Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the fiscal year ended December 31, 2014

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
Commission File Number: 814-01025

AMERICAN CAPITAL SENIOR FLOATING, LTD.

(Exact name of registrant as specified in its charter)

Maryland

(State of Incorporation)

46-1996220
(I.R.S. Employer
Identification No.)

2 Bethesda Metro Center
14th Floor
Bethesda, MD 20814
(Address of principal executive offices)
301-968-9310
(Registrant's telephone number, including area code)
Securities registered pursuant to Section 12(b) of the
Act:

Title of each class

Common Stock, \$0.01 par
value per share

Name of each exchange
on which registered
The NASDAQ Stock Market
LLC
(NASDAQ Global Select
Market)

Securities registered pursuant to Section 12(g) of the
Act: NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: American Capital Senior Floating, Ltd. - Form 10-K

Large accelerated filer Accelerated filer Non-accelerated
filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant as of June 30, 2014 was \$134,785,238 based upon a closing price of the registrant's common stock of \$14.00 per share as reported on the NASDAQ Global Select Market on that date. For this computation, the registrant has excluded the market value of all shares of its common stock reported as beneficially owned by executive officers and directors of the registrant and certain other stockholders; such an exclusion shall not be deemed to constitute an admission that any such person is an "affiliate" of the registrant. The registrant had 10,000,100 shares of common stock outstanding as of March 25, 2015.

Documents Incorporated by Reference: Portions of the Registrant's Proxy Statement relating to the Registrant's 2015 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K are incorporated by reference into Part III of this report. Certain exhibits previously filed with the Securities and Exchange Commission are incorporated by reference into Part IV of this report.

PART I.

Item 1. Business

General

American Capital Senior Floating, Ltd. (which is referred to as “ACSF”, “we”, “us” and “our”) was organized in February 2013 as a Maryland corporation and commenced operations on October 15, 2013. We are structured as an externally managed, non-diversified closed-end investment management company that has elected to be regulated as a business development company (“BDC”) under the Investment Company Act of 1940, as amended (the “1940 Act”). For tax purposes, we intend to elect to be taxed as a regulated investment company (“RIC”), as defined in Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). On November 14, 2013, we formed a wholly-owned consolidated special purpose financing vehicle, ACSF Funding I, LLC (“ACSF Funding”), a Delaware limited liability company.

In January 2014, we completed an initial public offering (“IPO”) of 10.0 million shares of common stock at the public offering price of \$15.00 per share for gross proceeds of \$150.0 million. We are externally managed by American Capital ACSF Management, LLC (our “Manager”), an indirect subsidiary of American Capital Asset Management, LLC (“ACAM”), which is a wholly-owned portfolio company of American Capital, Ltd. (“American Capital”). Our common stock is listed on the NASDAQ Global Select Market, where it trades under the symbol “ACSF”.

Our investment objective is to provide attractive, risk-adjusted returns over the long term primarily through current income while seeking to preserve our capital. We actively manage a leveraged portfolio composed primarily of diversified investments in first lien and second lien floating rate loans principally to large-market U.S.-based companies (collectively, “Senior Secured Floating Rate Loans” or “Loans”) which are commonly referred to as leveraged loans. Standard and Poor's (“S&P”), an independent international financial data and investment services company and provider of global equity indexes, defines large-market loans as loans to issuers with earnings before interest, taxes, depreciation and amortization (“EBITDA”) of greater than \$50 million. We also invest in equity tranches of collateralized loan obligations (“CLOs”) which are securitized vehicles collateralized primarily by Loans and we may invest in debt tranches of CLOs. In addition, we may selectively invest in loans issued by middle market companies, mezzanine and unitranche loans and high yield bonds. Additionally, we may from time to time hold or invest in other equity investments and other debt or equity securities generally arising from a restructuring of Loan positions previously held by us. We utilize leverage to enhance our returns and we are limited under the 1940 Act as a BDC on the amount of leverage we can utilize.

As of December 31, 2014, our investment portfolio totaled \$276.4 million at fair value and our net asset value (“NAV”) was \$144.2 million. Our portfolio was comprised of 117 Loan obligors totaling \$224.8 million and 16 CLO equity investments totaling \$51.6 million. During our fiscal year ended December 31, 2014, we invested \$226.6 million and investments sold or repaid totaled \$148.5 million.

Our Manager

Our Manager is an indirect subsidiary of ACAM, which is a wholly-owned portfolio company of American Capital. Founded in 1986, American Capital is a publicly-traded private equity firm and global asset manager which directly and through its asset management business, originates, underwrites and manages investments in private equity, sponsored finance, real estate, energy and infrastructure, leveraged loans and CLOs. From its eight offices in the United States, Europe and Asia, American Capital has \$86 billion in total assets under management (including levered assets) across its target asset classes.

Our Manager is responsible for administering our business activities and day-to-day operations, subject to the supervision and oversight of our Board of Directors. All of our officers and the members of our Manager's senior investment team and other support personnel are employees of American Capital or the parent company of our Manager. Because neither we nor our Manager have any employees, our Manager has entered into an administrative services agreement with American Capital and the parent company of our Manager, pursuant to which our Manager will have access to their employees, including senior management and operations, finance, compliance, legal, capital markets, accounting, treasury, investor relations and information technologies staffs, and their infrastructure, operations, business relationships and management expertise, to enable our Manager to fulfill all of its responsibilities

under the management agreement. Refer to "Risk Factors - Risks related to our relationship with our Manager and American Capital" for additional information.

Investment Focus

Our investment focus is primarily on Senior Secured Floating Rate Loans and CLOs and, under normal market conditions, we will have at least 80% of our assets in Senior Secured Floating Rate Loans or CLOs that are pooled investment vehicles that invest primarily all of their assets in Senior Secured Floating Rate Loans. As a BDC, we are restricted from holding more than 30% of our assets in nonqualified investments, as defined by Section 55(a) of the 1940 Act. Investments in debt and equity tranches

of CLOs are deemed nonqualified assets for BDC compliance purposes and therefore we are limited as to the amount of CLO investments we hold at any given time in our portfolio.

Senior Secured Floating Rate Loans

Senior Secured Floating Rate Loans are loans generally issued by U.S.-based middle market and large market private and public companies. Issuers typically use Senior Secured Floating Rate Loans to refinance existing debt, finance acquisitions or leveraged buyouts, to pay dividends and for other general corporate purposes.

Investors typically classify the Loan market by issuer size. S&P defines large-market loans as loans to companies with EBITDA of greater than \$50 million and middle-market loans as loans to companies with EBITDA of less than \$50 million.

Senior Secured Floating Rate Loans pay interest based on a floating rate typically calculated as a spread over the London Interbank Offered Rate ("LIBOR") or another market index. Interest rates are periodically reset to reflect changes in market index rates. As a result of the recent low interest rate environment, many Senior Secured Floating Rate Loans include provisions defining a minimum market index rate, also referred to as an interest rate floor. Spreads are typically expressed in basis points and are defined at origination and may be adjusted over the life of a loan to account for changes in a borrower's credit profile according to predefined credit covenants. Market spreads vary according to market dynamics. Senior Secured Floating Rate Loans are generally structured as minimally-amortizing loans with monthly interest payments and are typically collateralized by a company's assets.

Senior Secured Floating Rate Loans may be structured with various lien priorities, such as first lien and second lien, on underlying collateral. Principal payments are generally applied based on lien position with second lien loans generally paid after payments to first lien loans or other loans with seniority in priority of payments. As a result, second lien loans are generally riskier and therefore have a higher spread compared to first lien loans. The market for second lien loans is significantly smaller and less liquid than the market for first lien loans.

Senior Secured Floating Rate Loans are generally rated "Ba1" or lower by Moody's Investor Services, "BB+" or lower by S&P or "BB+" or lower by Fitch Ratings, Inc. (collectively, "below investment grade").

Senior Secured Floating Rate Loans are typically arranged by a syndicate of investment or commercial banks, who syndicate loans to third-party investors ("the primary market"). After being placed into the primary market, investors may seek to buy and sell Senior Secured Floating Rate Loan positions to other investors in over-the-counter transactions (the "secondary market"). We invest in Senior Secured Floating Rate Loans through both the primary and secondary markets.

We concentrate our investment activities in Senior Secured Floating Rate Loans to those issued by companies with free cash flow generation, defensible market positions and attractive market dynamics. Our Manager and its affiliates have significant experience underwriting and managing investments across a number of industries and seek to create a diversified portfolio of investments across various industries in which they have direct expertise.

The following is an illustrative list of the industries in which we have invested. We may also invest in other industries if we are presented with attractive opportunities.

Aerospace & Defense	Diversified Consumer Services	Independent Power and Renewable Electricity Producers	Metals & Mining
Auto Components	Diversified Telecommunications Services	Industrial Conglomerates	Multiline Retail
Building Products	Electrical Equipment	Insurance	Oil, Gas & Consumable Fuels
Capital Markets	Energy Equipment & Services	Internet & Catalog Retail	Pharmaceuticals
Chemicals	Food & Staples Retailing	Internet Software & Services	Professional Services
	Food Products	IT Services	

Edgar Filing: American Capital Senior Floating, Ltd. - Form 10-K

Commercial Services & Supplies			Real Estate Management & Development
Construction & Engineering	Health Care Equipment & Supplies	Life Sciences Tools & Services	Software
Constructions Materials	Health Care Providers & Services	Machinery	Textiles, Apparel & Luxury Goods
Containers & Packaging	Health Care Technology	Marine	Trading Companies & Distributors
Distributors	Hotels, Restaurants & Leisure	Media	Transportation Infrastructure

Listed below are the top ten industries in which our Senior Secured Floating Rate Loans were invested as of December 31, 2014 and 2013, represented as a percentage of our consolidated investment portfolio at fair value, excluding the CLO equity investments:

Industry	December 31, 2014	Industry	December 31, 2013
Health Care Providers & Services	9.9%	Software	11.7%
Media	7.7%	Hotels, Restaurants & Leisure	8.4%
Software	7.4%	Health Care Providers & Services	7.9%
Aerospace & Defense	7.4%	Commercial Services & Supplies	4.7%
Hotels, Restaurants & Leisure	6.7%	Aerospace & Defense	4.4%
Commercial Services & Supplies	5.0%	Metals & Mining	4.2%
Insurance	4.1%	Chemicals	4.1%
Health Care Equipment & Supplies	3.3%	IT Services	4.0%
Containers & Packaging	2.9%	Diversified Consumer Services	3.8%
Oil, Gas & Consumable Fuels	2.8%	Food & Staples Retailing	3.6%

Collateralized Loan Obligations

A CLO is a special purpose vehicle that is formed to finance a pool of loans which meet predefined investment criteria. It is typically a managed vehicle that may trade and reinvest the loans and generally raises capital by issuing both debt and equity securities. Typically, a CLO will issue various classes, or “tranches,” of debt broadly categorized as senior and subordinate debt tranches as well as an equity tranche.

CLO securities receive cash flows generated by underlying collateral according to a defined payment waterfall. Principal and interest payments to CLO debt tranches are typically paid sequentially, with senior debt tranches receiving cash flows prior to subordinate debt tranches. The risk and return to CLO debt tranches vary depending upon each tranche’s right to collect cash flows generated by the underlying collateral. CLO debt tranches are generally rated, with ratings ranging from the highest investment grade to below investment grade, with coupons commensurate with the risk of each tranche. CLO debt tranches are also generally structured with covenants which, if violated, divert cash flows to the senior tranches prior to making any interest or principal payments to subordinate debt tranches or equity tranches.

Unlike debt securities issued by CLOs, CLO equity securities are not rated and do not have contractually stated payment schedules. At origination, the weighted average interest rate of all CLO debt tranches is generally lower than the weighted average interest earned by a CLO’s underlying collateral, resulting in an interest rate spread. CLO equity securities receive residual cash flows, or the interest spread, generated by the underlying collateral after obligated payments for CLO debt securities and other expenses of the CLO have been made. CLO equity tranches typically comprise approximately 10% of total capital raised by a CLO.

CLOs are generally structured as managed entities, with a collateral manager assigned to manage the underlying CLO collateral within predefined investment criteria. CLOs are typically structured with a reinvestment period, during which prepayments and the sale of underlying collateral may be reinvested. Collateral managers are responsible for reinvesting proceeds for a CLO during the reinvestment period. By continuously reinvesting proceeds during the reinvestment period, the effective leverage on CLO equity securities is generally maintained during the reinvestment period.

A result of the typical CLO structure is that CLO equity tranches can generate relatively front-end loaded cash flows. CLO equity cash flows are also highly dependent on the credit performance of their underlying collateral pool. If loans within the collateral pool default, the reduced amount of performing collateral leads to lower cash flows available for distribution through CLO waterfalls, resulting in lower residual cash flows available for equity tranches. Residual cash flows are also impacted by changes in portfolio spreads for CLO collateral. Declines in spreads on newly issued collateral during the reinvestment period result in lower residual cash flows available for equity tranches. We focus predominantly on CLOs collateralized primarily by Senior Secured Floating Rate Loans. Under normal market conditions, we expect to limit these investments to no more than 20% of the value of our portfolio.

Current Market Conditions

Economic and market conditions can impact our business and our investments in multiple ways, including the financial condition of the portfolio companies in which we invest, our investment returns, our funding costs, our access to the capital markets and our access to credit. The Loan market has grown substantially in recent years with the amount of total Loans outstanding exceeding \$800 billion as of the end of 2014. Growth has largely been a function of the strong performance of the asset class across multiple credit cycles coupled with the changing regulatory and investor landscape and the attractive floating rate nature of the assets. Despite the size and liquidity of the Loan market, there continues to be volatility in the Loan market as a result of the dynamic correlation between retail fund flows, the rate of CLO issuance and amount of new issue supply. Despite uncertainties regarding economic and market conditions, the new issue loan pipeline in the leveraged loan market remains active, with high quality first lien and second lien transactions supporting leveraged buyouts, strategic acquisitions, plant expansions, recapitalizations and refinancings for large to mid-sized borrowers. Similarly, the CLO equity pipeline also remains very healthy with a backlog of managers raising capital for new investment vehicles.

Portfolio Valuation

We value our investments on a quarterly basis, or more frequently if required, in accordance with accounting principles generally accepted in the United States of America ("GAAP") and the 1940 Act.

Employees

We do not have any employees. We are managed by our Manager pursuant to the management agreement between our Manager and us.

Investment Committee

Our Manager has established an Investment Committee, consisting of Malon Wilkus, John Erickson, Samuel Flax, Mark Pelletier and Thomas McHale, each of whom is an officer of our Manager. The role of the Investment Committee is to monitor the performance of our Manager with respect to our investment strategy, to monitor our investment portfolio and to monitor our regulatory compliance. The Investment Committee meets as frequently as it believes is required to maintain prudent oversight of our investment activities. The Investment Committee has established operating policies and monitoring guidelines for ACSF and receives notification in the event we operate outside of such policies or guidelines.

Senior Investment Team

Our Manager's senior investment team currently consists of Mark Pelletier, Michael Cerullo, Dana Dratch, Juan Miguel Estela, Christian Toro, and William Weiss. One or more members of our Manager's senior investment team must approve each new investment that we make. We consider our senior investment team, led by Mark Pelletier, to be our portfolio managers.

Underwriting Process

We take a qualitative and quantitative approach to sourcing, valuing and selecting investment opportunities. Our approach is grounded in fundamental analysis coupled with an active portfolio management strategy. Our underwriting approach culminates in the development of an investment thesis for each investment, giving consideration to various factors.

We begin by developing a macroeconomic understanding of current and expected economic conditions that provides the context for investment decisions. We also develop a view on each industry that we invest in or contemplate entering. When forming our view of an industry, several factors are considered. These factors include but are not limited to: (i) cyclicity, including demand elasticity of an industry's products, (ii) defensibility of an industry's position within the value chain, including consideration of the regulatory environment, (iii) pace of technological change and (iv) direction of industry-wide trends.

In addition, when assessing potential investments, we perform a fundamental analysis on each issuer. This analysis includes consideration of several investment specific factors. These factors include but are not limited to: (i) defensibility of market position, (ii) maturity of the business model, (iii) sustainability of a cash flow and strength of

coverage ratios, (iv) consistency and level of historical performance relative to peers, (v) depth of management teams and alignment of incentives and (vi) the level and quality of leverage ratios.

We make investments with the context of our overall portfolio in mind. This is done to ensure that material or significant concentration risks do not develop within industry and issuer subclasses. Generally, we seek to diversify our portfolio across industries and issuers. The level of diversification can vary as the risk-reward profile of the portfolio changes. We actively manage

our portfolio's composition to ensure that the portfolio is optimally structured. Each security is also analyzed on a relative value basis.

We also evaluate market conditions before making investment decisions. Our view of market conditions is influenced by several factors including but not limited to: (i) current and expected liquidity in the market, (ii) relative value of issuances, (iii) level of spreads relative to other opportunities, (iv) covenant levels and (v) volume of new issuances. We actively manage our investment portfolio by investing in both the new issue and secondary loan markets as better relative value investment opportunities become available.

Portfolio Management

In order to maximize our returns for our stockholders, we employ robust portfolio and risk management processes. Our processes include monitoring market conditions and the performance of our investments. As a result of our portfolio and risk management processes, we may change the portfolio composition as we deem appropriate. On a quarterly basis, we perform a comprehensive review and reevaluation of our investments. As part of this process, we review the investment thesis for each position, as well as financial performance, covenant compliance, other credit issues and the relative value of our positions to similar securities in the market. Our analysis provides the basis for, and updates to, our recommendations for each portfolio position. Positions that have deviated significantly from their investment thesis will be placed on a list (our "Watch List") and monitored more frequently. Members of our Manager's senior investment team are actively involved in the quarterly review process and monitor changes to our recommendations and holdings of our portfolio.

In addition, on a monthly basis, we update the analysis for Watch List portfolio companies with current operating performance and the senior investment team discusses an overview of the risk exposure, mitigation strategies, secondary trading levels relative to the perceived recovery and justification for continued Watch List inclusion. Our portfolio management process extends beyond the monthly and quarterly review processes. Through routine formal and informal meetings, our Manager's senior investment team monitors Watch List constituents, performing positions and market conditions. The senior investment team receives real-time updates on portfolio company earnings, significant announcements and secondary trading price levels from the team of credit analysts and traders who support our business.

Competitive Advantages

We believe we have competitive advantages over other operators in the leveraged loan market and other BDCs that allow us to deliver attractive risk-adjusted returns to our stockholders. Our advantages include the following characteristics:

Established Platform

The senior investment team has extensive experience investing across the loan market, in multiple credit cycles with, on average, over 20 years of investment experience. As of December 31, 2014, the senior investment team manages approximately \$5 billion of investments across multiple CLOs, ACSF and other managed accounts of American Capital or its affiliates. In total, there are 19 investment professionals employed by American Capital or its affiliates who are dedicated to underwriting Senior Secured Floating Rate Loan and CLO investments and a 5-person transaction management team who are dedicated to overseeing the transaction processing and operations for Senior Secured Floating Rate Loans. Through our management agreement and the administrative services agreement, we have access to American Capital and its affiliates' employees, including senior management, investment professionals, operations, finance, compliance, legal, capital markets, accounting, treasury, investor relations, internal audit and information technologies staffs, and their infrastructure, operations, business relationships and management expertise.

Portfolio Management

We manage our portfolio through a well-defined underwriting and portfolio management process as described above that leverages the established platform of American Capital and its affiliates. We believe this reduces the downside risk to our stockholders and provides a scalable framework for investing in the future.

Actively Managed Granular Portfolio

Our portfolio is granular with the maximum loan obligor exposure as of December 31, 2014 of 1.4% and an average position size of 0.8% of the portfolio. Due to the size and liquidity available in the Loan market, our Manager is able to actively manage the portfolio and respond to changes in credit quality or market tones to ensure the portfolio is optimized for the benefit of our stockholders. During the year ended December 31, 2014, our portfolio turnover ratio was 53.80%.

Expense Structure

Our expenses are limited to our financing costs, taxes, costs incurred by our Manager and its affiliates for expenses related to our operations incurred on our behalf, excluding employment-related expenses, a 0.80% management fee and no incentive fee. Additionally, for the 24 months following the IPO, our other operating expenses, as defined in our management agreement, will be limited to an annual rate of 0.75% of our stockholder's equity, less net unrealized appreciation or depreciation, each as determined under GAAP at the end of the most recently completed fiscal quarter.

Competition

Our primary competitors include other BDCs, CLO investors, other credit focused investment funds, commercial and investment banks, commercial financing companies, insurance companies and, to the extent they provide an alternative form of financing, hedge funds. Many of our competitors are substantially larger and may have greater financial, technical and marketing resources than we do. For example, we believe some competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than we can. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or the requirements we must satisfy to maintain our qualification as a RIC. For additional information concerning the competitive risks we face, see "Risk Factors - Risks Related to Our Business and Structure - We operate in a highly competitive market for investment opportunities."

Management Agreement

Our management agreement with our Manager has an initial term expiring January 15, 2016. Unless terminated earlier, the management agreement will remain in effect from year-to-year thereafter if approved annually by the Board of Directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, and, in either case, if also approved by the majority of our directors who are not "Interested Persons" as defined under the 1940 Act. The management agreement automatically terminates in the event of its assignment, as defined in the 1940 Act, by our Manager. The management agreement may also be terminated at any time, without the payment of any penalty, upon 60 days' written notice, by (i) holders of a majority of our outstanding voting securities, (ii) our Board of Directors or (iii) our Manager. See "Risk Factors—Risks Related to Our Relationship with Our Manager and American Capital."

The management agreement requires our Manager to oversee our business affairs in conformity with the Investment Committee's operating policies and guidelines. Our Manager at all times is subject to the supervision and direction of our Board of Directors, the terms and conditions of the management agreement and such further limitations or parameters as may be imposed from time to time by our Board of Directors. Our Manager is generally responsible for (i) the selection, purchase, sale and monitoring of our investment portfolio, (ii) our financing and hedging activities and (iii) providing us with investment advisory services. Our Manager is responsible for our day-to-day operations and performs such services and activities relating to our assets and operations, as appropriate.

Our Manager receives a management fee from us that is payable quarterly in arrears. The management fee is calculated at an annual rate of 0.80% of our total consolidated assets, excluding cash and cash equivalents and net unrealized appreciation or depreciation, each as determined under GAAP at the end of the most recently completed fiscal quarter. There is no incentive compensation paid to our Manager under the management agreement.

Because neither we nor our Manager have any employees, our Manager provides services to us through certain employees of American Capital or the parent company of our Manager pursuant to an administrative services agreement. Under such agreement, our Manager is provided with the services and other resources necessary to perform its obligations and responsibilities under the management agreement. In addition, certain members of American Capital's senior management team serve as officers of our Manager and us. Further, under the administrative services agreement, American Capital and the parent company of our Manager are required to provide our Manager with the services of their employees such that our Manager may provide us with a chief executive officer, chief financial officer and chief investment officer pursuant to the terms of the management agreement.

ACSF Funding has entered into an investment advisory agreement with our Manager to manage its assets. No additional compensation is payable to our Manager under such agreement.

Expenses

We do not have any employees and do not pay our officers any cash or non-cash equity compensation. We pay, or reimburse our Manager and its affiliates, for expenses related to our operations incurred on our behalf, but excluding employment-related expenses of our and our Manager's officers and any employees of American Capital or the parent company of our Manager who

provide services to us pursuant to the management agreement or to our Manager pursuant to the administrative services agreement. However, for 24 months following the IPO, our other operating expenses will be limited to an annual rate of 0.75% of our stockholder's equity, less net unrealized appreciation or depreciation, each as determined under GAAP at the end of the most recently completed fiscal quarter. For the purposes of the preceding operating expense limit, other operating expenses include both (i) our operating expenses reimbursed to our Manager and its affiliates for expenses related to our operations incurred on our behalf, and (ii) our operating expenses directly incurred by us excluding the management fee, interest costs, taxes and accrued costs and fees related to actual, pending or threatened litigation, each as determined under GAAP for the most recently completed fiscal quarter. As a result of this operating expense limit during the above period, any reimbursements to our Manager and its affiliates could be reduced or eliminated and, in certain instances, our Manager could be required to reimburse us so that our other operating expenses do not exceed the limits described above. Subsequent to 24 months following our IPO, there are no limits on the reimbursement to our Manager or its affiliates of such expenses related to our operations. The costs and expenses required to be paid by us include, but are not limited to:

- certain costs incurred in connection with capital raising activities;
- transaction costs incident to the acquisition, disposition, financing, hedging and ownership of our investments;
- diligence costs incurred for prospective investments;
- expenses incurred in contracting with third parties;
- external legal, auditing, accounting, consulting, investor relations, portfolio valuation, brokerage and administrative fees and expenses;
- the compensation and expenses of our independent directors and the cost of liability insurance to indemnify our directors and officers and the officers and employees of our Manager and its affiliates who provide services to us;
- the costs associated with our establishment and maintenance of any indebtedness (including interest expense, commitment fees, accounting fees, legal fees, closing costs, rating agency fees and similar expenses);
- expenses relating to the payment of dividends;
- costs incurred by our Board of Directors and personnel of our Manager or its affiliates for travel on our behalf;
- expenses relating to communications to holders of our securities and in complying with the continuous reporting and other requirements of the U.S. Securities and Exchange Commission ("SEC") and other governmental bodies;
- tax and license fees applicable to us and our subsidiaries, including external fees for tax and regulatory compliance;
- insurance costs incurred by us and our subsidiaries;
- transfer agent, custodial, trustee, third-party loan administration and exchange listing fees;
- the costs of printing and mailing proxies and reports to our stockholders;
- the costs of establishing and maintaining our website;
- all costs of organizing, modifying or dissolving our company or any subsidiary and costs in preparation of entering into or exiting any business activity;
- our pro rata portion of costs associated with any computer software, hardware or information technology services that are used by us or our Manager on our behalf;
- our pro rata portion of the costs and expenses incurred with respect to market information systems and publications, research publications and materials used by us or our Manager on our behalf;
- settlement, clearing, trustee, prime brokerage and custodial fees and expenses relating to us;
- the costs of maintaining compliance with all federal, state and local rules and regulations or any other regulatory agency (as such costs relate to us), all taxes and license fees and all insurance costs incurred on behalf of us;
- the costs of administering our equity incentive plans, if any; and
- our pro rata portion of rent (including disaster recovery facility costs and expenses), telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses of our Manager and its affiliates required for our operations.

REGULATION

Business Development Company Requirements

We are an externally managed, non-diversified closed-end management investment company that intends to be treated as a RIC under the Code. We have elected to be regulated as a BDC under the 1940 Act. The 1940 Act contains prohibitions and restrictions relating to transactions between BDCs and their affiliates (including any investment advisors), principal underwriters and affiliates of those affiliates or underwriters and requires that a majority of the directors of a BDC be persons other than “Interested Persons,” as that term is defined in the 1940 Act. In addition, the 1940 Act provides that we may not change the nature of our business so as to cease to be, or to withdraw our election as, a BDC unless approved by a majority of our outstanding voting securities. We may invest up to 100% of our assets in securities acquired directly from issuers in privately negotiated transactions. With respect to such securities, we may, for the purpose of public resale, be deemed an “underwriter” as that term is defined in the Securities Act of 1933. Our intention is to not write (sell) or buy put or call options to manage risks associated with the publicly traded securities of our portfolio companies, except that we may enter into hedging transactions to manage the risks associated with interest rate currency fluctuations.

However, we may purchase or otherwise receive warrants to purchase the common stock of our portfolio companies in connection with acquisition financing or other investments. Similarly, in connection with an acquisition, we may acquire rights to require the issuers of acquired securities or their affiliates to repurchase them under certain circumstances. We also do not intend to acquire securities issued by any investment company that exceed the limits imposed by the 1940 Act. Under these limits, we generally cannot acquire more than 3% of the total outstanding voting stock of any registered investment company, invest more than 5% of the value of our total assets in the securities of one investment company or invest, in the aggregate, more than 10% of the value of our total assets in the securities of more than one investment company. With regard to that portion of our portfolio invested in securities issued by investment companies, it should be noted that such investments might subject our stockholders to additional expenses. None of these policies is fundamental and may be changed without stockholder approval.

We are also required to provide and maintain a bond issued by a reputable fidelity insurance company to protect us against larceny and embezzlement. Furthermore, as a BDC, we are prohibited from protecting any director or officer against any liability to us or our stockholders arising from willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such person’s office.

Qualifying Assets

As a BDC, we may not acquire any asset other than certain qualifying assets described in the 1940 Act, unless, at the time the acquisition is made, the value of such qualifying assets represent at least 70% of the value of our total assets.

The principal categories of qualifying assets relevant to our business include the following:

• securities purchased in transactions not involving any public offering from:

- an issuer that (i) is organized and has its principal place of business in the United States, (ii) is neither an investment company other than a wholly-owned small business investment company nor an entity that would be an investment company but for certain statutory exemptions, and (iii) does not have any class of securities listed on a national securities exchange with a market capitalization in excess of \$250 million; or
- an issuer that satisfies the criteria set forth in clauses (a) (i) and (ii) above but not clause (a)(iii), so long as, at the time of purchase, we own at least 50% of (i) the greatest amount of equity securities of the issuer, including securities convertible into such securities and (ii) the greatest amount of certain debt securities of such issuer, held by us at any point in time during the period when such issuer was an eligible portfolio company, except that
- options, warrants, and similar securities which have by their terms expired and debt securities which have been converted, or repaid or prepaid in the ordinary course of business or incident to a public offering of securities of such issuer, shall not be considered to have been held by us, and we are one of the 20 largest holders of record of such issuer’s outstanding voting securities;
- securities of an issuer described in clauses (a)(i) and (ii) above with respect to which we control (alone or together as a part of a group), we in fact exercise a controlling influence over such issuer’s management or policies and a person affiliated with us is on the issuer’s Board of Directors;
-

securities received in exchange for or distributed with respect to securities described above, or pursuant to the exercise of options, warrants or rights relating to such securities; and
cash, cash items, U.S. government securities, or high quality debt securities maturing in one year or less from the time of investment.

Managerial Assistance to Portfolio Companies

In order to count portfolio securities as qualifying assets for the purpose of the 70% test, we must either control the issuer of the securities or must offer to make available to the issuer of the securities significant managerial assistance; except that, where we purchase such securities in conjunction with one or more other persons acting together, one of the other persons in the group may make available such managerial assistance. This assistance could involve monitoring the operations of our portfolio companies, participating in board and management meetings, consulting and advising officers of portfolio companies and providing other organizational and financial guidance. We may receive fees for these services and will reimburse our Manager for its allocated costs in providing such assistance, subject to the review and approval by our Board of Directors, including our independent directors.

Temporary Investments

Pending investment in other types of qualifying assets described in the 1940 Act, we may invest our funds in cash items, government securities, agency paper or high quality debt securities maturing in one year or less from the time of investment in such high quality debt investments. We refer to such assets and cash herein as temporary investments.

Leverage

We have, and intend to utilize, leverage on our investment portfolio. Our leverage may vary periodically depending on market conditions, our portfolio composition and our Manager's assessment of risks and returns. We may finance our assets, subject to market conditions, through a combination of financing arrangements, including, but not limited to, warehouse facilities, securitizations and term financing facilities. The 1940 Act permits us, as a BDC, to issue senior securities in amounts such that our asset coverage is at least 200% after each issuance of senior securities. Asset coverage is defined in the 1940 Act as the ratio which the value of the total assets, less all liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of senior securities representing indebtedness. Such indebtedness may also be incurred for the purpose of effecting share repurchases. As a result, we are exposed to the risks of leverage. As permitted by the 1940 Act, we may, in addition, borrow amounts up to 5% of our total assets for temporary purposes.

Under the 1940 Act, if a BDC has any senior debt securities outstanding that were publicly issued, the BDC must make provision to prohibit the declaration of any dividend (except a dividend payable in the stock of the BDC) if its asset coverage is below 200% at the time of the distribution after deducting the amount of such dividend.

Issuance of Stock

As a BDC, we are generally not able to issue and sell our common stock at a price below our NAV per share, exclusive of any distributing commission or discount, except (i) with the prior approval of a majority of our stockholders, (ii) in connection with a rights offering to our existing stockholders or (iii) under such other circumstances as the SEC may permit.

Code of Ethics

We and our Manager have each adopted the Code of Ethics that applies to our officers and directors and the officers and employees of our Manager, American Capital and its affiliates who provide services to us. Among other matters, our Code of Ethics is designed to deter wrongdoing and to promote honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; full, fair, accurate, timely and understandable disclosure in our SEC reports and other public communications; compliance with applicable governmental laws, rules and regulations; prompt internal reporting of violations of the code to appropriate persons identified in the code; and accountability for adherence to the code. Our Code of Ethics also establishes procedures for personal investments and restricts certain personal securities transactions pursuant to Rule 17j-1 under the 1940 Act. Personnel subject to the Code of Ethics may invest in securities for their personal investment accounts, including securities that may be purchased or held by us, so long as such investments are made in accordance with the Code of Ethics' requirements. The Code of Ethics is available, free of charge, on our website at www.ACSF.com or www.AmericanCapitalSeniorFloating.com. In addition, the Code of Ethics is available on the SEC's website at www.sec.gov. The public may read and copy the Code of Ethics at the SEC's Public Reference Room in Washington, DC. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. A copy of our Code of Ethics can also be obtained, after paying a duplicating fee, by electronic

request at the following email address: publicinfo@sec.gov, or by writing the SEC's Public Reference Section at 100 F Street, N.E., Washington, D.C 20549.

Proxy Voting Policies and Procedures

Our investments do not generally entitle us to voting rights in our portfolio companies. We have delegated our proxy voting responsibility to our Manager for portfolio companies in which we may have voting rights. Our Manager has adopted proxy voting policies and procedures, which will be reviewed periodically by our Manager and our disinterested directors, and accordingly, are subject to change.

As an investment adviser registered under the Advisers Act, our Manager has a fiduciary duty to act solely in the best interests of its clients. As part of this duty, our Manager recognizes that it must vote client securities in a timely manner free of conflicts of interest and in the best interests of its clients. Our Manager's policies and procedures for voting proxies are intended to comply with Section 206 of, and Rule 206(4)-6 under, the Advisers Act.

Our Manager's Policy

Under our Manager's proxy voting policies and procedures, officers of our Manager will consult with each other and our senior investment team in determining how to vote, taking into account our and our stockholders' interests, any potential conflicts of interest and any voting guidelines of our Manager. Our Manager will consult with legal counsel to identify potential conflicts of interest. Where a potential conflict of interest exists, our Manager may, if it so elects, resolve it by following the recommendation of a disinterested third-party, by seeking the direction of our disinterested directors or, in extreme cases, by abstaining from voting. While our Manager may retain an outside service to provide voting recommendations and to assist in analyzing votes, our Manager will not delegate its voting authority to any third-party.

An officer of our Manager will keep a written record of how all such proxies are voted. Our Manager will retain records of (i) proxy voting policies and procedures, (ii) all proxy statements received (or it may rely on proxy statements filed on the SEC's EDGAR system in lieu thereof), (iii) all votes cast, (iv) investor requests for voting information and (v) any specific documents prepared or received in connection with a decision on a proxy vote. If it uses an outside service, our Manager may rely on such service to maintain copies of proxy statements and records, so long as such service will provide a copy of such documents promptly upon request. You may obtain information regarding how we voted proxies, free of charge, by making a written request for proxy voting information to: American Capital Senior Floating, Ltd., 2 Bethesda Metro Center, 14th Floor, Bethesda, MD 20814 or by calling us collect at (301) 968-9310.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act imposes a wide variety of regulatory requirements on publicly held companies and their insiders. Many of these requirements affect us. For example:

- pursuant to Rule 13a-14 of the Securities Exchange Act of 1934, or the Exchange Act, our Chief Executive Officer and Chief Financial Officer must certify the accuracy of the financial statements contained in our periodic reports;
- pursuant to Item 307 of Regulation S-K, our periodic reports must disclose our conclusions about the effectiveness of our disclosure controls and procedures;

- pursuant to Rule 13a-15 of the Exchange Act, beginning with our fiscal year ending December 31, 2015, our management must prepare an annual report regarding its assessment of our internal control over financial reporting, which must be audited by our independent registered public accounting firm beginning with the first fiscal year in which we do not qualify as an emerging growth company; and

- pursuant to Item 308 of Regulation S-K and Rule 13a-15 of the Exchange Act, our periodic reports must disclose whether there were significant changes in our internal controls over financial reporting or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

The Sarbanes-Oxley Act requires us to review our current policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated thereunder. We will continue to monitor our compliance with all regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we are in compliance with that act.

JOBS Act

We are an "emerging growth company," as defined in the Jumpstart our Business Startups Act of 2012 (the "JOBS Act") until the earliest of:

- the last day of our fiscal year ending December 31, 2019;
- the last day of the fiscal year in which our total annual gross revenues first exceed \$1 billion;
- the date on which we have, during the prior three-year period, issued more than \$1 billion in non-convertible debt; or

the last day of a fiscal year in which we (1) have an aggregate worldwide market value of our common stock held by non-affiliates of \$700 million or more, computed at the end of each fiscal year as of the last business day of our most recently completed second fiscal quarter and (2) have been an Exchange Act reporting company for at least one year (and filed at least one annual report under the Exchange Act).

Under the JOBS Act, we are exempt from the provisions of Section 404(b) of the Sarbanes-Oxley Act, which would require that our independent registered public accounting firm provide an attestation report on the effectiveness of our internal control over financial reporting. This may increase the risk that material weaknesses or other deficiencies in our internal control over financial reporting go undetected.

Under the JOBS Act, emerging growth companies are permitted to cover only two years of financial information in the Management's Discussion and Analysis of Financial Condition and Results of Operations disclosures. In addition, for the presentation of "selected financial data," which ordinarily covers five years, an emerging growth company may omit selected financial data for any period prior to the earliest audited period presented in its initial registration statement. Because we are not taking advantage of this relief under the JOBS Act, such relief has not impacted the disclosures we make in this Annual Report on Form 10-K.

Under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards until such time as those standards apply to private companies. We have made an irrevocable election not to take advantage of this exemption from new or revised accounting standards. We will therefore be subject to the same new or revised accounting standards as other public companies that are not emerging growth companies.

Taxation as a RIC

We intend to elect to be treated as a RIC under Subchapter M of the Code. As a RIC, we generally will not have to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that we timely distribute to our stockholders as dividends. To qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements, as described below. In addition, to be relieved of U.S. federal income taxes on income and gains distributed to our stockholders, we must distribute to our stockholders, for each taxable year, at least 90% of our "investment company taxable income," which is generally our net ordinary income plus the excess of realized net short-term capital gains over realized net long-term capital losses (the "Annual Distribution Requirement").

If we qualify as a RIC and meet the Annual Distribution Requirement, then we will not be subject to U.S. federal income tax on the portion of our investment company taxable income and net capital gains, defined as net long-term capital gains in excess of net short-term capital losses, we distribute to stockholders. We will be subject to U.S. federal income tax at regular corporate rates on any investment company taxable income or net capital gain not distributed (or deemed distributed) to our stockholders.

We will be subject to a nondeductible U.S. federal excise tax of 4% on our undistributed "ordinary income" and "capital gain net income" (each as defined below) unless for each calendar year we distribute (including through "deemed distributions" as described below) an amount equal to or greater than the sum of (a) 98% of our "ordinary income" (generally, our taxable income excluding net short-term and net long-term capital gains or losses for the calendar year), (b) 98.2% of our "capital gain net income" (including both net short-term and net long-term capital gains or losses) realized, subject to certain modifications, for the 12-month period ending October 31 of such calendar year, and (c) any income recognized, but not distributed, in the preceding years. For this purpose, however, any ordinary income or capital gain net income retained by us that is subject to corporate income tax for the tax year ending in the calendar year will be considered to have been distributed by year end.

In order to qualify as a RIC for U.S. federal income tax purposes, we must, among other things: (a) elect to be treated as a RIC, (b) meet the Annual Distribution Requirement, (c) qualify to be treated as a BDC under the 1940 Act at all times during each taxable year, (d) derive in each taxable year at least 90% of our gross income from dividends, interest, payments with respect to securities loans, gains from the sale of stock or other securities, other income derived with respect to our business of investing in such stock or securities, and net income derived from interests in "qualified publicly traded partnerships" (partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends and other permitted RIC income) (the "90% Income Test"), and (e) diversify our holdings so that at the end of each quarter of the taxable year (i) at least 50% of the value of our assets consists of cash, cash equivalents, U.S. government securities, securities of other RICs, and other securities if such other securities of any one issuer do not represent more than 5% of the value of our assets or more than 10% of the outstanding voting securities of the issuer (which for these purposes includes the equity securities of a "qualified publicly traded partnership"), and (ii) no more than 25% of the value of our

assets are invested in securities, other than U.S. government securities or securities of other RICs, of one issuer or two or more issuers that are controlled (as determined under applicable tax rules) by us and that are engaged in the same or similar or related trades or businesses (the “Diversification Tests”).

Our income for tax purposes, which determines the Annual Distribution Requirement, generally differs from our income as measured by GAAP due to temporary and permanent differences in the recognition of income and expenses, returns of capital, and net unrealized appreciation or depreciation of investments.

We may be required to recognize taxable income in circumstances in which we do not receive a corresponding payment in cash. For example, if we hold debt obligations that are treated under applicable tax rules as having original issue discount

("OID") (such as debt instruments with payment-in-kind ("PIK") interest or, in certain cases, increasing interest rates, or debt instruments issued with warrants), we must include in income each year a portion of the OID that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. We may also have to include in our income other amounts that we have not yet received in cash, such as deferred loan origination fees that are paid after origination of the loan or are paid in non-cash compensation such as warrants or stock. We anticipate that a portion of our income may constitute OID or other income required to be included in taxable income prior to receipt of cash. In addition, we may be required to accrue for U.S. federal income tax purposes amounts attributable to our investment in CLOs that may differ from the distributions received in respect of such investments.

Because any OID or other amounts accrued will be included in our investment company taxable income for the year of the accrual, we may be required to make a distribution to our stockholders in order to satisfy the Annual Distribution Requirement, even though we will not have received any corresponding cash amount. As a result, we may have difficulty meeting the Annual Distribution Requirement. We may have to sell some of our investments at times and/or at prices we do not consider advantageous, raise additional debt or equity capital or forgo new investment opportunities for this purpose. If we are not able to obtain cash from other sources, we may not qualify as a RIC for tax purposes and thus may become subject to corporate-level U.S. federal income tax.

Gain or loss realized by us from warrants acquired by us as well as any loss attributable to the lapse of such warrants generally will be treated as capital gain or loss. Such gain or loss generally will be long-term or short term, depending on how long we held a particular warrant.

We may purchase a residual or subordinated interest in a CLO that is treated for U.S. federal income tax purposes as an equity investment in a passive foreign investment company ("PFIC"), a foreign corporation that receives at least 75% of its annual gross income from passive sources (such as interest, dividends, rents, royalties or capital gain) or holds at least 50% of its total assets in investments producing such passive income. In addition, we may purchase or acquire through other means an equity interest in a company that is considered a PFIC. If we purchase shares in a foreign corporation that is treated as a PFIC, we may be subject to U.S. federal income tax on our allocable share of a portion of any "excess distribution" received on, or any gain from the disposition of, such shares even if (in certain circumstances) our allocable share of such income is distributed as a taxable dividend to the PFIC's stockholders.

Additional charges in the nature of interest generally will be imposed on us in respect of deferred taxes arising from any such excess distribution or gain. If we elect to treat a PFIC as a qualified electing fund ("QEF") under the Code, in lieu of the foregoing requirements, we will be required to include in income each year our proportionate share of the ordinary earnings and net capital gain of the QEF, even if such income is not distributed to us by the QEF.

Alternatively, we can elect mark-to-market treatment for a PFIC; in that case, we will recognize as ordinary income our allocable share of any increase in the value of such PFIC, and as ordinary loss our allocable share of any decrease in such value to the extent that any such decrease does not exceed prior increases included in our income. Under either election, we may be required to recognize in a year income in excess of our distributions from PFICs and proceeds from dispositions of PFIC shares during that year, and such income will be taken into account for purposes of the Annual Distribution Requirement and the 4% U.S. federal excise tax.

We may purchase a residual or subordinated interest in a CLO that is treated for U.S. federal income tax purposes as an equity investment in a controlled foreign corporation ("CFC"). In addition, we may purchase or acquire through other means an equity interest in a company that is considered a CFC. If we hold more than 10% of the shares in a foreign corporation that is treated as a CFC, we may be treated as receiving a deemed distribution (taxable as ordinary income) each year from such foreign corporation in an amount equal to our pro rata share of the corporation's income for the tax year (including both ordinary earnings and capital gains), whether or not the corporation makes an actual distribution during such year. This deemed distribution of the CFC's income for its tax year is referred to as subpart F income. In general, a foreign corporation will be classified as a CFC if more than 50% of the shares of the corporation, measured by reference to combined voting power or value, is owned (directly, indirectly or by attribution) by U.S. stockholders. A "U.S. stockholder," for this purpose, is any U.S. person that possesses (actually or constructively) 10% or more of the combined voting power of all classes of shares of a corporation. If we are treated as receiving a deemed distribution from a CFC, we will be required to include such distribution in our investment

company taxable income regardless of whether we receive any actual distributions from such CFC, and such income will be taken into account for purposes of the Annual Distribution Requirement and the 4% U.S. federal excise tax. If we acquire a 10% or lesser interest in a CFC, we are required to treat it as a PFIC for federal income tax purposes. Although the Code generally provides that income inclusions from a QEF and subpart F income will be “good income” for purposes of the 90% Income Test to the extent it is distributed to a RIC in the year it is included in the RIC’s income, the Code does not specifically provide whether income inclusions from a QEF and subpart F income for which no distribution is received during the RIC’s taxable year would be “good income” for the 90% Income Test. The IRS has issued a series of private rulings in which it has concluded that all income inclusions from a QEF and subpart F income included in a RIC’s income would constitute “good income” for purposes of the 90% Income Test. Such rulings are not binding on the IRS except with respect to the taxpayers to whom such rulings were issued. Accordingly, although we believe that the income inclusions from a QEF and subpart F income of a CLO that we are required to include in our taxable income would be “good income” for purposes of the 90% Income Test,

no guaranty can be made that the IRS would not assert that such income would not be “good income” for purposes of the 90% Income Test. If such income were not considered “good income” for purposes of the 90% Income Test, we may not qualify as a RIC.

Our investments in non-U.S. securities may be subject to non-U.S. income, withholding and other taxes. In that case, our yield on those securities would be decreased. Stockholders will generally not be entitled to claim a credit or deduction with respect to non-U.S. taxes paid by us. Any gain or loss attributable to fluctuations in exchange rates between the time we accrue income, expenses, or other liabilities denominated in a foreign currency and the time we actually collect such income or pay such expenses or liabilities is generally treated as ordinary income or loss. Similarly, gain or loss on foreign currency forward contracts and the disposition of debt denominated in a foreign currency, to the extent attributable to fluctuations in exchange rates between the acquisition and disposition dates, are also generally treated as ordinary income or loss.

If we do not satisfy the Annual Distribution Requirement or otherwise do not qualify as a RIC in any taxable year, and certain relief provisions are not available, we will be subject to tax in such year on all of our taxable income, regardless of whether we make any distributions to our stockholders. In that case, all of such income will be subject to corporate-level U.S. federal income tax, reducing the amount available to be distributed to our stockholders.

As a RIC, we will not be allowed to carry forward or carry back a net operating loss for purposes of computing our investment company taxable income in other taxable years. We generally are permitted to carry forward for an indefinite period any capital losses not used to offset capital gains. However, future transactions that we engage in may limit our ability to use any capital loss carryforwards, and unrealized losses once realized, under Section 382 of the Code.

Some of the income and fees that we may recognize may not satisfy the 90% Income Test to qualify as a RIC. In order to ensure that such income and fees do not disqualify us as a RIC for a failure to satisfy such income test, we may be required to recognize such income and fees directly or indirectly through one or more entities treated as corporations for U.S. federal income tax purposes. Such corporations will be required to pay U.S. corporate income tax on their earnings, which ultimately will reduce our return on such income and fees.

Under the 1940 Act, if a BDC has any senior debt securities outstanding that were publicly issued, the BDC must make provision to prohibit the declaration of any dividend (except a dividend payable in the stock of the BDC) if its asset coverage is below 200% at the time of the distribution after deducting the amount of such dividend. If we are unable to make sufficient distributions to satisfy the Annual Distribution Requirement, we may not qualify as RIC. Certain of our investment practices may be subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower taxed long-term capital gain and qualified dividend income into higher taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause us to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions, and (vii) produce income that will not be qualifying income for purposes of the 90% Income Test. We will monitor our transactions and may make certain tax elections in order to mitigate the effect of these provisions.

Failure to Qualify as a RIC

If we do not satisfy the 90% Income Test for any taxable year or the Diversification Tests at the end of any quarter of such taxable year, we may nevertheless continue to qualify as a RIC for such year if certain relief provisions of the Code apply (which, among other things, may require us to pay certain corporate-level U.S. federal taxes or to dispose of certain assets).

If we were unable to qualify for treatment as a RIC, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would they be required to be made. Distributions, including distributions of net long-term capital gain, would generally be taxable to our stockholders as dividend income to the extent of our current and accumulated earnings and profits. Such dividend income would be taxable as a qualified dividend eligible for preferential U.S. federal tax rates in the case of U.S. stockholders, as

discussed below, provided that the shares have been held for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date. Subject to certain limitations under the Code, corporate distributees would be eligible for the dividends received deduction. Distributions in excess of our current and accumulated earnings and profits would be treated first as a return of capital to the extent of a stockholder's tax basis, and any remaining distributions would be treated as capital gain.

If we do not qualify as a RIC for two or more taxable years, in order to qualify as a RIC in a subsequent year we may be subject to regular corporate tax on any net built-in gains with respect to certain of our assets (i.e., the excess of the aggregate gains, including items of income, over aggregate losses that would have been realized with respect to such assets if we had been liquidated) that we elect to recognize on requalification or when recognized over the next ten years.

Information Available

Our address is 2 Bethesda Metro Center, 14th Floor, Bethesda, MD 20814. Our phone number is (301) 968-9310, and our internet address is www.ACSF.com. We make available, free of charge on our website, our proxy statement, Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after we electronically file such material with, or furnish it to the SEC.

Information contained on our website is not incorporated by reference into this Annual Report on Form 10-K and you should not consider information contained on our website to be part of this Annual Report on Form 10-K or any other report we file with the SEC.

The SEC also maintains a website that contains reports, proxy and information statements and other information we file with the SEC at www.sec.gov. The public may read and copy these reports, proxy and information statements at the SEC's Public Reference Room in Washington, D.C. Copies of these reports, proxy and information statements and other information may also be obtained, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing the SEC's Public Reference Section, 100 F Street, N.E., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330.

Item 1A. Risk Factors

You should carefully consider the risks described below and all other information contained in this Report, including our consolidated financial statements and the related notes thereto and the other reports and documents filed by us with the SEC, before you decide whether to invest in ACSF. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us, or not presently deemed material by us, may also impair our operations and performance. If any of the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected. If that happens, the trading price of our common stock could decline, and you may lose all or part of your investment. The risks discussed below also include forward-looking statements and our actual results may differ substantially from those discussed in these forward-looking statements. See "Forward-Looking Statements" in this Report.

Risks Relating to Economic Conditions

Economic recessions or downturns may have a material adverse effect on our business, financial condition and results of operations, and could impair the ability of our portfolio companies to repay loans

Economic recessions or downturns may result in a prolonged period of market illiquidity, which could have a material adverse effect on our business, financial condition and results of operations. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could limit our investment originations, limit our ability to grow and negatively impact our operating results. In addition, if a recession were to occur, the financial condition of the portfolio companies in which we invest may deteriorate, which could ultimately lead to difficulty in meeting their debt service obligations to us and an increase in defaults. Additionally, the end markets for certain of our portfolio companies' products and services would likely experience negative economic trends. The performance of certain of our portfolio companies may be negatively impacted by these economic or other conditions, which may ultimately result in our receipt of a reduced level of interest income from our portfolio companies and/or losses or charge offs related to our investments, and, in turn, may adversely affect distributable income. Further, adverse economic conditions may decrease the value of collateral securing some of our debt and CLO investments. As a result, the payment terms of our investments and/or cash interest rates may be modified. These factors may result in our receipt of a reduced level of interest income from our portfolio companies and/or losses or charge offs related to our investments, and, in turn, may adversely affect distributable income and have a material adverse effect on our results of operations.

A disruption in capital markets could negatively affect our business

As a BDC, we may need access to the capital markets to maintain our ability to either refinance existing or raise additional capital for investment and growth purposes. Without sufficient access to the capital markets, we may be forced to curtail our business operations or we may not be able to pursue new business opportunities. Disruptive conditions in the financial industry and the impact of new legislation in response to those conditions could restrict our business operations and could adversely impact our results of operations and financial condition. If the fair value of our assets declines substantially, we may not maintain the asset coverage ratios required by the 1940 Act, which would affect our ability to issue senior securities, including borrowings, and pay dividends, and could materially impair our business operations. Our liquidity could be impaired further by an inability to access the capital markets. Equity capital may be difficult to raise because, subject to some limited exceptions, as a BDC, we will generally not be able to issue additional shares of our common stock at a price less than NAV. In addition, our ability to incur indebtedness or issue preferred stock will be limited by applicable regulations such that our asset coverage, as defined in the 1940 Act, must equal at least 200% immediately after each time we incur indebtedness or issue preferred stock. The debt capital that will be available, if at all, may be at a higher cost and on less favorable terms and conditions in the future. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations. These situations may arise due to circumstances that we may be unable to control, such as inaccessibility to the credit markets, a severe decline in the value of the U.S. dollar, an economic downturn or an operational problem that affects third parties or us, and could materially damage our business. Moreover, we are unable to predict when economic and market conditions may become more favorable or worsen. Even if such conditions improve broadly and significantly over the long term, adverse conditions in particular sectors of the financial markets could adversely

impact our business.

Global economic, political and market conditions may adversely affect our business, results of operations and financial condition, including our revenue growth and profitability

Past recessions have had a significant negative impact on the operating performance and fair value of Senior Secured Floating Rate Loans which comprise the majority of our investment portfolio. Many of our portfolio companies could be adversely impacted again by any future economic downturn or recession and may be unable to repay our investments, may be unable to be sold at a price that would allow us to recover our investment, or may be unable to operate during such recession. Worldwide financial market crises, as well as various social and political tensions in the United States and around the world, may cause increased market volatility, may have long-term effects on the United States and worldwide financial markets, and may cause

economic uncertainties or deterioration in the United States and worldwide. Since 2010, several European Union (“EU”) countries, including Greece, Ireland, Italy, Spain, and Portugal, have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the Euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. In addition, the fiscal policy of foreign nations, such as China, may have a severe impact on the worldwide and United States financial markets. The Ukraine peace talks may be derailed. Worldwide oil prices may continue to decrease and stay low for a prolonged period of time. We do not know how the financial markets will be affected by these events and cannot predict the effects of these or similar events in the future on the United States economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so. Such investment performance could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to Our Business and Structure

We have limited operating history

We were formed in February 2013, acquired our initial portfolio in the period from October through December 2013 and completed our IPO in January 2014. As a result of our lack of operating history, we are subject to many of the business risks and uncertainties associated with recently formed businesses, including the risk that we will not achieve our investment objective and that the value of your investment could decline substantially.

We are dependent upon American Capital’s key management personnel for our future success

We depend on the diligence and skill of senior management and other members of management of American Capital and certain of its affiliates for raising capital and the selection, structuring, closing and monitoring of our investments. Our future success depends to a significant extent on the continued service of such senior management and other members of management. We cannot assure you that any such individual will not terminate his or her relationship with us. The departure of certain of our executive officers or key employees of American Capital and certain of its affiliates could materially adversely affect our ability to implement our business strategy. In addition, we can offer no assurance that American Capital ACSF Management, LLC will remain our Manager. Our Manager’s senior investment team is and may in the future become affiliated with entities engaged in business activities similar to those conducted by us, and may have conflicts of interest in allocating their time. Our Manager’s senior investment team dedicates a significant portion of their time to our activities; however, they may be engaged in other business activities that could divert their time and attention in the future.

We operate in a highly competitive market for investment opportunities

A number of entities will compete with us to make investments in our target portfolio companies. Our primary competitors include other BDCs and CLO investors, other credit focused investment funds, commercial and investment banks, commercial financing companies, insurance companies and, to the extent they provide an alternative form of financing, hedge funds. Many of our potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a lower cost of funds and access to funding sources that may not be available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments than we do, which could allow them to consider a wider variety of investments and establish more relationships than we can. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us. We cannot assure you that the competitive pressures we will face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment goals.

We may experience fluctuations in our quarterly results

We may experience material fluctuations in our quarterly operating results due to many factors including changes in the credit quality of our portfolio, changes in the fair value of our portfolio, changes in the amount of loans on non-accrual status, changes in interest rates and changes in our expenses. Therefore, results for any historical period

are not indicative of performance in future periods.

We incur significant costs as a result of being a publicly traded company

As a publicly-traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act, and other rules implemented by the SEC and the listing standards of the NASDAQ Stock Market. Upon ceasing to qualify as an emerging growth company under the JOBS Act, our independent registered public accounting firm will be required to attest to the effectiveness of our internal control

over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act, which will increase costs associated with our periodic reporting requirements.

The Investment Committee and/or our Board of Directors may change our operating policies, guidelines and strategies without prior notice or stockholder approval, the effects of which may be adverse

The Investment Committee and/or our Board of Directors has the authority to modify or waive our operating policies, guidelines and strategies without prior notice and without stockholder approval. We cannot predict the effect any changes to our operating policies, guidelines and strategies would have on our business, NAV, operating results and the value of our stock. However, the effects might be adverse, which could negatively impact our ability to pay you distributions and cause you to lose part or all of your investment.

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results or prevent fraud. As a result, stockholders could lose confidence in our financial and other public reporting, which would harm our business and the trading price of our common stock

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations. In addition, any testing by us conducted in connection with Section 404 of the Sarbanes-Oxley Act, or the subsequent testing by our independent registered public accounting firm (when undertaken, as noted above), may reveal deficiencies in our internal control over financial reporting that are deemed to be material weaknesses or that may require prospective or retroactive changes to our financial statements or identify other areas for further attention or improvement. Ineffective internal controls over financial reporting could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock.

We are required to disclose changes made in our internal control on financial reporting on a quarterly basis and our management is required to assess the effectiveness of these controls annually. However, for as long as we are an “emerging growth company” under the recently enacted JOBS Act, our independent registered public accounting firm will not be required to attest to the effectiveness of our internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act. We could be an emerging growth company for up to five years from the date of our IPO. An independent assessment of the effectiveness of our internal controls could detect problems that our management’s assessment might not detect. Undetected material weaknesses in our internal controls could lead to financial statement restatements and require us to incur the expense of remediation.

Changes in laws or regulations governing our operations or our non-compliance with those laws or regulations may adversely affect our business or cause us to alter our business strategy

We and our portfolio companies are subject to regulation by laws at the local, state, federal and foreign levels, including with respect to securities laws, tax and accounting standards. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any change in these laws or regulations or our non-compliance with these laws or regulations could have a material adverse impact on our business. Certain of these laws and regulations pertain specifically to BDCs. Additionally, any changes to the laws and regulations governing our operations relating to permitted investments may cause us to alter our investment strategy in order to avail ourselves of new or different opportunities. Such changes could result in material differences to the strategies and plans set forth in this report and may result in our investment focus shifting from the areas of expertise of our Manager and its affiliates to other types of investments in which our Manager and its affiliates may have less expertise or little or no experience. Thus, any such changes, if they occur, could have a material adverse effect on our results of operations and the value of your investment. On October 22, 2014, six federal agencies approved a final rule requiring sponsors of securitization transactions to retain risk in those transactions. The final rule implemented the risk retention requirements in the Dodd-Frank Wall Street Reform and Consumer Protection Act. The final rule largely retained the risk retention framework contained in the proposal issued by the agencies in August 2013 and generally required sponsors of asset-backed securities (“ABS”) to retain not less than five percent of the credit risk of the assets collateralizing the ABS issuance. The rule also set forth prohibitions on transferring or hedging the credit risk that the sponsor was required to retain. In spite of calls from CLO and leveraged loan market participants for certain

exemptions from the risk retention requirements in the final rule for CLOs, the agencies declined to create an exemption for open market CLOs or to create a third-party risk retention alternative for open market CLOs, citing ongoing concerns about the leveraged loan market, including systemic risk resulting from the origination and pooling of leveraged loans with poor underwriting standards. Certain limited exemptions granted by the final rule were generally considered to be inconsistent with the current market practice in the leveraged loan market and were not expected to be widely utilized. The implementation of such risk retention rules by CLOs or any shift in the market practice in the leveraged loan market could have a material impact on our future investments in CLOs.

It is unclear how increased regulatory oversight and changes in the method for determining LIBOR may affect the value of the financial obligations to be held or issued by us that are linked to LIBOR, or how such changes could affect our results of operations or financial condition

Senior Secured Floating Rate Loans pay interest based on a floating rate calculated as a spread over a market index. The London-Interbank Offered Rate (“LIBOR”) is generally used as the market index for Senior Secured Floating Rate Loans. As a result of concerns about the accuracy of the calculation of LIBOR, a number of British Bankers’ Association (“BBA”) member banks entered into settlements with certain regulators and law enforcement agencies with respect to the alleged manipulation of LIBOR, and there are ongoing investigations by regulators and governmental authorities in various jurisdictions. Following a review of LIBOR conducted at the request of the U.K. government, on September 28, 2012, recommendations for reforming the setting and governing of LIBOR were released, which are referred to as the Wheatley Review. The Wheatley Review made a number of recommendations for changes with respect to LIBOR, including the introduction of S-5 statutory regulation of LIBOR, the transfer of responsibility for LIBOR from the BBA to an independent administrator, changes to the method of the compilation of lending rates and new regulatory oversight and enforcement mechanisms for ratesetting and a reduction in the number of currencies and tenors for which LIBOR is published. Based on the Wheatley Review and on a subsequent public and governmental consultation process, on March 25, 2013, the U.K. Financial Services Authority published final rules for the U.K. Financial Conduct Authority’s regulation and supervision of LIBOR, which are referred to as the FCA Rules. In particular, the FCA Rules include requirements that (1) an independent LIBOR administrator monitor and survey LIBOR submissions to identify breaches of practice standards and/or potentially manipulative behavior, and (2) firms submitting data to LIBOR establish and maintain a clear conflicts of interest policy and appropriate systems and controls. The FCA Rules took effect on April 2, 2013. It is uncertain what additional regulatory changes or what changes, if any, in the method of determining LIBOR may be required or made by the U.K. government or other governmental or regulatory authorities. Accordingly, uncertainty as to the nature of such changes may adversely affect the market for or value of any LIBOR-linked securities, loans, derivatives and other financial obligations or extensions of credit held by or due to us or on our overall financial condition or results of operations. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for or value of any LIBOR linked securities, loans, derivatives and other financial obligations or extensions of credit held by or due to us or on our overall financial condition or results of operations.

We are an “emerging growth company,” and we do not know if such status makes our common stock less attractive to investors

We currently are an “emerging growth company,” as defined in the JOBS Act, until the earliest of:

- the last day of our fiscal year ending December 31, 2019;
- the year in which our total annual gross revenues first exceed \$1 billion;
- the date on which we have, during the prior three-year period, issued more than \$1 billion in non-convertible debt; or
- the last day of a fiscal year in which we (1) have an aggregate worldwide market value of our common stock held by non-affiliates of \$700 million or more, computed at the end of each fiscal year as of the last business day of our most recently completed second fiscal quarter, and (2) have been an Exchange Act reporting company for at least one year (and filed at least one annual report under the Exchange Act).

We intend to take advantage of some of the reduced regulatory and disclosure requirements permitted by the JOBS Act and, as a result, some investors may consider our common stock less attractive, which could reduce the market value of our common stock. For example, while we are an emerging growth company, we intend to take advantage of the exemption from the provisions of Section 404(b) of the Sarbanes-Oxley Act requiring that our independent registered public accounting firm provide an attestation report on the effectiveness of our internal control over financial reporting. This may increase the risk that material weaknesses or other deficiencies in our internal control over financial reporting go undetected.

Any failure on our part to maintain our status as a BDC would reduce our operating flexibility

Our Board of Directors may determine that it is in our best interests to withdraw our BDC election, subject to the consent of the holders of a majority of our outstanding voting securities, as required under the 1940 Act. If we do not

remain a BDC, we would likely be regulated as a closed-end investment company under the 1940 Act. Such regulation would subject us to substantially more regulatory restrictions under the 1940 Act and correspondingly decrease our operating flexibility, which could have a material adverse effect on our business, financial condition and results of operations.

We may have difficulty satisfying the annual distribution requirement in order to qualify and maintain RIC status if we recognize income before or without receiving cash representing such income

For federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as OID. In addition, we may have to continue to recognize interest income for federal income tax purposes on a defaulted loan investment that has not paid the interest contractually owed to us. We also may be required to include in income certain other amounts that we will not receive in cash. For example, for certain investments, we may accrue income at some point after the

trade date and before settlement, but we will not receive such income until settlement, which, in certain situations, can be as long as 90 days. Because in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty satisfying the annual distribution requirement applicable to RICs. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investments to meet these distribution requirements. If we are not able to obtain cash from other sources, we may not qualify for RIC tax treatment and thus be subject to corporate-level income tax. Additionally, we may never collect the cash representing such income.

We will become subject to corporate-level income tax if we are unable to qualify and maintain our qualification as a RIC under Subchapter M of the Code

Although we intend to elect to be treated as a RIC under Subchapter M of the Code for 2014 and succeeding tax years, no assurance can be given that we will be able to qualify for and maintain RIC status. To obtain and maintain RIC tax treatment under the Code, we must meet numerous annual distribution, income source and asset diversification requirements. We provide no assurances we will meet those requirements.

In addition, once we have elected and qualified to be taxed as a RIC, our Board of Directors may determine, without stockholder approval, that it is in our best interests to withdraw our RIC tax status election.

Loss of RIC tax status could substantially reduce net assets and income available for debt service and distributions

If we operate as a RIC, we generally will not be subject to corporate-level income taxation on income we timely distribute, or deem to distribute, to our stockholders as distributions. We would cease to qualify for such tax treatment if we were unable to comply with these requirements. In addition, we may have difficulty meeting the requirement to make distributions to our stockholders because in certain cases we may recognize income before or without receiving cash representing such income. If we fail to qualify as a RIC, we will have to pay corporate-level taxes on all of our income whether or not we distribute it, which would substantially reduce the amount of income available for debt service as well as reduce and/or affect the character and amount of our distributions to our stockholders.

Risks Related to Our Relationship with Our Manager and American Capital

Our management agreement was not negotiated on an arm's-length basis and the terms, including fees payable, may not be as favorable to us as if they were negotiated with an unaffiliated third-party

Our management agreement with our Manager was negotiated between related parties, and we did not have the benefit of arm's-length negotiations of the type normally conducted with an unaffiliated third-party. The terms of the management agreement, including fees payable, may not reflect the terms that we may have received if it were negotiated with an unrelated third-party. In addition, we may choose not to enforce, or to enforce less vigorously, our rights under the management agreement because of our desire to maintain our ongoing relationship with our Manager. Our results are dependent upon the efforts of our Manager

Our Manager's success, which will be largely determinative of our own success, depends on many factors, including the availability of attractive risk-adjusted investment opportunities that satisfy our targeted investment strategies and then identifying and consummating them on favorable terms, the level and volatility of interest rates and conditions in the financial markets and the economy, in each case, as to which no assurances can be given. In addition, our Manager may face substantial competition for attractive investment opportunities. Our Manager may not be able to successfully cause us to make investments with attractive risk-adjusted returns.

We are completely dependent upon our Manager and certain personnel of American Capital who provide services to us through the management agreement and the administrative services agreement and we may not find suitable replacements for our Manager and these personnel if the management agreement and the administrative services agreement are terminated or such personnel are no longer available to us

Because we have no employees, we are completely dependent on our Manager and its affiliates to conduct our operations pursuant to the management agreement. Our Manager does not have any employees and relies upon certain employees of American Capital and the parent company of our Manager to conduct our day-to-day operations pursuant to an administrative services agreement. Under the administrative services agreement, our Manager is provided with those services and resources necessary for our Manager to perform its obligations and responsibilities under the management agreement in exchange for certain fees payable by our Manager. Neither the administrative

services agreement nor the management agreement requires our Manager or American Capital to dedicate specific personnel to our operations. They also do not require any specific personnel of our Manager or American Capital to dedicate a specific amount of time to our business. Additionally, because our Manager is relying upon American Capital, we may be negatively impacted by events or factors that negatively impact American Capital's business, financial condition or results of operations.

If we terminate the management agreement without cause, we may not, without the consent of our Manager, employ any employee of our Manager or any of its affiliates, including American Capital, or any person who has been employed by our Manager or any of its affiliates at any time within the two-year period immediately preceding the date on which the person commences employment with us for two years after such termination of the management agreement. We believe that the successful implementation of our investment, financing and hedging strategies depends upon the experience of certain of American Capital's and our Manager's officers. However, none of these individuals' continued service is guaranteed. Furthermore, if the management agreement is terminated or these individuals leave American Capital, we may be unable to execute our business plan.

There are conflicts of interest in our relationship with our Manager and American Capital

Because we have no employees, our Manager is responsible for making all of our investment decisions. All of our and our Manager's officers are employees of American Capital or the parent company of our Manager and these persons do not devote their time exclusively to us. Our Manager's Investment Committee consists of Malon Wilkus, John Erickson, Samuel Flax, Mark Pelletier and Thomas McHale, each of whom is an officer of our Manager and has significant responsibilities to American Capital and certain of its portfolio companies, affiliated entities or managed funds. Mr. Pelletier is the President of our Manager and also serves as our President and Chief Investment Officer, with primary oversight for all of our investments. Mr. Pelletier is also the President of American Capital CLO Management, LLC, the external manager of ACAS CLO 2007-1, Ltd., ACAS CLO 2012-1, Ltd., ACAS CLO 2013-1, Ltd., ACAS CLO 2013-2, Ltd., ACAS CLO 2014-1, Ltd., and ACAS CLO 2014-2, Ltd., which also invest in Senior Secured Floating Rate Loans. As a result, such funds may compete with us for investments. American Capital CLO Management, LLC is an indirect subsidiary of ACAM, a wholly-owned portfolio company of American Capital. Thus, Mr. Pelletier has, and may in the future have, significant responsibilities for American Capital or other funds that are managed by affiliates thereof. In addition, because certain of our and our Manager's officers are also responsible for providing services to American Capital and/or certain of its portfolio companies, affiliated entities or managed funds, they may not devote sufficient time to the management of our business operations. In addition, there are no restrictions on American Capital that would prevent American Capital from sponsoring another investment vehicle that competes with us. Accordingly, American Capital or one or more of its affiliates may also compete with us for investments.

Although our Manager and its affiliates have policies in place to seek to mitigate the effects of conflicts of interest, these policies will not eliminate the conflicts of interest that our and our Manager's officers and the employees of American Capital and certain of its affiliates will face in making investment decisions on behalf of American Capital, any other American Capital-sponsored investment vehicles and us. Further, we do not have any agreement or understanding with American Capital that would give us any priority over American Capital, any of its affiliates, or any such American Capital-sponsored investment vehicle in opportunities to invest in Senior Secured Floating Rate Loans, CLOs or any other investments we may make. Accordingly, we may compete for access to the benefits that we expect from our relationship with our Manager and American Capital.

We have no recourse to American Capital if it does not fulfill its obligations under the administrative services agreement

Neither we nor our Manager have any employees. Our day-to-day operations are conducted by employees of American Capital or the parent company of our Manager pursuant to an administrative services agreement among our Manager, American Capital and the parent company of our Manager. Under the administrative services agreement, our Manager is also provided with the services and other resources necessary for our Manager to perform its obligations and responsibilities under the management agreement in exchange for certain fees payable by our Manager. Although the administrative services agreement may not be terminated unless the management agreement has been terminated pursuant to its terms, American Capital may assign its rights and obligations thereunder to any of its affiliates, including ACAM, the sole member of the parent company of our Manager. In addition, because we were not a party to the administrative services agreement, we do not have any recourse to American Capital or the parent company of our Manager if they do not fulfill their obligations under the administrative services agreement or if they elect to assign the agreement to one of their affiliates. Also, our Manager only has nominal assets and we have limited recourse against our Manager under the management agreement to remedy any liability to us from a breach of contract

or fiduciary duties.

Our Manager can resign upon not more than 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations

Our Manager has the right, under the management agreement, to resign at any time upon not more than 60 days' written notice, whether we have found a replacement or not. If our Manager resigns, we may not be able to find a new manager or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our Manager and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration

of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

Our Manager's management fee is based on the amount of our total consolidated assets and is payable regardless of our performance

Our Manager is entitled to receive a quarterly management fee from us that is based on the amount of our total consolidated assets, excluding our cash and cash equivalents and net unrealized appreciation or depreciation. The amount of the quarterly management fee is equal to one-fourth of 0.80% of our total consolidated assets, excluding our cash and cash equivalents and net unrealized appreciation or depreciation. Accordingly, if we experience a net loss during a quarter as a result of net unrealized depreciation of our investments, the decline in our total consolidated assets from such net unrealized depreciation will not reduce our management fee payable to our Manager. Also, any new investments funded with the cash proceeds received from the issuances of equity or debt will result in an increase in our total consolidated assets and therefore an increase in the management fee payable to our Manager, which could result in a conflict of interest between our Manager and our stockholders with respect to the timing and terms of our equity and debt issuances. While our stockholders will bear the risk of our future equity issuances reducing the price of our common stock and diluting the value of their stock holdings in us and will bear the risk of additional leverage from future debt issuances, the compensation payable to our Manager will increase as a result of future issuances of our equity and debt securities. Our Manager's entitlement to substantial nonperformance-based compensation may reduce its incentive to devote sufficient time and effort to seeking investments that provide attractive risk-adjusted returns for our investment portfolio. This in turn could harm both our ability to make distributions to our stockholders and the market price of our common stock.

Our Manager's liability is limited under the management agreement, and we have agreed to indemnify our Manager against certain liabilities

The management agreement provides that our Manager and its affiliates and their respective directors, officers, employees, members, managers, partners and stockholders shall not be liable to us or our subsidiaries or our and our subsidiaries' respective directors, officers, employees, members, managers, partners or stockholders for any action taken or omitted to be taken by our Manager in connection with the performance of any of its duties or obligations under the management agreement or otherwise as a manager or investment adviser, except to the extent specified in Section 36(b) of the 1940 Act concerning loss resulting from a breach of fiduciary duty (as the same is finally determined by judicial proceedings) with respect to the receipt of compensation for services. The management agreement also provides that our Manager and its affiliates and their respective directors, officers, employees, members, managers, partners and stockholders are entitled to indemnification from us from and against any claims or liabilities (including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the management agreement) to the fullest extent such indemnification is then permitted under our charter, the 1940 Act, the Advisers Act, the laws of the State of Maryland and any other applicable law.

We may not replicate the historical results achieved by other entities managed by members of the Investment Committee, or by American Capital or its affiliates

Our investments may differ from those of other entities managed by American Capital, its affiliates or members of the Investment Committee. Investors in our securities are not acquiring an interest in any such entities. We may consider co-investing in portfolio investments with other investment vehicles sponsored or managed by members of the Investment Committee, American Capital or its affiliates as permitted under applicable regulations and our policies and procedures. We can offer no assurance, however, that we will develop such permitted opportunities. We also cannot assure you that we will replicate the historical results achieved by members of the Investment Committee or other entities managed by American Capital or its affiliates, and we caution you that our investment returns could be substantially lower than the returns achieved by them in prior periods. Additionally, all or a portion of the prior results may have been achieved in particular market conditions that may never be repeated. Moreover, current or future market volatility and regulatory uncertainty may have an adverse impact on our future performance.

Our ability to enter into transactions with our affiliates is restricted

We are prohibited under the 1940 Act from participating in certain transactions with certain of our affiliates without the prior approval of the members of our independent directors and, in some cases, the SEC. An affiliate under the 1940 Act includes, among others, any person that owns, directly or indirectly, 5% or more of our outstanding voting securities. We generally are prohibited from buying or selling any securities (other than our securities) or other investments from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits certain “joint” transactions with certain of our affiliates, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors and, in some cases, the SEC. These restrictions limit our ability to transact business with our officers or directors or their affiliates. As a result of these restrictions, we may be prohibited from buying or selling any security (other than any security of which we are the issuer) or other investments from or to any portfolio company of a fund managed by an affiliate of American Capital without the prior approval of the SEC, which may limit the scope of investment opportunities that would otherwise be available to us. We can offer no assurance that we will seek or be able to obtain such SEC approval.

ACAM owns approximately 3% of our common stock, which could result in its influence over the outcome of matters submitted to the vote of our stockholders

As of December 31, 2014, ACAM owned approximately 3% of our outstanding common stock. As a result, ACAM and American Capital may have influence over the outcome of matters submitted to a vote of our stockholders, including the election of our directors or transactions involving a change in control. Their interests may conflict with, or differ from, the interests of our other stockholders, including you. So long as ACAM continues to own shares of our common stock, it and American Capital could influence our corporate decisions submitted to our stockholders for approval, regardless of whether we terminate the management agreement with our Manager.

Risks Related to Liquidity and Capital Resources

We may need to raise additional capital to grow because we must distribute most of our income

We may need additional capital to fund growth in the future. A reduction in the availability of new capital could limit our ability to grow. We must distribute at least 90% of our investment company taxable income to our stockholders to maintain our RIC status. As a result, any such cash earnings may not be available to fund our investments. We may borrow from financial institutions and issue additional debt and equity securities. If we do not obtain funds from such sources or from other sources to fund our investments, it could limit our ability to grow, which may have an adverse effect on our stock price. In addition, as a BDC, our ability to borrow or issue preferred stock may be restricted if our total assets are less than 200% of our total borrowings and preferred stock.

The 1940 Act limits our ability to issue senior debt securities and preferred stock (collectively, “senior securities”), in certain circumstances

As a BDC, the 1940 Act generally limits our ability to issue senior securities if our asset coverage ratio does not exceed 200% immediately after each issuance of senior securities or is improved immediately upon the issuance. Asset coverage ratio is defined in the 1940 Act as the ratio that the value of the total assets, less all liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of senior securities representing indebtedness. There are no assurances that we will always operate above this ratio. The resulting restrictions on issuing senior securities could have a material adverse impact on our business operations to the extent we do not maintain such asset coverage ratio.

The 1940 Act limits our ability to issue equity below our NAV per share

As a BDC, the 1940 Act generally limits our ability to issue and sell our common stock at a price below our NAV per share, exclusive of any distributing commission or discount, without stockholder approval. As of the date of this filing, we do not have such authorization; however, we may seek such approval in the future or we may elect to conduct a rights offering, which would not require stockholder approval under the 1940 Act. If our common stock trades at a price below our NAV per share, there are no assurances that we can issue or sell shares of our common stock if needed to fund our business. In addition, in certain instances where we could issue or sell shares of our common stock at a price below our NAV per share, including through our dividend reinvestment and stock purchase plan or through a rights offering, such issuance could result in dilution in our NAV per share, which could result in a decline of our stock price.

We fund a portion of our investments with debt securities, which magnifies the potential for loss and the risks of investing in us

As a result of any issuance of debt securities, we would be exposed to typical risks associated with leverage, including an increased risk of loss and an increase in expenses, which are ultimately borne by our common stockholders.

Payment of interest on such debt securities must take preference over any other dividends or other payments to our common stockholders. If we issue debt securities, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. In addition, such securities may be rated by rating agencies, and in obtaining a rating for such securities, we may be required to abide by operating and investment guidelines that could further restrict our operating flexibility. Furthermore, any amounts that we use to service our indebtedness would not be available for distributions to our common stockholders.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for loss and the risks of investing in us in the same way as our borrowings

Preferred stock, which is another form of leverage, has similar risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative and they would rank “senior” to common stock in our capital structure. Payment of dividends on, and repayment of the liquidation preference of, such preferred stock would typically take preference over any dividends or other payments to our common stockholders. Also, preferred stockholders are not typically subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference. Furthermore, preferred stockholders would have separate voting rights and may have rights, preferences or privileges

more favorable than those of our common stockholders. Also, the issuance of preferred securities could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for our common stockholders or otherwise be in our common stockholders' best interest.

The agreements governing our current and any future credit facilities may contain various covenants which, if not complied with, could accelerate repayment under the relevant facility, thereby materially and adversely affecting our liquidity, financial condition, results of operations and our ability to pay distributions to our stockholders

We finance our assets with secured debt. Our current credit facility does, and any future such credit facilities are likely to, contain default provisions such as the failure to make principal and interest payments when due; the failure to maintain a certain borrowing base; the insolvency or bankruptcy of us or the relevant financing subsidiary; and the decline of our or the relevant financing subsidiary's NAV, as applicable, below a specified threshold.

An event of default under the relevant facility may result, among other things, in the termination of the availability of further funds under the relevant facility and an accelerated maturity date for all amounts outstanding thereunder. This could disrupt our business, reduce our revenues, cause us to take losses, delay any dividends allowed to us under the facility until the lender has been paid in full, reduce our liquidity and cash flow and impair our ability to grow our business, make distribution payments to our stockholders and maintain our status as a RIC. In addition, each borrowing under our current (and any future) credit facility will be subject to the satisfaction of certain conditions. We cannot assure you that we will be able to borrow funds under the relevant facility at any particular time or at all.

Risks Related to Our Investing and Financing Strategy

There will be uncertainty regarding the value of our portfolio investments

A substantial portion of our portfolio investments are not publicly traded. We determine the fair value of these investments in accordance with the 1940 Act and Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, Fair Value Measurements and Disclosures ("ASC 820") based on a determination made in good faith by our Board of Directors. For our investments that are not publicly traded, our determinations of fair value will be based upon certain inputs and our own assumptions about how market participants would price the asset or liability. Due to the uncertainty inherent in valuing investments that are not publicly traded, our determination of fair value may differ materially from the values that would exist if a ready market for these investments existed. Our determination of the fair value of our investments will have a material impact on our net earnings and NAV.

Changes in interest rates may increase our cost of capital, reduce the ability of our portfolio companies to service their debt obligations and adversely affect our profitability.

General interest rate fluctuations and changes in credit spreads on floating rate loans may have a substantial negative impact on our investments and investment opportunities and, accordingly, may have a material adverse effect on our rate of return on invested capital, our net investment income, our NAV and the market price of our common stock. A substantial portion of our debt investments have variable interest rates that reset periodically based on benchmarks such as LIBOR and the prime rate, so an increase in interest rates from their historically low present levels may make it more difficult for our portfolio companies to service their obligations under the debt investments that we hold.

Given the low absolute level of interest rates, many of our debt investments have floors or benchmark minimums which are currently in excess of the actual benchmark rate in the market. Currently our financing facility is based on a similar benchmark but does not have any floors associated with it. Therefore any such increase to interest rates would make it more expensive to use debt to finance our investments. As such, our earnings will be affected by the spread between the interest rate on our investments and the interest rate at which we borrow funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in the event we use floating rate debt to finance our investments. Additionally, in periods of rising interest rates, our cost of funds could reset at rates faster than those of our assets, which could reduce our net investment income. These risks are also prevalent in our CLO investments where the floating rate collateral assets may have benchmark floors while its debt may have a floating component without a floor or minimum base rate. As such, the spread compression risk explained above could be magnified in our CLO investments due to the higher leverage deployed resulting in a negative impact to our earnings and NAV.

A change in currency exchange rates may adversely affect our profitability

We may make investments in debt instruments that are denominated in currencies other than the U.S. dollar. Our domestic portfolio companies may also transact a significant amount of business in foreign countries and therefore their profitability may be impacted by changes in foreign currency exchange rates. As a result, an adverse change in currency exchange rates may have a material adverse impact on our business, financial condition and results of operations.

We may be unable to invest proceeds from investment sales/repayments or follow-on offerings of shares of our common stock on acceptable terms within an attractive time frame

Delays in investing the proceeds from investment sales or repayments along with any net proceeds raised in follow-on offerings of shares of our common stock may cause our performance to be worse than that of other fully invested BDCs or other lenders or investors pursuing comparable investment strategies. We cannot assure you that we will be able to identify any new investments that meet our investment objective or that any additional investment that we make will produce a positive return. We may be unable to invest the proceeds from investments or net proceeds of any follow-on offering on acceptable terms within the time period that we anticipate or at all, which could harm our financial condition and operating results.

We have restrictions on the type of assets we can invest in as a BDC

As a BDC, we may not acquire any assets other than certain qualifying assets described in the 1940 Act, unless, at the time of and after giving effect to the acquisition, at least 70% of our total assets consist of such qualifying assets.

Thus, in certain instances, we may be precluded from investing in potentially attractive investments that are not qualifying assets for purposes of the 1940 Act. In addition, there is a risk that this restriction could prevent us from making additional investments in any non-qualifying investments we may acquire, which could cause our position to be diluted or limit our access to capital of non-qualifying investments.

The investments in which we invest are generally traded over-the-counter, if at all, and may experience limited liquidity

Our investments may experience periods with limited or no liquidity. The absence of liquidity may make it difficult for us to ascertain a market value for our investments, may limit or preclude our ability to exit underperforming investments, and may negatively impact the ability for issuers of Senior Secured Floating Rate Loans to refinance. As a result, periods of heightened illiquidity may adversely impact the performance of our portfolio and could persist for prolonged periods.

Because we generally do not hold controlling interests in the Senior Secured Floating Rate Loans or the issuers of Senior Secured Floating Rate Loans in which we invest, we may not be in a position to exercise control over issuers or to prevent decisions by management teams at issuers that could decrease the value of our investments

We generally do not hold equity positions or controlling interests in the issuers of Senior Secured Floating Rate Loans in which we invest. As a result, we are subject to the risk that an issuer of Senior Secured Floating Rate Loans may make business decisions with which we disagree, and that the management and/or stockholders of an issuer may take risks or otherwise act in ways that will be adverse to our interests.

An investment strategy focused primarily on privately held companies presents certain challenges, including the lack of available information about these companies, a dependence on the talents and efforts of only a few key portfolio company personnel and a greater vulnerability to economic downturns

We invest primarily in privately held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of our Manager to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Also, privately held companies frequently have less diverse product or service lines and smaller market presence than larger competitors. These factors could adversely affect our investment returns as compared to companies investing primarily in the securities of public companies.

We intend to continue to finance our investments with borrowed money, and may securitize our investments in the future, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us. The use of leverage, including through the issuance of senior securities, magnifies the potential for gain or loss on amounts invested. The use of leverage is generally considered a speculative investment technique and increases the risks associated with investing in our securities. Our lenders will have fixed dollar claims on our assets that are superior to the claims of our common stockholders, and we would expect such holders to seek recovery against our assets in the event of a default. We may pledge up to 100% of our assets and may grant a security interest in all of our assets under the terms of any debt instruments into which we may enter. In addition, under the terms of any credit facility or other debt instrument we enter into, we may be required by its terms to use the net proceeds of investments

that we sell to repay a portion of the amount borrowed under such facility or instrument before applying such net proceeds to any other uses.

If the value of our assets decreases, leverage would cause NAV to decline more sharply than it otherwise would have had we not leveraged, thereby magnifying losses. Similarly, any decrease in our revenue or income will cause our net income to decline more sharply than it would have had we not borrowed. Such a decline would also negatively affect our ability to make distributions on our common stock. Our ability to service our debt will depend largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures. In addition, our common stockholders will bear the burden of any increase in our expenses as a result of our use of leverage, including interest expense and any increase in the management fee.

As a BDC, we generally are required to meet a coverage ratio of total assets to total borrowings and other senior securities, which include all of our borrowings and any preferred stock that we may issue in the future, of at least 200%. If this ratio declines below 200%, we cannot incur additional debt and could be required to sell a portion of our investments to repay some debt when it is disadvantageous to do so. This could have a material adverse effect on our operations, and we may not be able to make distributions. The amount of leverage that we employ will depend on our Manager and our Board of Directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to obtain credit at all or on terms acceptable to us.

Our portfolio companies may be highly leveraged with debt

The debt levels of our portfolio companies may have significant adverse consequences to such companies and to us as an investor. Portfolio companies that are indebted may be subject to restrictive financial and operating covenants. The leverage may impair these companies' ability to finance their future operations and capital needs. As a result, their flexibility to respond to changing business and economic conditions and to business opportunities may be limited. A company's income and net worth will tend to increase or decrease at a greater rate than if the company did not capitalize itself in part with debt.

Our portfolio companies may incur debt that ranks equally with, or senior to, some of our investments in such companies

Our portfolio companies typically may be permitted to incur other debt that ranks equally with, or senior to, some of such debt instruments, including unitranche, second lien, middle market loans and unsecured debt instruments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we will be entitled to receive payments in respect of the debt securities in which we will invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. In such cases, after repaying such senior creditors, such portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we will invest, we would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Our borrowers may default on their payments, which may have a materially negative effect on our financial performance.

Our primary business exposes us to credit risk, and the quality of our portfolio has a significant impact on our earnings. Credit risk is a component of our fair valuation of our portfolio companies. Negative credit events will lead to a decrease in the fair value of our portfolio companies and may potentially disrupt or impact the ability to pay amounts due to us thereby resulting in a decline in our earnings and NAV.

In addition, market conditions can affect consumer confidence levels, which may harm the business of our portfolio companies and result in adverse changes in payment patterns. Additionally, if interest rates rise, some of our portfolio companies may not be able to pay the escalating interest on our loans and may default. Deterioration in the credit quality of our portfolio could have a material adverse effect on our business, financial condition and results of operations. Increased delinquencies and default rates would negatively impact our results of operations.

A general economic downturn or severe tightening in the credit markets could materially impact the ability of our borrowers to repay their loans, which could have a significant negative affect on us. Numerous other factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan or a downturn in its industry. A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans or foreclosure on the secured assets. This could trigger cross-defaults under other agreements and jeopardize a portfolio company's ability to meet its obligations under the loans or debt securities that we hold. In addition, our portfolio companies may have, or may be permitted to incur, other debt that ranks senior to or equally with our securities. This means that payments on such senior-ranking securities may have to be made before we receive any payments on our subordinated loans or debt securities. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral and may have a material adverse effect on our financial condition and results of operations.

Certain of the issuers of Senior Secured Floating Rate Loans in which we invest may enter into bankruptcy proceedings

Senior Secured Floating Rate Loan issuers may experience bankruptcy or similar financial distress. The bankruptcy process has a number of significant inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by an issuer may adversely and permanently affect the issuer. If the proceeding is converted to a liquidation, the value of the issuer may be significantly less than the liquidation value that was believed to exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor's return on investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs of a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the

number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

Our investments in Senior Secured Floating Rate Loans involve risk and we could lose all or part of our investment. Investing in Senior Secured Floating Rate Loans involves a number of significant risks. Senior Secured Floating Rate Loans in which we invest may be issued by companies with limited financial resources and limited access to alternative financing. Issuers of Senior Secured Floating Rate Loans may be unable to meet their obligations under their debt securities that we hold. Such developments may be accompanied by deterioration in the value of collateral backing our investments. This could lead to a decline in value of our portfolio, which could result in a decline in our net earnings and NAV.

Second priority liens on collateral securing loans in which we invest may be subject to control by senior creditors with first priority liens. If there is a default, the value of the collateral may not be sufficient to repay in full both the first priority creditors and us.

Some loans in which we invest may be secured on a second priority basis by the same collateral securing first priority debt of our portfolio companies. The first priority liens on the collateral will secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the company under the agreements governing the loans. The holders of obligations secured by the first priority liens on the collateral will generally control the liquidation of and be entitled to receive proceeds from any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from the sale or sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second priority liens after payment in full of all obligations secured by the first priority liens on the collateral. If such proceeds are not sufficient to repay amounts outstanding under the loan obligations secured by the second priority liens, then we, to the extent not repaid from the proceeds of the sale of the collateral, will only have an unsecured claim against the company's remaining assets, if any. The rights we may have with respect to the collateral securing the loans we may make to portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that we enter into with the holders of senior debt. Under such an intercreditor agreement, at any time that obligations that have the benefit of the first priority liens are outstanding, any of the following actions that may be taken with respect to the collateral will be at the direction of the holders of the obligations secured by the first priority liens: the ability to cause the commencement of enforcement proceedings against the collateral; the ability to control the conduct of such proceedings; the approval of amendments to collateral documents; releases of liens on the collateral; and waivers of past defaults under collateral documents. We may not have the ability to control or direct such actions, even if our rights are adversely affected.

Investments in non-investment grade CLO securities may be illiquid, may have a higher risk of default, and may not produce current returns.

Our investments in CLO securities are generally non-investment grade. Non-investment grade CLO securities tend to be illiquid, have a higher risk of default and may be more difficult to value than investment grade bonds. Recessions or poor economic or pricing conditions in the markets associated with CLO securities may cause higher defaults or losses than expected. Non-investment grade securities are considered speculative, and their capacity to pay principal and interest in accordance with the terms of their issue is not certain.

We invest in equity securities of CLOs, and may invest in debt securities of CLOs, collateralized primarily by Loans. Accordingly, such securities involve the same risks associated with investing in Senior Secured Floating Rate Loans on a levered basis, including credit risk and market risk. Changes in a variety of factors, including interest rates, defaults, interest rate spreads, interest rate curves, investor perception of macroeconomic risks and market outlook, and demand for debt securities issued by CLOs may cause the cash flows provided by and the market prices for CLO securities to fluctuate significantly. CLOs are typically privately offered and sold and CLO securities may be thinly traded or have a limited trading market.

Some of our investments in CLOs may be in newly issued CLOs. Generally, new-issue CLOs make their initial distribution to underlying debt and equity tranches six to nine months after closing, and subsequent payments are

generally made on a quarterly basis. Additionally, equity securities of CLOs do not have a stated coupon and only have claims to residual cash flows after payments to securities ranked senior to equity securities have been made. Changes in a variety of factors, including interest rates, defaults, interest rate spreads, interest rate curves and performance of collateral underlying CLO securities may cause the cash flows generated by our investments in the debt and equity tranches of CLOs to fluctuate significantly, and in certain instances may be shut off all together either temporarily or permanently. Therefore, the cash flows and earnings we receive from our CLO investments may fluctuate significantly.

We invest in CLO securities that are subordinate in right of payment to more senior securities

CLO equity securities are the first to bear losses resulting from defaults and losses from underlying collateral. As a result, investments in CLO equity securities carry significant risks, including, but not limited to the possibility that distributions from

CLO equity securities may decline or cease altogether should the quality of the collateral deteriorate, decline in value or default. Therefore, we may fail to achieve our expected investment returns from CLO equity securities. Our investments in CLO securities may be riskier and less transparent to us and our stockholders than direct investments in the underlying companies

We invest in equity tranches and may invest in debt tranches of CLOs. Generally, there will be less information available to us regarding the underlying investments held by such CLO vehicles than if we had invested directly in the underlying companies. As a result, our stockholders will not know the details of the underlying securities of the CLO vehicles in which we invest. Our CLO investments are subject to the risk of leverage associated with the debt issued by such CLOs and the repayment priority of senior debt holders in such CLO vehicles. The accounting and tax implications of such investments are complicated. In particular, reported revenue from the equity tranche investments of these CLO vehicles are recorded each quarter in accordance with GAAP under the effective interest rate method based on the future projected cash flows. Our current taxable earnings on these investments, however, will depend upon the ownership of the CLO equity tranche as well as for certain CLOs any election we make to mark-to-market our taxable income. Our current taxable income will generally not be determinable until after the end of the fiscal year of each individual CLO vehicle that ends within our fiscal year and may be materially different from both the cash distributions we receive and revenue we record in accordance with GAAP. In general, we may be required to record current taxable income based on our proportionate share of the ordinary earnings and net capital gain of the CLO vehicle or based on changes to fair value if we elect mark-to-market treatment for certain eligible CLO investments, even if such income is not distributed to us by the CLO vehicle. As a result, the reported revenue to our stockholders under GAAP from investments in these CLO vehicles may not be reflective of the taxable income we record for such investments, and the current cash flow we receive from these CLO investments may be less than the current taxable income we record from these investments that we are required to distribute to our stockholders.

CLOs typically will have no significant assets other than their underlying Senior Secured Floating Rate Loans. CLOs typically will have no significant assets other than their underlying Senior Secured Floating Rate Loans. Accordingly, payments on CLO investments are and will be payable solely from the cash flows from such Loans, net of all management fees and other expenses. Payments to us as a holder of CLO junior securities are and will be made only after payments due on the senior securities. It may adversely impact our returns if the cash flows from the Loans are insufficient to repay our CLO investments.

There is the potential for interruption and deferral of cash flow from CLO investments

If certain minimum collateral coverage ratios and/or interest coverage ratios are not met by a CLO, then cash flows that otherwise would have been available to pay distributions to us on our CLO investments may instead be used to redeem any senior notes or to purchase additional Loans, until the ratios again exceed the minimum required levels or any senior notes are repaid in full. This could result in a reduction in the distribution and/or principal paid to the holders of the CLO investments, which would adversely impact our returns.

Senior Secured Floating Rate Loans that are collateral of our CLO investments are subject to prepayments and calls, increasing re-investment risk, and the inability of a CLO collateral manager to reinvest the proceeds of the prepayment of its loan collateral may adversely affect us

The underlying Loans of our CLO investments may be prepaid more quickly than expected, which could have an adverse impact on the value of our CLO investment. Prepayment rates are influenced by changes in interest rates and a variety of economic, geographic and other factors beyond our control, and consequently cannot be predicted with certainty. There can be no assurance that for any CLO investment, in the event that any of the Loans of a CLO underlying such investment are prepaid, the CLO collateral manager will be able to reinvest such proceeds in new Loans with equivalent investment returns. If the CLO collateral manager cannot reinvest in new Loans with equivalent investment returns, the proceeds available to pay interest, principal or other distributions to the CLO securities may be adversely affected.

We may not have the ability to control the timing of a call position on our CLO investments

Our CLO investments generally contain optional call provisions, exercisable at the discretion of the holders of the equity tranches, after the expiration of an initial period in the deal (referred to as the “non-call period”) which provide for the senior notes and the junior secured notes to be paid in full. The exercise of the call option is by the relevant

percentage (usually a majority) of the holders of the equity tranche. Therefore, where we do not hold the relevant percentage, we will not be able to control the timing of the exercise of the call option. The equity tranche also generally has a call at any time based on certain tax event triggers. In any event, the call can only be exercised by the holders of the equity tranche if they can demonstrate (in accordance with the detailed provisions in the transaction) that the senior notes and junior secured notes will be paid in full if the call is exercised.

We have limited control of the administration and amendment of Loans owned by the CLOs in which we invest. We will not be able to directly enforce any rights and remedies in the event of a default of a Loan held by a CLO vehicle. In addition, the terms and conditions of the Loans underlying our CLO investments may be amended, modified or waived only.

by the agreement of the underlying lenders. Generally, any such agreement must include a majority or a super majority (measured by outstanding loans or commitments) or, in certain circumstances, a unanimous vote of the lenders. Consequently, the terms and conditions of the payment obligations arising from Loans could be modified, amended or waived in a manner contrary to our preferences.

We have limited control of the administration and amendment of any CLO in which we invest

The terms and conditions of CLOs may be amended, modified or waived only by the agreement of the underlying security holders. Generally, any such agreement must include a majority or a super majority (measured by outstanding amounts) or, in certain circumstances, a unanimous vote of the security holders. Consequently, the terms and conditions of the payment obligation arising from the CLOs in which we invest may be modified, amended or waived in a manner contrary to our preferences.

We will have no influence on management of underlying investments managed by non-affiliated third-party CLO collateral managers

We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third-party CLO collateral managers. Similarly, we are not responsible for and have no influence over the day-to-day management, administration or any other aspect of the issuers of the individual securities. As a result, the performance and values of the portfolios underlying our CLO investments could decrease as a result of decisions made by third-party CLO collateral managers.

Engaging in hedging transactions may expose us to additional risks

We may enter into interest rate or currency hedges. Hedging against interest rate and currency fluctuations may expose us to additional risks and could harm our financial performance. Our use of hedging would not eliminate the risk that the value of our investments could decline or that our investment performance would be better off if we did not hedge. The effectiveness of our hedging is dependent on the price we pay for the hedge and the correlation of the hedge to the risk it is designed to mitigate. It may arise that the cost of a hedging instrument exceeds its expected benefits or that an instrument may not hedge all of the risk for which it was designed to mitigate. Additionally, the use of hedging instruments exposes us to counterparty risk including the failure to perform under the contract such as nonpayment.

Risks Related to Our Common Stock

Investing in our common stock may involve an above average degree of risk

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and a higher risk of volatility or loss of principal. Our investments in portfolio companies involve higher levels of risk, and therefore, an investment in our common stock may not be suitable for someone with lower risk tolerance.

There is a risk that our stockholders may not receive distributions or that our distributions may not grow over time, and a portion of our distributions may be a return of capital

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a BDC, we may be limited in our ability to make distributions.

The market price of our common stock may fluctuate significantly

The market price and marketability of shares of our common stock may from time to time be significantly affected by numerous factors, including many over which we have no control and that may not be directly related to us. These factors include the following:

- price and volume fluctuations in the stock market from time to time, which are often unrelated to the operating performance of particular companies;

- significant volatility in the market price and trading volume of securities of BDCs, financial service companies, asset managers or other companies in our sector, which is not necessarily related to the operating performance of particular companies;

-

changes in laws, regulatory policies, tax guidelines or financial accounting standards, particularly with respect to BDCs or RICs;
not qualifying as a RIC, or the loss of RIC status;
changes in our earnings or variations in operating results;

any shortfall in revenue or net income or any increase in losses from levels expected by securities analysts and the market in general;

decreases in our NAV per share;

general economic trends and other external factors; and

loss of a major funding source.

Fluctuations in the trading price of our common stock may adversely affect the liquidity of the trading market for our common stock and, in the event that we seek to raise capital through future equity financings, our ability to raise such equity capital.

Our shares of common stock may trade at a substantial discount from NAV and may continue to do so over the long term

Our shares of common stock may trade at a market price that is less than the NAV that is attributable to those shares. The possibility that our shares of common stock will trade at a substantial discount from NAV over the long term is separate and distinct from the risk that our NAV will decrease. We cannot predict whether shares of our common stock will trade above, at or below our NAV. If our common stock trades below its NAV, we will generally not be able to issue additional shares or sell our common stock at its market price without first obtaining the approval for such issuance from our stockholders and our independent directors. If additional funds are not available to us, we could be forced to curtail or cease our new lending and investment activities, and our NAV could decrease and our level of distributions could be impacted.

Our common stock may be difficult to resell

Investors may not be able to resell shares of our common stock at or above their purchase prices due to a number of factors, including:

actual or anticipated fluctuation in our operating results;

volatility in our common stock price;

changes in expectations as to our future financial performance or changes in financial estimates of securities analysts; and

departures of key personnel.

Certain provisions in our charter and bylaws could discourage a change of control that our stockholders may favor, which could also adversely affect the market price of our common stock

Provisions in our charter and bylaws may make it more difficult and expensive for a third-party to acquire control of us, even if a change of control would be beneficial to our stockholders. For example, our charter authorizes our Board of Directors to issue up to 50,000,000 shares of preferred stock in one or more classes or series and to fix the rights, preferences, privileges and restrictions of unissued classes or series of preferred stock, each without any vote or action by our stockholders. We could issue a class or series of preferred stock to impede the completion of a merger, tender offer or other takeover attempt. These and other provisions in our charter and bylaws may impede takeover attempts, or other transactions, that may be in the best interests of our stockholders and, in particular, our common stockholders. In addition, the market price of our common stock could be adversely affected to the extent that provisions of our charter and bylaws discourage potential takeover attempts, or other transactions, that our stockholders may favor.

Certain provisions of Maryland law may limit the ability of a third-party to acquire control of our company

Certain provisions of the Maryland General Corporation Law (the "MGCL") may have the effect of delaying, deferring or preventing a transaction or a change of control of our company that might involve a premium price for holders of our common stock or otherwise be in their best interests.

Subject to certain limitations, provisions of the MGCL prohibit certain business combinations between us and an "interested stockholder" (defined generally as any person who beneficially owns 10% or more of the voting power of our outstanding voting stock or an affiliate or associate of ours who beneficially owned 10% or more of the voting power of our then outstanding stock during the two-year period immediately prior to the date in question) or an affiliate of the interested stockholder for five years after the most recent date on which the stockholder became an interested stockholder. After the five-year period, business combinations between us and an interested stockholder or an affiliate of the interested stockholder must generally either provide a minimum price to our stockholders (as defined in the MGCL) in the form of cash or other consideration in the same form as previously paid by the interested

stockholder or be recommended by our Board of Directors and approved by the affirmative vote of at least 80% of the votes entitled to be cast by holders of our outstanding shares of voting stock and at least two-thirds of the votes entitled to be cast by stockholders other than the interested stockholder and its affiliates and associates. These provisions of the MGCL relating to business combinations do not apply, however, to business combinations that are approved or exempted by

our Board of Directors prior to the time that the interested stockholder becomes an interested stockholder. Pursuant to the statute, our Board of Directors has, by resolution, exempted business combinations between us and American Capital and its affiliates, and between us and any other person, provided that in the latter case the business combination is first approved by our Board of Directors (including a majority of our directors who are not affiliates or associates of such person). However, our Board of Directors may repeal or modify this resolution at any time in the future, in which case the applicable provisions of this statute will become applicable to business combinations between us and interested stockholders.

The “control share” provisions of the MGCL provide that holders of “control shares” of a Maryland corporation (defined as shares which, when aggregated with other shares controlled by the stockholder (except solely by virtue of a revocable proxy), entitle the stockholder to exercise one of three increasing ranges of voting power in electing directors) acquired in a “control share acquisition” (defined as the direct or indirect acquisition of ownership or control of “control shares”) have no voting rights with respect to such shares except to the extent approved by our stockholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding votes entitled to be cast by the acquiror of control shares, our officers and our employees who are also our directors. Our bylaws contain a provision exempting from the control share acquisition statute any and all acquisitions by any person of shares of our stock. There can be no assurance that this provision will not be amended or eliminated at any time in the future. However, so long as we are a BDC, we will amend our bylaws to be subject to the control share acquisition statute only if our Board of Directors determines that it would be in our best interests based on our determination that our being subject to the control share acquisition statute does not conflict with the 1940 Act.

Additionally, Title 3, Subtitle 8 of the MGCL permits our Board of Directors, without stockholder approval and regardless of what is currently provided in our charter or bylaws, to elect to be subject to certain provisions relating to corporate governance that may have the effect of delaying, deferring or preventing a transaction or a change of control of our company that might involve a premium to the market price of our common stock or otherwise be in our stockholders’ best interests. Upon the consummation of this offering, we will already be subject to some of these provisions, either by provisions of our charter and bylaws unrelated to Subtitle 8 or by reason of an election in our charter to be subject to certain provisions of Subtitle 8.

Our Board of Directors has the power to cause us to issue additional shares of our stock without stockholder approval. Our charter authorizes us to issue additional authorized but unissued shares of common or preferred stock. In addition, our Board of Directors may, without stockholder approval, amend our charter to increase the aggregate number of our shares of stock or the number of shares of stock of any class or series that we have authority to issue and classify or reclassify any unissued shares of common or preferred stock and set the preferences, rights and other terms of the classified or reclassified shares. As a result, our Board of Directors may establish a series of shares of common or preferred stock that could delay or prevent a transaction or a change in control that might involve a premium price for our shares of common stock or otherwise be in the best interest of our stockholders.

Our common stockholders will bear the expenses associated with our borrowings, and the holders of our debt securities, if any, will have certain rights senior to our common stockholders.

All of the costs of offering and servicing our debt, including interest thereon, will be borne by our common stockholders. The interests of the holders of any debt we may issue will not necessarily be aligned with the interests of our common stockholders. In particular, the rights of holders of our debt to receive interest or principal repayment will be senior to those of our common stockholders. In addition, we may grant a lender a security interest in a significant portion or all of our assets, even if the total amount we may borrow from such lender is less than the amount of such lender's security interest in our assets.

Our shares of common stock have a limited trading history and we cannot assure you that the market price of shares of our common stock will not decline.

Our shares of common stock have a limited trading history and we cannot assure you that a public trading market will be sustained for such shares. We cannot predict the prices at which our common stock will trade. We cannot assure you that the market price of shares of our common stock will not decline at any time. In addition, if our common stock trades below our NAV per share, we will generally not be able to sell additional shares of our common stock to the public at the market price without first obtaining the approval of our stockholders (including our unaffiliated

stockholders) and our independent directors for such issuance.

Our stockholders could experience dilution in their ownership percentage if they do not participate in our dividend reinvestment plan

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are reinvested in shares of our common stock. As a result, our stockholders that do not participate in our dividend reinvestment plan could experience dilution in their ownership percentage of our common stock over time if we issue additional shares of our common stock as part of the dividend reinvestment plan.

You may have current tax liabilities on distributions that are reinvested in our common stock

Under the dividend reinvestment plan, if you own shares of our common stock, you will have all cash distributions automatically reinvested in additional shares of our common stock unless you, or your nominee on your behalf, specifically "opt out" of the dividend reinvestment plan by delivering a written notice to the plan administrator prior to the record date of the next dividend or distribution. If you have not "opted out" of the dividend reinvestment plan, you will be deemed to have received, and for federal income tax purposes will be taxed on, the amount reinvested in our common stock to the extent the amount reinvested was not a tax-free return of capital. As a result, you may have to use funds from other sources to pay your federal income tax liability on the value of the common stock received. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Financial Condition, Liquidity and Capital Resources" for more information.

We may in the future choose to pay distributions partly in our own stock, in which case you may be required to pay tax in excess of the cash you receive

We may make taxable distributions that are payable in part in our stock. The Internal Revenue Service (the "IRS") has issued private letter rulings to other RIC taxpayers in the past that allowed the RIC taxpayer to treat a distribution of its own stock as fulfilling its RIC annual distribution requirement under certain circumstances. In addition, the IRS has issued revenue procedures in the past that temporarily allowed a RIC to treat a distribution of its own stock as fulfilling its RIC annual distribution requirements under certain circumstances (although those periods to which those revenue procedures applied have expired). We may seek to obtain a similar private letter ruling from the IRS, or the IRS may issue revenue procedures in the future allowing RICs to treat a distribution of its own stock as fulfilling its RIC annual distribution requirements. As a result, a stockholder may be required to pay tax with respect to such distributions in excess of any cash received.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We do not own any real estate or other physical properties materially important to our operation. Our and our Manager's executive offices are located at 2 Bethesda Metro Center, 14th Floor, Bethesda, MD 20814, and members of our Manager's senior investment team are located at 505 Fifth Avenue, 26th Floor, New York, NY 10017; such offices are provided by American Capital in accordance with the terms of the administrative services agreement.

Item 3. Legal Proceedings

From time to time, we may be a party to certain ordinary routine litigation incidental to our business, including the enforcement of our rights under contracts with our portfolio companies. We are not currently subject to any material litigation nor, to our knowledge, is any material litigation threatened against us.

Item 4. Mine Safety Disclosures

Not applicable.

PART II.

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Price Range of Common Stock

Our common stock is traded on the NASDAQ Global Select Market under the symbol "ACSF." The following table lists the high and low closing sale prices for our common stock, the closing sale prices as a premium or (discount) to our NAV per share and distributions per share since January 16, 2014, the date on which our common stock began trading on NASDAQ.

Period	NAV ⁽¹⁾	Closing Sales Price		Premium (Discount) of High Sales Price to NAV ⁽²⁾ per Share	Premium (Discount) of Low Sales Price to NAV ⁽²⁾ per Share	Distributions Declared
		High	Low			
Fiscal year ended December 31, 2014						
Fourth quarter	\$14.42	\$13.44	\$12.11	(6.8)%	(16.0)%	\$0.29
Third quarter	\$14.85	\$14.12	\$13.01	(4.9)%	(12.4)%	\$0.28
Second quarter	\$15.12	\$14.25	\$13.25	(5.8)%	(12.4)%	\$0.28
First quarter ⁽³⁾	\$15.11	\$14.70	\$13.38	(2.7)%	(11.4)%	\$0.18

(1) NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low sales prices. The NAVs shown are based on outstanding common shares at the end of the each period.

(2) Calculated as of the respective high or low closing sales price divided by the quarter-end NAV.

(3) The high and low price, as reported, reflects the time period from January 16, 2014 through March 31, 2014 and does not consider the initial public offering price of \$15.00 per share.

The last reported price for our common stock on March 25, 2015 was \$13.19 per share. As of March 25, 2015, we had three stockholders of record. Most of the shares of our common stock are held by brokers and other institutions on behalf of stockholders.

Shares of BDCs may trade at a market price both above and below the NAV that is attributable to those shares. Our shares have historically traded below our NAV per share. For example, our shares closed on the NASDAQ Global Select Market at \$12.11 on December 31, 2014. Our NAV per share was \$14.42 for the same period as shown in the table above. The possibility that our shares of common stock will trade at a discount from NAV per share or at a premium that is unsustainable over the long term is separate and distinct from the risk that our NAV per share will decrease. It is not possible to predict whether our shares will trade at, above or below our NAV per share in the future.

Dividends

We intend to continue making regular dividends or distributions to our stockholders. The timing and amount of our dividends or distributions, if any, will be determined by our Board of Directors. All dividends to our stockholders are declared out of assets legally available for distribution. We expect that our dividends and distributions to stockholders will generally be from accumulated net investment income and from net realized capital gains, if any, as applicable. To the extent our taxable earnings fall below the total amount of our dividends for any given fiscal year, a portion of those dividends may be deemed to be a tax return of capital to our common stockholders. Thus, the source of a distribution to our stockholders may be the original capital invested by the stockholder rather than our taxable ordinary income or capital gains. Stockholders should read any written disclosure accompanying a distribution payment carefully and should not assume that the source of any distribution is our taxable ordinary income or capital gain.

We intend to elect to be taxed as a RIC under Subchapter M of the Code. To maintain our RIC status, we must distribute at least 90% of our ordinary income and the excess of net short term gains over the net long term losses, if any, out of the assets legally available for distribution. During the year ended December 31, 2014, our distributions were made from net investment income. A written statement identifying the nature of these distributions for tax reporting purposes for the year was posted on our website. We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amounts of these distributions from time to time. In addition, we may be limited in our ability to make distributions due to the asset coverage requirements applicable to us as a business development company under the 1940 Act. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of favorable regulated investment company tax treatment. We cannot assure stockholders that they will receive any distributions.

All dividends declared in cash, payable to stockholders that are participants in our dividend reinvestment and stock purchase plan are generally automatically reinvested in shares of our common stock. As a result, stockholders that opt out of our dividend reinvestment and stock purchase plan may experience dilution over time.

The following table reflects the cash dividends that we have declared on our common stock since our IPO:

(\$ in thousands, except per share data)

Dividend Declaration Date	Ex-Dividend Date	Record Date	Payment Date	Per Share Amount	Total Amount
March 17, 2014	March 27, 2014	March 31, 2014	April 10, 2014	\$0.18	\$1,800
June 18, 2014	June 26, 2014	June 30, 2014	July 10, 2014	\$0.28	\$2,800
September 17, 2014	September 26, 2014	September 30, 2014	October 10, 2014	\$0.28	\$2,800
December 18, 2014	December 29, 2014	December 31, 2014	January 9, 2015	\$0.29	\$2,900

Sale of Unregistered Securities

We did not engage in any sales of unregistered securities during the fiscal year ended December 31, 2014.

Stock Performance Graph

This graph compares the return on our common stock with that of the S&P/LSTA U.S. All Loans Index and the Russell 2000 Index, for the period from January 16, 2014 (initial public offering) through December 31, 2014. The graph assumes that, on January 16, 2014, a person invested \$100 in each of our common stock, the S&P/LSTA U.S. All Loans Index and the Russell 2000 Index at their closing prices. The graph measures total stockholder return, which takes into account both changes in stock price and dividends. It assumes that dividends paid are reinvested in like securities.

This graph and the other information furnished under this Part II Item 5 of this report shall not be deemed to be “soliciting material” or to be “filed” with the SEC or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act. The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Dividend Reinvestment and Stock Purchase Plan

Our Board of Directors has adopted a dividend reinvestment and stock purchase plan. If your shares of common stock are registered in your own name, your distributions will automatically be reinvested under the plan in additional whole and fractional shares of common stock, unless you “opt out” of the plan so as to receive cash dividends by notifying our plan administrator by telephone, internet or in writing. If your shares are held in the name of a broker or other nominee, you should contact the broker or nominee for details regarding opting out of the plan. Under the optional cash purchase component of the plan, participants in the plan may also make optional cash purchases of shares of our common stock of between \$50 and \$10,000 per month and, with our prior approval, in excess of \$10,000 per month. Stockholders who receive distributions in the form of stock will be subject to the same federal, state and local tax consequences as stockholders who elect to receive their distributions in cash; however, since their cash distributions will be reinvested, such stockholders will not receive cash with which to pay any applicable taxes on reinvested distributions.

Our stock transfer agent, registrar and dividend reinvestment plan administrator is Computershare Investor Services. Requests for information from Computershare can be sent to Computershare Investor Services, P.O. Box 30170, College Station, TX 77842-3170, or calling (800) 733-5001 (U.S. and Canada) (781) 575-3400 (outside U.S. and Canada) or through the Internet, at www.computershare.com.

Item 6. Selected Financial Data

The selected financial and other data below should be read in conjunction with our “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements and notes thereto. Financial information is presented for the fiscal years ended December 31, 2014 and 2013. Financial information has been derived from our consolidated financial statements that were audited by Ernst & Young LLP, an independent registered public accounting firm.

* Commencement of operations

(1) Net expenses include tax expense included in net investment income.

(2) Total return is based on the change in market price or net asset value per share during the period and takes into account dividends reinvested in accordance with the dividend reinvestment and stock purchase plan.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this section should be read in conjunction with our financial statements and notes thereto appearing elsewhere in this report.

Forward-Looking Statements

Some of the statements in this report constitute forward-looking statements, which relate to future events or our future performance or financial condition. We generally use words such as "anticipates," "believes," "expects," "intends" and similar expressions to identify forward-looking statements. Our actual results could differ materially from those projected in the forward-looking statements for any reason, including any factors set forth in "Risk Factors" and elsewhere in this report. The forward-looking statements contained herein involve risks and uncertainties, including statements as to: (i) our future operating results; (ii) our business prospects and the prospects of our portfolio companies; (iii) the impact of investments that we expect to make; (iv) our contractual arrangements and relationships with third-parties; (v) the dependence of our future success on the general economy and its impact on the industries in which we invest; (vi) the ability of our portfolio companies to achieve their objectives; (vii) our expected financings and investments; (viii) the adequacy of our cash resources and working capital; and (ix) the timing of cash flows, if any, from the operations of our portfolio companies.

We have based the forward-looking statements included in this report on information available to us on the date of this report, and we assume no obligation to update any such forward-looking statements. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we may file with the SEC in the future, including any annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

Overview

American Capital Senior Floating, Ltd., a Maryland corporation organized in February 2013 that commenced operations on October 15, 2013, is an externally managed, non-diversified closed-end investment management company. We have elected to be treated as a BDC under the 1940 Act. In addition, for tax purposes we intend to elect to be treated as a RIC under Subchapter M of the Code.

On January 15, 2014, we priced our initial public offering, selling 10.0 million shares of common stock, at a price of \$15.00 per share for net proceeds of \$149.2 million. Our common stock is listed on the NASDAQ Global Select Market, where it trades under the symbol "ACSF". We are an "emerging growth company," as defined in the JOBS Act, and intend to take advantage of the exemption for emerging growth companies allowing us to temporarily forgo the auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act of 2002. We do not intend to take advantage of other disclosure or reporting exemptions for emerging growth companies under the JOBS Act.

Our investment activities are managed by American Capital ACSF Management, LLC. Under our management agreement with our Manager, we have agreed to pay our Manager an annual base management fee of 0.80% of our total consolidated assets, excluding cash and cash equivalents and net unrealized appreciation or depreciation, at the end of the most recently completed fiscal quarter. There is no incentive compensation paid to our Manager. For the first two years following the IPO, our Manager has agreed that annual other operating expenses will generally not exceed 75 basis points of ACSF's quarter end consolidated net assets, excluding unrealized gains or losses. Our Board of Directors, a majority of whom are independent of us, provides overall supervision of our activities, and our Manager supervises our day-to-day activities.

On November 14, 2013, we formed a wholly-owned consolidated financing subsidiary, ACSF Funding I, LLC, a Delaware limited liability company ("ACSF Funding"). On December 18, 2013, ACSF Funding entered into a two-year \$140 million secured revolving credit facility with Bank of America, N.A., as agent (the "Credit Facility"). The Credit Facility is scheduled to mature on December 18, 2015 and generally bears interest at LIBOR plus 1.80%. The Credit Facility is secured by ACSF Funding's assets pursuant to a security agreement and contains customary financial and negative covenants and events of default. Advance rates vary on the type of collateral owned and can range up to 80%.

On October 15, 2013, we entered into a \$200 million revolving credit facility (the "ACAM Facility") provided by American Capital Asset Management, LLC, the indirect parent of our Manager. Prior to the IPO, we used the ACAM Facility to purchase our initial investment portfolio and upon the closing of the IPO, we repaid the ACAM Facility in

full plus accrued interest and terminated the ACAM Facility.

Investments

Our investment objective is to provide attractive, risk-adjusted returns over the long term primarily through current income while seeking to preserve our capital. We actively manage a leveraged portfolio composed primarily of diversified investments in first lien and second lien floating rate loans principally to large-market U.S.-based companies (collectively, "Senior Secured Floating Rate Loans" or "Loans") which are commonly referred to as leveraged loans. S&P defines large-market loans as loans to issuers with EBITDA of greater than \$50 million. Senior Secured Floating Rate Loans are typically collateralized by a company's assets and structured with first lien or second lien priority on collateral, providing for greater security and potential recovery in the event of default compared to other subordinated fixed-income products. We also invest in equity tranches of CLOs which are securitized vehicles collateralized primarily by Loans and we may invest in debt tranches of CLOs. In addition, we may selectively invest in loans issued by middle market companies, mezzanine and unitranche loans and high yield bonds. Additionally, we may from time to time hold or invest in other equity investments and other debt or equity securities generally arising from a restructuring of Loan positions previously held by us. Under normal market conditions, we will invest at least 80% of our assets in Senior Secured Floating Rate Loans or CLOs that are pooled investment vehicles that invest primarily all of their assets in Loans.

Our level of investment activity can vary substantially from period to period depending on many factors, including the amount of debt and equity capital available to U.S. based large-market private companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. As a BDC, we must not acquire any assets other than "qualifying assets" as defined by Section 55(a) of the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions). Qualifying assets include investments in "eligible portfolio companies". The definition of "eligible portfolio company" includes private operating companies and certain public companies whose securities are listed on a national securities exchange but whose market capitalization is less than \$250 million, in each case organized under the laws of and with their principal place of business located in the United States. Investments in debt and equity tranches of CLOs are deemed nonqualified assets for BDC compliance purposes; therefore, under normal market conditions, we intend to limit our CLO investments to 20% of our portfolio.

Investment Income

We generate investment income primarily in the form of interest income from the investment securities we hold and capital gains, if any, on investment securities that we may sell. Our debt investments generally have a stated term of three to seven years and typically bear interest at a floating rate usually determined on the basis of a benchmark LIBOR, commercial paper rate, or the prime rate. Interest on our debt investments is generally payable quarterly but may be paid monthly or semi-annually.

Expenses

We do not have any employees and do not pay our officers any cash or non-cash equity compensation. We will pay, or reimburse our Manager and its affiliates, for expenses related to our operations incurred on our behalf, excluding employment-related expenses of our and our Manager's officers and any employees of American Capital or the parent company of our Manager who provide services to us pursuant to the management agreement or to our Manager pursuant to the administrative services agreement. However, for the first full 24 months after the date of our IPO, our other operating expenses will be limited to an annual rate of 0.75% of our consolidated net assets, less net unrealized appreciation or depreciation, each as determined under GAAP at the end of the most recently completed fiscal quarter. For the purposes of the preceding other operating expense limit, other operating expenses include both (i) our operating expenses reimbursed to our Manager and its affiliates for expenses related to our operations incurred on our behalf, and (ii) our operating expenses directly incurred by us excluding the management fee, interest costs, taxes and accrued costs and fees related to actual, pending or threatened litigation, each as determined under GAAP for the most recently completed fiscal quarter. Subsequent to the first full 24 months after the date of our IPO, there are no limits on the reimbursement to our Manager or its affiliates of such expenses related to our operations.

During periods of asset growth, we generally expect our general and administrative operating expenses to decline as a percentage of our total assets and increase during periods of asset declines. Interest expense and costs relating to future offerings of securities, among others, may also increase or reduce overall operating expenses based on portfolio

performance, interest rate benchmarks, and offerings of our securities relative to comparative periods, among other factors.

Portfolio and Investment Activity

As of December 31, 2014, the fair market value of our portfolio totaled \$276 million and was comprised of 70% first lien Loans, 11% second lien Loans and 19% CLO equity, measured at fair value. Our Loan portfolio consisted of all floating rate investments with 100% having LIBOR floors ranging between 1.00% and 1.75%. The weighted average LIBOR floor in our Loan portfolio was 1.03% as of December 31, 2014. As of December 31, 2014, the weighted average yield at cost of our first lien Loans, second lien Loans and CLO equity investments was 5.0%, 7.8% and 13.6%, respectively. The following table depicts a summary of the portfolio as of December 31, 2014:

(\$ in thousands)	Cost	Fair Market Value	Cumulative Net Unrealized Depreciation	Yield at Cost	
Investment Portfolio:					
First lien floating rate loans	\$198,028	\$194,952	\$(3,076)) 4.98	%
Second lien floating rate loans	30,842	29,841	(1,001)) 7.81	%
Total Senior Secured Floating Rate Loans	228,870	224,793	(4,077)) 5.36	%
CLO equity	53,263	51,577	(1,686)) 13.64	%
Total Investment Portfolio	\$282,133	\$276,370	\$(5,763)) 6.92	%
Loan Portfolio Statistics:					
Number of portfolio companies	117				
Number of industries	40				
CLO Statistics:					
Number of issuers	16				
Number of collateral managers	14				

During the year ended December 31, 2014, we purchased Senior Secured Floating Rate Loans of 120 portfolio companies (102 new and 18 existing) for a total purchase price of \$199.9 million with a weighted average yield at cost of 5.5%. During the year ended December 31, 2014, we purchased nine CLO equity investments (eight new and one existing) for an aggregate purchase price of \$26.7 million with a weighted average yield of 12.5%. Investment sales and repayments during the year ended December 31, 2014 totaled \$106.4 million and \$42.1 million, respectively. As a result of CLO equity representing a larger percentage of the portfolio and active portfolio management, the weighted average yield on the portfolio increased 31 basis points during the year to 6.9% as of December 31, 2014. The average yield during the year on our Loan portfolio, CLO investments and total portfolio was 5.3%, 13.0% and 6.5%, respectively.

The following tables depict the portfolio activity for the year:

Purchases (new)	102	8	110
Purchases (add-on to existing)	18	1	19
Complete Exit	54	—	54
Portfolio Companies - December 31, 2014	117	16	133

As of December 31, 2014, the fair value of the portfolio was \$276.4 million versus a cost basis of \$282.1 million resulting in \$(5.8) million of cumulative net unrealized depreciation. During the year ended December 31, 2014, we recognized net unrealized depreciation on the investment portfolio of \$(7.1) million. The depreciation, especially in the fourth quarter, was largely a function of exposure to the oil and gas industry, which was impacted by declines in oil prices during the second half of the year. The remaining net unrealized depreciation was a result of overall price changes observed in the broader market, which generally reflected an increase to the required rate of return for positions with otherwise stable credit profiles.

As of December 31, 2013, the fair market value of our portfolio totaled \$199.6 million and was comprised of 77% first lien Loans, 8% second lien Loans and 15% CLO equity. As of December 31, 2013, the Loan portfolio was diversified across 69 companies and 31 industries and the CLO portfolio was invested in 8 CLOs managed by 7 different collateral managers. The weighted average yield at cost of our first lien Loans, second lien Loans and CLO equity investments was 4.9%, 8.0% and 14.6%, respectively, as of December 31, 2013.

The following depicts a summary of the portfolio as of December 31, 2013:

(\$ in thousands)	Cost	Fair Market Value	Net Unrealized Depreciation	Yield at Cost	
Investment Portfolio:					
First lien floating rate loans	\$ 153,141	\$ 154,207	\$ 1,066	4.90	%

During the period ended December 31, 2013, we purchased Senior Secured Floating Rate Loans of 72 portfolio companies for a total purchase price of \$177.9 million with a weighted average yield at cost of 5.1%. During the period ended December 31, 2013, we made investments in eight CLO equity positions for an aggregate purchase price of \$29.7 million with a weighted average yield of 14.7%. Investment sales and repayments during the period ended December 31, 2013 totaled \$5.9 million and \$3.9 million, respectively.

As of December 31, 2013, the fair value of the portfolio was \$199.6 million versus a cost basis of \$198.3 million resulting in \$1.3 million of cumulative net unrealized appreciation. During the period ended December 31, 2013, ACSF recognized net unrealized appreciation on the investment portfolio of \$1.3 million.

As of December 31, 2014, the portfolio was diversified across both issuers and industries with the average exposure to an individual obligor in our Loan portfolio of \$1.9 million at fair value, or 0.7% of the total portfolio. The CLO investments were diversified across 16 CLOs with 14 different collateral managers and an average position size of \$3.2 million at fair value, or 1.2% of the total portfolio. We use the Global Industry Classification Standard (“GICS®”) for classifying the industry groupings of our Loan investments. The GICS® was developed by MSCI, an independent provider of global indexes and benchmark-related products and services, and Standard & Poor’s, an independent international financial data and investment services company and provider of global equity indexes. The following table shows the Loan portfolio composition by industry grouping at fair value as a percentage of total Loans as of December 31, 2014 and 2013. The investments in CLOs are excluded from the table below.

* Commencement of Operations

Investment Income

Investment income for the year ended December 31, 2014 was \$17.8 million. Interest generated from Loan investments totaled \$12.3 million and income from the CLO investments totaled \$5.5 million for the year ended December 31, 2014. The average yield on our Loan portfolio during the year ended December 31, 2014 was 5.3% and the average yield on our CLO investments during the year ended December 31, 2014 was 13.0% for a weighted average total yield on the portfolio during the year of 6.5%. Investment income for the period ended December 31, 2013 was \$1.6 million. Interest generated from Loan investments totaled \$1.1 million and income from the CLO investments totaled \$0.5 million for the period ended December 31, 2013.

Net Expenses

Net expenses for the year ended December 31, 2014 were \$6.8 million, primarily comprised of interest and other debt related costs of \$3.4 million, management fees of \$2.2 million and other general and administrative expenses. Net expenses for the period ended December 31, 2013 were \$1.0 million, primarily comprised of interest and other debt related costs of \$1.0 million.

Interest and other debt related costs incurred in 2013 and from January 1, 2014 until January 22, 2014 (the closing date of the IPO) primarily related to interest expense on the ACAM Facility. There was \$194.7 million outstanding on the ACAM Facility at the time of the closing of the IPO, at which point the ACAM Facility was repaid in full and terminated. The weighted average interest rate on the ACAM Facility was 5.0%.

Interest and other debt related costs incurred following the closing date of the IPO through December 31, 2014 are related to borrowings under our Credit Facility. The Credit Facility generally bears interest at a spread of 1.80% over a chosen index (which is typically one-month LIBOR). Included in other debt related costs are additional fees and expenses associated with the Credit Facility, including an unused commitment fee of 75 basis points on undrawn commitments and the amortization of debt financing costs.

The following table outlines the costs associated with our debt financing during 2013 and 2014:

(\$ in thousands)	For the period from January 1, 2014 to January 22, 2014	For the period from January 22, 2014 to December 31, 2014	For the Year and Period Ended December 31, 2014	2013
Interest expense	\$568	\$2,433	\$3,001	\$943
Commitment fees	—	54	54	—
Amortization of debt financing costs	22	371	393	8
Total Financing Costs	\$590	\$2,858	\$3,448	\$951
Average debt outstanding	\$194,748	\$127,092	\$130,984	\$89,524
Average cost of funding ⁽¹⁾	5.00%	2.39%	2.63%	5.00%
Weighted average interest rate	5.00%	2.00%	2.26%	5.00%

(1) Includes amortization of debt financing costs

Management fees were \$2.2 million for the year ended December 31, 2014. The accrual for management fees commenced upon the receipt of the IPO proceeds, which occurred on January 22, 2014, and was prorated for the first quarter based on the number of days the management agreement was in effect.

Other operating expenses totaled \$2.1 million for the year ended December 31, 2014 and are comprised primarily of insurance premiums, Board of Director fees, professional fees and rent. However, as a result of the expense cap, our Manager was responsible for \$1.0 million of our expenses which resulted in our other operating expenses (net) totaling \$1.1 million for the year ended December 31, 2014.

Net Realized Gains / Losses

Sales and repayments of investments during the year ended December 31, 2014 totaled \$106.4 million and \$42.0 million, respectively, resulting in net realized gains of \$0.2 million, or \$0.02 per weighted average share outstanding. Sales and repayments of investments during the period ended December 31, 2013 totaled \$5.9 million and \$3.9 million, respectively, resulting in net realized losses of less than \$(0.1) million.

Net Unrealized Appreciation / Depreciation

During the year ended December 31, 2014, we recognized net unrealized depreciation on the investment portfolio of \$(7.1) million. The depreciation, especially in the fourth quarter, was largely a function of exposure to the oil and gas industry, which was impacted by declines in oil prices during the second half of the year. The remaining net depreciation was a result of overall price changes observed in the broader market, which reflected an increase to the required rate of return for positions with otherwise stable credit profiles. During the period ended December 31, 2013, ACSF recognized net unrealized appreciation on the investment portfolio of \$1.3 million, primarily from the Loan portfolio, the fair value of which moved in-line with the broader market.

Taxes

From our inception through the date of our IPO, we were a taxable corporation under Subchapter C of the Code ("C corporation"), subject to federal and state income taxes on our taxable ordinary income and capital gains. Prior to our IPO, we were a wholly-owned subsidiary of ACAM, which is wholly-owned by American Capital. As such, we were required to be consolidated in American Capital's federal consolidated tax group, which has a September 30 tax year end. We had a tax sharing agreement with American Capital and other members of the consolidated tax group, under which such members bore their full share of their individual tax obligation and members were compensated for their losses and other tax benefits that were able to be used by other members of the consolidated tax group based on their pro forma stand-alone federal income tax return. We recognized \$1.1 million of federal and state tax expense related to our operations prior to the IPO.

We intend to elect to be taxed as a RIC under Subchapter M of the Code beginning with the date of our IPO through our tax fiscal year end of December 31 and for subsequent years. As part of our election to be taxed as a RIC, we intend to make a "deemed sale election" whereby we will treat our net unrealized gains ("net built-in gain") on the date of our IPO as recognized for tax purposes in our final pre-IPO C corporation federal tax return. The federal tax sharing

payment that we owed to American Capital attributed to our net built-in gain was \$0.6 million. American Capital waived this payment which was then treated as a deemed capital contribution to us.

Excluding the deemed sale election, there were no significant tax consequences arising from the conversion to a RIC from a C corporation in connection with our IPO.

As of December 31, 2014, we had approximately \$2.0 million, or \$0.20 per share, of estimated undistributed taxable income. We intend to distribute sufficient dividends, including dividends distributed in the following tax year that we elect to be treated as distributed in the current year, to eliminate our current year taxable income. For the year ended December 31, 2014, we accrued federal excise tax of \$0.1 million.

Financial Condition, Liquidity and Capital Resources

Liquidity and capital resources arise primarily from our Credit Facility and cash flow from operations. In addition, we expect to use proceeds from any follow-on equity offerings of common stock and other supplementary financing mechanisms as additional sources of capital and liquidity.

In order to qualify as a RIC, we must annually distribute in a timely manner to our stockholders at least 90% of our taxable ordinary income. In addition, we must also distribute in a timely manner to our stockholders all of our taxable ordinary and capital income in order to not be subject to income taxes. Accordingly, our ability to retain earnings is limited.

As a BDC, we are generally not able to issue or sell our common stock at a price below our net asset value per share, exclusive of any underwriting discount, except (i) with the prior approval of a majority of our stockholders, (ii) in connection with a rights offering to our existing stockholders, or (iii) under such other circumstances as the SEC may permit. As of December 31, 2014, our net asset value was \$14.42 per share and our closing market price was \$12.11 per share.

On January 22, 2014, we closed our IPO of 10.0 million shares of common stock at \$15.00 per share, raising approximately \$149.2 million in net proceeds. Using the proceeds from the IPO, plus borrowings from our Credit Facility, we repaid the ACAM Facility in the amount of \$194.7 million. Following repayment, the ACAM Facility was terminated.

As of December 31, 2014, we had \$130.0 million in borrowings outstanding on our Credit Facility. The fair value of assets owned by ACSF Funding as of December 31, 2014 was \$220.4 million and the borrowing base was \$153.4 million. On a consolidated basis, as of December 31, 2014, we were leveraged at 0.90x debt to equity. As of December 31, 2014, we had approximately \$11.8 million of available liquidity consisting of \$1.8 million of cash and cash equivalents and \$10.0 million of available capacity on our Credit Facility.

As a BDC, we are permitted to issue "senior securities", as defined in the 1940 Act, in any amounts as long as immediately after such issuance our asset coverage is at least 200%, or equal to or greater than our asset coverage prior to such issuance, after taking into account the payment of debt with proceeds from such issuance. Asset coverage is defined in the 1940 Act as the ratio of the value of the total assets, less all liabilities and indebtedness not represented by senior securities, to the aggregate amount of senior securities representing indebtedness. However, if our asset coverage is below 200%, we may also borrow amounts up to 5% of our total assets for temporary purposes even if that would cause our asset coverage ratio to further decline. As of December 31, 2014, our asset coverage was 211%.

Operating and Financing Cash Flows

For the year and period ended December 31, 2014 and 2013, net cash used in operating activities was \$87.5 million and \$181.8 million, respectively. Cash used in operating activities for the year and period ended December 31, 2014 and 2013 was primarily a result of net investment purchases of \$78.2 million and \$197.8 million, respectively. For the year and period ended December 31, 2014 and 2013, net cash provided by financing activities was \$76.7 million and \$194.3 million, respectively. Our cash flow from financing activities during the year ended December 31, 2014 was primarily attributable to net proceeds from our IPO of \$149.2 million offset by a net decrease in the amount of debt outstanding of \$64.7 million. Our cash flow from financing activities during the period ended December 31, 2013 was primarily attributable to draws on our ACAM Facility of \$194.7 million.

Contractual Obligations

A summary of our contractual payment obligations as of December 31, 2014 are as follows:

Payments Due by Period (in thousands)

Edgar Filing: American Capital Senior Floating, Ltd. - Form 10-K

	Total	Less than 1 Year	1 - 3 Years	3 - 5 Years	More than 5 Years
Credit Facility	\$ 130,000	\$ 130,000	\$—	\$—	\$—
Total contractual obligations	\$ 130,000	\$ 130,000	\$—	\$—	\$—

Off-Balance Sheet Arrangements

We currently engage in no off-balance sheet arrangements.

Dividends

When determining dividends, our Board of Directors considers, among other things, our estimated taxable income, which may differ from GAAP income due to temporary and permanent differences in income and expense recognition, and changes in unrealized appreciation and depreciation on investments. The specific tax characteristics will be reported to stockholders on Form 1099 after the end of the calendar year. From a tax perspective, 100% of the dividends paid during the year ended December 31, 2014 were distributions of ordinary income.

For the year ended December 31, 2014, our Board of Directors declared \$1.03 per share of dividends totaling \$10.3 million in dividends. We maintain an "opt out" dividend reinvestment and stock purchase plan for our common stockholders. As a result, if we declare a dividend, then stockholders' cash dividends will be automatically reinvested in additional shares of our common stock, unless they, or their nominees on their behalf, specifically "opt out" of the dividend reinvestment and stock purchase plan so as to receive cash dividends.

The table below details the dividends declared on our shares of common stock since the completion of our IPO (dollars in thousands, except per share data):

Dividend Declaration Date	Ex-Dividend Date	Record Date	Payment Date	Per Share Amount	Total Amount
March 17, 2014	March 27, 2014	March 31, 2014	April 10, 2014	\$0.18	\$1,800
June 18, 2014	June 26, 2014	June 30, 2014	July 10, 2014	\$0.28	\$2,800
September 17, 2014	September 26, 2014	September 30, 2014	October 10, 2014	\$0.28	\$2,800
December 18, 2014	December 29, 2014	December 31, 2014	January 9, 2015	\$0.29	\$2,900

Critical Accounting Policies

The preparation of consolidated financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and revenues and expenses during the periods reported. Actual results could materially differ from those estimates. The following is a summary of our accounting policies that are most affected by judgments, estimates and assumptions, which relate to the estimation of fair value of portfolio investments and revenue recognition.

Valuation of Portfolio Investments

We value our investments in accordance with the 1940 Act and ASC 820, as determined in good faith by our Board of Directors.

We undertake a multi-step valuation process to determine the fair value of our investments in accordance with ASC 820. The valuation process begins with the development of a preliminary valuation recommendation for each investment as determined in accordance with our valuation policy by a group of our Manager's valuation, accounting and finance professionals, which is independent of our Manager's investment team. To prepare the proposed valuation, the group reviews information provided by a nationally recognized independent pricing service and broker-dealers, and may consult with the investment team and other internal resources of our Manager and its affiliates. The preliminary valuation recommendations are then presented to the Investment Committee and reviewed and approved by our Audit and Compliance Committee. The valuation recommendations are then reviewed by our Board of Directors for final approval. There were no changes to our valuation techniques or to the types of unobservable inputs used in the valuation process during the year ended December 31, 2014.

ASC 820 provides a framework for measuring the fair value of assets and liabilities and provides guidance regarding a fair value hierarchy, which prioritizes information used to measure fair value and the effect of fair value measurements on earnings. When available, we determine the fair value of our investments using unadjusted quoted prices from active markets. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's fair value measurement. We use judgment and consider factors specific to the investment when

determining the significance of an input to a fair value measurement. Our policy is to recognize transfers in and out of levels as of the beginning of each reporting period. The three levels of the fair value hierarchy and investments that fall into each of the levels are described below:

50

Level 1: Inputs are unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. This may include valuations based on executed trades, broker quotations that constitute an executable price, and alternative pricing sources supported by observable inputs which, in each case, are either directly or indirectly observable for the asset in connection with market data at the measurement date.

Level 3: Inputs are unobservable and cannot be corroborated by observable market data. In certain cases, investments classified within Level 3 may include securities for which we have obtained indicative quotes from broker-dealers that do not necessarily represent prices the broker may be willing to trade on.

The valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

Our Loans are predominately valued based on evaluated prices from a nationally recognized independent pricing service approved by our Board of Directors or from third-party brokers who make markets in such debt investments. When possible, we make inquiries of third-party pricing sources to understand their use of significant inputs and assumptions. We review the third-party fair value estimates and perform procedures to validate their reasonableness, including an analysis of the range and dispersion of third-party estimates, frequency of pricing updates, comparison of recent trade activity for similar securities, and review for consistency with market conditions observed as of the measurement date.

There may be instances when independent or third-party pricing sources are not available, or cases where we believe that the third-party pricing sources do not provide sufficient evidence to support a market participant's view of the fair value of the debt investment being valued. These instances may result from an investment in a less liquid loan such as a middle market loan, a mezzanine loan or unitranche loan, or a loan to a company that has become financially distressed. In these instances, we may estimate the fair value based on a combination of a market yield valuation methodology and evaluated pricing discussed above, or solely based on a market yield valuation methodology. Under the market yield valuation methodology, we estimate the fair value based on a discounted cash flow technique. For these debt investments, the unobservable inputs used in the market yield valuation methodology to measure fair value reflect management's best estimate of assumptions that would be used by market participants when pricing the investment in a hypothetical transaction, including estimated remaining life, current market yield and interest rate spreads of similar loans and securities as of the measurement date. We will estimate the remaining life based on market data for the average life of similar loans. However, if we have information that the loan is expected to be repaid in the near term, we would use an estimated remaining life based on the expected repayment date. The average life to be used to estimate the fair value of our loans may be shorter than the legal maturity of the loans since many loans are prepaid prior to the maturity date. The interest rate spreads used to estimate the fair value of our loans is based on current interest rate spreads of similar loans. If there is a significant deterioration of the credit quality of a loan, we may consider other factors that a hypothetical market participant would use to estimate fair value, including the proceeds that would be received in a liquidation analysis.

We estimate the fair value of our CLO equity investments using a combination of third-party broker quotes, purchases or sales of the same or similar securities, and cash flow forecasts subject to assumptions that a market participant would use regarding the investments' underlying collateral including, but not limited to, assumptions for default and recovery rates, reinvestment spreads and prepayment rates. Cash flow forecasts are discounted using market participant's market yield assumptions that are derived from multiple sources including, but not limited to, third-party broker quotes, industry research reports and transactions of securities and indices with similar structures and risk characteristics. We weight the use of third-party broker quotes, if any, when determining fair value based on our understanding of the level of actual transactions used by the broker to develop the quote and whether the quote was an indicative price or binding offer, the depth and consistency of broker quotes and the correlation of changes in broker quotes with underlying performance and other market indices.

Investment Income

For debt investments, we record interest income on the accrual basis to the extent that such amounts are expected to be collected. OID and purchased discounts and premiums are accreted/amortized into interest income using the effective interest method, where applicable. Loan origination fees are deferred and accreted into interest income using the

effective interest method. We record prepayment premiums on loans and other investments as interest income when such amounts are received. We stop accruing interest on investments when it is determined that interest is no longer collectible. As of December 31, 2014 and 2013, we had no loans on non-accrual status.

Interest income on the CLO equity investments is recognized using the effective interest method as required by ASC Subtopic 325-40, Investments-Other, Beneficial Interests in Securitized Financial Assets. At the time of purchase, we estimate the future expected cash flows and determine the effective interest rate based on these estimated cash flows and our cost basis. Subsequent to the purchase, the estimated future cash flows are updated quarterly and a revised yield is calculated prospectively based on the current amortized cost of the investment as adjusted for credit impairments, if any.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are subject to financial market risks, including changes in interest rates. As of December 31, 2014, all of our debt investments bore interest at floating rates, and we expect that our investment portfolio will, in the future, primarily include floating rate debt investments. The interest rates on our debt investments are usually based on a floating LIBOR, and the debt investments typically contain interest rate reset provisions that adjust applicable interest rates to current rates on a periodic basis. As of December 31, 2014, 100% of the debt investments in our portfolio had interest rate floors between 1.00% and 1.75%, which, in the current interest rate environment where LIBOR is below 1%, has effectively converted those floating rate debt investments to fixed rate debt investments. In contrast, our Credit Facility has a floating interest rate provision with no LIBOR floor and therefore our cost of funds will fluctuate with changes in short-term interest rates.

Assuming no changes to our consolidated statement of assets and liabilities as of December 31, 2014, the following table shows the approximate annualized impact to the components of our results of operations from hypothetical base rate changes in interest rates to our Loan portfolio and debt financing.

(\$ in thousands except per share data) Basis point increase ⁽¹⁾	Interest Income	Interest Expense	Net Increase (Decrease)	Net Increase (Decrease) per share
300	\$4,921	\$3,900	\$1,021	\$0.10
200	\$2,629	\$2,600	\$29	\$—
100	\$367	\$1,300	\$(933)	\$(0.09)

(1) A decline in interest rates would not have a material impact on our consolidated financial statements.

Although management believes that this measure is indicative of our sensitivity to interest rates, it does not reflect any potential impact to the fair value of our investments as a result of changes to interest rates, nor does it adjust for potential changes in the credit market, credit quality, size and composition of the assets in our consolidated statements of assets and liabilities and other business developments that could affect the net increase/(decrease) in net assets resulting from operations or net investment income. Accordingly, no assurances can be given that actual results would not differ materially from those shown above.

The above sensitivity analysis does not consider the impact of rising interest rates on revenue from our CLO equity investments. The revenue recognized on our CLO equity investments is calculated using the effective interest method which incorporates a forward LIBOR curve in the projected cash flows. Any change to interest rates that is not in-line with the forward LIBOR curve used in the projections, in either the timing or magnitude of the change, will cause actual distributions to differ from the current projections and will impact the related revenue recognized from these investments.

The below graph illustrates the forward LIBOR curve utilized in the projected cash flows from our CLO equity investments as of December 31, 2014.

CLO equity investments are levered structures that are collateralized primarily with first lien floating rate loans that may have LIBOR floors and levered primarily with floating rate debt that does not have a LIBOR floor. The residual cash flows

available to the equity holders of the CLOs will decline as interest rates increase until interest rates surpass the LIBOR floors on the floating rate loans.

Item 8. Financial Statements and Supplementary Data

Our management is responsible for the preparation, integrity and objectivity of the accompanying consolidated financial statements and the related financial information. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States and necessarily include certain amounts that are based on estimates and informed judgments. Our management also prepared the related financial information included in this Annual Report on Form 10-K and is responsible for its accuracy and consistency with the consolidated financial statements.

The consolidated financial statements have been audited by Ernst & Young LLP, an independent registered public accounting firm, who conducted their audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) as of December 31, 2014 and 2013, and for the year ended December 31, 2014 and the period from October 15, 2013 (commencement of operations) through December 31, 2013. The independent registered public accounting firm's responsibility is to express an opinion as to the fairness with which such consolidated financial statements present our financial position, results of operations, changes in net assets and cash flows in accordance with accounting principles generally accepted in the United States.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of American Capital Senior Floating, Ltd.

We have audited the accompanying consolidated statements of assets and liabilities of American Capital Senior Floating, Ltd. (the "Company"), including the consolidated schedules of investments, as of December 31, 2014 and 2013, and the related consolidated statements of operations, changes in net assets, and cash flows for the year ended December 31, 2014 and for the period from October 15, 2013 (commencement of operations) through December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2014 and December 31, 2013, by correspondence with the custodian and others, or by other appropriate auditing procedures where replies from others were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of American Capital Senior Floating, Ltd. at December 31, 2014 and 2013, and the consolidated results of its operations, changes in its net assets, and its cash flows for the year ended December 31, 2014 and for the period from October 15, 2013 (commencement of operations) through December 31, 2013, in conformity with U.S. generally accepted accounting principles.

Net Assets — 100.0%				\$144,235

(1) Floating rate debt investments typically bear interest at a rate determined by reference to either the London Interbank Offered Rate (“LIBOR” or “L”) index rate or the prime index rate (“PRIME” or “P”), and which typically reset monthly, quarterly or semi-annually. For each debt investment we have provided the current interest rate in effect as of December 31, 2014.

(2) Floating rate instruments accrue interest at a predetermined spread relative to an index, typically the LIBOR or PRIME rate. These instruments are typically subject to a LIBOR or PRIME rate floor.

(3) Investments that are not "qualifying assets" under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire any non-qualifying asset unless, at the time such acquisition is made, qualifying assets represent at least 70% of our total assets.

(4) These securities are exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may be resold in transactions that are exempt from registration, normally to qualified institutional buyers.

(5) All or a portion of this position has not settled as of December 31, 2014.

(6) Assets are held at ACSF Funding and are pledged as collateral for the Credit Facility.

See notes to consolidated financial statements.

AMERICAN CAPITAL SENIOR FLOATING, LTD.
CONSOLIDATED SCHEDULE OF INVESTMENTS (continued)
DECEMBER 31, 2013
(in thousands)

- Floating rate debt investments typically bear interest at a rate determined by reference to either the London Interbank Offered Rate ("LIBOR" or "L") index rate or the prime index rate ("PRIME" or "P"), and which typically reset monthly, quarterly or semi-annually. For each debt investment we have provided the current interest rate in effect as of December 31, 2013.
- (1) Floating rate instruments accrue interest at a predetermined spread relative to an index, typically the LIBOR or PRIME rate. These instruments are typically subject to a LIBOR or PRIME rate floor.
- Investments that are not "qualifying assets" under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not
- (3) acquire any non-qualifying asset unless, at the time such acquisition is made, qualifying assets represent at least 70% of our total assets.
- (4) These securities are exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may be resold in transactions that are exempt from registration, normally to qualified institutional buyers.
- (5) All or a portion of this position has not settled as of December 31, 2013.
- (6) Denotes a "when issued" security that was scheduled to close after December 31, 2013.
- (7) Includes the unfunded obligations of \$1,333 par at \$5 fair value.

See notes to consolidated financial statements.

AMERICAN CAPITAL SENIOR FLOATING, LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2014
(in thousands, except share and per share amounts)

Note 1. Organization

American Capital Senior Floating, Ltd. (which is referred to as "ACSF", "we", "us" and "our") was organized in February 2013 as a Maryland corporation and commenced operations on October 15, 2013. We are structured as an externally managed, non-diversified closed-end investment management company that has elected to be regulated as a business development company ("BDC") under the Investment Company Act of 1940, as amended (the "1940 Act"). On November 14, 2013, we formed a wholly-owned special purpose financing vehicle, ACSF Funding I, LLC, a Delaware limited liability company ("ACSF Funding").

In January 2014, we completed an initial public offering ("IPO") of 10,000,000 shares of common stock at the public offering price of \$15.00 per share for gross proceeds of \$150,000. Upon completion of the IPO, we became externally managed by American Capital ACSF Management, LLC (our "Manager"), an indirect subsidiary of American Capital Asset Management, LLC ("ACAM"), which is a wholly-owned portfolio company of American Capital, Ltd. ("American Capital"). Prior to the completion of our IPO, we were wholly-owned by ACAM. Following completion of the IPO, ACAM owned approximately 3% of our outstanding common stock, the maximum amount permissible under the 1940 Act. In conjunction with the IPO, our Manager paid the underwriting commissions of \$7,952. Our common stock is listed on the NASDAQ Global Select Market, where it trades under the symbol "ACSF". In connection with the IPO, we elected to be treated as a BDC under the 1940 Act and intend to elect to be taxed as a regulated investment company ("RIC"), as defined in Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code").

Investment Objective

Our investment objective is to provide attractive, risk-adjusted returns over the long term primarily through current income while seeking to preserve our capital. We actively manage a leveraged portfolio composed primarily of diversified investments in first lien and second lien floating rate loans principally to large-market U.S.-based companies (collectively, "Senior Secured Floating Rate Loans" or "Loans") which are commonly referred to as leveraged loans. We also invest in equity tranches of collateralized loan obligations ("CLOs") which are securitized vehicles collateralized primarily by Loans and we may invest in debt tranches of CLOs. In addition, we may selectively invest in loans issued by middle market companies, mezzanine and unitranche loans and high yield bonds. Additionally, we may from time to time hold or invest in other equity investments and other debt or equity securities generally arising from a restructuring of Loan positions previously held by us.

Note 2. Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP"). Subsequent events are evaluated and disclosed as appropriate for events occurring through the date the consolidated financial statements are issued.

The consolidated financial statements include our accounts and those of our wholly-owned subsidiary, ACSF Funding. Intercompany accounts and transactions have been eliminated in consolidation. The accounts of ACSF Funding are prepared for the same reporting period as ours using consistent accounting policies.

Use of Estimates

The preparation of our financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amount of income and expenses during the reported period. Changes in economic environment, financial markets, and any other parameters used in determining such estimates could cause actual results to differ.

Investment Classification

As required by the 1940 Act, investments are classified by level of control. "Control Investments" are defined as investments in portfolio companies that we are deemed to control, as defined in the 1940 Act. "Affiliate Investments"

are investments in those companies that are affiliated companies, as defined in the 1940 Act, other than Control Investments. "Non-Control/Non-Affiliate Investments" are those that are neither Control Investments nor Affiliate Investments.

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

Generally, under the 1940 Act, we are deemed to control a company in which we have invested if we own more than 25% of the voting securities of such company. We are deemed to be an affiliate of a company if we own 5% or more of the voting securities of such company.

As of December 31, 2014 and 2013, all of our investments were Non-Control/Non-Affiliate investments.

Fair Value Measurements

We value our investments in accordance with the 1940 Act and Accounting Standards Codification ("ASC") Topic 820, Fair Value Measurements and Disclosures ("ASC 820"), as determined in good faith by our Board of Directors. Fair value is defined as the price that would be received upon the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. Due to the uncertainty inherent in the valuation process, estimates of fair value may differ significantly from the values that would have been used had a ready market for our investments existed, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on the investments to be different than the valuations currently assigned. We undertake a multi-step valuation process to determine the fair value of our investments in accordance with ASC 820. The valuation process begins with the development of a preliminary valuation recommendation for each investment as determined in accordance with our valuation policy by a group of our Manager's valuation, accounting and finance professionals, which is independent of our Manager's investment team. To prepare the proposed valuation, the group reviews information provided by a nationally recognized independent pricing service and broker-dealers, and may consult with the investment team and other internal resources of our Manager and its affiliates. The preliminary valuation recommendations are then presented to the Investment Committee and reviewed and approved by our Audit and Compliance Committee. The valuation recommendations are then reviewed by our Board of Directors for final approval. There were no changes to our valuation techniques or to the types of unobservable inputs used in the valuation process during the year ended December 31, 2014 compared to the period ended December 31, 2013.

Securities Transactions

Securities transactions are recorded on the trade date. The trade date for loans purchased in the "primary market" is considered the date on which the loan allocations are determined. The trade date for loans and other investments purchased in the "secondary market" is the date on which the transaction is entered into. The trade date for primary CLO equity transactions and any other security transaction entered outside conventional channels is the date we have determined all material terms have been defined for the transaction and have obtained a right to demand the securities purchased or collect the proceeds of a sale and incur an obligation to pay the price of the securities purchased or to deliver the securities sold, respectively. Cost is determined based on consideration given, and the unrealized appreciation or depreciation on investment securities represent the changes in fair values as determined in compliance with the valuation policy. Realized gains and losses from the disposition of securities are recorded on the basis of weighted average cost.

Investment Income

For debt investments, we record interest income on the accrual basis to the extent that such amounts are expected to be collected. OID and purchased discounts and premiums are accreted/amortized into interest income using the effective interest method, where applicable. Loan origination fees are deferred and accreted into interest income using the effective interest method. We record prepayment premiums on loans and other investments as interest income when such amounts are received. We stop accruing interest on investments when it is determined that interest is no longer collectible. As of December 31, 2014 and 2013, we had no loans on non-accrual status.

Interest income on the CLO equity investments is recognized using the effective interest method as required by ASC Subtopic 325-40, Investments-Other, Beneficial Interests in Securitized Financial Assets. At the time of purchase, we estimate the future expected cash flows and determine the effective interest rate based on these estimated cash flows

and our cost basis. Subsequent to the purchase, the estimated future cash flows are updated quarterly and a revised yield is calculated prospectively based on the current amortized cost of the investment as adjusted for credit impairments, if any.

Cash and Cash Equivalents

Cash and cash equivalents consist of demand deposits and highly liquid financial instruments with original maturities of 90 days or less including those held in overnight sweep bank deposit accounts. Cash and cash equivalents are carried at cost, which approximates fair value. We place our cash and cash equivalents with financial institutions and, at times, cash held in bank accounts may exceed the Federal Deposit Insurance Corporation insured limit.

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

Consolidation

As permitted under Regulation S-X and as explained by ASC 946-810-45, Financial Services - Investment Companies - Consolidation, we will generally not consolidate an investment in a company other than an investment company subsidiary or a controlled operating company whose business consists primarily of providing services to us. Accordingly, we have consolidated the results of ACSF Funding in our consolidated financial statements.

Offering Costs

Offering costs consist of fees and expenses incurred in connection with our IPO of common stock including legal, accounting and printing fees, but exclusive of underwriting commissions, which were paid by our Manager. There were \$844 and \$0 of offering costs charged to capital during the year and period ended December 31, 2014 and 2013, respectively.

Dividends to Common Stockholders

Dividends and distributions to common stockholders are recorded on the ex-dividend date.

Note 3. Agreements

Management Agreement

We have entered into a management agreement with our Manager effective January 15, 2014. Under the management agreement, our Manager has agreed to provide investment advisory services to us, in addition to providing personnel, facilities and additional services necessary for our operations. Unless terminated earlier, the management agreement will remain in effect until January 15, 2016. It will remain in effect from year-to-year thereafter if approved annually by our Board of Directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, and, in either case if also approved by a majority of our directors who are not "Interested Persons" as defined under the 1940 Act.

Our Manager receives a management fee from us that is payable quarterly in arrears. The management fee is calculated at an annual rate of 0.80% of our total consolidated assets, excluding cash and cash equivalents and net unrealized appreciation or depreciation, each as determined under GAAP at the end of the most recently completed fiscal quarter. There is no incentive compensation paid to our Manager under the management agreement. The management fee is prorated for any partial period and totaled \$2,186 and \$0 for the year and period ended December 31, 2014 and 2013, respectively.

Since our Manager has no employees, it has entered into an administrative agreement with both its parent and American Capital pursuant to which our Manager will be provided with personnel, services and resources necessary for our Manager to perform its obligations under the management agreement.

We have also agreed to reimburse our Manager and its affiliates for certain expenses related to operations incurred on our behalf, excluding employment-related expenses of our and our Manager's officers and any employees of American Capital or its affiliates who provide services to us pursuant to the management agreement or to our Manager pursuant to the administrative services agreement. In addition, our Manager or one of its affiliates may pay for or incur certain expenses and then allocate these expenses to ACSF. For the year and period ended December 31, 2014 and 2013, we recognized \$970 and \$48, respectively, of expenses that are reimbursable to our Manager and its affiliates.

For 24 months following the date of our IPO, our Manager has agreed to be responsible for certain of our operating expenses in excess of 0.75% of our consolidated net assets, less net unrealized appreciation or depreciation, each as determined under GAAP at the end of the most recently completed fiscal quarter. Operating expenses subject to this reimbursement include both (i) our operating expenses reimbursed to our Manager and its affiliates for the expenses related to our operations incurred on our behalf and (ii) our operating expenses directly incurred by us excluding the management fee, interest costs, taxes and accrued costs and fees related to actual, pending or threatened litigation, each as determined under GAAP for the most recently completed fiscal quarter. As a result of this operating expense limit, any reimbursements to our Manager and its affiliates could be reduced or eliminated, and in certain instances, our Manager could be required to reimburse us so that our other expenses do not exceed the limit described above.

Subsequent to the first full 24 months after the date of our IPO, there are no limits on the reimbursement to our Manager or its affiliates of such expenses related to our operations. For the year and period ended December 31, 2014 and 2013, our Manager was responsible for \$1,001 and \$0, respectively, of operating expenses as a result of the expense cap.

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

Tax Sharing Agreement

For the period prior to our IPO, during which we were treated as a taxable corporation under Subchapter C of the Code ("C corporation") for tax purposes, we had a tax sharing agreement with American Capital and other members of its consolidated tax group, under which such members bore their full share of their individual tax obligation and members were compensated for their losses and other tax benefits that were able to be used by other members of the consolidated tax group based on their pro-forma stand-alone federal income tax return.

Note 4. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share for the year ended December 31, 2014:

	Year Ended December 31, 2014
Numerator—net increase in net assets resulting from operations	\$3,789
Denominator—weighted average shares ⁽¹⁾	10,000,100
Earnings per share	\$0.38

(1) Assumes the 10,000,000 common shares issued in our IPO on January 22, 2014 were issued on January 1, 2014.

Earnings per share for the period ended December 31, 2013 is considered not meaningful.

Note 5. Investments

Our investments primarily focus on Senior Secured Floating Rate Loans and investments in equity tranches of CLOs. Our investments in Senior Secured Floating Rate Loans are typically arranged by a syndicate of investment or commercial banks who syndicate loans to third-party investors. Investors may seek to buy and sell Senior Secured Floating Rate Loans through both primary and secondary markets. During the year ended December 31, 2014, we purchased Senior Secured Floating Rate Loans of 102 new and 18 existing portfolio companies for a total purchase price of \$199,931. During the period ended December 31, 2013, we purchased Senior Secured Floating Rate Loans of 72 portfolio companies for a total purchase price of \$177,886. During the year ended December 31, 2014, we purchased eight new and one existing CLO equity investments for an aggregate purchase price of \$26,697. During the period ended December 31, 2013, we purchased eight new CLO equity investments for an aggregate purchase price of \$29,662. Proceeds from the exit of investments during the year and period ended December 31, 2014 and 2013 totaled \$148,461 and \$9,790, respectively. As of December 31, 2014, our portfolio consisted of 133 portfolio companies, including 117 Loan obligors and 16 CLO equity investments. As of December 31, 2013, our portfolio consisted of 77 portfolio companies, including 69 Loan obligors and eight CLO equity investments.

We may, from time to time, transact in purchases or sales of securities with affiliates of our Manager at fair market value on the trade date. During the year ended December 31, 2014 and the period ended December 31, 2013, total proceeds from sales to affiliates were \$20,521 and \$0, respectively. During the period ended December 31, 2013, we purchased seven CLO equity investments from ACAM at fair value for an aggregate purchase price of \$24,748. These transactions meet ASC 860, Transfers and Servicing, requirements for sale accounting treatment.

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

We use the Global Industry Classification Standard (“GICS®”) to classify the industry groupings of our Loan investments. The GICS® was developed by MSCI, an independent provider of global indexes and benchmark-related products and services, and Standard & Poor’s, an independent international financial data and investment services company and provider of global equity indexes. The following table shows the Loan portfolio composition by industry grouping at fair value as a percentage of total Loans as of December 31, 2014 and 2013. Our investments in CLO equity are excluded from the table.

Note 6. Fair Value Measurements

We value our investments at fair value in accordance with ASC 820, which defines fair value as the price that would be received upon the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. Due to the uncertainty inherent in the valuation process, estimates of fair value may differ significantly from the values that would have been used had a ready market for our investments existed, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on the investments to be different than the valuations currently assigned.

ASC 820 provides a framework for measuring the fair value of assets and liabilities and provides guidance regarding a fair value hierarchy, which prioritizes information used to measure fair value and the effect of fair value measurements on earnings. When available, we determine the fair value of our investments using unadjusted quoted prices from active markets. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's fair value measurement. We use judgment and consider factors specific to the investment when determining the significance of an input to a fair value measurement. Our policy is to recognize transfers in and out of levels as of the beginning of each reporting period. The three levels of the fair value hierarchy and investments that fall into each of the levels are described below:

Level 1: Inputs are unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. This may include valuations based on executed trades, broker quotations that constitute an executable price, and alternative pricing sources supported by observable inputs which, in each case, are either directly or indirectly observable for the asset in connection with market data at the measurement date.

Level 3: Inputs are unobservable and cannot be corroborated by observable market data. In certain cases, investments classified within Level 3 may include securities for which we have obtained indicative quotes from broker-dealers that do not necessarily represent prices the broker may be willing to trade on.

The valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

Our Loans are predominately valued based on evaluated prices from a nationally recognized independent pricing service approved by our Board of Directors or from third-party brokers who make markets in such debt investments. When possible, we make inquiries of third-party pricing sources to understand their use of significant inputs and assumptions. We review the third-party fair value estimates and perform procedures to validate their reasonableness, including an analysis of the range and dispersion of third-party estimates, frequency of pricing updates, comparison of recent trade activity for similar securities, and review for consistency with market conditions observed as of the measurement date.

There may be instances when independent or third-party pricing sources are not available, or cases where we believe that the third-party pricing sources do not provide sufficient evidence to support a market participant's view of the fair value of the debt investment being valued. These instances may result from an investment in a less liquid loan such as a middle market loan, a mezzanine loan or unitranche loan, or a loan to a company that has become financially distressed. In these instances, we may estimate the fair value based on a combination of a market yield valuation methodology and evaluated pricing discussed above, or solely based on a market yield valuation methodology. Under the market yield valuation methodology, we estimate the fair value based on a discounted cash flow technique. For these debt investments, the unobservable inputs used in the market yield valuation methodology to measure fair value reflect management's best estimate of assumptions that would be used by market participants when pricing the investment in a hypothetical transaction, including estimated remaining life, current market yield and interest rate spreads of similar loans and securities as of the measurement date. We will estimate the remaining life based on

market data for the average life of similar loans. However, if we have information that the loan is expected to be repaid in the near term, we would use an estimated remaining life based on the expected repayment date. The average life to be used to estimate the fair value of our loans may be shorter than the legal maturity of the loans since many loans are prepaid prior to the maturity date. The interest rate spreads used to estimate the fair value of our loans is based on current interest rate spreads of similar loans. If there is a significant deterioration of the credit quality of a loan, we may consider other factors that a hypothetical market participant would use to estimate fair value, including the proceeds that would be received in a liquidation analysis.

We estimate the fair value of our CLO equity investments using a combination of third-party broker quotes, purchases or sales of the same or similar securities, and cash flow forecasts subject to assumptions that a market participant would use regarding the investments' underlying collateral including, but not limited to, assumptions for default and recovery rates, reinvestment spreads and prepayment rates. Cash flow forecasts are discounted using market participant's market yield assumptions

(in thousands, except share and per share amounts)

that are derived from multiple sources including, but not limited to, third-party broker quotes, industry research reports and transactions of securities and indices with similar structures and risk characteristics. We weight the use of third-party broker quotes, if any, when determining fair value based on our understanding of the level of actual transactions used by the broker to develop the quote and whether the quote was an indicative price or binding offer, the depth and consistency of broker quotes and the correlation of changes in broker quotes with underlying performance and other market indices. For the year ended December 31, 2014, there were no changes to our valuation techniques or to the types of unobservable inputs used in the valuation process compared to the period ended December 31, 2013.

The following fair value hierarchy tables set forth our investments measured at fair value on a recurring basis by level as of December 31, 2014 and 2013:

	December 31, 2014			
	Total	Level 1	Level 2	Level 3
First lien floating rate loans	\$194,952	\$—	\$189,274	\$5,678
Second lien floating rate loans	29,841	—	26,601	3,240
CLO equity	51,577	—	—	51,577
Total Investments	\$276,370	\$—	\$215,875	\$60,495
	December 31, 2013			
	Total	Level 1	Level 2	Level 3
First lien floating rate loans	\$154,207	\$—	\$117,950	\$36,257
Second lien floating rate loans	15,186	—	11,650	3,536
CLO equity	30,172	—	—	30,172
Total Investments	\$199,565	\$—	\$129,600	\$69,965

The following table provides a summary of the changes in fair value of Level 3 assets for the year ended December 31, 2014 as well as the portion of net unrealized depreciation for the year ended December 31, 2014 related to those assets still held as of December 31, 2014:

	First lien floating rate loans	Second lien floating rate loans	CLO equity	Total
Beginning Balance – December 31, 2013	\$36,257	\$3,536	\$30,172	\$69,965
Purchases	10,247	7,924	26,697	44,868
Sales	(12,538)	(3,507)	—	(16,045)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

The following table provides a summary of the changes in fair value of Level 3 assets for the period ended December 31, 2013 as well as the portion of net unrealized appreciation or depreciation for the period ended December 31, 2013 related to those assets still held as of December 31, 2013:

	First lien floating rate loans	Second lien floating rate loans	CLO equity	Total
Beginning Balance – October 15, 2013	\$—	\$—	\$—	\$—
Purchases	39,069	3,490	29,662	72,221
Sales	—	—	—	—
Repayments ⁽¹⁾	(3,151) —	—	(3,151
Amortization of discount/premium ⁽²⁾	2	—	516	518
Transfers out ⁽³⁾	—	—	—	—
Transfers in ⁽³⁾	—	—	—	—
Realized gains, net	(11) —	—	(11
Unrealized appreciation (depreciation), net	348	46	(6) 388
Ending Balance – December 31, 2013	\$36,257	\$3,536	\$30,172	\$69,965
Net change in unrealized appreciation/depreciation reported within the net change in unrealized appreciation on investments in our consolidated statement of operations attributable to our Level 3 assets still held as of December 31, 2013	\$348	\$46	\$(6) \$388

(1) Includes total cash distributions from CLO equity investments.

(2) Includes income accrual from CLO equity investments.

Investments were transferred into and out of Level 3 and Level 2 due to changes in the quantity and quality of (3) inputs obtained to support the fair value of each investment. Transfers into and out of the levels are recognized at the beginning of the period.

The following table summarizes the significant unobservable inputs used in the determination of fair value for our Level 3 investments by category of investment and valuation technique as of December 31, 2014:

	Fair Value as of December 31, 2014	Valuation Techniques/ Methodology	Unobservable Inputs	Range		Weighted Average
				Minimum	Maximum	
First lien floating rate loans	\$5,678	Third-party vendor pricing service	Vendor quotes	N/A	N/A	N/A
Second lien floating rate loans	\$3,240	Third-party vendor pricing service	Vendor quotes	N/A	N/A	N/A
CLO equity	\$51,577	Discounted Cash Flow	Discount rate	13.1%	15.6%	13.9%
			Prepayment rate	30.0%	35.0%	30.3%
			Default rate	0.25%	2.0%	1.5%
Total	\$60,495					

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

The following table summarizes the significant unobservable inputs used in the determination of fair value for our Level 3 investments by category of investment and valuation technique as of December 31, 2013:

	Fair Value as of December 31, 2013	Valuation Techniques/ Methodology	Unobservable Inputs	Range		Weighted Average
				Minimum	Maximum	
First lien floating rate loans	\$36,257	Third-party vendor pricing service	Vendor quotes	N/A	N/A	N/A
Second lien floating rate loans	\$3,536	Third-party vendor pricing service	Vendor quotes	N/A	N/A	N/A
CLO equity	\$30,172	Discounted Cash Flow	Discount rate	14.0%	18.0%	14.8%
			Prepayment rate	30.0%	35.0%	31.3%
			Default rate	0.25%	2.0%	1.5%
Total	\$69,965					

The significant unobservable inputs used in the fair value measurement of CLO equity include the default and prepayment rates used to establish projected cash flows and the discount rate applied in the valuation models to those projected cash flows. An increase in any one of these individual inputs in isolation would likely result in a decrease to fair value. However, given the interrelationship between these inputs, overall market conditions would likely have a more significant impact on our Level 3 fair values than changes in any one unobservable input.

Note 7. Debt

Revolving Credit Facility

On October 15, 2013, we entered into a revolving credit facility with ACAM (the "ACAM Facility") which provided up to \$200,000 to finance eligible investments, working capital expenses and general corporate requirements (comprised of Loan A and Loan B). Under the ACAM Facility, we were able to draw up to \$180,000 under Loan A and up to \$20,000 under Loan B at any one time. Any amounts drawn on Loan A had a fixed interest rate of 4.75% per annum and any amounts drawn on Loan B had a fixed interest rate of 7.25% per annum, with all interest paid upon maturity of the ACAM Facility. The ACAM Facility matured on the closing date of our IPO. On January 22, 2014, we repaid the ACAM Facility in full plus accrued interest and terminated it. For the year and period ended December 31, 2014 and 2013, we incurred interest expense of \$568 and \$943 on the ACAM Facility, respectively. As of December 31, 2013, the total debt outstanding on the ACAM Facility was \$194,748.

Secured Revolving Credit Facility

On December 18, 2013, ACSF Funding entered into a two-year \$140,000 secured revolving credit facility with Bank of America, N.A., as agent (the "Credit Facility"). ACSF Funding may make draws under the Credit Facility from time to time to purchase or acquire certain eligible assets. The Credit Facility is secured by ACSF Funding's assets pursuant to a security agreement and contains customary financial and negative covenants and events of default. As of December 31, 2014 and 2013, the fair value of the assets in ACSF Funding was \$220,421 and \$0, respectively. The Credit Facility is non-recourse to ACSF. Amounts drawn under the Credit Facility bear interest at a rate per annum equal to either (a) LIBOR plus 1.80%, or (b) 0.80% plus the highest of (i) the Federal funds rate plus 0.50%, (ii) Bank of America, N.A.'s prime rate or (iii) one-month LIBOR plus 1%. ACSF Funding may borrow, prepay and reborrow loans under the Credit Facility at any time prior to November 18, 2015, the commitment termination date, subject to certain terms and conditions, including maintaining a borrowing base. Any outstanding balance on the Credit Facility as of the commitment termination date must be repaid on the maturity date, which is December 18, 2015, unless otherwise extended.

ACSF Funding is required to pay a commitment fee in an amount equal to 0.75% on the actual daily unused amount of the lender commitments under the Credit Facility from February 14, 2014 to the commitment termination date,

payable quarterly in arrears. In addition, if ACSF Funding terminates the commitment amount in whole or in part prior to June 18, 2015, ACSF Funding will be required to pay a make-whole fee equal to the sum of the present values of all future spread amounts that would have been payable in respect of the total commitments (or terminated portion thereof) during the period from the termination date through June 18, 2015.

AMERICAN CAPITAL SENIOR FLOATING, LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
DECEMBER 31, 2014
(in thousands, except share and per share amounts)

As of December 31, 2014, there was \$130,000 outstanding under the Credit Facility which had a fair value of \$130,000 and a weighted average interest rate of 1.96%. There were no borrowings outstanding under the Credit Facility as of December 31, 2013. The fair value of the Credit Facility is determined in accordance with ASC 820, which defines fair value in terms of the price that would be paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions and is measured with Level 3 inputs. As of December 31, 2014, ACSF Funding was in compliance with all covenants of the Credit Facility, including compliance with a borrowing base that applies various advance rates of up to 80% on the assets pledged as collateral by ACSF Funding.

For the year ended December 31, 2014, we incurred interest expense and commitment fees of \$2,433 and \$54, respectively, on the Credit Facility.

The average debt outstanding for the year ended December 31, 2014 was \$130,984. The weighted average annual interest cost, including commitment fees, for the year ended December 31, 2014 was 2.33%. Inclusive of 0.30% for amortization of debt issuance costs, the total average cost of funding for the year ended December 31, 2014 was 2.63%. The weighted average annual interest cost reflects the average interest cost during the period for both the ACAM Facility and the Credit Facility.

The average debt outstanding for the period ended December 31, 2013 was \$89,524. The weighted average annual interest cost for the period ended December 31, 2013 was 5.0%.

Note 8. Taxes

From our inception through the date of our IPO, we were a taxable C corporation, subject to federal and state income taxes on our taxable ordinary income and capital gains. Prior to our IPO, we were a wholly-owned subsidiary of ACAM, which is wholly-owned by American Capital. As such, we were required to be consolidated in American Capital's federal consolidated tax group, which has a September 30 tax year end. We had a tax sharing agreement with American Capital and other members of the consolidated tax group, under which such members bore their full share of their individual tax obligation and members were compensated for their losses and other tax benefits that were able to be used by other members of the consolidated tax group based on their pro forma stand-alone federal income tax return. For the year and period ended December 31, 2014 and 2013, we recognized \$279 and \$803, respectively, of federal and state tax expense related to our operations prior to our IPO.

We intend to elect to be taxed as a RIC under Subchapter M of the Code beginning with the date of our IPO through our tax fiscal year end of December 31 and for subsequent years. As part of our election to be taxed as a RIC, we intend to make a "deemed sale election" whereby we will treat our net unrealized gains ("net built-in gain") on the date of our IPO as recognized for tax purposes in our final pre-IPO C corporation federal tax return. The federal tax sharing payment that we owed to American Capital attributed to our net built-in gain was \$574. American Capital waived this payment which was then treated as a deemed capital contribution to us.

Excluding the deemed sale election, there were no significant tax consequences arising from the conversion to a RIC from a C corporation in connection with our IPO.

In order to qualify as a RIC for U.S. federal income tax purposes, we must meet certain annual distribution requirements, source of income tests and asset diversification rules. We were in compliance with the RIC requirements as of December 31, 2014.

As of December 31, 2014, we had approximately \$1,997, or \$0.20 per share, of estimated undistributed taxable income. We intend to distribute sufficient dividends, including dividends distributed in the following tax year that we elect to be treated as distributed in the current year, to eliminate our current year taxable income. As a result, no income tax provision has been provided in the financial statements other than the excise tax discussed below.

As a RIC, we are subject to a nondeductible U.S. federal excise tax of 4% on our undistributed "ordinary income" and "capital gain net income" (each as defined below) unless for each calendar year we distribute an amount equal to or greater than the sum of (a) 98% of our "ordinary income" (generally, our taxable income excluding net short-term and

net long-term capital gains or losses for the calendar year), (b) 98.2% of our “capital gain net income” (including both net short-term and net long-term capital gains or losses) realized, subject to certain modifications, for the 12-month period ending October 31 of such calendar year, and (c) any income recognized, but not distributed, in the preceding years. For the year ended December 31, 2014, we accrued federal excise tax of \$80.

Income determined under GAAP differs from income determined under tax because of both temporary and permanent differences in income and expense recognition, including (i) unrealized gains and losses associated with debt investments marked to fair value for GAAP but excluded from taxable income until realized or settled, (ii) differences arising due to the taxation of CLO equity investments, (iii) premium amortization and gain adjustments attributed to built-in gain recognized prior to the date of IPO for tax purposes and (iv) capital losses in excess of capital gains earned in a tax year do not reduce current year taxable

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

income, and generally will be carried forward to offset future capital gains.

GAAP/tax difference items that are permanent in nature are reclassified as paid-in capital. The following table provides the amount of reclassifications related to the permanent items for the tax year ended December 31, 2014:

	Year Ended December 31, 2014	
Increase in undistributed net investment income	\$49	
Decrease in accumulated net realized gain	\$(1,549))
Increase in paid-in capital	\$1,500	

Under the Regulated Investment Company Modernization Act of 2010, net capital losses incurred by us during the current year and any future years can be carried forward indefinitely until they are utilized subject to certain loss limitation rules. As of December 31, 2014, we have estimated net short term capital loss carry forwards of approximately \$689.

As of December 31, 2014, the components of tax basis undistributed earnings were as follows:

	As of December 31, 2014	
Undistributed ordinary income	\$1,997	
Undistributed long-term capital gains	—	
Capital loss carry forwards	(689))
Net unrealized depreciation	(8,273))
Other temporary differences	(32))
Accumulated tax basis deficit	\$(6,997))

The unrealized appreciation (depreciation) on our investments in securities for federal income tax purposes as of December 31, 2014 was as follows:

	As of December 31, 2014	
Gross unrealized appreciation	\$182	
Gross unrealized depreciation	(8,455))
Tax basis net unrealized depreciation	\$(8,273))
Tax basis of investments	\$284,643	

The tax character of distributions paid during the year ended December, 31, 2014 was as follows:

	Year Ended December 31, 2014
Ordinary income	\$10,300
Long-term capital gains	\$—
Return of capital	\$—

We identify our major tax jurisdictions as federal and Maryland. During the period in which we were taxable as a C corporation, we were part of American Capital's federal consolidated tax group, including its federal tax fiscal year ending September 30, 2014, which remains subject to examination by the Internal Revenue Service ("IRS").

ACSF Funding is a wholly-owned limited liability company and is treated as a disregarded entity for federal income tax purposes.

AMERICAN CAPITAL SENIOR FLOATING, LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

DECEMBER 31, 2014

(in thousands, except share and per share amounts)

We recognize tax benefits of uncertain tax positions only when the position is more likely than not to be sustained assuming examination by tax authorities. We have analyzed our tax positions and have concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years or expected to be taken in our current year tax returns. We are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months.

Note 9. Consolidated Financial Highlights

	Year Ended December 31, 2014	
Per Share Data ⁽¹⁾ :		
Gross proceeds from IPO	\$15.00	
Net investment income	1.09	
Net realized and unrealized loss on investments	(0.71)
Net increase in net assets resulting from operations	0.38	
Capital contribution ⁽²⁾	0.06	
Accretion ⁽³⁾	0.09	
Offering costs related to public offering	(0.08)
Dividends and distributions to stockholders	(1.03)

Per share data for the year ended December 31, 2014 presumes the issuance of 10 million shares of common stock (1) on January 1, 2014 that were issued in the IPO which closed on January 22, 2014. There was no established public trading market for the stock prior to the pricing of the IPO.

(2) Capital contribution from our Manager for \$574 of federal taxes due on the net built-in gain on investments as a result of tax conversion to a RIC.

(3) The IPO issuance price of \$15.00 per share was below the net asset value at that time. The amount reflects the immediate benefit to common stockholders at the time of the IPO for results of operations in 2013.

Total return is based on the change in market price or net asset value per share during the period and takes into account dividends reinvested in accordance with the dividend reinvestment and stock purchase plan. The IPO price of \$15.00 per share was used as the starting value for the total return for the year ended December 31, 2014.

The ratio of operating expenses to average net assets and the ratio of total expenses to average net assets are shown (5) net of the reimbursement for the expense cap. The ratio of operating expenses to average net assets and the ratio of total expenses to average net assets would be 2.99% and 5.38%, respectively, prior to the expense cap.

The asset coverage ratio for a class of senior securities representing indebtedness is calculated on our consolidated (6) total assets, less all liabilities and indebtedness not represented by senior securities, divided by the senior securities representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the asset coverage per unit.

AMERICAN CAPITAL SENIOR FLOATING, LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
DECEMBER 31, 2014
(in thousands, except share and per share amounts)

The following is a schedule of financial highlights for the period from October 15, 2013 (commencement of operations) to December 31, 2013.

	Period from October 15, 2013 to December 31, 2013	
Total return ⁽¹⁾	101,530	%
Net investment income to average net assets ⁽²⁾	209	%
Expenses to average net assets ⁽²⁾	745	%

(1) Total return is not annualized.

(2) Recurring income and expense items are annualized, one-time expenses such as organizational costs are not annualized.

Note 10. Capital Transactions

The following table details the common share transactions that occurred during the year and period ended December 31, 2014 and 2013:

	Year Ended December 31, 2014		Period from October 15, 2013* to December 31, 2013	
	Shares	Amount	Shares	Amount
Common shares outstanding - beginning of period	100	\$ 1	100	\$ 1
Common shares issued in connection with initial public offering	10,000,000	150,000	—	—
Offering costs	—	(844)	—	—
Contribution for taxes waived	—	574	—	—
Permanent differences reclassified (see Note 8)	—	1,500	—	—
Common shares outstanding - end of period	10,000,100	\$ 151,231	100	\$ 1

* Commencement of operations

Offering costs associated with the IPO totaled \$844 and were recorded as a reduction of the proceeds from the sale of common shares. In connection with the IPO, the underwriters received an underwriting discount and commission (sales load) of \$7,952 that was paid by our Manager.

The table below details the dividends declared on our shares of common stock since the completion of our IPO:

Dividend Declaration Date	Ex-Dividend Date	Record Date	Payment Date	Per Share Amount	Total Amount
March 17, 2014	March 27, 2014	March 31, 2014	April 10, 2014	\$0.18	\$1,800
June 18, 2014	June 26, 2014	June 30, 2014	July 10, 2014	\$0.28	\$2,800
September 17, 2014	September 26, 2014	September 30, 2014	October 10, 2014	\$0.28	\$2,800
December 18, 2014	December 29, 2014	December 31, 2014	January 9, 2015	\$0.29	\$2,900
					\$10,300

Note 11. Commitments and Contingencies

In the ordinary course of business, we may be a party to certain legal proceedings, including actions brought against us and others with respect to investment transactions. The outcomes of any such legal proceedings are uncertain and, as a result of these proceedings, the values of the investments to which they relate could decrease. We were not subject to any material litigation against us as of December 31, 2014 and 2013.

* For the period October 15, 2013 (commencement of operations) to December 31, 2013

Note 13. Subsequent Event

On March 19, 2015, we declared a cash dividend of \$0.29 per share for the first quarter of 2015 that is payable on April 6, 2015 to common stockholders of record as of March 31, 2015, with an ex-dividend date of March 27, 2015.

On March 19, 2015, we announced that our Board of Directors approved a change to the common stock dividend schedule so that distributions will be made monthly rather than quarterly. On March 19, 2015, we declared a cash dividend of \$0.097 per share of common stock for April 2015 that is payable on May 4, 2015 to common stockholders of record as of April 21, 2015, with an ex-dividend date of April 17, 2015.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of December 31, 2014, we, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective and provided reasonable assurance that information required to be disclosed in our periodic SEC filings is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of such possible controls and procedures.

Management's Report on Internal Control over Financial Reporting

This Annual Report on Form 10-K does not include a report of management's assessment regarding internal control over financial reporting due to a transition period established by rules of the SEC for newly registered public companies.

Attestation Report of Registered Public Accounting Firm

This Annual Report on Form 10-K does not include an attestation report of a registered public accounting firm regarding internal control over financial reporting due to a transition period established by rules of the SEC for newly registered public companies.

Changes in Internal Control over Financial Reporting

There have been no changes in our "internal control over financial reporting" (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during our fiscal year ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III.

Item 10. Directors, Executive Officers and Corporate Governance

The information required by Item 10 is hereby incorporated by reference to the information provided in our Proxy Statement for our 2015 Annual Meeting of Stockholders (the "2015 Proxy Statement"), to be filed with the Securities and Exchange Commission within 120 days following the end of our fiscal year, under the headings "PROPOSAL 1: ELECTION OF DIRECTORS", "EXECUTIVE OFFICERS", "SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE" and "CERTAIN TRANSACTIONS WITH RELATED PERSONS."

Item 11. Executive Compensation

The information required by Item 11 is hereby incorporated by reference to the information provided in the 2015 Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days following the end of our fiscal year, under the headings "PROPOSAL 1: ELECTION OF DIRECTORS", "EXECUTIVE COMPENSATION" and "REPORT OF THE COMPENSATION AND GOVERNANCE COMMITTEE."

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by Item 12 is hereby incorporated by reference to the information provided in the 2015 Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days following the end of our fiscal year, under the heading "SECURITY OWNERSHIP OF MANAGEMENT AND CERTAIN BENEFICIAL OWNERS."

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by Item 13 is hereby incorporated by reference to the information provided in the 2015 Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days following the end of our fiscal year, under the headings "CERTAIN TRANSACTIONS WITH RELATED PERSONS" and "PROPOSAL 1: ELECTION OF DIRECTORS."

Item 14. Principal Accounting Fees and Services

The information required by Item 14 is hereby incorporated by reference to the information provided in the 2015 Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days following the end of our fiscal year, under the heading "PROPOSAL 2: RATIFICATION OF APPOINTMENT OF INDEPENDENT PUBLIC ACCOUNTANT."
