THIS ANNUAL REPORT ON FORM 10-K CONTAINS FORWARD LOOKING STATEMENTS WITHIN THE MEANING OF SECTION 27A OF THE SECURITIES ACT OF 1933, AS AMENDED, AND SECTION 21E OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED. THESE FORWARD-LOOKING STATEMENTS CAN BE IDENTIFIED BY THE FACT THAT THEY DO NOT RELATE STRICTLY TO HISTORICAL OR CURRENT FACTS AND MAY CONTAIN THE WORDS “BELIEVE,” “ANTICIPATE,” “EXPECT,” “INTEND,” “PLAN,” “PREDICT,” “ESTIMATE,” “PROJECT,” “WILL BE,” “WILL CONTINUE,” “WILL LIKELY RESULT,” OR OTHER SIMILAR WORDS AND PHRASES OR FUTURE OR CONDITIONAL VERBS SUCH AS “WILL,” “MAY,” “MIGHT,” “SHOULD,” “WOULD,” OR “COULD.” THESE FORWARD-LOOKING STATEMENTS INCLUDE, WITHOUT LIMITATION, STATEMENTS REGARDING FUTURE OPERATIONS, PERFORMANCE, FINANCIAL CONDITION, PROSPECTS, PLANS AND STRATEGIES. THESE FORWARD-LOOKING STATEMENTS ARE BASED ON CURRENT EXPECTATIONS AND ASSUMPTIONS THAT MAY PROVE TO BE INCORRECT.

RISKS AND UNCERTAINTIES EXIST THAT MAY CAUSE RESULTS TO DIFFER MATERIALLY FROM THOSE SET FORTH IN THESE FORWARD-LOOKING STATEMENTS. FACTORS THAT COULD CAUSE THE ANTICIPATED RESULTS TO DIFFER FROM THOSE DESCRIBED IN THE FORWARD-LOOKING STATEMENTS INCLUDE, WITHOUT LIMITATION:

- INTEREST RATE FLUCTUATIONS;
- CHANGES IN THE PERFORMANCE OF THE REAL ESTATE MARKETS;
- VOLATILITY IN THE CAPITAL MARKETS;
- UNFAVORABLE ECONOMIC CONDITIONS;
- IMPAIRMENTS IN THE COMPANY’S GOODWILL OR OTHER INTANGIBLE ASSETS;
- FAILURES AT FINANCIAL INSTITUTIONS WHERE THE COMPANY DEPOSITS FUNDS;
- CHANGES IN APPLICABLE LAWS AND GOVERNMENT REGULATIONS;
- HEIGHTENED SCRUTINY BY LEGISLATORS AND REGULATORS OF THE COMPANY’S TITLE INSURANCE AND SERVICES SEGMENT AND CERTAIN OTHER OF THE COMPANY’S BUSINESSES;
- USE OF SOCIAL MEDIA BY THE COMPANY AND OTHER PARTIES;
- REGULATION OF TITLE INSURANCE RATES;
- LIMITATIONS ON ACCESS TO PUBLIC RECORDS AND OTHER DATA;
- CHANGES IN RELATIONSHIPS WITH LARGE MORTGAGE LENDERS AND GOVERNMENT-SPONSORED ENTERPRISES;
- CHANGES IN MEASURES OF THE STRENGTH OF THE COMPANY’S TITLE INSURANCE UNDERWRITERS, INCLUDING RATINGS AND STATUTORY CAPITAL AND SURPLUS;
- LOSSES IN THE COMPANY’S INVESTMENT PORTFOLIO;
- MATERIAL VARIANCE BETWEEN ACTUAL AND EXPECTED CLAIMS EXPERIENCE;
- DEFALCATIONS, INCREASED CLAIMS OR OTHER COSTS AND EXPENSES ATTRIBUTABLE TO THE COMPANY’S USE OF TITLE AGENTS;
- ANY INADEQUACY IN THE COMPANY’S RISK MITIGATION EFFORTS;
- SYSTEMS DAMAGE, FAILURES, INTERRUPTIONS AND INTRUSIONS, OR UNAUTHORIZED DATA DISCLOSURES;
- ERRORS AND FRAUD INVOLVING THE TRANSFER OF FUNDS;
- THE COMPANY’S USE OF A GLOBAL WORKFORCE;
- INABILITY OF THE COMPANY’S SUBSIDIARIES TO PAY DIVIDENDS OR REPAY FUNDS;
- INABILITY TO REALIZE THE BENEFITS OF, AND CHALLENGES ARISING FROM, THE COMPANY’S ACQUISITION STRATEGY; AND

OTHER FACTORS DESCRIBED IN THIS ANNUAL REPORT ON FORM 10-K, INCLUDING UNDER THE CAPTION “RISK FACTORS” IN ITEM 1A OF PART I.

THE FORWARD-LOOKING STATEMENTS SPEAK ONLY AS OF THE DATE THEY ARE MADE. THE COMPANY DOES NOT UNDERTAKE TO UPDATE FORWARD-LOOKING STATEMENTS TO REFLECT CIRCUMSTANCES OR EVENTS THAT OCCUR AFTER THE DATE THE FORWARD-LOOKING STATEMENTS ARE MADE.

PART I

Item 1. Business

The Company

First American Financial Corporation (the “Company”) was incorporated in the state of Delaware in January 2008 to hold the financial services businesses of the Company’s prior parent. On June 1, 2010, the Company’s common stock was listed on the New York Stock Exchange under the ticker symbol “FAF.” The businesses operated by the Company’s subsidiaries have, in some instances, been in existence since the late 1800s.

The Company has its executive offices at 1 First American Way, Santa Ana, California 92707-5913. The Company’s telephone number is (714) 250-3000.

General

The Company, through its subsidiaries, is engaged in the business of providing financial services through its title insurance and services segment and its specialty insurance segment. The title insurance and services segment provides title insurance, closing and/or escrow services and similar or related services domestically and internationally in connection with residential and commercial real estate transactions. It also provides products, services and solutions involving the use of real property related data, including data derived from its proprietary database, which are designed to mitigate risk or otherwise facilitate real estate transactions. It maintains, manages and provides access to title plant records and images and, in addition, provides banking, trust, document custodial and investment advisory services. The specialty insurance segment issues property and casualty insurance policies and sells home warranty products. In addition, our corporate function consists of certain financing facilities as well as the corporate services that support our business operations. Financial information regarding these business segments and the corporate function is included in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Item 8. Financial Statements and Supplementary Data” of Part II of this report.

The substantial majority of our business is dependent upon activity in the real estate and mortgage markets, which are cyclical and seasonal. In the current market environment, we are focused on growing our core title insurance and settlement services business, strengthening our enterprise through data and process advantage and managing and actively investing in complementary businesses that support our core title and settlement services business. We are also focused on continued improvement of our customers’ experiences with our products, services and solutions, and we remain committed to efficiently managing our business to market conditions throughout business cycles.

Title Insurance and Services Segment

Our title insurance and services segment issues title insurance policies on residential and commercial property in the United States and offers similar or related products and services internationally. This segment also provides closing and/or escrow services; accommodates tax-deferred exchanges of real estate; provides products, services and solutions involving the use of real property related data designed to mitigate risk or otherwise facilitate real estate transactions; maintains, manages and provides access to title plant records and images; provides evidence of title; and provides banking, trust, document custodial and investment advisory services. In 2016, 2015, and 2014 the Company derived 92.1%, 92.5% and 92.0% of its consolidated revenues, respectively, from this segment.

Overview of Title Insurance Industry

In most instances mortgage lenders and purchasers of real estate desire to be protected from loss or damage in the event of defects in the title they acquire. Title insurance is a means of providing such protection.

Title Policies. Title insurance policies insure the interests of owners or lenders against defects in the title to real property. These defects include adverse ownership claims, liens, encumbrances or other matters affecting title. Title insurance policies generally are issued on the basis of a title report, which is typically prepared after a search of one or more of public records, maps, documents and prior title policies to ascertain the existence of easements, restrictions, rights of way, conditions, encumbrances or other matters affecting the title to, or use of, real property. In certain limited instances, a visual inspection of the property is also made. To facilitate the preparation of title reports, copies and/or abstracts of public records, maps, documents and prior title policies may be compiled and indexed to specific properties in an area. This compilation is known as a “title plant.”

The beneficiaries of title insurance policies usually are real estate buyers and mortgage lenders. A title insurance policy indemnifies the named insured and certain successors in interest against title defects, liens and encumbrances existing as of the date of the policy and not specifically excepted from its provisions. The policy typically provides coverage for the real property mortgage lender in the amount of its outstanding mortgage loan balance and for the buyer in the amount of the purchase price of the property. In some cases the policy might provide insurance in a greater amount, such as where the buyer anticipates constructing improvements on the property. In addition, certain homeowner's policies provide inflation coverage which could increase the coverage amount above the purchase price of the underlying property by a specified amount. The potential for claims under a title insurance policy issued to a mortgage lender generally ceases upon repayment of the mortgage loan. The potential for claims under a title insurance policy issued to a buyer generally ceases upon the sale or transfer of the insured property.

Before issuing title policies, title insurers typically seek to limit their risk of loss by accurately performing title searches and examinations and, in many instances, curing title defects identified therein. These searches, examinations and curative efforts distinguish title insurers from other insurers, such as property and casualty insurers. Whereas title insurers generally insure against losses arising out of circumstances existing as of the date of the policy, property and casualty insurers generally insure against losses arising out of events that occur subsequent to policy issuance. As a result of these differences, title insurers typically experience relatively low claims, as a percentage of premiums, when compared to property and casualty insurers, but have relatively high expenses. The primary costs of a title insurer pertain to personnel and other costs associated with the search and examination process, the curative process, the preparation of preliminary reports or commitments, title plant maintenance, and sales, as well as technology and other administrative expenses.

The Closing Process. Title insurance is essential to the real estate closing process in most transactions involving real property mortgage lenders. In a typical residential real estate sale transaction where title insurance is issued, a real estate broker, lawyer, developer, lender, closer or other participant involved in the transaction orders the title insurance on behalf of an insured. Once the order has been placed, a title insurance company or an agent typically conducts a title search to determine the current status of the title to the property. When the search is complete, the title insurer or agent prepares, issues and circulates a commitment or preliminary report to the parties to the transaction. The commitment or preliminary report identifies the conditions, exceptions and/or limitations that the title insurer intends to attach to the policy and identifies items appearing on the title that must be eliminated prior to closing.

The closing or settlement function, sometimes called an escrow in the western United States, is, depending on the local custom in the region, performed by a lawyer, an escrow company or a title insurance company or agent, generally referred to as a "closer." Once documentation has been prepared and signed, and any required mortgage lender payoff demands are obtained, the transaction closes. The closer typically records the appropriate title documents and arranges the transfer of funds to pay off prior loans and extinguish the liens securing such loans. Title policies are then issued, typically insuring the priority of the mortgage of the real property mortgage lender in the amount of its mortgage loan and the buyer in the amount of the purchase price. The time between the opening of the title order and the issuance of the title policy is usually between 30 and 90 days. Before a closing takes place, however, the closer typically requests that the title insurer or agent provide an update to the commitment to discover any adverse matters affecting title and, if any are found, works with the seller to eliminate them so that the title insurer or agent issues the title policy subject only to those exceptions to coverage which are acceptable to the title insurer, the buyer and the buyer's lender.

Issuing the Policy: Direct vs. Agency. A title insurance policy can be issued directly by a title insurer or indirectly on behalf of a title insurer through agents, which usually operate independently of the title insurer and often issue policies for more than one insurer. Where the policy is issued by a title insurer, the search is performed by or on behalf of the title insurer, and the premium is collected and retained by the title insurer. Where the policy is issued by an agent, the search is typically performed by or on behalf of the agent, and the agent collects, and retains a portion of, the premium. The agent remits the remainder of the premium to the title insurer as compensation for the insurer bearing the risk of loss in the event a claim is made under the policy and for other services the insurer may provide.

The percentage of the premium retained by an agent varies from region to region. A title insurer is obligated to pay title claims in accordance with the terms of its policies, regardless of whether it issues its policy directly or indirectly through an agent. In addition, as part of the policy, a title insurer may issue a closing protection letter that protects a lender from certain misuse of funds by the title insurer's agent. When a loss to the title insurer occurs under a policy issued through an agent or a closing protection letter, under certain circumstances the title insurer may seek recovery of all or a portion of the loss from the agent or the agent's errors and omissions insurance carrier.

Premiums. The premium for title insurance is typically due and earned in full when the real estate transaction is closed. Premiums generally are calculated with reference to the policy amount. The premium charged by a title insurer or an agent is subject to regulation in most areas. Such regulations vary from state to state.

Our Title Insurance Operations

Overview. We conduct our title insurance and closing business through a network of direct operations and agents. Through this network, we issue policies in the 49 states that permit the issuance of title insurance policies and the District of Columbia. We also offer title insurance, closing services and similar or related products and services, either directly or through third parties in other countries, including Canada, the United Kingdom, Australia, South Korea and various other established and emerging markets as described in the “International Operations” section below.

Customers, Sales and Marketing. The mortgage market in the United States is concentrated. We believe that the top five mortgage lenders by volume collectively originate or are involved in approximately 30% of the mortgage origination volume in the United States. These institutions purchase title insurance policies and other products and services from us. These institutions also benefit from our products and services which are purchased for their benefit by others, such as title insurance policies purchased by borrowers as a condition to the making of a loan. The refusal of one or more of these or other significant lending institutions to purchase products and services from us or to accept our products and services that are to be purchased for their benefit could have a material adverse effect on the title insurance and services segment.

We distribute our title insurance policies and related products and services through our direct and agent channels. In our direct channel, the distribution of our policies and related products and services occurs through sales representatives located at numerous offices throughout the United States where real estate transactions are handled. Title insurance policies issued and other products and services delivered through this channel are primarily delivered in connection with sales and refinances of residential and commercial real property.

Within the direct channel, our sales and marketing efforts are focused on the primary sources of business referrals. For residential business referred by local or decentralized customers, we market to real estate agents and brokers, mortgage brokers, real estate attorneys, mortgage originators, homebuilders and escrow service providers. For refinance and default related business referred by customers with centrally managed platforms, we market to mortgage originators, servicers, and government-sponsored enterprises. For the commercial business we market primarily to commercial real estate investors, including real estate investment trusts, insurance companies and asset managers, as well as to law firms, commercial banks, investment banks, mortgage brokers and the owners of commercial real estate. We also market directly to national homebuilders focused on newly constructed residential property. In some instances we may supplement the efforts of our sales force with general marketing. Our marketing efforts emphasize our product offerings, the quality and timeliness of our services, our financial strength, process innovation and our national presence. We also provide educational information on our website and through other means to help consumers better understand our services and the homebuying/settlement process in general.

Underwriting. Before a title insurance policy is issued, a number of underwriting decisions are made. For example, matters of record revealed during the title search may require a determination as to whether an exception should be taken in the policy. We believe that it is important for the underwriting function to operate efficiently and effectively at all decision-making levels so that transactions may proceed in a timely manner. To perform this function, we have underwriters at the regional, divisional and corporate levels with varying levels of underwriting authority.

Agency Operations. As described above, we also issue title insurance policies through a network of agents. Our agreements with our issuing agents typically state the conditions under which the agent is authorized to issue our title insurance policies. The agency agreement also typically prescribes the circumstances under which the agent may be liable to us if a policy loss occurs. Such agency agreements typically are terminable without cause after a specified notice period has been met and are terminable immediately for cause. As is standard in our industry, our agents typically operate with a substantial degree of independence from us and frequently act as agents for other title insurers. We evaluate the profitability of our agency relationships on an ongoing basis, including a review of premium splits, deductibles and claims. As a result, from time to time we may terminate or renegotiate the terms of some of our agency relationships.

In determining whether to engage an independent agent, we often obtain information about the agent, including the agent's experience and background. We maintain loss experience records for each agent and also maintain agent representatives and agent auditors. Our agents typically are subject to audit or examination. In addition to routine examinations, other examinations may be triggered if certain "warning signs" are evident. Adverse findings in an agency audit may result in various actions, including, if warranted, termination of the agency relationship.

International Operations. We provide products and services in a number of countries outside of the United States, and our international operations accounted for approximately 5.9% of our title insurance and services segment revenues in 2016. Today we have direct operations and a physical presence in several countries, including Canada, the United Kingdom and Australia. While reliable data are not available, we believe that we have the largest market share for title insurance outside of the United States. The Company's revenues from external customers and long-lived assets are broken down between domestic and foreign operations in Note 21 Segment Financial Information to the consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data" of Part II of this report.

Our range of international products and services is designed to lower our clients' risk profiles and reduce their operating costs through enhanced operational efficiencies. In established markets, primarily British Commonwealth countries, we have combined title insurance with customized processing offerings to enhance the speed and efficiency of the mortgage and conveyancing processes. In these markets we also offer products designed to mitigate risk and otherwise facilitate real estate transactions.

Our international operations present risks that may not exist to the same extent in our domestic operations, including those associated with differences in the nature of the products provided, the scope of coverage provided by those products and the manner in which risk is underwritten. Limited claims experience in certain foreign jurisdictions makes it more difficult to set prices and reserve rates. There may also be risks associated with differences in legal systems and/or unforeseen regulatory changes.

Title Plants. Our collection of data and records on, or which impact, title to property – known as title plants – constitutes one of our principal assets. A title search is typically conducted by searching the abstracted information from public records or utilizing a title plant holding information abstracted from public records. While public title records generally are indexed by reference to the names of the parties to a given recorded document, our title plants primarily arrange their records on a geographic basis. Because of this difference, title plant records generally may be searched more effectively, which we believe reduces the risk of errors associated with the search. Many of our title plants also index prior policies, adding to searching efficiency. Certain locations utilize jointly owned plants or utilize a plant under a joint user agreement with other title companies. In addition to these ownership interests, we are in the business of maintaining, managing and providing access to title plant records and images that may be owned by us or other parties. We believe that our title plants, whether wholly or partially owned or utilized under a joint user agreement, are among the most comprehensive in the industry.

Reserves for Claims and Losses. We provide for losses associated with title insurance policies, closing protection letters and other risk based products based upon our historical experience and other factors by a charge to expense when the related premium revenue is recognized. The resulting reserve for incurred but not reported claims, together with the reserve for known claims, reflects management's best estimate of the total costs required to settle all claims reported to us and claims incurred but not reported, and are considered to be adequate for such purpose. Each period the reasonableness of the estimated reserves is assessed; if the estimate requires adjustment, such an adjustment is recorded.

Reinsurance and Coinsurance. We plan to continue our practice of assuming and ceding large title insurance risks through reinsurance. In reinsurance arrangements, the primary insurer retains a certain amount of risk under a policy and cedes the remainder of the risk under the policy to the reinsurer. The primary insurer pays the reinsurer a premium in exchange for accepting this risk of loss. The primary insurer generally remains liable to its insured for the total risk, but is reinsured under the terms of the reinsurance agreement. Prior to 2010, our title reinsurance arrangements primarily involved other industry participants. Beginning in January of 2010, we established a global reinsurance program involving treaty reinsurance provided by a global syndicate of highly rated non-industry reinsurers. Subject to the treaty limits and certain other limitations, the program generally covers claims made while the program is in effect.

We also serve as a coinsurer in connection with certain commercial transactions. In a coinsurance scenario, two or more insurers are selected by the insured and each coinsurer is liable for its specified percentage share of the total liability.

Competition. The business of providing title insurance and related products and services is highly competitive. The number of competing companies and the size of such companies vary in the different areas in which we conduct business. Generally, in areas of major real estate activity, such as metropolitan and suburban localities, we compete with many other title insurers and agents. Our major nationwide competitors in our principal markets include Fidelity National Financial, Inc., Stewart Title Guaranty Company, Old Republic International Corporation and their affiliates. In addition to these national competitors, small nationwide, regional and local competitors, as well as numerous agency operations throughout the country, provide aggressive competition on the local level. We are currently the second largest provider of title insurance in the United States, based on the most recent American Land Title Association market share data.

We believe that competition for title insurance, closing services and related products and services is based primarily on quality, price, customer relationships and the timeliness of the delivery of our products. Customer service is an important competitive factor because parties to real estate transactions are usually concerned with time schedules and costs associated with delays in closing transactions. In certain transactions, such as those involving commercial properties, financial strength and scope of coverage are also important. In addition, we regularly evaluate our pricing and agent splits, and based on competitive, market and regulatory conditions and claims history, among other factors, adjust our prices and agent splits as and where appropriate.

Trust and Investment Advisory Services. Our federal savings bank subsidiary offers trust and investment advisory services, deposit services and asset management services. As of December 31, 2016 this company administered fiduciary and custodial assets having a market value in excess of \$3.1 billion which includes managed assets of \$1.4 billion, and had assets of \$3.1 billion, deposits of \$2.9 billion and stockholder's equity of \$237.0 million.

Specialty Insurance Segment

Property and Casualty Insurance. Our property and casualty insurance business provides insurance coverage to residential homeowners and renters for liability losses and typical hazards such as fire, theft, vandalism and other types of property damage. We are licensed to issue policies in all 50 states and the District of Columbia and actively issue policies in 47 states. The majority of policy liability is in the western United States, including approximately 63% in California. In certain markets we also offer preferred risk auto insurance to better compete with other carriers offering bundled home and auto insurance. We market our property and casualty insurance business using both direct distribution channels, including cross-selling through our existing closing-service activities, and through a network of independent brokers. We purchase reinsurance to limit risk associated with large losses from single events.

Home Warranties. Our home warranty business provides residential service contracts that cover residential systems, such as heating and air conditioning systems, and certain appliances against failures that occur as the result of normal usage during the coverage period. Coverage is typically for one year and is renewable annually at the option of the contract holder and upon our approval. Coverage and pricing typically vary by geographic region. Fees for the warranties generally are paid at the closing of the home purchase or directly by the consumer. Renewal premiums may be paid by a number of different options. In addition, under the contract, the holder is responsible for a service fee for each trade call. First year warranties primarily are marketed through real estate brokers and agents, and we also increasingly market directly to consumers. We generally sell renewals directly to consumers. Our home warranty business currently operates in 39 states and the District of Columbia.

Corporate

The Company's corporate function consists primarily of certain financing facilities as well as the corporate services that support our business operations.

Regulation

Many of our subsidiaries are subject to extensive regulation by applicable domestic or foreign regulatory agencies. The extent of such regulation varies based on the industry involved, the nature of the business conducted by the subsidiary (for example, licensed title insurers are subject to a heightened level of regulation compared to underwritten title companies or agencies), the subsidiary's jurisdiction of organization and the jurisdictions in which it operates. In addition, the Company is subject to regulation as both an insurance holding company and a savings and loan holding company.

Our domestic subsidiaries that operate in the title insurance industry or the property and casualty insurance industry are subject to regulation by state insurance regulators. Each of our underwriters, or insurers, is regulated primarily by the insurance department or equivalent governmental body within the jurisdiction of its organization, which oversees

compliance with the laws and regulations pertaining to such insurer. For example, our primary title insurance underwriter, First American Title Insurance Company, is a Nebraska corporation and, accordingly, is primarily regulated by the Nebraska Department of Insurance. Insurance regulations pertaining to insurers typically place limits on, among other matters, the ability of the insurer to pay dividends to its parent company or to enter into transactions with affiliates. They also may require approval of the insurance commissioner prior to a third party directly or indirectly acquiring “control” of the insurer.

In addition, our insurers are subject to the laws of other jurisdictions in which they transact business, which laws typically establish supervisory agencies with broad administrative powers relating to issuing and revoking licenses to transact business, regulating trade practices, licensing agents, approving policy forms, accounting practices and financial practices, establishing requirements pertaining to reserves and capital and surplus as regards policyholders, requiring the deferral of a portion of all premiums in a reserve for the protection of policyholders and the segregation of investments in a corresponding amount, establishing parameters regarding suitable investments for reserves, capital and surplus, and approving rate schedules. The manner in which rates are established or changed ranges from states which promulgate rates, to states where individual companies or associations of companies prepare rate filings which are submitted for approval, to a few states in which rate changes do not need to be filed for approval. In addition, each of our insurers is subject to periodic examination by regulatory authorities both within its jurisdiction of organization as well as the other jurisdictions where it is licensed to conduct business.

Our foreign insurance subsidiaries are regulated primarily by regulatory authorities in the regions, provinces and/or countries in which they operate and may secondarily be regulated by the domestic regulator of First American Title Insurance Company as a part of the First American insurance holding company system. Each of these regions, provinces and countries has established a regulatory framework with respect to the oversight of compliance with its laws and regulations. Therefore, our foreign insurance subsidiaries generally are subject to regulatory review, examination, investigation and enforcement in a similar manner as our domestic insurance subsidiaries, subject to local variations.

Our underwritten title companies, agencies and property and casualty insurance agencies are also subject to certain regulation by insurance regulatory or banking authorities, including, but not limited to, minimum net worth requirements, licensing requirements, statistical reporting requirements, rate filing requirements and marketing restrictions.

In addition to state-level regulation, our domestic subsidiaries that operate in the insurance business, as well as our home warranty and banking subsidiaries and other subsidiaries, are subject to regulation by federal agencies, including the Consumer Financial Protection Bureau (“CFPB”). The CFPB has broad authority to regulate, among other areas, the mortgage and real estate markets, including our domestic subsidiaries, in matters which impact consumers. This authority includes the enforcement of federal consumer financial laws, including the Real Estate Settlement Procedures Act. Regulations issued by the CFPB, or the manner in which it interprets and enforces existing consumer protection laws, have impacted and could continue to impact the way in which we conduct our businesses and the profitability of those businesses.

In addition, our home warranty and settlement services businesses are subject to regulation in some states by insurance authorities or other applicable regulatory entities. Our federal savings bank is regulated by the Office of the Comptroller of the Currency, with the Federal Reserve Board supervising its parent holding company, and is subject to regulation by the Federal Deposit Insurance Corporation.

Investment Policies

The Company’s investment portfolio activities such as policy setting, compliance reporting, portfolio reviews, and strategy are overseen by an investment committee made up of certain senior executives. Additionally, certain of the Company’s regulated subsidiaries have established and maintain investment committees to oversee their own investment portfolios. The Company’s investment policies are designed to comply with regulatory requirements and to align the investment portfolio asset allocation with strategic objectives. For example, our federal savings bank is required to maintain at least 65% of its asset portfolio in loans or securities that are secured by real estate. Our federal savings bank currently does not make real estate loans, and therefore fulfills this regulatory requirement through investments in mortgage-backed securities. In addition, applicable law imposes certain restrictions upon the types and amounts of investments that may be made by our regulated insurance subsidiaries.

The Company's investment policies further provide that investments are to be managed to maximize long-term returns consistent with liquidity, regulatory and risk objectives, and that investments should not expose the Company to excessive levels of market, credit, liquidity, and interest rate risks.

As of December 31, 2016, our debt and equity securities portfolio consisted of 92% of fixed income securities. As of that date, 60% of our fixed income investments were held in securities that are United States government-backed or rated AAA, and 94% of the fixed income portfolio were rated or classified as investment grade. Percentages are based on the estimated fair values of the securities. Credit ratings reflect published ratings obtained from Standard & Poor's Rating Services, DBRS, Inc., Fitch Ratings, Inc. and Moody's Investor Services, Inc. If a security was rated differently among the rating agencies, the lowest rating was selected.

In addition to our debt and equity securities portfolio, we maintain certain money-market and other short-term investments. We also hold strategic equity investments in companies engaged in our businesses or similar or related businesses.

Employees

As of December 31, 2016, the Company employed 19,531 people on either a part-time or full-time basis.

Available Information

The Company maintains a website, www.firstam.com, which includes financial information and other information for investors, including open and closed title insurance orders (which typically are posted approximately 10 to 12 days after the end of each calendar month). The Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 are available free of charge through the "Investors" page of the website as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission. The Company's website and the information contained therein or connected thereto are not intended to be incorporated into this Annual Report on Form 10-K, or any other filing with the Securities and Exchange Commission unless the Company expressly incorporates such materials.

Item 1A. Risk Factors

You should carefully consider each of the following risk factors and the other information contained in this Annual Report on Form 10-K. The Company faces risks other than those listed here, including those that are unknown to the Company and others of which the Company may be aware but, at present, considers immaterial. Because of the following factors, as well as other variables affecting the Company's operating results, past financial performance may not be a reliable indicator of future performance, and historical trends should not be used to anticipate results or trends in future periods.

1. Conditions in the real estate market generally impact the demand for a substantial portion of the Company's products and services and the Company's claims experience

Demand for a substantial portion of the Company's products and services generally decreases as the number of real estate transactions in which its products and services are purchased decreases. The number of real estate transactions in which the Company's products and services are purchased decreases in the following situations:

- when mortgage interest rates are high or rising;
- when the availability of credit, including commercial and residential mortgage funding, is limited; and
- when real estate values are declining.

These circumstances, particularly declining real estate values and the increase in foreclosures that often results therefrom, also tend to adversely impact the Company's title claims experience.

2. Unfavorable economic conditions may have a material adverse effect on the Company

Historically, uncertainty and negative trends in general economic conditions in the United States and abroad, including significant tightening of credit markets and a general decline in the value of real property, have created a difficult operating environment for the Company's businesses and other companies in its industries. In addition, the Company holds investments in entities, such as title agencies and settlement service providers, as well as securities in its investment portfolio, which may be negatively impacted by these conditions. The Company also owns a federal savings bank into which it deposits some of its own funds and some funds held in trust for third parties. This bank invests those funds and any realized losses incurred will be reflected in the Company's consolidated results. The likelihood of such losses, which generally would not occur if the Company were to deposit these funds in an unaffiliated entity, increases when economic conditions are unfavorable. Depending upon the ultimate severity and duration of any economic downturn, the resulting effects on the Company could be materially adverse, including a significant reduction in revenues, earnings and cash flows, challenges to the Company's ability to satisfy covenants or otherwise meet its obligations under debt facilities, difficulties in obtaining access to capital, challenges to the Company's ability to pay dividends at currently anticipated levels, deterioration in the value of its investments and increased credit risk from customers and others with obligations to the Company.

3. Unfavorable economic or other conditions could cause the Company to write off a portion of its goodwill and other intangible assets

The Company performs an impairment test of the carrying value of goodwill and other indefinite-lived intangible assets annually in the fourth quarter, or sooner if circumstances indicate a possible impairment. Finite-lived intangible assets are subject to impairment tests on a periodic basis. Factors that may be considered in connection with this review include, without limitation, underperformance relative to historical or projected future operating results, reductions in the Company's stock price and market capitalization, increased cost of capital and negative macroeconomic, industry and company-specific trends. These and other factors could lead to a conclusion that goodwill or other intangible assets are no longer fully recoverable, in which case the Company would be required to write off the portion believed to be unrecoverable. Total goodwill and other intangible assets reflected on the Company's consolidated balance sheet as of December 31, 2016 are \$1.1 billion. Any substantial goodwill and other intangible asset impairments that may be required could have a material adverse effect on the Company's results of operations and financial condition.

4. Failures at financial institutions at which the Company deposits funds could adversely affect the Company

The Company deposits substantial funds in financial institutions. These funds include amounts owned by third parties, such as escrow deposits. Should one or more of the financial institutions at which deposits are maintained fail, there is no guarantee that the Company would recover the funds deposited, whether through Federal Deposit Insurance Corporation coverage or otherwise. In the event of any such failure, the Company also could be held liable for the funds owned by third parties.

5. Changes in government regulation could prohibit or limit the Company's operations, make it more burdensome to conduct such operations or result in decreased demand for the Company's products and services

Many of the Company's businesses, including its title insurance, property and casualty insurance, home warranty, banking, trust and investment businesses, are regulated by various federal, state, local and foreign governmental agencies. These and other of the Company's businesses also operate within statutory guidelines. The industry in which the Company operates and the markets into which it sells its products are also regulated and subject to statutory guidelines. Changes in the applicable regulatory environment, statutory guidelines or interpretations of existing regulations or statutes, enhanced governmental oversight or efforts by governmental agencies to cause customers to refrain from using the Company's products or services could prohibit or limit its future operations or make it more burdensome to conduct such operations or result in decreased demand for the Company's products and services. The

impact of these changes would be more significant if they involve jurisdictions in which the Company generates a greater portion of its title premiums, such as the states of Arizona, California, Florida, Michigan, New York, Ohio, Pennsylvania and Texas. These changes may compel the Company to reduce its prices, may restrict its ability to implement price increases or acquire assets or businesses, may limit the manner in which the Company conducts its business or otherwise may have a negative impact on its ability to generate revenues, earnings and cash flows.

6. Scrutiny of the Company's businesses and the industries in which it operates by governmental entities and others could adversely affect its operations and financial condition

The real estate settlement services industry, an industry in which the Company generates a substantial portion of its revenue and earnings, is subject to continuous scrutiny by regulators, legislators, the media and plaintiffs' attorneys. Though often directed at the industry generally, these groups may also focus their attention directly on the Company's businesses. In either case, this scrutiny may result in changes which could adversely affect the Company's operations and, therefore, its financial condition and liquidity.

Governmental entities have routinely inquired into certain practices in the real estate settlement services industry to determine whether certain of the Company's businesses or its competitors have violated applicable laws, which include, among others, the insurance codes of the various jurisdictions and the Real Estate Settlement Procedures Act and similar state, federal and foreign laws. The CFPB, for example, has actively been utilizing its regulatory authority over the mortgage and real estate markets by bringing enforcement actions against various participants in the mortgage and settlement industries. Departments of insurance in the various states, the CFPB and other federal regulators and applicable regulators in international jurisdictions, either separately or together, also periodically conduct targeted inquiries into the practices of title insurance companies and other settlement services providers in their respective jurisdictions.

Further, from time to time plaintiffs' lawyers may target the Company and other members of the Company's industry with lawsuits claiming legal violations or other wrongful conduct. These lawsuits may involve large groups of plaintiffs and claims for substantial damages. Any of these types of inquiries or proceedings may result in a finding of a violation of the law or other wrongful conduct and may result in the payment of fines or damages or the imposition of restrictions on the Company's conduct which could impact its operations and financial condition. Moreover, these laws and standards of conduct often are ambiguous and, thus, it may be difficult to ensure compliance. This ambiguity may force the Company to mitigate its risk by settling claims or by ending practices that generate revenues, earnings and cash flows.

7. The use of social media by the Company and other parties could result in damage to the Company's reputation and adversely affect its business or results of operations

The Company increasingly utilizes social media to communicate with customers, current and potential employees and other individuals interested in the Company. Information delivered by the Company, or by third parties about the Company, via social media can be easily accessed and rapidly disseminated, and could result in reputational harm, decreased customer loyalty or other issues that could diminish the value of the Company's brand or result in significant liability.

8. Regulation of title insurance rates could adversely affect the Company's results of operations

Title insurance rates are subject to extensive regulation, which varies from state to state. In many states the approval of the applicable state insurance regulator is required prior to implementing a rate change. This regulation could hinder the Company's ability to promptly adapt to changing market dynamics through price adjustments, which could adversely affect its results of operations, particularly in a rapidly declining market.

9. Changes in certain laws and regulations, and in the regulatory environment in which the Company operates, could adversely affect the Company's competitive position and results of operations

Federal officials are currently discussing various potential changes to laws and regulations that could impact the Company's businesses, including changes to the Dodd-Frank Wall Street Reform and Consumer Protection Act, the reform or privatization of government-sponsored enterprises such as the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), and tax reform, including changes

that could affect the mortgage interest deduction, among others. Changes in these areas, and more generally in the regulatory environment in which the Company and its customers operate, could adversely impact the volume of mortgage originations in the United States and the Company's competitive position and results of operations.

10. The Company may find it difficult to acquire necessary data

Certain data used and supplied by the Company are subject to regulation by various federal, state and local regulatory authorities. Compliance with existing federal, state and local laws and regulations with respect to such data has not had a material adverse effect on the Company's results of operations, financial condition or liquidity to date. Nonetheless, federal, state and local laws and regulations in the United States designed to protect the public from the misuse of personal information in the marketplace and adverse publicity or potential litigation concerning the commercial use of such information may affect the Company's operations and could result in substantial regulatory compliance expense, litigation expense and a loss of revenue. The suppliers of data to the Company face similar burdens. As a result of these and other factors, the Company may find it financially burdensome to acquire necessary data.

11. Changes in the Company's relationships with large mortgage lenders or government-sponsored enterprises could adversely affect the Company

The mortgage market in the United States is concentrated. Due to the consolidated nature of the industry, the Company derives a significant percentage of its revenues from a relatively small base of lenders, and their borrowers, which enhances the negotiating power of these lenders with respect to the pricing and the terms on which they purchase the Company's products and other matters. Similarly, government-sponsored enterprises, because of their significant role in the mortgage process, have significant influence over the Company and other service providers. These circumstances could adversely affect the Company's revenues and profitability. Changes in the Company's relationship with any of these lenders or government-sponsored enterprises, the loss of all or a portion of the business the Company derives from these parties or any refusal of these parties to accept the Company's products and services could have a material adverse effect on the Company.

12. A downgrade by ratings agencies, reductions in statutory capital and surplus maintained by the Company's title insurance underwriters or a deterioration in other measures of financial strength may negatively affect the Company's results of operations and competitive position

Certain of the Company's customers use measurements of the financial strength of the Company's title insurance underwriters, including, among others, ratings provided by ratings agencies and levels of statutory capital and surplus maintained by those underwriters, in determining the amount of a policy they will accept and the amount of reinsurance required. Each of the major ratings agencies currently rates the Company's title insurance operations. The Company's principal title insurance underwriter's financial strength ratings are "A3" by Moody's Investor Services, Inc., "A" by Fitch Ratings, Inc., "A-" by Standard & Poor's Ratings Services and "A" by A.M. Best Company, Inc. These ratings provide the agencies' perspectives on the financial strength, operating performance and cash generating ability of those operations. These agencies continually review these ratings and the ratings are subject to change. Statutory capital and surplus, or the amount by which statutory assets exceed statutory liabilities, is also a measure of financial strength. The Company's principal title insurance underwriter maintained \$1.2 billion of total statutory capital and surplus as of December 31, 2016. Accordingly, if the ratings or statutory capital and surplus of these title insurance underwriters are reduced from their current levels, or if there is a deterioration in other measures of financial strength, the Company's results of operations, competitive position and liquidity could be adversely affected.

13. The Company's investment portfolio is subject to certain risks and could experience losses

The Company maintains a substantial investment portfolio, primarily consisting of fixed income securities (including mortgage-backed securities). The investment portfolio also includes money-market and other short-term investments, as well as preferred and common stock. Securities in the Company's investment portfolio are subject to certain economic and financial market risks, such as credit risk, interest rate (including call, prepayment and extension) risk and/or liquidity risk. The risk of loss associated with the portfolio is increased during periods of instability in credit markets and economic conditions. If the carrying value of the investments exceeds the fair value, and the decline in

fair value is deemed to be other-than-temporary, the Company will be required to write down the value of the investments, which could have a material adverse effect on the Company's results of operations, statutory surplus and financial condition.

14. Actual claims experience could materially vary from the expected claims experience reflected in the Company's reserve for incurred but not reported claims

The Company maintains a reserve for incurred but not reported ("IBNR") claims pertaining to its title, escrow and other insurance and guarantee products. The majority of this reserve pertains to title insurance policies, which are long-duration contracts with the majority of the claims reported within the first few years following the issuance of the policy. Generally, 70% to 80% of claim amounts become known in the first six years of the policy life, and the majority of IBNR reserves relate to the six most recent policy years. Changes in expected ultimate losses and corresponding loss rates for recent policy years are considered likely and could result in a material adjustment to the IBNR reserves. Based on historical experience, management believes a 50 basis point change to the loss rates for recent policy years, positive or negative, is reasonably likely given the long duration nature of a title insurance policy. For example, if the expected ultimate losses for each of the last six policy years increased or decreased by 50 basis points, the resulting impact on the Company's IBNR reserve would be an increase or decrease, as the case may be, of \$110.1 million. A material change in expected ultimate losses and corresponding loss rates for older policy years is also possible, particularly for policy years with loss ratios exceeding historical norms. The estimates made by management in determining the appropriate level of IBNR reserves could ultimately prove to be materially different from actual claims experience.

15. The issuance of the Company's title insurance policies and related activities by title agents, which operate with substantial independence from the Company, could adversely affect the Company

The Company's title insurance subsidiaries issue a significant portion of their policies through title agents that operate with a substantial degree of independence from the Company. While these title agents are subject to certain contractual limitations that are designed to limit the Company's risk with respect to their activities, there is no guarantee that the agents will fulfill their contractual obligations to the Company. In addition, regulators are increasingly seeking to hold the Company responsible for the actions of these title agents and, under certain circumstances, the Company may be held liable directly to third parties for actions (including defalcations) or omissions of these agents. Recent case law in certain states also suggests that the Company is liable for the actions or omissions of its agents in those states, regardless of contractual limitations. As a result, the Company's use of title agents could result in increased claims on the Company's policies issued through agents and an increase in other costs and expenses.

16. The Company's risk mitigation efforts may prove inadequate

The Company assumes risks in the ordinary course of its business, including through the issuance of title insurance policies and the provision of other products and services. The Company mitigates these risks through a number of different means, including the implementation of underwriting policies and procedures and other mechanisms for assessing risk. However, underwriting of title insurance policies and other risk-assumption decisions frequently involve a substantial degree of individual judgment. The Company's risk mitigation efforts or the reliability of any necessary judgment may prove inadequate, especially in situations where the Company or individuals involved in risk taking decisions are encouraged by customers or others, or because of competitive pressures, to assume risks or to expeditiously make risk determinations. This circumstance could have an adverse effect on the Company's results of operations, financial condition and liquidity.

17. Systems damage, failures, interruptions and intrusions, and unauthorized data disclosures may disrupt the Company's business, harm the Company's reputation, result in material claims for damages or otherwise adversely affect the Company

The Company uses computer systems to receive, process, store and transmit business information, including highly sensitive non-public personal information as well as data from suppliers and other information upon which its business relies. It also uses these systems to manage substantial cash, investment assets, bank deposits, trust assets and

escrow account balances on behalf of the Company and its customers, among other activities. Many of the Company's products, services and solutions involving the use of real property related data are fully reliant on its systems and are only available electronically. Accordingly, for a variety of reasons, the integrity of the Company's computer systems and the protection of the information that resides on those systems are critically important to its successful operation. The Company's core computer systems are primarily located in two data centers. The Company manages its primary data center and the secondary data center is maintained and managed by a third party.

The Company's computer systems and systems used by its agents, suppliers and customers have been subject to, and are likely to continue to be the target of, computer viruses, cyber attacks, phishing attacks and other malicious activity. These attacks have increased in frequency and sophistication in recent years, and could expose the Company to system-related damage, failures, interruptions, and other negative events. Further, certain other potential causes of system damage or other negative system-related events are wholly or partially beyond the Company's control, such as natural disasters, vendor failures to satisfy service level requirements and power or telecommunications failures. These incidents, regardless of their underlying causes, could disrupt the Company's business and could also result in the loss or unauthorized release, gathering, monitoring or destruction of confidential, proprietary and other information pertaining to the Company, its customers, employees, agents or suppliers.

Certain laws and contracts the Company has entered into require it to notify various parties, including consumers or customers, in the event of certain actual or potential data breaches or systems failures. These notifications can result, among other things, in the loss of customers, lawsuits, adverse publicity, diversion of management's time and energy, the attention of regulatory authorities, fines and disruptions in sales. Further, the Company's financial institution customers have obligations to safeguard their computer systems and sensitive information and it may be bound contractually and/or by regulation to comply with the same requirements. If the Company fails to comply with applicable regulations and contractual requirements, it could be exposed to lawsuits, governmental proceedings or the imposition of fines, among other consequences.

Accordingly, any inability to prevent or adequately respond to the issues described above could disrupt the Company's business, inhibit its ability to retain existing customers or attract new customers and/or result in financial losses, litigation, increased costs or other adverse consequences which could be material to the Company.

18. Errors and fraud involving the transfer of funds may result in material financial losses or harm the Company's reputation

The Company relies on its systems, employees and domestic and international banks to transfer funds. These transfers are susceptible to user input error, fraud, system interruptions, incorrect processing and similar errors that could result in lost funds or delayed transactions. The Company's email and computer systems and systems used by its agents, customers and other parties involved in a transaction have been subject to, and are likely to continue to be the target of, fraudulent attacks, including attempts to cause the Company or its agents to improperly transfer funds. These attacks have increased in frequency and sophistication in recent years. Funds transferred to a fraudulent recipient are often not recoverable. In certain instances the Company may be liable for those unrecovered funds. The controls and procedures used by the Company to prevent transfer errors and fraud may prove inadequate, resulting in financial losses, reputational harm, loss of customers or other adverse consequences which could be material to the Company.

19. The Company's use of a global workforce involves risks that could negatively impact the Company

The Company utilizes lower cost labor in countries such as India and the Philippines, among others. These countries are subject to relatively high degrees of political and social instability and may lack the infrastructure to withstand natural disasters. Such disruptions could decrease efficiency and increase the Company's costs. Weakness of the United States dollar in relation to the currencies used in these countries may also reduce the savings achievable through this strategy. Furthermore, the practice of utilizing labor based in other countries is subject to heightened scrutiny in the United States and, as a result, the Company could face pressure to decrease its use of labor based outside the United States. Laws or regulations that require the Company to use labor based in the United States or effectively increase the cost of the Company's labor costs abroad also could be enacted. The Company may not be able to pass on these increased costs to its customers.

20. Acquisitions may have an adverse effect on our business

The Company has in the past acquired, and is expected to acquire in the future, other businesses. When businesses are acquired, the Company may not be able to integrate or manage these businesses in such a manner as to realize the anticipated synergies or otherwise produce returns that justify the investment. Acquired businesses may subject the Company to increased regulatory or compliance requirements. The Company may not be able to successfully retain employees of acquired businesses or integrate them, and could lose customers, suppliers or other partners as a result of the acquisitions. For these and other reasons, including changes in market conditions, the projections used to value the acquired businesses may prove inaccurate. In addition, the Company might incur unanticipated liabilities from acquisitions. These and other factors related to acquisitions could have a material adverse effect on the Company's results of operations, financial condition and liquidity. The Company's management also will continue to be required to dedicate substantial time and effort to the integration of its acquisitions. These efforts could divert management's focus and resources from other strategic opportunities and operational matters.

21. As a holding company, the Company depends on distributions from its subsidiaries, and if distributions from its subsidiaries are materially impaired, the Company's ability to declare and pay dividends may be adversely affected; in addition, insurance and other regulations limit the amount of dividends, loans and advances available from the Company's insurance subsidiaries

The Company is a holding company whose primary assets are investments in its operating subsidiaries. The Company's ability to pay dividends is dependent on the ability of its subsidiaries to pay dividends or repay funds. If the Company's operating subsidiaries are not able to pay dividends or repay funds, the Company may not be able to fulfill parent company obligations and/or declare and pay dividends to its stockholders. Moreover, pursuant to insurance and other regulations under which the Company's insurance subsidiaries operate, the amount of dividends, loans and advances available is limited. As of December 31, 2016, under such regulations, the maximum amount of dividends, loans and advances available in 2017 from these insurance subsidiaries, without prior approval from applicable regulators, was \$761.8 million.

22. Certain provisions of the Company's bylaws and certificate of incorporation may reduce the likelihood of any unsolicited acquisition proposal or potential change of control that the Company's stockholders might consider favorable

The Company's bylaws and certificate of incorporation contain provisions that could be considered "anti-takeover" provisions because they make it harder for a third-party to acquire the Company without the consent of the Company's incumbent board of directors. Under these provisions:

- election of the Company's board of directors is staggered such that only one-third of the directors are elected by the stockholders each year and the directors serve three year terms prior to reelection;
- stockholders may not remove directors without cause, change the size of the board of directors or, except as may be provided for in the terms of preferred stock the Company issues in the future, fill vacancies on the board of directors;
- stockholders may act only at stockholder meetings and not by written consent;
- stockholders must comply with advance notice provisions for nominating directors or presenting other proposals at stockholder meetings; and
- the Company's board of directors may without stockholder approval issue preferred shares and determine their rights and terms, including voting rights, or adopt a stockholder rights plan.

While the Company believes that they are appropriate, these provisions, which may only be amended by the affirmative vote of the holders of approximately 67% of the Company's issued voting shares, could have the effect of discouraging an unsolicited acquisition proposal or delaying, deferring or preventing a change of control transaction that might involve a premium price or otherwise be considered favorably by the Company's stockholders.

Item 1B. Unresolved Staff Comments
Not applicable.

Item 2. Properties

We maintain our executive offices at MacArthur Place in Santa Ana, California. This office campus consists of five office buildings, a technology center and a two-story parking structure, totaling approximately 490,000 square feet. Three office buildings, totaling approximately 210,000 square feet, and the fixtures thereto and underlying land, are subject to a deed of trust and security agreement securing payment of a promissory note evidencing a loan made in October 2003, to our principal title insurance subsidiary in the original sum of \$55.0 million. This loan is payable in monthly installments of principal and interest, is fully amortizing and matures November 1, 2023. The outstanding

principal balance of this loan was \$25.8 million as of December 31, 2016.

The office facilities we occupy are, in all material respects, in good condition and adequate for their intended use.

Item 3. Legal Proceedings

The Company and its subsidiaries are parties to a number of non-ordinary course lawsuits. These lawsuits frequently are similar in nature to other lawsuits pending against the Company's competitors.

For those non-ordinary course lawsuits where the Company has determined that a loss is both probable and reasonably estimable, a liability representing the best estimate of the Company's financial exposure based on known facts has been recorded. Actual losses may materially differ from the amounts recorded.

For a substantial majority of these lawsuits, however, it is not possible to assess the probability of loss. Most of these lawsuits are putative class actions which require a plaintiff to satisfy a number of procedural requirements before proceeding to trial. These requirements include, among others, demonstration to a court that the law proscribes in some manner the Company's activities, the making of factual allegations sufficient to suggest that the Company's activities exceeded the limits of the law and a determination by the court—known as class certification—that the law permits a group of individuals to pursue the case together as a class. In certain instances the Company may also be able to compel the plaintiff to arbitrate its claim on an individual basis. If these procedural requirements are not met, either the lawsuit cannot proceed or, as is the case with class certification or compelled arbitration, the plaintiffs lose the financial incentive to proceed with the case (or the amount at issue effectively becomes de minimis). Frequently, a court's determination as to these procedural requirements is subject to appeal to a higher court. As a result of, among other factors, ambiguities and inconsistencies in the myriad laws applicable to the Company's business and the uniqueness of the factual issues presented in any given lawsuit, the Company often cannot determine the probability of loss until a court has finally determined that a plaintiff has satisfied applicable procedural requirements.

Furthermore, because most of these lawsuits are putative class actions, it is often impossible to estimate the possible loss or a range of loss amounts, even where the Company has determined that a loss is reasonably possible. Generally class actions involve a large number of people and the effort to determine which people satisfy the requirements to become plaintiffs—or class members—is often time consuming and burdensome. Moreover, these lawsuits raise complex factual issues which result in uncertainty as to their outcome and, ultimately, make it difficult for the Company to estimate the amount of damages which a plaintiff might successfully prove. In addition, many of the Company's businesses are regulated by various federal, state, local and foreign governmental agencies and are subject to numerous statutory guidelines. These regulations and statutory guidelines often are complex, inconsistent or ambiguous, which results in additional uncertainty as to the outcome of a given lawsuit—including the amount of damages a plaintiff might be afforded—or makes it difficult to analogize experience in one case or jurisdiction to another case or jurisdiction.

Most of the non-ordinary course lawsuits to which the Company and its subsidiaries are parties challenge practices in the Company's title insurance business, though a limited number of cases also pertain to the Company's other businesses. These lawsuits include, among others, cases alleging, among other assertions, that the Company, one of its subsidiaries and/or one of its agents:

- charged an improper rate for title insurance in a refinance transaction, including

- *Lewis v. First American Title Insurance Company*, filed on November 28, 2006 and pending in the United States District Court for the District of Idaho.

A court has granted class certification in *Lewis*. For the reasons stated above, the Company has been unable to assess the probability of loss or estimate the possible loss or the range of loss.

- misclassified certain employees, including

- *Cruz v. First American Financial Corporation, et al.*, filed on November 25, 2015 and pending in the Superior Court of the State of California, County of Orange,

- *Sager v. Interthinx, Inc.*, filed on January 23, 2015 and pending in the Superior Court of the State of California, County of Los Angeles, and

-

Weber v. Interthinx, Inc., et al., filed on April 17, 2015 and pending in the United States District Court for the Eastern District of Missouri.

18

These lawsuits are putative class actions for which a class has not been certified. For the reasons described above, as well as the applicability of certain indemnification rights the Company may have, the Company has not yet been able to assess the probability of loss or estimate the possible loss or the range of loss or, where the Company has been able to make an estimate, the Company believes the amount is not material to the consolidated financial statements as a whole.

overcharged or improperly charged fees for products and services, conspired to fix prices, participated in the conveyance of illusory property interests, denied home warranty claims, and gave items of value to builders, brokers and others as inducements to refer business in violation of certain laws, such as consumer protection laws and laws generally prohibiting unfair business practices, and certain obligations, including

Downing v. First American Title Insurance Company, et al., filed on July 26, 2016 and pending in the United States District Court for the Northern District of Georgia,

Kaufman v. First American Financial Corporation, et al., filed on December 21, 2007 and pending in the Superior Court of the State of California, County of Los Angeles,

Kirk v. First American Financial Corporation, et al., filed on June 15, 2006 and pending in the Superior Court of the State of California, County of Los Angeles,

Lennen v. First American Financial Corporation, et al., filed on May 19, 2016 and pending in the United States District court for the Middle District of Florida,

McCormick v. First American Real Estate Services, Inc., et al., filed on December 31, 2015 and pending in the Superior Court of the State of California, County of Orange,

Sjobring v. First American Financial Corporation, et al., filed on February 25, 2005 and pending in the Superior Court of the State of California, County of Los Angeles,

Wilmot v. First American Financial Corporation, et al., filed on April 20, 2007 and pending in the Superior Court of the State of California, County of Los Angeles, and

In re First American Home Buyers Protection Corporation, consolidated on October 9, 2014 and pending in the United States District Court for the Southern District of California.

All of these lawsuits, except Kaufman and Kirk, are putative class actions for which a class has not been certified. In Kaufman a class was certified but that certification was subsequently vacated. A trial of the Kirk matter has concluded and the judgment has been affirmed on appeal. For the reasons described above, the Company has not yet been able to assess the probability of loss or estimate the possible loss or the range of loss or, where the Company has been able to make an estimate, the Company believes the amount is not material to the consolidated financial statements as a whole.

While some of the lawsuits described above may be material to the Company's operating results in any particular period if an unfavorable outcome results, the Company does not believe that any of these lawsuits will have a material adverse effect on the Company's overall financial condition or liquidity.

The Company also is a party to non-ordinary course lawsuits other than those described above. With respect to these lawsuits, the Company has determined either that a loss is not reasonably possible or that the estimated loss or range of loss, if any, is not material to the consolidated financial statements as a whole.

The Company's title insurance, property and casualty insurance, home warranty, banking, thrift, trust and investment advisory businesses are regulated by various federal, state and local governmental agencies. Many of the Company's other businesses operate within statutory guidelines. Consequently, the Company may from time to time be subject to examination or investigation by such governmental agencies. Currently, governmental agencies are examining or investigating certain of the Company's operations. These exams or investigations include inquiries into, among other matters, pricing and rate setting practices in the title insurance industry, competition in the title insurance industry, real estate settlement service customer acquisition and retention practices and agency relationships. With respect to matters where the Company has determined that a loss is both probable and reasonably estimable, the Company has recorded a liability representing its best estimate of the financial exposure based on known facts. While the ultimate disposition of each such exam or investigation is not yet determinable, the Company does not believe that individually

or in the aggregate they will have a material adverse effect on the Company's financial condition, results of operations or cash flows. These exams or investigations could, however, result in changes to the Company's business practices which could ultimately have a material adverse impact on the Company's financial condition, results of operations or cash flows.

The Company and its subsidiaries also are involved in numerous ongoing routine legal and regulatory proceedings related to their operations. With respect to each of these proceedings, the Company has determined either that a loss is not reasonably possible or that the estimated loss or range of loss, if any, is not material to the consolidated financial statements as a whole.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Market Prices and Dividends

The Company's common stock trades on the New York Stock Exchange (ticker symbol FAF). The approximate number of record holders of common stock on February 10, 2017, was 2,487.

High and low stock prices and dividends declared for 2016 and 2015 are set forth in the table below.

	2016		2015	
Period	High-low range	Cash dividends	High-low range	Cash dividends
Quarter Ended				
March 31	\$31.74-38.35	\$ 0.26	\$32.59-37.75	\$ 0.25
Quarter Ended				
June 30	\$34.63-40.23	\$ 0.26	\$34.50-38.19	\$ 0.25
Quarter Ended				
September 30	\$39.25-43.55	\$ 0.34	\$36.88-43.16	\$ 0.25
Quarter Ended				
December 31	\$35.30-41.66	\$ 0.34	\$34.39-40.72	\$ 0.25

In January 2017, the Company's board of directors declared a cash dividend of \$0.34 per share. We expect that the Company will continue to pay quarterly cash dividends at or above the current level. The timing, declaration and payment of future dividends, however, falls within the discretion of the Company's board of directors and will depend upon many factors, including the Company's financial condition and earnings, the capital requirements of our businesses, restrictions imposed by applicable law and any other factors the board of directors deems relevant from time to time. In addition, the ability to pay dividends also is potentially affected by the restrictions described in Note 2 Statutory Restrictions on Investments and Stockholders' Equity to the consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data" of Part II of this report.

Unregistered Sales of Equity Securities

During the year ended December 31, 2016, the Company did not issue any unregistered common stock.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Pursuant to the share repurchase program initially announced by the Company on March 16, 2011 and expanded on March 11, 2014, which program has no expiration date, the Company may repurchase up to \$250.0 million of the Company's issued and outstanding common stock. The Company did not repurchase any shares under this plan during the quarter ended December 31, 2016. Cumulatively the Company has repurchased \$67.6 million (including commissions) of its shares and has the authority to repurchase an additional \$182.4 million (including commissions) under the plan.

Stock Performance Graph

The following performance graph and related information shall not be deemed "soliciting material" or "filed" with the SEC, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or

the Securities Exchange Act of 1934, each as amended, except to the extent that it is specifically incorporated by reference into such filing.

The following graph compares the cumulative total stockholder return on the Company's common stock with the corresponding cumulative total returns of the Russell 2000 Financial Services Index, the Russell 1000 Index and a peer group index for the period from December 31, 2011 through December 31, 2016. In past years, the Company used the Russell 2000 Financial Services Index for purposes of the stock performance graph below. However, during 2016, the Russell indices were reconstituted such that the Company was moved from the Russell 2000 Index to the Russell 1000 Index. In connection with the reconstitution, the Company determined that the Russell 1000 Index would be a more appropriate broad equity market index to include in the stock performance graph. Accordingly, while both the Russell 1000 Index and the Russell 2000 Financial Services Index have been included for this transitional year, the Company does not expect to include the Russell 2000 Financial Services Index in future years.

The comparison assumes an investment of \$100 on December 31, 2011 and reinvestment of dividends. This historical performance is not indicative of future performance.

Comparison of Cumulative Total Return

	First American Financial Corporation (FAF) (1)	Custom Peer Group (1)(2)	Russell 2000 Financial Services Index (1)	Russell 1000 Index (1)
December 31, 2011	\$ 100	\$ 100	\$ 100	\$100
December 31, 2012	\$ 194	\$ 116	\$ 121	\$116
December 31, 2013	\$ 231	\$ 166	\$ 171	\$155
December 31, 2014	\$ 286	\$ 183	\$ 197	\$176
December 31, 2015	\$ 312	\$ 207	\$ 198	\$177
December 31, 2016	\$ 328	\$ 246	\$ 231	\$198

(1) As calculated by Bloomberg Financial Services, to include reinvestment of dividends.

(2) The peer group consists of the following companies: American Financial Group, Inc.; Assurant, Inc.; Cincinnati Financial Corporation; Fidelity National Financial, Inc. (not including its FNFV tracking stock); The Hanover Insurance Group, Inc.; Kemper Corporation; Mercury General Corporation; Old Republic International Corp.; White Mountains Insurance Group Ltd.; and W.R. Berkley Corporation each of which operates in a business similar to a business operated by the Company. The compensation committee of the Company utilizes the compensation practices of these companies as benchmarks in setting the compensation of its executive officers.

Item 6. Selected Financial Data

The selected historical consolidated financial data for First American Financial Corporation (the “Company”) as of and for each of the five years in the period ended December 31, 2016, have been derived from the Company’s consolidated financial statements. The selected historical consolidated financial data should be read in conjunction with “Item 8. Financial Statements and Supplementary Data,” “Item 1—Business,” and “Item 7—Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

First American Financial Corporation and Subsidiary Companies

	Year Ended December 31,				
	2016	2015	2014	2013	2012
	(in thousands, except percentages, per share amounts and employee data)

Diluted	111,156	109,826	108,688	109,102	108,542
End of year	109,944	109,098	107,541	105,900	107,239
Other Operating Data (unaudited):					
Title orders opened (Note C)	1,281	1,262	1,156	1,385	1,635
Title orders closed (Note C)	958	882	816	1,103	1,192
Number of employees (Note D)	19,531	17,955	17,103	17,292	17,312

Note A—Amounts related to years 2015 – 2012 have been revised to reflect the derecognition of certain title plant assets that should have been written off in prior periods, and the misclassification of certain capitalized software, title plant imaging, real estate data and investments related to title plant assets as title plant assets. See Note 1 Basis of Presentation and Significant Accounting Policies to the consolidated financial statements for further information about the financial statement revisions.

Note B—Per share information relating to net income is based on weighted-average number of shares outstanding for the years presented. Per share information relating to stockholders’ equity is based on shares outstanding at the end of each year.

Note C—Title order volumes are those processed by the direct domestic title operations of the Company and do not include orders processed by agents.

Note D—Number of employees is based on actual employee headcount.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

CERTAIN STATEMENTS IN THIS ANNUAL REPORT ON FORM 10-K ARE FORWARD-LOOKING STATEMENTS WITHIN THE MEANING OF SECTION 27A OF THE SECURITIES ACT OF 1933, AS AMENDED, AND SECTION 21E OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED. THESE FORWARD-LOOKING STATEMENTS MAY CONTAIN THE WORDS "BELIEVE," "ANTICIPATE," "EXPECT," "PLAN," "PREDICT," "ESTIMATE," "PROJECT," "WILL BE," "WILL CONTINUE," "WILL LIKELY RESULT," OR OTHER SIMILAR WORDS AND PHRASES.

RISKS AND UNCERTAINTIES EXIST THAT MAY CAUSE RESULTS TO DIFFER MATERIALLY FROM THOSE SET FORTH IN THESE FORWARD-LOOKING STATEMENTS. FACTORS THAT COULD CAUSE THE ANTICIPATED RESULTS TO DIFFER FROM THOSE DESCRIBED IN THE FORWARD-LOOKING STATEMENTS INCLUDE THE FACTORS SET FORTH ON PAGES 3-4 OF THIS ANNUAL REPORT. THE FORWARD-LOOKING STATEMENTS SPEAK ONLY AS OF THE DATE THEY ARE MADE. THE COMPANY DOES NOT UNDERTAKE TO UPDATE FORWARD-LOOKING STATEMENTS TO REFLECT CIRCUMSTANCES OR EVENTS THAT OCCUR AFTER THE DATE THE FORWARD-LOOKING STATEMENTS ARE MADE.

This Management's Discussion and Analysis contains certain financial measures that are not presented in accordance with generally accepted accounting principles ("GAAP"), including adjusted information and other revenues, adjusted personnel costs, adjusted other operating expenses and adjusted depreciation and amortization expense, in each case excluding the effects of recent acquisitions. The Company is presenting these non-GAAP financial measures because they provide the Company's management and readers of this Annual Report on Form 10-K with additional insight into the operational performance of the Company relative to earlier periods. The Company does not intend for these non-GAAP financial measures to be a substitute for any GAAP financial information. In this Annual Report on Form 10-K, these non-GAAP financial measures have been presented with, and reconciled to, the most directly comparable GAAP financial measures. Readers of this Annual Report on Form 10-K should use these non-GAAP financial measures only in conjunction with the comparable GAAP financial measures.

Principles of Consolidation

The consolidated financial statements have been prepared in accordance with GAAP and reflect the consolidated operations of the Company. The consolidated financial statements include the accounts of First American Financial Corporation and all controlled subsidiaries. All significant intercompany transactions and balances have been eliminated. Investments in affiliates in which the Company exercises significant influence, but does not control and is not the primary beneficiary, are accounted for using the equity method. Investments in affiliates in which the Company does not exercise significant influence over the investee are accounted for under the cost method.

Reportable Segments

The Company consists of the following reportable segments and a corporate function:

• The Company's title insurance and services segment issues title insurance policies on residential and commercial property in the United States and offers similar or related products and services internationally. This segment also provides closing and/or escrow services; accommodates tax-deferred exchanges of real estate; provides products, services and solutions involving the use of real property related data designed to mitigate risk or otherwise facilitate real estate transactions; maintains, manages and provides access to title plant records and images; provides evidence of title; and provides banking, trust, document custodial and investment advisory services. The Company, through its principal title insurance subsidiary and such subsidiary's affiliates, transacts its title insurance business through a network of direct operations and agents. Through this network, the Company issues policies in the 49 states that permit the issuance of title insurance policies and the District of Columbia. The Company also offers title insurance and other insurance and guarantee products, as well as related settlement services in foreign countries, including

Canada, the United Kingdom, Australia, South Korea and various other established and emerging markets.

24

The Company's specialty insurance segment issues property and casualty insurance policies and sells home warranty products. The property and casualty insurance business provides insurance coverage to residential homeowners and renters for liability losses and typical hazards such as fire, theft, vandalism and other types of property damage. This business is licensed to issue policies in all 50 states and the District of Columbia and actively issues policies in 47 states. The majority of policy liability is in the western United States, including approximately 63% in California. In certain markets it also offers preferred risk auto insurance to better compete with other carriers offering bundled home and auto insurance. The home warranty business provides residential service contracts that cover residential systems, such as heating and air conditioning systems, and certain appliances against failures that occur as the result of normal usage during the coverage period. This business currently operates in 39 states and the District of Columbia.

The corporate function consists primarily of certain financing facilities as well as the corporate services that support the Company's business operations.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires the application of accounting policies that often involve a significant degree of judgment. The Company's management considers the accounting policies described below to be the most dependent on the application of estimates and assumptions in preparing the Company's consolidated financial statements. See Note 1 Description of the Company to the consolidated financial statements for a more detailed description of the Company's significant accounting policies.

Provision for policy losses. The Company provides for title insurance losses by a charge to expense when the related premium revenue is recognized. The amount charged to expense is generally determined by applying a rate (the loss provision rate) to total title insurance premiums and escrow fees. The Company's management estimates the loss provision rate at the beginning of each year and reassesses the rate quarterly to ensure that the resulting incurred but not reported ("IBNR") loss reserve and known claims reserve included in the Company's consolidated balance sheets together reflect management's best estimate of the total costs required to settle all IBNR and known claims. If the ending IBNR reserve is not considered adequate, an adjustment is recorded.

The process of assessing the loss provision rate and the resulting IBNR reserve involves evaluation of the results of an in-house actuarial review. The Company's in-house actuary performs a reserve analysis utilizing generally accepted actuarial methods that incorporate cumulative historical claims experience and information provided by in-house claims and operations personnel. Current economic and business trends are also reviewed and used in the reserve analysis. These include conditions in the real estate and mortgage markets, changes in residential and commercial real estate values, and changes in the levels of defaults and foreclosures that may affect claims levels and patterns of emergence, as well as any company-specific factors that may be relevant to past and future claims experience. Results from the analysis include, but are not limited to, a range of IBNR reserve estimates and a single point estimate for IBNR as of the balance sheet date.

For recent policy years at early stages of development (generally the last three years), IBNR is generally estimated using a combination of expected loss rate and multiplicative loss development factor calculations. For more mature policy years, IBNR generally is estimated using multiplicative loss development factor calculations. The expected loss rate method estimates IBNR by applying an expected loss rate to total title insurance premiums and escrow fees, and adjusting for policy year maturity using estimated loss development patterns. Multiplicative loss development factor calculations estimate IBNR by applying factors derived from loss development patterns to losses realized to date. The expected loss rate and loss development patterns are based on historical experience and the relationship of the history to the applicable policy years.

The Company's management uses the IBNR point estimate from the in-house actuary's analysis and other relevant information concerning claims to determine what it considers to be the best estimate of the total amount required for the IBNR reserve.

The volume and timing of title insurance claims are subject to cyclical influences from real estate and mortgage markets. Title policies issued to lenders constitute a large portion of the Company's title insurance volume. These policies insure lenders against losses on mortgage loans due to title defects in the collateral property. Even if an underlying title defect exists that could result in a claim, often, the lender must realize an actual loss, or at least be likely to realize an actual loss, for title insurance liability to exist. As a result, title insurance claims exposure is sensitive to lenders' losses on mortgage loans, and is affected in turn by external factors that affect mortgage loan losses, particularly macroeconomic factors.

A general decline in real estate prices can expose lenders to greater risk of losses on mortgage loans, as loan-to-value ratios increase and defaults and foreclosures increase. Title insurance claims exposure for a given policy year is also affected by the quality of mortgage loan underwriting during the corresponding origination year. The Company believes that the sensitivity of claims to external conditions in the real estate and mortgage markets is an inherent feature of title insurance's business economics that applies broadly to the title insurance industry.

Title insurance policies are long-duration contracts with the majority of the claims reported to the Company within the first few years following the issuance of the policy. Generally, 70% to 80% of claim amounts become known in the first six years of the policy life, and the majority of IBNR reserves relate to the six most recent policy years. Changes in expected ultimate losses and corresponding loss rates for recent policy years are considered likely and could result in a material adjustment to the IBNR reserves. Based on historical experience, management believes a 50 basis point change to the loss rates for recent policy years, positive or negative, is reasonably likely given the long duration nature of a title insurance policy. For example, if the expected ultimate losses for each of the last six policy years increased or decreased by 50 basis points, the resulting impact on the Company's IBNR reserve would be an increase or decrease, as the case may be, of \$110.1 million. A material change in expected ultimate losses and corresponding loss rates for older policy years is also possible, particularly for policy years with loss ratios exceeding historical norms. The estimates made by management in determining the appropriate level of IBNR reserves could ultimately prove to be materially different from actual claims experience.

The Company provides for property and casualty insurance losses when the insured event occurs. The Company provides for claims losses relating to its home warranty business based on the average cost per claim as applied to the total of new claims incurred. The average cost per home warranty claim is calculated using the average of the most recent 12 months of claims experience adjusted for estimated future increases in costs.

A summary of the Company's loss reserves is as follows:

(in thousands, except percentages)	December 31, 2016			December 31, 2015		
Known title claims	\$83,805	8.1	%	\$87,543	8.9	%
Incurred but not reported claims	888,126	86.6	%	844,364	85.8	%
Total title claims	971,931	94.7	%	931,907	94.7	%
Non-title claims	53,932	5.3	%	51,973	5.3	%
Total loss reserves	\$1,025,863	100.0	%	\$983,880	100.0	%

Activity in the reserve for known title claims is summarized as follows:

	December 31, 2016 2015 2014 (in thousands)		
Balance at beginning of year	\$87,543	\$165,330	\$135,478
Provision transferred from IBNR title claims related to:			
Current year	15,098	13,569	29,939
Prior years	188,066	184,473	274,481
	203,164	198,042	304,420
Payments, net of recoveries, related to:			
Current year	12,420	11,258	22,272
Prior years	197,821	243,519	249,851

Edgar Filing: First American Financial Corp - Form 10-K

	210,241	254,777	272,123
Other	3,339	(21,052)	(2,445)
Balance at end of year	\$83,805	\$87,543	\$165,330

“Other” for 2015 included recoveries of \$23.8 million on reinsured losses related to a large commercial title claim.

The provision transferred from IBNR title claims related to current year increased by \$1.5 million in 2016 from 2015 and decreased by \$16.4 million in 2015 from 2014 and payments, net of recoveries, related to current year increased by \$1.2 million in 2016 from 2015 and decreased by \$11.0 million in 2015 from 2014, reflecting variability in claims volumes characteristic of a policy year during its first year of development. In addition, 2014 experienced a higher level of fraud losses when compared to 2016 and 2015.

The provision transferred from IBNR title claims related to prior years increased by \$3.6 million, or 1.9%, in 2016 from 2015 and decreased by \$90.0 million, or 32.8%, in 2015 from 2014. Payments, net of recoveries, related to prior years decreased by \$45.7 million, or 18.8%, in 2016 from 2015 and decreased by \$6.3 million, or 2.5%, in 2015 from 2014. Generally, the provision transferred from IBNR title claims and payments are expected to decline with the runoff of older policy years that have higher expected ultimate losses, particularly policy years 2005 through 2008. 2015 and 2014 were impacted by the timing of the provision transferred from IBNR title claims and payments associated with certain large claims. During 2014, the Company transferred provision of \$56.0 million from IBNR title claims related to these large claims, and the Company paid \$35.0 million, net of \$21.0 million recovered through reinsurance, during the first quarter of 2015 to settle these claims.

Activity in the reserve for IBNR title claims is summarized as follows:

	December 31,		
	2016	2015	2014
	(in thousands)		
Balance at beginning of year	\$844,364	\$802,069	\$840,104
Provision related to:			
Current year	193,109	170,789	188,997
Prior years	42,552	93,092	64,133
	235,661	263,881	253,130
Provision transferred to known title claims related to:			
Current year	15,098	13,569	29,939
Prior years	188,066	184,473	274,481
	203,164	198,042	304,420
Other	11,265	(23,544)	13,255
Balance at end of year	\$888,126	\$844,364	\$802,069

“Other” primarily includes foreign currency translation gains and losses, assets acquired in connection with claim settlements, and recoveries. “Other” for 2014 included a reinsurance receivable of \$25.0 million that related to a large commercial title claim.

The provision related to current year increased by \$22.3 million, or 13.1%, in 2016 from 2015. This increase was attributable to a 6.5% increase in title premiums and escrow fees in 2016 from 2015 and a higher current year loss rate in 2016 when compared to 2015. The current year loss rate in 2016 was 4.5% compared to 4.2% in 2015.

The provision related to current year decreased by \$18.2 million, or 9.6%, in 2015 from 2014. This decrease was attributable to a lower current year loss rate in 2015 when compared to 2014, partly offset by a 13.0% increase in title premiums and escrow fees in 2015 from 2014. The current year loss rate in 2015 was 4.2% compared to 5.3% in 2014.

For further discussion of title provision recorded in 2016, 2015 and 2014, see Results of Operations, pages 38 and 39.

Fair value of investment portfolio. The Company categorizes the fair value of its debt and equity securities using a three-level hierarchy for fair value measurements that distinguishes between market participant assumptions developed based on market data obtained from sources independent of the Company (observable inputs) and the Company’s own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when

available. The hierarchy level assigned to each security in the Company's available-for-sale portfolio was based on management's assessment of the transparency and reliability of the inputs used to estimate the fair values at the measurement date. See Note 14 Fair Value Measurements to the consolidated financial statements for a more detailed description of the three-level hierarchy and a description for each level.

The valuation techniques and inputs used to estimate the fair value of the Company's debt and equity securities are summarized as follows:

Fair value of debt securities

The fair values of debt securities were based on the market values obtained from independent pricing services that were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other market information and price quotes from well-established independent broker-dealers. The independent pricing services monitor market indicators, industry and economic events, and for broker-quoted only securities, obtain quotes from market makers or broker-dealers that they recognize to be market participants. The pricing services utilize the market approach in determining the fair value of the debt securities held by the Company. The Company obtains an understanding of the valuation models and assumptions utilized by the services and has controls in place to determine that the values provided represent fair value. The Company's validation procedures include comparing prices received from the pricing services to quotes received from other third party sources for certain securities with market prices that are readily verifiable. If the price comparison results in differences over a predefined threshold, the Company will assess the reasonableness of the changes relative to prior periods given the prevailing market conditions and assess changes in the issuers' credit worthiness, performance of any underlying collateral and prices of the instrument relative to similar issuances. To date, the Company has not made any material adjustments to the fair value measurements provided by the pricing services.

Typical inputs and assumptions to pricing models used to value the Company's U.S. Treasury bonds, municipal bonds, foreign government bonds, governmental agency bonds, governmental agency mortgage-backed securities and U.S. and foreign corporate debt securities include, but are not limited to, benchmark yields, reported trades, broker-dealer quotes, credit spreads, credit ratings, bond insurance (if applicable), benchmark securities, bids, offers, reference data and industry and economic events. For mortgage-backed securities, inputs and assumptions may also include the structure of issuance, characteristics of the issuer, collateral attributes and prepayment speeds. Non-agency mortgage-backed securities and certain U.S. and foreign corporate debt securities were not actively traded and there were fewer observable inputs available requiring the use of more judgment in determining their fair values, which resulted in their classification as Level 3.

Other-than-temporary impairment—debt securities

If the Company intends to sell a debt security in an unrealized loss position or determines that it is more likely than not that the Company will be required to sell a debt security before it recovers its amortized cost basis, the debt security is other-than-temporarily impaired and it is written down to fair value with all losses recognized in earnings. As of December 31, 2016, the Company did not intend to sell any debt securities in an unrealized loss position and it is not more likely than not that the Company will be required to sell debt securities before recovery of their amortized cost basis.

If the Company does not expect to recover the amortized cost basis of a debt security with declines in fair value (even if the Company does not intend to sell the debt security and it is not more likely than not that the Company will be required to sell the debt security), the losses the Company considers to be the credit portion of the other-than-temporary impairment loss ("credit loss") is recognized in earnings and the non-credit portion is recognized in other comprehensive income. The credit loss is the difference between the present value of the cash flows expected to be collected and the amortized cost basis of the debt security. The cash flows expected to be collected are discounted at the rate implicit in the security immediately prior to the recognition of the other-than-temporary impairment.

Expected future cash flows for debt securities are based on qualitative and quantitative factors specific to each security, including the probability of default and the estimated timing and amount of recovery. The detailed inputs used to project expected future cash flows may be different depending on the nature of the individual debt security.

The Company recorded other-than-temporary impairment losses considered to be credit related on its debt securities of \$0.5 million, \$2.2 million and \$1.7 million for 2016, 2015, and 2014, respectively.

Fair value of equity securities

The fair values of equity securities, including preferred and common stocks, were based on quoted market prices for identical assets that are readily and regularly available in an active market.

Other-than-temporary impairment—equity securities

When a decline in the fair value of an equity security, including common and preferred stock, is considered to be other-than-temporary, such equity security is written down to its fair value. When assessing if a decline in fair value is other-than-temporary, the factors considered include the length of time and extent to which fair value has been below cost, the probability that the Company will be unable to collect all amounts due under the contractual terms of the security, the seniority of the securities, issuer-specific news and other developments, the financial condition and prospects of the issuer (including credit ratings), macro-economic changes (including the outlook for industry sectors, which includes government policy initiatives) and the Company's ability and intent to hold the security for a period of time sufficient to allow for any anticipated recovery.

When an equity security has been in an unrealized loss position and its fair value is less than 80% of cost for twelve consecutive months, the Company's review of the security includes the above noted factors as well as other evidence that might exist supporting the view that the security will recover its value in the foreseeable future. If objective, substantial evidence does not indicate a likely recovery during that timeframe, the Company's policy is that such losses are considered other-than-temporary and therefore an impairment loss is recorded. The Company did not record any other-than-temporary impairment losses related to its equity securities for 2016, 2015 and 2014.

Litigation and regulatory contingencies. The Company and its subsidiaries are parties to a number of ongoing routine and non-ordinary course legal proceedings. For those lawsuits where the Company has determined that a loss is both probable and reasonably estimable, a liability representing the best estimate of the Company's financial exposure based on known facts has been recorded. Actual losses may materially differ from the amounts recorded. For a substantial majority of these lawsuits it is not possible to assess the probability of loss. Most of these lawsuits are putative class actions which require a plaintiff to satisfy a number of procedural requirements before proceeding to trial. As a result of, among other factors, ambiguities and inconsistencies in the myriad laws applicable to the Company's business and the uniqueness of the factual issues presented in any given lawsuit, the Company often cannot determine the probability of loss until a court has finally determined that a plaintiff has satisfied applicable procedural requirements. Furthermore, because most of these lawsuits are putative class actions, it is often impossible to estimate the possible loss or a range of loss, even where the Company has determined that a loss is reasonably possible. In addition, many of the Company's businesses are regulated by various federal, state, local and foreign governmental agencies and are subject to numerous statutory guidelines. These regulations and statutory guidelines often are complex, inconsistent or ambiguous, which results in additional uncertainty as to the outcome of a given lawsuit—including the amount of damages a plaintiff might be afforded—or makes it difficult to analogize experience in one case or jurisdiction to another case or jurisdiction.

Business Combinations. The Company allocates the fair value of purchase consideration to the tangible assets acquired, liabilities assumed and intangible assets acquired based on their estimated fair values. The excess of the fair value of purchase consideration over the fair values of these identifiable assets and liabilities is recorded as goodwill. When determining the fair values of assets acquired and liabilities assumed, management makes significant estimates and assumptions, especially with respect to intangible assets.

Critical estimates in valuing certain intangible assets include, but are not limited to, future expected cash flows, useful lives and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable and, as a result, may differ from actual results. Other estimates associated with the accounting for acquisitions may change as additional information becomes available regarding the assets acquired and liabilities assumed.

Impairment assessment for goodwill. The Company is required to perform an annual goodwill impairment assessment for each reporting unit. The Company's four reporting units are title insurance, home warranty, property and casualty insurance and trust and other services. The Company has elected to perform this annual assessment in the fourth quarter of each fiscal year or sooner if circumstances indicate possible impairment. Based on current guidance, the Company has the option to perform a qualitative assessment to determine if the fair value is more likely than not (i.e., a likelihood of greater than 50%) less than the carrying amount as a basis for determining whether it is necessary to perform a quantitative impairment test, or may choose to forego the qualitative assessment and perform the quantitative impairment test. The qualitative factors considered in this assessment may include macroeconomic conditions, industry and market considerations, overall financial performance as well as other relevant events and circumstances as determined by the Company. The Company evaluates the weight of each factor to determine whether it is more likely than not that impairment may exist. If the results of the qualitative assessment indicate the more likely than not threshold was not met, the Company may choose not to perform the quantitative impairment test. If, however, the more likely than not threshold is met, the Company performs the quantitative test as required and discussed below.

Management's quantitative impairment testing process includes two steps. The first step ("Step 1") compares the fair value of each reporting unit to its carrying amount. The fair value of each reporting unit is determined by using discounted cash flow analysis and market approach valuations. If the fair value of the reporting unit exceeds its carrying amount, the goodwill is not considered impaired and no additional analysis is required. However, if the carrying amount is greater than the fair value, a second step ("Step 2") must be completed to determine if the fair value of the goodwill exceeds the carrying amount of goodwill.

Step 2 involves calculating an implied fair value of goodwill for each reporting unit for which Step 1 indicated impairment. The implied fair value of goodwill is determined in a manner similar to the amount of goodwill calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit, as determined in Step 1, over the aggregate estimated fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment loss is recorded for the excess. An impairment loss cannot exceed the carrying value of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted.

The quantitative impairment test for goodwill utilizes a variety of valuation techniques, all of which require the Company to make estimates and judgments. Fair value is determined by employing an expected present value technique, which utilizes multiple cash flow scenarios that reflect a range of possible outcomes and an appropriate discount rate. The use of comparative market multiples (the "market approach") compares the reporting unit to other comparable companies (if such comparables are present in the marketplace) based on valuation multiples to arrive at a fair value. In assessing the fair value, the Company utilizes the results of the valuations (including the market approach to the extent comparables are available) and considers the range of fair values determined under all methods and the extent to which the fair value exceeds the carrying amount of the reporting unit.

The valuation of each reporting unit includes the use of assumptions and estimates of many critical factors, including revenue growth rates and operating margins, discount rates and future market conditions, determination of market multiples and the establishment of a control premium, among others. Forecasts of future operations are based, in part, on operating results and the Company's expectations as to future market conditions. These types of analyses contain uncertainties because they require the Company to make assumptions and to apply judgments to estimate industry economic factors and the profitability of future business strategies. However, if actual results are not consistent with the Company's estimates and assumptions, the Company may be exposed to future impairment losses that could be material.

For 2016, the Company chose to forego the qualitative assessment and performed a quantitative impairment test and, based on the results, determined that the fair values of its reporting units exceeded their carrying amounts and,

therefore, no additional analysis was required. The Company chose to perform qualitative assessments for 2015 and 2014, the results of which supported the conclusion that the fair values of the Company's reporting units were not more likely than not less than their carrying amounts and, therefore, a quantitative impairment test was not considered necessary. As a result, the Company did not record any goodwill impairment losses for 2016, 2015 or 2014.

Impairment assessment for other intangible assets. Management uses estimated future cash flows (undiscounted and excluding interest) to measure the recoverability of intangible assets with finite lives, whenever events or changes in circumstances indicate that the carrying value may not be fully recoverable. If the undiscounted cash flow analysis indicates that the carrying amount is not recoverable, an impairment loss is recorded for the excess of the carrying amount over its fair value.

Management's impairment assessment for indefinite-lived other intangible assets may involve calculating the fair value by using a discounted cash flow analysis or through a market approach valuation. If the fair value exceeds its carrying amount, the asset is not considered impaired and no additional analysis is required. However, if the carrying amount is greater than the fair value, an impairment loss is recorded equal to the excess.

Impairment of equity method investments in affiliates. The carrying value of equity method investments in affiliates is written down, or impaired, to fair value when a decline in value is considered to be other-than-temporary. In making the determination as to whether an individual investment in an affiliate is impaired, the Company assesses the current and expected financial condition of each relevant entity, including, but not limited to, the anticipated ability of the entity to make its contractually required payments to the Company (with respect to debt obligations to the Company), the results of valuation work performed with respect to the entity, the entity's anticipated ability to generate sufficient cash flows and the market conditions in the industry in which the entity is operating. The Company did not record any impairment losses related to its equity method investments for 2016 and recognized impairment losses of \$2.0 million and \$22.5 million for 2015 and 2014, respectively.

Impairment of property and equipment. Management uses estimated future cash flows (undiscounted and excluding interest) to measure the recoverability of property and equipment whenever events or changes in circumstances indicate that the carrying value may not be fully recoverable. If the undiscounted cash flow analysis indicates that the carrying amount is not recoverable, an impairment loss is recorded for the excess of the carrying amount over its fair value. Impairment losses on property and equipment, which primarily related to impairments of internally developed software, were \$5.2 million, \$10.9 million and \$1.2 million for 2016, 2015 and 2014, respectively.

Income taxes. The Company accounts for income taxes under the asset and liability method, whereby deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company evaluates the need to establish a valuation allowance for deferred tax assets based upon the amount of existing temporary differences, the period in which they are expected to be recovered and expected levels of taxable income. A valuation allowance to reduce deferred tax assets is established when it is considered more likely than not that some or all of the deferred tax assets will not be realized.

The Company recognizes the effect of income tax positions only if sustaining those positions is considered more likely than not. Changes in recognition or measurement of uncertain tax positions are reflected in the period in which a change in judgment occurs. The Company recognizes interest and penalties, if any, related to uncertain tax positions in income tax expense.

Employee benefit plans. The Company recognizes the overfunded or underfunded status of its funded defined benefit pension and unfunded supplemental benefit plans as an asset or liability on its consolidated balance sheets and recognizes changes in the funded status in the year in which changes occur, through accumulated other comprehensive loss. The funded status is measured as the difference between the fair value of plan assets and benefit obligation (the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for the other postretirement plans). Actuarial gains and losses and prior service costs and credits that have not been recognized as a component of net periodic benefit cost previously are recorded as a component of accumulated other comprehensive

loss. Plan assets and obligations are measured annually as of December 31.

31

The assumptions that have had the most significant impact to net periodic costs are the discount rate and expected long-term rate of return on plan assets. The discount rate assumption reflects the yield available on high-quality, fixed-income debt securities that match the expected timing of the benefit obligation payments. Assumptions for the expected long-term rate of return on assets of the funded defined benefit pension plans are based on future expectations for returns for each asset class based on the calculated market-related value of plan assets and the effect of periodic target asset allocation rebalancing, adjusted for the payment of reasonable expenses of the plans from plan assets. See Note 13 Employee Benefit Plans to the consolidated financial statements for discussion of the termination of the Company's funded defined benefit pension plans.

Weighted-average actuarial assumptions used to determine costs for the plans for the years ended December 31, 2016 and 2015, were as follows:

	December 31,	
	2016	2015
Funded defined benefit pension plans		
Discount rate	4.31 %	4.07 %
Rate of return on plan assets	3.50 %	6.50 %
Unfunded supplemental benefit plans		
Discount rate	4.33 %	4.00 %

Weighted-average actuarial assumptions used to determine benefit obligations for the plans at December 31, 2016 and 2015, were as follows:

	December 31,	
	2016	2015
Funded defined benefit pension plans		
Discount rate	3.85 %	4.31 %
Unfunded supplemental benefit plans		
Discount rate	4.03 %	4.33 %

Recently Adopted Accounting Pronouncements

In September 2015, the Financial Accounting Standards Board ("FASB") issued updated guidance intended to simplify the accounting for adjustments made to provisional amounts recognized in a business combination and eliminates the requirement to retrospectively account for those adjustments. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015 and applies prospectively to adjustments made to provisional amounts that occur after the effective date of this guidance with early adoption permitted for financial statements that have not been issued. The adoption of this guidance had no impact on the Company's consolidated financial statements.

In August 2015, the FASB issued updated guidance relating to the Securities and Exchange Commission Staff Announcement at the June 18, 2015 Emerging Issues Task Force meeting on the presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements. The updated guidance allows for the deferral and presentation of debt issuance costs as an asset which may be amortized ratably over the term of the line-of-credit arrangement, regardless of whether there are any related outstanding borrowings. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

In May 2015, the FASB issued updated disclosure guidance related to short-duration contracts issued by insurance entities. The updated guidance is intended to increase the transparency of significant estimates made in measuring liabilities for unpaid claims and claim adjustment expenses and to provide additional insight into an insurance entity's ability to underwrite and anticipate costs associated with claims. The updated guidance is effective for annual reporting periods beginning after December 15, 2015 and for interim periods within annual periods beginning after December 15, 2016, with early adoption permitted. Except for the disclosure requirements, the adoption of this guidance had no impact on the Company's consolidated financial statements.

In May 2015, the FASB issued updated guidance intended to eliminate the diversity in practice surrounding how investments measured at net asset value under the practical expedient with future redemption dates have been categorized in the fair value hierarchy. Under the updated guidance, investments for which fair value is measured at net asset value per share using the practical expedient should no longer be categorized in the fair value hierarchy. The updated guidance requires retrospective adoption for all periods presented and is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

In April 2015, the FASB issued updated guidance intended to clarify the accounting treatment for cloud computing arrangements that include software licenses. Under the updated guidance, if a cloud computing arrangement includes a software license, the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The Company elected to adopt the updated guidance prospectively for all arrangements entered into or materially modified after the effective date. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements. The financial statement line items impacted by the adoption of the updated guidance include other intangible assets, net and depreciation and amortization. See Note 6 Other Intangible Assets to the consolidated financial statements for further information on the Company's internal-use software licenses.

In April 2015, the FASB issued updated guidance intended to simplify, and provide consistency to, the presentation of debt issuance costs. The new standard requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the debt liability, consistent with debt discounts. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued updated guidance which changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

In June 2014, the FASB issued updated guidance intended to eliminate the diversity in practice regarding share-based payment awards that include terms which provide for a performance target that affects vesting being achieved after the requisite service period. The new standard requires that a performance target which affects vesting and could be achieved after the requisite service period be treated as a performance condition that affects vesting and should not be reflected in estimating the grant-date fair value. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

Pending Accounting Pronouncements

In November 2016, the FASB issued updated guidance intended to reduce the diversity in practice on presenting restricted cash or restricted cash equivalents in the statement of cash flows. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In October 2016, the FASB issued updated guidance to amend the consolidation guidance on how a reporting entity that is the single decision maker of a variable interest entity should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary

beneficiary of that variable interest entity. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In October 2016, the FASB issued updated guidance intended to simplify and improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory. The updated guidance, which eliminates the intra-entity transfers exception, requires entities to recognize the income tax consequences of intra-entity transfers of assets, other than inventory, when the transfers occur. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In August 2016, the FASB issued updated guidance intended to eliminate the diversity in practice regarding the presentation and classification of certain cash receipts and cash payments in the statement of cash flows. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated statements of cash flows.

In June 2016, the FASB issued updated guidance intended to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. The updated guidance replaces the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires the consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2019, with early adoption permitted. The Company is currently assessing the impact of the new guidance on its consolidated financial statements.

In March 2016, the FASB issued updated guidance intended to simplify and improve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of such awards as either equity or liabilities and classification on the statement of cash flows. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In March 2016, the FASB issued updated guidance intended to simplify the accounting treatment for investments that become qualified for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2016, with early adoption permitted. The Company expects the adoption of this guidance to have no impact on its consolidated financial statements.

In February 2016, the FASB issued updated guidance that requires the rights and obligations associated with leasing arrangements be reflected on the balance sheet in order to increase transparency and comparability among organizations. Under the updated guidance, lessees will be required to recognize a right-of-use asset and a liability to make lease payments and disclose key information about leasing arrangements. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2018, with early adoption permitted. While the Company is currently evaluating the impact the new guidance will have on its consolidated financial statements, the Company expects the adoption of the new guidance will result in a material increase in the assets and liabilities on its consolidated balance sheets and will likely have an insignificant impact on its consolidated statements of income and statements of cash flows.

In January 2016, the FASB issued updated guidance intended to enhance the reporting model for financial instruments to provide users of financial statements with more decision-useful information. In addition to making other targeted improvements to current guidance, the updated guidance also requires all equity investments, except those accounted for under the equity method of accounting or those that result in consolidation of the investee, to be measured at fair value with changes in the fair value recognized through net income. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted in certain circumstances. While the Company expects the adoption of this guidance to impact its consolidated statements of income, the materiality of the impact will depend upon the size of, and level of volatility experienced within, the Company's equity portfolio.

In May 2014, the FASB issued updated guidance for recognizing revenue from contracts with customers to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability within and across industries, and across capital markets. The new revenue standard contains principles that an entity will apply to determine the measurement of revenue and the timing of recognition. The underlying principle is that an

entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. Revenue from insurance contracts is not within the scope of this guidance. In August 2015, the FASB issued updated guidance which defers the effective date of this guidance by one year. In 2016, the FASB issued additional updates to the new guidance primarily to clarify, among other things, the implementation guidance related to principal versus agent considerations, identifying performance obligations, accounting for licenses of intellectual property, and to provide narrow-scope improvements and additional practical expedients. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption prohibited. The Company expects to adopt the new guidance under the modified retrospective approach and, based on a preliminary assessment, does not expect the new guidance to have a material impact on its consolidated financial statements.

Results of Operations

Overview

A substantial portion of the revenues for the Company's title insurance and services segment results from the sale and refinancing of residential and commercial real estate. In the Company's specialty insurance segment, revenues associated with the initial year of coverage in both the home warranty and property and casualty operations are impacted by volatility in residential purchase transactions. Traditionally, the greatest volume of real estate activity, particularly residential purchase activity, has occurred in the spring and summer months. However, changes in interest rates, as well as other changes in general economic conditions in the United States and abroad, can cause fluctuations in the traditional pattern of real estate activity.

The Company's total revenues for the year ended December 31, 2016 were \$5.6 billion, which reflected an increase of \$0.4 billion, or 7.7%, when compared with \$5.2 billion for the year ended December 31, 2015. This increase was primarily attributable to an increase in agent premiums of \$188.4 million, or 9.0%, and, to a lesser extent, an increase in direct premiums and escrow fees in the title insurance and services segment of \$74.9 million, or 3.9%, in 2016 when compared to 2015. Direct premiums and escrow fees from residential refinance and purchase transactions increased \$59.5 million and \$48.8 million, or 21.2% and 6.3%, respectively, while direct premiums and escrow fees from commercial transactions decreased \$35.7 million, or 5.1%, in 2016 when compared to 2015.

According to the Mortgage Bankers Association's February 15, 2017 Mortgage Finance Forecast (the "MBA Forecast"), residential mortgage originations in the United States (based on the total dollar value of the transactions) increased 12.6% in 2016 when compared with 2015. According to the MBA Forecast, the dollar amount of purchase originations increased 9.6% and refinance originations increased 16.1%. This higher volume of domestic residential mortgage origination activity contributed to an increase in direct premiums and escrow fees for the Company's direct title operations of 6.3% from domestic residential purchase transactions and 21.2% from domestic refinance transactions in 2016 when compared to 2015.

During 2016, the Company completed acquisitions for an aggregate purchase price of \$115.3 million and these acquisitions have been included in the Company's title insurance and services segment. These acquisitions strengthen the Company's core title and settlement business, and enhance the solutions the Company offers to its customers. In addition, the acquisitions leverage the Company's industry-leading property data to drive operational efficiencies and improve quality.

In May 2016, the Company's board of directors terminated the Company's funded defined benefit pension plans effective as of July 31, 2016. In connection with the termination, the pension plans offered an alternative lump sum distribution to certain participants. The Company recognized \$66.3 million in settlement costs within the corporate segment during the fourth quarter of 2016 related to distributions of pension plan assets totaling \$127.2 million to participants electing lump sum payments. The Company expects to complete the transfer of all remaining liabilities and administrative responsibilities related to the pension plans to one or more highly rated insurance companies by the end of the second quarter of 2017 and to recognize approximately \$154 million in net unrealized losses within the corporate segment in the first half of 2017. Once the termination process is complete, the Company estimates an annual reduction of approximately \$22 million in personnel costs related to the pension plans within the corporate segment, based on the level of these expenses for the year ended December 31, 2016. For further discussion of the pension termination including the recent and expected contribution amounts and the timing of pension termination expense to be recognized, see Note 13 Employee Benefit Plans to the consolidated financial statements.

The Company believes the purchase market will continue to strengthen in 2017 as a result of the ongoing improvement in housing and the general economy. The Company also expects the commercial market will experience a modest decline in 2017 when compared to 2016. Additionally, the recent increase in interest rates has significantly reduced the Company's refinance volumes. After peaking in July 2016 at 2,700 open orders per day, the Company's

refinance volumes have declined to approximately 1,200 open orders per day in January 2017. The Company has made and will continue to make adjustments to its cost structure in response to the lower refinance order volumes.

Edgar Filing: First American Financial Corp - Form 10-K

In addition, the Company continues to monitor developments in its regulatory environment. Currently, federal officials are discussing various potential changes to laws and regulations that could impact the Company's businesses, including changes to the Dodd-Frank Wall Street Reform and Consumer Protection Act, the reform or privatization of government-sponsored enterprises such as the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), and tax reform, including changes that could affect the mortgage interest deduction, among others. Changes in these areas, and more generally in the regulatory environment in which the Company and its customers operate, could impact the volume of mortgage originations in the United States and the Company's competitive position and results of operations. At this time, the nature and impact of any future changes is unknown.

Margins	11.7	% 10.2	% 8.7	% 1.5	% 14.7	1.5	% 17.2

Direct premiums and escrow fees increased \$74.9 million, or 3.9%, in 2016 from 2015 and \$231.4 million, or 13.6%, in 2015 from 2014. The increase in direct premiums and escrow fees in 2016 from 2015 was primarily due to an increase in domestic title orders closed by the Company's direct title operations, partially offset by a decrease in domestic average revenues per order closed. The increase in direct premiums and escrow fees in 2015 from 2014 was primarily due to an increase in the domestic average revenues per order closed and an increase in domestic title orders closed by the Company's direct operations. The domestic average revenues per order closed were \$1,931, \$2,012 and \$1,886 for 2016, 2015 and 2014, respectively. The 4.0% decrease in average revenues per order closed in 2016 from 2015 was primarily due to a shift in the mix of direct revenues generated from higher premium commercial products

to lower premium residential refinance products. The 6.7% increase in average revenues per order closed in 2015 from 2014 was primarily due to higher real estate values and a greater number of large commercial deals that closed when compared to the prior year, partially offset by an increase in the mix of direct revenues generated from lower premium residential refinance transactions. The Company's direct title operations closed 958,400, 882,400 and 816,400 domestic title orders during 2016, 2015 and 2014, respectively. The 8.6% increase in orders closed in 2016 from 2015 and the 8.1% increase in orders closed in 2015 from 2014 were generally consistent with the changes in residential mortgage origination activity in the United States as reported in the MBA Forecast.

Agent premiums increased \$188.4 million, or 9.0%, in 2016 from 2015 and \$230.9 million, or 12.4%, in 2015 from 2014. Agent premiums are recorded when notice of issuance is received from the agent, which is generally when cash payment is received by the Company. As a result, there is generally a delay between the agent's issuance of a title policy and the Company's recognition of agent premiums. Therefore, full year agent premiums typically reflect mortgage origination activity from the fourth quarter of the prior year through the third quarter of the current year. The increase in agent premiums in 2016 from 2015 was generally consistent with the 2.9% increase in the Company's direct premiums and escrow fees in the twelve months ended September 30, 2016 as compared with the twelve months ended September 30, 2015. The increase in agent premiums in 2015 from 2014 was generally consistent with the 16.9% increase in the Company's direct premiums and escrow fees in the twelve months ended September 30, 2015 as compared with the twelve months ended September 30, 2014.

Information and other revenues primarily consist of revenues generated from fees associated with title search and related reports, title and other real property records and images, other non-insured settlement services, and risk mitigation products and services. These revenues generally trend with direct premiums and escrow fees but are typically less volatile since a portion of the revenues are subscription based and do not fluctuate with transaction volumes.

Information and other revenues increased \$43.2 million, or 6.4%, in 2016 from 2015 and \$15.0 million, or 2.3%, in 2015 from 2014. Excluding the \$48.5 million impact of new acquisitions for the year ended December 31, 2016, information and other revenues decreased \$5.3 million, or 0.8%, in 2016 compared to 2015. The decrease in 2016 from 2015, adjusted for the impact of new acquisitions, was due to lower demand for the Company's default information products as a result of the decrease in domestic loss mitigation activities and lower revenue in the Company's Australian operations due to the loss of a large customer, partially offset by higher demand for the Company's title plant and data products. Excluding the \$23.2 million impact of new acquisitions for the year ended December 31, 2015, information and other revenues decreased \$8.2 million, or 1.2%, in 2015 compared to 2014. The decrease in 2015 from 2014, adjusted for the impact of new acquisitions, was due to lower demand for the Company's default information products as a result of the decrease in domestic loss mitigation activities, partially offset by higher demand for certain of the Company's non-insured services and products, which is directionally consistent with the increase in title insurance and services segment transaction volumes and revenue.

Net investment income increased \$13.2 million, or 13.6%, in 2016 from 2015 and \$37.7 million, or 63.1%, in 2015 from 2014. The increase in 2016 from 2015 was primarily attributable to higher interest income from the investment portfolio due to higher average balances in the title insurance and services segment's debt securities portfolio in 2016 when compared to 2015. The increase in 2015 from 2014 was primarily attributable to higher interest income from the investment portfolio primarily due to higher average balances in the title insurance and services segment's debt securities portfolio in 2015 when compared to 2014 and lower impairment losses related to investments accounted for using the equity method when compared to 2014. Net investment income for 2015 and 2014 included impairment losses recognized on investments accounted for using the equity method of \$2.0 million and \$22.5 million, respectively. No impairment losses were recognized on investments accounted for using the equity method in 2016.

Net realized investment gains for the title insurance and services segment totaled \$18.9 million for 2016 and were primarily from the sales of debt and equity securities. Net realized investment losses were \$7.4 million for 2015 and were primarily from the impairment of internally developed software and losses from the sales of equity securities, partially offset by gains from the sale of real estate. Net realized investment gains were \$23.9 million for 2014 and were primarily from the sales of debt and equity securities and the sale of real estate. Net realized investment gains for 2016, 2015 and 2014 included \$3.3 million, \$9.3 million and \$7.5 million, respectively, of gains from the sale of real estate, and included impairment losses of \$5.2 million, \$10.9 million and \$2.4 million, respectively, primarily related to internally developed software.

The title insurance and services segment (primarily direct operations) is labor intensive; accordingly, a major expense component is personnel costs. This expense component is affected by two primary factors: the need to monitor personnel changes to match the level of corresponding or anticipated new orders and the need to provide quality service.

Personnel costs increased \$86.4 million, or 5.8%, in 2016 from 2015 and \$153.9 million, or 11.5%, in 2015 from 2014. Excluding the \$38.1 million impact of new acquisitions for the year ended December 31, 2016, personnel costs increased \$48.3 million, or 3.2%, in 2016 compared to 2015. The increase in 2016, adjusted for the impact of new acquisitions, was primarily attributable to higher salary, incentive compensation, share based compensation, and employee benefits expense. The higher salary cost was due to an increase in average salaries and, to a lesser extent, higher average headcount. The increase in incentive compensation expense was due to higher commissions paid on higher revenues, partially offset by lower 401(k) savings plan matches. The higher share based compensation cost was due to increased restricted stock units granted to employees during the first quarter of 2016 associated with 2015

performance. The increase in employee benefits expense was primarily due to higher paid medical claims. Excluding the \$19.3 million impact of new acquisitions for the year ended December 31, 2015, personnel costs increased \$134.6 million, or 10.1%, in 2015 compared to 2014. The increase in 2015, adjusted for the impact of new acquisitions, was primarily attributable to higher incentive compensation costs, which include commissions, bonuses and 401(k) savings plan matches, due to higher revenue and profitability; higher salary expense due to higher headcount levels; and higher overtime and temporary labor costs driven by higher order volumes. Personnel costs included severance expense of \$8.3 million, \$5.6 million and \$8.9 million for 2016, 2015 and 2014, respectively.

The Company continues to closely monitor order volumes and related staffing levels and intends to adjust staffing levels as considered necessary. The Company's direct title operations opened 1,281,400, 1,261,700 and 1,155,500 domestic title orders in 2016, 2015 and 2014, respectively, representing an increase of 1.6% in 2016 from 2015 and an increase of 9.2% in 2015 from 2014.

A summary of premiums retained by agents and agent premiums is as follows:

	2016	2015	2014
	(in thousands, except percentages)		
Premiums retained by agents	\$1,801,571	\$1,656,722	\$1,472,066
Agent premiums	\$2,286,630	\$2,098,265	\$1,867,402
% retained by agents	78.8	% 79.0	% 78.8

The premium split between underwriter and agents is in accordance with the respective agency contracts and can vary from region to region due to divergences in real estate closing practices and state regulations. As a result, the percentage of title premiums retained by agents can vary due to the geographic mix of revenues from agency operations. The decrease in the percentage of title premiums retained by agents in 2016 from 2015 was primarily due to a change in the geographic mix of agency revenues towards lower agent-retention geographies. The increase in the percentage of title premiums retained by agents in 2015 from 2014 was primarily due to a change in the geographic mix of agency revenues towards higher agent-retention regions, partially offset by increased revenue from the issuance of closing protection letters since agents typically do not retain a portion of this revenue.

Other operating expenses (principally related to direct operations) increased \$19.1 million, or 2.6%, in 2016 from 2015 and \$8.8 million, or 1.2%, in 2015 from 2014. Excluding the \$14.0 million impact of new acquisitions for the year ended December 31, 2016, other operating expenses increased \$5.1 million, or 0.7%, in 2016 compared to 2015. The increase in 2016 from 2015, adjusted for the impact of new acquisitions, was primarily attributable to higher professional services expenses and higher software related expenses, partially offset by lower bad debt expense, lower foreign currency exchange losses and a recovery on an insurance claim. Excluding the \$13.1 million impact of new acquisitions for the year ended December 31, 2015, other operating expenses decreased \$4.3 million, or 0.6%, in 2015 compared to 2014. The decrease in 2015 from 2014, adjusted for the impact of new acquisitions, was primarily attributable to higher bank earnings credits and lower professional services expenses, partially offset by higher production related expenses driven by higher order volumes and increased software related expenses. The increase in bank earnings credits was driven by higher average balances invested with third-party financial institutions and higher average earnings credit rates associated with those investments in 2015 when compared to 2014.

The provision for policy losses and other claims, expressed as a percentage of title insurance premiums and escrow fees, was 5.5%, 6.6% and 7.1% for the years ended December 31, 2016, 2015 and 2014, respectively.

The current year rate of 5.5% reflects an ultimate loss rate of 4.5% for the current policy year and a \$42.6 million net increase in loss reserve estimates for prior policy years. The increase in loss reserve estimates for prior policy years was primarily attributable to potential uncertainty with respect to the Company's exposure to large title claims. A large title claim is defined as a title claim with a total ultimate loss in excess of \$2.5 million. This uncertainty is due to the following factors, among others: (i) the volatility associated with the timing and severity of large title claims, (ii) the potential of incurring one or more large title claims that significantly exceed estimated ultimate losses indicated by current historical trends, and (iii) the complexity associated with handling large title claims which makes it difficult to estimate the ultimate outcome. While the Company believes its claims reserve attributable to large title claims is reasonable, this uncertainty increases the potential for adverse loss development.

As of December 31, 2016, the IBNR claims reserve for the title insurance and services segment was \$888.1 million, which reflected management's best estimate. The Company's internal actuary determined a range of reasonable estimates of \$718.5 million to \$938.3 million. The range limits are \$169.6 million below and \$50.2 million above management's best estimate, respectively, and represent an estimate of the range of variation among reasonable estimates of the IBNR reserve. Actuarial estimates are sensitive to assumptions used in models, as well as the structures of the models themselves, and to changes in claims payment and incurral patterns, which can vary materially due to economic conditions, among other factors.

The prior year rate of 6.6% reflected an ultimate loss rate of 4.2% for policy year 2015 and a \$93.1 million net increase in loss reserve estimates for prior policy years. The increase in loss reserve estimates for prior policy years was primarily attributable to a change in methodology used by the Company's internal actuary to estimate total ultimate losses. Previously, the internal actuary's model did not separate claims experience for large title claims from normal title claims activity. With this change in methodology, the model began to separate claims experience for large title claims from normal title claims activity when developing reserve estimates. As a result, loss reserve estimates for prior policy years increased, primarily for policy years 2004 through 2007. The change in methodology was implemented due to the increased frequency of large title claims experienced over the prior several years and the volatility associated with the timing and severity of large title claims. The Company accounted for this change in methodology as a change in accounting estimate.

The 2014 rate of 7.1% reflected an ultimate loss rate of 5.3% for policy year 2014 and a net increase in loss reserve estimates for prior policy years of \$64.1 million. The increase in loss reserve estimates for prior policy years reflected claims development above expected levels during 2014, primarily from domestic commercial policies. The reserve strengthening associated with domestic commercial policies was \$41.4 million and was primarily attributable to several large commercial claims, net of anticipated recoveries, mainly from mechanics liens, and primarily related to policy years 2003, 2005 and 2007. Other factors, including a large international commercial claim from policy year 2004, also contributed to the net increase in loss reserve estimates for prior policy years.

As of December 31, 2016, the projected ultimate loss ratios for policy years 2016, 2015 and 2014 were 4.5%, 4.1% and 4.8%, respectively.

Depreciation and amortization expense increased \$12.7 million, or 15.8%, in 2016 from 2015 and \$2.5 million, or 3.3%, in 2015 from 2014. Excluding the \$2.7 million impact of new acquisitions for the year ended December 31, 2016, depreciation and amortization expense increased \$10.0 million, or 12.4%, in 2016 compared to 2015. The increase in 2016 was primarily attributable to amortization expense associated with internally developed technology and purchased software licenses. Excluding the \$2.4 million impact of new acquisitions for the year ended December 31, 2015, depreciation and amortization expense increased \$0.1 million, or 0.1%, in 2015 compared to 2014.

Insurers generally are not subject to state income or franchise taxes. However, in lieu thereof, a premium tax is imposed on certain operating revenues, as defined by statute. Tax rates and bases vary from state to state; accordingly, the total premium tax burden is dependent upon the geographical mix of operating revenues. The Company's noninsurance subsidiaries are subject to state income tax and do not pay premium tax. Accordingly, the Company's total tax burden at the state level for the title insurance and services segment is composed of a combination of premium taxes and state income taxes. Premium taxes as a percentage of title insurance premiums and escrow fees were 1.4% for the years ended December 31, 2016, 2015 and 2014.

The profit margins for the title insurance business reflect the high cost of performing the essential services required before insuring title, whereas the corresponding revenues are subject to regulatory and competitive pricing restraints. Due to this relatively high proportion of fixed costs, title insurance profit margins generally improve as closed order volumes increase. Title insurance profit margins are affected by the composition (residential or commercial) and type (resale, refinancing or new construction) of real estate activity. Title insurance profit margins are also affected by the percentage of title insurance premiums generated by agency operations. Profit margins from direct operations are generally higher than from agency operations due primarily to the large portion of the premium that is retained by the agent. The pre-tax margins were 11.7%, 10.2% and 8.7% for the years ended December 31, 2016, 2015 and 2014, respectively.

Specialty Insurance

	2016	2015	2014	2016 vs. 2015		2015 vs. 2014	
				\$ Change	% Change	\$ Change	% Change

	395,770	354,238	315,692	41,532	11.7	38,546	12.2
Income before income taxes	\$40,074	\$39,519	\$52,974	\$555	1.4	\$(13,455)	(25.4)
Margins	9.2 %	10.0 %	14.4 %	(0.8)%	(8.0)	(4.4)%	(30.6)

Direct premiums increased \$31.1 million, or 8.2%, in 2016 from 2015 and \$26.5 million, or 7.5%, in 2015 from 2014. The increases were driven by higher premiums earned in the home warranty business. The increase in 2016 from 2015 in the home warranty business was in its real estate, direct to consumer and renewal channels and was driven by an increase in the price charged for home warranty residential service contracts and an increase in the number of contracts issued. The increase in 2015 from 2014 in the home warranty business was attributable to its real estate, direct to consumer and renewal channels and was driven by an increase in the number of home warranty residential service contracts issued.

Information and other revenues increased \$7.7 million, or 242.0%, in 2016 from 2015 and \$0.9 million, or 40.7%, in 2015 from 2014. The increase in 2016 was primarily due to a change in how the Company reports installment fees related to home warranty residential service contracts. Beginning in 2016, the Company reported installment fees in information and other revenues, while prior to 2016, the Company reported installment fees as a reduction in other operating expenses. This change resulted in an increase to information and other revenues and an increase to other operating expenses of \$7.5 million in 2016 when compared to 2015.

Net investment income increased \$0.6 million, or 7.1%, in 2016 from 2015 and \$1.6 million, or 21.4%, in 2015 from 2014. The increases were primarily attributable to higher interest income from the investment portfolio due to a higher average yield and higher average balances in the specialty insurance segment's debt securities portfolio when compared to prior years.

Net realized investment gains for the specialty insurance segment totaled \$4.1 million, \$1.5 million and \$5.3 million for 2016, 2015 and 2014, respectively, and were primarily from the sales of debt and equity securities. Net realized investment gains for 2016 also included \$2.3 million of gains from the sale of real estate.

Personnel costs and other operating expenses increased \$14.9 million, or 12.9%, in 2016 from 2015 and \$7.8 million, or 7.2%, in 2015 from 2014. The increase in 2016 from 2015 was primarily related to a change in how the Company reports installment fees related to home warranty residential service contracts which is further discussed above, higher offshore labor expense related to increased customer support activities associated with the increased volume in the

home warranty business, higher advertising expense in the home warranty business, and higher salary expense due to higher average salaries. These increases were partially offset by a \$3.5 million benefit from higher deferred acquisition costs associated with the change in how the Company reports installment fees related to home warranty residential service contracts which is further discussed above. The increase in 2015 from 2014 was primarily related to higher corporate allocations for shared services support, higher offshore labor expense related to increased customer support activities associated with the increased volume in the home warranty business, and higher advertising expense in the home warranty business.

The provision for home warranty claims, expressed as a percentage of home warranty premiums, was 60.7% in 2016, 56.5% in 2015 and 53.3% in 2014. The increase in rate in 2016 from 2015 was primarily attributable to higher contract servicing costs due to an increase in the frequency of higher cost claims related to increased equipment and replacement costs and less efficient claims management. The increase in rate in 2015 from 2014 was primarily attributable to higher contract servicing costs due to an increase in the frequency of higher cost claims related to more severe weather conditions and less efficient claims management. The efficiency of claims management was adversely impacted by the increased level of claims opened in 2016 and 2015 as a result of the higher volume of home warranty residential service contracts outstanding in 2016 and 2015.

The provision for property and casualty claims, expressed as a percentage of property and casualty insurance premiums, was 63.3% in 2016, 66.4% in 2015 and 60.1% in 2014. The decrease in rate in 2016 from 2015 was primarily attributable to lower weather-related loss events when compared to the prior year. The increase in rate in 2015 from 2014 was primarily attributable to wildfires in northern California, hail storms in New Mexico, and an increase in the severity of claims, partially offset by a decrease in the frequency of claims.

Premium taxes as a percentage of specialty insurance segment premiums were 1.7% in 2016, 1.8% in 2015 and 1.7% in 2014.

A large part of the revenues for the specialty insurance businesses are generated by renewals and are not dependent on the level of real estate activity in the year of renewal. With the exception of loss expense, the majority of the expenses for this segment are variable in nature and therefore generally fluctuate consistent with revenue fluctuations. Accordingly, profit margins for this segment (before loss expense) are relatively constant, although as a result of some fixed expenses, profit margins (before loss expense) should nominally improve as premium revenues increase. Pre-tax margins were 9.2%, 10.0% and 14.4% for 2016, 2015 and 2014, respectively.

Corporate

	2016	2015	2014	2016 vs. 2015		2015 vs. 2014	
				\$ Change	% Change	\$ Change	% Change
	(in thousands, except percentages)

Other operating expenses	26,867	25,976	26,528	891	3.4	(552)	(2.1)
Depreciation and amortization	385	462	2,799	(77)	(16.7)	(2,337)	(83.5)
Interest	29,403	27,014	17,981	2,389	8.8	9,033	50.2
	167,311	90,753	81,853	76,558	84.4	8,900	10.9
Loss before income taxes	\$(161,365)	\$(96,708)	\$(75,438)	\$(64,657)	(66.9)	\$(21,270)	(28.2)

Net investment income totaled \$5.9 million in 2016, a loss of \$5.4 million in 2015 and income of \$5.5 million in 2014. The change in net investment income for all three years is primarily attributable to fluctuations in earnings on investments associated with the Company's deferred compensation plan. Net investment losses for 2015 were impacted by a one-time non-cash charge of \$4.0 million, recorded during the first quarter of 2015, related to the investments associated with the Company's deferred compensation plan.

Corporate personnel costs and other operating expenses were \$137.5 million, \$63.3 million and \$61.1 million in 2016, 2015 and 2014, respectively. The increase in 2016 was primarily attributable to a \$66.3 million settlement expense recorded in the fourth quarter of 2016 related to the termination of the Company's funded defined benefit pension plans. For further discussion of the pension termination including the recent and expected contribution amounts and the timing of pension termination expense to be recognized, see Note 13 Employee Benefit Plans to the consolidated financial statements. The increase in 2016 was also attributable to increased expense related to the Company's deferred compensation plan and, to a lesser extent, higher professional services expense related to the pension termination and higher allocations from the title insurance and services segment for certain corporate services. The increase for 2015 was primarily attributable to increased expense related to the Company's defined benefit pension and supplemental benefit plans, partially offset by decreased expense related to the Company's deferred compensation plan.

Depreciation and amortization expense was \$0.4 million, \$0.5 million and \$2.8 million in 2016, 2015 and 2014, respectively. The decrease in 2015 was due to a noncompete asset that was fully amortized during 2014.

Interest expense increased \$2.4 million in 2016 from 2015 and \$9.0 million in 2015 from 2014. Interest expense increased in 2016 primarily due to a change in how the Company reports amortization of deferred debt issuance costs. Beginning in 2016, the Company reported amortization of deferred debt issuance costs in interest expense, while prior to 2016, the Company reported amortization of deferred debt issuance costs in other operating expenses. This change resulted in an increase in interest expense and a decrease in other operating expenses of \$2.0 million in 2016 when compared to 2015. Interest expense also increased due to the Company borrowing \$160.0 million under its credit facility during September 2016. Interest expense increased in 2015 primarily due to the Company's issuance of \$300.0 million of debt in November 2014. Interest expense related to an intercompany note payable to the title insurance segment was \$0.4 million and \$1.5 million for the years ended December 31, 2015 and 2014, respectively. The intercompany note payable was settled during 2015.

Eliminations

Eliminations primarily represent interest income and related interest expense associated with intercompany notes between the Company's segments, which are eliminated in the consolidated financial statements. The Company's inter-segment eliminations were not material for the years ended December 31, 2016, 2015 and 2014.

Income Taxes

Income taxes differ from the amounts computed by applying the federal income tax rate of 35.0%. A reconciliation of this difference is as follows:

	Year ended December 31,					
	2016		2015		2014	
	(in thousands, except percentages)					
Taxes calculated at federal rate	\$167,153	35.0%	\$151,468	35.0%	\$122,696	35.0%
State taxes, net of federal benefit	3,703	0.8	4,581	1.1	2,891	0.8
Change in liability for tax positions	(10,512)	(2.2)	1,094	0.3	412	0.1

	\$134,105	28.1%	\$143,895	33.3%	\$116,345	33.2%

The Company's effective income tax rates (income tax expense as a percentage of income before income taxes) were 28.1% for 2016, 33.3% for 2015 and 33.2% for 2014. The differences in the effective tax rates are typically due to changes in state and foreign income taxes resulting from fluctuations in the Company's noninsurance and foreign subsidiaries' contribution to pretax income and changes in the ratio of permanent differences to income before income taxes. In addition, the 2016 rate reflects the resolution of certain tax authority examinations and tax credits claimed in current and prior years. The 2015 rate includes a benefit for the release of valuation allowances previously provided against certain foreign net operating losses and other deferred tax assets. The 2014 rate reflects non-recurring tax benefits resulting from certain adjustments to the Company's state and non-U.S. tax accounts.

Net Income and Net Income Attributable to the Company

Net income and per share information are summarized as follows:

	Year ended December 31,		
	2016	2015	2014
	(in thousands, except per share amounts)		
Net income attributable to the Company	\$ 342,993	\$ 288,086	\$ 233,534
Net income per share attributable to the Company's stockholders:			
Basic	\$ 3.10	\$ 2.65	\$ 2.18
Diluted	\$ 3.09	\$ 2.62	\$ 2.15
Weighted-average common shares outstanding:			
Basic	110,548	108,427	106,884
Diluted	111,156	109,826	108,688

See Note 12 Earnings Per Share to the consolidated financial statements for further discussion of earnings per share.

Liquidity and Capital Resources

Cash requirements. The Company generates cash primarily from the sale of its products and services and investment income. The Company's current cash requirements include operating expenses, taxes, payments of principal and interest on its debt, capital expenditures and dividends on its common stock, and may include business acquisitions and repurchases of its common stock. Additionally, in May 2016, the Company's board of directors terminated the Company's funded defined benefit pension plans effective as of July 31, 2016. In connection with the termination, to sufficiently fund the pension plans, the Company made additional cash contributions above scheduled amounts in 2016 of \$84.8 million and expects to make an additional cash contribution of approximately \$23 million in the first half of 2017. The Company also expects to pay other termination related expenses. For further discussion of the pension termination and expected additional cash contributions, see Note 13 Employee Benefit Plans to the consolidated financial statements. Management forecasts the cash needs of the holding company and its primary subsidiaries and regularly reviews their short-term and long-term projected sources and uses of funds, as well as the asset, liability, investment and cash flow assumptions underlying such forecasts. Due to the Company's ability to generate cash flows from operations, its liquid-asset position and amounts available on its revolving credit facility, management believes that its resources are sufficient to satisfy its anticipated operational cash requirements and obligations for at least the next twelve months.

The substantial majority of the Company's business is dependent upon activity in the real estate and mortgage markets, which are cyclical and seasonal. Periods of increasing interest rates and reduced mortgage financing availability generally have an adverse effect on residential real estate activity and therefore typically decrease the Company's revenues. In contrast, periods of declining interest rates and increased mortgage financing availability generally have a positive effect on residential real estate activity, which typically increases the Company's revenues. Residential purchase activity is typically slower in the winter months with increased volumes in the spring and summer months. Residential refinance activity is typically more volatile than purchase activity and is highly impacted by changes in interest rates. Commercial real estate volumes are less sensitive to changes in interest rates, but fluctuate based on local supply and demand conditions for space and mortgage financing availability.

Cash provided by operating activities amounted to \$489.4 million, \$551.3 million and \$360.6 million for the years ended December 31, 2016, 2015 and 2014, respectively, after claim payments, net of recoveries, of \$463.0 million, \$476.5 million and \$469.8 million, respectively. The principal nonoperating uses of cash and cash equivalents for the year ended December 31, 2016 were purchases of debt and equity securities, capital expenditures, dividends to common stockholders and business acquisitions. The principal nonoperating uses of cash and cash equivalents for the year ended December 31, 2015 were purchases of debt and equity securities, capital expenditures and dividends to common stockholders. The principal nonoperating uses of cash and cash equivalents for the year ended December 31, 2014 were purchases of debt and equity securities, repayment of debt, business acquisitions, capital expenditures and dividends to common stockholders. The most significant nonoperating sources of cash and cash equivalents for the year ended December 31, 2016 were proceeds from the sales and maturities of debt and equity securities, increases in the deposit balances at the Company's banking operations and net proceeds from the issuance of debt. The most significant nonoperating sources of cash and cash equivalents for the year ended December 31, 2015 were proceeds from the sales and maturities of debt and equity securities and increases in the deposit balances at the Company's banking operations. The most significant nonoperating sources of cash and cash equivalents for the year ended December 31, 2014 were proceeds from the sales and maturities of debt and equity securities, increases in the deposit balances at the Company's banking operations, proceeds from the issuance of debt and paydowns and net proceeds related to the sale of loans receivable. The net effect of all activities on total cash and cash equivalents was a decrease of \$21.2 million, a decrease of \$162.8 million, and an increase of \$355.2 million for the years ended December 31, 2016, 2015 and 2014, respectively.

The Company continually assesses its capital allocation strategy, including decisions relating to dividends, stock repurchases, capital expenditures, acquisitions and investments. In August 2016, the Company's board of directors approved an increase in the Company's quarterly cash dividend to 34 cents per common share, representing a 31%

increase from the prior level of 26 cents per common share. The dividend increase became effective beginning with the September 2016 dividend. In January 2017, the Company's board of directors approved a first quarter cash dividend of 34 cents per common share. Management expects that the Company will continue to pay quarterly cash dividends at or above the current level. The timing, declaration and payment of future dividends, however, falls within the discretion of the Company's board of directors and will depend upon many factors, including the Company's financial condition and earnings, the capital requirements of the Company's businesses, restrictions imposed by applicable law and any other factors the board of directors deems relevant from time to time.

In March 2014, the Company's board of directors approved an increase in the size of the Company's stock repurchase plan from \$150.0 million to \$250.0 million, of which \$182.4 million remained as of December 31, 2016. Purchases may be made from time to time by the Company in the open market at prevailing market prices or in privately negotiated transactions. During the year ended December 31, 2016, the Company repurchased and retired 14 thousand shares of its common stock for a total purchase price of \$454 thousand and, as of December 31, 2016, had repurchased and retired 3.2 million shares of its common stock under the current authorization for a total purchase price of \$67.6 million.

Holding company. First American Financial Corporation is a holding company that conducts all of its operations through its subsidiaries. The holding company's current cash requirements include payments of principal and interest on its debt, taxes, payments in connection with employee benefit plans, dividends on its common stock and other expenses. The holding company is dependent upon dividends and other payments from its operating subsidiaries to meet its cash requirements. The Company's target is to maintain a cash balance at the holding company equal to at least twelve months of estimated cash requirements. At certain points in time, the actual cash balance at the holding company may vary from this target due to, among other factors, the timing and amount of cash payments made and dividend payments received. Pursuant to insurance and other regulations under which the Company's insurance subsidiaries operate, the amount of dividends, loans and advances available to the holding company is limited, principally for the protection of policyholders. As of December 31, 2016, under such regulations, the maximum amount of dividends, loans and advances available to the holding company from its insurance subsidiaries in 2017, without prior approval from applicable regulators, was \$761.8 million. However, the timing and amount of dividends paid by the Company's insurance subsidiaries to the holding company falls within the discretion of each insurance subsidiary's board of directors and will depend upon many factors, including the level of total statutory capital and surplus required to support minimum financial strength ratings by certain rating agencies. Such restrictions have not had, nor are they expected to have, an impact on the holding company's ability to meet its cash obligations.

As of December 31, 2016, the holding company's sources of liquidity included \$221.5 million of cash and cash equivalents and \$540.0 million available on the Company's revolving credit facility. Management believes that liquidity at the holding company is sufficient to satisfy anticipated cash requirements and obligations for at least the next twelve months.

Financing. The Company maintains a credit agreement with JPMorgan Chase Bank, N.A. in its capacity as administrative agent and the lenders party thereto. The credit agreement is comprised of a \$700.0 million revolving credit facility. Unless terminated earlier, the revolving loan commitments under the credit agreement will terminate on May 14, 2019. The obligations of the Company under the credit agreement are neither secured nor guaranteed. Proceeds under the credit agreement may be used for general corporate purposes.

In September 2016, the Company borrowed \$160.0 million under the credit facility to fund acquisitions and to partially fund its obligation in connection with the termination of its funded defined benefit pension plans. At December 31, 2016, outstanding borrowings under the facility totaled \$160.0 million at an interest rate of 2.52%. See Note 20 Business Combinations to the consolidated financial statements for further discussion of the Company's acquisitions, and see Note 13 Employee Benefit Plans to the consolidated financial statements for further discussion of the Company's pension termination.

The credit agreement includes an expansion option that permits the Company, subject to satisfaction of certain conditions, to increase the revolving commitments and/or add term loan tranches ("Incremental Term Loans") in an aggregate amount not to exceed \$150.0 million. Incremental Term Loans, if made, may not mature prior to the revolving commitment termination date, provided that amortization may occur prior to such date.

At the Company's election, borrowings under the credit agreement bear interest at (a) the Alternate Base Rate plus the applicable spread or (b) the Adjusted LIBOR rate plus the applicable spread (in each case as defined in the agreement). The Company may select interest periods of one, two, three or six months or (if agreed to by all lenders)

such other number of months for Eurodollar borrowings of loans. The applicable spread varies depending upon the debt rating assigned by Moody's Investor Service, Inc. ("Moody's") and/or Standard & Poor's Rating Services ("S&P"). The minimum applicable spread for Alternate Base Rate borrowings is 0.625% and the maximum is 1.00%. The minimum applicable spread for Adjusted LIBOR rate borrowings is 1.625% and the maximum is 2.00%. The rate of interest on Incremental Term Loans will be established at or about the time such loans are made and may differ from the rate of interest on revolving loans.

The credit agreement includes representations and warranties, reporting covenants, affirmative covenants, negative covenants, financial covenants and events of default customary for financings of this type. Upon the occurrence of an event of default the lenders may accelerate the loans. Upon the occurrence of certain insolvency and bankruptcy events of default the loans will automatically accelerate. As of December 31, 2016, the Company was in compliance with the financial covenants under the credit agreement.

In addition to amounts available under its credit facility, certain subsidiaries of the Company are parties to master repurchase agreements which are used as part of the Company's liquidity management activities and to support its risk management activities. In particular, securities loaned or sold under repurchase agreements may be used as short-term funding sources. During 2016, the Company financed securities for funds received totaling \$39.2 million under these agreements. As of December 31, 2016, no amounts remained outstanding under these agreements.

Notes and contracts payable as a percentage of total capitalization was 19.6% and 17.4% at December 31, 2016 and 2015, respectively. Notes and contracts payable are further described in Note 9 Notes and Contracts Payable to the consolidated financial statements.

Investment portfolio. The Company maintains a high quality, liquid investment portfolio that is primarily held at its insurance and banking subsidiaries. As of December 31, 2016, 92% of the Company's investment portfolio consisted of fixed income securities, of which 60% were United States government-backed or rated AAA and 94% were rated or classified as investment grade. Percentages are based on the estimated fair values of the securities. Credit ratings reflect published ratings obtained from S&P, DBRS, Inc., Fitch Ratings, Inc. and Moody's. If a security was rated differently among the rating agencies, the lowest rating was selected. For further information on the credit quality of the Company's investment portfolio at December 31, 2016, see Note 3 Debt and Equity Securities to the consolidated financial statements.

In addition to its debt and equity investment securities portfolio, the Company maintains certain money-market and other short-term investments.

Capital expenditures. Capital expenditures primarily consist of software development costs, additions to property and equipment, additions to title plants and purchases of real estate data. Capital expenditures were \$132.3 million, \$127.6 million and \$99.4 million for the years ended December 31, 2016, 2015 and 2014, respectively. The increase in 2016 from 2015 primarily related to the Company's adoption of the change in accounting treatment for internal-use software licenses in 2016, partially offset by lower spending in property and equipment, software, title plants, and real estate data. The increase in 2015 from 2014 primarily reflected increased spending in 2015 on software, real estate data, title plants and property and equipment. The increase in software in 2015 was mainly driven by the Company's effort to comply with the Consumer Financial Protection Bureau's TILA-RESPA integrated disclosure rule.

Contractual obligations. A summary of the Company's contractual obligations at December 31, 2016, by due date, is as follows:

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(in thousands)				
Notes and contracts payable	\$736,693	\$4,855	\$168,022	\$6,769	\$557,047
Interest on notes and contracts payable	178,076	26,048	51,283	50,402	50,343
Operating leases	328,797	80,700	118,818	69,296	59,983
Deposits	2,779,478	2,779,478	—	—	—
Claim losses	1,025,863	251,329	227,216	154,549	392,769
Pension and supplemental benefit plans	450,271	38,494	29,678	30,626	351,473

\$5,499,178 \$3,180,904 \$595,017 \$311,642 \$1,411,615

The timing of claim payments is estimated and is not set contractually. Nonetheless, based on historical claims experience, the Company anticipates the above payment patterns. Changes in future claim settlement patterns, judicial decisions, legislation, economic conditions and other factors could affect the timing and amount of actual claim payments. The timing and amount of payments in connection with pension and supplemental benefit plans are based on the Company's current estimates and require the use of significant assumptions. Changes in significant assumptions could affect the amount and timing of pension and supplemental benefit plan payments. See Note 13 Employee Benefit Plans to the consolidated financial statements for additional discussion of management's significant assumptions. The Company is not able to reasonably estimate the timing of payments, or the amount by which the liability for the Company's uncertain tax positions will increase or decrease over time; therefore the liability of \$18.1 million has not been included in the contractual obligations table. See Note 11 Income Taxes to the consolidated financial statements for additional discussion of the Company's liability for uncertain tax positions.

Off-balance sheet arrangements. The Company administers escrow deposits and trust assets as a service to its customers. Escrow deposits totaled \$6.8 billion and \$6.6 billion at December 31, 2016 and 2015, respectively, of which \$2.6 billion was held at the Company's federal savings bank subsidiary, First American Trust, FSB. The escrow deposits held at First American Trust, FSB are temporarily invested in cash and cash equivalents and debt securities, with offsetting liabilities included in deposits in the accompanying consolidated balance sheets. The remaining escrow deposits were held at third-party financial institutions.

Trust assets held or managed by First American Trust, FSB totaled \$3.2 billion and \$3.0 billion at December 31, 2016 and 2015, respectively. Escrow deposits held at third-party financial institutions and trust assets are not considered assets of the Company and, therefore, are not included in the accompanying consolidated balance sheets. However, the Company could be held contingently liable for the disposition of these assets.

In conducting its operations, the Company often holds customers' assets in escrow, pending completion of real estate transactions and, as a result, the Company has ongoing programs for realizing economic benefits with various financial institutions. The results from these programs are included in the consolidated financial statements as income or a reduction in expense, as appropriate, based on the nature of the arrangement and benefit received.

The Company facilitates tax-deferred property exchanges for customers pursuant to Section 1031 of the Internal Revenue Code and tax-deferred reverse exchanges pursuant to Revenue Procedure 2000-37. As a facilitator and intermediary, the Company holds the proceeds from sales transactions and takes temporary title to property identified by the customer to be acquired with such proceeds. Upon the completion of each such exchange, the identified property is transferred to the customer or, if the exchange does not take place, an amount equal to the sales proceeds or, in the case of a reverse exchange, title to the property held by the Company is transferred to the customer. Like-kind exchange funds held by the Company totaled \$2.0 billion and \$2.8 billion at December 31, 2016 and 2015, respectively. The like-kind exchange deposits are held at third-party financial institutions and, due to the structure utilized to facilitate these transactions, the proceeds and property are not considered assets of the Company and, therefore, are not included in the accompanying consolidated balance sheets. All such amounts are placed in deposit accounts insured, up to applicable limits, by the Federal Deposit Insurance Corporation. The Company could be held contingently liable to the customer for the transfers of property, disbursements of proceeds and the returns on such proceeds.

At December 31, 2016 and 2015, the Company was contingently liable for guarantees of indebtedness owed by affiliates and third parties to banks and others totaling \$7.1 million and \$8.2 million, respectively. The guarantee arrangements relate to promissory notes and other contracts that contingently require the Company to make payments to the guaranteed party upon the failure of debtors to make scheduled payments according to the terms of the notes and contracts. The Company's maximum potential obligation under these guarantees totaled \$7.1 million and \$8.2 million at December 31, 2016 and 2015, respectively, and is limited in duration to the terms of the underlying indebtedness. The Company has not incurred any costs as a result of these guarantees and has not recorded a liability on its consolidated balance sheets related to these guarantees at December 31, 2016 and 2015.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The Company's assets and liabilities include financial instruments subject to the risk of loss from adverse changes in market rates and prices. The Company's primary market risk exposures relate to interest rate risk, equity price risk, foreign currency risk and credit risk.

The Company manages its primary market risk exposures through an investment committee made up of certain senior executives which is advised by an experienced investment management staff.

While the hypothetical scenarios below are considered to be near-term reasonably possible changes demonstrating potential risk, they are for illustrative purposes only and do not reflect the Company's expectations about future market changes.

Interest Rate Risk

The Company monitors its risk associated with fluctuations in interest rates and makes investment decisions to manage accordingly. The Company does not currently use derivative financial instruments in any material amount to hedge these risks.

The Company's exposure to interest rate changes primarily results from the Company's significant portfolio of fixed income securities and from its financing activities. In general, the fair value of fixed income securities increases or decreases inversely with changes in market interest rates. The Company also considers its investments in preferred stock to be exposed to interest rate risk. The fair values of the Company's fixed income portfolio at December 31, 2016 and 2015 were \$4.6 billion and \$4.3 billion, respectively. One means of assessing the exposure of the Company's fixed income portfolio to interest rate changes is a duration-based analysis that measures the potential changes in fair value resulting from a hypothetical parallel and instantaneous shift in interest rates across all maturities. Under this model, with all other factors held constant, the Company estimates that increases in interest rates of 100 and 200 basis points could cause the fair value of its fixed income portfolio (including investments in preferred stock) at December 31, 2016 to decrease by approximately \$109.0 million, or 2.4%, and \$272.0 million, or 5.9%, respectively, and at December 31, 2015 to decrease by approximately \$150.0 million, or 3.5%, and \$292.0 million, or 6.8%, respectively.

With respect to floating rate debt, the Company is primarily exposed to the effects of changes in prevailing interest rates through its variable rate credit facility and its interest bearing escrow deposit liabilities. As of December 31, 2016, the Company had \$160.0 million outstanding under its credit facility. As of December 31, 2015, the Company had no outstanding borrowings under its credit facility. Assuming the full utilization of available funds under the facility of \$700.0 million at December 31, 2016 and 2015, and assuming that the borrowings were outstanding for the entire year, increases of 50 and 100 basis points in the prevailing interest rate on the Company's credit facility would result in increases in interest expense of \$2.7 million and \$5.4 million for 2016, and \$3.5 million and \$7.0 million for 2015, respectively.

The Company's interest bearing escrow deposit liabilities totaled \$2.0 billion and \$2.1 billion at December 31, 2016 and 2015, respectively. These variable rate customer savings accounts are subject to market rate fluctuations. The weighted average interest rate for 2016 and 2015 was 0.10%. Assuming increases in interest rates of 25 and 50 basis points and the deposit amounts at December 31, 2016 and 2015 are held constant for the entire year, interest expense for 2016 would be higher by \$4.9 million and \$9.8 million, respectively, and 2015 would be higher by \$5.2 million and \$10.4 million, respectively.

Equity Price Risk

The Company is also subject to equity price risk related to its equity securities portfolio. The fair value of the Company's equity securities portfolio (excluding preferred stock of \$15.6 million) was \$388.5 million and \$305.8 million as of December 31, 2016 and 2015, respectively. Assuming broad-based declines in equity market prices of 10% and 20%, with all other factors constant, the fair value of the Company's equity securities at December 31, 2016 could decrease by \$38.9 million and \$77.7 million, respectively, and at December 31, 2015 could decrease by \$30.6 million and \$61.2 million, respectively.

Foreign Currency Risk

Although the Company has exchange rate risk for its operations in certain foreign countries, this risk is not material to the Company's financial condition or results of operations. The Company does not currently use derivative financial instruments in any material amount to hedge its foreign exchange risk.

Credit Risk

The Company's debt securities portfolio is subject to credit risk. The Company manages its credit risk through actively monitoring issuer financial reports, credit spreads, security pricing and credit rating migration. Further, diversification and concentration limits by asset type and credit rating are established and monitored by the Company's investment committee.

The Company holds a large concentration in U.S. government agency securities, including agency mortgage-backed securities. In the event of discontinued U.S. government support of its federal agencies, material credit risk could be observed in the portfolio. The Company views that scenario as unlikely but possible. The federal government currently is considering various alternatives to reform the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). The nature and timing of the reforms is unknown, however, the federal government reiterated its commitment to ensuring that Fannie Mae and Freddie Mac have sufficient capital to perform under any guarantees issued now, or in the future, and the ability to meet any of their debt obligations.

The Company's overall investment securities portfolio maintains an average credit quality of AA. For further information on the credit quality of the Company's investment portfolio at December 31, 2016, see Note 3 Debt and Equity Securities to the consolidated financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of

First American Financial Corporation:

In our opinion, the consolidated financial statements listed in the accompanying index, present fairly, in all material respects, the financial position of First American Financial Corporation and its subsidiaries at December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the accompanying index present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. Basis of Presentation and Significant Accounting Policies:

First American Financial Corporation (the “Company”), through its subsidiaries, is engaged in the business of providing financial services. The Company consists of the following reportable segments and a corporate function:

•The Company’s title insurance and services segment issues title insurance policies on residential and commercial property in the United States and offers similar or related products and services internationally. This segment also provides closing and/or escrow services; accommodates tax-deferred exchanges of real estate; provides products, services and solutions involving the use of real property related data designed to mitigate risk or otherwise facilitate real estate transactions; maintains, manages and provides access to title plant records and images; provides evidence of title; and provides banking, trust, document custodial and investment advisory services. The Company, through its principal title insurance subsidiary and such subsidiary’s affiliates, transacts its title insurance business through a network of direct operations and agents. Through this network, the Company issues policies in the 49 states that permit the issuance of title insurance policies and the District of Columbia. The Company also offers title insurance and other insurance and guarantee products, as well as related settlement services in foreign countries, including Canada, the United Kingdom, Australia, South Korea and various other established and emerging markets.

•The Company’s specialty insurance segment issues property and casualty insurance policies and sells home warranty products. The property and casualty insurance business provides insurance coverage to residential homeowners and renters for liability losses and typical hazards such as fire, theft, vandalism and other types of property damage. This business is licensed to issue policies in all 50 states and the District of Columbia and actively issues policies in 47 states. The majority of policy liability is in the western United States, including approximately 63% in California. In certain markets it also offers preferred risk auto insurance to better compete with other carriers offering bundled home and auto insurance. The home warranty business provides residential service contracts that cover residential systems, such as heating and air conditioning systems, and certain appliances against failures that occur as the result of normal usage during the coverage period. This business currently operates in 39 states and the District of Columbia.

The corporate function consists primarily of certain financing facilities as well as the corporate services that support the Company’s business operations.

Principles of Consolidation

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles (“GAAP”) and reflect the consolidated operations of the Company. The consolidated financial statements include the accounts of First American Financial Corporation and all controlled subsidiaries. All significant intercompany transactions and balances have been eliminated. Investments in affiliates in which the Company exercises significant influence, but does not control and is not the primary beneficiary, are accounted for using the equity method. Investments in affiliates in which the Company does not exercise significant influence over the investee are accounted for under the cost method.

Reclassifications, revisions and out-of-period adjustments

During the fourth quarter of 2016, the Company identified certain title plant assets that were no longer being used and should have been previously written off, and certain capitalized software, title plant imaging, real estate data and investments related to title plant assets that were misclassified as title plant assets. As these errors primarily related to reporting periods prior to the Company's June 2010 spin-off from its prior parent, which subsequently assumed the name CoreLogic, Inc. ("CoreLogic"), the Company corrected for these errors by revising retained earnings at December 31, 2013, 2014 and 2015 in the consolidated statements of equity, and revising title plants and other indexes, other investments, deferred income tax liabilities and retained earnings in the consolidated balance sheet at December 31, 2015. The impact of this revision, which has been consistently applied to all periods presented, included decreases to retained earnings, title plants and other indexes and deferred income tax liabilities of \$8.5 million, \$18.8 million and \$5.1 million, respectively, and an increase to other investments of \$5.2 million.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

During 2015, the Company reclassified certain revenues and expenses related to closing protection letters and temporary labor costs and made comparable reclassifications to its consolidated statement of income for the year ended December 31, 2014. The impact to the Company's title insurance and services segment for the year ended December 31, 2014 included a decrease to direct premiums and escrow fees and an increase to agent premiums of \$25.8 million, increases to personnel costs and premiums retained by agents of \$23.9 million and \$1.2 million, respectively, and a decrease to other operating expenses of \$25.1 million. The impact to the Company's specialty insurance segment included an increase to personnel costs and a decrease to other operating expenses of \$1.0 million for the year ended December 31, 2014.

Also during 2015, the Company identified certain non-risk based revenues included within direct premiums and escrow fees that should have been reflected in information and other. The Company corrected for this error by revising direct premiums and escrow fees and information and other in the consolidated statement of income for the year ended December 31, 2014. The impact of the revision to the Company's title insurance and services segment included a decrease to direct premiums and escrow fees and an increase to information and other of \$37.2 million for the year ended December 31, 2014.

During 2014, the Company identified and recorded adjustments to correct for certain errors in foreign currency translation and transactions in prior periods. These adjustments resulted in an increase to other operating expenses of \$5.0 million.

The Company does not consider these adjustments to be material, individually or in the aggregate, to any previously issued consolidated financial statements.

Use of estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the statements. Actual results could differ from the estimates and assumptions used.

Cash equivalents

The Company considers cash equivalents to be all short-term investments that have an initial maturity of 90 days or less and are not restricted for statutory deposit or premium reserve requirements.

Accounts and accrued income receivable

Accounts and accrued income receivable are generally due within thirty days and are recorded net of an allowance for doubtful accounts. The Company considers accounts outstanding longer than the contractual payment terms as past due. The Company determines the allowance by considering a number of factors, including the length of time trade accounts receivable are past due, previous loss history, a specific customer's ability to pay its obligations to the Company and the condition of the general economy and industry as a whole. Amounts are charged off in the period in which they are deemed to be uncollectible.

Investments

Deposits with banks

Deposits with banks are short-term investments with initial maturities of generally more than 90 days.

Debt and equity securities

Debt securities are carried at fair value and consist primarily of investments in obligations of the United States Treasury, foreign governments, various U.S. and foreign corporations, certain state and political subdivisions and mortgage-backed securities.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company maintains investments in debt securities in accordance with certain statutory requirements for the funding of statutory premium reserves and state deposits. At December 31, 2016 and 2015, the fair value of such investments totaled \$110.6 million and \$122.4 million, respectively. See Note 2 Statutory Restrictions on Investments and Stockholders' Equity for additional discussion of the Company's statutory restrictions.

Equity securities are carried at fair value and consist primarily of investments in exchange traded funds, mutual funds and marketable common and preferred stocks of corporate entities.

The Company classifies its publicly traded debt and equity securities as available-for-sale with unrealized gains or losses recorded as a component of accumulated other comprehensive loss. See Note 14 Fair Value Measurements for additional discussion of the determination of fair value. Interest income, as well as the related amortization of premium and accretion of discount, on debt securities is recognized under the effective yield method and included in the accompanying consolidated statements of income in net investment income. Realized gains and losses on sales of debt and equity securities are determined on a first-in, first-out basis.

The Company evaluates its debt and equity securities with unrealized losses on a quarterly basis for potential other-than-temporary impairments in value.

If the Company intends to sell a debt security in an unrealized loss position or determines that it is more likely than not that the Company will be required to sell a debt security before it recovers its amortized cost basis, the debt security is other-than-temporarily impaired and it is written down to fair value with all losses recognized in earnings. As of December 31, 2016, the Company did not intend to sell any debt securities in an unrealized loss position and it is not more likely than not that the Company will be required to sell debt securities before recovery of their amortized cost basis.

If the Company does not expect to recover the amortized cost basis of a debt security with declines in fair value (even if the Company does not intend to sell the debt security and it is not more likely than not that the Company will be required to sell the debt security), the losses the Company considers to be the credit portion of the other-than-temporary impairment loss ("credit loss") is recognized in earnings and the non-credit portion is recognized in other comprehensive income. The credit loss is the difference between the present value of the cash flows expected to be collected and the amortized cost basis of the debt security. The cash flows expected to be collected are discounted at the rate implicit in the security immediately prior to the recognition of the other-than-temporary impairment.

Expected future cash flows for debt securities are based on qualitative and quantitative factors specific to each security, including the probability of default and the estimated timing and amount of recovery. The detailed inputs used to project expected future cash flows may be different depending on the nature of the individual debt security.

As a result of the Company's security-level review, the Company recognized \$0.5 million, \$2.2 million and \$1.7 million of other-than-temporary impairment losses considered to be credit related on its debt securities for the years ended December 31, 2016, 2015, and 2014, respectively. It is possible that the Company could recognize additional other-than-temporary impairment losses on securities it owns at December 31, 2016 if future events or information cause it to determine that a decline in fair value is other-than-temporary.

When a decline in the fair value of an equity security, including common and preferred stock, is considered to be other-than-temporary, such security is written down to its fair value. When assessing if a decline in fair value is other-than-temporary, the factors considered include the length of time and extent to which fair value has been below cost, the probability that the Company will be unable to collect all amounts due under the contractual terms of the security, the seniority of the securities, issuer-specific news and other developments, the financial condition and prospects of the issuer (including credit ratings), macro-economic changes (including the outlook for industry sectors, which includes government policy initiatives) and the Company's ability and intent to hold the security for a period of time sufficient to allow for any anticipated recovery.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

When an equity security has been in an unrealized loss position and its fair value is less than 80% of cost for twelve consecutive months, the Company's review of the security includes the above noted factors as well as other evidence that might exist supporting the view that the security will recover its value in the foreseeable future. If objective, substantial evidence does not indicate a likely recovery during that timeframe, the Company's policy is that such losses are considered other-than-temporary and therefore an impairment loss is recorded. The Company did not record other-than-temporary impairment losses related to its equity securities for the years ended December 31, 2016, 2015 and 2014.

Other investments

Other investments consist primarily of investments in affiliates, which are accounted for under either the equity method or the cost method of accounting, investments in real estate and notes receivable.

The carrying value of investments in affiliates is written down, or impaired, to fair value when a decline in value is considered to be other-than-temporary. In making the determination as to whether an individual investment in an affiliate is impaired, the Company assesses the current and expected financial condition of each relevant entity, including, but not limited to, the anticipated ability of the entity to make its contractually required payments to the Company (with respect to debt obligations to the Company), the results of valuation work performed with respect to the entity, the entity's anticipated ability to generate sufficient cash flows and the market conditions in the industry in which the entity is operating. The Company did not record any impairment losses related to its equity method investments for 2016 and recognized impairment losses of \$2.0 million and \$22.5 million for the years ended December 31, 2015 and 2014, respectively.

Investments in real estate are classified as held for sale and carried at the lower of cost or fair value less estimated selling costs.

Notes receivable are carried at cost less reserves for losses. Loss reserves are established for notes receivable based upon an estimate of probable losses for the individual notes. A loss reserve is established on an individual note when it is deemed probable that the Company will be unable to collect all amounts due in accordance with the contractual terms of the note. The loss reserve is based upon the Company's assessment of the borrower's overall financial condition, resources and payment record; and, if appropriate, the realizable value of any collateral. These estimates consider all available evidence including the expected future cash flows, estimated fair value of collateral on secured notes, general economic conditions and trends, and other relevant factors, as appropriate. Notes are placed on non-accrual status when management determines that the collectibility of contractual amounts is not reasonably assured.

Property and equipment

Buildings and furniture and equipment are initially recorded at cost and are generally depreciated using the straight-line method over estimated useful lives of 5 to 40 years and 1 to 15 years, respectively. Leasehold improvements are initially recorded at cost and are amortized over the lesser of the remaining term of the respective lease or the estimated useful life, using the straight-line method. Computer software is acquired or developed for internal use and for use with the Company's products and is amortized over estimated useful lives of 1 to 15 years

using the straight-line method. Software development costs, which include capitalized interest costs and certain payroll-related costs of employees directly associated with developing software, in addition to incremental payments to third parties, are capitalized from the time technological feasibility is established until the software is ready for use.

Management uses estimated future cash flows (undiscounted and excluding interest) to measure the recoverability of property and equipment whenever events or changes in circumstances indicate that the carrying value may not be fully recoverable. If the undiscounted cash flow analysis indicates that the carrying amount is not recoverable, an impairment loss is recorded for the excess of the carrying amount over its fair value. Impairment losses on property and equipment, which primarily related to impairments of internally developed software, were \$5.2 million, \$10.9 million and \$1.2 million for the years ended December 31, 2016, 2015 and 2014, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Title plants and other indexes

Title plants and other indexes at December 31, 2016 included title plants of \$529.2 million and capitalized real estate data of \$35.1 million, and at December 31, 2015 included title plants of \$509.6 million and capitalized real estate data of \$26.5 million. Title plants are carried at original cost, with the costs of daily maintenance (updating) charged to expense as incurred. Because properly maintained title plants have indefinite lives and do not diminish in value with the passage of time, no provision has been made for depreciation or amortization. The Company analyzes its title plants at least annually for impairment. This analysis includes, but is not limited to, the effects of obsolescence, duplication, demand and other economic factors. Capitalized real estate data is initially recorded at cost and is amortized using the straight-line method over estimated useful lives of 3 to 15 years.

Business Combinations

Amounts paid for acquisitions are allocated to the tangible assets acquired, liabilities assumed and intangible assets acquired based on their estimated fair values at the date of acquisition. The excess of the fair value of purchase consideration over the fair values of the identifiable assets and liabilities is recorded as goodwill. Acquisition-related costs are expensed in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the date of acquisition.

Goodwill Impairment

The Company is required to perform an annual goodwill impairment assessment for each reporting unit. The Company's four reporting units are title insurance, home warranty, property and casualty insurance and trust and other services. The Company has elected to perform this annual assessment in the fourth quarter of each fiscal year or sooner if circumstances indicate possible impairment. Based on current guidance, the Company has the option to perform a qualitative assessment to determine if the fair value is more likely than not (i.e., a likelihood of greater than 50%) less than the carrying amount as a basis for determining whether it is necessary to perform a quantitative impairment test, or may choose to forego the qualitative assessment and perform the quantitative impairment test. The qualitative factors considered in this assessment may include macroeconomic conditions, industry and market considerations, overall financial performance as well as other relevant events and circumstances as determined by the Company. The Company evaluates the weight of each factor to determine whether it is more likely than not that impairment may exist. If the results of the qualitative assessment indicate the more likely than not threshold was not met, the Company may choose not to perform the quantitative impairment test. If, however, the more likely than not threshold is met, the Company performs the quantitative test as required and discussed below.

Management's quantitative impairment testing process includes two steps. The first step ("Step 1") compares the fair value of each reporting unit to its carrying amount. The fair value of each reporting unit is determined by using discounted cash flow analysis and market approach valuations. If the fair value of the reporting unit exceeds its carrying amount, the goodwill is not considered impaired and no additional analysis is required. However, if the carrying amount is greater than the fair value, a second step ("Step 2") must be completed to determine if the fair value of the goodwill exceeds the carrying amount of goodwill.

Step 2 involves calculating an implied fair value of goodwill for each reporting unit for which Step 1 indicated impairment. The implied fair value of goodwill is determined in a manner similar to the amount of goodwill calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit, as determined in Step 1, over the aggregate estimated fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment loss is recorded for the excess. An impairment loss cannot exceed the carrying value of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The quantitative impairment test for goodwill utilizes a variety of valuation techniques, all of which require the Company to make estimates and judgments. Fair value is determined by employing an expected present value technique, which utilizes multiple cash flow scenarios that reflect a range of possible outcomes and an appropriate discount rate. The use of comparative market multiples (the “market approach”) compares the reporting unit to other comparable companies (if such comparables are present in the marketplace) based on valuation multiples to arrive at a fair value. In assessing the fair value, the Company utilizes the results of the valuations (including the market approach to the extent comparables are available) and considers the range of fair values determined under all methods and the extent to which the fair value exceeds the carrying amount of the reporting unit.

The valuation of each reporting unit includes the use of assumptions and estimates of many critical factors, including revenue growth rates and operating margins, discount rates and future market conditions, determination of market multiples and the establishment of a control premium, among others. Forecasts of future operations are based, in part, on operating results and the Company’s expectations as to future market conditions. These types of analyses contain uncertainties because they require the Company to make assumptions and to apply judgments to estimate industry economic factors and the profitability of future business strategies. However, if actual results are not consistent with the Company’s estimates and assumptions, the Company may be exposed to future impairment losses that could be material.

For 2016, the Company chose to forego the qualitative assessment and performed a quantitative impairment test and, based on the results, determined that the fair values of its reporting units exceeded their carrying amounts and, therefore, no additional analysis was required. The Company chose to perform qualitative assessments for 2015 and 2014, the results of which supported the conclusion that the fair values of the Company’s reporting units were not more likely than not less than their carrying amounts and, therefore, a quantitative impairment test was not considered necessary. As a result, the Company did not record any goodwill impairment losses for 2016, 2015 or 2014.

Other intangible assets

The Company’s finite-lived intangible assets consist of customer relationships, noncompete agreements, trademarks, internal-use software licenses and patents. These assets are amortized on a straight-line basis over their useful lives ranging from 1 to 20 years and are subject to impairment assessments when there is an indication of a triggering event or abandonment. The Company’s indefinite-lived other intangible assets consist of licenses which are not amortized but rather assessed for impairment by comparing the fair values to carrying amounts at least annually, and when an indicator of potential impairment has occurred.

Management uses estimated future cash flows (undiscounted and excluding interest) to measure the recoverability of intangible assets with finite lives, whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. If the undiscounted cash flow analysis indicates that the carrying amount is not recoverable, an impairment loss is recorded for the excess of the carrying amount over its fair value. Management’s impairment assessment for indefinite-lived other intangible assets may involve calculating the fair value by using a discounted cash flow analysis or through a market approach valuation. If the fair value exceeds its carrying amount, the asset is not considered impaired and no additional analysis is required. However, if the carrying amount is greater than the fair value, an impairment loss is recorded equal to the excess.

Reserve for known and incurred but not reported claims

The Company provides for title insurance losses by a charge to expense when the related premium revenue is recognized. The amount charged to expense is generally determined by applying a rate (the loss provision rate) to total title insurance premiums and escrow fees. The Company's management estimates the loss provision rate at the beginning of each year and reassesses the rate quarterly to ensure that the resulting incurred but not reported ("IBNR") loss reserve and known claims reserve included in the Company's consolidated balance sheets together reflect management's best estimate of the total costs required to settle all IBNR and known claims. If the ending IBNR reserve is not considered adequate, an adjustment is recorded.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The process of assessing the loss provision rate and the resulting IBNR reserve involves evaluation of the results of an in-house actuarial review. The Company's in-house actuary performs a reserve analysis utilizing generally accepted actuarial methods that incorporate cumulative historical claims experience and information provided by in-house claims and operations personnel. Current economic and business trends are also reviewed and used in the reserve analysis. These include conditions in the real estate and mortgage markets, changes in residential and commercial real estate values, and changes in the levels of defaults and foreclosures that may affect claims levels and patterns of emergence, as well as any company-specific factors that may be relevant to past and future claims experience. Results from the analysis include, but are not limited to, a range of IBNR reserve estimates and a single point estimate for IBNR as of the balance sheet date.

For recent policy years at early stages of development (generally the last three years), IBNR is generally estimated using a combination of expected loss rate and multiplicative loss development factor calculations. For more mature policy years, IBNR generally is estimated using multiplicative loss development factor calculations. The expected loss rate method estimates IBNR by applying an expected loss rate to total title insurance premiums and escrow fees, and adjusting for policy year maturity using estimated loss development patterns. Multiplicative loss development factor calculations estimate IBNR by applying factors derived from loss development patterns to losses realized to date. The expected loss rate and loss development patterns are based on historical experience and the relationship of the history to the applicable policy years.

The Company's management uses the IBNR point estimate from the in-house actuary's analysis and other relevant information concerning claims to determine what it considers to be the best estimate of the total amount required for the IBNR reserve.

The volume and timing of title insurance claims are subject to cyclical influences from real estate and mortgage markets. Title policies issued to lenders constitute a large portion of the Company's title insurance volume. These policies insure lenders against losses on mortgage loans due to title defects in the collateral property. Even if an underlying title defect exists that could result in a claim, often, the lender must realize an actual loss, or at least be likely to realize an actual loss, for title insurance liability to exist. As a result, title insurance claims exposure is sensitive to lenders' losses on mortgage loans, and is affected in turn by external factors that affect mortgage loan losses, particularly macroeconomic factors.

A general decline in real estate prices can expose lenders to greater risk of losses on mortgage loans, as loan-to-value ratios increase and defaults and foreclosures increase. Title insurance claims exposure for a given policy year is also affected by the quality of mortgage loan underwriting during the corresponding origination year. The Company believes that the sensitivity of claims to external conditions in the real estate and mortgage markets is an inherent feature of title insurance's business economics that applies broadly to the title insurance industry.

Title insurance policies are long-duration contracts with the majority of the claims reported to the Company within the first few years following the issuance of the policy. Generally, 70% to 80% of claim amounts become known in the first six years of the policy life, and the majority of IBNR reserves relate to the six most recent policy years. Changes in expected ultimate losses and corresponding loss rates for recent policy years are considered likely and could result in a material adjustment to the IBNR reserves. Based on historical experience, management believes a 50 basis point change to the loss rates for recent policy years, positive or negative, is reasonably likely given the long duration nature

of a title insurance policy. For example, if the expected ultimate losses for each of the last six policy years increased or decreased by 50 basis points, the resulting impact on the Company's IBNR reserve would be an increase or decrease, as the case may be, of \$110.1 million. A material change in expected ultimate losses and corresponding loss rates for older policy years is also possible, particularly for policy years with loss ratios exceeding historical norms. The estimates made by management in determining the appropriate level of IBNR reserves could ultimately prove to be materially different from actual claims experience.

The Company provides for property and casualty insurance losses when the insured event occurs. The Company provides for claims losses relating to its home warranty business based on the average cost per claim as applied to the total of new claims incurred. The average cost per home warranty claim is calculated using the average of the most recent 12 months of claims experience adjusted for estimated future increases in costs.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Contingent litigation and regulatory liabilities

Amounts related to contingent litigation and regulatory liabilities are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. The Company records legal fees in other operating expenses in the period incurred.

Revenues

Premiums on title policies issued directly by the Company are recognized on the effective date of the title policy and escrow fees are recorded upon close of the escrow.

Premiums on property and casualty insurance policies and home warranty contracts are generally recognized ratably over the 12-month duration of the contract or policy.

Revenues from title policies issued by independent agents are recorded when notice of issuance is received from the agent, which is generally when cash payment is received by the Company.

Information and other revenues primarily consist of revenues generated from fees associated with title search and related reports, title and other real property records and images, other non-insured settlement services, and risk mitigation products and services. For those products and services that are delivered at a point in time and for which there is no ongoing obligation, revenue is recognized upon delivery. For those products and services that are delivered at a point in time and for which there is an ongoing obligation, and for products and services where delivery occurs over time, revenue is recognized ratably over the duration of the contract.

Premium taxes

Title insurance, property and casualty insurance and home warranty companies, like other types of insurers, are generally not subject to state income or franchise taxes. However, in lieu thereof, most states impose a tax based primarily on insurance premiums written. This premium tax is reported as a separate line item in the consolidated statements of income in order to provide a more meaningful disclosure of the taxation of the Company.

Income taxes

The Company accounts for income taxes under the asset and liability method, whereby deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company evaluates the need to establish a valuation allowance for deferred tax assets based upon the amount of existing temporary differences, the period in which they are expected to be recovered and expected levels of taxable income. A valuation allowance to reduce deferred tax assets is established when it is considered more likely than not that some or all of the deferred tax assets will not be realized.

The Company recognizes the effect of income tax positions only if sustaining those positions is considered more likely than not. Changes in recognition or measurement of uncertain tax positions are reflected in the period in which a change in judgment occurs. The Company recognizes interest and penalties, if any, related to uncertain tax positions in income tax expense.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Share-based compensation

The Company measures the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. The cost is recognized in the Company's financial statements over the requisite service period of the award using the straight-line method for awards that contain only a service condition and the graded vesting method for awards that contain a performance or market condition. The share-based compensation expense recognized is based on the number of shares ultimately expected to vest, net of forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

The Company's primary means of providing share-based compensation is through the granting of restricted stock units ("RSUs"). RSUs granted generally have graded vesting and include a service condition; and for certain key employees and executives, may also include either a performance or market condition. RSUs receive dividend equivalents in the form of RSUs having the same vesting requirements as the RSUs initially granted.

In addition, the Company has an employee stock purchase plan that allows eligible employees the option to purchase common stock of the Company at 85% of the lower of the closing price on either the first or last day of each offering period. The offering periods are three-month periods beginning on January 1, April 1, July 1 and October 1 of each fiscal year. The Company recognizes an expense in the amount equal to the value of the 15% discount and look-back feature over the three-month offering period.

Earnings per share

Basic earnings per share is computed by dividing net income available to the Company's stockholders by the weighted-average number of common shares outstanding. The computation of diluted earnings per share is similar to the computation of basic earnings per share, except that the weighted-average number of common shares outstanding is increased to include the number of additional common shares that would have been outstanding if dilutive stock options had been exercised and RSUs were vested. The dilutive effect of stock options and unvested RSUs is computed using the treasury stock method, which assumes any proceeds that could be obtained upon the exercise of stock options and vesting of RSUs would be used to purchase common shares at the average market price for the period. The assumed proceeds include the purchase price the grantee pays, the hypothetical windfall tax benefit that the Company receives upon assumed exercise or vesting and the hypothetical average unrecognized compensation expense for the period. The Company calculates the assumed proceeds from excess tax benefits based on the "as-if" deferred tax assets calculated under share based compensation standards.

Employee benefit plans

The Company recognizes the overfunded or underfunded status of its funded defined benefit pension and unfunded supplemental benefit plans as an asset or liability on its consolidated balance sheets and recognizes changes in the funded status in the year in which changes occur, through accumulated other comprehensive loss. The funded status is measured as the difference between the fair value of plan assets and benefit obligation (the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for the other postretirement plans). Actuarial gains and losses and prior service costs and credits that have not been recognized as a component of net

periodic benefit cost previously are recorded as a component of accumulated other comprehensive loss. Plan assets and obligations are measured annually as of December 31. See Note 13 Employee Benefit Plans for discussion of the termination of the Company's funded defined benefit pension plans.

The Company informally funds its nonqualified deferred compensation plan through tax-advantaged investments known as variable universal life insurance. The Company's deferred compensation plan assets are included as a component of other assets and the Company's deferred compensation plan liability is included as a component of pension costs and other retirement plans on the consolidated balance sheets. The income earned on the Company's deferred compensation plan assets is included as a component of net investment income and the income earned by the deferred compensation plan participants is included as a component of personnel costs on the consolidated statements of income.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Foreign currency

The Company operates in other countries, including Canada, the United Kingdom, Australia, South Korea and various other established and emerging markets. The functional currencies of the Company's foreign subsidiaries are generally their respective local currencies. The financial statements of foreign subsidiaries with local currencies that were determined to be the functional currency are translated into U.S. dollars as follows: assets and liabilities at the exchange rate as of the balance sheet date, equity at the historical rates of exchange, and income and expense amounts at average rates prevailing throughout the period. Translation adjustments resulting from the translation of the subsidiaries' accounts are included in accumulated other comprehensive loss as a separate component of stockholders' equity. For those foreign subsidiaries where the U.S. dollar has been determined to be the functional currency, non-monetary assets and liabilities are translated using historical rates, while monetary assets and liabilities are translated at current rates, with remeasurement gains and losses included in other operating expenses. Gains and losses resulting from foreign currency transactions are included within other operating expenses.

Reinsurance

The Company assumes and cedes large title insurance risks through reinsurance. Additionally, the Company's property and casualty insurance business purchases reinsurance to limit risk associated with large losses from single events. In reinsurance arrangements, the primary insurer retains a certain amount of risk under a policy and cedes the remainder of the risk under the policy to the reinsurer. The primary insurer pays the reinsurer a premium in exchange for accepting this risk of loss. The primary insurer generally remains liable to its insured for the total risk, but is reinsured under the terms of the reinsurance agreement. The amount of premiums assumed and ceded is recorded as a component of direct premiums and escrow fees on the Company's consolidated statements of income. The total amount of premiums assumed and ceded in connection with reinsurance was less than 1.0% of consolidated premium and escrow fees for each of the three years in the period ended December 31, 2016. See Note 8 Reserve for Known and Incurred But Not Reported Claims for discussion of recoveries related to a large commercial title claim during the year ended December 31, 2015. Payments and recoveries on reinsured losses for the Company's title insurance and property and casualty businesses were immaterial during the years ended December 31, 2016 and 2014.

Escrow deposits and trust assets

The Company administers escrow deposits and trust assets as a service to its customers. Escrow deposits totaled \$6.8 billion and \$6.6 billion at December 31, 2016 and 2015, respectively, of which \$2.6 billion was held at the Company's federal savings bank subsidiary, First American Trust, FSB. The escrow deposits held at First American Trust, FSB are temporarily invested in cash and cash equivalents and debt securities, with offsetting liabilities included in deposits in the accompanying consolidated balance sheets. The remaining escrow deposits were held at third-party financial institutions.

Trust assets held or managed by First American Trust, FSB totaled \$3.2 billion and \$3.0 billion at December 31, 2016 and 2015, respectively. Escrow deposits held at third-party financial institutions and trust assets are not considered assets of the Company and, therefore, are not included in the accompanying consolidated balance sheets. However, the Company could be held contingently liable for the disposition of these assets.

In conducting its operations, the Company often holds customers' assets in escrow, pending completion of real estate transactions and, as a result, the Company has ongoing programs for realizing economic benefits with various financial institutions. The results from these programs are included in the consolidated financial statements as income or a reduction in expense, as appropriate, based on the nature of the arrangement and benefit received.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Like-kind exchanges

The Company facilitates tax-deferred property exchanges for customers pursuant to Section 1031 of the Internal Revenue Code and tax-deferred reverse exchanges pursuant to Revenue Procedure 2000-37. As a facilitator and intermediary, the Company holds the proceeds from sales transactions and takes temporary title to property identified by the customer to be acquired with such proceeds. Upon the completion of each such exchange, the identified property is transferred to the customer or, if the exchange does not take place, an amount equal to the sales proceeds or, in the case of a reverse exchange, title to the property held by the Company is transferred to the customer. Like-kind exchange funds held by the Company totaled \$2.0 billion and \$2.8 billion at December 31, 2016 and 2015, respectively. The like-kind exchange deposits are held at third-party financial institutions and, due to the structure utilized to facilitate these transactions, the proceeds and property are not considered assets of the Company and, therefore, are not included in the accompanying consolidated balance sheets. All such amounts are placed in deposit accounts insured, up to applicable limits, by the Federal Deposit Insurance Corporation. The Company could be held contingently liable to the customer for the transfers of property, disbursements of proceeds and the returns on such proceeds.

Recently Adopted Accounting Pronouncements:

In September 2015, the Financial Accounting Standards Board (“FASB”) issued updated guidance intended to simplify the accounting for adjustments made to provisional amounts recognized in a business combination and eliminates the requirement to retrospectively account for those adjustments. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015 and applies prospectively to adjustments made to provisional amounts that occur after the effective date of this guidance with early adoption permitted for financial statements that have not been issued. The adoption of this guidance had no impact on the Company’s consolidated financial statements.

In August 2015, the FASB issued updated guidance relating to the Securities and Exchange Commission Staff Announcement at the June 18, 2015 Emerging Issues Task Force meeting on the presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements. The updated guidance allows for the deferral and presentation of debt issuance costs as an asset which may be amortized ratably over the term of the line-of-credit arrangement, regardless of whether there are any related outstanding borrowings. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company’s consolidated financial statements.

In May 2015, the FASB issued updated disclosure guidance related to short-duration contracts issued by insurance entities. The updated guidance is intended to increase the transparency of significant estimates made in measuring liabilities for unpaid claims and claim adjustment expenses and to provide additional insight into an insurance entity’s ability to underwrite and anticipate costs associated with claims. The updated guidance is effective for annual reporting periods beginning after December 15, 2015 and for interim periods within annual periods beginning after December 15, 2016, with early adoption permitted. Except for the disclosure requirements, the adoption of this guidance had no impact on the Company’s consolidated financial statements.

In May 2015, the FASB issued updated guidance intended to eliminate the diversity in practice surrounding how investments measured at net asset value under the practical expedient with future redemption dates have been categorized in the fair value hierarchy. Under the updated guidance, investments for which fair value is measured at net asset value per share using the practical expedient should no longer be categorized in the fair value hierarchy. The updated guidance requires retrospective adoption for all periods presented and is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In April 2015, the FASB issued updated guidance intended to clarify the accounting treatment for cloud computing arrangements that include software licenses. Under the updated guidance, if a cloud computing arrangement includes a software license, the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The Company elected to adopt the updated guidance prospectively for all arrangements entered into or materially modified after the effective date. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements. The financial statement line items impacted by the adoption of the updated guidance include other intangible assets, net and depreciation and amortization. See Note 6 Other Intangible Assets for further information on the Company's internal-use software licenses.

In April 2015, the FASB issued updated guidance intended to simplify, and provide consistency to, the presentation of debt issuance costs. The new standard requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the debt liability, consistent with debt discounts. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued updated guidance which changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

In June 2014, the FASB issued updated guidance intended to eliminate the diversity in practice regarding share-based payment awards that include terms which provide for a performance target that affects vesting being achieved after the requisite service period. The new standard requires that a performance target which affects vesting and could be achieved after the requisite service period be treated as a performance condition that affects vesting and should not be reflected in estimating the grant-date fair value. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. The adoption of this guidance had no impact on the Company's consolidated financial statements.

Pending Accounting Pronouncements:

In November 2016, the FASB issued updated guidance intended to reduce the diversity in practice on presenting restricted cash or restricted cash equivalents in the statement of cash flows. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In October 2016, the FASB issued updated guidance to amend the consolidation guidance on how a reporting entity that is the single decision maker of a variable interest entity should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary

beneficiary of that variable interest entity. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In October 2016, the FASB issued updated guidance intended to simplify and improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory. The updated guidance, which eliminates the intra-entity transfers exception, requires entities to recognize the income tax consequences of intra-entity transfers of assets, other than inventory, when the transfers occur. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In August 2016, the FASB issued updated guidance intended to eliminate the diversity in practice regarding the presentation and classification of certain cash receipts and cash payments in the statement of cash flows. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated statements of cash flows.

In June 2016, the FASB issued updated guidance intended to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. The updated guidance replaces the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires the consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2019, with early adoption permitted. The Company is currently assessing the impact of the new guidance on its consolidated financial statements.

In March 2016, the FASB issued updated guidance intended to simplify and improve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of such awards as either equity or liabilities and classification on the statement of cash flows. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2016, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

In March 2016, the FASB issued updated guidance intended to simplify the accounting treatment for investments that become qualified for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2016, with early adoption permitted. The Company expects the adoption of this guidance to have no impact on its consolidated financial statements.

In February 2016, the FASB issued updated guidance that requires the rights and obligations associated with leasing arrangements be reflected on the balance sheet in order to increase transparency and comparability among organizations. Under the updated guidance, lessees will be required to recognize a right-of-use asset and a liability to make lease payments and disclose key information about leasing arrangements. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2018, with early adoption permitted. While the Company is currently evaluating the impact the new guidance will have on its consolidated financial statements, the Company expects the adoption of the new guidance will result in a material increase in the assets and liabilities on its consolidated balance sheets and will likely have an insignificant impact on its consolidated statements of income and statements of cash flows.

In January 2016, the FASB issued updated guidance intended to enhance the reporting model for financial instruments to provide users of financial statements with more decision-useful information. In addition to making other targeted improvements to current guidance, the updated guidance also requires all equity investments, except those accounted for under the equity method of accounting or those that result in consolidation of the investee, to be measured at fair value with changes in the fair value recognized through net income. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption permitted in certain circumstances.

While the Company expects the adoption of this guidance to impact its consolidated statements of income, the materiality of the impact will depend upon the size of, and level of volatility experienced within, the Company's equity portfolio.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In May 2014, the FASB issued updated guidance for recognizing revenue from contracts with customers to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability within and across industries, and across capital markets. The new revenue standard contains principles that an entity will apply to determine the measurement of revenue and the timing of recognition. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. Revenue from insurance contracts is not within the scope of this guidance. In August 2015, the FASB issued updated guidance which defers the effective date of this guidance by one year. In 2016, the FASB issued additional updates to the new guidance primarily to clarify, among other things, the implementation guidance related to principal versus agent considerations, identifying performance obligations, accounting for licenses of intellectual property, and to provide narrow-scope improvements and additional practical expedients. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, with early adoption prohibited. The Company expects to adopt the new guidance under the modified retrospective approach and, based on a preliminary assessment, does not expect the new guidance to have a material impact on its consolidated financial statements.

NOTE 2. Statutory Restrictions on Investments and Stockholders' Equity:

Investments totaling \$125.8 million and \$127.1 million were on deposit with state treasurers in accordance with statutory requirements for the protection of policyholders at December 31, 2016 and 2015, respectively.

Pursuant to insurance and other regulations under which the Company's insurance subsidiaries operate, the amount of dividends, loans and advances available to the Company is limited, principally for the protection of policyholders. As of December 31, 2016, under such regulations, the maximum amount of dividends, loans and advances available to the Company from its insurance subsidiaries in 2017, without prior approval from applicable regulators, was \$761.8 million.

The Company's principal title insurance subsidiary, First American Title Insurance Company ("FATICO"), maintained total statutory capital and surplus of \$1.2 billion and \$1.1 billion as of December 31, 2016 and 2015, respectively. Statutory net income for the years ended December 31, 2016, 2015 and 2014 was \$150.0 million, \$191.8 million and \$393.1 million, respectively. FATICO was in compliance with the minimum statutory capital and surplus requirements as of December 31, 2016.

FATICO is domiciled in Nebraska and its statutory-based financial statements are prepared in accordance with accounting practices prescribed or permitted by the Nebraska Department of Insurance. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the state of Nebraska. The state of Nebraska has adopted certain prescribed accounting practices that differ from those found in the NAIC SAP. Specifically, the timing of amounts released from the statutory premium reserve under Nebraska's required practice differs from NAIC SAP resulting in total statutory capital and surplus that was lower by \$69.6 million and \$61.7 million at December 31, 2016 and 2015,

respectively, than if reported in accordance with NAIC SAP. Additionally, for the year ended December 31, 2015, the state of Nebraska granted a permitted accounting practice to FATICO that differs from Nebraska's prescribed accounting practice; specifically, the determination that a bulk reserve within the known claims reserve was not required resulting in total statutory capital and surplus that was higher by \$58.9 million at December 31, 2015 than if reported in accordance with Nebraska's prescribed practice. For the year ended December 31, 2016, FATICO elected to follow the prescribed practice and recorded a bulk reserve within the known claims reserve resulting in a decrease to total statutory capital and surplus of \$145.7 million at December 31, 2016.

Statutory accounting principles differ in some respects from GAAP, and these differences include, but are not limited to, non-admission of certain assets (principally limitations on deferred tax assets, capitalized furniture and other equipment, premiums and other receivables 90 days past due and assets acquired in connection with claim settlements other than real estate or mortgage loans secured by real estate), reporting of bonds at amortized cost, amortization of goodwill, deferral of premiums received as statutory premium reserve, supplemental reserve (if applicable) and exclusion of the incurred but not reported claims reserve.

Total	\$2,756,093	91.1	\$198,410	6.6	\$69,306	2.3	\$3,023,809	100.0

As of December 31, 2016, the estimated fair value of total debt securities in an unrealized loss position included \$12.0 million of bank loans, all of which was non-investment grade; \$39.2 million of high yield corporate debt securities, all of which was non-investment grade; and \$38.0 million of emerging market debt securities, of which \$6.1 million was non-investment grade.

The credit ratings in the above tables reflect published ratings obtained from Standard & Poor's Rating Services, DBRS, Inc., Fitch Ratings, Inc. and Moody's Investor Services, Inc. If a security was rated differently among the rating agencies, the lowest rating was selected. Governmental agency mortgage-backed securities are not rated by any of the ratings agencies; however, these securities have been included in the above table in the "A- Ratings or higher" category because the payments of principal and interest are guaranteed by the governmental agency that issued the security.

	\$ 2,779,478		\$ 2,699,015	
Weighted average interest rate:				
Escrow accounts	0.10	%	0.10	%

(1) Business checking and other deposits primarily reflect non-interest bearing accounts.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

NOTE 8. Reserve for Known and Incurred But Not Reported Claims:

Activity in the reserve for known and incurred but not reported claims is summarized as follows:

	December 31,		
	2016	2015	2014
	(in thousands)		
Balance at beginning of year	\$983,880	\$1,011,780	\$1,018,365
Provision related to:			
Current year	441,228	395,459	383,181
Prior years	47,373	95,633	66,842
	488,601	491,092	450,023
Payments, net of recoveries, related to:			
Current year	223,735	209,845	196,656
Prior years	239,264	266,647	273,094
	462,999	476,492	469,750
Other	16,381	(42,500)	13,142
Balance at end of year	\$1,025,863	\$983,880	\$1,011,780

Current year payments include \$211.3 million, \$198.6 million and \$174.4 million in 2016, 2015 and 2014, respectively, that primarily relate to the Company's specialty insurance segment. Prior year payments, net of recoveries, include \$41.4 million, \$23.1 million and \$23.2 million in 2016, 2015 and 2014, respectively, that relate to the Company's specialty insurance segment.

"Other" primarily includes foreign currency translation gains and losses, assets acquired in connection with claim settlements, and recoveries. Included for the year ended December 31, 2015, are recoveries of \$23.8 million on reinsured losses related to a large commercial title claim. Payments and recoveries on reinsured losses for the Company's title insurance and property and casualty businesses were immaterial during the years ended December 31, 2016 and 2014.

The provision for title insurance losses, expressed as a percentage of title insurance premiums and escrow fees, was 5.5%, 6.6% and 7.1% for the years ended December 31, 2016, 2015 and 2014, respectively.

The current year rate of 5.5% reflects an ultimate loss rate of 4.5% for the current policy year and a \$42.6 million net increase in loss reserve estimates for prior policy years. The increase in loss reserve estimates for prior policy years was primarily attributable to potential uncertainty with respect to the Company's exposure to large title claims. A large title claim is defined as a title claim with a total ultimate loss in excess of \$2.5 million. This uncertainty is due to the following factors, among others: (i) the volatility associated with the timing and severity of large title claims, (ii) the potential of incurring one or more large title claims that significantly exceed estimated ultimate losses indicated by current historical trends, and (iii) the complexity associated with handling large title claims which makes it difficult to

estimate the ultimate outcome. While the Company believes its claims reserve attributable to large title claims is reasonable, this uncertainty increases the potential for adverse loss development.

As of December 31, 2016, the IBNR claims reserve for the title insurance and services segment was \$888.1 million, which reflected management's best estimate. The Company's internal actuary determined a range of reasonable estimates of \$718.5 million to \$938.3 million. The range limits are \$169.6 million below and \$50.2 million above management's best estimate, respectively, and represent an estimate of the range of variation among reasonable estimates of the IBNR reserve. Actuarial estimates are sensitive to assumptions used in models, as well as the structures of the models themselves, and to changes in claims payment and incurral patterns, which can vary materially due to economic conditions, among other factors.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The prior year rate of 6.6% reflected an ultimate loss rate of 4.2% for policy year 2015 and a \$93.1 million net increase in loss reserve estimates for prior policy years. The increase in loss reserve estimates for prior policy years was primarily attributable to a change in methodology used by the Company's internal actuary to estimate total ultimate losses. Previously, the internal actuary's model did not separate claims experience for large title claims from normal title claims activity. With this change in methodology, the model began to separate claims experience for large title claims from normal title claims activity when developing reserve estimates. As a result, loss reserve estimates for prior policy years increased, primarily for policy years 2004 through 2007. The change in methodology was implemented due to the increased frequency of large title claims experienced over the prior several years and the volatility associated with the timing and severity of large title claims. The Company accounted for this change in methodology as a change in accounting estimate.

The 2014 rate of 7.1% reflected an ultimate loss rate of 5.3% for policy year 2014 and a net increase in loss reserve estimates for prior policy years of \$64.1 million. The increase in loss reserve estimates for prior policy years reflected claims development above expected levels during 2014, primarily from domestic commercial policies. The reserve strengthening associated with domestic commercial policies was \$41.4 million and was primarily attributable to several large commercial claims, net of anticipated recoveries, mainly from mechanics liens, and primarily related to policy years 2003, 2005 and 2007. Other factors, including a large international commercial claim from policy year 2004, also contributed to the net increase in loss reserve estimates for prior policy years.

As of December 31, 2016, the projected ultimate loss ratios for policy years 2016, 2015 and 2014 were 4.5%, 4.1% and 4.8%, respectively.

A summary of the Company's loss reserves is as follows:

(in thousands, except percentages)	December 31, 2016			December 31, 2015		
Known title claims	\$83,805	8.1	%	\$87,543	8.9	%
Incurred but not reported claims	888,126	86.6	%	844,364	85.8	%
Total title claims	971,931	94.7	%	931,907	94.7	%
Non-title claims	53,932	5.3	%	51,973	5.3	%
Total loss reserves	\$1,025,863	100.0	%	\$983,880	100.0	%

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company maintains a credit agreement with JPMorgan Chase Bank, N.A. in its capacity as administrative agent and the lenders party thereto. The credit agreement is comprised of a \$700.0 million revolving credit facility. Unless terminated earlier, the revolving loan commitments under the credit agreement will terminate on May 14, 2019. The obligations of the Company under the credit agreement are neither secured nor guaranteed. Proceeds under the credit agreement may be used for general corporate purposes.

In September 2016, the Company borrowed \$160.0 million under the credit facility to fund acquisitions and to partially fund its obligation in connection with the termination of its funded defined benefit pension plans. At December 31, 2016, outstanding borrowings under the facility totaled \$160.0 million at an interest rate of 2.52%. See Note 20 Business Combinations for further discussion of the Company's acquisitions, and see Note 13 Employee Benefit Plans for further discussion of the Company's pension termination.

The credit agreement includes an expansion option that permits the Company, subject to satisfaction of certain conditions, to increase the revolving commitments and/or add term loan tranches ("Incremental Term Loans") in an aggregate amount not to exceed \$150.0 million. Incremental Term Loans, if made, may not mature prior to the revolving commitment termination date, provided that amortization may occur prior to such date.

At the Company's election, borrowings under the credit agreement bear interest at (a) the Alternate Base Rate plus the applicable spread or (b) the Adjusted LIBOR rate plus the applicable spread (in each case as defined in the agreement). The Company may select interest periods of one, two, three or six months or (if agreed to by all lenders) such other number of months for Eurodollar borrowings of loans. The applicable spread varies depending upon the debt rating assigned by Moody's Investor Service, Inc. and/or Standard & Poor's Rating Services. The minimum applicable spread for Alternate Base Rate borrowings is 0.625% and the maximum is 1.00%. The minimum applicable spread for Adjusted LIBOR rate borrowings is 1.625% and the maximum is 2.00%. The rate of interest on Incremental Term Loans will be established at or about the time such loans are made and may differ from the rate of interest on revolving loans.

The credit agreement includes representations and warranties, reporting covenants, affirmative covenants, negative covenants, financial covenants and events of default customary for financings of this type. Upon the occurrence of an event of default the lenders may accelerate the loans. Upon the occurrence of certain insolvency and bankruptcy events of default the loans will automatically accelerate. As of December 31, 2016, the Company was in compliance with the financial covenants under the credit agreement.

The aggregate annual maturities for notes and contracts payable for the next five years and thereafter, are as follows:

Year	Annual maturities (in thousands)
2017	\$ 4,855
2018	4,229
2019	163,793

2020	3,432
2021	3,337
Thereafter	557,047
	\$ 736,693

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Income taxes differ from the amounts computed by applying the federal income tax rate of 35.0%. A reconciliation of this difference is as follows:

	Year ended December 31,					
	2016		2015		2014	
	(in thousands, except percentages)					
Taxes calculated at federal rate	\$167,153	35.0%	\$151,468	35.0%	\$122,696	35.0%
State taxes, net of federal benefit	3,703	0.8	4,581	1.1	2,891	0.8
Change in liability for tax positions	(10,512)	(2.2)	1,094	0.3	412	0.1
Foreign income taxed at different rates	(7,983)	(1.7)	(7,111)	(1.6)	(6,091)	(1.7)
Federal tax credits	(12,265)	(2.6)	(1,710)	(0.4)	(2,184)	(0.6)
Other items, net	(5,991)	(1.2)	(4,427)	(1.1)	(1,379)	(0.4)
	\$134,105	28.1%	\$143,895	33.3%	\$116,345	33.2%

The Company's effective income tax rates (income tax expense as a percentage of income before income taxes) were 28.1% for 2016, 33.3% for 2015 and 33.2% for 2014. The differences in the effective tax rates are typically due to changes in state and foreign income taxes resulting from fluctuations in the Company's noninsurance and foreign subsidiaries' contributions to pretax income and changes in the ratio of permanent differences to income before income taxes. In addition, the 2016 rate reflects the resolution of certain tax authority examinations and tax credits claimed in current and prior years. The 2015 rate includes a benefit for the release of valuation allowances previously provided against certain foreign net operating losses and other deferred tax assets. The 2014 rate reflects non-recurring tax benefits resulting from certain adjustments to the Company's state and non-U.S. tax accounts.

The primary components of temporary differences that give rise to the Company's net deferred tax liability are as follows:

	December 31,	
	2016	2015
	(in thousands)	
Deferred tax assets:		
Deferred revenue	\$11,966	\$11,639
Employee benefits	83,100	77,994
Bad debt reserves	12,704	14,943
Loss reserves	1,974	3,062
Pension	89,726	105,398

Edgar Filing: First American Financial Corp - Form 10-K

Net operating loss carryforward	14,358	15,541
Securities	10,664	6,128
Foreign tax credit	4,086	1,769
Other	7,557	7,904
	236,135	244,378
Valuation allowance	(8,049)	(6,729)
	228,086	237,649
Deferred tax liabilities:		
Depreciable and amortizable assets	320,884	297,721
Claims and related salvage	121,812	40,901
Investments in affiliates	7,511	5,060
	450,207	343,682
Net deferred tax liability	\$ 222,121	\$ 106,033

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The exercise of stock options and vesting of RSUs represent a tax benefit that has been reflected as a reduction of taxes payable and an increase to equity. The benefits recorded were \$3.4 million and \$9.5 million for the years ended December 31, 2016 and 2015, respectively.

In connection with the Company's June 2010 spin-off from CoreLogic, it entered into a tax sharing agreement which governs the Company's and CoreLogic's respective rights, responsibilities and obligations for certain tax-related matters. At December 31, 2016 and 2015, the Company had a net payable to CoreLogic of \$16.3 million and \$36.5 million, respectively, related to tax matters prior to the spin-off. This amount is included in the Company's consolidated balance sheets in accounts payable and accrued liabilities. The decrease during the current year was primarily the result of the effective settlement of tax positions for years prior to the spin-off.

At December 31, 2016, the Company had available a foreign tax credit carryover of \$4.1 million. The Company expects to utilize this credit within the carryover period.

At December 31, 2016, the Company had available net operating loss carryforwards for income tax purposes totaling \$85.2 million, consisting of federal, state and foreign losses of \$0.2 million, \$35.9 million and \$49.1 million, respectively. Of the aggregate net operating losses, \$33.8 million have an indefinite expiration and the remaining \$51.4 million expire at various times beginning in 2017. The Company carries a valuation allowance of \$8.0 million against its deferred tax assets. Of this amount, \$7.6 million relates to net operating losses; the remaining \$0.4 million relates to other foreign deferred tax assets. The year-over-year increase in the overall valuation allowance is primarily due to additional foreign net operating losses incurred in 2016.

The Company evaluates the realizability of its deferred tax assets by assessing the valuation allowance and adjusts the allowance, if necessary. The factors used to assess the likelihood of realization include the Company's forecast of future taxable income and available tax planning strategies that could be implemented to realize the net deferred tax assets. The ability or failure to achieve forecasted taxable income in the applicable taxing jurisdictions could affect the ultimate realization of deferred tax assets. Based on future operating results in certain jurisdictions, it is possible that the current valuation allowance positions of those jurisdictions could be adjusted in the next 12 months.

As of December 31, 2016 and 2015, U.S. taxes were not provided for on the cumulative earnings of the Company's foreign subsidiaries of \$215.9 million and \$155.7 million, respectively, as the Company has invested or expects to invest the undistributed earnings indefinitely. If, in the future, these earnings are repatriated to the United States, or if the Company determines that the earnings will be remitted in the foreseeable future, additional tax provisions may be required. It is not practicable to calculate the deferred taxes associated with these earnings because of the variability of multiple factors that would need to be assessed at the time of any assumed repatriation; however, foreign tax credits may be available to reduce federal income taxes in the event of distribution.

As of December 31, 2016, 2015 and 2014, the liability for income taxes associated with uncertain tax positions was \$18.1 million, \$23.8 million and \$24.1 million, respectively. The net decreases in the liabilities during 2016, 2015 and 2014 were primarily attributable to activity related to examinations conducted by various taxing authorities. The liabilities could be reduced by \$5.7 million as of December 31, 2016, and by \$3.4 million as of December 31, 2015 and 2014, due to offsetting tax benefits associated with the correlative effects of potential adjustments, including timing adjustments and state income taxes. The net amounts of \$12.4 million, \$20.4 million and \$20.7 million as of

December 31, 2016, 2015 and 2014, respectively, if recognized, would favorably affect the Company's effective tax rate.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the years ended December 31, 2016, 2015 and 2014 is as follows:

	December 31,		
	2016	2015	2014
	(in thousands)		
Unrecognized tax benefits—beginning balance	\$23,800	\$24,100	\$47,800
Gross decreases—prior period tax positions	(7,100)	(800)	(24,100)
Gross increases—current period tax positions	1,400	500	400
Unrecognized tax benefits—ending balance	\$18,100	\$23,800	\$24,100

The Company's continuing practice is to recognize interest and penalties, if any, related to uncertain tax positions in income tax expense. As of December 31, 2016, 2015 and 2014, the Company had accrued \$4.1 million, \$9.7 million and \$8.9 million, respectively, of interest and penalties (net of tax benefits of \$1.8 million, \$4.1 million and \$3.7 million, respectively) related to uncertain tax positions.

The Company, or one of its subsidiaries, files income tax returns in the U.S. federal jurisdiction, various state jurisdictions, and various non-U.S. jurisdictions. The primary non-federal jurisdictions are California, Canada, India and the United Kingdom. During 2016, the Company concluded U.S. federal income tax examinations for calendar years 2005 through 2013. The Company is generally no longer subject to U.S. federal, state and non-U.S. income tax examinations by taxing authorities for years prior to 2005.

It is reasonably possible that the amount of the unrecognized benefit with respect to certain of the Company's unrecognized tax positions may significantly increase or decrease within the next 12 months. This change may be the result of ongoing audits or the expiration of federal and state statutes of limitations for the assessment of taxes.

The Company records a liability for potential tax assessments based on its estimate of the potential exposure. New tax laws and new interpretations of laws and rulings by tax authorities may affect the liability for potential tax assessments. Due to the subjectivity and complex nature of the underlying issues, actual payments or assessments may differ from estimates. To the extent the Company's estimates differ from actual payments or assessments, income tax expense is adjusted. The Company's income tax returns in several jurisdictions are being examined by various tax authorities. The Company believes that adequate amounts of tax and related interest, if any, from any adjustments that may result from these examinations have been provided for.

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

NOTE 12. Earnings Per Share:

The computation of basic and diluted earnings per share is as follows:

	Year ended December 31,		
	2016	2015	2014
	(in thousands, except per share data)		
Numerator			
Net income attributable to the Company	\$ 342,993	\$ 288,086	\$ 233,534
Less: dividends and undistributed earnings allocated to unvested RSUs	—	321	514
Net income allocated to common stockholders	\$ 342,993	\$ 287,765	\$ 233,020
Denominator			
Basic weighted-average shares	110,548	108,427	106,884
Effect of dilutive employee stock options and RSUs	608	1,399	1,804
Diluted weighted-average shares	111,156	109,826	108,688
Net income per share attributable to the Company's stockholders			
Basic	\$ 3.10	\$ 2.65	\$ 2.18
Diluted	\$ 3.09	\$ 2.62	\$ 2.15

For the year ended December 31, 2016, no stock options or RSUs had an antidilutive effect on weighted-average diluted common shares outstanding. For the years ended December 31, 2015 and 2014, 6 thousand RSUs and 133 thousand stock options and RSUs, respectively, were excluded from the weighted-average diluted common shares outstanding due to their antidilutive effect.

NOTE 13. Employee Benefit Plans:

The First American Financial Corporation 401(k) Savings Plan (the "Savings Plan") allows for employee-elective contributions up to the maximum amount as determined by the Internal Revenue Code. The Company makes discretionary contributions to the Savings Plan based on profitability, as well as the contributions of participants. Effective July 1, 2015, participants in the Savings Plan can no longer make additional investments in common stock of the Company. The Savings Plan held 2,695,000 shares and 3,129,000 shares of the Company's common stock, representing 2.5% and 2.9% of the Company's total common shares outstanding at December 31, 2016 and 2015, respectively.

The Company maintains a deferred compensation plan for certain employees that allows participants to defer up to 100% of their salary, commissions and certain bonuses. Participants can allocate their deferrals among a variety of

investment crediting options (known as “deemed investments”). The term deemed investments means that the participant has no ownership interest in the funds they select; the funds are only used to measure the gains or losses that will be attributed to each participant’s deferral account over time. Participants can elect to have their deferral balance paid out while they are still employed or after their employment ends. The deferred compensation plan is exempt from most provisions of the Employee Retirement Income Security Act (“ERISA”) because it is only available to a select group of management and highly compensated employees and is not a qualified employee benefit plan. To preserve the tax-deferred savings advantages of a nonqualified deferred compensation plan, federal law requires that it be unfunded or informally funded. Participant deferrals, and any earnings on those deferrals, are general unsecured obligations of the Company. The Company informally funds the deferred compensation plan through a tax-advantaged investment known as variable universal life insurance. Deferred compensation plan assets are held as an asset of the Company within a special trust, called a “Rabbi Trust.” At December 31, 2016 and 2015, the value of the assets in the Rabbi Trust of \$78.9 million and \$73.1 million, respectively, and the unfunded liabilities of \$82.5 million and \$76.3 million, respectively, were included in the consolidated balance sheets in other assets and pension costs and other retirement plans, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Pension termination and settlement

In May 2016, the Company's board of directors terminated the Company's funded defined benefit pension plan known as the First American Financial Corporation Pension Plan, effective as of July 31, 2016. The pension plan was closed to new entrants effective December 31, 2001 and amended to "freeze" all benefit accruals as of April 30, 2008. Also, in May 2016, a subsidiary of the Company terminated its small regional funded defined benefit pension plan effective as of August 31, 2016. The Company expects the termination of both pension plans to occur over a similar timeframe. Upon completion of these terminations, the Company will have no remaining funded defined benefit pension plan obligations. All financial impacts discussed below reflect the termination of both pension plans.

The pension plans offer participants annuity payments based on a number of factors and, for certain participants, an alternative lump sum distribution option. During 2016, the Company received certain regulatory approvals needed to terminate the pension plans and offered lump sum distributions to certain participants, which were settled by the pension plans in the fourth quarter. The Company made additional cash contributions in 2016 above scheduled amounts of \$84.8 million to sufficiently fund the pension plans. The Company will ensure that sufficient funds are available to purchase group annuity contracts from one or more highly rated insurance companies to pay and administer future benefit payments, and complete other transactions required to terminate the pension plans in a manner that fully meets its obligations to all participants. While the Company expects to make an additional cash contribution of approximately \$23 million in the first half of 2017, the actual amount will depend upon changes in interest rates, pension plan asset returns and other factors. The Company also expects to pay other termination related expenses.

The Company recognized \$66.3 million in settlement costs during the fourth quarter of 2016 related to distributions of pension plan assets totaling \$127.2 million to participants electing lump sum payments. The Company expects to complete the transfer of all remaining liabilities and administrative responsibilities related to the pension plans to one or more highly rated insurance companies by the end of the second quarter of 2017 and to recognize approximately \$154 million in net unrealized losses in the first half of 2017. The preceding information related to the expected amounts and timing of pension termination expenses to be recognized are estimates based on net unrealized losses as of December 31, 2016 and actual amounts recognized may differ due to changes in interest rates, pension plan asset returns, and other factors.

Certain aspects of the transactions required to terminate the pension plans and settle its obligations are subject to regulatory review.

The Company also has nonqualified, unfunded supplemental benefit plans covering certain management personnel. The Executive and Management Supplemental Benefit Plans, subject to certain limitations, provide participants with maximum benefits of 30% and 15%, respectively, of average annual compensation over a fixed five year period. Effective January 1, 2011, the plans were closed to new participants.

Certain of the Company's subsidiaries have separate savings plans and the Company's international subsidiaries have other employee benefit plans. Expenses related to these plans and the Company's deferred compensation plan are included in the table below under "other plans, net".

The principal components of employee benefit plan expenses are as follows:

	Year ended December 31,		
	2016	2015	2014
	(in thousands)		
Expense:			
Savings plan	\$33,109	\$37,326	\$16,333

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Net actuarial loss and prior service credit for the unfunded supplemental benefit plans expected to be amortized from accumulated other comprehensive loss into net periodic cost over the next fiscal year include an expense of \$7.8 million and a credit of \$4.2 million, respectively.

Weighted-average actuarial assumptions used to determine costs for the plans for the years ended December 31, 2016 and 2015, were as follows:

	December 31,	
	2016	2015
Funded defined benefit pension plans		
Discount rate	4.31 %	4.07 %
Rate of return on plan assets	3.50 %	6.50 %
Unfunded supplemental benefit plans		
Discount rate	4.33 %	4.00 %

Weighted-average actuarial assumptions used to determine benefit obligations for the plans at December 31, 2016 and 2015, were as follows:

	December 31,	
	2016	2015
Funded defined benefit pension plans		
Discount rate	3.85 %	4.31 %
Unfunded supplemental benefit plans		
Discount rate	4.03 %	4.33 %

The discount rate assumption used for the Company's benefit plans reflects the yield available on high-quality, fixed-income debt securities that match the expected timing of the benefit obligation payments.

Assumptions for the expected long-term rate of return on assets of the funded defined benefit pension plans are based on future expectations for returns for each asset class based on the calculated market-related value of plan assets and the effect of periodic target asset allocation rebalancing, adjusted for the payment of reasonable expenses of the plan from plan assets. The expected long-term rate of return on assets was selected from within a reasonable range of rates determined by (1) historical actual and expected returns for the asset classes and (2) projections of inflation over the long-term period during which benefits are payable to plan participants. The Company believes the assumptions are appropriate based on the investment mix and long-term nature of the plan's investments. The use of expected long-term returns on plan assets may result in recognized pension income that is greater or less than the actual returns of those plan assets in any given year. Over time, however, the expected long-term returns are designed to approximate the actual long-term returns, and therefore result in a pattern of income and cost recognition that more closely matches the pattern of the services provided by the employees.

The Company has an investment policy which governs the management of, and strategy for, assets of the plan. The policy's investment objective is to increase the pension plan's funding status such that the plan becomes fully funded on a plan termination basis by taking progressively less risk through aligning a greater percentage of plan assets with plan liabilities as the plan becomes more fully funded.

Under the investment policy, asset allocation targets are segmented into liability tracking assets and return seeking assets. The objective of this allocation strategy is to increase the percentage of assets in liability tracking investments as settlement funded status improves. Return seeking assets generally include pooled investment vehicles, foreign and domestic equities, fixed income securities, cash, REITs, and commodities. Liability tracking assets generally include fixed income securities and pooled investment vehicles. The plan maintains a level of cash and cash equivalents appropriate for the timely disbursement of benefits and payment of expenses.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

During 2016, the funded status of the plans improved as additional contributions were received from the Company and a higher percentage of plan assets were allocated to liability tracking investments. At December 31, 2016, the majority of plan assets were invested in liability tracking investments pending completion of the termination of the plan in 2017.

A summary of the asset allocations for the funded defined benefit pension plans is as follows:

Asset category	December 31,	
	2016	2015
Cash and cash equivalents	13.2 %	1.1 %
Equities	— %	57.2 %
Fixed income funds	86.7 %	39.3 %
Other	0.1 %	2.4 %

The Company expects to make cash contributions of \$14.5 million to its unfunded supplemental benefit plans during 2017.

Benefit payments for all plans, which reflect expected future service, as appropriate, are expected to be made as follows:

Year	(in thousands)
2017	\$ 35,289
2018	\$ 35,765
2019	\$ 35,591
2020	\$ 35,518
2021	\$ 36,132
Five years thereafter	\$ 177,899

The Company categorizes plan assets, carried at fair value, using a three-level hierarchy for fair value measurements. See Note 14 Fair Value Measurements for a more in-depth discussion on the fair value hierarchy and a description for each level.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table presents the fair value of plan assets as of December 31, 2016 and 2015:

	Estimated fair value	Level 1	Level 2	Level 3
December 31, 2016	(in thousands)			
Cash and cash equivalents	\$38,424	\$38,424	\$—	\$—
Fixed income funds (a)	252,962	10,376	242,586	—
Other (b)	374	—	—	374
	\$291,760	\$48,800	\$242,586	\$ 374

	Estimated fair value	Level 1	Level 2	Level 3
December 31, 2015	(in thousands)			
Cash and cash equivalents	\$3,621	\$3,621	\$—	\$—
Equities (c)	129,633	83,675	45,958	—
Fixed income funds (a)	188,801	116,204	72,597	—
Other (b)	7,932	—	—	7,932
	\$329,987	\$203,500	\$118,555	\$7,932

(a) Investments in passively managed index funds and actively managed mutual funds with holdings in domestic and foreign corporate bonds, foreign government bonds, mortgage-backed securities, and other fixed income instruments. These investments are valued using matrix pricing models and quoted prices of the securities in active markets.

(b) Investments in a guaranteed deposit fund with holdings in insurance contracts. These investments are valued at contract value of the fund including contributions and earnings, less applicable costs and liabilities, as provided by the administrator of the fund.

(c) Investments in passively managed index funds, actively managed mutual funds with holdings in domestic and international equities, and investments in domestic equities. These investments are valued at the closing price reported on the major market on which the individual securities are traded or the Net Asset Value (“NAV”) provided by the administrator of the fund.

NOTE 14. Fair Value Measurements:

Certain of the Company's assets are carried at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company categorizes its assets and liabilities carried at fair value using a three-level hierarchy for fair value measurements that distinguishes between market participant assumptions developed based on market data obtained from sources independent of the Company (observable inputs) and the Company's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. The hierarchy level assigned to the assets and liabilities is based on management's assessment of the transparency and reliability of the inputs used to estimate the fair values at the measurement date. The three hierarchy levels are defined as follows:

Level 1—Valuations based on unadjusted quoted market prices in active markets for identical assets or liabilities.

Level 2—Valuations based on observable inputs (other than Level 1 prices), such as quoted prices for similar assets or liabilities at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly.

Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement, and involve management judgment.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

If the inputs used to measure fair value fall into different levels of the fair value hierarchy, the hierarchy level assigned is based upon the lowest level of input that is significant to the fair value measurement.

Assets measured at fair value on a recurring basis

The valuation techniques and inputs used by the Company to estimate the fair value of assets measured on a recurring basis are summarized as follows:

Debt securities

The fair values of debt securities were based on the market values obtained from independent pricing services that were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other market information and price quotes from well-established independent broker-dealers. The independent pricing services monitor market indicators, industry and economic events, and for broker-quoted only securities, obtain quotes from market makers or broker-dealers that they recognize to be market participants. The pricing services utilize the market approach in determining the fair value of the debt securities held by the Company. The Company obtains an understanding of the valuation models and assumptions utilized by the services and has controls in place to determine that the values provided represent fair value. The Company's validation procedures include comparing prices received from the pricing services to quotes received from other third party sources for certain securities with market prices that are readily verifiable. If the price comparison results in differences over a predefined threshold, the Company will assess the reasonableness of the changes relative to prior periods given the prevailing market conditions and assess changes in the issuers' credit worthiness, performance of any underlying collateral and prices of the instrument relative to similar issuances. To date, the Company has not made any material adjustments to the fair value measurements provided by the pricing services.

Typical inputs and assumptions to pricing models used to value the Company's U.S. Treasury bonds, municipal bonds, foreign government bonds, governmental agency bonds, governmental agency mortgage-backed securities and U.S. and foreign corporate debt securities include, but are not limited to, benchmark yields, reported trades, broker-dealer quotes, credit spreads, credit ratings, bond insurance (if applicable), benchmark securities, bids, offers, reference data and industry and economic events. For mortgage-backed securities, inputs and assumptions may also include the structure of issuance, characteristics of the issuer, collateral attributes and prepayment speeds. Non-agency mortgage-backed securities and certain corporate debt securities were not actively traded and there were fewer observable inputs available requiring the use of more judgment in determining their fair values, which resulted in their classification as Level 3.

Equity securities

The fair values of equity securities, including preferred and common stocks, were based on quoted market prices for identical assets that are readily and regularly available in an active market.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following tables present the fair values of the Company's assets, measured on a recurring basis, as of December 31, 2016 and 2015:

(in thousands)	Total	Level 1	Level 2	Level 3

Total assets	\$4,600,632	\$321,285	\$4,229,208	\$50,139

For the year ended December 31, 2016, transfers between Level 2 and Level 3 were based on market liquidity and related transparency of pricing and associated observable inputs for certain of the Company's corporate debt securities. There were no transfers between levels during the year ended December 31, 2015. Transfers into or out of the Level 3 category occur when unobservable inputs become more or less significant to the fair value measurement. The Company's policy is to recognize transfers between levels in the fair value hierarchy at the end of the reporting period.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following tables present a summary of the changes in the fair values of Level 3 assets measured on a recurring basis for the years ended December 31, 2016 and 2015:

Net realized investment losses	\$(5)	\$—	\$(5)	\$(75)	\$—	\$—	\$(75)
Financial instruments not measured at fair value							

In estimating the fair values of its financial instruments not measured at fair value, the Company used the following methods and assumptions:

Cash and cash equivalents

The carrying amount for cash and cash equivalents is a reasonable estimate of fair value due to the short-term maturity of these investments.

Deposits with banks

The fair value of deposits with banks is estimated based on rates currently offered for deposits of similar remaining maturities, where applicable.

Notes receivable, net

The fair value of notes receivable, net is estimated based on current market rates being offered for notes with similar maturities and credit quality.

Deposits

The carrying value of escrow and other deposit accounts approximates fair value due to the short-term nature of these liabilities.

Notes and contracts payable

The fair value of notes and contracts payable is estimated based on current rates offered to the Company for debt of similar remaining maturities.

NOTE 15. Share-Based Compensation Plans:

The First American Financial Corporation 2010 Incentive Compensation Plan (the "Incentive Compensation Plan"), effective May 28, 2010, permits the granting of stock options, stock appreciation rights, restricted stock, RSUs,

performance units, performance shares and other stock-based awards. Eligible participants in the Incentive Compensation Plan include the Company's directors and officers, as well as other employees. At December 31, 2016, 4.2 million shares of common stock remain available to be issued from either authorized and unissued shares or previously issued shares acquired by the Company, subject to certain annual limits based on the type of award granted. The Incentive Compensation Plan terminates 10 years from the effective date unless cancelled prior to that date by the Company's board of directors.

The First American Financial Corporation 2010 Employee Stock Purchase Plan (the "ESPP") allows eligible employees the option to purchase common stock of the Company at 85% of the lower of the closing price on either the first or last day of each quarterly offering period. There were 371,000 and 335,000 shares issued in connection with this plan for the years ended December 31, 2016 and 2015, respectively. At December 31, 2016, there were 2.7 million shares reserved for future issuances.

The following table presents compensation expense associated with the Company's share-based compensation plans:

	Year ended December 31,

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table summarizes RSU activity for the year ended December 31, 2016:

(in thousands, except weighted-average grant-date fair value)	Shares	Weighted-average grant-date fair value
RSUs unvested at December 31, 2015	1,354	\$29.20
Granted during 2016	1,028	\$36.70
Vested during 2016	(849)	\$30.77
Forfeited during 2016	(23)	\$31.68
RSUs unvested at December 31, 2016	1,510	\$33.38

As of December 31, 2016, there was \$26.8 million of total unrecognized compensation cost related to unvested RSUs that is expected to be recognized over a weighted-average period of 2.3 years. The fair value of RSUs is generally based on the market value of the Company's shares on the date of grant. The total fair value of shares vested and not distributed for the years ended December 31, 2016, 2015 and 2014 was \$25.9 million, \$20.3 million and \$18.2 million, respectively.

The following table summarizes stock option activity for the year ended December 31, 2016:

(in thousands, except weighted-average exercise price and contractual term)	Number outstanding	Weighted-average exercise price	Weighted-average remaining contractual term	Aggregate intrinsic value
Balance at December 31, 2015	132	\$ 27.66		
Exercised during 2016	—	—		
Balance at December 31, 2016	132	\$ 27.66	7.0 years	\$ 1,187
Vested and expected to vest at December 31, 2016	132	\$ 27.66	7.0 years	\$ 1,187
Exercisable at December 31, 2016	99	\$ 27.66	7.0 years	\$ 890

As of December 31, 2016, there was \$0.3 million of total unrecognized compensation cost related to unvested stock options of the Company that is expected to be recognized over a weighted-average period of 1 year.

No stock options were exercised during the year ended December 31, 2016. The total intrinsic value of stock options exercised for the years ended December 31, 2015 and 2014 was \$9.7 million and \$7.0 million, respectively. Intrinsic

value represents the difference between the fair market value of the Company's common stock on the date of exercise and the exercise price of each option.

NOTE 16. Stockholders' Equity:

In March 2014, the Company's board of directors approved an increase in the size of the Company's stock repurchase plan from \$150.0 million to \$250.0 million, of which \$182.4 million remained as of December 31, 2016. Purchases may be made from time to time by the Company in the open market at prevailing market prices or in privately negotiated transactions. During the year ended December 31, 2016, the Company repurchased and retired 14 thousand shares of its common stock for a total purchase price of \$454 thousand and, as of December 31, 2016, had repurchased and retired 3.2 million shares of its common stock under the current authorization for a total purchase price of \$67.6 million.

Tax effect	\$34,339	\$10,893	\$7,051	

(1) These components of AOCI are included in the computation of net periodic cost. See Note 13 Employee Benefit Plans for additional details.

NOTE 18. Commitments and Contingencies:

Lease commitments

The Company leases certain office facilities, automobiles and equipment under operating leases, which, for the most part, are renewable. The majority of these leases also provide that the Company pay insurance and taxes.

Future minimum rental payments under operating leases that have initial noncancelable lease terms in excess of one year as of December 31, 2016 are as follows:

	(in thousands)
Year	
2017	\$ 80,700
2018	66,151
2019	52,667
2020	41,701
2021	27,595
Thereafter	59,983
	\$ 328,797

Total rental expense for all operating leases and month-to-month rentals was \$91.4 million, \$93.3 million and \$93.5 million for the years ended December 31, 2016, 2015 and 2014, respectively.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Other commitments and guarantees

At December 31, 2016 and 2015, the Company was contingently liable for guarantees of indebtedness owed by affiliates and third parties to banks and others totaling \$7.1 million and \$8.2 million, respectively. The guarantee arrangements relate to promissory notes and other contracts that contingently require the Company to make payments to the guaranteed party upon the failure of debtors to make scheduled payments according to the terms of the notes and contracts. The Company's maximum potential obligation under these guarantees totaled \$7.1 million and \$8.2 million at December 31, 2016 and 2015, respectively, and is limited in duration to the terms of the underlying indebtedness. The Company has not incurred any costs as a result of these guarantees and has not recorded a liability on its consolidated balance sheets related to these guarantees at December 31, 2016 and 2015.

The Company also guarantees the obligations of certain of its subsidiaries. These obligations are included in the Company's consolidated balance sheets as of December 31, 2016 and 2015.

NOTE 19. Litigation and Regulatory Contingencies:

The Company and its subsidiaries are parties to a number of non-ordinary course lawsuits. These lawsuits frequently are similar in nature to other lawsuits pending against the Company's competitors.

For those non-ordinary course lawsuits where the Company has determined that a loss is both probable and reasonably estimable, a liability representing the best estimate of the Company's financial exposure based on known facts has been recorded. Actual losses may materially differ from the amounts recorded.

For a substantial majority of these lawsuits, however, it is not possible to assess the probability of loss. Most of these lawsuits are putative class actions which require a plaintiff to satisfy a number of procedural requirements before proceeding to trial. These requirements include, among others, demonstration to a court that the law proscribes in some manner the Company's activities, the making of factual allegations sufficient to suggest that the Company's activities exceeded the limits of the law and a determination by the court—known as class certification—that the law permits a group of individuals to pursue the case together as a class. In certain instances the Company may also be able to compel the plaintiff to arbitrate its claim on an individual basis. If these procedural requirements are not met, either the lawsuit cannot proceed or, as is the case with class certification or compelled arbitration, the plaintiffs lose the financial incentive to proceed with the case (or the amount at issue effectively becomes de minimis). Frequently, a court's determination as to these procedural requirements is subject to appeal to a higher court. As a result of, among other factors, ambiguities and inconsistencies in the myriad laws applicable to the Company's business and the uniqueness of the factual issues presented in any given lawsuit, the Company often cannot determine the probability of loss until a court has finally determined that a plaintiff has satisfied applicable procedural requirements.

Furthermore, because most of these lawsuits are putative class actions, it is often impossible to estimate the possible loss or a range of loss amounts, even where the Company has determined that a loss is reasonably possible. Generally

class actions involve a large number of people and the effort to determine which people satisfy the requirements to become plaintiffs—or class members—is often time consuming and burdensome. Moreover, these lawsuits raise complex factual issues which result in uncertainty as to their outcome and, ultimately, make it difficult for the Company to estimate the amount of damages which a plaintiff might successfully prove. In addition, many of the Company's businesses are regulated by various federal, state, local and foreign governmental agencies and are subject to numerous statutory guidelines. These regulations and statutory guidelines often are complex, inconsistent or ambiguous, which results in additional uncertainty as to the outcome of a given lawsuit—including the amount of damages a plaintiff might be afforded—or makes it difficult to analogize experience in one case or jurisdiction to another case or jurisdiction.

Most of the non-ordinary course lawsuits to which the Company and its subsidiaries are parties challenge practices in the Company's title insurance business, though a limited number of cases also pertain to the Company's other businesses. These lawsuits include, among others, cases alleging, among other assertions, that the Company, one of its subsidiaries and/or one of its agents:

- charged an improper rate for title insurance in a refinance transaction, including

100

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

• **Lewis v. First American Title Insurance Company**, filed on November 28, 2006 and pending in the United States District Court for the District of Idaho.

A court has granted class certification in Lewis. For the reasons stated above, the Company has been unable to assess the probability of loss or estimate the possible loss or the range of loss.

• misclassified certain employees, including

• **Cruz v. First American Financial Corporation, et al.**, filed on November 25, 2015 and pending in the Superior Court of the State of California, County of Orange,

• **Sager v. Interthinx, Inc.**, filed on January 23, 2015 and pending in the Superior Court of the State of California, County of Los Angeles, and

• **Weber v. Interthinx, Inc., et al.**, filed on April 17, 2015 and pending in the United States District Court for the Eastern District of Missouri.

These lawsuits are putative class actions for which a class has not been certified. For the reasons described above, as well as the applicability of certain indemnification rights the Company may have, the Company has not yet been able to assess the probability of loss or estimate the possible loss or the range of loss or, where the Company has been able to make an estimate, the Company believes the amount is not material to the consolidated financial statements as a whole.

• overcharged or improperly charged fees for products and services, conspired to fix prices, participated in the conveyance of illusory property interests, denied home warranty claims, and gave items of value to builders, brokers and others as inducements to refer business in violation of certain laws, such as consumer protection laws and laws generally prohibiting unfair business practices, and certain obligations, including

• **Downing v. First American Title Insurance Company, et al.**, filed on July 26, 2016 and pending in the United States District Court for the Northern District of Georgia,

• **Kaufman v. First American Financial Corporation, et al.**, filed on December 21, 2007 and pending in the Superior Court of the State of California, County of Los Angeles,

• **Kirk v. First American Financial Corporation, et al.**, filed on June 15, 2006 and pending in the Superior Court of the State of California, County of Los Angeles,

• **Lennen v. First American Financial Corporation, et al.**, filed on May 19, 2016 and pending in the United States District court for the Middle District of Florida,

• **McCormick v. First American Real Estate Services, Inc., et al.**, filed on December 31, 2015 and pending in the Superior Court of the State of California, County of Orange,

• **Sjobring v. First American Financial Corporation, et al.**, filed on February 25, 2005 and pending in the Superior Court of the State of California, County of Los Angeles,

• **Wilmot v. First American Financial Corporation, et al.**, filed on April 20, 2007 and pending in the Superior Court of the State of California, County of Los Angeles, and

• **In re First American Home Buyers Protection Corporation**, consolidated on October 9, 2014 and pending in the United States District Court for the Southern District of California.

All of these lawsuits, except Kaufman and Kirk, are putative class actions for which a class has not been certified. In Kaufman a class was certified but that certification was subsequently vacated. A trial of the Kirk matter has concluded and the judgment has been affirmed on appeal. For the reasons described above, the Company has not yet been able to assess the probability of loss or estimate the possible loss or the range of loss or, where the Company has been able to make an estimate, the Company believes the amount is not material to the consolidated financial statements as a

whole.

101

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

While some of the lawsuits described above may be material to the Company's operating results in any particular period if an unfavorable outcome results, the Company does not believe that any of these lawsuits will have a material adverse effect on the Company's overall financial condition or liquidity.

The Company also is a party to non-ordinary course lawsuits other than those described above. With respect to these lawsuits, the Company has determined either that a loss is not reasonably possible or that the estimated loss or range of loss, if any, is not material to the consolidated financial statements as a whole.

The Company's title insurance, property and casualty insurance, home warranty, banking, thrift, trust and investment advisory businesses are regulated by various federal, state and local governmental agencies. Many of the Company's other businesses operate within statutory guidelines. Consequently, the Company may from time to time be subject to examination or investigation by such governmental agencies. Currently, governmental agencies are examining or investigating certain of the Company's operations. These exams or investigations include inquiries into, among other matters, pricing and rate setting practices in the title insurance industry, competition in the title insurance industry, real estate settlement service customer acquisition and retention practices and agency relationships. With respect to matters where the Company has determined that a loss is both probable and reasonably estimable, the Company has recorded a liability representing its best estimate of the financial exposure based on known facts. While the ultimate disposition of each such exam or investigation is not yet determinable, the Company does not believe that individually or in the aggregate they will have a material adverse effect on the Company's financial condition, results of operations or cash flows. These exams or investigations could, however, result in changes to the Company's business practices which could ultimately have a material adverse impact on the Company's financial condition, results of operations or cash flows.

The Company's Canadian operations provide certain services to lenders which it believes to be exempt from excise tax under applicable Canadian tax laws. However, in October 2014, the Canadian taxing authority provided internal guidance that the services in question should be subject to the excise tax. While discussions with the taxing authority are ongoing, the Company believes that the guidance may result in an assessment. The amount, if any, of such assessment is not currently known, and any such assessment would be subject to negotiation. In the event that the Company disagrees with the ultimate assessment, the Company intends to avail itself of avenues of appeal. While the Company believes it is reasonably likely that the Company would prevail on the merits, a loss associated with the matter is possible. In light of the foregoing, the Company is not currently able to reasonably estimate a loss or range of loss associated with the matter. While such a loss could be material to the Company's operating results in any particular period if an unfavorable outcome results, the Company does not believe that this matter will have a material adverse effect on the Company's overall financial condition or liquidity.

The Company and its subsidiaries also are involved in numerous ongoing routine legal and regulatory proceedings related to their operations. With respect to each of these proceedings, the Company has determined either that a loss is not reasonably possible or that the estimated loss or range of loss, if any, is not material to the consolidated financial statements as a whole.

NOTE 20. Business Combinations:

During the years ended December 31, 2016 and 2015, the Company completed acquisitions for an aggregate purchase price of \$115.3 million and \$32.3 million, respectively. The Company has recorded preliminary fair value estimates for the assets acquired and liabilities assumed, related to certain acquisitions in the current year, which are subject to change pending completion of the Company's purchase price allocation. The Company allocates the purchase price of each acquisition to the assets acquired and liabilities assumed using a variety of valuation techniques, including discounted cash flow analysis. These acquisitions have been included in the Company's title insurance and services segment.

FIRST AMERICAN FINANCIAL CORPORATION

AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

NOTE 21. Segment Financial Information:

The Company consists of the following reportable segments and a corporate function:

•The Company's title insurance and services segment issues title insurance policies on residential and commercial property in the United States and offers similar or related products and services internationally. This segment also provides closing and/or escrow services; accommodates tax-deferred exchanges of real estate; provides products, services and solutions involving the use of real property related data designed to mitigate risk or otherwise facilitate real estate transactions; maintains, manages and provides access to title plant records and images; provides evidence of title; and provides banking, trust, document custodial and investment advisory services. The Company, through its principal title insurance subsidiary and such subsidiary's affiliates, transacts its title insurance business through a network of direct operations and agents. Through this network, the Company issues policies in the 49 states that permit the issuance of title insurance policies and the District of Columbia. The Company also offers title insurance and other insurance and guarantee products, as well as related settlement services in foreign countries, including Canada, the United Kingdom, Australia, South Korea and various other established and emerging markets.

•The Company's specialty insurance segment issues property and casualty insurance policies and sells home warranty products. The property and casualty insurance business provides insurance coverage to residential homeowners and renters for liability losses and typical hazards such as fire, theft, vandalism and other types of property damage. This business is licensed to issue policies in all 50 states and the District of Columbia and actively issues policies in 47 states. The majority of policy liability is in the western United States, including approximately 63% in California. In certain markets it also offers preferred risk auto insurance to better compete with other carriers offering bundled home and auto insurance. The home warranty business provides residential service contracts that cover residential systems, such as heating and air conditioning systems, and certain appliances against failures that occur as the result of normal usage during the coverage period. This business currently operates in 39 states and the District of Columbia.

The corporate function consists primarily of certain financing facilities as well as the corporate services that support the Company's business operations. Eliminations consist of inter-segment revenues and related expenses included in the results of the operating segments.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure
None.

Item 9A. Controls and Procedures
Disclosure Controls and Procedures

The Company's chief executive officer and chief financial officer have concluded that, as of December 31, 2016, the end of the fiscal year covered by this Annual Report on Form 10-K, the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended, were effective, based on the evaluation of these controls and procedures required by Rule 13a-15(b) thereunder.

Management's Annual Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting has been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles ("GAAP").

The Company's internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of the Company; provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures are being made only in accordance with authorization of management and directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the Company's consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2016. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control—Integrated Framework (2013). Based on that assessment under the framework in Internal Control—Integrated Framework (2013), management determined that, as of December 31, 2016, the Company's internal control over financial reporting was effective.

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the Company's consolidated financial statements provided in Item 8, above, has issued a report on the Company's internal control over financial reporting.

Changes in Internal Control Over Financial Reporting

There was no change in the Company's internal control over financial reporting during the quarter ended December 31, 2016, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART III

The information required by Items 10 through 14 of this report is expected to be set forth in the sections entitled “Information Regarding the Nominees for Election,” “Information Regarding the Other Incumbent Directors,” “Election of Class I Directors,” “Executive Officers,” “Section 16(a) Beneficial Ownership Reporting Compliance,” “Board and Committee Meetings,” “Executive Compensation,” “Compensation Discussion and Analysis,” “2016 Director Compensation,” “Codes of Ethics,” “Compensation Committee Interlocks and Insider Participation,” “Compensation Committee Report,” “Securities Authorized for Issuance under Equity Compensation Plans,” “Who are the largest principal stockholders outside of management?,” “Security Ownership of Management,” “Principal Accounting Fees and Services” “Policy on Audit Committee Pre-approval of Audit and Permissible Nonaudit Services of Independent Auditor,” “Transactions with Management and Others” and “Independence of Directors” in the Company’s definitive proxy statement, and is hereby incorporated in this report and made a part hereof by reference. If the definitive proxy statement is not filed within 120 days after the close of the fiscal year, the Company will file an amendment to this Annual Report on Form 10-K to include the information required by Items 10 through 14.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) 1. & 2. Financial Statements and Financial Statement Schedules

The Financial Statements and Financial Statement Schedules filed as part of this report are listed in the accompanying index at page 50 in Item 8 of Part II of this report.

- (a) 3. Exhibits. See Exhibit Index. (Each management contract or compensatory plan or arrangement in which any director or named executive officer of First American Financial Corporation, as defined by Item 402(a)(3) of Regulation S-K (17 C.F.R. §229.402(a)(3)), participates that is included among the exhibits listed on the Exhibit Index is identified on the Exhibit Index by an asterisk (*).)
