales commissions, be capitalized as an asset and amortized as revenue is recognized. Adoption of the new rules could affect the timing of both revenue recognition and the incurrence of contract costs for certain transactions. In August 2015, the FASB issued ASU 2015-14, “Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date” (“ASU 2015-14”) which defers the effective date of ASU 2014-09

by one year. ASU 2014-09 is now effective for annual reporting periods after December 15, 2017 including interim periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company is currently evaluating the effects of adopting ASU 2014-09 on its consolidated financial statements.

In June 2014, ASU 2014-12, “Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period” (“ASU No. 2014-12”) was issued. ASU No. 2014-12 requires that a performance target that affects vesting and that could be achieved after the requisite service period is treated as a performance condition. An entity should recognize compensation cost in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the periods for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to vest and should be adjusted to reflect those awards that ultimately vest. ASU 2014-12 becomes effective for interim and annual periods beginning on or after December 15, 2015. Early adoption is permitted. We are currently evaluating the effects of adopting ASU 2014-12 on its consolidated financial statements but the adoption is not expected to have a significant impact on our consolidated financial statements.

In June 2014, ASU 2014-15, "Presentation of Financial Statements – Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern" ("ASU No. 2014-15") was issued. Before the issuance of ASU 2014-15, there was no guidance in U.S. GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern or to provide related footnote disclosures. This guidance is expected to reduce the diversity in the timing and content of footnote disclosures. ASU 2014-15 requires management to assess an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards as specified in the guidance. ASU 2014-15 becomes effective for the annual period ending after December 15, 2016 and for annual and interim periods thereafter. Early adoption is permitted. We are currently evaluating the effects of adopting ASU 2014-15 on its consolidated financial statements but the adoption is not expected to have a significant impact on our consolidated financial statements.

In January 2015, ASU No. 2015-01, "Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary items" ("ASU 2015-01") was issued. ASU 2015-01 eliminates from GAAP the concept of extraordinary items. ASU 2015-01 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The Company is currently evaluating the effects of adopting ASU 2014-15 on its consolidated financial statements but the adoption is not expected to have a significant impact.

In April of 2015, the FASB issued ASU 2015-03, "Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." ASU 2015-03 requires debt issuance costs related to a debt liability measured at amortized cost to be reported in the balance sheet as a direct deduction from the face amount of the debt liability. ASU 2015-03 is effective for interim and annual periods beginning January 1, 2016 with early adoption permitted, and is applied on a retrospective basis. The adoption of ASU 2015-03 is not expected to materially impact the Company's consolidated financial statements.

In July 2015 the FASB issued ASU No. 2015-11, "Inventory (Topic 330): Simplifying the Measurement of Inventory" ("ASU 2015-11"). The amendments in ASU 2015-11 clarifies the measurement of inventory to be the lower of cost or realizable value and would only apply to inventory valued using the FIFO or average costing methods. ASU 2015-11 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The reporting entity should apply the amendments prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. The Company is currently evaluating the effects of adopting ASU 2015-11 on its consolidated financial statements.

In November 2015, the FASB issued Accounting Standards Update ("ASU") 2015-17, "Balance Sheet Classification of Deferred Taxes." This update requires an entity to classify deferred tax liabilities and assets as noncurrent within a classified statement of financial position. ASU 2015-17 is effective for annual reporting periods, and interim periods therein, beginning after December 15, 2016. This update may be applied either prospectively to all deferred tax

liabilities and assets or retrospectively to all periods presented. Early application is permitted as of the beginning of the interim or annual reporting period. The Company is currently evaluating the effects of adopting ASU 2015-17 on its consolidated financial statements.

Management does not believe that any other recently issued, but not yet effective, accounting standard if currently adopted would have a material effect on the accompanying consolidated financial statements.

BUSINESS

Overview

We were founded in 1993 to develop and market advanced fingerprint biometric technology and related security software solutions. First incorporated as BBG Engineering, we were renamed SAC Technologies in 1994 and, again, renamed BIO-key International, Inc. in 2002.

We develop and market advanced fingerprint biometric identification and identity verification technologies, cryptographic authentication-transaction security technologies, as well as related identity management and credentialing software solutions. We were pioneers in developing automated, finger identification technology that supplements or complements other methods of identification and verification, such as personal inspection identification, passwords, tokens, smart cards, ID cards, PKI, credit cards, passports, driver's licenses, OTP or other form of possession or knowledge-based credentialing. Additionally, advanced BIO-key® technology has been and is used to improve both the accuracy and speed of competing finger-based biometrics.

We have developed what we believe is the most discriminating and effective commercially available finger-based biometric technology. Our primary focus is in marketing and selling this technology into commercial logical and physical privilege entitlement and access control markets. Example primary markets include mobile payments & credentialing, online payments and credentialing, and healthcare record and payment data security, among others. Our secondary focus includes government markets, primarily law enforcement forensic investigation and the Department of Homeland Security. We continue to research and develop advancements in our capabilities, as well as exploring and developing potential strategic relationships, including potential business combinations and acquisitions, which could help us leverage our capability to deliver our solutions. We have built a direct sales force of professionals, and also team with resellers, integrators and partner networks with substantial experience in selling technology solutions to government and corporate customers.

Products

Finger-based Biometric Identification and Personal Identity Verification

We are a leader in finger-based biometric identification and personal identity verification, as well as authentication-transaction security. Stand-alone, or in partnerships with OEMs, integrators, and solution providers, we provide biometric software solutions and authentication-transaction security solutions to private and public sector customers. We help customers reduce risk by providing the ability to control access to facilities and services, in either the logical or physical domain. Our capabilities positively identify individuals and verify, or confirm, their identity

before granting access to valuable corporate resources, privileged or subscribed data and services, web portals, applications, physical locations or assets, among other things. Our capabilities are software based and both hardware and operating-system agnostic.

Historically, we have not developed, manufactured or produced hardware components that are used in conjunction with our software. However, we do sell third-party hardware components with our software in various configurations required by our customers, as do our partners, and in 2015, we began selling compact finger readers that can be used to log into computers and other devices via a USB port. Our products are interoperable with all major fingerprint reader and hardware manufacturers, enabling application developers, Value Added Resellers (“VARs”) and channel partners to integrate our fingerprint biometrics into their application, while dramatically reducing maintenance, upgrade and life-cycle costs. Our core technology supports interoperability on over 60 different commercially available fingerprint readers. The technology is also interoperable across Windows and Linux, as well as Apple iOS and Android mobile operating systems. This interoperability is unique in the industry and a key differentiator for our products in the biometric market and, in our opinion, makes our technology more viable than competing technologies and expands the size of the overall market for our products.

Our biometric identification technology improves both the accuracy and speed of screening individuals, for identification purposes or for personal identity verification, by extracting unique data from a fingerprint and comparing it to existing similar fingerprint data. These comparisons are conducted to identify an individual, either in a forensic investigation, or to screen the individual upon the application for a privilege, or to verify the individual’s identity upon such individuals request to access the previously entitled privilege. The technology has been built to be completely scalable and can handle databases containing millions of fingerprints. We achieve the highest levels of discrimination without requiring any other identifying data (multi-factor) such as a user ID, smart ID cards, or tokens, although our technology can be used in conjunction with such additional factors.

We support industry standards, such as BioAPI, and have received National Institute of Standards and Technology independent laboratory certification of our ability to support Homeland Security Presidential Directive #12 (HSPD-12) and ANSI/INCITS-378 templates, as well as validation of our fingerprint match speed and accuracy in large database environments.

Our finger identification algorithm—Vector Segment Technology (VST™) is the core intellectual property behind our full suite of biometric products that include:

Vector Segment Technology SDK (VST)—Our biometric software development kit (“SDK”) that provides developers the ability to incorporate our biometric capabilities into their respective product offerings or infrastructure. VST is available as a low level SDK for incorporation into any application architecture to increase security while not sacrificing convenience. VST runs on Windows and Linux as well as within WEB-key on iOS and Android systems.

Intelligent Image Indexing®—Our biometric identification solution that offers both large-scale one-to-many user identification. This solution enables customers to perform false alias and fast entry checks, including preventing fraudulent access to systems and privileges. Intelligent Image Indexing scales identification capabilities from thousands to millions of users. The solution runs on commercially available hardware making it scalable for any size system.

Biometric Service Provider—We provide support for the BioAPI (a standards-based solution meeting worldwide needs) for a compliant interface to applications using biometrics for verification and identification. We enhance the traditional use of BioAPI by adding 64-bit support and other advanced features, supporting identification calls and also providing a single user interface for multiple fingerprint readers.

ID Director™—Our Single Sign On (SSO) is a suite of solutions for integration with CA Technologies SiteMinder, Oracle’s Fusion Middleware SSO, IBM Tivoli Access Manager and other solutions, utilizing the power and security of WEB-key. This solution provides a simple to implement, custom authentication scheme for companies looking to enhance authentication. ID Director is designed to add a level of security and convenience to the transaction level of any application.

Our software is also integrated with Windows 10 to deliver fast, secure and convenient access to authorized users. We are currently a launch partner in connection with the initial roll out of Windows 10.

Authentication Transaction Security

Our authentication-transaction security technology, WEB-key®, provides the ability to conduct identification and identity verification transactions in potentially insecure environments, including the World Wide Web or in off-site cloud environments.

WEB-key makes cloud-based biometric user-authentication viable and eliminates technology constraints on online service providers, who are otherwise held dependent on handset provider hardware and software platform decisions. It extends all features and functionalities of the VST algorithm to customers looking to add an enhanced level of security to their thin client and client/server applications. WEB-key is currently supported by both Windows and Linux operating systems. Clients are available on Windows, iOS and Android operating systems.

Products

During 2015, we commenced the distribution of proprietary turnkey hardware and software solutions. We currently offer the following two user authentication products which are both cost effective and easy to deploy:

EcoID is a compact, durable, high quality placement fingerprint reader which operates on any device with a USB port and can be secured to any desk, workstation, personal computer, or enrollment station.

SideSwipe is a durable, mobile, high quality USB fingerprint reader that is designed to be used on tablets and operates on any Windows device with a USB port.

Intellectual Property Rights

We develop and own significant intellectual property and believe that our intellectual property is fundamental to our biometric operation:

Patents

We own patented technologies and trade secrets developed or acquired by us.

In May 2005, the U.S. Patent & Trademark Office issued patent 6,895,104 for our Vector Segment fingerprint technology (VST), BIO-key's core biometric analysis and identification technology. With the payment of all maintenance fees, this patent will expire on March 4, 2023.

On October 3, 2006, we announced that our patent for a biometric authentication security framework had been granted by the U.S. Patent & Trademark Office. The patent No. 7,117,356 was issued to us for a biometric authentication security framework that enhances commercial and civil biometric use. Our authentication security framework protects privacy and security of cloud or network based authentications while also facilitates ease of use of biometric systems. The technology that this patent is based on is the foundation for the authentication security incorporated in our WEB-key® product line. WEB-key is a mature enterprise authentication solution that functions in a wide variety of application environments. The solution supports a variety of implementation alternatives including card technologies for "two-factor" authentication and also supports "single-factor" authentication. Partners and customers implementing our WEB-key software to provide convenient and secure user identity include a number of institutions including the Allscripts Healthcare Solutions, Computer Associates Site Minder, Oracle Access Manager and many other enterprise and solutions based systems. With the payment of all maintenance fees, this patent will expire on May 20, 2023.

On December 26, 2006, we were issued US patent No. 7,155,040 covering our unique image processing technology, which is critical for enhancing information used in the extraction of biometric minutiae. The issued patent protects a critical part of an innovative four-phase image enhancement process developed by us. With the payment of all maintenance fees, this patent will expire on January 29, 2025.

On April 15, 2008, we were issued US patent No. 7,359,553 covering our image enhancement and data extraction core algorithm components. The solution protected under this patent provides the capability to quickly and accurately transform a fingerprint image into a computer image that can be analyzed to determine the critical data elements. With the payment of all maintenance fees, this patent will expire on January 3, 2025.

On August 19, 2008, we were issued US patent No. 7,415,605 for our “Biometric Identification Network Security” method. The solution protected under this patent provides a defense against hackers and system attacks, while leveraging the industry standard Trusted Platform Module (TPM) specification for encryption key management. With the payment of all maintenance fees, this patent will expire on May 20, 2023.

On November 18, 2008, we were issued US patent No. 7,454,624 for our “Match Template Protection within a Biometric Security System” method. The solution protected under this patent limits the scope of enrollment templates usage and also eliminates the need for revocation or encryption processes, which can be expensive and time consuming. With the payment of all maintenance fees, this patent will expire on May 17, 2025.

On March 10, 2009, we were issued US patent No. 7,502,938 for our “Trusted Biometric Device” which covers a simple, yet secure method of protecting a user’s biometric information. It covers the transmission of information from the point the information is collected at the biometric reader until the data reaches the computer or device that is authenticating the user’s identity. With the payment of all maintenance fees, this patent will expire on October 25, 2025.

On May 26, 2009, we were issued US patent No. 7,539,331 for our “Image Identification System” method for improving the performance and reliability of image analysis within an image identification system. With the payment of all maintenance fees, this patent will expire on March 22, 2022.

On November 8, 2011, we were issued US Patent No 8,055,027 for our “Generation of Directional Information in the Context of Image Processing” method for image enhancement and processing. With the payment of all maintenance fees, this patent will expire on October 10, 2027.

On July 3, 2012, we were issued US Patent No 8,214,652 for our “Biometric Identification Network Security”, an expanded method of network and related network authentication security systems utilizing hardware based support for encryption and key management for authentication purposes. With the payment of all maintenance fees, this patent will expire on April 24, 2024.

We have also been granted parallel patents to the US Patent portfolio to certain of our patents in many foreign countries offering protection of our intellectual property rights around the world.

Trademarks

We have registered our trademarks “BIO-key”, “True User Identification”, “Intelligent Image Indexing” and “WEB-key” with the U.S. Patent & Trademark Office, as well as many foreign countries, protecting our company’s name and key technology offering names.

Copyrights and trade secrets

We take measures to ensure copyright and license protection for our software releases prior to distribution. When possible, the software is licensed in an attempt to ensure that only licensed and activated software functions to its full potential. We also take measures to protect the confidentiality of our trade secrets.

Licensed Technology

In the fourth quarter of 2015, we entered into a license agreement with affiliates of China Goldjoy Group Limited, a Hong Kong based public company engaged in technology development, including biometric security (“CGG”). The license agreement provides for the grant to our subsidiary, BIO-key Hong Kong Limited, of a perpetual, irrevocable, exclusive, worldwide, fully-paid license to all software and documentation regarding the software code, toolkit, electronic libraries and related technology currently known as or offered under the Finger Q name, together with perpetual license under all related patents held by the licensors and any other intellectual property rights owned by the

licensors related to the forgoing software. This portfolio includes 16 patents focused on, among other things, mobile payment systems and mobile payment methods based on biometric authentication as well finger print authentication systems and a finger print authentication method based on NFC. The license agreement grants us the exclusive right to reproduce, create derivative works and distribute copies of the FingerQ software and documentation, create new FingerQ related products, and grant sublicenses of the licensed technology to end users. In addition, in the event the licensors make any derivatives or improvement in the FingerQ software or make any product or service that may compete with or which includes functionality similar to the FingerQ technology, they are required to license such derivative, improvement, product or service to us on the terms set forth in the license agreement at no additional charge. The license arrangement also allows us to create new, innovative solutions to address the growing demand for secure mobile transactions.

Markets

Identity Management, User Authentication, Privilege Entitlement and Access Control

Our products reduce risk of theft, fraud, loss and attack by limiting access to valuable assets, privileges, data, services, networks and places, to only authorized individuals. Conversely, our products enhance the monetary value and/or viability of privileged assets, places and services by ensuring only subscribers and otherwise entitled holders can enjoy full access to their privileges. In effect, our products replace traditional credentialing systems, which utilize a physical or electronic credential document to represent the holder's privilege entitlement, and access control systems that guard access to such privileges. Examples of such privileges include, but are not limited to: international travel and immigration privileges; employment ID, campus ID and corporate ID privileges; healthcare service privileges; citizen entitlement privileges such as Medicare, Medicaid and Social Security; and bank, credit account and financial transaction privileges such as checking accounts, debit and credit cards, payments, online services and subscription privileges. Examples of access points include doorways, gates, computers, point-of-sale terminals, smart-phones or web-portals and automobiles. In our opinion, the market for advanced user authentication, including fingerprint biometrics, is conceptually enormous, represented by virtually any doorway, gate, computer network or internet end-point like smart-phones, desktops and laptops PCs and tablets, and compounded by the number of individuals privileged to access something guarded by those access points. We believe the market opportunity for our products is a massive upgrade cycle of global privilege entitlement and access control systems.

Historically, our largest market has been access control within highly regulated industries like healthcare. However, we believe the mass adoption of advanced smart-phone and hand-held wireless devices have caused commercial demand for advanced user authentication to emerge as viable. The introduction of smart-phone capabilities, like mobile payments and credentialing, could effectively require biometric user authentication on mobile devices to reduce risks of identity theft, payment fraud other forms of fraud in the mobile or cellular based World Wide Web. As more services and payment functionalities, like mobile wallets and NFC, migrate to smart-phones, the value and potential risk associated with such systems should grow substantially and drive demand and mass adoption of advanced user authentication technologies, including fingerprint biometrics and our solutions.

We believe there is potential for significant market growth in three key areas:

Corporate network access control-corporate campuses, computer networks and applications.

Consumer mobile credentialing, including mobile payments-credit and payment card programs, data and application access and commercial loyalty programs.

Government services and highly regulated industry-Medicare, Medicaid, Social Security, Drivers Licenses, Campus and School ID, Passports/Visas.

Our solutions are currently deployed in the following markets:

hospitals, clinics and private practices to secure access to patient records.

blood centers to identify donors.

schools to identify students for attendance, lunch programs and transportation.

standardized testing organizations to identify exam candidates.

commercial enterprises to authenticate users of computer networks.

governmental agencies to register recipients and control the distribution of governmental benefits.

financial institutions to authenticate ATM transactions and mobile payments.

Business Model

We believe the most viable markets for our products involve various forms of computer network and Internet applications. The emergences of cloud computing and mobile computing are primary drivers of commercial and consumer adoption of advanced authentication applications, including our authentication capabilities. As the value of assets, services and transactions increases on such networks, we expect that security and user authentication demand will rise proportionately. We believe the nature of cloud and mobile computing requires technology interoperability across borders, jurisdictions and networks. Further, government and highly regulated service offerings must also interoperate across borders, jurisdictions and networks. In many cases, government and highly regulated service-related technologies are required to be interoperable and standards compliant. We have developed our technology and offerings to be software-based, standards compliant, universally interoperable, hardware and operating system agnostic, and scalable. Our technologies, products and platforms are designed to function on the Internet, in the cloud, in a traditional network environment, or stand-alone. We believe our model provides the strongest opportunity to penetrate the global biometric authentication market, leverage our partners' potentially large and resource rich sales channels, as well as produce the highest margin revenue.

We have built a two-tier sales channel to deliver our solutions. Channels include direct sales, integrator partners and VARs. We sell stand-alone software licenses for our products, as well as packaged configurations with "commercial-off-the-shelf" viable third-party hardware devices, like fingerprint readers and network technologies. We do not develop or produce proprietary hardware products. Our technologies also work with a variety of proprietary, sole-source technology offerings from third-party vendors. We believe our technologies can work within the constraints of any customer or partner system design. We are exploring a subscription or Software as a Service (SaaS) model for our software.

Direct Sales, Licensing, Integrator and VAR Partnerships

Our products are software based and we typically license our software to end users directly, or through integrator and VAR partners. Our primary sales and marketing focus is to integrate our software into the platform offerings of large technology infrastructure producers. We employ dedicated staff to develop relationships with end-users and integrator partners. We further employ technical support staff who help customers integrate our technology into their applications, as well as support new strategic development efforts.

We have formed strategic relationships with large Internet and network infrastructure providers, including IBM, Oracle, Microsoft, CA Technologies and Indigo, to provide enterprise-ready systems to large enterprise customers and stakeholders. We have also established partnerships with leading technology integrators, including MorphoTrak, McKesson, LexisNexis, Allscripts, Epic, Caradigm, Identimetrix and HealthCast.

On February 26, 2013, we entered into a strategic partnership with Interdigital Corporation to jointly develop and market biometric authentication solutions for the mobile credentialing & payments markets.

In the fourth quarter of 2015, we entered the Asian market by establishing a subsidiary in Hong Kong. BIO-key Hong Kong Limited is organized in Hong Kong and is currently the exclusive licensee of the FingerQ patent portfolio described above. See “Intellectual Property Rights – Licensed Technology” above.

Competition

In addition to companies that provide existing commonplace methods of restricting access to facilities and logical access points such as pass cards, PIN numbers, passwords, locks and keys, there are numerous companies involved in the development, manufacturing and marketing of fingerprint biometrics products to commercial, government, law enforcement and prison markets. These companies include, but are not limited to, 3M (Cogent), NEC, and MorphoTrak.

The majority of sales for automated fingerprint identification products in the market to date have been deployed for government agencies, healthcare facilities and law enforcement applications. The consumer and commercial markets represent areas of significant growth potential for biometrics, led by the use of mobile devices.

The epidemic of security and data breaches reported over the past few years is one of the driving factors for identifying new methods of protecting valuable data. After attempting to create a more sophisticated password or more efficient token or PIN, it's become apparent that each of these methods is easily compromised and the downside risks are significant.

With respect to competing biometrics technologies, each has its strengths and weaknesses and none has emerged as a market leader:

Fingerprint identification is generally viewed as very accurate, inexpensive and non-intrusive;

Palmvein scanning is expensive, technique-sensitive, and offers mobility challenges;

Iris scanning is viewed as accurate, but the hardware is significantly more expensive; and

Facial recognition can have accuracy limitations and is typically highly dependent on ambient lighting conditions, angle of view, and other factors.

Research and Development

We concentrate our research and development efforts on enhancing the functionality, reliability and integration of our current products as well as developing new and innovative products for biometrics. Although we believe that our identification technology is one of the most advanced and discriminating fingerprint technologies available today, the markets in which we compete are characterized by rapid technological change and evolving standards. In order to maintain our position in the market, we will continue to upgrade and refine our existing technologies.

On February 26, 2013, we announced that we entered into a Research and Development Collaboration Agreement, or the “R&D Collaboration”, with InterDigital Communications, Inc., a subsidiary of InterDigital, Inc., or “InterDigital”, a wireless research and development company, InterDigital is also the parent company of DRNC, which provided debt and equity financing to us in February 2013. The R&D Collaboration will target advanced cloud security and identity and access management solutions for the mobile market. The R&D Collaboration will bring together our innovative research and product development capabilities in fingerprint biometrics with InterDigital’s research efforts in developing identity and access management solutions for the mobile market.

During the fiscal years ended December 31, 2014 and 2013, we spent approximately \$1,626,000 and \$1,344,000, respectively, on our biometric segment’s research, development and engineering. Our limited customer base during that time did not directly bear these costs, which were principally funded through outside sources of equity and debt financing.

Government Regulations

We are not currently subject to direct regulation by any government agency, other than regulations generally applicable to businesses or related to specific project requirements. In the event of any international sales, we would be subject to various domestic and foreign laws regulating such exports and export activities.

Environmental Regulations

As of the date of this prospectus, we have not incurred any material expenses relating to our compliance with federal, state, or local environmental laws and do not expect to incur any material expenses in the foreseeable future.

Employees and Consultants

As of the date of this prospectus, we employed 18 individuals on a full-time basis as follows – seven in engineering, customer support, research and development; three in finance and administration; and eight in sales and marketing. We also use the services of four consultants (full-time), who provide engineering and technical services, and one part-time contracts administrator.

Properties

We do not own any real estate. We conduct operations from leased premises in Eagan, Minnesota (5,544 square feet), Wall, New Jersey (4,517 square feet) and North Billerica, Massachusetts (shared services center). We believe our current facilities are adequate for the foreseeable future.

Legal Proceedings

In the normal course of business, we periodically become involved in litigation. However, we are not a party to any material pending litigation.

MANAGEMENT

The following chart sets forth certain information about each of our directors, executive officers and key employees.

<u>Name</u>	<u>Age</u>	<u>Positions Held</u>
Michael W. DePasquale	60	Chairman of the Board of Directors and Chief Executive Officer
Charles P. Romeo (a)	73	Director
John Schoenherr (b)	63	Director
Thomas E. Bush, III (a) (c)	62	Director
Thomas Gilley (c)	55	Director
Wong Kwok Fong	52	Director
Yao Jianhui	43	Director
Cecilia Welch	56	Chief Financial Officer
Mira K. LaCous	54	Chief Technology Officer
Renat Zhdanov	53	Vice President, Chief Scientist
Scott Mahnken	56	Vice President of Marketing

(b) Audit Committee Member

(c) Nominating Committee Member

Directors

We believe that our board of directors should be composed of individuals with sophistication and experience in many substantive areas that impact our business. We believe that experience, qualifications, or skills in the following areas are most important: legal/regulatory and government affairs; accounting and finance; design, innovation and engineering; strategic planning; and human resources and development practices; and board practices of other corporations. These areas are in addition to the personal qualifications described in this section. We believe that our current board members possess the professional and personal qualifications necessary for board service, and have highlighted particularly noteworthy attributes for each board member below. The principal occupation and business experience, for at least the past five years, of each current director is as follows:

Michael W. DePasquale has served as our Chief Executive Officer and a Director since January 3, 2003, and Chairman of the Board since January 29, 2014. He served as Co-Chief Executive Officer of the Company from July 2005 to August 2006. Mr. DePasquale brings more than 27 years of executive management, sales and marketing

experience to the Company. Prior to joining us, Mr. DePasquale served as the President and Chief Executive Officer of Prism eSolutions, Inc., a Pennsylvania-based provider of professional consulting services and online solutions for ISO-9001/14000 certification for customers in manufacturing, healthcare and government markets, since February 2001. From December 1999 through December 2000, Mr. DePasquale served as Group Vice President for WRC Media, a New York-based distributor of supplemental education products and software. From January 1996 until December 1999, Mr. DePasquale served as Senior Vice President of Jostens Learning Corp., a California-based provider of multimedia curriculum. Prior to Jostens, Mr. DePasquale held sales and marketing management positions with McGraw-Hill and Digital Equipment Corporation. Mr. DePasquale earned a Bachelor of Science degree from the New Jersey Institute of Technology. He serves on the Board of Directors and as Treasurer of the International Biometrics and Identification Industry Association. Mr. DePasquale has extensive general management experience in the technology sector and has served as a Director for number of non-profit organizations and private companies.

Charles P. Romeo has served as a Director since February 28, 2005 and from January 29, 2003 to April 19, 2004. From April 2004 until February 2005, he served as our Vice President of Sales, Public Safety Division. From November 2005 to November 2007, Mr. Romeo served as the Vice President of Sales and Marketing for UNICOM, a Rhode Island systems integrator. From September 2002 until April 2004, Mr. Romeo was the President and Chief Executive Officer of FreedomBridge Technologies, Inc., a Rhode Island-based consulting firm to technology companies in the homeland security industry specializing in implementing direct and channel selling programs, strategic alliances and partnerships in the law enforcement market. Prior to founding FreedomBridge, Mr. Romeo had a 33 year sales and marketing management career with Digital Equipment Corporation, Compaq Computer Corporation and Hewlett Packard. During his career, Mr. Romeo served as Vice President of Service Sales for a \$500 million business unit, and Director of Public Sector Sales for a \$275 million division of Hewlett Packard. Mr. Romeo authored *The Sales Manager's Troubleshooter*, Prentice Hall 1998, which was named as one of the "top 10 must reads" by Sales and Marketing Magazine. Mr. Romeo earned a Bachelor of Science degree in Mathematics and Economics from the University of Massachusetts and an Executive MBA from Babson College. Mr. Romeo has significant sales and marketing management experience in the infrastructure and computer hardware and software industries.

John Schoenherr has served as a Director since December 30, 2004. Mr. Schoenherr served as Vice President of Corporate Performance Management for Oracle Corporation from 1995 through 2006. Prior to Oracle he served as Senior Vice President of Business Intelligence and Analytics at Information Resources, Inc. Mr. Schoenherr has over 25 years of experience in the area of business intelligence and strategic planning. His career includes a number of product development and management positions. Mr. Schoenherr has extensive product management and information services experience in both the large and small enterprise sectors.

Thomas E. Bush, III has served as a Director of the Company since January 29, 2014. Since 2009, Mr. Bush has provided business consulting services through his firm, Tom Bush Consulting. Prior to that, Mr. Bush served with the Federal Bureau of Investigation for over 33 years. Mr. Bush joined the FBI in September 1975, ultimately becoming the Director of the CJIS division, with over 2,500 employees and a budget of approximately one billion dollars. Mr. Bush is known for providing critical services in support of the criminal justice community, with two significant IT projects; Next Generation Identification and N-Dex, were awarded by CJIS with early increments delivered during his tenure at the FBI. He was the recipient of many awards during his tenure, most notably a Presidential Rank Award for Meritorious Service in 2007. Mr. Bush's extensive experience in law enforcement, security matters, and the use of biometric technologies in the government sector provides the Board with a unique perspective on security and public sector matters.

Thomas Gilley has served as a Director of the Company since January 29, 2014. Mr. Gilley is an entrepreneur, hands on technologist for mobile technologies, digital media, internet of things and social computing. Mr. Gilley served at Apple Computer, in the Advance Technology Group and Portable Products Group. Before and after Apple, Mr. Gilley founded several successful companies including PicoStar, a Silicon Valley incubator-technology investment company where he has been CEO since 1996. In New York City Mr. Gilley served as a strategic advisor, investor and technology company founder. Most recently, Mr. Gilley sold his on-demand web media company to Vignette and acted as CTO throughout the transaction and through the company's ultimate acquisition by OpenText. Mr. Gilley's substantial experience in starting, operating and financing technology companies provides the Board with a deep knowledge of the sales and development cycles applicable to growth businesses in the technology industry

Wong Kwok Fong has served as a Director of the Company since December 4, 2015. He is the co-founder of China Goldjoy Group (previously World Wide Touch Technology Holdings Limited), a Company listed on The Stock Exchange of Hong Kong. From 1997 until August, 2015, Mr. Wong served as the chairman of China Goldjoy Group and currently serves as its Chief Technology Officer. During this time, Mr. Wong played a significant role in the substantial growth of the business. Mr. Wong brings over 14 years of senior management experience in manufacturing, supply chain, and marketing functions in the electronics and technology industries, including establishing manufacturing plants in Hong Kong and China, and building an extensive network in the electronics and technology industries. Mr. Wong's substantial experience in the technology industry, including biometrics and payment systems, and serving the Asian markets, broadens and strengthens the Board's collective qualifications, skills, and experience.

Yao Jianhui has served as a Director of the Company since December 4, 2015. He has served as the Chairman of the Board of Directors and Chief Executive Officer of the China Goldjoy Group Ltd., a Company listed on The Stock Exchange of Hong Kong, since August 2015. Since June 2006, Mr. Yao has served as the Chairman of the Board of Directors of Baoneng Holding (China) Co. Ltd., a company principally engaged in property development. From July 2010 to October 2014, Mr. Yao was the General Manager and Chairman of the Board of Directors of Baocheng Investment Co. Ltd., a company listed on Shanghai Stock Exchange principally engaged in the manufacturing of cables as well as the hotel and trading business. Mr. Yao has held senior management positions with a number of enterprises and listed companies across a wide range of industries including food, construction materials, real estate, commerce, agriculture and forestry, logistics, technology and finance. Mr. Yao's extensive industry experience, particularly in serving the Asian markets, further broadens and strengthens the Board's collective qualifications, skills, and experience.

Executive Officers

Cecilia Welch has served as our Chief Financial Officer since December 21, 2009. Ms. Welch joined us in 2007 as our Corporate Controller. Prior to joining us, from January 2006 to December 2006, she was the Controller for Savaje Technologies (acquired by Sun Microsystems), a developer of advanced mobile telephone software. From October 2004 to January 2006, she was Controller for Crystal Systems, a manufacturer of sapphire crystals used for industrial, semiconductor, defense and medical applications. From December 1988 to July 2004, she was the Controller for ATN Microwave (acquired by Agilent Technologies), a manufacturer of automated test equipment. Ms. Welch has a Bachelor's degree in Accounting from Franklin Pierce University.

Mira K. Lacous has served as Chief Technology Officer of the Company since March 13, 2014. Prior to her appointment as Chief Technology Officer, she served as our Senior Vice President of Technology & Development since 2012, and as our Vice President of Technology and Development since 2000. Ms. LaCous has over 28 years of product/project management, solution architecture, software development, team leadership and customer relations experience with a background that includes successfully bringing numerous technologies to market, including automated voice response systems, automated building control systems, software piracy protection, intranet training materials and testing, page layout and design software, image scanning software and systems, biometric security, biometric algorithms and more. Ms. LaCous is also the author of six US patented technologies, multiple international patents, and other patent pending solutions. She has been an officer or director of two other companies; National Computer Systems (NCS), and TEL-Line Systems. Ms. LaCous has a Bachelor's in Computer Science from North Dakota State University. Ms. LaCous also served on the Board of Directors of the Minnesota Sinfonia, a not-for-profit arts and education organization, as well as its chairperson for two years.

Key Employees

Renat Z. Zhdanov has served as our Chief Scientist since November 2001. He has over fifteen years of academic experience in various fields of mathematics and physics; fifteen years of image processing, pattern recognition, and big data analysis algorithm development experience and more than ten years of software development experience ranging from database programming to statistical and analytical programming. Dr. Zhdanov is a recognized expert in mathematical physics and is the author of two books and more than 130 papers published in leading mathematics and physics journals. Before joining us, he worked as Chief Mathematician and Visiting Scientist in universities in Ukraine, Germany, Great Britain, Sweden and Spain. Dr. Zhdanov has two PhD degrees in Mathematical Physics and Differential Equations from the Institute of Mathematics in Kiev, Ukraine. He serves as the member of the Editorial Board of the "Journal of Applied Mathematics".

Scott Mahnken has served as our Vice President of Marketing since February 2011. He brings over 20 years of marketing experience and success through strategic marketing and building dynamic relationships with channel partners. Prior to joining us, from August 2009 until February 2011, he was President of Edge Marketing, a leading marketing consulting firm in the dental and medical devices industries. From February 2008 until August 2009, Mr. Mahnken served as Director of Marketing at Milestone Scientific Inc., a manufacturer of computer controlled anesthetic delivery medical devices. From August 2002 until January 2008, he served as Director of Partnership Relations at ArcMesa Educators, an organization dedicated to providing accredited continuing education to medical and dental providers. Prior to ArcMesa, Mr. Mahnken held a number of marketing roles with the Lanmark Group a leading healthcare advertising agency. Mr. Mahnken is a graduate of the University of New Orleans, where he earned a Bachelor's of Art degree in Marketing.

EXECUTIVE COMPENSATION

The following table sets forth a summary of the compensation paid to or accrued by our chief executive officer (principal executive officer) and the two most highly compensated executive officers other than the principal executive officer, who were serving as executive officers at the end of December 31, 2015, for the fiscal years ended December 31, 2015 and 2014:

SUMMARY COMPENSATION TABLE

Name	Fiscal Year	Salary (\$)	Option Awards (\$ (1))	All Other Compensation (\$)	Total (\$)
Michael W. DePasquale	2015	250,000	35,650	739	286,389
Chief Executive Officer	2014	250,000	83,000	739	333,039
Mira K. LaCous	2015	202,000	14,250	642	216,902
Chief Technology Officer (2)	2014	192,903	49,380	545	242,828
Cecilia Welch	2015	144,000	14,260	532	158,792
Chief Financial Officer	2014	144,000	49,380	432	193,812

The aggregate grant date fair value of the option awards was estimated using the Black-Scholes option pricing (1) model, with the assumptions listed in Note A to the Company's financial statements. The amount shown in this column represents the grant date fair value calculated under ASC 718.

(2) Ms. LaCous was appointed as our Chief Technology Officer on March 31, 2014. Prior to her appointment as our Chief Technology Officer, she served as our Senior Vice President of Technology & Development.

Narrative Disclosure to Summary Compensation Table

Compensation for BIO-key's executives is comprised of three main components: base salary, annual performance-based cash bonus and long-term equity awards. We do not target a specific weighting of these three components or use a prescribed formula to establish pay levels. Rather, the board of directors and compensation committee considers changes in the business, external market factors and our financial position each year when determining pay levels and allocating between long-term and current compensation for the named executive officers.

Cash compensation is comprised of base salary and an annual performance-based cash bonus opportunity. The committee generally seeks to set a named executive officer's targeted total cash compensation opportunity within a range that is the average of the applicable peer company and/or general industry compensation survey data, adjusted as appropriate for individual performance and internal pay equity and labor market conditions.

In setting cash compensation levels, we favor a balance in which base salaries are generally targeted at slightly below the peer average and a bonus opportunity that is targeted at slightly above the average. The committee believes that this higher emphasis on performance-based cash bonuses places an appropriate linkage between a named executive officer's pay, his or her individual performance and the achievement of specific business goals by placing a higher proportion of annual cash compensation at risk, thereby aligning executive opportunity with the interests of stockholders.

We include an equity component as part of our compensation package because we believe that equity-based compensation aligns the long-term interests of our named executive officers with those of stockholders.

These cash and equity compensation components of pay are supplemented by various benefit plans that provide health, life, accident, disability and severance benefits, most of which are the same as the benefits provided to all of our US based employees.

Employment Agreements

On March 26, 2010, we entered into an employment agreement, effective as of March 25, 2010, with Michael W. DePasquale to serve as the Chief Executive Officer of the Company until March 24, 2011. The agreement automatically renews for subsequent one-year terms, unless the employment relationship is terminated by either party, or modified in accordance with the terms and conditions of the Agreement. Under the Agreement, Mr. DePasquale will be paid an annual base salary of \$250,000, subject to adjustment by the Board or Compensation Committee. In addition to the Base Salary, a “Performance Bonus” may be awarded to Mr. DePasquale on the basis of the Company achieving certain corporate and strategic performance goals, as determined by the Board in its sole discretion. The employment agreement contains standard and customary confidentiality, non-solicitation and “work made for hire” provisions as well as a covenant not to compete which prohibits Mr. DePasquale from doing business with any current or prospective customer of the Company or engaging in a business competitive with that of the Company during the term of his employment and for the one year period thereafter. This agreement also contains a number of termination and change in control provisions as described in “Termination and Change in Control Arrangements” in this Item.

On November 20, 2013, we renewed our one-year employment agreement with Mira K. LaCous to serve as the Vice President of Technology & Development of the Company at an annual base salary of \$147,420, subject to adjustment by the Board or Compensation Committee. On March 13, 2014, in connection with her appointment as Chief Technology Officer, we amended and restated Ms. LaCous’ employment agreement to increase Ms. LaCous’ annual base salary to \$202,000. The employment agreement contains standard and customary confidentiality, technical invention provisions, as well as a covenant not to compete which prohibits Ms. LaCous from doing business with any current or prospective customer of the Company or engaging in a business competitive with that of the Company during the term of her employment and for the one year period thereafter. This agreement also contains a number of termination provisions as described in “Termination and Change in Control Arrangements” in this Item.

On May 15, 2013, we entered into an employment agreement with Cecilia Welch to serve as the Vice President and Chief Financial Officer of the Company until May, 2014. The agreement automatically renews for subsequent one-year terms, unless the employment relationship is terminated by either party, or modified in accordance with the terms and conditions of the agreement. The employment agreement contains standard and customary confidentiality, technical invention provisions, as well as a covenant not to compete which prohibits Ms. Welch from doing business with any current or prospective customer of the Company or engaging in a business competitive with that of the Company during the term of her employment and for the one year period thereafter. This agreement also contains a number of termination provisions as described in “Termination and Change in Control Arrangements” in this Item.

Stock Option Grants

In the event of any change in the outstanding shares of our common stock by reason of a stock dividend, stock split, combination of shares, recapitalization, merger, consolidation, transfer of assets, reorganization, conversion or what

the board deems to be similar circumstances, the number and kind of shares subject to outstanding options, and the exercise price of such options shall be appropriately adjusted in a manner to be determined in the sole discretion of the board. Furthermore, these option agreements contain a change of control provision as described in “Termination Arrangements” in this Item.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR END

DECEMBER 31, 2015

The following table sets forth for each named executive officer, information regarding outstanding equity awards as at December 31, 2015. The option awards and per share amounts reflect our 1-for-2 reverse stock split, which was effective February 3, 2015.

Name	Option Awards			Option	Option
	Number of securities underlying unexercised options exercisable	Number of securities underlying unexercised options unexercisable			
	(#)	(#)		exercise price (\$)	expiration date

		100,000	(3)	0.180	8/12/2022

- (1) The options vest equally in three annual installments commencing March 27, 2013
- (2) The options vest equally in three annual installments commencing March 13, 2014
- (3) The options vest equally in three annual installments commencing August 13, 2015

Narrative Disclosure to Outstanding Equity Awards at Fiscal Year End Table

The following are the material terms of each agreement, contract, plan or arrangement that provide for payments to one or more of our named executive officers at, following or pursuant to their resignation, retirement or termination, or in connection with a change in control of the Company.

Termination Arrangements

Our employment agreement with Mr. DePasquale automatically renews for subsequent one-year terms, unless the employment relationship is terminated by either party, or modified in accordance with the terms and conditions of the Agreement. We may terminate the Agreement at any time with or without cause. In the event of termination by us without cause, we will continue to pay Mr. DePasquale his then current base salary for the greater of nine months from the date of such termination or the number of months remaining until the end of the term of the Agreement.

We may terminate our employment agreement with Ms. LaCous at any time with or without cause. In the event of termination by us without cause, we will continue to pay Ms. LaCous her then current base salary for nine months from the date of such termination.

Our employment agreement with Ms. Welch automatically renews for subsequent one-year terms, unless the employment relationship is terminated by either party, or modified in accordance with the terms and conditions of the Agreement. We may terminate our employment agreement with Ms. Welch at any time with or without cause. In the event of termination by us without cause, we will continue to pay Ms. Welch her then current base salary for the greater of six months from the date of such termination or the number of months remaining until the end of the term of the Agreement.

Change in Control Provisions

Awards under our 2015 Equity Incentive Plan (the “2015 Plan”) may be subject to acceleration of vesting and exercisability upon or after a “Change in Control” as may be provided in the award agreement for such award but in the absence of such provision, no such acceleration shall occur. A Change in Control under the 2015 Plan generally means (i) the acquisition by a person or entity of more than 50% of our combined voting power other than by merger, consolidation or similar transaction; (ii) a consummated merger, consolidation or similar transaction immediately after which our stockholders cease to own more than 50% of the combined voting power of the surviving entity; (iii) a complete dissolution or liquidation of the company, except for a liquidation into a parent corporation; (iv) a

consummated sale, lease or exclusive license or other disposition of all or substantially of our consolidated assets; or (v) when a majority of our board of directors becomes composed of individuals whose nomination, appointment, or election was not approved by a majority of our board members or their approved successors.

Our 1999 Stock Option Plan (the “1999 Plan”) and 2004 Stock Incentive Plan (the “2004 Plan” and together with the 1999 Plan, the “Plans”) provide for the acceleration of the vesting of unvested options upon a “Change in Control” of the Company. A Change in Control is defined in the Plans to include (i) a sale or transfer of substantially all of the Company’s assets; (ii) the dissolution or liquidation of the Company; (iii) a merger or consolidation to which the Company is a party and after which the prior shareholders of the Company hold less than 50% of the combined voting power of the surviving corporation’s outstanding securities; (iv) the incumbent directors cease to constitute at least a majority of the Board of Directors; or (v) a change in control of the Company which would otherwise be reportable under Section 13 or 15(d) of the Exchange Act.

In the event of a “Change In Control” each Plan provides for the immediate vesting of all options issued thereunder. The 1999 Plan provides for the Company to deliver written notice to each optionee under the 1999 Plan fifteen (15) days prior to the occurrence of a Change in Control during which all options issued under the 1999 Plan may be exercised. Thereafter, all options issued under the 1999 Plan which are neither assumed nor substituted in connection with such transaction, automatically expire unless otherwise determined by the Board. The 2004 Plan enables the Board to provide that all outstanding options be assumed, or equivalent options be substituted by the acquiring or succeeding corporation upon the occurrence of a “Reorganization Event” as defined. If such Reorganization Event also constitutes a Change In Control, then such assumed or substituted options shall be immediately exercisable in full. If the acquiring or succeeding corporation does not agree to assume, or substitute for such options, then the Board, upon written notice to the Participants, may provide that all unexercised options become exercisable in full as of a specified time prior to the Reorganization Event and terminate prior to the consummation of the Reorganization Event. Alternatively, if under the terms and conditions of the Reorganization Event, holders of common stock will receive a cash payment for their shares, then the Board may provide that all Participants receive a cash payment equal to the difference between the Acquisition Price and the Option Price multiplied by the number of options held by such Participants.

Options issued to executive officers outside of the Plans contain change in control provisions substantially similar to those contained in the 1999 Plan.

Our employment agreement with Mr. DePasquale contains a change in control provision that is triggered if Mr. DePasquale is not offered continued employment with us or any successor, or within five years following such Change of Control, we or any successor terminates Mr. DePasquale’s employment without cause. If this occurs, then we will pay Mr. DePasquale his base salary and benefits earned but unpaid through the date of termination, and any prorated bonus earned during the then current bonus year, plus two times his then current base salary.

DIRECTOR COMPENSATION FOR THE FISCAL YEAR ENDED

DECEMBER 31, 2015

The following table sets forth for each director, information regarding their compensation for the year ended December 31, 2015:

Name(1)	Fees Earned or Paid in	Restricted Stock Awards (\$) (2)	Total (\$)
---------	---------------------------------	--	---------------

	Cash		
	(\$)		
Thomas E. Bush, III	--	4,000	4,000
Thomas Gilley	3,000	5,000	8,000
Charles P. Romeo	--	3,000	3,000
John Schoenherr	3,000	5,000	8,000
Barbara Rivera (3)	3,000	--	3,000
Wong Kwok Fong (Kelvin) (4)	--	--	--
Yao Jianhui (4)	--	--	--

-
- (1) Mr. DePasquale has been omitted from the above table because he does not receive any additional compensation for serving on our Board of Directors.
- (2) Restricted stock awards were valued based upon the closing price of our common stock on the respective meeting date.
- (3) Ms. Rivera resigned from her position as a director on July 15, 2015.
- (4) Appointed effective December 4, 2015. Did not receive any fees for the year ended December 31, 2015.

Narrative Disclosure to Director Compensation Table

During 2014, the Company had a policy to pay to each non-employee director \$3,000 per board meeting and \$1,000 per telephonic board meeting attended and to make an annual grant of options in the discretion of the Board upon recommendation of the Compensation Committee. In 2014, we granted to each of our non-employee directors an option to purchase 75,000 shares of common stock. The options vest in three equal annual instalments and expire seven years after the date of grant.

In August 2015, the Company modified its director compensation policy such that the fees for attendance at regularly quarterly board meetings held during the first three quarters of each fiscal year shall be paid through the issuance of common stock and payment for the last meeting of the year shall be paid in cash or, at the option of the director, in shares of common stock.

We reimburse each of our non-employee directors for their reasonable expenses incurred in connection with attending meetings of the board of directors and related committees.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth, as of January 13, 2016, information with respect to the securities holdings of all persons that we, pursuant to filings with the SEC and our stock transfer records, have reason to believe may be deemed the beneficial owner of more than five percent (5%) of our common stock. The following table also sets forth, as of such date, the beneficial ownership of our common stock by all of our current officers and directors, both individually and as a group.

The beneficial owners and amount of securities beneficially owned have been determined in accordance with Rule 13d-3 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and, in accordance therewith, includes all shares of our common stock that may be acquired by such beneficial owners within 60 days of January 13, 2016 upon the exercise or conversion of any options, warrants or other convertible securities. This table has been prepared based on 66,098,482 shares of common stock outstanding as of January 13, 2016. Unless otherwise indicated, each person or entity named below has sole voting and investment power with respect to all shares beneficially owned by that person or entity, subject to the matters set forth in the footnotes to the table below, and has an address of c/o BIO-key International, Inc., 3349 Highway 138, Building A, Suite E, Wall, NJ 07719.

2015 Equity Incentive Plan	--	--	8,000,000
Total	4,378,833	0.323	8,000,000

Description of the 2015 Equity Incentive Plan

The material features of the 2015 Equity Incentive Plan are outlined below. References to the Code below refer to the Internal Revenue Code of 1986, as amended, including any applicable regulations and guidance thereunder.

Types of Awards

The terms of the 2015 Equity Incentive Plan provide for the grant of incentive stock options (ISOs), nonstatutory stock options (NSOs), restricted stock awards, restricted stock unit awards, stock appreciation rights, other stock awards, and performance awards that may be settled in stock, or other property. The exercise price of NSOs may not be less than 100% of the fair market value of the common stock subject to the stock option on the date of grant. The exercise price of ISOs may not be less than 100% of the fair market value of the common stock subject to the stock option on the date of grant and, in some cases, may not be less than 110% of such fair market value.

Share Reserve

The aggregate number of shares of our common stock that may be issued pursuant to stock awards under the 2015 Equity Incentive Plan will not exceed 8,000,000 shares. If a stock award granted under the 2015 Equity Incentive Plan, or any portion thereof, expires or otherwise terminates without all of the shares covered by the stock award having been issued, such expiration, termination or settlement will not reduce or otherwise offset the number of shares available for issuance under the 2015 Equity Incentive Plan. Additionally, shares issued pursuant to stock awards granted under the 2015 Equity Incentive Plan that are forfeited back to us because of the failure to vest, will become available again for issuance under the 2015 Equity Incentive Plan.

Eligibility

All of our employees, non-employee directors, and consultants are eligible to participate in the 2015 Equity Incentive Plan and may receive all types of awards; provided that incentive stock options may be granted under the 2015 Equity Incentive Plan only to our employees (including officers) and employees of our affiliates.

Grant Limits

A maximum of 400,000 shares of our common stock may be granted to any one participant during any one calendar year pursuant to stock options, stock appreciation rights or other stock awards.

Administration

The 2015 Equity Incentive Plan is administered by the compensation committee of our board of directors. Subject to the terms of the 2015 Equity Incentive Plan, the plan administrator may determine the recipients, numbers and types of awards to be granted, and terms and conditions of the awards, including the period of their exercisability and vesting. Subject to the limitations set forth below, the plan administrator also determines the fair market value applicable to a stock award and the exercise price of stock options and stock appreciation rights granted under the 2015 Equity Incentive Plan.

Change in Control

In the event of a change in control, a stock award under the 2015 Plan may be subject to additional acceleration of vesting and exercisability as may be provided in the stock award agreement for such stock award or as may be provided in any other written agreement between the participant and us or any of our affiliates.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Employment Arrangements

The Company has entered into employment agreements with Michael W. DePasquale, Cecilia Welch and Mira LaCous. See **“EXECUTIVE COMPENSATION—Employment Agreements.”**

Consulting Arrangement with Thomas J. Colatosti

In connection with his appointment to the Board of Directors in September 2002, and as acting Chief Financial Officer from November 2008 to December 2009, we had entered into a number of consulting arrangements with Thomas Colatosti. Under the most recent arrangement, which was entered into on January 12, 2010, Mr. Colatosti provided services to the Company and its subsidiaries and affiliates for the two-year term ended December 31, 2011 at a rate of \$5,000 per month. At December 31, 2013 and December 31, 2012, we owed to Mr. Colatosti an aggregate of \$50,000 for consulting services rendered. The amount was fully paid during 2014.

Licensing Agreement with Subsidiaries of China Goldjoy Group Limited.

On November 11, our subsidiary BIO-key Hong Kong Limited entered into a license purchase agreement with certain subsidiaries of China Goldjoy Group Limited (“CGG”). The license agreement provides for the grant of a perpetual, irrevocable, exclusive, worldwide, fully-paid license to all software and documentation regarding the software code, toolkit, electronic libraries and related technology currently known as or offered under the Finger Q name, together with perpetual license under all related patents held by the licensors and any other intellectual property rights owned by the licensors related to the forgoing software. We made a one-time payment of \$12,000,000 to the licensors. Mr. Yao Jianhu is the chairman and chief executive officer of CGG. Mr. Wong Kwok Fong is the chief technology officer of CGG and the beneficial owner of 9.9% of our common stock.

Director Independence

The Board applies the definition of independent director as set forth in NASDAQ Stock Market Rule 5605 (a)(2), as well as Rule 10A-3 under the Securities Exchange Act of 1934, as amended.

In accordance with this guidance, the Board considers Mr. Schoenherr, Mr. Romeo, Mr. Bush and Mr. Gilley, to be independent. Mr. Schoenherr is the sole member of the Company's Audit Committee, while Mr. Romeo, and Mr. Bush are the members of the Company's Compensation Committee.

DESCRIPTION OF SECURITIES

The following summary of our capital stock, our certificate of incorporation, our bylaws and the DGCL is intended as a summary only and is subject to and qualified in its entirety by reference to our certificate of incorporation and bylaws, and the applicable provisions of the DGCL.

Common Stock

We are authorized to issue 170,000,000 shares of common stock, \$.0001 par value per share, of which 66,098,482 shares were outstanding on the date of this prospectus. Holders of shares of our common stock are entitled to one vote per share on all matters submitted to a vote of the stockholders and are not entitled to cumulative voting rights. Our shares of our common stock do not carry any preemptive, conversion or subscription rights, and there are no sinking fund or redemption provisions applicable to the shares of our common stock. Holders of our common stock are entitled to receive dividends and other distributions in cash, stock or property as may be declared by our Board of Directors from time to time out of our assets or funds legally available for dividends or other distributions, subject to dividend or distribution preferences that may be applicable to any then outstanding shares of preferred stock. In the event of our voluntary or involuntary liquidation, dissolution or winding up, holders of shares of our common stock are entitled to share ratably in the assets legally available for distribution to stockholders after payment of all debts and other liabilities and satisfaction of the liquidation preference, if any, granted to the holders of any preferred stock then outstanding. All outstanding shares of our common stock are fully paid and nonassessable.

Preferred Stock

We are authorized to issue 5,000,000 shares of preferred stock, \$.0001 par value per share. As of the date of this prospectus, 100,000 shares of our preferred stock have been designated as Series A-1 Convertible Preferred Stock, of which 90,000 shares are issued and outstanding. In addition, 105,000 shares of our preferred stock have been designated as Series B-1 Convertible Preferred Stock, all of which are outstanding as of the date of this prospectus. Our certificate of incorporation authorizes our Board of Directors to establish one or more series of preferred stock (including convertible preferred stock). Unless required by law, the authorized shares of preferred stock will be available for issuance without further action by you. Our Board of Directors is able to determine, with respect to any series of preferred stock, the powers (including voting powers), preferences and relative, participating, optional or

other special rights, and the qualifications, limitations or restrictions thereof, including, without limitation:

the designation of the series;

the number of shares of the series, which our Board of Directors may, except where otherwise provided in the preferred stock designation, increase (but not above the total number of authorized shares of the class) or decrease (but not below the number of shares then outstanding);

whether dividends, if any, will be cumulative or non-cumulative and the dividend rate of the series;

the dates at which dividends, if any, will be payable;

the redemption rights and price or prices, if any, for shares of the series;

the terms and amounts of any sinking fund provided for the purchase or redemption of shares of the series;

the amounts payable on shares of the series in the event of any voluntary or involuntary liquidation, dissolution or winding-up of our affairs;

whether the shares of the series will be convertible into shares of any other class or series, or any other security, of the Company or any other corporation, and, if so, the specification of the other class or series or other security, the conversion price or prices or rate or rates, any rate adjustments, the date or dates as of which the shares will be convertible and all other terms and conditions upon which the conversion may be made;

restrictions on the issuance of shares of the same series or of any other class or series; and

the voting rights, if any, of the holders of the series.

We could issue a series of preferred stock that could, depending on the terms of the series, impede or discourage an acquisition attempt or other transaction that some, or a majority, of the holders of our common stock might believe to be in their best interests or in which the holders of our common stock might receive a premium for your common stock over the market price of the common stock. Additionally, the issuance of preferred stock may adversely affect the holders of our common stock by restricting dividends on the common stock, diluting the voting power of the common stock or subordinating the liquidation rights of the common stock. As a result of these or other factors, the issuance of preferred stock could have an adverse impact on the market price of our common stock.

Series A-1 Convertible Preferred Stock

Shares of the Series A-1 Convertible Preferred Stock are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share, subject to adjustment for stock dividends, stock splits, combinations, and reclassifications of our capital stock, and subject to a “blocker provision” which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. The Series A-1 Shares accrue dividends at the rate of 6% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year. Until October 1, 2017, the dividends are payable in cash provided that if payment in cash would be prohibited under applicable Delaware corporation law or cause the Company to breach any agreement for borrowed money, such dividends are payable in kind through the issuance of additional shares of common stock having a value equal to the volume weighted average trading price of the Company’s common stock for the ten (10) days preceding the applicable dividend payment date. Commencing January 1, 2018, dividends are payable at the option of the Company in cash or kind through the issuance of additional shares of common valued as described above. The holders of the Series A-1 shares are entitled to designate one person to serve on the Board of

Directors of the Company. The holders of the Series A-1 Shares are entitled to vote on an as converted to common stock basis together with the holders of our common stock on all matters presented to our stockholders. Upon any liquidation or dissolution of the Company, any merger or consolidation involving the Company or any subsidiary of the Company in which the shares of capital stock of the Company outstanding immediately prior to such merger or consolidation do not represent immediately following such merger or consolidation at least a majority of the voting power of the capital stock of the resulting or surviving corporation, or the sale of all or substantially all assets in a single transaction or a series of related transactions, unless the holders of at least a majority of the outstanding Series A-1 Shares elect otherwise, holders of Series A-1 Shares shall be entitled to receive prior to any payment to any holders of the Company's common stock an amount per share equal to \$100.00 per share plus any declared and unpaid dividends.

Series B-1 Convertible Preferred Stock

Shares of the Series B-1 Convertible Preferred Stock are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share, subject to adjustment for stock dividends, stock splits, combinations, and reclassifications of our capital stock, and subject to a "blocker provision" which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. The Series B-1 Shares accrue dividends at the rate of 2.5% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash provided that if payment in cash would be prohibited under applicable Delaware corporation law or cause the Company to breach any agreement for borrowed money, such dividends are payable in kind through the issuance of additional shares of common stock having a value equal to the volume weighted average trading price of the Company's common stock for the ten (10) days preceding the applicable dividend payment date. The holders of the Series B-1 shares are entitled to designate one person to serve on the Board of Directors of the Company. The holders of the Series B-1 Shares are entitled to vote on an as converted to common stock basis together with the holders of our common stock on all matters presented to our stockholders. Upon any liquidation or dissolution of the Company, any merger or consolidation involving the Company or any subsidiary of the Company in which the shares of capital stock of the Company outstanding immediately prior to such merger or consolidation do not represent immediately following such merger or consolidation at least a majority of the voting power of the capital stock of the resulting or surviving corporation, or the sale of all or substantially all assets in a single transaction or a series of related transactions, unless the holders of at least a majority of the outstanding Series B-1 Shares elect otherwise, holders of Series B-1 Shares shall be entitled to receive prior to any payment to any holders of the Company's common stock an amount per share equal to \$100.00 per share plus any declared and unpaid dividends.

Anti-Takeover Effects of Certain Provisions of Our Certificate of Incorporation, Our Bylaws and the DGCL

The following provisions of our certificate of incorporation, our bylaws and the DGCL may discourage takeover attempts of us that may be considered by some stockholders to be in their best interest. The effect of such provisions could delay or frustrate a merger, tender offer or proxy contest, the removal of incumbent directors, or the assumption of control by stockholders, even if such proposed actions would be beneficial to our stockholders. Such effect could cause the market price of our common stock to decrease or could cause temporary fluctuations in the market price of our common stock that otherwise would not have resulted from actual or rumored takeover attempts.

Authorized but Unissued Capital Stock

Delaware law does not require stockholder approval for any issuance of authorized shares. Additional shares that may be used in the future may be used for a variety of corporate purposes, including future public offerings, to raise additional capital, to facilitate acquisitions and employee benefit plans.

Our Board of Directors may generally issue preferred shares on terms calculated to discourage, delay or prevent a change of control or the removal of our management. Moreover, our authorized but unissued shares of preferred stock will be available for future issuances without stockholder approval and could be utilized for a variety of corporate purposes.

One of the effects of the existence of unissued and unreserved common stock or preferred stock may be to enable our Board of Directors to issue shares to persons friendly to current management, which issuance could render more difficult or discourage an attempt to obtain control of the Company by means of a merger, tender offer, proxy contest or otherwise, and thereby protect the continuity of our management and possibly deprive our stockholders of opportunities to sell their shares of common stock at prices higher than prevailing market prices.

Special Meetings of Stockholders

Our bylaws provide that special meetings of our stockholders may be called only by our Board of Directors. This provision may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of the Company.

Director Vacancies

Our certificate of incorporation provides that any vacancies in our Board of Directors, however occurring, will be filled by a majority of the remaining members of the Board of Directors, even if less than a quorum. This provision may discourage a third party from making a tender offer or otherwise attempting to obtain control of us because the provision effectively limits stockholder election of Directors to annual and special meetings of the stockholders.

Requirements for Advance Notification of Director Nominations and Stockholder Proposals

Our bylaws establish advance notice procedures with respect to stockholder proposals and the nomination of candidates for election as directors, other than nominations made by or at the direction of the Board of Directors or a committee of the Board of Directors. In order for any matter to be “properly brought” before a meeting, a stockholder will have to comply with advance notice requirements and provide us with certain information. Generally, to be timely, a stockholder’s notice must be received at our principal executive offices not less than 60 days nor more than 90 days prior to the first anniversary date of the immediately preceding annual meeting of stockholders. Our bylaws also specify requirements as to the form and content of a stockholder’s notice. These provisions may defer, delay or discourage a potential acquirer from conducting a solicitation of proxies to elect the acquirer’s own slate of directors or otherwise attempting to influence or obtain control of the Company.

No Cumulative Voting

Under Delaware law, the right to vote cumulatively does not exist unless the certificate of incorporation specifically authorizes cumulative voting. Our certificate of incorporation does not authorize cumulative voting. Therefore, stockholders holding a majority in voting power of the shares of our stock entitled to vote generally in the election of directors will be able to elect all our directors.

**MARKET FOR COMMON EQUITY
AND RELATED STOCKHOLDER MATTERS**

Market Information

Our common stock currently trades on the QB tier of the OTC Marketplace (“OTCQB”) under the symbol “BKYI”. The following table sets forth the range of high and low bid prices for shares of our common stock on the OTCQB for the periods indicated, as reported by the OTCQB. Quotations represent inter-dealer prices, without retail mark-up, markdown or commission, and may not represent actual transactions. All prices have been adjusted to reflect a one-for- two reverse stock split effected February 2, 2015

2015:	High	Low
Quarter ending December 31, 2015	\$ 0.20	\$ 0.12
Quarter ending September 30, 2015	\$ 0.23	\$ 0.10
Quarter ending June 30, 2015	0.22	0.12
Quarter ended March 31, 2015	0.25	0.14

2014:	High	Low
Quarter ended December 31, 2014	\$0.28	\$0.14
Quarter ended September 30, 2014	0.50	0.20
Quarter ended June 30, 2014	0.60	0.44
Quarter ended March 31, 2014	0.56	0.28

2013:	High	Low
--------------	-------------	------------

Quarter ended December 31, 2013	\$0.48	\$0.30
Quarter ended September 30, 2013	0.78	0.48
Quarter ended June 30, 2013	0.80	0.32
Quarter ended March 31, 2013	0.38	0.18

The last reported trading price of our common stock as reported on the OTCQB on January 13, 2016 was \$0.17 per share.

Holders

As of January 13, 2016, the number of stockholders of record of our common stock was 157.

Dividends

We have not paid any cash dividends on our common stock to date, and have no intention of paying any cash dividends on our common stock in the foreseeable future. The declaration and payment of dividends on our common stock is also subject to the discretion of our Board of Directors and certain limitations imposed under the DGCL. The timing, amount and form of dividends, if any, will depend on, among other things, our results of operations, financial condition, cash requirements and other factors deemed relevant by our Board of Directors.

Transfer Agent

The transfer agent for our common stock is Broadridge Corporate Issuer Solutions, Inc., 1717 Arch Street, Suite 1300, Philadelphia, Pennsylvania 19103.

THE OFFERING

This prospectus covers the public sale of 65,000,000 shares of common stock to be sold by the selling security holders identified in this prospectus, consisting of:

30,000,000 shares of common stock issuable upon conversion of Series A-1 Convertible Preferred Stock issued in our October 2015 and November 2015 private offerings; and

35,000,000 shares of common stock issuable upon conversion of Series B-1 Convertible Preferred Stock issued in our November 2015 private offering.

This prospectus also covers any additional shares of our common stock that we may issue or that may be issuable by reason of any stock split, stock dividend or similar transaction involving our common stock.

The selling security holders may sell the shares covered by this prospectus through public or private transactions at prevailing market prices or at privately negotiated prices. We will not receive any proceeds from this offering.

Set forth below is a description of the private offerings that form the basis of the shares of common stock being registered for resale hereby.

On October 22 and 29, 2015, we issued 84,500 shares of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for aggregate gross proceeds of \$8,450,000. The Series A-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share, subject to adjustment for stock dividends, stock splits, combinations, and reclassifications of our capital stock, and subject to a “blocker provision” which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. The Series A-1 Shares accrue dividends at the rate of 6% per annum

payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash through October 1, 2017 and thereafter, in cash or kind through the issuance of additional shares of common stock having a value equal to the volume weighted average trading price of the Company's common stock for the ten (10) days preceding the applicable dividend payment date.

On November 11, 2015 we issued 105,000 shares of Series B-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross proceeds of \$10,500,000, and 5,500 additional shares of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross cash proceeds of \$550,000. The Series B-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share, subject to adjustment for stock dividends, stock splits, combinations, and reclassifications of our capital stock, and subject to a "blocker provision" which prohibits conversion if such conversion would result in the holder being the beneficial owner of in excess of 9.99% of our common stock. The Series B-1 Shares accrue dividends at the rate of 2.5% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash.

SELLING SECURITY HOLDERS

The selling security holders identified in the following table are offering for resale 65,000,000 shares of our common stock. All of the securities were previously issued to the selling security holders in private placement transactions described above under the section entitled “**The Offering**”.

The following table sets forth:

The name of each selling security holder and any material relationship between us and such selling security holder based upon information currently available to us;

The number of shares owned beneficially by each selling security holder before the offering;

The percentage ownership of each selling security holder prior to the offering;

The number of shares offered hereunder by each selling security holder;

The number of shares owned beneficially by each selling security holder after the offering; and

The percentage ownership of each selling security holder after the offering.

The information presented in this table has been calculated based on the assumption that all options and warrants will be exercised prior to completion of the offering, that all shares offered hereby will be sold, and that no other shares of our common stock will be acquired or disposed of by the selling security holder prior to the termination of this offering. The beneficial ownership set forth below has been determined in accordance with Rule 13d-3 under the Exchange Act based on 66,098,482 shares of our common stock outstanding on January 13, 2016. Except as indicated by footnote, and subject to applicable community property laws, we believe that the beneficial owners of the common stock listed below have sole voting power and investments power with respect to their shares. None of the selling security holders are affiliated with a broker-dealer registered under the Exchange Act of 1934, as amended.

Beneficial Ownership of	Maximum Number of Shares	Beneficial Ownership of
----------------------------	--------------------------------	----------------------------

Name of Selling Security Holder	Selling Security Holders		Offered	Selling Security Holders

Micron Technology Development Limited ⁽⁴⁾	7,262,763	9.9%	25,000,000	-	*

* Represents less than one percent (1%) of our outstanding shares.

(1) Assumes that (i) all of the shares of common stock to be registered by the registration statement of which this prospectus is a part, including all shares of common stock issued and outstanding and all shares of common stock issuable upon conversion of our Series A-1 and Series B-1 Convertible Preferred Stock, are sold, and (ii) the selling security holders do not acquire additional shares of our common stock after the date of this prospectus.

(2) Mr. Wong is the chief technology officer of China Goldjoy Limited, the parent company of Giant Leap International, Ltd. Certain wholly-owned subsidiaries of China Goldjoy Limited are parties to a license agreement with the Company. See “Certain Relationships and Related Party Transactions – Licensing Agreement with Subsidiaries of China Goldjoy Limited.”

(3) As chairman and chief executive officer of China Goldjoy Limited, the parent company of Giant Leap International, Ltd., Mr. Yao has shared voting and dispositive power with respect to the shares. Certain wholly-owned subsidiaries of China Goldjoy Limited are parties to a license agreement with the Company. See “Certain Relationships and Related Party Transactions – Licensing Agreement with Subsidiaries of China Goldjoy Limited.”

(4) As the sole shareholder of Micron Technology Development Limited, Mr. Wang Jian has sole voting and dispositive power with respect to the shares.

USE OF PROCEEDS

We will not receive any proceeds from the sale of common stock by the selling security holders.

PLAN OF DISTRIBUTION

Each selling security holder of the common stock and any of their pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock on the OTCQB or any other stock exchange, market or trading facility on which the shares are traded or in private transactions. These sales may be at fixed or negotiated prices. A selling security holder may use any one or more of the following methods when selling shares:

ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

purchases by a broker-dealer as principal and resale by the broker-dealer for its account;

an exchange distribution in accordance with the rules of the applicable exchange;

privately negotiated transactions;

settlement of short sales entered into after selling security holders the effective date of the registration statement of which this prospectus is a part;

broker-dealers may agree to sell a specified number of such shares at a stipulated price per share;

through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;

a combination of any such methods of sale; or

any other method permitted pursuant to applicable law.

The selling security holders may also sell shares under Rule 144 under the Securities Act of 1933, as amended (the “Securities Act”), if available, rather than under this prospectus.

Broker-dealers engaged by the selling security holders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling security holders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated, but, except as set forth in a supplement to this prospectus, in the case of an agency transaction not in excess of a customary brokerage commission in compliance with FINRA Rule 2440; and in the case of a principal transaction a markup or markdown in compliance with FINRA IM-2440.

In connection with the sale of the common stock or interests therein, the selling security holders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling security holders may also sell shares of the common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling security holders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The selling security holders and any broker-dealers or agents that are involved in selling the shares may be deemed to be “underwriters” within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. Each selling security holder has informed us that it does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the common stock. In no event shall any broker-dealer receive fees, commissions and markups which, in the aggregate, would exceed eight percent (8%).

We are required to pay certain fees and expenses incurred by us incident to the registration of the shares. We have agreed to indemnify the selling security holders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act.

Because selling security holders may be deemed to be “underwriters” within the meaning of the Securities Act, they will be subject to the prospectus delivery requirements of the Securities Act, including Rule 172 thereunder. In addition, any securities covered by this prospectus which qualify for sale pursuant to Rule 144 under the Securities Act may be sold under Rule 144 rather than under this prospectus. There is no underwriter or coordinating broker acting in connection with the proposed sale of the resale shares by the selling security holders.

We agreed to keep this prospectus effective until the earlier of (i) the date on which the shares may be resold by the selling security holders without registration and without the requirement to be in compliance with Rule 144(c)(1) under the Securities Act and otherwise without volume or manner of sale restrictions pursuant to Rule 144 or (ii) all of the shares have been sold pursuant to this prospectus or Rule 144 under the Securities Act. The resale shares will be sold only through registered or licensed brokers or dealers if required under applicable state securities laws. In addition, in certain states, the resale shares may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available and is complied with.

Under applicable rules and regulations under the Securities Exchange Act of 1934, as amended, any person engaged in the distribution of the resale shares may not simultaneously engage in market making activities with respect to the common stock for the applicable restricted period, as defined in Regulation M, prior to the commencement of the distribution. In addition, the selling security holders will be subject to applicable provisions of the Securities Exchange Act of 1934, as amended, and the rules and regulations thereunder, including Regulation M, which may limit the timing of purchases and sales of shares of the common stock by the selling security holders or any other person. We will make copies of this prospectus available to the selling security holders and have informed them of the need to deliver a copy of this prospectus to each purchaser at or prior to the time of the sale (including by compliance with Rule 172 under the Securities Act).

LEGAL MATTERS

The validity of the shares of common stock offered hereby has been passed upon for us by Fox Rothschild LLP, 997 Lenox Drive, Building 3, Lawrenceville, NJ 08648.

EXPERTS

The audited consolidated balance sheets at December 31, 2014 and 2013 and the audited consolidated statements of operations, stockholders' equity and cash flows for the years ended December 31, 2014 and 2013 have been audited by Rotenberg Meril Solomon Bertiger & Guttilla, P.C., our independent registered public accounting firm. We have included these financial statements in this registration statement in reliance upon the reports of such firm given their authority as experts in accounting and auditing.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we filed with the SEC. You should rely only on the information provided in this prospectus. We have not authorized anyone to provide you with information different from that contained in this prospectus. The selling security holders are offering to sell, and seeking offers to buy, shares of common stock only in jurisdictions where offers and sales are permitted. The information contained in this prospectus is accurate only as of the date of this prospectus, regardless of the time of delivery of this prospectus or of any sale of common stock. Applicable SEC rules may require us to update this prospectus in the future.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any report, statement or other information that we file with the SEC at the SEC Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain further information on the operation of the Public Reference room by calling the SEC at 1-800-SEC-0330. Our SEC filings are also available to the public at the SEC's website at www.sec.gov, as well as our website at www.bio-key.com. Information contained on our website does not constitute a part of this prospectus.

This prospectus is part of a registration statement that we filed with the SEC. This prospectus and any accompanying prospectus supplement do not contain all of the information included in the registration statement, and certain statements contained in this prospectus and any accompanying prospectus supplement about the provisions or contents of any contract, agreement or any other document referred to herein are not necessarily complete. For each of these contracts, agreements or documents filed as an exhibit to the registration statement, we refer you to the actual exhibit for a more complete description of the matters involved. In addition, we have omitted certain parts of the registration statement in accordance with the rules and regulations of the SEC. To obtain all of the information that we filed with the SEC in connection herewith, we refer you to the registration statement, including its exhibits and schedules. You should assume that the information contained in this prospectus and any accompanying prospectus supplement is accurate only as of the date appearing on the front of the prospectus or prospectus supplement, as applicable.

BIO-KEY INTERNATIONAL, INC. AND SUBSIDIARY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2015 (Unaudited)

1. NATURE OF BUSINESS AND BASIS OF PRESENTATION

Nature of Business

BIO-key International, Inc. was founded in 1993 as a fingerprint biometric technology company. Biometric technology is the science of analyzing specific human characteristics which are unique to each individual in order to identify a specific person from a broader population. We develop and market advanced fingerprint biometric identification and identity verification technologies, cryptographic authentication-transaction security technologies, as well as related identity management and credentialing software solutions. We sell our products and provide services primarily to commercial entities within highly regulated industries, like healthcare and financial services and the broader corporate enterprise.

Basis of Presentation

The accompanying unaudited interim condensed consolidated financial statements include the accounts of BIO-key International, Inc. and its wholly-owned subsidiary (collectively, the “Company”) and are stated in conformity with accounting principles generally accepted in the United States of America, pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). The operating results for interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year. Pursuant to such rules and regulations, certain financial information and footnote disclosures normally included in the financial statements have been condensed or omitted. Significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, the accompanying unaudited interim consolidated financial statements contain all necessary adjustments, consisting only of those of a recurring nature, and disclosures to present fairly the Company’s financial position and the results of its operations and cash flows for the periods presented. The balance sheet at December 31, 2014 was derived from the audited financial statements, but does not include all of the disclosures required by accounting principles generally accepted in the United States of America. These unaudited interim

condensed consolidated financial statements should be read in conjunction with the financial statements and the related notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014 (the "Form 10-K"), filed with the SEC on March 31, 2015.

Recently Issued Accounting Pronouncements

In January 2015, ASU No. 2015-01, "Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary items" ("ASU 2015-01") was issued. ASU 2015-01 eliminates from GAAP the concept of extraordinary items. ASU 2015-01 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The Company is currently evaluating the effects of adopting ASU 2014-15 on its consolidated financial statements but the adoption is not expected to have a significant impact.

In April 2015, the FASB issued ASU 2015-03, "Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." ASU 2015-03 requires debt issuance costs related to a debt liability measured at amortized cost to be reported in the balance sheet as a direct deduction from the face amount of the debt liability. ASU 2015-03 is effective for interim and annual periods beginning January 1, 2016 with early adoption permitted, and is applied on a retrospective basis. The adoption of ASU 2015-03 is not expected to materially impact the Company's consolidated financial statements.

In July 2015 the FASB issued ASU No. 2015-11, "Inventory (Topic 330): Simplifying the Measurement of Inventory" ("ASU 2015-11"). The amendments in ASU 2015-11 clarifies the measurement of inventory to be the lower of cost or realizable value and would only apply to inventory valued using the FIFO or average costing methods. ASU 2015-11 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The reporting entity should apply the amendments prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. The Company is currently evaluating the effects of adopting ASU 2015-11 on its consolidated financial statements.

Management does not believe that any other recently issued, but not yet effective, accounting standard if currently adopted would have a material effect on the accompanying consolidated financial statements.

2. GOING CONCERN

The Company has incurred significant losses to date and at September 30, 2015, had an accumulated deficit of approximately \$58 million. In addition, broad commercial acceptance of the Company's technology is critical to the Company's success and ability to generate future revenues. At September 30, 2015, the Company's total cash and cash equivalents were approximately \$72,000, as compared to approximately \$844,000 at December 31, 2014.

The Company has financed itself in the past through access to the capital markets by issuing secured and convertible debt securities, convertible preferred stock, common stock, and through factoring receivables. The Company estimates that it currently requires approximately \$575,000 per month to conduct operations and pay dividend obligations, a monthly amount that it has been unable to achieve consistently through revenue generation.

If the Company is unable to generate sufficient revenue to meet its goals, it will need to obtain additional third-party financing to (i) conduct the sales, marketing and technical support necessary to execute its plan to substantially grow operations, increase revenue, and serve a significant customer base; and (ii) provide working capital. No assurance can be given that any form of additional financing will be available on terms acceptable to the Company, that adequate financing will be obtained by the Company, in order to meet its needs, or that such financing would not be dilutive to existing shareholders.

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern, and assumes continuity of operations, realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The matters described in the preceding paragraphs raise substantial doubt about the Company's ability to continue as a going concern. Recoverability of a major portion of the recorded asset amounts shown in the accompanying balance sheet is dependent upon the Company's ability to meet its financing requirements on a continuing basis, and become profitable in its future operations. The accompanying consolidated financial statements

do not include any adjustments relating to the recoverability and classification of recorded assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

3.SHARE BASED COMPENSATION

The following table presents share-based compensation expenses for continuing operations included in the Company's unaudited interim condensed consolidated statements of operations:

	Three Months Ended September 30, 2015	Three Months Ended September 30, 2014
Selling, general and administrative	\$ 30,779	\$ 32,700
Research, development and engineering	5,271	5,364
	\$ 36,050	\$ 38,064

	Nine Months	Nine Months
	Ended	Ended
	September 30, 2015	September 30, 2014
Selling, general and administrative	\$ 218,653	\$ 144,616
Research, development and engineering	39,644	25,666
	\$ 258,297	\$ 170,282

4. FACTORING

Due from (to) factor consisted of the following as of:

	September 30, 2015	December 31, 2014
Original invoice value	\$ 815,085	\$ 306,625
Factored amount	(775,598)	(229,968)
Over advances and fees	(572,909)	-
Balance due from (to) factor	\$ (533,422)	\$ 76,657

As of December 2011, the Company entered into a 24 month accounts receivable factoring arrangement with a financial institution (the "Factor"). Pursuant to the terms of the arrangement, the Company, from time to time, sells to the Factor certain of its accounts receivable balances on a non-recourse basis for credit approved accounts. The Factor remits 35% of the foreign and 75% of the domestic accounts receivable balance to the Company (the "Advance Amount"), with the remaining balance, less fees to be forwarded to the Company once the Factor collects the full accounts receivable balance from the customer. In addition, the Company, from time to time, receives over advances from the factor. Factoring fees range from 2.75% to 21% of the face value of the invoice factored, and are determined by the number of days required for collection of the invoice. In April 2012, the terms were updated from monthly to quarterly, and the 24-month arrangement was extended to August 1, 2014. In July of 2014, the arrangement was extended to July 31, 2016. The cost of factoring is included in selling, general and administrative expenses. The cost of factoring was as follows:

Three Months ended	Nine Months ended September 30,
-------------------------------	--

	September 30,			
	2015	2014	2015	2014

Factoring fees	\$87,929	\$33,798	\$323,059	\$133,921
----------------	----------	----------	-----------	-----------

5.INVENTORY

Inventory is stated at the lower of cost, determined on a first in, first out basis, or market, and consists primarily of fabricated assemblies and finished goods. Inventory is comprised of the following as of:

	September	December
	30,	31,
	2015	2014
Finished goods	\$ 45,239	\$ 11,825
Fabricated assemblies	105,481	-
Total inventory	\$ 150,720	\$ 11,825

F-7

6. NOTE PAYABLE

Securities Purchase Agreement dated September 23, 2015

On September 23, 2015 the Company issued a promissory note due seven months from the date of issuance and a warrant to purchase 833,333 shares of common stock in consideration of \$250,000. The principal sum due under the note is the aggregate purchase price of \$250,000 plus an original issue discount of approximately 20% of the purchase price and a one-time interest charge of 12% of the purchase price. The principal sum and all other amounts owing under the note were fully paid by the Company following the initial closing of the October 2015 Series A-1 Convertible Preferred Stock offering. Refer to Note 13 - Subsequent Events. The warrants are immediately exercisable at an exercise price of \$0.30 per share and have a term of five years.

The warrants have customary anti-dilution protections including a "full ratchet" anti-dilution adjustment provision which are triggered in the event the Company sells or grants any additional shares of common stock, options, warrants or other securities that are convertible into common stock at a price lower than \$0.30 per share. The anti-dilution adjustment provision is not triggered by certain "exempt issuances" which among other issuances, includes the issuance of shares of common stock, options or other securities to officers, employees, directors, consultants or service providers.

Based on an evaluation as discussed in FASB ASC 815-15, "Embedded Derivatives" and FASB ASC 815-40-15, "Contracts in Entity's Own Equity - Scope and Scope Exceptions," the Company determined that the full ratchet anti-dilution feature in the common stock issued was not considered indexed to its own stock because neither the occurrence of a sale of equity securities by the issuer at market nor the issuance of another equity contract with a lower strike price is an input to the fair value of a fixed-for-fixed option or forward on equity shares. As such, the full ratchet anti-dilution feature should be bifurcated from the common stock and accounted for as a derivative liability.

The Company did not value the derivative liability. One of the key determinants of the Company's decision to not value the derivative liability was the high likelihood that a future financing would not occur that would trigger the down round feature. Whether a future equity financing would occur would be determined by the cash needs of the Company and management's willingness to trigger the down round feature. The Company's reasons were based on the Memorandum of Understanding that was signed on June 24, 2015, indicating that the preferred shares would be issued at a conversion price of \$0.30

The cashless exercise features contained in the warrants are considered to be derivatives and the Company recorded warrant liabilities on the consolidated balance sheet. The Company initially recorded a debt discount of \$92,199 and a warrant liability in the same amount. The debt discount is being amortized over the term of the loan. The warrants issued by the Company are valued using the Black-Scholes option-pricing model. The Company is required to

mark-to-market the warrant liabilities at the end of each reporting period. For the three and nine months ended September 30, 2015, the Company recorded a gain on the change in fair value of the cashless exercise features of \$7,191. As of September 30, 2015, the fair value of the cashless exercise features was \$85,008.

7.EARNINGS (LOSS) PER SHARE COMMON STOCK ("EPS")

The Company's basic EPS is calculated using net income (loss) available to common shareholders and the weighted-average number of shares outstanding during the reporting period. Diluted EPS includes the effect from potential issuance of common stock, such as stock issuable pursuant to the exercise of stock options and warrants and the assumed conversion of convertible notes and preferred stock.

The reconciliation of the numerators of the basic and diluted EPS calculations was as follows for both of the following three and nine month periods ended September 30:

	Three Months ended		Nine Months ended	
	September 30, 2015	2014	September 30, 2015	2014
Basic Numerator:				
Net income (loss) available to common stockholders	\$(1,079,584)	\$(51,526)	\$(1,250,539)	\$(1,377,026)
Basic Denominator	66,038,941	58,026,262	66,013,958	57,989,165
Per Share Amount	(0.02)	(0.00)	(0.02)	(0.02)

The following table sets forth the options and warrants which were excluded from the diluted per share calculation even though the exercise prices were less than the average market price of the common shares because the effect of including these potential shares was antidilutive due to the net losses for the three and nine months ended September 30:

	Three Months ended		Nine Months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Stock options	12,917	364,149	68,227	714,696
Warrants	-	-	-	-
Total	12,917	364,149	68,227	714,696

Items excluded from the diluted per share calculation because the exercise price was greater than the average market price of the common shares:

	Three Months ended		Nine Months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Stock options	3,991,332	3,097,501	2,888,332	1,740,000
Warrants	20,455,414	15,184,565	20,455,414	15,184,565
Total	24,446,746	18,282,066	23,343,746	16,924,565

8. STOCKHOLDERS' DEFICIT

Derivative Liabilities

In connection with the issuances of equity instruments or debt, the Company may issue options or warrants to purchase common stock. In certain circumstances, these options or warrants may be classified as liabilities, rather than as equity. In addition, the equity instrument or debt may contain embedded derivative instruments, such as conversion options or listing requirements, which in certain circumstances may be required to be bifurcated from the associated host instrument and accounted for separately as a derivative liability instrument. The Company accounts for derivative liability instruments under the provisions of FASB ASC 815, "Derivatives and Hedging."

Securities Purchase Agreements dated October 25, 2013 and November 8, 2013

Pursuant to a series of Private Investors Securities Purchase Agreements (the “PI SPA”), on October 25, 2013 and November 8, 2013, the Company issued to certain private investors an aggregate of 12,323,668 units consisting of 12,323,668 post split shares of common stock (the “Shares”) and warrants to purchase an additional 12,323,668 post-split shares of common stock (the “Warrants”) for an aggregate purchase price of \$3,697,100. The warrants are immediately exercisable at an exercise price of \$0.50 per post-split share, have a term of three years, and were exercisable on a cashless basis if at any time following the nine month anniversary of the issuance date, there is not an effective registration statement covering the public resale of the shares of Common Stock underlying the warrants. The Company filed a registration statement on November 22, 2013 and such registration was declared effective on December 31, 2013.

In connection with the share issuances described above, and pursuant to a placement agency letter agreement, the Company paid the placement agent cash commissions equal to 8% of the gross proceeds of the offering, reimbursed the placement agent for its reasonable out of pocket expenses, and issued to the placement agent warrants (the “Placement Agent Warrants”) to purchase an aggregate of 985,893 post split shares of common stock. The Placement Agent Warrants have substantially the same terms as the warrants issued to the investors, except the Placement Agent Warrants are immediately exercisable on a cashless basis.

The cashless exercise features contained in the warrants are considered to be derivatives and the Company recorded warrant liabilities on the consolidated balance sheet. The Company initially recorded the warrant liabilities equal to their estimated fair value of \$325,891. Such amount was also recorded as a reduction of additional paid-in capital. The Company is required to mark-to-market the warrant liabilities at the end of each reporting period. For the quarter ended September 30, 2015, the Company recorded a gain on the change in fair value of the cashless exercise features of \$20,784. For the nine months ended September 30, 2015, the Company recorded a net gain on the change in fair value of the cashless exercise feature of \$35,037. As of September 30, 2015, the fair value of the cashless exercise features was \$8,190. The fair value of the cashless exercise features was \$43,227 as of December 31, 2014.

Securities Purchase Agreement dated November 13, 2014

Pursuant to a Securities Purchase Agreement, dated November 13, 2014, by and between the Company and a number of private and institutional investors (the “November 2014 Private Investor SPA”), the Company issued to certain private investors 7,974,999 post split shares of common stock and warrants to purchase an additional 11,962,501 post split shares of common stock for aggregate gross proceeds of \$1,595,000. In addition, for each share purchased in this offering, the investors surrendered to the Company for cancellation a warrant to acquire one share of our common stock which we previously issued in a private placement transaction in November 2013. This resulted in the cancellation of warrants to purchase an aggregate of 7,974,999 post split shares of common stock.

The common stock has a purchase price reset feature. If at any time prior to the two year anniversary of the effective date of the registration statement covering the public resale of such shares, the Company sells or issues shares of common stock or securities that are convertible into common stock at a price lower than \$0.20 per share, the Company will be required to issue additional shares of common stock for no additional consideration.

Based on an evaluation as discussed in FASB ASC 815-15, “Embedded Derivatives” and FASB ASC 815-40-15, “Contracts in Entity’s Own Equity - Scope and Scope Exceptions,” the Company determined that the purchase price reset feature in the common stock issued was not considered indexed to its own stock because neither the occurrence of a sale of equity securities by the issuer at market nor the issuance of another equity contract with a lower strike price is an input to the fair value of a fixed-for-fixed option or forward on equity shares. As such, the purchase price reset feature should be bifurcated from the common stock and accounted for as a derivative liability.

The Company valued the purchase price reset feature using a Monte Carlo simulation at the date of issuance, and December 31, 2014, and determined that the purchase price reset feature had no value as the calculated price of the common stock was not below \$0.20 per share. At September 30, 2015 the calculated price was below \$0.20, however the Company did not value the reset feature based on the Memorandum of Understanding that was signed on June 24, 2015 indicating that preferred shares would be issued at a conversion price of \$0.30.

The warrants have a term of five years and an exercise price of \$0.30 per post-split share. Warrants to purchase 5,981,251 post-split shares of common stock were immediately exercisable. The remaining warrants to purchase 5,981,250 post-split shares of common stock became exercisable on the completion of a 1 - for - 2 reverse split of the Company's common stock in February 2015.

The warrants have customary anti-dilution protections including a “full ratchet” anti-dilution adjustment provision which are triggered in the event the Company sells or grants any additional shares of common stock, options, warrants or other securities that are convertible into common stock at a price lower than \$0.30 per share. The anti-dilution

adjustment provision is not triggered by certain “exempt issuances” which among other issuances, includes the issuance of shares of common stock, options or other securities to officers, employees, directors, consultants or service providers.

The warrants are exercisable on a cashless basis if at any time there is no effective registration statement covering the resale of the shares of common stock underlying the warrants. See below.

Based on an evaluation as discussed in FASB ASC 815-15, “Embedded Derivatives” and FASB ASC 815-40-15, “Contracts in Entity’s Own Equity - Scope and Scope Exceptions,” the Company determined that the full ratchet anti-dilution feature in the warrants issued were not considered indexed to its own stock because neither the occurrence of a sale of equity securities by the issuer at market nor the issuance of another equity contract with a lower strike price is an input to the fair value of a fixed-for-fixed option or forward on equity shares. As such, the full ratchet anti-dilution feature should be bifurcated from the warrants and accounted for as a derivative liability.

The Company did not value the derivative liability. One of the key determinants of the Company’s decision to not value the derivative liability was the high likelihood that a future financing would not occur that would trigger the down round feature. Whether a future equity financing would occur would be determined by the cash needs of the Company and management’s willingness to trigger the down round feature. The Company’s reasons were based on the Memorandum of Understanding that was signed on June 24, 2015 indicating that preferred shares would be issued at a conversion price of \$0.30.

Under GAAP, the Company is required to mark-to-market the derivative liability at the end of each reporting period. The Company did not value the derivative liability at the date of issuance, December 31, 2014 or September 30, 2015. At such dates, the Company determined that it was highly unlikely that an equity financing would occur that would trigger the down round feature. Such conclusion was based upon the discussion noted above.

The Company filed a registration statement on Form S-1 with the SEC to register the public resale of 13,956,250 of the shares of common stock issued in the November 2014 Private Investor SPA. The registration statement was declared effective on January 29, 2015. Post reverse split, the Company filed a registration statement on Form S-1 with the SEC to register the balance of the shares of common stock issued under the November 2014 Private Investor SPA which was declared effective on May 4, 2015.

Warrants

On March 9, 2015, the Company issued a warrant to purchase 575,000 shares of common stock to a consultant which vests in equal quarterly installments over one year and is exercisable at \$0.21 per share through March 8, 2020.

The fair value of the warrants was estimated on the date of grant at \$98,065 using the Black-Scholes option-pricing model with the following assumptions: risk free interest rate: 1.66%, expected life of options in years: 5, expected dividends: 0, volatility of stock price: 115.7%.

Share based expense related to the value of the stock warrants is recorded over the requisite service period, which is generally the vesting period for each tranche. Stock warrants issued by the Company are valued using the Black-Scholes option-pricing model. For the three and nine months ended September 30, 2015, the Company recorded an expense of \$4,398 and \$30,054 respectively, related to the stock warrants.

On September 23, 2015, the Company issued a warrant to purchase 833,333 shares of common stock in connection with the issuance of a promissory note. Refer to Note 6 for details.

Issuances and Exercise of Stock Options

During the three and nine months ended September 30, 2015, the Company granted 1,103,000 and 1,178,000 stock options, respectively, to employees and directors. The options are exercisable for a term of seven years and vest in equal annual installments over a three-year period commencing on the date of grant. The options are exercisable at \$0.18-0.20 per share.

The fair value of the options was estimated on the date of grant at \$169,343 using the Black-Scholes option-pricing model with the following assumptions: risk free interest rate: 1.44-1.50%, expected life of options in years: 4.5,

expected dividends: 0, volatility of stock price: 117-118%.

9.SEGMENT INFORMATION

The Company has determined that its continuing operations are one discrete segment consisting of biometric products. Geographically, North American sales accounted for approximately 56% and 81% of the Company's total sales for the three months ended September 30, 2015 and 2014, respectively, and were approximately 32% and 91% of the Company's total sales for the nine months ended September 30, 2015 and 2014, respectively.

10.FAIR VALUES OF FINANCIAL INSTRUMENTS

Cash and cash equivalents, accounts and notes receivable, accounts payable, accrued liabilities, and notes payable, are carried at, or approximate, fair value because of their short-term nature.

The fair value of the warrant liabilities at September 30, 2015 were measured using the following assumptions:

Risk-free interest rate	0.35 - 1.37%
Expected term	1.07 - 4.98
Expected dividends	0
Volatility of stock price	84.4 - 115.9%

The warrant liabilities are considered Level 3 liabilities on the fair value hierarchy as the determination of fair value includes various assumptions about of future activities and the Company's stock prices and historical volatility as inputs.

Warrant issued under PI SPA	
Fair value at January 1, 2015	43,227
Gain on derivative	(35,037)
	8,190

Warrant issued under September 2015 SPA	
Fair value at January 1, 2015	-
Fair value at issuance	92,199
Gain on derivative	(7,191)
	85,008

Balance, September 30, 2015	\$93,198
-----------------------------	----------

11. MAJOR CUSTOMERS AND ACCOUNTS RECEIVABLE

For the three months ended September 30, 2015 and 2014, three customers accounted for 65% and three customers accounted for 58% of revenue, respectively. For the nine months ended September 30, 2015 and 2014, one customer accounted for 53% and four customers accounted for 71% of revenue, respectively.

At September 30, 2015, one customer accounted for 94% of accounts receivable. At December 31, 2014, one customer accounted for 62% of accounts receivable.

12. CONTINGENCY

On or about March 13, 2014, LifeSouth Community Blood Centers, Inc. (“LifeSouth”), filed a lawsuit against the Company in the Superior Court of Monmouth County, New Jersey (MON-L-1042-14) alleging a breach of a license agreement and seeking return of all amounts paid under the license in the amount of \$718,500. On August 21, 2015, the Company and LifeSouth entered into a settlement agreement to discontinue and end litigation.

13. SUBSEQUENT EVENTS

On October 22 and 29, 2015 the Company issued 84,500 shares (the “Series A-1 Shares”) of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for aggregate gross proceeds of \$8,450,000. The Series A-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share and accrue dividends at the rate of 6% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year, payable in cash through October 1, 2017 and thereafter, in cash or kind through the issuance of additional shares of common stock.

On November 11, 2015 the Company issued 105,000 shares (the “Series B-1 Shares”) of Series B-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross proceeds of \$10,500,000, and 5,500 additional shares of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross cash proceeds of \$550,000.

The Series B-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share and accrue dividends at the rate of 2.5% per annum payable quarterly on April 1, July, 1, October 1, and January 1 of each year payable in cash.

The holders of the Series A-1 and B-1 Shares are entitled to vote on an as converted to common stock basis together with the holders of our common stock on all matters presented to our stockholders.

On November 11, 2015, in conjunction with the private placement transactions described above, BIO-key Hong Kong Ltd., a wholly-owned subsidiary of the Company, entered into a software license purchase agreement regarding a portfolio of mobile and online payment and security software technologies from certain subsidiaries of China Goldjoy Group Limited, formerly World Wide Touch Technology (Holdings) Limited, in consideration of a one-time payment of \$12 million.

On November 9, 2015, the Company issued 25,000 shares of common stock to its directors in payment of board fees.

The Company has reviewed all other subsequent events through the date of filing.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

BIO-key International, Inc.

North Billerica, MA

We have audited the accompanying consolidated balance sheets of BIO-key International, Inc. and Subsidiary (the “Company”) as of December 31, 2014 and 2013, and the related consolidated statements of operations, stockholders’ equity (deficit) and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management as well as evaluating the overall consolidated financial statement presentation. We believe our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2014 and 2013, and the consolidated results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As disclosed in the consolidated financial statements, the Company has suffered substantial net losses in recent years, has an accumulated deficit at December 31, 2014 and is dependent on debt and equity financing to fund its operations, all of which raise substantial doubt about the Company’s ability to continue as a going concern. Management’s plans regarding these matters are disclosed in Note A. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTES TO THE FINANCIAL STATEMENTS

December 31, 2014 and 2013

NOTE A —THE COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

The Company, founded in 1993, develops and markets proprietary fingerprint identification biometric technology and software solutions. The Company also delivers advanced identification solutions and information services to law enforcement departments, public safety agencies and other government and private sector customers. Our mobile wireless technology provides first responders with critical, reliable, real-time data and images from local, state and national databases.

Basis of Presentation

The Company has incurred significant losses to date, and at December 31, 2014, it had an accumulated deficit of approximately \$57 million. In addition, broad commercial acceptance of the Company's technology is critical to the Company's success and ability to generate future revenues. At December 31, 2014, our total cash and cash equivalents were approximately \$844,000, as compared to approximately \$2,023,000 at December 31, 2013.

As discussed below, the Company has financed itself in the past through access to the capital markets by issuing secured and convertible debt securities, convertible preferred stock, common stock, and recently through factoring receivables. The Company currently requires approximately \$475,000 per month to conduct operations, a monthly amount that it has been unable to achieve through revenue generation.

If the Company is unable to generate sufficient revenue to meet our goals, it will need to obtain additional third-party financing to (i) conduct the sales, marketing and technical support necessary to execute its plan to substantially grow operations, increase revenue and serve a significant customer base; and (ii) provide working capital. No assurance can be given that any form of additional financing will be available on terms acceptable to the Company, that adequate financing will be obtained by the Company in order to meet its needs, or that such financing would not be dilutive to existing shareholders.

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"), which contemplate continuation of the Company as a going concern, and assumes continuity of operations, realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The matters described in the preceding paragraphs raise substantial doubt about the Company's ability to continue as a going concern. Recoverability of a major portion of the recorded asset amounts shown in the accompanying balance sheet is dependent upon the Company's ability to meet its financing requirements on a continuing basis, and become profitable in its future operations. The accompanying consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

Effective February 3, 2015, the Company implemented a reverse stock split of its outstanding common stock at a ratio of 1 - for - 2 shares. All share figures and results are reflected on a post-split basis. See Note L.

Summary of Significant Accounting Policies

A summary of the significant accounting policies consistently applied in the preparation of the accompanying consolidated financial statements follows:

1. Basis of Consolidation

The accompanying consolidated financial statements include the accounts of BIO-key International, Inc. and its wholly-owned subsidiary (collectively, the "Company"). Intercompany accounts and transactions have been eliminated in consolidation.

2. Use of Estimates

Our consolidated financial statements are prepared in accordance with GAAP as set forth in the Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC) and consider the various staff accounting bulletins and other applicable guidance issued by the U.S. Securities and Exchange Commission (SEC). These accounting principles require us to make certain estimates, judgments and assumptions. The Company believes that the estimates, judgments and assumptions upon which it relies are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. To the extent there are material differences between these estimates, judgments or assumptions and actual results, its consolidated financial statements will be affected. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result.

3. Revenue Recognition

Revenues from software licensing are recognized in accordance with ASC 985-605, "Software Revenue Recognition." Accordingly, revenue from software licensing is recognized when all of the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is probable.

The Company intends to enter into arrangements with end users for items which may include software license fees, and services or various combinations thereof. For each arrangement, revenues will be recognized when evidence of an agreement has been documented, the fees are fixed or determinable, collection of fees is probable, delivery of the product has occurred and no other significant obligations remain.

Multiple-Element Arrangements: For multiple-element arrangements, the Company applies the residual method in accordance with ASC 985-605. The residual method requires that the portion of the total arrangement fee attributable to the undelivered elements be deferred based on its vendor-specific objective evidence ("VSOE") of fair value and subsequently recognized as the service is delivered. The difference between the total arrangement fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements, which is generally the software license. VSOE of fair value for all elements in an arrangement is based upon the normal pricing for those products and services when sold separately. VSOE of fair value for support services is additionally determined by the renewal rate in customer contracts. The Company has established VSOE of fair value for support as well as consulting services.

License Revenues: Amounts allocated to license revenues are recognized at the time of delivery of the software and all other revenue recognition criteria discussed above have been met.

Revenue from licensing software, which requires significant customization and modification, is recognized using the percentage of completion method, based on the hours of effort incurred by the Company in relation to the total estimated hours to complete. In instances where third party hardware, software or services form a significant portion of a customer's contract, the Company recognizes revenue for the element of software customization by the percentage of completion method described above. Otherwise, third party hardware, software, and services are recognized upon shipment or acceptance as appropriate. If the Company makes different judgments or utilizes different estimates of the total amount of work expected to be required to customize or modify the software, the timing and revenue recognition, from period to period, and the margins on the project in the reporting period, may differ materially from amounts reported. Anticipated contract losses are recognized as soon as they become known and are estimable.

Service Revenues: Revenues from services are comprised of maintenance and consulting and implementation services. Maintenance revenues include providing for unspecified when-and-if available product updates and customer telephone support services, and are recognized ratably over the term of the service period. Consulting services are generally sold on a time-and-materials basis and include a range of services including installation of software and assisting in the design of interfaces to allow the software to operate in customized environments. Services are generally separable from other elements under the arrangement since performance of the services are not essential to the functionality of any other element of the transaction and are described in the contract such that the total price of the arrangement would be expected to vary as the result of the inclusion or exclusion of the services. Revenues from services are generally recognized as the services are performed.

The Company provides customers, free of charge or at a minimal cost, testing kits which potential licensing customers may use to test compatibility/acceptance of the Company's technology with the customer's intended applications.

Costs and other expenses: Includes professional compensation and other direct contract expenses, as well as costs attributable to the support of client service professional staff, depreciation and amortization costs related to assets used in revenue-generating activities, and other costs attributable to serving the Company's client base. Professional compensation consists of payroll costs and related benefits including stock-based compensation and bonuses. Other direct contract expenses include costs directly attributable to client engagements, such as out-of-pocket costs including travel and subsistence for client service professional staff, costs of hardware and software and costs of subcontractors. The allocation of lease and facilities charges for occupied offices is included in costs of service.

The Company accounts for its warranties under the FASB ASC 450, "Contingencies." The Company generally warrants that its products are free from defects in material and workmanship for a period of one year from the date of initial receipt by its customers. The warranty does not cover any losses or damage that occurs as a result of improper installation, misuse or neglect or repair or modification by anyone other than the Company or its authorized repair agent. The Company's policy is to accrue anticipated warranty costs based upon historical percentages of items returned for repair within one year of the initial sale. The Company's repair rate of products under warranty has been minimal, and a historical percentage has not been established. The Company's software license agreements generally include certain provisions for indemnifying customers against liabilities if the Company's software products infringe upon a third party's intellectual property rights. The Company has not provided for any reserves for warranty liabilities as it was determined to be immaterial.

4. Cash Equivalents

Cash equivalents consist of liquid investments with original maturities of three months or less. At December 31, 2014 and 2013, cash equivalents consisted of a money market account.

5. Accounts Receivable

Accounts receivable are carried at original amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a monthly basis. Management determines the allowance for doubtful receivables by regularly evaluating individual customer receivables and considering a customer's financial condition, credit history, and current economic conditions. Accounts receivable are written off when deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when received. Accounts receivable at December 31, 2014 and 2013 consisted of the following:

	December 31,	
	2014	2013
Accounts receivable	\$645,867	\$304,551
Allowance for doubtful accounts	(20,526)	(20,526)
Accounts receivable, net allowances for doubtful accounts	\$625,341	\$284,025

The allowance for doubtful accounts for the years ended December 31, 2014 and 2013 is as follows:

	Balance at	Charged to Costs	Deductions From	Balance at
	Beginning of Year	and Expenses	Reserves	End of Year
<i>Year Ended December 31, 2014</i>				
Allowance for Doubtful Accounts	\$ 20,526	\$ -	\$ -	\$20,526
<i>Year Ended December 31, 2013</i>				
Allowance for Doubtful Accounts	\$ 20,526	\$ -	\$ -	\$20,526

6. *Equipment and Leasehold Improvements, Intangible Assets and Depreciation and Amortization*

Equipment and leasehold improvements are stated at cost. Depreciation is provided for in amounts sufficient to relate the cost of depreciable assets to operations over the estimated service lives, principally using straight-line methods. Leasehold improvements are amortized over the shorter of the life of the improvement or the lease term, using the straight-line method.

The estimated useful lives used to compute depreciation and amortization for financial reporting purposes are as follows:

	2014	
<i>Equipment and leasehold improvements</i>		
Equipment (years)	3-	5
Furniture and fixtures (years)	3-	5
Software (years)	3	
Leasehold improvements	life or lease term	

Intangible assets consist of patents. Patent costs are capitalized until patents are awarded. Upon award, such costs are amortized using the straight-line method over their respective economic lives. If a patent is denied, all costs are charged to operations in that year.

7. *Impairment or Disposal of Long Lived Assets, including Intangible Assets*

The Company reviews long-lived assets, including intangible assets subject to amortization, whenever events or changes in circumstances indicate that the carrying amount of such an asset may not be recoverable. Recoverability of these assets is measured by comparison of their carrying amount to the future undiscounted cash flows the assets are expected to generate. If such assets are considered impaired, the impairment to be recognized is equal to the amount by which the carrying value of the assets exceeds their fair value determined by either a quoted market price, if any, or a value determined by utilizing a discounted cash flow technique. In assessing recoverability, the Company must make assumptions regarding estimated future cash flows and discount factors. If these estimates or related assumptions change in the future, the Company may be required to record impairment charges. Intangible assets with determinable lives are amortized over their estimated useful lives, based upon the pattern in which the expected benefits will be realized, or on a straight-line basis, whichever is greater. We did not record any impairment charges in any of the years presented.

8. Advertising Expense

The Company expenses the costs of advertising as incurred. Advertising expenses for 2014 and 2013 were approximately \$252,000 and \$178,000, respectively.

9. Deferred Revenue

Deferred revenue includes customer advances and amounts that have been billed per the contractual terms but have not been recognized as revenue. The majority of these amounts are related to maintenance contracts for which the revenue is recognized ratably over the applicable term, which generally is 12 months from the date the customer is delivered the products.

10. Research and Development Expenditures

Research and development expenses include costs directly attributable to the conduct of research and development programs primarily related to the development of our software products and improving the efficiency and capabilities of our existing software. Such costs include salaries, payroll taxes, employee benefit costs, materials, supplies, depreciation on research equipment, services provided by outside contractors, and the allocable portions of facility costs, such as rent, utilities, insurance, repairs and maintenance, depreciation and general support services. All costs associated with research and development are expensed as incurred.

11. Earnings Per Share of Common Stock ("EPS")

The Company's EPS is calculated by dividing net income (loss) applicable to common stockholders by the weighted-average number of common shares outstanding during the reporting period. Diluted EPS includes the effect from potential issuances of common stock, such as stock issuable pursuant to the exercise of stock options and warrants, when the effect of their inclusion is dilutive. See Note P - Earnings Per Share "EPS" for additional information.

12. Accounting for Stock-Based Compensation

The Company accounts for share based compensation in accordance with the provisions of ASC 718-10, "Compensation — Stock Compensation," which requires measurement of compensation cost for all stock awards at fair value on date of grant and recognition of compensation over the service period for awards expected to vest. The majority of its share-based compensation arrangements vest over either a three or four year vesting schedule. The Company expenses its share-based compensation under the ratable method, which treats each vesting tranche as if it were an individual grant. The fair value of stock options is determined using the Black-Scholes valuation model, and requires the input of highly subjective assumptions. These assumptions include estimating the length of time employees will retain their vested stock options before exercising them (the "expected option term"), the estimated

volatility of its common stock price over the option's expected term, the risk-free interest rate over the option's expected term, and the Company's expected annual dividend yield. Changes in these subjective assumptions can materially affect the estimate of fair value of stock-based compensation and consequently, the related amount recognized as an expense in the consolidated statements of operations. As required under the accounting rules, the Company reviews its valuation assumptions at each grant date and, as a result, the Company is likely to change its valuation assumptions used to value employee stock-based awards granted in future periods. The values derived from using the Black-Scholes model are recognized as expense over the service period, net of estimated forfeitures (the number of individuals that will ultimately not complete their vesting requirements). The estimation of stock awards that will ultimately vest requires significant judgment. The Company considers many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience. Actual results, and future changes in estimates, may differ substantially from current estimates.

The compensation expense recognized under ASC 718 amounted to \$207,258 and \$81,642 for 2014 and 2013 respectively.

The following table presents share-based compensation expenses included in the Company's consolidated statements of operations:

	Year ended	
	December 31,	
	2014	2013
Selling, general and administrative	\$ 161,466	\$60,151
Research, development and engineering	45,792	21,491
	\$207,258	\$81,642

Valuation Assumptions for Stock Options

For 2014 and 2013, 1,835,000 and 1,175,000 stock options were granted, respectively. The fair value of each option was estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions:

	Year ended	
	December	
	31,	
	2014	2013
Risk free interest rate	1.34 %	0.68 %
Expected life of options (in years)	4.5	4.5
Expected dividends	0 %	0 %
Volatility of stock price	119 %	139 %

The stock volatility for each grant is determined based on the review of the experience of the weighted average of historical daily price changes of the Company's common stock over the expected option term. The expected term was determined using the simplified method for estimating expected option life, which qualify as "plain-vanilla" options; and the risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option.

13. Derivative Liabilities

In connection with the issuances of equity instruments or debt, the Company may issue options or warrants to purchase common stock. In certain circumstances, these options or warrants may be classified as liabilities, rather than as equity. In addition, the equity instrument or debt may contain embedded derivative instruments, such as conversion options or listing requirements, which in certain circumstances may be required to be bifurcated from the associated host instrument and accounted for separately as a derivative liability instrument. The Company accounts for derivative liability instruments under the provisions of FASB ASC 815, "Derivatives and Hedging."

14. Deferred Costs

Costs incurred with obtaining and executing debt arrangements are capitalized and amortized to interest expense using the effective interest method over the term of the related debt.

15. *Income Taxes*

The provision for, or benefit from, income taxes includes deferred taxes resulting from the temporary differences in income for financial and tax purposes using the liability method. Such temporary differences result primarily from the differences in the carrying value of assets and liabilities. Future realization of deferred income tax assets requires sufficient taxable income within the carryback, carryforward period available under tax law. The Company evaluates, on a quarterly basis whether, based on all available evidence, if it is probable that the deferred income tax assets are realizable. Valuation allowances are established when it is more likely than not that the tax benefit of the deferred tax asset will not be realized. The evaluation, as prescribed by ASC 740-10, "Income Taxes," includes the consideration of all available evidence, both positive and negative, regarding historical operating results including recent years with reported losses, the estimated timing of future reversals of existing taxable temporary differences, estimated future taxable income exclusive of reversing temporary differences and carryforwards, and potential tax planning strategies which may be employed to prevent an operating loss or tax credit carryforward from expiring unused. Because of the Company's historical performance and estimated future taxable income, a full valuation allowance has been established.

The Company accounts for uncertain tax provisions in accordance with ASC 740-10-05, "Accounting for Uncertainty in Income Taxes." The ASC clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The ASC prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The ASC provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

16. Recent Accounting Pronouncements

Effective January 1, 2014, the Company adopted Accounting Standards Update ("ASU") No. 2013-11, "Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists" ("ASU 2013-11"). ASU 2013-11 is expected to reduce diversity in practice by providing guidance on the presentation of unrecognized tax benefits and will better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. The amendments in this update should be applied prospectively for annual and interim periods beginning after December 15, 2013. The adoption of ASU 2013-11 did not have a material effect on its consolidated financial statements.

In May 2014, ASU No. 2014-09, "Revenue from Contracts with Customers" was issued. The comprehensive new standard will supersede existing revenue recognition guidance and require revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the Company expects to be entitled in exchange for those goods or services. The guidance will also require that certain contract costs incurred to obtain or fulfill a contract, such as sales commissions, be capitalized as an asset and amortized as revenue is recognized. Adoption of the new rules could affect the timing of both revenue recognition and the incurrence of contract costs for certain transactions. The guidance permits two implementation approaches, one requiring retrospective application of the new standard with restatement of prior years and one requiring prospective application of the new standard with disclosure of results under old standards. The new standard is effective for reporting periods beginning after December 15, 2016 and early adoption is not permitted. For us, the new standard will be effective January 1, 2017. The Company is currently evaluating the impact of adoption and the implementation approach to be used.

In June 2014, ASU 2014-12, "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period" ("ASU No. 2014-12") was issued. ASU No. 2014-12 requires that a performance target that affects vesting and that could be achieved after the requisite service period is treated as a performance condition. An entity should recognize compensation cost in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the periods for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that

are expected to vest and should be adjusted to reflect those awards that ultimately vest. ASU 2014-12 becomes effective for interim and annual periods beginning on or after December 15, 2015. Early adoption is permitted. The Company is currently evaluating the effects of adopting ASU 2014-12 on its consolidated financial statements but the adoption is not expected to have a significant impact.

In June 2014, ASU 2014-15, “Presentation of Financial Statements – Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern” (“ASU No. 2014-15”) was issued. Before the issuance of ASU 2014-15, there was no guidance in U.S. GAAP about management’s responsibility to evaluate whether there is substantial doubt about an entity’s ability to continue as a going concern or to provide related footnote disclosures. This guidance is expected to reduce the diversity in the timing and content of footnote disclosures. ASU 2014-15 requires management to assess an entity’s ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards as specified in the guidance. ASU 2014-15 becomes effective for the annual period ending after December 15, 2016 and for annual and interim periods thereafter. Early adoption is permitted. The Company is currently evaluating the effects of adopting ASU 2014-15 on its consolidated financial statements but the adoption is not expected to have a significant impact.

In January 2015, ASU No. 2015-01, “Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary items” (“ASU 2015-01”) was issued. ASU 2015-01 eliminates from GAAP the concept of extraordinary items. ASU 2015-01 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The Company is currently evaluating the effects of adopting ASU 2014-15 on its consolidated financial statements but the adoption is not expected to have a significant impact.

Management does not believe that any other recently issued, but not yet effective, accounting standard if currently adopted would have a material effect on the accompanying consolidated financial statements.

NOTE B—FACTORING

Due from factor consisted of the following as of December 31:

	Original Invoice	Factored Amount	Factored Balance due
<i>Year Ended December 31, 2014</i>			
Factored accounts receivable	\$306,625	\$229,968	\$76,657
<i>Year Ended December 31, 2013</i>			
Factored accounts receivable	\$9,795	\$7,346	\$2,449

As of December 2011, the Company entered into a 24 month accounts receivable factoring arrangement with a financial institution (the “Factor”). Pursuant to the terms of the arrangement, the Company, from time to time, sells to the Factor certain of its accounts receivable balances on a non-recourse basis for credit approved accounts. The Factor remits 75% of the accounts receivable balance to the Company (the “Advance Amount”), with the remaining balance, less fees to be forwarded to the Company once the Factor collects the full accounts receivable balance from the customer. Factoring fees range from 2.75% to 15% of the face value of the invoice factored, and are determined by the number of days required for collection of the invoice. In April 2012, the terms were updated from monthly to quarterly, and the 24-month arrangement was extended to August 1, 2014. In July of 2014, the arrangement was extended to July 31, 2016.

NOTE C—FAIR VALUES OF FINANCIAL INSTRUMENTS

Cash and cash equivalents, accounts receivable, due from factor, accounts payable and accrued liabilities are carried at, or approximate, fair value because of their short-term nature.

The fair value of the warrant liabilities are measured at fair value using the following assumptions:

	2014
Risk free interest rate	0.59% - 0.61%
Expected term	1.82 - 1.86
Expected dividends	0
Volatility of stock price	79.3% - 79.7%

For the anti-dilution features, the Company utilized the Monte Carlo simulation. The stock volatility for each grant is determined based on the review of the experience of the weighted average of historical daily price changes of the Company's common stock over the expected term and the risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected term of the derivative.

The warrant liabilities are considered Level 3 liabilities on the fair value hierarchy as the determination of fair value includes various assumptions about of future activities and the Company's stock prices and historical volatility as inputs.

The table below provides a reconciliation of the beginning and ending balances for the liabilities measured at fair value using significant unobservable inputs (Level 3). There were no assets as of or during the years ended December 31, 2014 and 2013 measured using significant unobservable inputs.

Fair Value Measurements Using

Significant Unobservable Inputs (Level 3):

Compensatory Warrant (Note L3)	
Fair value at January 1, 2014	36,370
Loss on derivative	6,227
Transfer to additional paid-in-capital	(42,597)
Value at December 31, 2014	-
Warrants issued Under PI SPA (Note L2c)	
Fair value at January 1, 2014	206,707
Gain on derivative	(163,480)
Value at December 31, 2014	43,227
Balance, December 31, 2014	\$43,227

NOTE D—CONCENTRATION OF RISK

Financial instruments which potentially subject the Company to risk primarily consist of cash and accounts receivables.

The Company maintains its cash and cash equivalents with various financial institutions, which, at times may exceed the amounts insured by the Federal Deposit Insurance Corporation. The exposure to the Company is solely dependent upon daily bank balances and the respective strength of the financial institutions. The Company has not incurred any losses on these accounts. At December 31, 2014 and 2013, amounts in excess of insured limits were approximately \$586,000 and \$1,535,000, respectively.

The Company extends credit to customers on an unsecured basis in the normal course of business. The Company's policy is to perform an analysis of the recoverability of its receivables at the end of each reporting period and to establish allowances where appropriate. The Company analyzes historical bad debts and contract losses, customer concentrations, and customer credit-worthiness when evaluating the adequacy of the allowances.

The Company had certain customers whose revenue individually represented 10% or more of the Company's total revenue, as follows:

	Years Ended December 31, 2014 2013	
Customer A	44 %	*
Customer B	11 %	*
Customer C	10 %	*
Customer D	*	19 %
Customer E	*	15 %

* Less than 10% of total revenue

The Company had certain customers whose accounts receivable balances individually represented 10% or more of the Company's total accounts receivable, as follows:

	As of December 31, 2014 2013	
Customer A	62 %	*
Customer F	*	50 %

* Less than 10% of total accounts receivable

NOTE E—EQUIPMENT AND LEASEHOLD IMPROVEMENTS

Equipment and leasehold improvements consisted of the following as of December 31:

	2014	2013
Equipment	\$395,546	\$378,074
Furniture and fixtures	139,779	138,618
Software	28,624	28,624
Leasehold improvements	53,948	53,948
	617,897	599,264
Less accumulated depreciation and amortization	(514,388)	(474,202)
Total	\$103,509	\$125,062

Depreciation and amortization were \$40,186 and \$28,618 for 2014 and 2013, respectively.

NOTE F—INTANGIBLE ASSETS

Intangible assets consisted of the following as of December 31:

	2014		Net	2013		Net
	Gross	Accumulated	Carrying	Gross	Accumulated	Carrying
	Carrying	Amortization	Amount	Carrying	Amortization	Amount
	Amount		Amount	Amount		Amount
Patents and patents pending	\$287,248	\$ (125,904)	\$ 161,344	\$287,248	\$ (112,298)	\$ 174,950
Total	\$287,248	\$ (125,904)	\$ 161,344	\$287,248	\$ (112,298)	\$ 174,950

Aggregate amortization expense for 2014 and 2013 was \$13,606 and \$20,961 respectively. The estimated aggregate amortization expense of intangible assets for the years following December 31, 2014 is approximately \$14,000 per year for 2015 through 2019, and approximately \$91,000 thereafter.

NOTE G—ACCRUED LIABILITIES

Accrued liabilities consisted of the following as of December 31:

	2014	2013
Compensation	\$203,349	\$11,102
Compensated absences	116,439	112,609
Dividends payable	3,435	3,435
Accrued legal and accounting fees	92,000	84,609
Sales tax payable	55,436	54,382
Other	17,958	72,184
Total	\$488,617	\$338,321

NOTE H—RELATED PARTY

Consulting Arrangement with Thomas J. Colatosti (“Colatosti”)

In connection with his appointment to the Board of Directors in September 2002, and as acting Chief Financial Officer from November 2008 to December 2009, the Company had entered into a number of consulting arrangements with Thomas Colatosti. Under the most recent arrangement, which was entered into on January 12, 2010, Mr. Colatosti provided services to the Company and its subsidiaries and affiliates for the two-year term ended December 31, 2011 at a rate of \$5,000 per month. At December 31, 2013, Mr. Colatosti was owed \$50,000, which was included in accounts payable. The amount was fully paid during 2014.

NOTE I—DEFERRED REVENUE

Deferred revenue represents unearned revenue on maintenance contracts. Maintenance contracts include provisions for unspecified when-and-if available product updates and customer telephone support services, and are recognized ratably over the term of the service period. At December 31, 2014 and 2013, amounts in deferred revenue were approximately \$429,000 and \$528,000, respectively.

NOTE J—SEGMENT INFORMATION

The Company has determined that its continuing operations are one discrete segment consisting of Biometric products. Geographically, North American sales accounted for approximately 91% and 97% of the Company's total revenues for 2014 and 2013, respectively.

NOTE K—COMMITMENTS AND CONTINGENCIES

Operating Leases

The Company does not own any real estate but conducts operations from three leased premises. These non-cancelable operating leases expire at various dates through 2018. In addition to base rent, the Company pays for property taxes, maintenance, insurance and other occupancy expenses according to the terms of the individual leases.

Future minimum rental commitments of non-cancelable operating leases are approximately as follows:

Years ending December 31,	
2015	\$ 144,249
2016	147,732
2017	152,364
2018	103,829
	\$548,174

Rental expense was approximately \$174,000 and \$159,000 during 2014 and 2013, respectively.

Lawsuit

On or about March 13, 2014, LifeSouth Community Blood Centers, Inc. filed a lawsuit against us the Company in the Superior Court of Monmouth County, New Jersey (MON-L-1042-14) alleging a breach of a license agreement and

seeking return of all amounts paid under the license in the amount of \$718,500. We have denied all claims and asserted a counterclaim against LifeSouth for non-payment of support and maintenance service fees. Discovery has commenced and is proceeding. We have filed a motion seeking summary judgment in our favor with respect to all claims.

NOTE L— EQUITY

1. Redeemable Preferred Stock

Within the limits and restrictions provided in the Company's Certificate of Incorporation, the Board of Directors has the authority, without further action by the shareholders, to issue up to 5,000,000 shares of preferred stock, \$.0001 par value per share, in one or more series, and to fix, as to any such series, any dividend rate, redemption price, preference on liquidation or dissolution, sinking fund terms, conversion rights, voting rights, and any other preference or special rights and qualifications.

2. Common Stock

Effective February 3, 2015, the Company implemented a reverse stock split of its outstanding common stock at a ratio of 1 - for - 2. The number of authorized shares and the par value of the Company's common stock and preferred stock were not affected by the reverse stock split. Stockholders who otherwise would be entitled to receive fractional shares were rounded up to the nearest whole share. The reverse stock split became effective on the OTCQB at the opening of trading on February 6, 2015.

Holders of common stock have equal rights to receive dividends when, as and if declared by the Board of Directors, out of funds legally available therefor. Holders of common stock have one vote for each share held of record and do not have cumulative voting rights.

Holders of common stock are entitled, upon liquidation of the Company, to share ratably in the net assets available for distribution, subject to the rights, if any, of holders of any preferred stock then outstanding. Shares of common stock are not redeemable and have no preemptive or similar rights. All outstanding shares of common stock are fully paid and nonassessable.

F-30

Issuances of Common Stock

a) Securities Purchase Agreements dated February 26, 2013

Pursuant to a Securities Purchase Agreement dated February 26, 2013 by and between the Company and DRNC (the “InterDigital SPA”), the Company issued to DRNC 2,013,468 post-split shares of its common stock at a purchase price \$0.20 per post-split share, for an aggregate purchase price of \$402,693. DRNC had anti-dilution rights under the InterDigital SPA that required the Company to issue additional shares to DRNC on a full-ratchet basis if the Company, within the nine months following February 26, 2013, sold or issued any common stock or common stock equivalents (other than sales or issuances to directors, officers, employees or independent contractors in the ordinary course of business for compensation purposes and stock splits and stock dividends payable in respect of the Company’s common stock) having a purchase, exercise or conversion price per post-split share of less than \$0.20. No shares were issued under the anti-dilution rights due to subsequent issuances.

Concurrently with the closing of the transaction described above, the Company closed an equity financing with a number of private investors pursuant to a Securities Purchase Agreement (the “Private Investor SPA”). Pursuant to the Private Investor SPA, the Company issued to such investors 2,500,000 post-split shares of its common stock at a purchase price \$0.20 per post-split share, for an aggregate purchase price of \$500,000.

In connection with the share issuances described above, the Company incurred costs of \$46,176, which were offset against additional paid-in capital.

The shares of common stock were subject to registration clauses. The Company filed a registration statement on November 22, 2013 and such registration was declared effective on December 31, 2013. See Note L2d.

b) Securities Purchase Agreement dated July 23, 2013

Pursuant to a Securities Purchase Agreement, dated July 23, 2013, by and between the Company and a number of private and institutional investors (the “July Private Investor SPA”), the Company issued units to such investors consisting of 1,750,003 post-split shares of common stock and 1,750,003 warrants to purchase additional shares of common stock, at a purchase price of \$0.60 per unit for an aggregate purchase price of \$1,050,000. The Investors have anti-dilution rights under the July Private Investors SPA that require the Company to issue additional shares to Investors on an average-weighted basis if the Company, within the six months following July 23, 2013, sells or issues any common stock or common stock equivalents (other than sales or issuances to directors, officers, employees or independent contractors in the ordinary course of business for compensation purposes and stock splits and stock dividends payable in respect of the Company’s common stock) having a purchase, exercise or conversion price per

share of less than \$0.60 (see Note L2c below where the anti-dilution rights were triggered). The warrants were immediately exercisable at an exercise price of \$0.80 per post-split share and have a term of five years. Effective November 22, 2013, the Company agreed to reduce the exercise price of the warrants to \$0.50 per post-split share.

In connection with the share issuances described above, the Company incurred costs of \$135,594, including filing costs for the associated Registration Statement filed with the SEC pursuant to the registration rights clause in the July 2013 Private Investors SPA, which were offset against additional paid-in capital.

The shares of common stock and the shares of common stock underlying the warrants were subject to a registration clause. The Company filed a registration statement on November 22, 2013 and such registration was declared effective on December 31, 2013. See Note L2d.

Based on an evaluation as discussed in FASB ASC 815-15, "Embedded Derivatives" and FASB ASC 815-40-15, "Contracts in Entity's Own Equity - Scope and Scope Exceptions," the Company determined that the anti-dilution feature in the common stock issued was not considered indexed to its own stock because neither the occurrence of a sale of equity securities by the issuer at market nor the issuance of another equity contract with a lower strike price is an input to the fair value of a fixed-for-fixed option or forward on equity shares. As such, the anti-dilution feature should be bifurcated from the common stock and accounted for as a derivative liability.

The Company initially recorded derivative liabilities equal to their estimated fair value of \$20,323. Such amount was also recorded as a reduction of additional paid-in capital. As discussed in Item c) below, the down round feature was triggered. As such, the Company marked-to-market the derivative liabilities at the dates of issuances. In addition, the Company was required to mark-to-market the derivative liabilities at December 31, 2013. For the year ended December 31, 2013, the Company recorded a loss on the change in fair value of the anti-dilution rights of \$93,639. The Company did not value the derivative liability at December 31, 2013. At such date, the Company determined that it was still highly unlikely that an equity financing would occur prior to January 23, 2014, the expiration date of the down round feature. Such conclusion was based upon the discussion noted in Note L2c below.

As discussed above, in November 2013, the Company agreed to reduce the exercise price of the warrants. Under GAAP, the warrants have to be revalued and a charge recorded if the value of the warrants under the new terms exceeds the value of the warrants under the old terms on the day before the change. No charge was recorded as the value of the “new” warrants was less than the value of the “old” warrants.

c) Securities Purchase Agreements dated October 25, 2013 and November 8, 2013

Pursuant to a series of Private Investors Securities Purchase Agreements (the “PI SPA”), on October 25, 2013 and November 8, 2013, the Company issued to certain private investors an aggregate of 12,323,668 units consisting of 12,323,668 post-split shares of common stock (the “Shares”) and warrants to purchase an additional 12,323,668 post-split shares of our common stock (the “Warrants”) for an aggregate purchase price of \$3,697,100. Each unit had a purchase price of \$0.30 and consisted of one share of common stock and one Warrant. The Warrants are immediately exercisable at an exercise price of \$0.50 per post-split share, have a term of three years, and are exercisable on a cashless basis if at any time following the nine month anniversary of the issuance date, there is not an effective registration statement covering the public resale of the shares of Common Stock underlying the Warrants.

In connection with the share issuances described above, the Company incurred costs of \$466,346, including filing costs for the associated Registration Statement filed with the SEC pursuant to the registration rights clause in the October and November 2013 Private Investors SPA, which were offset against additional paid-in capital.

Investors in the PI SPA have certain anti-dilution rights which required the Company to issue additional shares of common stock to the investors if within the nine months following November 8, 2013, the Company, sells or issues any common stock or common stock equivalents (other than sales or issuances to directors, officers, employees or independent contractors in the ordinary course of business for compensation purposes and stock splits and stock dividends payable in respect of the Company’s common stock) having a purchase, exercise or conversion price per post-split share of less than \$0.30.

Based on an evaluation as discussed in FASB ASC 815-15, “Embedded Derivatives” and FASB ASC 815-40-15, “Contracts in Entity’s Own Equity - Scope and Scope Exceptions,” the Company determined that the anti-dilution features in the common stock issued were not considered indexed to its own stock because neither the occurrence of a sale of equity securities by the issuer at market nor the issuance of another equity contract with a lower strike price is an input to the fair value of a fixed-for-fixed option or forward on equity shares. As such, the anti-dilution features should be bifurcated from the common stock and accounted for as a derivative liability.

The Company did not value the derivative liability. One of the key determinants of the Company’s decision to not value the derivative liability was the high likelihood that a future financing would not occur that would trigger the down round feature. Whether a future equity financing would occur would be determined by the cash needs of the Company and management’s willingness to trigger the down round feature. The Company’s reasons were as follows:

1. The Company’s cash position after the completion of the PI SPA.
2. The stock price of the Company’s common stock.
3. The lack of enough available authorized shares to complete a large offering.

Under GAAP, the Company is required to mark-to-market the derivative liability at the end of each reporting period. The Company did not value the derivative liability at December 31, 2013. At such date, the Company determined that it was still highly unlikely that an equity financing would occur prior to July 8, 2014, the expiration date of the down round feature. Such conclusion was based upon the discussion noted above.

The Shares and shares of common stock underlying the Warrants were subject to a registration rights agreement. The Company filed a registration statement on November 22, 2013 and such registration was declared effective on December 31, 2013. See Note L2d. Under the November 2014 Securities Purchase Agreement, warrants to purchase 7,974,999 post-split shares of common stock previously issued in the November 2013 private placement were cancelled. See Note L2e.

Pursuant to a placement agency letter agreement, the Company paid the placement agent cash commissions equal to 8% of the gross proceeds of the offering, reimbursed the placement agent for its reasonable out of pocket expenses, and issued to the placement agent warrants (the "Placement Agent Warrants") to purchase an aggregate of 985,893 post-split shares of common stock. The Placement Agent Warrants have substantially the same terms as the Warrants issued to the investors, except the Placement Agent Warrants are immediately exercisable on a cashless basis.

The cashless exercise features contained in the warrants are considered to be derivatives and the Company recorded warrant liabilities on the consolidated balance sheet. The Company initially recorded the warrant liabilities equal to their estimated fair value of \$325,891. Such amount was also recorded as a reduction of additional paid-in capital. The Company is required to mark-to-market the warrant liabilities at the end of each reporting period. For the year ended December 31, 2014, the Company recorded a gain on the change in fair value of the cashless exercise features of \$163,480, and as of December 31, 2014, the fair value of the cashless exercise features was \$43,227. The fair value of the cashless exercise features was \$206,707 as of December 31, 2013.

The sales of securities in this offering triggered the anti-dilution rights set forth in the July Private Investor SPA. As a result, in connection with the October 25, 2013 closing, the per post-split share purchase price set forth in the July Private Investor SPA was reduced to \$0.5444 resulting in the issuance of 178,726 additional post-split shares of common stock. In connection with the November 8, 2013 closing, the per post-split share purchase price set forth in the July Private Investor SPA was further reduced to \$0.5368 resulting in the issuance of 27,307 additional post-split shares of common stock.

d) Registration Statement

The Company filed a registration statement on Form S-1 with the SEC to register the public resale of the shares of common stock issued in the 2013 Securities Purchase Agreements described above. The registration statement was declared effective on December 31, 2013.

e) Securities Purchase Agreement dated November 13, 2014

Pursuant to a Securities Purchase Agreement, dated November 13, 2014, by and between the Company and a number of private and institutional investors (the "November 2014 Private Investor SPA"), the Company issued to certain private investors 7,974,999 post-split shares of common stock and warrants to purchase an additional 11,962,501 post-split shares of common stock for aggregate gross proceeds of \$1,595,000. In addition, for each share purchased in this offering, the investors surrendered to the Company for cancellation a warrant to acquire one share of our common stock which we previously issued in a private placement transaction in November 2013. This resulted in the cancellation of warrants to purchase an aggregate of 7,974,999 post-split shares of common stock. The public resale of these shares was included in an effective registration statement we previously filed with the Securities and Exchange Commission.

The warrants have a term of five years and an exercise price of \$0.30 per post-split share. Warrants to purchase 5,981,251 post-split shares of common stock were immediately exercisable. The remaining warrants to purchase 5,981,250 post-split shares of common stock became exercisable on the completion of a 1 - for - 2 reverse split of our common stock in February 2015.

The warrants have customary anti-dilution protections including a “full ratchet” anti-dilution adjustment provision. In addition, if at any time between now and the two year anniversary of the effective date of the registration statement covering the public resale of such shares, the Company sells or issues shares of common stock or securities that are convertible into common stock at a price lower than \$0.20 per share, the Company will be required to issue additional shares of common stock for no additional consideration.

The warrants are exercisable on a cashless basis if at any time there is no effective registration statement covering the resale of the shares of common stock underlying the warrants.

Based on an evaluation as discussed in FASB ASC 815-15, “Embedded Derivatives” and FASB ASC 815-40-15, “Contracts in Entity’s Own Equity - Scope and Scope Exceptions,” the Company determined that the anti-dilution feature in the common stock issued was not considered indexed to its own stock because neither the occurrence of a sale of equity securities by the issuer at market nor the issuance of another equity contract with a lower strike price is an input to the fair value of a fixed-for-fixed option or forward on equity shares. As such, the anti-dilution features should be bifurcated from the common stock and accounted for as a derivative liability.

The Company valued the anti-dilution feature using a Monte Carlo simulation at both the date of issuance and December 31, 2014 and determined that the anti-dilution feature had no value.

The Company filed a registration statement on Form S-1 with the SEC to register the public resale of 13,956,250 of the shares of common stock issued in the 2014 Securities Purchase Agreement described above. The registration statement was declared effective on January 29, 2015.

f) Employees' exercise options

During the year ended December 31, 2014, 54,166 stock options were exercised resulting in the cashless issuance of 28,173 post-split shares of common stock. During the year ended December 31, 2013, 89,999 stock options were exercised resulting in the cashless issuance of 50,279 post-split shares of common stock.

3. Warrants

The Company has issued warrants to certain creditors, investors, investment bankers and consultants. A summary of warrant activity is as follows:

	Total Warrants	Weighted average exercise price	Weighted average remaining life (in years)	Aggregate intrinsic value
Outstanding, as of January 1, 2013	4,125,000	\$ 0.60	2.97	
Granted	15,209,579	0.50		
Exercised	—	—		
Forfeited	—	—		
Expired	—	—		
Outstanding, as of December 31, 2013	19,334,579	0.52	2.79	—
Granted	11,962,501	0.30		

Exercised	(150,000)	0.20		
Forfeited	(7,974,999)	0.50		
Expired	(125,000)	0.60		
Repurchased	(4,000,000)	0.60		
Vested or expected to vest at December 31, 2014	19,047,081	0.37	3.91	—
Exercisable at December 31, 2014	13,065,816	\$ 0.41	3.47	—

On August 15, 2013, the Company issued a warrant to purchase 150,000 post-split shares of the Company's common stock to an independent contractor. On March 11, 2014, the warrant was exercised on a cashless basis resulting in the issuance of 76,830 post-split shares of common stock.

The cashless exercise feature contained in the warrant was considered to be a derivative and the Company recorded a warrant liability on the condensed consolidated balance sheet. The Company recorded the warrant liability equal to its estimated fair value. The Company was required to mark-to-market the warrant liabilities at the end of each reporting period. As the warrant was exercised, the Company marked-to-market the warrant on the day before the exercise and such value was then transferred to additional paid-in capital. For the year ended December 31, 2014, the Company recorded a loss on the change in fair value of the cashless exercise feature of \$6,227. \$42,597, the value of the cashless exercise feature as of March 10, 2014, was transferred to additional paid-in capital. The fair value of the cashless exercise feature was \$36,370 as of December 31, 2013.

On January 27, 2014, the Company repurchased a warrant for the purchase of 4,000,000 post-split shares of common stock from the Shaar Fund Ltd. at a purchase price of \$150,000. The warrant was exercisable at a strike price of \$0.60 per post-split share through December 31, 2015.

NOTE M—STOCK OPTIONS

1999 Stock Option Plan

During 1999, the Board of Directors of the Company adopted the 1999 Stock Option Plan (the 1999 Plan). The 1999 Plan was not presented to stockholders for approval and thus incentive stock options are not available under the plan. Under the 1999 Plan, 1,000,000 shares of common stock are reserved for issuance to employees, officers, directors, and consultants of the Company at exercise prices which may not be below 85% of fair market value. The term of nonstatutory stock options granted may not exceed ten years. Options issued under the Plan vest pursuant to the terms of stock option agreements with the recipients. In the event of a change in control, as defined, all options outstanding vest immediately. The 1999 Plan expired in August 2009.

2004 Stock Option Plan

On October 12, 2004, the Board of Directors of the Company approved the 2004 Stock Option Plan (the 2004 Plan). The 2004 Plan has not yet been presented to stockholders for approval and thus incentive stock options are not available under this plan. Under the terms of this plan, 2,000,000 post-split shares of common stock are reserved for issuance to employees, officers, directors, and consultants of the Company at exercise prices which may not be below 85% of fair market value. The term of stock options granted may not exceed ten years. Options issued under the Plan vest pursuant to the terms of stock option agreements with the recipients. In the event of a change in control, as defined, all options outstanding vest immediately. The Plan expired in October 2014.

Non-Plan Stock Options

Periodically, the Company has granted options outside of the 1999 and 2004 Plans to various employees and consultants. In the event of change in control, as defined, certain of the non-plan options outstanding vest immediately.

Stock Option Activity

Information summarizing option activity is as follows:

Number of Options	Weighted Weighted Aggregate		
	average	average	intrinsic
	exercise	remaining	

	1999 Plan	2004 Plan	Non Plan	Total	price	life (in years)	value
Outstanding, as of December 31, 2012	250,000	1,381,136	—	1,631,136	\$ 0.32		
Granted	—	575,000	600,000	1,175,000	0.34		
Exercised	—	(89,999)	—	(89,999)	0.26		
Forfeited	—	(20,833)	—	(20,833)	0.32		
Expired	—	—	—	—	—		
Outstanding, as of December 31, 2013	250,000	1,845,304	600,000	2,695,304	\$ 0.33	4.48	\$ 136,787
Granted	—	—	1,835,000	1,835,000	0.39		
Exercised	—	(54,166)	—	(54,166)	0.25		
Forfeited	—	(129,168)	(225,000)	(354,168)	0.34		
Expired	—	(26,665)	—	(26,665)	0.29		
Outstanding, as of December 31, 2014	250,000	1,635,305	2,210,000	4,095,305	\$ 0.36	4.45	\$ 24,325
Vested or expected to vest at December 31, 2014				3,385,905	\$ 0.36	4.06	\$ 24,325
Exercisable at December 31, 2014				1,726,963	\$ 0.33	2.17	\$ 24,325

The options outstanding and exercisable at December 31, 2014 were in the following exercise price ranges:

Range of exercise prices	Options Outstanding			Options Exercisable	
	Number of shares	Weighted	Weighted	Number exercisable	Weighted
		average	average		average
		exercise price	remaining life (in years)		exercise price
\$0.14-0.42	3,890,305	\$ 0.33	4.58	1,521,963	\$ 0.26
0.43 -0.80	35,000	0.80	2.02	35,000	0.80
0.81 -0.95	170,000	0.92	2.02	170,000	0.92
\$0.14-0.95	4,095,305			1,726,963	

The aggregate intrinsic value in the table above represents the total intrinsic value, based on the Company's closing stock price of \$0.22 as of December 31, 2014, which would have been received by the option holders had all option holders exercised their options as of that date. The total number of in-the-money options exercisable as of December 31, 2014 was 550,000.

The weighted average fair value of options granted during the years ended December 31, 2014 and 2013 was \$0.32 and \$0.30 per share, respectively. The total intrinsic value of options exercised during the years ended December 31, 2014 and 2013 was \$14,650, and \$31,643, respectively. The total fair value of shares vested during the years ended December 31, 2014 and 2013 was \$143,382 and \$42,058 respectively.

As of December 31, 2014 future compensation cost related to nonvested stock options is \$438,571 and will be recognized over an estimated weighted average period of 1.93 years.

NOTE N—INCOME TAXES

There was no provision for federal or state taxes as at December 31, 2014 and 2013.

The Company has deferred taxes due to income tax credits, net operating loss carryforwards, and the effect of temporary differences between the carrying values of certain assets and liabilities for financial reporting and income tax purposes. Significant components of deferred taxes are as follows at December 31:

	2014	2013
Current asset:		
Accrued compensation	\$88,000	\$49,000
Accounts receivable allowance	8,000	8,000
Non-current asset (liability):		
Stock-based compensation	174,000	205,000
Basis differences in fixed assets	(26,000)	(19,000)
Basis differences in intangible assets	(63,000)	(69,000)
Net operating loss and credit carryforwards	17,540,000	17,217,000
Valuation allowances	(17,721,000)	(17,391,000)
	\$—	\$—

The Company has a valuation allowance against the full amount of its net deferred taxes due to the uncertainty of realization of the deferred tax assets due to operating loss history of the Company. The Company currently provides a valuation allowance against deferred taxes when it is more likely than not that some portion, or all of its deferred tax assets will not be realized. The valuation allowance could be reduced or eliminated based on future earnings and future estimates of taxable income. Similarly, income tax benefits related to stock options exercised have not been recognized in the financial statements.

As of December 31, 2014, the Company has federal net operating loss carryforwards of approximately \$49,200,000 subject to expiration between 2019 and 2034. These net operating loss carryforwards are subject to the limitations under Section 382 of the Internal Revenue Code due to changes in the equity ownership of the Company.

A reconciliation of the effective income tax rate on operations reflected in the Statements of Operations to the US Federal statutory income tax rate is presented below.

	2014	2013
Federal statutory income tax rate	34 %	34 %
Permanent differences	—	(3)
Effect of net operating loss	(34)	(31)
Effective tax rate	— %	— %

The Company has not been audited by the Internal Revenue Service (“IRS”) or any states in connection with income taxes. The Company files income tax returns in the U.S. federal jurisdiction and various state jurisdictions. The periods from 2011 through 2014 remain open to examination by the IRS and state jurisdictions. The Company believes it is not subject to any tax audit risk beyond those periods. The Company’s policy is to recognize interest and penalties accrued on any unrecognized tax benefits as a component of income tax expense. The Company does not have any accrued interest or penalties associated with any unrecognized tax benefits, nor was any significant interest expense recognized during the years ended December 31, 2014 and 2013.

NOTE O—PROFIT SHARING PLAN

The Company has established a savings plan under section 401(k) of the Internal Revenue Code. All employees of the Company, after completing one day of service are eligible to enroll in the 401(k) plan. Participating employees may elect to defer a portion of their salary on a pre-tax basis up to the limits as provided by the IRS Code. The Company is not required to match employee contributions but may do so at its discretion. The Company made no contributions during the years ended December 31, 2014 and 2013.

NOTE P—EARNINGS PER SHARE (EPS)

The Company's basic EPS is calculated using net income (loss) available to common shareholders and the weighted-average number of shares outstanding during the reporting period. Diluted EPS includes the effect from potential issuance of common stock, such as stock issuable pursuant to the exercise of stock options and warrants and the assumed conversion of convertible notes and preferred stock.

The following table summarizes the securities that were excluded from the diluted per share calculation because the effect of including these potential shares was antidilutive even though the exercise price was less than the average market price of the common shares.

	Years ended December 31,	
	2014	2013
Stock options	516,214	922,265
Warrants	2,013,491	83,345
Potentially dilutive securities	2,529,705	1,005,610

Items excluded from the diluted per share calculation because the exercise price was greater than the average market price of the common shares:

	Years ended December 31,	
	2014	2013
Stock options	1,615,000	205,000
Warrants	7,084,580	19,184,565
Total	8,699,580	19,389,565

INFORMATION NOT REQUIRED IN PROSPECTUS

ITEM 13. OTHER EXPENSES OF ISSUANCE AND DISTRIBUTION

The following table sets forth the costs and expenses incurred by us in connection with the sale of the common stock being registered by this registration statement. All amounts shown are estimates, except for the Securities and Exchange Commission ("SEC") registration fee.

SEC registration fee	\$1,080
Printing and engraving expenses	1,000
Accounting fees and expenses	5,000
Legal fees and expenses	20,000
Miscellaneous expenses	1,000
Total	\$28,080

ITEM 14. INDEMNIFICATION OF DIRECTORS AND OFFICERS

Section 145 of the Delaware General Corporation Law ("DGCL") authorizes a corporation to indemnify its directors and officers against liabilities arising out of actions, suits and proceedings to which they are made or threatened to be made a party by reason of the fact of their prior or current service to the corporation as a director or officer, in accordance with the provisions of Section 145, which are sufficiently broad to permit indemnification under certain circumstances for liabilities arising under the Securities Act. The indemnity may cover expenses (including attorneys' fees) judgments, fines and amounts paid in settlement actually and reasonably incurred by the director or officer in connection with any such action, suit or proceeding. Section 145 permits corporations to pay expenses (including attorneys' fees) incurred by directors and officers in advance of the final disposition of such action, suit or proceeding. In addition, Section 145 provides that a corporation has the power to purchase and maintain insurance on behalf of its directors and officers against any liability asserted against them and incurred by them in their capacity as a director or officer, or arising out of their status as such, whether or not the corporation would have the power to indemnify the director or officer against such liability under Section 145.

Our certificate of incorporation, as amended, provides that, unless otherwise required under applicable law, (1) a director shall not be personally liable to us or our stockholders for monetary damages for breach of fiduciary duty as a director, and (2) we shall indemnify any director or officer made a party to an action or proceeding, whether criminal, civil, administrative or investigative, by reason of the fact of such person's current or prior service as a director or officer of the Company, any predecessor of the Company or any other enterprise per the Company's or any predecessor

to the Company's request.

Our bylaws provide that (a) we shall indemnify and hold harmless our directors and officers to the maximum extent and in the manner permitted by the DGCL against expenses (including attorneys' fees) reasonably incurred in connection with any proceeding, whether civil, criminal, administrative or investigative, arising by reason of the fact that such person is or was an agent of the corporation, (b) we shall advance expenses incurred by any director or officer prior to the final disposition of any proceeding to which the director or officer was or is or is threatened to be made a party promptly following a request therefore, subject to certain limited requirements, and (c) the rights conferred in our Bylaws are not exclusive.

We have also obtained insurance policies covering our directors and officers with respect to certain liabilities, including liabilities arising under the Securities Act.

II-1

ITEM 15. RECENT SALES OF UNREGISTERED SECURITIES

Over the past three years, we have issued and sold the following securities without registration under the Securities Act:

On February 26, 2013, we issued a promissory note in the principal amount of \$497,307 (the “InterDigital Note”) to DRNC. The InterDigital Note accrued interest at a rate of 7% per annum and was scheduled to mature on December 31, 2015. A portion of the proceeds from the sale of the InterDigital Note was used to repay the Colatosti Note in full, and the remaining proceeds were used for general corporate purposes. On November 22, 2013, we repaid in full the \$497,307 balance due under the InterDigital Note. The InterDigital Note was issued in a private placement transaction exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) thereof directly by the Company without engaging in any advertising or general solicitation of any kind and without payment of underwriting discounts or commissions to any person.

On February 26, 2013, we issued 2,013,468 shares of common stock to DRNC for an aggregate purchase price of \$402,693. On February 26, 2013, we also issued 2,500,000 shares of common stock to a limited number of investors for an aggregate purchase price of \$500,000. On July 23, 2013, we issued 1,750,003 units consisting of 1,750,003 shares of common stock and warrants to purchase an additional 1,750,003 shares of common stock for an aggregate purchase price of \$1,050,000. Each unit consists of one share of common stock and a warrant to purchase one share of common stock. Each warrant is immediately exercisable at an exercise price of \$0.50 per share and expires five years after the date of grant. The securities were issued to accredited investors in a private placement transaction exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) of the Securities Act and/or Rule 506 of Regulation D promulgated thereunder directly by us without engaging in any advertising or general solicitation of any kind and without payment of underwriting discounts or commissions to any person.

On August 15, 2013, we issued warrants to purchase 150,000 shares of common stock at an exercise price of \$0.20 per share to an independent contractor for work associated with the February 2013 common stock and note issuance. The warrants have a term of three years and vest immediately. These securities were issued in a private placement transaction exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) thereof directly by the Company without engaging in any advertising or general solicitation of any kind and without payment of underwriting discounts or commissions to any person.

Between October 25, 2013 and November 8, 2013, we issued to certain private investors 12,323,668 units consisting of 12,323,668 shares of our common stock and warrants to purchase an additional 12,323,668 shares of our common stock for an aggregate purchase price of \$3,697,100. Each unit had a purchase price of \$0.30 and consisted of one share of common stock and one warrant. Each warrant is immediately exercisable at an exercise price of \$0.50 per share and expires three years after the date of grant. In connection with our October 2013 private offering, we issued 206,034 shares of our common stock as a result of certain anti-dilution rights held by certain investors in our July

2013 private offering. The securities were issued to accredited investors in a private placement transaction exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) of the Securities Act and/or Rule 506 of Regulation D promulgated thereunder directly by us without engaging in any advertising or general solicitation of any kind. Pursuant to a placement agency letter agreement, we paid the placement agent cash commissions equal to 8% of the gross proceeds of the offering and agreed to reimburse the placement agent for its reasonable out of pocket expenses. In addition, we issued warrants to the placement agent to purchase an aggregate of 985,893 shares of common stock. The Placement Agent Warrants have substantially the same terms as the warrants issued to the investors, except the placement agent warrants are immediately exercisable on a cashless basis.

In November 2014, we issued an aggregate of 7,974,999 shares of our common stock and warrants to purchase an additional 11,962,499 shares of common stock for an aggregate purchase price of \$1,595,000 prior to a deduction for expenses. The warrants have a term of five years, an exercise price of \$0.30 per share, are immediately exercisable. The securities were issued to accredited investors in a private placement transaction exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) of the Securities Act and/or Rule 506 of Regulation D promulgated thereunder directly by us without engaging in any advertising or general solicitation of any kind and without payment of underwriting discounts or commissions to any person.

We have issued options to our directors and executive officers. On August 13, 2015, we issued an aggregate of 72,222 shares of common stock and options to purchase an aggregate of 100,000 shares of common stock to our directors. We also issued options to purchase an aggregate of 875,000 to certain of our officers. The foregoing options have a term of seven years, an exercise price of \$0.18 per share, and vest in three equal annual installments. A description of securities issued to our officers and directors prior to December 31, 2014 is set forth under the section entitled “**Executive Compensation**”. All of the foregoing securities were issued in private placement transactions exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) of the Securities Act directly by us without engaging in any advertising or general solicitation of any kind and without payment of underwriting discounts or commissions to any person.

On August 13, 2015, we issued options to purchase an aggregate of 1,003,000 shares of common stock to twelve employees, and 100,000 shares of common stock to our four non-employee directors. The options are exercisable at \$0.18 per share, have a term of seven years, and vest in equal annual installments over a three-year period commencing on the date of grant.

On September 23, 2015, we issued a warrant to purchase 833,333 shares of common stock to one accredited investor in connection with the issuance of a promissory note. The warrant is immediately exercisable in full at an exercise price of \$0.30 per share and has a term of five years. The foregoing securities were issued in a private placement transaction pursuant to the exemption from registration provided by Section 4(2) of the Securities Act of 1933, as amended, without general solicitation or advertising of any kind and without payment of placement agent or brokerage fees to any person.

On October 22 and 29, 2015, we issued 84,500 shares of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for aggregate gross proceeds of \$8,450,000. The Series A-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share and accrue dividends at the rate of 6% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year, payable in cash through October 1, 2017 and thereafter, in cash or kind through the issuance of additional shares of common stock. All of the foregoing securities were issued in private placement transactions exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) of the Securities Act directly by us without engaging in any advertising or general solicitation of any kind and without payment of underwriting discounts or commissions to any person.

On November 11, 2015, we issued 105,000 shares of Series B-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross proceeds of \$10,500,000, and 5,500 additional shares of Series A-1 Convertible Preferred Stock at a purchase price of \$100.00 per share, for gross cash proceeds of \$550,000. The Series B-1 Shares are convertible at any time at the option of the holder into shares of common stock at an initial conversion price of \$0.30 per share and accrue dividends at the rate of 2.5% per annum payable quarterly on April 1, July 1, October 1, and January 1 of each year payable in cash. All of the foregoing securities were issued in private placement transactions exempt from the registration requirements of the Securities Act pursuant to Section 4(a)(2) of the Securities Act directly by us without engaging in any advertising or general solicitation of any kind and without payment of

underwriting discounts or commissions to any person.

ITEM 17. UNDERTAKINGS

(a) The undersigned registrant hereby undertakes:

(1) to file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) to include any prospectus required by Section 10(a)(3) of the Securities Act;

(ii) to reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20 percent change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and

(iii) to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

(2) that, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

(3) to remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) that, for the purpose of determining liability under the Securities Act to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided, however, that no

statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

(b) Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the registrant has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Wall, State of New Jersey, on January 14, 2016.
