Page 6

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 — ACCOUNTING POLICIES

The condensed consolidated financial statements include the accounts of Cincinnati Financial Corporation and its consolidated subsidiaries, each of which is wholly owned. These statements are presented in conformity with accounting principles generally accepted in the United States of America (GAAP). All intercompany balances and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Our actual results could differ from those estimates. Our December 31, 2013, condensed consolidated balance sheet amounts are derived from the audited financial statements but do not include all disclosures required by GAAP.

Our September 30, 2014, condensed consolidated financial statements are unaudited. Certain financial information that is included in annual financial statements prepared in accordance with GAAP is not required for interim reporting and has been condensed or omitted. We believe that we have made all adjustments, consisting only of normal recurring accruals, that are necessary for fair presentation. These condensed consolidated financial statements should be read in conjunction with our consolidated financial statements included in our 2013 Annual Report on Form 10-K. The results of operations for interim periods do not necessarily indicate results to be expected for the full year.

Pending Accounting Updates

ASU 2014-09 Revenue from Contracts with Customers

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers. ASU 2014-09 requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. Insurance contracts do not fall within the scope of this ASU. The effective date of ASU 2014-09 is for annual reporting periods beginning after December 15, 2016. The ASU has not yet been adopted and will not have a material impact on our company's financial position, cash flows or results of operations.

ASU 2014-12, Compensation-Stock Compensation: Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period

In June 2014, the FASB Issued ASU 2014-12, Compensation-Stock Compensation: Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. ASU 2014-12 requires that performance targets that affect vesting and that could be achieved after the requisite service period be treated as performance conditions. The effective date of ASU 2014-12 is for interim and annual reporting periods beginning after December 15, 2015. The ASU has not yet been adopted and will not have a material impact on our company's financial position, cash flows or results of operations.

NOTE 2 – INVESTMENTS

The following table provides cost or amortized cost, gross unrealized gains, gross unrealized losses and fair value for our invested assets:

(In millions)	Cost or amortized cost	Gross unrealized gains	losses	Fair value
At September 30, 2014				
Fixed maturity securities:				
Corporate	\$5,134	\$449	\$13	\$5,570

Subtotal	2,523	1,856	4	4,375
Total	\$11,161	\$2,414	\$79	\$13,496

The net unrealized investment gains in our fixed-maturity portfolio are primarily the result of the continued low interest rate environment that increased the fair value of our fixed-maturity portfolio. The seven largest unrealized investment gains in our common stock portfolio are from Exxon Mobil Corporation (NYSE:XOM), The Procter & Gamble Company (NYSE:PG), Honeywell International Incorporated (NYSE:HON), Chevron Corporation (NYSE:CVX), Johnson & Johnson (NYSE:JNJ), BlackRock Inc. (NYSE:BLK), and RPM International (NYSE:RPM), which had a combined gross unrealized gain of \$579 million. At September 30, 2014, BlackRock Inc. was our largest single common stock holding with a fair value of 3.1 percent of our publicly traded common stock portfolio and 1.0 percent of the total investment portfolio.

The table below provides fair values and gross unrealized losses by investment category and by the duration of the securities' continuous unrealized loss positions:

(In millions)	Less than 12 months		12 months or more		Total	Total

Fixed maturities:					
Gross realized gains	\$6	\$5	\$12	\$10	
Gross realized losses	—	—	(4) —	
Other-than-temporary impairments	—	—	—	(2)
Equity securities:					
Gross realized gains	59	15	93	64	
Gross realized losses	—	—	—	—	
Other-than-temporary impairments	—	—	(1) —	
Other	—	2	1	5	
Total	\$65	\$22	\$101	\$77	
Change in unrealized gains and losses summary:					
Fixed maturities	\$(66) \$(28) \$115	\$(335)
Equity securities	(54) 90	117	509	
Net change in pension actuarial loss and prior service cost	1	2	—	7	
Adjustment to deferred acquisition costs and life policy reserves	4	9	(4) 38	
Other	1	(2) 9	(7)
Income taxes on above	40	(25) (83) (74)
Total	\$(74) \$46	\$154	\$138	

During the three months ended September 30, 2014, there were no equity securities and no fixed-maturity securities other-than-temporarily impaired. During the nine months ended September 30, 2014, there were three equity securities and one fixed-maturity security other-than-temporarily impaired. There were no credit losses on fixed-maturity securities for which a portion of other-than-temporary impairment (OTTI) has been recognized in other comprehensive income for the three and nine months ended September 30, 2014 and 2013. At September 30, 2014, 212 fixed-maturity investments with a total unrealized loss of \$20 million had been in an unrealized loss position for 12 months or more. Of that total, no fixed-maturity investments had fair values below 70 percent of amortized cost. Four equity investments with a total unrealized loss of \$5 million had been in an unrealized loss position for 12 months or more as of September 30, 2014. Of that total, no equity investments were trading below 70 percent of cost.

During 2013, we other-than-temporarily impaired seven fixed-maturity securities. At December 31, 2013, 40 fixed-maturity investments with a total unrealized loss of \$5 million had been in an unrealized loss position for 12 months or more. Of that total, no fixed-maturity investments had fair values below 70 percent of amortized cost. There were no equity investments in an unrealized loss position for 12 months or more as of December 31, 2013.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 10

NOTE 3 – FAIR VALUE MEASUREMENTS

Fair Value Hierarchy

In accordance with accounting guidance for fair value measurements and disclosures, we categorized our financial instruments, based on the priority of the observable and market-based data for the valuation technique used, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices with readily available independent data in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable market inputs (Level 3). When various inputs for measurement fall within different levels of the fair value hierarchy, the lowest observable input that has a significant impact on fair value measurement is used. Our valuation techniques have not changed from those used at December 31, 2013, and ultimately management determines fair value. See our 2013 Annual Report on Form 10-K, Item 8, Note 3, Fair Value Measurements, Page 121, for information on characteristics and valuation techniques used in determining fair value.

Fair Value Disclosures for Assets

The following tables illustrate the fair value hierarchy for those assets measured at fair value on a recurring basis at September 30, 2014, and December 31, 2013. We do not have any material liabilities carried at fair value. There were no transfers between Level 1 and Level 2.

(In millions)

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 11

Each financial instrument that was deemed to have significant unobservable inputs when determining valuation is identified in the following tables by security type with a summary of changes in fair value as of September 30, 2014. Total Level 3 assets continue to be less than 1 percent of financial assets measured at fair value in the condensed consolidated balance sheets. Assets presented in the table below were valued based primarily on broker/dealer quotes for which there is a lack of transparency as to inputs used to develop the valuations. The quantitative detail of these unobservable inputs is neither provided nor reasonably available to us.

The following tables provide the change in Level 3 assets for the three months ended September 30:

(In millions)	Asset fair value measurements using significant unobservable inputs (Level 3)				
	Corporate fixed maturities	Commercial mortgage- backed fixed maturities	States, municipalities and political subdivisions fixed maturities	Nonredeemable preferred equities	Total
Beginning balance, June 30, 2014	\$9	\$—	\$—	\$2	\$11
Total gains or losses (realized/unrealized):					
Included in net income	—	—	—	—	—
Included in other comprehensive income	—	—	—	—	—
Purchases	—	—	—	—	—
Sales	—	—	—	—	—
Transfers into Level 3	19	—	—	—	19
Transfers out of Level 3	—	—	—	—	—
Ending balance, September 30, 2014	\$28	\$—	\$—	\$2	\$30
Beginning balance, June 30, 2013	\$3	\$—	\$1	\$2	\$6
Total gains or losses (realized/unrealized):					
Included in net income	—	—	—	—	—
Included in other comprehensive income	—	—	—	—	—
Purchases	—	—	—	—	—
Sales	—	—	(1)	(1
Transfers into Level 3	—	—	—	—	—
Transfers out of Level 3	—	—	—	—	—
Ending balance, September 30, 2013	\$3	\$—	\$—	\$2	\$5

The following tables provide the change in Level 3 assets for the nine months ended September 30:

(In millions) Asset fair value measurements using significant unobservable inputs (Level 3)

	Corporate fixed maturities	Commercial mortgage- backed fixed maturities	States, municipalities and political subdivisions fixed maturities	Nonredeemable preferred equities	Total
Beginning balance, January 1, 2014	\$2	\$—	\$—	\$2	\$4
Total gains or losses (realized/unrealized):					
Included in net income	—	—	—	—	—
Included in other comprehensive income	—	—	—	—	—
Purchases	—	—	—	—	—
Sales	—	—	—	—	—

Sales	—	—	(1) —	(1
Transfers into Level 3	—	—	—	—	—
Transfers out of Level 3	—	—	—	—	—
Ending balance, September 30, 2013	\$3	\$—	\$—	\$2	\$5

Additional disclosures for the Level 3 category are not material.

Fair Value Disclosures for Assets and Liabilities Not Carried at Fair Value

The disclosures below are presented to provide timely information about the effects of current market conditions on financial instruments that are not reported at fair value in our condensed consolidated financial statements.

This table summarizes the book value and principal amounts of our long-term debt:

(In millions)			Book value		Principal amount	
Interest rate	Year of issue		September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
6.900 %	1998	Senior debentures, due 2028	\$28	\$28	\$28	\$28
6.920 %	2005	Senior debentures, due 2028	391	391	391	391
6.125 %	2004	Senior notes, due 2034	371	371	374	374
		Total	\$790	\$790	\$793	\$793

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 13

The following table shows fair values of our note payable and long-term debt:

(In millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
At September 30, 2014				
Note payable	\$—	\$49	\$—	\$49
6.900% senior debentures, due 2028	—	33	—	33
6.920% senior debentures, due 2028	—	482	—	482
6.125% senior notes, due 2034	—	438	—	438
Total	\$—	\$1,002	\$—	\$1,002
At December 31, 2013				
Note payable	\$—	\$104	\$—	\$104
6.900% senior debentures, due 2028	—	30	—	30
6.920% senior debentures, due 2028	—	458	—	458
6.125% senior notes, due 2034	—	399	—	399
Total	\$—	\$991	\$—	\$991

During the second quarter of 2014, we repaid \$55 million on our revolving short-term line of credit as part of routine cash management.

The following table shows the fair value of our life policy loans, included in other invested assets:

(In millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
At September 30, 2014				
Life policy loans	\$—	\$—	\$39	\$39
At December 31, 2013				
Life policy loans	\$—	\$—	\$45	\$45

Outstanding principal and interest for these life policy loans was \$30 million and \$36 million at September 30, 2014, and December 31, 2013, respectively.

The following table shows fair values of our deferred annuities and structured settlements, included in life policy and investment contract reserves:

(In millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
At September 30, 2014				
Deferred annuities	\$—	\$—	\$904	\$904
Structured settlements	—	220	—	220
Total	\$—	\$220	\$904	\$1,124
At December 31, 2013				
Deferred annuities	\$—	\$—	\$911	\$911
Structured settlements	—	219	—	219

Edgar Filing: CINCINNATI FINANCIAL CORP - Form 10-Q

Total	\$—	\$ 219	\$911	\$1,130
-------	-----	--------	-------	---------

Recorded reserves for the deferred annuities were \$864 million and \$862 million at September 30, 2014, and December 31, 2013, respectively. Recorded reserves for the structured settlements were \$184 million and \$189 million at September 30, 2014, and December 31, 2013, respectively.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 14

NOTE 4 – PROPERTY CASUALTY LOSS AND LOSS EXPENSES

This table summarizes activity for our consolidated property casualty loss and loss expense reserves:

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Gross loss and loss expense reserves, beginning of period	\$4,408	\$4,219	\$4,241	\$4,169
Less reinsurance receivable	282	333	299	356
Net loss and loss expense reserves, beginning of period	4,126	3,886	3,942	3,813
Net incurred loss and loss expenses related to:				
Current accident year	647	631	2,125	1,840
Prior accident years	(25) (38) (120) (140
Total incurred	622	593	2,005	1,700
Net paid loss and loss expenses related to:				
Current accident year	353	329	859	699
Prior accident years	286	233	979	897
Total paid	639	562	1,838	1,596
Net loss and loss expense reserves, end of period	4,109	3,917	4,109	3,917
Plus reinsurance receivable	284	321	284	321
Gross loss and loss expense reserves, end of period	\$4,393	\$4,238	\$4,393	\$4,238

We use actuarial methods, models and judgment to estimate, as of a financial statement date, the property casualty loss and loss expense reserves required to pay for and settle all outstanding insured claims, including incurred but not reported (IBNR) claims, as of that date. The actuarial estimate is subject to review and adjustment by an inter-departmental committee that includes actuarial management that is familiar with relevant company and industry business, claims and underwriting trends, as well as general economic and legal trends that could affect future loss and loss expense payments. The amount we will actually have to pay for claims can be highly uncertain. This uncertainty, together with the size of our reserves, makes the loss and loss expense reserves our most significant estimate. The reserve for loss and loss expenses in the condensed consolidated balance sheets also included \$42 million at September 30, 2014, and \$69 million at September 30, 2013, for certain life and health loss and loss expense reserves.

For the three months ended September 30, 2014, we experienced \$25 million of favorable development on prior accident years, including \$24 million of favorable development in commercial lines, \$5 million of adverse development in personal lines and \$6 million favorable development in excess and surplus lines. This included \$5 million from favorable development of catastrophe losses for the three months ended September 30, 2014, compared with \$9 million of favorable development of catastrophe losses for the three months ended September 30, 2013. We recognized favorable reserve development during the three months ended September 30, 2014, of \$15 million for the workers' compensation line, \$8 million for each the commercial property line and the commercial casualty line and \$12 million of adverse development for the commercial auto line, due to reduced uncertainty of prior accident year loss and loss adjustment expense for these lines.

For the nine months ended September 30, 2014, we experienced \$120 million of favorable development on prior accident years, including \$84 million of favorable development in commercial lines, \$13 million of favorable development in personal lines and \$23 million favorable development in excess and surplus lines. This included \$19 million from favorable development of catastrophe losses for the nine months ended September 30, 2014, compared with \$24 million of favorable development of catastrophe losses for the nine months ended September 30, 2013. We recognized favorable reserve development during the nine months ended September 30, 2014, of \$45 million for the workers' compensation line, \$33 million for the commercial property line, \$25 million for the commercial casualty line and \$24 million of adverse development in the commercial auto line, due to reduced uncertainty of prior accident year loss and loss adjustment expense for these lines.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 15

NOTE 5 – LIFE POLICY AND INVESTMENT CONTRACT RESERVES

We establish the reserves for traditional life insurance policies based on expected expenses, mortality, morbidity, withdrawal rates, timing of claim presentation and investment yields, including a provision for uncertainty. Once these assumptions are established, they generally are maintained throughout the lives of the contracts. We use both our own experience and industry experience, adjusted for historical trends, in arriving at our assumptions for expected mortality, morbidity and withdrawal rates as well as for expected expenses. We base our assumptions for expected investment income on our own experience adjusted for current economic conditions.

We establish reserves for the company's universal life, deferred annuity and structured settlement policies equal to the cumulative account balances, which include premium deposits plus credited interest less charges and withdrawals. Some of our universal life policies contain no-lapse guarantee provisions. For these policies, we establish a reserve in addition to the account balance, based on expected no-lapse guarantee benefits and expected policy assessments.

This table summarizes our life policy and investment contract reserves:

(In millions)	September 30, 2014	December 31, 2013
Ordinary/traditional life	\$863	\$815
Universal life	527	508
Deferred annuities	864	862
Structured settlements	184	189
Other	46	16
Total life policy and investment contract reserves	\$2,484	\$2,390

NOTE 6 – DEFERRED ACQUISITION COSTS

Expenses directly related to successfully acquired insurance policies – primarily commissions, premium taxes and underwriting costs – are deferred and amortized over the terms of the policies. We update our acquisition cost assumptions periodically to reflect actual experience, and we evaluate the costs for recoverability. The table below shows the deferred policy acquisition costs and asset reconciliation.

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Deferred policy acquisition costs asset, beginning of period	\$571	\$546	\$565	\$470
Capitalized deferred policy acquisition costs	208	211	630	612
Amortized deferred policy acquisition costs	(195) (190) (598) (552
Amortized shadow deferred policy acquisition costs	6	9	(7) 46
Deferred policy acquisition costs asset, end of period	\$590	\$576	\$590	\$576

No premium deficiencies were recorded in the condensed consolidated statements of income, as the sum of the anticipated loss and loss adjustment expenses, policyholder dividends and unamortized deferred acquisition expenses did not exceed the related unearned premiums and anticipated investment income.

Change in life deferred acquisition costs, life policy reserves	5	2	3	31	10	21

and other						
Effect on other comprehensive income	237	83	154	212	74	138
Accumulated other comprehensive income, end of period	\$2,538	\$880	\$1,658	\$1,936	\$669	\$1,267

The reclassification adjustment for realized gains on investments available for sale and life deferred acquisition costs, life policy reserves and other is recorded in the line item for total realized investment gains, net, on the condensed consolidated statements of income.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 18

NOTE 8 – REINSURANCE

Reinsurance mitigates the risk of highly uncertain exposures and reduces the maximum net loss that can arise from large risks or risks concentrated in areas of exposure. Management's decisions about the appropriate level of risk retention are affected by various factors, including changes in our underwriting practices, capacity to retain risks and reinsurance market conditions.

Primary components of our property casualty reinsurance program include a property per risk treaty, property excess treaty, casualty per occurrence treaty, casualty excess treaty, property catastrophe treaty and catastrophe bonds.

Our condensed consolidated statements of income include earned consolidated property casualty insurance premiums on assumed and ceded business:

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Direct earned premiums	\$1,067	\$1,002	\$3,134	\$2,895
Assumed earned premiums	3	3	8	8
Ceded earned premiums	(45) (51) (132) (150
Net earned premiums	\$1,025	\$954	\$3,010	\$2,753

Our condensed consolidated statements of income include incurred consolidated property casualty insurance loss and loss expenses on assumed and ceded business:

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Direct incurred loss and loss expenses	\$633	\$597	\$2,026	\$1,725
Assumed incurred loss and loss expenses	1	1	5	8
Ceded incurred loss and loss expenses	(12) (5) (26) (33
Net incurred loss and loss expenses	\$622	\$593	\$2,005	\$1,700

Our life insurance company purchases reinsurance for protection of a portion of the risk that is written. Primary components of our life reinsurance program include individual mortality coverage and aggregate catastrophe and accidental death coverage in excess of certain deductibles.

Our condensed consolidated statements of income include earned life insurance premiums on ceded business:

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Direct earned premiums	\$61	\$52	\$191	\$166
Ceded earned premiums	(15) (14) (44) (42
Net earned premiums	\$46	\$38	\$147	\$124

Our condensed consolidated statements of income include life insurance contract holders' benefits incurred on ceded business:

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013

Edgar Filing: CINCINNATI FINANCIAL CORP - Form 10-Q

Direct contract holders' benefits incurred	\$80	\$64	\$228	\$190
Ceded contract holders' benefits incurred	(16) (15) (52) (49
Net contract holders' benefits incurred	\$64	\$49	\$176	\$141

The ceded benefits incurred can vary depending on the type of life insurance policy held and the year the policy was sold.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 19

NOTE 9 – INCOME TAXES

As of September 30, 2014, and December 31, 2013, we had no liability for unrecognized tax benefits.

The differences between the 35 percent statutory income tax rate and our effective income tax rate were as follows:

(In millions)	Three months ended September 30,						Nine months ended September 30,									
	2014			2013			2014			2013						
Tax at statutory rate	\$91	35.0	%	\$64	35.0	%	\$170	35.0	%	\$191	35.0	%				
Increase (decrease) resulting from:																
Tax-exempt income from municipal bonds	(9)	(3.5)	(8)	(4.4)	(25)	(5.2)	(24)	(4.4)
Dividend received exclusion	(7)	(2.7)	(6)	(3.3)	(21)	(4.3)	(18)	(3.3)
Other	1	0.5		1	0.7		3	0.7		3	0.5					
Provision for income taxes	\$76	29.3	%	\$51	28.0	%	\$127	26.2	%	\$152	27.8	%				

The change in our effective tax rate was primarily due to changes in pretax income from underwriting results and realized investment gains and losses, compared with small changes in the amount of permanent book-tax differences.

NOTE 10 – NET INCOME PER COMMON SHARE

Basic earnings per share are computed based on the weighted average number of common shares outstanding. Diluted earnings per share are computed based on the weighted average number of common and dilutive potential common shares outstanding using the treasury stock method. The table shows calculations for basic and diluted earnings per share:

(In millions except per share data)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Numerator:				
Net income—basic and diluted	\$183	\$131	\$358	\$395
Denominator:				
Basic weighted-average common shares outstanding	163.5	163.7	163.5	163.5
Effect of stock-based awards:				
Stock options	0.9	1.2	0.9	1.1
Nonvested shares	0.6	0.7	0.6	0.7
Adjusted diluted weighted-average shares	165.0	165.6	165.0	165.3
Earnings per share:				
Basic	\$1.12	\$0.80	\$2.19	\$2.42
Diluted	1.11	0.79	2.17	2.39
Number of anti-dilutive share-based awards	0.7	0.3	0.7	0.4

The sources of dilution of our common shares are certain equity-based awards. See our 2013 Annual Report on Form 10-K, Item 8, Note 17, Share-Based Associate Compensation Plans, Page 154, for information about equity-based awards. The above table shows the number of anti-dilutive share-based awards for the three and nine months ended September 30, 2014 and 2013. We did not include these share-based awards in the computation of net income per common share (diluted) because their exercise would have anti-dilutive effects.

NOTE 11 – EMPLOYEE RETIREMENT BENEFITS

The following summarizes the components of net periodic costs for our qualified and supplemental pension plans:

(In millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Service cost	\$3	\$4	\$8	\$10
Interest cost	4	4	11	10
Expected return on plan assets	(5) (5) (13) (13
Amortization of actuarial loss and prior service cost	1	2	2	7
Net periodic benefit cost	\$3	\$5	\$8	\$14

See our 2013 Annual Report on Form 10-K, Item 8, Note 13, Employee Retirement Benefits, Page 148, for information on our retirement benefits. We made matching contributions of \$3 million and \$2 million to our 401(k) and Top Hat savings plans during the third quarter of 2014 and 2013 and contributions of \$9 million and \$7 million for the first nine months of 2014 and 2013, respectively.

We contributed \$5 million to our qualified pension plan during the first quarter of 2014. We do not anticipate further contributions to our qualified pension plan during the remainder of 2014.

NOTE 12 – COMMITMENTS AND CONTINGENT LIABILITIES

In the ordinary course of conducting business, the company and its subsidiaries are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving the company's insurance subsidiaries in which the company is either defending or providing indemnity for third-party claims brought against insureds or litigating first-party coverage claims. The company accounts for such activity through the establishment of unpaid loss and loss adjustment expense reserves. We believe that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses and costs of defense, is immaterial to our consolidated financial condition, results of operations and cash flows.

The company and its subsidiaries also are occasionally involved in other legal and regulatory proceedings, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such proceedings have alleged, for example, breach of an alleged duty to search national databases to ascertain unreported deaths of insureds under life insurance policies. The company's insurance subsidiaries also are occasionally parties to individual actions in which extra-contractual damages, punitive damages or penalties are sought, such as claims alleging bad faith handling of insurance claims or writing unauthorized coverage or claims alleging discrimination by former or current associates.

On a quarterly basis, we review these outstanding matters. Under current accounting guidance, we establish accruals when it is probable that a loss has been incurred and we can reasonably estimate its potential exposure. The company accounts for such probable and estimable losses, if any, through the establishment of legal expense reserves. Based on our quarterly review, we believe that our accruals for probable and estimable losses are reasonable and that the amounts accrued do not have a material effect on our consolidated financial condition or results of operations. However, if any one or more of these matters results in a judgment against us or settlement for an amount that is significantly greater than the amount accrued, the resulting liability could have a material effect on the company's consolidated results of operations or cash flows. Based on our most recent review, our estimate for any other matters for which the risk of loss is not probable, but more than remote, is less than \$1 million.

Page 21

NOTE 13 – SEGMENT INFORMATION

We operate primarily in two industries, property casualty insurance and life insurance. We regularly review our reporting segments to make decisions about allocating resources and assessing performance:

- Commercial lines property casualty insurance
- Personal lines property casualty insurance
- Excess and surplus lines property casualty insurance
- Life insurance
- Investments

We report as Other the noninvestment operations of the parent company and its noninsurer subsidiary, CFC Investment Company. See our 2013 Annual Report on Form 10-K, Item 8, Note 18, Segment Information, Page 156, for a description of revenue, income or loss before income taxes and identifiable assets for each of the five segments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion highlights significant factors influencing the consolidated results of operations and financial position of Cincinnati Financial Corporation. It should be read in conjunction with the consolidated financial statements and related notes included in our 2013 Annual Report on Form 10-K. Unless otherwise noted, the industry data is prepared by A.M. Best Co., a leading insurance industry statistical, analytical and financial strength rating organization. Information from A.M. Best is presented on a statutory basis. When we provide our results on a comparable statutory basis, we label it as such; all other company data is presented in accordance with accounting principles generally accepted in the United States of America (GAAP).

We present per share data on a diluted basis unless otherwise noted, adjusting those amounts for all stock splits and dividends. Dollar amounts are rounded to millions; calculations of percent changes are based on dollar amounts rounded to the nearest million. Certain percentage changes are identified as not meaningful (nm).

SAFE HARBOR STATEMENT

This is our "Safe Harbor" statement under the Private Securities Litigation Reform Act of 1995. Our business is subject to certain risks and uncertainties that may cause actual results to differ materially from those suggested by the forward-looking statements in this report. Some of those risks and uncertainties are discussed in our 2013 Annual Report on Form 10-K, Item 1A, Risk Factors, Page 31.

Factors that could cause or contribute to such differences include, but are not limited to:

- Unusually high levels of catastrophe losses due to risk concentrations, changes in weather patterns, environmental events, terrorism incidents or other causes

- Increased frequency and/or severity of claims or development of claims that are unforeseen at the time of policy issuance

- Inadequate estimates or assumptions used for critical accounting estimates

- Declines in overall stock market values negatively affecting the company's equity portfolio and book value

- Domestic and global events resulting in capital market or credit market uncertainty, followed by prolonged periods of economic instability or recession, that lead to:

- Significant or prolonged decline in the value of a particular security or group of securities and impairment of the asset(s)

- Significant decline in investment income due to reduced or eliminated dividend payouts from a particular security or group of securities

- Significant rise in losses from surety and director and officer policies written for financial institutions or other insured entities

- Prolonged low interest rate environment or other factors that limit the company's ability to generate growth in investment income or interest rate fluctuations that result in declining values of fixed-maturity investments, including declines in accounts in which we hold bank-owned life insurance contract assets

- Recession or other economic conditions resulting in lower demand for insurance products or increased payment delinquencies

- Difficulties with technology or data security breaches, including cyberattacks, that could negatively affect our ability to conduct business and our relationships with agents, policyholders and others

- Disruption of the insurance market caused by technology innovations, such as driverless cars, that could decrease consumer demand for insurance products

- Delays or performance inadequacies from ongoing development and implementation of underwriting and pricing methods, including telematics and other usage-based insurance methods, or technology projects and enhancements expected to increase our pricing accuracy, underwriting profit and competitiveness

- Increased competition that could result in a significant reduction in the company's premium volume

Changing consumer insurance-buying habits and consolidation of independent insurance agencies that could alter our competitive advantages

• Inability to obtain adequate reinsurance on acceptable terms, amount of reinsurance purchased, financial strength of reinsurers and the potential for nonpayment or delay in payment by reinsurers

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 24

Inability to defer policy acquisition costs for any business segment if pricing and loss trends would lead management to conclude that segment could not achieve sustainable profitability

Inability of our subsidiaries to pay dividends consistent with current or past levels

Events or conditions that could weaken or harm the company's relationships with its independent agencies and hamper opportunities to add new agencies, resulting in limitations on the company's opportunities for growth, such as:

Downgrades of the company's financial strength ratings

Concerns that doing business with the company is too difficult

Perceptions that the company's level of service, particularly claims service, is no longer a distinguishing characteristic in the marketplace

Inability or unwillingness to nimbly develop and introduce coverage product updates and innovations that our competitors offer and consumers expect to find in the marketplace

Actions of insurance departments, state attorneys general or other regulatory agencies, including a change to a federal system of regulation from a state-based system, that:

Impose new obligations on us that increase our expenses or change the assumptions underlying our critical accounting estimates

Place the insurance industry under greater regulatory scrutiny or result in new statutes, rules and regulations

Restrict our ability to exit or reduce writings of unprofitable coverages or lines of business

Add assessments for guaranty funds, other insurance related assessments or mandatory reinsurance arrangements; or that impair our ability to recover such assessments through future surcharges or other rate changes

Increase our provision for federal income taxes due to changes in tax law

Increase our other expenses

Limit our ability to set fair, adequate and reasonable rates

Place us at a disadvantage in the marketplace

Restrict our ability to execute our business model, including the way we compensate agents

Adverse outcomes from litigation or administrative proceedings

Events or actions, including unauthorized intentional circumvention of controls, that reduce the company's future ability to maintain effective internal control over financial reporting under the Sarbanes-Oxley Act of 2002

Unforeseen departure of certain executive officers or other key employees due to retirement, health or other causes that could interrupt progress toward important strategic goals or diminish the effectiveness of certain longstanding relationships with insurance agents and others

Events, such as an epidemic, natural catastrophe or terrorism, that could hamper our ability to assemble our workforce at our headquarters location

Further, the company's insurance businesses are subject to the effects of changing social, global, economic and regulatory environments. Public and regulatory initiatives have included efforts to adversely influence and restrict premium rates, restrict the ability to cancel policies, impose underwriting standards and expand overall regulation. The company also is subject to public and regulatory initiatives that can affect the market value for its common stock, such as measures affecting corporate financial reporting and governance. The ultimate changes and eventual effects, if any, of these initiatives are uncertain.

CORPORATE FINANCIAL HIGHLIGHTS

Net Income and Comprehensive Income Data

(In millions except per share data)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Net income and comprehensive income data:						
Earned premiums	\$1,071	\$992	8	\$3,157	\$2,877	10
Investment income, net of expenses (pretax)	138	133	4	409	392	4
Realized investment gains and losses, net (pretax)	65	22	195	101	77	31
Total revenues	1,280	1,152	11	3,683	3,359	10
Net income	183	131	40	358	395	(9)
Comprehensive income	109	177	(38)	512	533	(4)
Net income—diluted	\$1.11	\$0.79	41	\$2.17	\$2.39	(9)
Cash dividends declared	0.44	0.42	5	1.32	1.24	7
Adjusted weighted average shares outstanding	165.0	165.6	0	165.0	165.3	0

Revenues rose for the third quarter and the first nine months of 2014 compared with the same periods of 2013, primarily due to growth in earned premiums. Premium and investment revenue trends are discussed further in the respective sections of Results of Operations.

Realized investment gains and losses are recognized on the sales of investments or as otherwise required by GAAP. We have substantial discretion in the timing of investment sales, and that timing generally is independent of the insurance underwriting process. GAAP also requires us to recognize in net income the gains or losses from certain changes in fair values of securities even though we continue to hold the securities.

Net income for the third quarter of 2014 compared with the third quarter of 2013 increased \$52 million, including an increase in property casualty underwriting income of \$21 million after taxes. Lower catastrophe losses, mostly weather related, accounted for \$27 million of both increases. Third-quarter 2014 after-tax net realized investment gains and losses were \$28 million higher than the same quarter a year ago. After-tax investment income in our investment segment results for the third quarter of 2014 rose \$5 million compared with the same quarter of 2013. Life insurance segment results on a pretax basis were \$4 million lower.

For the first nine months of 2014, net income decreased \$37 million compared with the first nine months of 2013, primarily due to a decrease in property casualty underwriting income of \$57 million after taxes, including \$47 million from higher catastrophe losses. After-tax investment income increased by \$15 million while after-tax net realized investment gains and losses also rose by \$15 million. Life insurance segment results on a pretax basis were \$15 million lower.

Performance by segment is discussed below in Results of Operations. As discussed in our 2013 Annual Report on Form 10-K, Item 7, Factors Influencing Our Future Performance, Page 48, there are several reasons that our performance during 2014 may be below our long-term targets. In that annual report, as part of Results of Operations, we also discussed the full-year 2014 outlook for each reporting segment.

The board of directors is committed to rewarding shareholders directly through cash dividends and through share repurchase authorizations. Through 2013, the company had increased the indicated annual cash dividend rate for 53 consecutive years, a record we believe was matched by only nine other publicly traded companies. In January

2014, the board of directors increased the second-quarter dividend to 44 cents per share, setting the stage for our 54th consecutive year of increasing cash dividends. During the first nine months of 2014, cash dividends declared by the company increased approximately 7 percent compared with the same period of 2013. That increase reflected board actions in both August 2013 and January 2014 that raised the per-share amount of regular dividends. Our board regularly evaluates relevant factors in decisions related to dividends and share repurchases. The 2014 dividend increase reflected our strong earnings performance and signaled management's and the board's positive outlook and confidence in our outstanding capital, liquidity and financial flexibility.

Balance Sheet Data and Performance Measures

(In millions except share data)

	At September 30, 2014	At December 31, 2013	
Balance sheet data:			
Invested assets	\$14,255	\$13,564	
Total assets	18,474	17,662	
Short-term debt	49	104	
Long-term debt	790	790	
Shareholders' equity	6,376	6,070	
Book value per share	39.01	37.21	
Debt-to-total-capital ratio	11.6	% 12.8	%

Total assets at September 30, 2014, increased 5 percent compared with year-end 2013, primarily due to growth in invested assets largely driven by net purchases of securities. Shareholders' equity rose 5 percent, and book value per share also rose 5 percent during the first nine months of 2014. Our debt-to-total-capital ratio (capital is the sum of debt plus shareholders' equity) decreased compared with year-end 2013. The value creation ratio, a non-GAAP measure defined below, was lower for the first nine months of 2014, compared with the 2013 period, primarily due to lower net income before realized gains. The \$1.80 increase in book value per share during the first nine months of 2014 contributed 4.8 percentage points to the value creation ratio, while dividends declared at \$1.32 per share contributed 3.6 points. Value creation ratio trends in total and by major components, along with a reconciliation of the non-GAAP measure to comparable GAAP measures, are shown in the tables below.

	Three months ended September 30,		Nine months ended September 30,		
	2014	2013	2014	2013

PROGRESS TOWARD LONG-TERM VALUE CREATION

Operating through The Cincinnati Insurance Company, Cincinnati Financial Corporation is one of the 25 largest property casualty insurers in the nation, based on 2013 net written premiums for approximately 2,000 U.S. stock and mutual insurer groups. We market our insurance products through a select group of independent insurance agencies in 39 states as discussed in our 2013 Annual Report on Form 10-K, Item 1, Our Business and Our Strategy, Page 5.

We maintain a long-term perspective that guides us in addressing immediate challenges or opportunities while focusing on the major decisions that best position our company for success through all market cycles. We believe that this forward-looking view has consistently benefited our policyholders, agents, shareholders and associates.

To measure our long-term progress in creating shareholder value, we have defined a value creation metric that we believe captures the contribution of our insurance operations, the success of our investment strategy and the importance we place on paying cash dividends to shareholders. This measure, our value creation ratio or VCR, is made up of two primary components: (1) our rate of growth in book value per share plus (2) the ratio of dividends declared per share to beginning book value per share. As discussed in our 2013 Annual Report on Form 10-K, Item 7, Executive Summary, Page 43, for the period 2013 through 2017, an annual value creation ratio averaging 10 percent to 13 percent is our primary performance target. Management believes this non-GAAP measure is a meaningful indicator of our long-term progress in creating shareholder value and is a useful supplement to GAAP information.

Performance Drivers

When looking at our long-term objectives, we see three performance drivers:

Premium growth – We believe our agency relationships and initiatives can lead to a property casualty written premium growth rate over any five-year period that exceeds the industry average. For the first nine months of 2014, our total property casualty net written premiums' year-over-year growth was 6 percent, comparing favorably with the industry's 4 percent growth rate reported by A.M. Best for the first six months of 2014. The industry's growth rate excludes its mortgage and financial guaranty lines of business. Our premium growth initiatives are discussed below in Highlights of Our Strategies and Supporting Initiatives.

•

Combined ratio – We believe our underwriting philosophy and initiatives can generate a GAAP combined ratio over any five-year period that is consistently within the range of 95 percent to 100 percent. For the first nine months of 2014, our GAAP combined ratio was 97.3 percent and our statutory combined ratio was 96.3 percent, both including 7.7 percentage points of current accident year catastrophe losses partially offset by 3.9 percentage points of favorable loss reserve development

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 28

on prior accident years. Our nine-month statutory combined ratio was lower than the 99.1 percent reported for the industry by A.M. Best for the first six months of 2014. The industry's ratio again excludes its mortgage and financial guaranty lines of business.

Investment contribution – We believe our investment philosophy and initiatives can drive investment income growth and lead to a total return on our equity investment portfolio over a five-year period that exceeds the five-year return of the Standard & Poor's 500 Index. For the first nine months of 2014, pretax investment income was \$409 million, up 4 percent compared with the same period in 2013. We believe our investment portfolio mix provides an appropriate balance of income stability and growth with capital appreciation potential.

Highlights of Our Strategy and Supporting Initiatives

Management has worked to identify a strategy that can lead to long-term success, with concurrence by the board of directors. Our strategy is intended to position Cincinnati to compete successfully in the markets we have targeted while appropriately managing risk. Further description of our long-term, proven strategy can be found in our 2013 Annual Report on Form 10-K, Item 1, Our Business and Our Strategy, Page 5. We believe that the successful implementation of the initiatives below will help us: better serve our independent agent customers and their clients; reduce variability in our financial results; grow earnings and book value over the long term; and navigate challenging economic, market or industry pricing cycles.

Improve insurance profitability – Implementation of these initiatives is intended to enhance underwriting expertise and knowledge, thereby increasing our ability to manage our business and gain efficiencies. Better profit margins can arise from additional information and more focused action on underperforming product lines, as well as pricing capabilities we are expanding through the use of technology and analytics. Refining internal processes and developing additional performance metrics can help us be more efficient and effective. These initiatives also support the ability of the independent agencies that represent us to grow profitably by allowing them to serve clients faster and to more efficiently manage agency expenses.

Drive premium growth – Implementation of these initiatives is intended to further penetrate each market we serve through our independent agencies. Strategies aimed at specific market opportunities, along with service enhancements, can help our agencies grow and increase our share of their business. Diversified growth also may reduce variability of losses from weather-related catastrophes.

Below we discuss key initiatives supporting these strategies, along with an assessment of our progress.

Improve Insurance Profitability

The main initiatives to improve our insurance profitability include:

Enhance underwriting expertise and knowledge – We continue efforts to increase our use of information and to develop our skills for improved underwriting performance, such as expanding our pricing capabilities by using predictive analytics. Expanded capabilities include streamlining and optimizing data to improve accuracy, timeliness and ease of use. We also continue to develop additional business data and tools to support more accurate underwriting, including more granular, segmented pricing, by further developing our data warehouse used in our property casualty and life insurance operations.

Ongoing efforts to expand our pricing precision include enhancement of analytics and predictive modeling tools to better align individual insurance policy pricing to risk attributes. Further integration of such tools with policy administration systems is intended to better target profitability and support discussion of pricing impacts with agency personnel as we seek to remain competitive on the most desirable business and rapidly adapt to changes in market conditions.

Rate increases that apply pricing precision features for our personal auto line of business became effective beginning second-quarter 2014 for the majority of states where we market personal lines products and continue to be implemented. On average, the rate increase was in a low-single-digit range, with approximately half of those states experiencing a mid-single-digit increase.

For commercial autos we insure, pricing precision is an ongoing focus through actions such as improving premium rate classification and using other rating variables in risk selection and pricing, plus further automating collection of key rating variables. We are also making progress with development of a by-peril rating plan for homeowner policies and predictive modeling for dwelling fire policies. We plan to introduce by-peril rating for

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 29

our homeowner policies in select states during 2014 and predictive modeling for dwelling fire policies in 2015. By-peril rating will further improve pricing precision by separately pricing for the risk of losses from distinct perils, such as wind versus fire.

Work continues on initiatives to more profitably underwrite property coverages, including more staff specialization, increased insured property inspections to prevent or reduce losses and provide enhanced underwriting knowledge, and greater use of deductibles or other policy terms and conditions as policies renew. During 2014, we plan to complete inspections for approximately 130,000 properties, including both homes and businesses. During the first nine months of 2014, we completed approximately 55 percent of those inspections. We are also taking other actions, such as increasing our use of higher minimum loss deductible amounts for homeowner policies and per-building deductibles for commercial risks, along with more use of wind and hail deductibles in areas subject to severe convective storm activity.

Improve internal processes – Refining internal processes reduces internal costs and allows us to focus more resources on providing agency services. Important improvements include continuing to streamline policy processing between company and agency management systems. This streamlining allows for renewal processing of qualified personal lines or small commercial lines business without intervention by an underwriter or for routing of complex work items to the most appropriate associate for optimal service. Progress during the first nine months of 2014 included deploying this streamlined process for renewals of commercial umbrella, inland marine, crime and professional coverages. In early 2014, it was deployed for renewing personal lines policies. Audits of policies processed without an underwriter continue to indicate that the streamlined process is underwriting and issuing policies as intended.

In 2014, we are also enhancing policy processing by migrating additional types of coverages to our commercial lines policy administration system, e-CLAS[®] CPP. During the first nine months, we began e-CLAS processing for workers' compensation policies in nine more states, for a total of 11 states representing approximately three-fourths of our workers' compensation premium volume. We also migrated our social services and manufacturing target market programs to e-CLAS, making them available in 20 states at September 30, 2014. Work also continues to improve internal processes by enhancing our policy billing or payment options and our workflow tools.

We measure the overall success of our strategy to improve property casualty insurance profitability primarily through our GAAP combined ratio, which we believe can be consistently within the range of 95 percent to 100 percent for any five-year period. We also compare our statutory combined ratio to the industry average to gauge our progress, as discussed in the Performance Drivers section above.

In addition, we expect these initiatives to contribute to our rank as the No. 1 or No. 2 carrier based on premium volume in agencies that have represented us for at least five years. Based on 2013 premiums, we again earned that rank in nearly 75 percent of the agencies that have represented Cincinnati Insurance for more than five years. We are working to increase the percentage of agencies where we achieve that rank.

Drive Premium Growth

Primary initiatives to drive premium growth include:

Expansion of our marketing and service capabilities – We continue to enhance our generalist approach to allow our appointed agencies to better compete in the marketplace by providing services their clients want. Expansion initiatives include ongoing development of targeted marketing programs, adding field marketing representatives for increased agency support in selected areas and piloting our new customer care center for small commercial business policies with select agencies. Progress during the first nine months of 2014 included entering the state of Connecticut for personal lines and expanding our excess and surplus lines field underwriting presence by adding another field marketing representative. We also added two commercial lines field marketing representatives to better support agencies in recently subdivided marketing territories.

New agency appointments – We continue to appoint new agencies to develop additional points of distribution, focusing on areas where our market share is less than 1 percent while also considering economic and catastrophe risk factors. For 2014, we plan to appoint approximately 100 independent agencies. During the first nine months of 2014, we appointed 75 new agencies that write, in aggregate, approximately \$2.0 billion in property casualty premiums

annually with various insurance carriers for an average of approximately \$27 million per agency. As of September 30, 2014, a total of 1,469 agency relationships market our property casualty insurance products from 1,868 reporting locations. During the

first nine months of 2014, our life insurance company also appointed 70 independent life agencies that do not represent our property casualty insurance companies.

We seek to build a close, long-term relationship with each agency we appoint. We carefully evaluate the marketing reach of each new appointment to ensure the territory can support both current and new agencies. Our 132 commercial lines field marketing territories are staffed by marketing representatives averaging approximately 20 years of industry experience and 10 years as a Cincinnati Insurance field marketing representative. Teams of field associates for each territory work together, providing local expertise with support from headquarters associates. This agent-centered business model helps us better understand the accounts we underwrite and creates marketing advantages for our agents. Unique Cincinnati-style service supports our agents as they grow their businesses and attract more clients in their communities. As a result, we generally have earned a 10 percent share of a property casualty agency's business within 10 years of its appointment.

We measure the overall success of our strategy to drive premium growth primarily through changes in net written premiums, as discussed in the Performance Drivers section above. In addition to tracking our progress toward our year-end 2015 consolidated annual direct written premiums target of \$5 billion, we believe we can grow faster than the industry average over any five-year period.

Financial Strength

An important part of our long-term strategy is financial strength, which is described in our 2013 Annual Report on Form 10-K, Item 1, Our Business and Our Strategy, Financial Strength, Page 7. One aspect of our financial strength is prudent use of reinsurance to help manage financial performance variability due to catastrophe loss experience. A description of how we use reinsurance is included in our 2013 Annual Report on Form 10-K, Item 7, Liquidity and Capital Resources, 2014 Reinsurance Programs, Page 107. Another aspect is our investment portfolios, which remain well-diversified as discussed in this quarterly report Item 3, Quantitative and Qualitative Disclosures About Market Risk. We continue to maintain strong parent-company liquidity and financial strength that increase our flexibility to maintain our cash dividend through all periods and to continue to invest in and expand our insurance operations.

At September 30, 2014, we held \$1.809 billion of our cash and invested assets at the parent-company level, of which \$1.523 billion, or 84.2 percent, was invested in common stocks, and \$176 million, or 9.7 percent, was cash or cash equivalents. Our debt-to-total-capital ratio at 11.6 percent remains well below our target limit. Another important indicator of financial strength is our ratio of property casualty net written premiums to statutory surplus, which was 0.9-to-1 for the 12 months ended September 30, 2014, unchanged from year-end 2013.

Our financial strength ratings assigned by independent ratings firms also are important. In addition to rating our parent company's senior debt, four firms award insurer financial strength ratings to one or more of our insurance subsidiary companies based on their quantitative and qualitative analyses. These ratings primarily assess an insurer's ability to meet financial obligations to policyholders and do not necessarily address all of the matters that may be important to investors. Ratings may be subject to revision or withdrawal at any time by the rating agency, and each rating should be evaluated independently of any other rating. Please see each rating agency's website for its most recent report on our ratings.

All of our insurance subsidiaries continue to be highly rated. As of October 27, 2014, our insurer financial strength ratings were:

Insurer Financial Strength Ratings

Rating Agency	Standard Market Property Casualty Insurance Subsidiaries			Life Insurance Subsidiary		Excess and Surplus Lines Insurance Subsidiary			Date of Most Recent Affirmation or Action	
			Rating Tier			Rating Tier		Rating Tier		
A.M. Best Co. ambest.com	A+	Superior	2 of 16	A	Excellent	3 of 16	A	Excellent	3 of 16	Stable outlook (12/19/13)
Fitch Ratings fitchratings.com	A+	Strong	5 of 21	A+	Strong	5 of 21	-	-	-	Stable outlook (06/10/14)
Moody's Investors Service moody's.com	A1	Good	5 of 21	-	-	-	-	-	-	Stable outlook (04/30/13)
Standard & Poor's Ratings Services spratings.com	A	Strong	6 of 21	A	Strong	6 of 21	-	-	-	Positive outlook (06/18/14)

On June 10, 2014, Fitch Ratings affirmed the ratings that it had assigned to us in August 2009, continuing its stable outlook. Fitch said our ratings strengths include very strong capitalization, our holding company's sizeable position in cash and marketable securities and our moderate financial leverage ratio. Fitch noted our reserve adequacy and benefits from our implementation of claims and risk management tools in addition to pricing actions. Fitch said its rating could be unfavorably affected by a combined ratio exceeding 105 percent on a sustained basis, evidence of deteriorating profitability on recent growth or by material and sustained deterioration in capitalization.

On June 18, 2014, Standard & Poor's Ratings Services affirmed the ratings that it had assigned in July 2010, revising its outlook to positive from stable. S&P said its rating reflected our strong competitive position, favorable geographical footprint and extremely strong capital. With the positive outlook, it acknowledged our general underwriting improvement in recent years and our track record of mitigating potential capital and earnings volatility. S&P noted its rating could come under pressure if our overall operating performance or capital adequacy deteriorated significantly or upon perceived adverse changes to our competitive position.

RESULTS OF OPERATIONS

Consolidated results reflect the operating results of each of our five segments along with the parent company and other activities reported as "Other." The five segments are:

- Commercial lines property casualty insurance
- Personal lines property casualty insurance
- Excess and surplus lines property casualty insurance
- Life insurance
- Investments

We report as Other the noninvestment operations of the parent company and its noninsurer subsidiary, CFC Investment Company. See Item 1, Note 13, Segment Information, for discussion of the calculations of segment data. Results of operations for each of the five segments are discussed below.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 32

CONSOLIDATED PROPERTY CASUALTY INSURANCE RESULTS OF OPERATIONS

Consolidated property casualty insurance results include premiums and expenses for our standard market insurance (commercial lines and personal lines segments) as well as our excess and surplus lines operations.

Our consolidated property casualty insurance operations generated underwriting profit of \$94 million and \$86 million for the three and nine months ended September 30, 2014. The year-over-year improvement of \$33 million for the third-quarter 2014 period largely reflected a decrease of \$42 million in losses from weather-related natural catastrophes. The year-over-year decrease of \$87 million for the first nine months of 2014 largely reflected increases in losses of \$73 million from weather-related natural catastrophes. Weather-related losses not identified as part of designated catastrophe events for the property casualty industry, typically referred to as noncatastrophe weather

losses, contributed \$51 million more to the nine-month 2014 decrease in underwriting profit, compared with the same period of 2013. The unfavorable effects of higher weather-related losses in aggregate for the first nine months of 2014 offset the benefits of higher pricing and our ongoing initiatives to improve pricing precision and loss experience related to claims and loss control practices.

We measure and analyze property casualty underwriting results primarily by the combined ratio and its component ratios. The GAAP-basis combined ratio is the percentage of incurred losses plus all expenses per each earned premium dollar – the lower the ratio, the better the performance. An underwriting profit results when the combined ratio is below 100 percent. A combined ratio above 100 percent indicates that an insurance company's losses and expenses exceeded premiums.

Our consolidated property casualty combined ratio for the third quarter of 2014 improved 2.7 percentage points compared with the third quarter of 2013; and for the first nine months of 2014 it was 3.5 points higher compared with the same period of 2013. The ratio for catastrophe losses and loss expenses was 4.5 percentage points lower

Cincinnati Financial Corporation Third-Quarter 2014 10-Q
Page 33

for the 2014 third quarter period, driving the improvement. For the first nine months of 2014, compared with the same period of 2013, the ratio for catastrophe losses and loss expenses was 2.0 points higher. Noncatastrophe weather-related losses were 1.4 points higher for the nine-month 2014 period, further contributing to the higher 2014 nine-month combined ratio.

The combined ratio can be affected significantly by natural catastrophe losses and other large losses as discussed in detail below. The combined ratio can also be affected by updated estimates of loss and loss expense reserves established for claims that occurred in prior periods, referred to as prior accident years. Net favorable development on prior accident year reserves, including reserves for catastrophe losses, lowered the combined ratio by 3.9 percentage points in the first nine months of 2014, compared with 5.1 percentage points in the same period of 2013. Net favorable development is discussed in further detail in Results of Operations by property casualty insurance segment.

The ratio for current accident year loss and loss expenses before catastrophe losses rose in the first nine months of 2014. The 62.8 percent ratio for the first nine months of 2014 increased 2.0 percentage points compared with the 60.8 percent accident year 2013 ratio measured as of September 30, 2013. The effects of higher 2014 noncatastrophe weather-related losses and large losses of \$1 million or more per claim, discussed below, offset the effects of overall higher pricing, net of normal loss cost inflation.

The underwriting expense ratio decreased for the third quarter and first nine months of 2014, compared with the same periods of 2013, primarily due to higher earned premiums and ongoing expense management efforts.

Consolidated Property Casualty Insurance Premiums

(In millions)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Agency renewal written premiums	\$958	\$915	5	\$2,888	\$2,639	9
Agency new business written premiums	125	141	(11)	381	415	(8)
Other written premiums	(46)	(25)	(84)	(113)	(69)	(64)
Net written premiums	1,037	1,031	1	3,156	2,985	6
Unearned premium change	(12)	(77)	84	(146)	(232)	37
Earned premiums	\$1,025	\$954	7	\$3,010	\$2,753	9

The trends in net written premiums and earned premiums summarized in the table above largely reflect the effects of our premium growth strategies and better pricing.

Consolidated property casualty net written premiums for the three and nine months ended September 30, 2014, grew \$6 million and \$171 million compared with the same periods of 2013. Third-quarter net written premiums were down 2 percent for our largest property casualty insurance segment, commercial lines, for reasons discussed in Results of Operations for that segment. Net written premiums for our personal lines segment grew 6 percent during the third quarter of 2014, while they grew 15 percent for our excess and surplus lines segment. Our premium growth initiatives from prior years provided an ongoing favorable effect on growth during 2014, particularly as newer agency relationships mature over time. We discuss current initiatives in the Highlights of Our Strategy and Supporting Initiatives section of this quarterly report. The main drivers of trends for 2014 are discussed in more detail by segment below in Results of Operations.

Consolidated property casualty agency new business written premiums for the three and nine months ended September 30, 2014, decreased \$16 million and \$34 million compared with the same periods of 2013. New business written premiums were lower than the year-ago periods for our commercial lines and personal lines insurance

segments and higher for our excess and surplus lines insurance segment. New agency appointments during 2013 and 2014 produced a \$15 million increase in standard lines new business for the first nine months of 2014 compared with the same period in 2013. As we appoint new agencies that choose to move accounts to us, we report these accounts as new business. While this business is new to us, in many cases it is not new to the agent. We believe these seasoned accounts tend to be priced more accurately than business that may be less familiar to our agent upon obtaining it from a competing agent.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 34

Other written premiums include premiums ceded to our reinsurers as part of our reinsurance program. A decrease in ceded premiums contributed \$5 million and \$15 million to net written premium growth for the three and nine months ended September 30, 2014, compared with the same periods of 2013. Other written premiums also included a less favorable adjustment for the third quarter and first nine months of 2014, compared with the same period last year, for estimated direct written premiums of policies in effect but not yet processed in our commercial lines insurance segment. These written premium adjustments have an immaterial effect on earned premiums.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 35

Catastrophe losses and loss expenses typically have a material effect on property casualty results and can vary significantly from period to period. Losses from natural catastrophes contributed 1.2 and 7.1 percentage points to the combined ratio in the third quarter and first nine months of 2014, compared with 5.7 and 5.1 percentage points in the same periods of 2013. Some of those losses were applicable to loss deductible provisions of our collateralized reinsurance funded through catastrophe bonds. For our collateralized reinsurance arrangement effective January 18, 2014, aggregate losses applicable through September 30, 2014, were \$16 million for the specific geographic locations included in the severe convective storm portion of that coverage. If aggregate losses after deductibles exceed \$160 million during an annual coverage period, we can recover the excess through funds that collateralize the catastrophe bonds. The following table shows catastrophe losses and loss expenses incurred, net of reinsurance, as well as the effect of loss development on prior period catastrophe events. We individually list declared catastrophe events for which our incurred losses reached or exceeded \$10 million.

Total large losses incurred	52	56	(7)	165	178	(7)
Losses incurred but not reported	17	22	(23)	22	72	(69)
Other losses excluding catastrophe losses	432	362	19	1,295	1,054	23
Catastrophe losses	11	53	(79)	208	137	52
Total losses incurred	\$512	\$493	4	\$1,690	\$1,441	17
Ratios as a percent of earned premiums:						
	Pt. Change			Pt. Change		
Current accident year losses greater than \$5,000,000	0.7	% 0.6	% 0.1	0.6	% 0.6	% 0.0
Current accident year losses \$1,000,000-\$5,000,000	4.8	5.0	(0.2)	4.2	4.0	0.2
Large loss prior accident year reserve development	(0.5)	0.2	(0.7)	0.7	1.8	(1.1)
Total large loss ratio	5.0	5.8	(0.8)	5.5	6.4	(0.9)
Losses incurred but not reported	1.7	2.2	(0.5)	0.8	2.6	(1.8)
Other losses excluding catastrophe losses	42.3	38.2	4.1	43.0	38.3	4.7
Catastrophe losses	1.0	5.5	(4.5)	6.9	5.0	1.9
Total loss ratio	50.0	% 51.7	% (1.7)	56.2	% 52.3	% 3.9

We believe the inherent variability of aggregate loss experience for our portfolio of larger policies is greater than that of our portfolio of smaller policies, and we continue to monitor the variability in addition to general inflationary trends in loss costs. Our analysis continues to indicate no unexpected concentration of large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. The third-quarter 2014 property casualty total large losses incurred of \$52 million, net of reinsurance, were lower than the \$59 million quarterly average during 2013 and were also lower than the \$56 million for the third quarter of 2013. The ratio for these large losses and case reserve increases was 0.8 percentage points lower compared with last year's third quarter. The third-quarter 2014 amount of total large losses incurred helped contribute to the decrease in the nine-month 2014 total large loss ratio, compared with 2013, in addition to a six-month 2014 ratio that was 0.9 points lower than the first half of 2013. We believe results for the three-month and nine-month periods largely reflected normal fluctuations in loss patterns and normal variability in large case reserves for claims above \$1 million. Losses by size are discussed in

further detail in results of operations by property casualty insurance segment.

Overview

Performance highlights for the commercial lines segment include:

Premiums – Earned premiums for the commercial lines segment rose during the third quarter and first nine months of 2014 primarily due to renewal premium growth that continued to reflect higher pricing. Commercial lines net written premiums decreased during the third quarter but increased during the first nine months of 2014. Lower new business and other written premiums drove the third-quarter decrease. For the nine-month 2014 period, these factors were offset by higher renewal written premiums. The premiums table below analyzes the primary components of earned premiums. We continue to use predictive analytics tools to improve pricing precision and segmentation while also leveraging our local relationships with agents through the efforts of our teams that work closely with them. We seek to maintain appropriate pricing discipline for both new and renewal business as our agents and underwriters assess account quality to make careful decisions on a case-by-case basis whether to write or renew a policy.

Agency renewal written premiums rose 3 percent and 9 percent for the three and nine months ended September 30, 2014, reflecting higher pricing and improving economic conditions. We measure average changes in commercial lines renewal pricing as the rate of change in renewal premium for the new policy period compared with the premium for the expiring policy period, assuming no change in the level of insured exposures or policy coverage between those periods for respective policies. During the third quarter of 2014, our overall standard commercial lines policies averaged estimated renewal price increases near the high end of a low-single-digit range, somewhat higher than the second quarter of 2014. In 2014, we have been further segmenting commercial lines policies, emphasizing identification and retention of policies we believe have relatively stronger pricing. Conversely, we have been seeking more aggressive renewal terms and conditions on policies we believe have relatively weaker pricing, in turn retaining fewer of those policies. As a result, the average change in commercial lines renewal pricing was somewhat lower.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 38

Our average overall commercial lines renewal pricing change includes the flat pricing effect of certain coverages within package policies written for a three-year term that were in force but did not expire during the period being measured. Therefore, the average commercial lines renewal pricing change we report reflects this blend of three-year policies that did not expire and other policies that did expire during the measurement period. For only those commercial lines policies that did expire and were then renewed during the third quarter of 2014, we estimate that the average price increase was again in a mid-single-digit range, with smaller commercial property policies again experiencing average renewal price percentage increases near the upper end of the high-single-digit range.

Renewal premiums for our commercial casualty and workers' compensation lines include the results of policy audits that adjust initial premium amounts based on differences between estimated and actual sales or payroll related to a specific policy. Net written premiums from audits during the third quarter and first nine months of 2014 netted \$14 million and \$43 million, respectively. Audits contributed \$8 million of the \$98 million net increase in net written premiums for the first nine months of 2014, compared with the same period a year ago. The \$170 million increase in earned premiums during the first nine months of 2014, compared with 2013, included an increase from audit premiums of \$6 million.

New business written premiums for commercial lines decreased \$13 million and \$25 million during the third quarter and first nine months of 2014, compared with the same periods last year. Third-quarter 2013 new business written premiums of \$102 million were an all-time high for any quarter for our commercial lines segment. Our workers' compensation line of business decreased by \$6 million for the three-month period and by \$15 million for the nine-month period, accounting for much of the total commercial lines decrease.

Other written premiums – which primarily include premiums ceded to our reinsurers as part of our reinsurance program – had ceded commercial lines premiums for the third quarter and first nine months of 2014 that reduced net written premiums by \$4 million and \$14 million less than the respective periods of 2013. Other written premiums included a less favorable adjustment for the third quarter and first nine months of 2014, compared with the same periods last year, for estimated direct written premiums of policies in effect but not yet processed. The adjustment had an immaterial effect on earned premiums.

Commercial Lines Insurance Premiums

(In millions)	Three months ended September 30,			Nine months ended September 30,

Earned premiums	\$720	\$680	6	\$2,126	\$1,956	9

Combined ratio – The commercial lines combined ratio for the third quarter of 2014 improved 3.0 percentage points compared with the third quarter of 2013, and for the first nine months of 2014 it was 2.4 points higher, compared with the same period of 2013. The ratio for catastrophe losses and loss expenses was 4.4 percentage points lower for the 2014 third quarter period, driving the improvement. For the first nine months of 2014, compared with the same period of 2013, the ratio for catastrophe losses and loss expenses was 1.6 points higher. The nine-month 2014 combined ratio also reflected an increase of 1.4 percentage points for noncatastrophe weather-related losses and a less favorable reserve development on prior accident years.

Catastrophe losses and loss expenses accounted for 1.0 and 6.0 percentage points of the combined ratio for the three and nine months ended September 30, 2014, compared with 5.4 and 4.4 percentage points for the same periods last year. The 10-year annual average catastrophe loss impact through 2013 for the commercial lines segment is 4.4 percentage points, and the five-year annual average is 5.7 percentage points. The third-quarter and nine-month

2014 ratios for noncatastrophe weather-related losses at 3.8 percent and 4.1 percent were 0.8 and 1.4 percentage points higher than the same periods a year ago.

The net effect of reserve development on prior accident years during the third quarter and first nine months of 2014 was favorable for commercial lines overall by \$24 million and \$84 million compared with \$13 million and \$91 million for the same periods in 2013. For the nine months ended September 30, 2014, approximately half of the total commercial lines net favorable reserve development on prior accident years came from the workers'

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 39

compensation line of business and approximately 30 percent came from commercial casualty. The remaining commercial lines of business, in aggregate, represented the remainder of the net favorable reserve development. The nine-month 2014 net favorable reserve development for our commercial casualty line of business was significantly less than the year-ago period, in part due to unfavorable development for umbrella coverages that had higher than anticipated loss emergence on known claims. The net favorable reserve development recognized during the first nine months of 2014 for commercial lines included approximately 45 percent for accident year 2013 and approximately 24 percent for accident year 2012, and was primarily due to lower than anticipated loss emergence on known claims. Reserve estimates are inherently uncertain as described in our 2013 Annual Report on Form 10-K, Item 7, Critical Accounting Estimates, Property Casualty Insurance Loss and Loss Expense Reserves, Page 49.

The commercial lines underwriting expense ratio decreased for the third quarter and first nine months of 2014, compared with the same periods of 2013, primarily due to higher earned premiums and ongoing expense management efforts.

Underwriting results and related measures for the combined ratio are summarized in the first table of Commercial Lines Insurance Results of Operations. The tables and discussion below provide additional details for certain primary drivers of underwriting results.

Commercial Lines Insurance Losses by Size

------------------	------	---	------	---	------	---	------	---	------	---	-----

We continue to monitor new losses and case reserve increases greater than \$1 million for trends in factors such as initial reserve levels, loss cost inflation and claim settlement expenses. Our analysis continues to indicate no unexpected concentration of these large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. The third-quarter 2014 commercial lines total large losses incurred of \$45 million, net of reinsurance, were lower than the \$48 million quarterly average during 2013. They were higher than the \$44 million total large losses incurred for the third quarter of 2013. The ratio for these large losses and case reserve increases was 0.4 percentage points lower compared with last year's third quarter. The third-quarter 2014 amount of total large losses incurred helped contribute to the decrease in the nine-month 2014 total large loss ratio, compared with 2013, in addition to a six-month 2014 ratio that was 0.8 points lower than the

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 40

first six months of 2013. We believe results for the three-month and nine-month periods largely reflected normal fluctuations in loss patterns and normal variability in large case reserves for claims above \$1 million.

Commercial Lines of Business Analysis

Approximately 95 percent of our commercial lines premiums relate to accounts with coverages from more than one of our business lines. As a result, we believe that our commercial lines business is best measured and evaluated on a segment basis. However, we provide line of business data to summarize premium and loss trends separately for each line. The ratios shown in the table below are components of loss and loss expenses as a percentage of earned premiums.

As discussed above, the loss and loss expenses ratio component of the combined ratio is an important measure of underwriting profit and performance. Catastrophe losses are volatile and can distort short-term profitability trends, particularly for certain lines of business. Development of loss and loss expense reserves on prior accident years can also distort trends in measures of profitability for recently written business. To illustrate these effects, we separate their impact on the ratios shown in the table above. For the three and nine months ended September 30, 2014, the commercial lines of business with the most significant profitability challenge were commercial auto and specialty packages. We discuss current initiatives for commercial auto in the Highlights of Our Strategy and Supporting Initiatives section of this quarterly report and in our 2013 Annual Report on Form 10-K, Item 7, Commercial Lines of Business Analysis, Page 70. For the first nine months of 2014, our commercial auto policies experienced average renewal price percentage increases toward the high end of the mid-single-digit range, slightly higher than the average price increase for year 2013. We are also further automating collection of key rating variables used for risk selection and pricing precision and expect to complete a significant phase of that automation by the end of 2014. On 10-K Page 72, we noted that specialty package results were expected to improve over time due to efforts to improve pricing precision, in addition to various initiatives related to the property coverage portion of this line of business. Those underwriting actions and the introduction of CinciPak™ – a newer program designed to replace many of our specialty packages – are largely responsible for a 40 percent decrease in specialty packages net written premiums for the first nine months of 2014, compared with the same period of 2013, despite the effects of higher average renewal prices on retained policies. Premiums for CinciPak are included in our commercial casualty or commercial property lines of business.

Overview

Performance highlights for the personal lines segment include:

Premiums – Personal lines earned premiums and net written premiums for the third quarter and first nine months of 2014 continued to grow primarily due to higher renewal premiums. The premiums table below analyzes the primary components of earned premiums.

Agency renewal written premiums increased 8 percent for the third quarter and 10 percent for the first nine months of 2014 because of rate increases in recent years, ongoing high levels of policy retention, premium growth initiatives and a higher level of insured exposures. In October 2013, we began our fifth round of increases for the homeowner line of business, averaging approximately 10 percent, with some individual policy rate increases lower or higher based on each insured exposure's specific risk characteristics. Homeowner rate changes for several recent years represented an average annual rate increase in the high-single-digit range.

Beginning in the second quarter of 2014, we implemented rate changes for our personal auto line of business in the majority of the 30 states where we market personal lines policies. The average personal auto rate change is an increase in the low-single-digit range, with approximately half of those states experiencing a mid-single-digit increase. Some individual policies experienced lower or higher rate changes based on enhanced pricing precision enabled by predictive models. Rate changes for personal auto beginning in late 2010 also represented an average annual rate increase in the low-single-digit range.

Personal lines new business written premiums were lower during the first nine months of 2014, compared with the same period of 2013. This trend began in the third quarter of 2013 and was expected due to our higher premium rates and underwriting actions such as expanded use of actual cash value loss settlement for older roofs. For the majority of states where we market personal lines policies, those underwriting actions were effective beginning April 1, 2013.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 43

Other written premiums – which primarily include premiums ceded to our reinsurers as part of our reinsurance program – had a minimal effect on net written premium growth in the third quarter and first nine months of 2014 as the total amounts were roughly similar to the same periods of 2013.

We continue to implement strategies discussed in our 2013 Annual Report on Form 10-K, Item 1, Strategic Initiatives, Page 12, to enhance our responsiveness to marketplace changes and to help achieve our long-term objectives for personal lines growth and profitability. These strategies include several initiatives to more profitably underwrite property coverages.

Personal Lines Insurance Premiums

(In millions)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change

Agency new business written premiums	23	28	(18)	68	86	(21)
Other written premiums	(7)	(8)	13	(21)	(24)	13
Net written premiums	294	278	6	819	766	7
Unearned premium change	(31)	(34)	9	(44)	(54)	19
Earned premiums	\$263	\$244	8	\$775	\$712	9

Combined ratio – The personal lines combined ratio rose for the three and nine months ended September 30, 2014, compared with the same periods of 2013. The ratio for catastrophe losses and loss expenses improved by 5.0 percentage points for the 2014 third quarter, and was offset by unfavorable reserve development on prior accident years. The unfavorable reserve development was primarily for accident years 2012 and 2013, driven by losses on umbrella coverages in our other personal line of business. For the first nine months of 2014, compared with the same period of 2013, the ratio for catastrophe losses and loss expenses was 3.3 points higher. The nine-month 2014 combined ratio also reflected an increase of 1.6 percentage points for noncatastrophe weather-related losses - helping to increase the ratio for current accident year loss and loss expenses before catastrophes - and a lower amount of benefit from favorable reserve development on prior accident years.

Catastrophe losses and loss expenses accounted for 2.0 and 11.0 percentage points of the combined ratio for the three and nine months ended September 30, 2014, compared with 7.0 and 7.7 percentage points for the same periods last year. The 10-year annual average catastrophe loss ratio through 2013 for the personal lines segment was 11.3 percentage points, and the five-year annual average was 13.9 percentage points. The third-quarter 2014 ratio for noncatastrophe weather-related losses at 6.4 percent was 0.9 percentage points lower than the third quarter of 2013, while the nine-month 2014 ratio at 8.0 percent was 1.6 percentage points higher than the same period a year ago. In addition to the rate increases discussed above, we continue to refine our pricing to better match premiums to the risk of loss on individual policies. The results of improved pricing per risk and broad-based rate increases are expected to help position the combined ratio at a profitable level over the long term. In addition, greater geographic diversification is expected over time to reduce the volatility of homeowner loss ratios attributable to weather-related catastrophe losses.

Personal lines net reserve development on prior accident years was unfavorable during the third quarter and was favorable for the first nine months of 2014. Net favorable reserve development was \$30 million lower for the first nine months of 2014 compared with the same period of 2013. Of that reduction, \$21 million was for our other personal line of business, mostly for umbrella coverages, and nearly all for accident years 2012 and 2013 in aggregate. More than 90 percent of the \$13 million net favorable reserve development on prior accident years recognized during the first nine months of 2014 occurred in the homeowner line of business, reflecting lower than anticipated loss emergence on known claims. Approximately 85 percent of the personal lines net favorable reserve development recognized during the first nine months of 2014 was for accident year 2013. Reserve estimates are inherently uncertain as described in

our 2013 Annual Report on Form 10-K, Item 7, Critical Accounting Estimates, Property Casualty Insurance Loss and Loss Expense Reserves, Page 49.

The underwriting expense ratio decreased for the third quarter and first nine months of 2014 compared with the same periods of 2013, primarily due to lower commissions, higher earned premiums and ongoing expense management efforts.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 44

Personal Lines Insurance Losses by Size

Total loss ratio	60.4	% 54.0	% 6.4	68.2	% 56.0	% 12.2

We continue to monitor new losses and case reserve increases greater than \$1 million for trends in factors such as initial reserve levels, loss cost inflation and claim settlement expenses. Our analysis continues to indicate no unexpected concentration of these large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. In the third quarter of 2014, the personal lines total ratio for these losses and case reserve increases, net of reinsurance, was 1.5 percentage points lower compared with last year's third quarter. The third-quarter 2014 amount of total large losses incurred helped contribute to the decrease in the nine-month 2014 total large loss ratio, compared with 2013, in addition to a six-month 2014 ratio that was 1.0 points lower than the first half of 2013. We believe results for the three-month and nine-month periods largely reflected normal fluctuations in loss patterns and normal variability in large case reserves for claims above \$1 million.

Personal Lines of Business Analysis

We prefer to write personal lines coverages on an account basis to include both auto and homeowner coverages as well as coverages from the other personal business line. As a result, we believe that our personal lines business is best measured and evaluated on a segment basis. However, we provide line of business data to summarize premium and loss trends separately for each line. The ratios shown in the table below are components of loss and loss expenses as a percentage of earned premiums.

(In millions)	Three months ended September 30, 2014			Nine months ended September 30, 2014		
	2014	2013	% Change	2014	2013	% Change

Total loss and loss expenses ratio	76.6	% 20.4	%	58.4	% 37.8	%

As discussed above, the loss and loss expenses ratio component of the combined ratio is an important measure of underwriting profit and performance. Catastrophe losses are volatile and can distort short-term profitability trends, particularly for certain lines of business. Development of loss and loss expense reserves on prior accident years can also distort trends in measures of profitability for recently written business. To illustrate these effects, we separate their impact on the ratios shown in the table above. For the three and nine months ended September 30, 2014, the personal line of business with the most significant profitability challenge was personal auto. Rate increases that apply pricing precision features for our personal auto policies continue to be implemented, and were effective beginning second-quarter 2014 for the majority of states where we market personal lines products. On average, the rate increase was in a low-single-digit range, with approximately half of those states experiencing a mid-single-digit increase. As

discussed in Personal Lines Insurance Results of Operations, Overview, we continue actions to improve pricing per risk and overall rates, which are expected to improve future profitability.

Overview

Performance highlights for the excess and surplus lines segment include:

Premiums – Excess and surplus lines earned premiums and net written premiums continued to grow during the third quarter and first nine months of 2014. Both renewal and new business written premiums contributed significantly to overall premium growth.

Renewal written premiums rose 16 percent and 19 percent for the three and nine months ended September 30, 2014, compared with the same periods of 2013, reflecting the opportunity to renew many accounts for the first time, as well as higher renewal pricing. We experienced estimated average renewal pricing increases estimated for our excess and surplus lines policies in a mid-single-digit range in the third quarter of 2014. That range is similar to the second quarter but below the level of the first quarter of 2014 and the average for the year 2013. September 2014 was the 49th consecutive month of positive average price changes for this segment of our property casualty business. We measure average changes in excess and surplus lines renewal pricing as the rate of change in renewal premium for the new policy period compared with the premium for the expiring policy period, assuming no change in the level of insured exposures or policy coverage between those periods for respective policies.

New business written premiums produced by agencies again rose for the third quarter and first nine months of 2014, compared with the same periods of 2013. The increase reflects strong agency relationships and high-quality service provided by excess and surplus lines field marketing representatives, including the addition of six representatives since March 31, 2013. That addition represents a 60 percent increase in the number of representatives for that period. Some of what we report as new business came from accounts that were not new to our agents. We believe our agents' seasoned accounts tend to be priced more accurately than business that may be less familiar to them.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Other written premiums	(3) (2) (50) (8) (6) (33
Net written premiums	39	34	15	114	94	21
Unearned premium change	3	(4) nm	(5) (9) 44
Earned premiums	\$42	\$30	40	\$109	\$85	28

Combined ratio – The excess and surplus lines combined ratio improved for the third quarter and first nine months of 2014 by 16.5 and 14.3 percentage points compared with the same periods of 2013. The third-quarter 2014 improvement is primarily due to a lower ratio for current accident year losses and loss expenses, while the nine-month improvement is primarily due to larger amounts of favorable reserve development on prior accident years.

Catastrophe losses and loss expenses accounted for negative 0.6 and positive 1.6 percentage points of the combined ratio for the three and nine months ended September 30, 2014, compared with positive 2.5 and 1.7 percentage points for the same periods of 2013. Noncatastrophe weather-related losses contributed 0.9 percentage points to the third-quarter 2014 combined ratio and 1.4 percentage points to the nine-month 2014 ratio, compared with contributions of 2.6 and 1.6 percentage points for the same periods a year ago.

Excess and surplus lines net favorable reserve development on prior accident years as a ratio to earned premiums was 20.6 percentage points for the first nine months of 2014, compared with 7.8 percentage points for the same period of 2013. Favorable reserve development recognized in the first nine months of 2014 for excess and surplus lines included approximately 68 percent for accident years 2013 and 2012 in aggregate, and related primarily to lower than anticipated loss emergence on known claims. Reserve estimates are inherently uncertain as described in our 2013 Annual Report on Form 10-K, Item 7, Critical Accounting Estimates, Property Casualty Insurance Loss and Loss Expense Reserves, Page 49.

The underwriting expense ratio for the third quarter and first nine months of 2014 decreased compared with the same periods of 2013, primarily due to higher earned premiums and ongoing expense management efforts.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 48

Excess and Surplus Lines Insurance Losses by Size

(In millions, net of reinsurance)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change

Ratios as a percent of earned premiums:	Pt. Change			Pt. Change		
Current accident year losses greater than \$5,000,000	— %	— %	0.0	— %	— %	0.0
Current accident year losses \$1,000,000-\$5,000,000	—	3.6	(3.6)	1.9	2.6	(0.7)
Large loss prior accident year reserve development	(1.3)	(4.3)	3.0	(0.5)	1.0	(1.5)
Total large loss ratio	(1.3)	(0.7)	(0.6)	1.4	3.6	(2.2)
Losses incurred but not reported	14.6	25.9	(11.3)	17.7	15.7	2.0
Other losses excluding catastrophe losses	15.3	15.9	(0.6)	17.1	26.6	(9.5)
Catastrophe losses	(0.7)	2.4	(3.1)	1.4	1.6	(0.2)
Total loss ratio	27.9 %	43.5 %	(15.6)	37.6 %	47.5 %	(9.9)

We continue to monitor new losses and case reserve increases greater than \$1 million for trends in factors such as initial reserve levels, loss cost inflation and claim settlement expenses. Our analysis continues to indicate no unexpected concentration of these large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. In the third quarter of 2014, the excess and surplus lines total ratio for these losses and case reserve increases, net of reinsurance, was 0.6 percentage points lower compared with last year's third quarter. The third-quarter 2014 amount of total large losses incurred helped contribute to the decrease in the nine-month 2014 total large loss ratio, compared with 2013, in addition to a six-month 2014 ratio that was 3.0 points lower than the first half of 2013. We believe results for the three and nine months ended September 30, 2014, largely reflected normal fluctuations in loss patterns and normal variability in large case reserves for claims above \$1 million.

Total benefits and expenses	51	39	31	156	117	33
Life insurance segment (loss) profit	\$(4)	\$—	nm	\$(5)	\$10	nm

Overview

Performance highlights for the life insurance segment include:

Revenues – Revenues increased for the three and nine months ended September 30, 2014, primarily due to higher earned premiums from term and universal life insurance products. The unlocking of interest rate and other actuarial assumptions for our universal life contracts during the third quarter of both 2014 and 2013 slowed the amortization of unearned front-end loads, reducing universal life earned premiums.

Net in-force life insurance policy face amounts increased to \$49.834 billion at September 30, 2014, from \$48.063 billion at year-end 2013.

Fixed annuity deposits received for the three and nine months ended September 30, 2014, were \$8 million and \$29 million, each matching the same period of 2013. Fixed annuity deposits have a minimal impact to earned premiums because deposits received are initially recorded as liabilities. Profit is earned over time by way of interest rate spreads. We do not write variable or equity-indexed annuities and are currently de-emphasizing fixed annuity sales due to the low interest rate environment.

Life Insurance Premiums

(In millions)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Term life insurance	\$34	\$32	6	\$99	\$92	8
Universal life insurance	5	(1)	nm	25	8	213
Other life insurance, annuity and disability income products	7	7	0	23	24	(4)
Net earned premiums	\$46	\$38	21	\$147	\$124	19

Profitability – Our life insurance segment typically reports a small profit or loss on a GAAP basis because profits from investment income spreads are included in our investment segment results. We include only investment income credited to contract holders (including interest assumed in life insurance policy reserve calculations) in our life insurance segment results. A loss of \$5 million for our life insurance segment in the first nine months of 2014, compared with a gain of \$10 million for the same period of 2013, is largely due to less favorable mortality experience in 2014.

Although we report most of our life insurance company investment income in our investments segment results, we recognize that assets under management, capital appreciation and investment income are integral to evaluation of the success of the life insurance segment because of the long duration of life products. On a basis that includes investment income and realized gains or losses from life-insurance-related invested assets, the life insurance company reported a net profit of \$9 million and \$30 million in the three and nine months ended September 30, 2014, compared with a net profit of \$10 million and \$38 million for the same periods of 2013. The life insurance company portfolio had after-tax

realized investment gains of \$2 million and \$4 million for the three and nine months ended September 30, 2014, compared with after-tax realized investment gains of \$1 million and \$3 million for the same periods of 2013. Life segment benefits and expenses consist principally of contract holders' (policyholders') benefits incurred related to traditional life and interest-sensitive products and operating expenses incurred, net of deferred acquisition costs. Total benefits increased in the first nine months of 2014. Through the first nine months, mortality results exceeded our projections but remained within our pricing expectations. Operating expenses for the first nine months of 2014 increased compared with the same period a year ago. For both the nine-month 2014 and the comparable period in 2013, unlocking of interest rate and other actuarial assumptions increased the amount of expenses deferred to future periods, reducing operating expenses. The expense reduction effect from unlocking was less in the first nine months of 2014, compared with the same period of 2013. Pretax earnings for the first nine months of 2014 were reduced by approximately \$3 million due to unlocking. For the comparable period of 2013, the effect of unlocking on pretax earnings was minimal.

INVESTMENT RESULTS OF OPERATIONS

Overview

The investments segment contributes investment income and realized gains and losses to results of operations. Investments traditionally are our primary source of pretax and after-tax profits.

Investment Income

Pretax investment income increased 4 percent for the three and nine months ended September 30, 2014, compared with the same periods of 2013. Interest income rose due to net purchases of fixed-maturity securities that offset the continuing effects of the low interest rate environment. Higher dividend income reflected rising dividend rates and net purchases of equity securities. Dividend income for the first quarter of 2013 was affected by certain holdings that accelerated payments from the first quarter of 2013 into the fourth quarter of 2012 in response to anticipated tax law changes.

Investment Results

(In millions)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Investment income, net of expenses	\$138	\$133	4	\$409	\$392	4
Investment interest credited to contract holders	(21)	(21)	0	(62)	(60)	(3)
Realized investment gains, net	65	22	195	101	77	31
Investment operations profit, pretax	\$182	\$134	36	\$448	\$409	10

Average yields in the table below are based on the average invested asset and cash amounts indicated in the table, using fixed-maturity securities valued at amortized cost and all other securities at fair value. In our 2013 Annual Report on Form 10-K, Item 1, Investments Segment, Page 23, and Item 7, Investments Outlook, Page 94, we discussed our portfolio strategies. We discuss risks related to our investment income and our fixed-maturity and equity investment portfolios in this quarterly report Item 3, Quantitative and Qualitative Disclosures About Market Risk.

We continue to position our portfolio considering both the challenges presented by the current low interest rate environment and the risks presented by potential future inflation. As bonds in our generally laddered portfolio mature or are called over the near term, we will be challenged to replace their current yield. From October 2014 through December 2016, approximately 14.9 percent of our fixed-maturity investments mature with an average pretax yield-to-amortized cost of 4.4 percent. During the last quarter of 2014, 1.9 percent of our fixed-maturity investments mature and yield 4.4 percent. While our bond portfolio more than covers our insurance reserve liabilities, we believe our diversified common stock portfolio of mainly blue chip, dividend-paying companies represents one of our best

investment opportunities for the long term.

Net Realized Gains and Losses

We reported net realized investment gains of \$65 million and \$101 million for the three and nine months ended September 30, 2014, compared with \$22 million and \$77 million for the three and nine months ended September 30, 2013. The total net realized investment gains for the first nine months of 2014 included \$93 million in net gains from sales of various common and preferred stock holdings.

Investment gains or losses are recognized upon the sales of investments or as otherwise required under GAAP. The timing of realized gains or losses from sales can have a material effect on results in any quarter. However, such gains or losses usually have little, if any, effect on total shareholders' equity because most equity and fixed-maturity investments are carried at fair value, with the unrealized gain or loss included as a component of accumulated other comprehensive income. Accounting requirements for other-than-temporary impairment (OTTI) charges for the fixed-maturity portfolio are disclosed in our 2013 Annual Report on Form 10-K, Item 8, Note 1, Summary of Significant Accounting Policies, Page 131.

Of the 3,024 securities in the portfolio, no securities were trading below 70 percent of amortized cost at September 30, 2014. Our asset impairment committee regularly monitors the portfolio, including a quarterly review of the entire portfolio for potential OTTI charges. We believe that if the improving liquidity in the markets were to reverse or the economic recovery were to significantly stall, we could experience declines in portfolio values and possibly additional OTTI charges.

The table below provides additional detail for OTTI charges:

TAXES

We had \$76 million and \$127 million of income tax expense for the three and nine months ended September 30, 2014, compared with \$51 million and \$152 million for the same periods of 2013. The effective tax rates for the three and nine months ended September 30, 2014, were 29.3 percent and 26.2 percent compared with 28.0 percent and 27.8 percent for the same periods last year. The change in our effective tax rate was primarily due to changes in pretax income from underwriting results and realized investment gains and losses, with small changes in the amount of permanent book-tax differences.

Historically, we have pursued a strategy of investing some portion of cash flow in tax-advantaged fixed-maturity and equity securities to minimize our overall tax liability and maximize after-tax earnings. See Tax-Exempt Fixed Maturities in this quarterly report Item 3, Quantitative and Qualitative Disclosures About Market Risk for further discussion on municipal bond purchases in our fixed-maturity investment portfolio. For our property casualty insurance subsidiaries, approximately 85 percent of interest from tax-advantaged fixed-maturity investments and approximately 60 percent of dividends from qualified equities are exempt from federal tax after applying proration from the 1986 Tax Reform Act. Our noninsurance companies own an immaterial amount of tax-advantaged, fixed-maturity investments. For our noninsurance companies, the dividend received deduction exempts 70 percent of dividends from qualified equities. Our life insurance company does not own tax-advantaged, fixed-maturity investments or equities subject to the dividend received deduction. Details about our effective tax rate are in this

quarterly report Item 1, Note 9 – Income Taxes.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 51

LIQUIDITY AND CAPITAL RESOURCES

At September 30, 2014, shareholders' equity was \$6.376 billion compared with \$6.070 billion at December 31, 2013. Total debt was \$839 million at September 30, 2014, down from \$894 million at December 31, 2013. At September 30, 2014, cash and cash equivalents totaled \$412 million compared with \$433 million at December 31, 2013.

SOURCES OF LIQUIDITY

Subsidiary Dividends

Our lead insurance subsidiary declared dividends of \$300 million to the parent company during the first nine months of 2014, matching the same period of 2013. For the full-year 2013, subsidiary dividends declared totaled \$375 million. State of Ohio regulatory requirements restrict the dividends our insurance subsidiary can pay. During 2014, total dividends that our insurance subsidiary could pay to our parent company without regulatory approval are approximately \$433 million.

Investing Activities

Investment income is a source of liquidity for both the parent company and its insurance subsidiary. We continue to focus on portfolio strategies to balance near-term income generation and long-term book value growth.

Parent company obligations can be funded with income on investments held at the parent-company level or through sales of securities in that portfolio, although we prefer to follow an investment philosophy seeking to compound cash flows over the long term. These sources of capital can help minimize subsidiary dividends to the parent company, protecting insurance subsidiary capital.

See our 2013 Annual Report on Form 10-K, Item 1, Investment Segment, Page 23, for a discussion of our historic investment strategy, portfolio allocation and quality.

Insurance Underwriting

Our property casualty and life insurance underwriting operations provide liquidity because we generally receive premiums before paying losses under the policies purchased with those premiums. After satisfying our cash requirements, we use excess cash flows for investment, increasing future investment income.

Historically, cash receipts from property casualty and life insurance premiums, along with investment income, have been more than sufficient to pay claims, operating expenses and dividends to the parent company.

The table below shows a summary of operating cash flow for property casualty insurance (direct method):

(In millions)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Premiums collected	\$1,043	\$1,017	3	\$3,159	\$2,950	7
Loss and loss expenses paid	(639)	(562)	(14)	(1,838)	(1,596)	(15)
Commissions and other underwriting expenses paid	(275)	(273)	(1)	(967)	(907)	(7)
Cash flow from underwriting	129	182	(29)	354	447	(21)
Investment income received	92	91	1	278	266	5
Cash flow from operations	\$221	\$273	(19)	\$632	\$713	(11)

Collected premiums for property casualty insurance rose \$209 million during the first nine months of 2014, compared with the same period in 2013. Loss and loss expenses paid increased \$242 million, including \$63 million for

catastrophe losses and loss expenses. Commissions and other underwriting expenses paid rose \$60 million, primarily due to higher commissions paid to agencies, reflecting the increase in collected premiums.

We discuss our future obligations for claims payments and for underwriting expenses in our 2013 Annual Report on Form 10-K, Item 7, Contractual Obligations, Page 98, and Other Commitments on Page 99.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 52

Capital Resources

At September 30, 2014, our debt-to-total-capital ratio was 11.6 percent, with \$790 million in long-term debt and \$49 million in borrowing on our revolving short-term line of credit. That line of credit had a \$104 million balance at December 31, 2013. During April 2014, we repaid \$55 million as part of routine cash management and had \$176 million remaining for future cash management needs at September 30, 2014. Based on our capital requirements at September 30, 2014, we do not anticipate a material increase in debt levels during the remainder of 2014. As a result, we expect changes in our debt-to-total-capital ratio to continue to be largely a function of the contribution of unrealized investment gains or losses to shareholders' equity.

We provide details of our three long-term notes in this quarterly report Item 1, Note 3 – Fair Value Measurements. None of the notes are encumbered by rating triggers.

Four independent ratings firms award insurer financial strength ratings to our property casualty insurance companies and three firms rate our life insurance company. Those firms made no changes to our parent company debt ratings during the first nine months of 2014. Our debt ratings are discussed in our 2013 Annual Report on Form 10-K, Item 7, Liquidity and Capital Resources, Additional Sources of Liquidity, Page 97.

Off-Balance Sheet Arrangements

We do not use any special-purpose financing vehicles or have any undisclosed off-balance sheet arrangements (as that term is defined in applicable SEC rules) that are reasonably likely to have a current or future material effect on the company's financial condition, results of operation, liquidity, capital expenditures or capital resources. Similarly, the company holds no fair-value contracts for which a lack of marketplace quotations would necessitate the use of fair-value techniques.

USES OF LIQUIDITY

Our parent company and insurance subsidiary have contractual obligations and other commitments. In addition, one of our primary uses of cash is to enhance shareholder return.

Contractual Obligations

In our 2013 Annual Report on Form 10-K, Item 7, Contractual Obligations, Page 98, we estimated our future contractual obligations as of December 31, 2013. There have been no material changes to our estimates of future contractual obligations since our 2013 Annual Report on Form 10-K.

Other Commitments

In addition to our contractual obligations, we have other property casualty operational commitments.

Commissions – Commissions paid were \$593 million in the first nine months of 2014. Commission payments generally track with written premiums, except for annual profit-sharing commissions typically paid during the first quarter of the year.

Other underwriting expenses – Many of our underwriting expenses are not contractual obligations, but reflect the ongoing expenses of our business. Noncommission underwriting expenses paid were \$374 million in the first nine months of 2014.

Technology costs – In addition to contractual obligations for hardware and software, we anticipate capitalizing approximately \$5 million in spending for key technology initiatives in 2014. Capitalized development costs related to key technology initiatives were \$4 million in the first nine months of 2014. These activities are conducted at our discretion, and we have no material contractual obligations for activities planned as part of these projects.

We contributed \$5 million to our qualified pension plan during the first nine months of 2014. We do not anticipate further contributions to our qualified pension plan during the remainder of 2014.

Investing Activities

After fulfilling operating requirements, we invest cash flows from underwriting, investment and other corporate activities in fixed-maturity and equity securities on an ongoing basis to help achieve our portfolio objectives. We discuss our investment strategy and certain portfolio attributes in this quarterly report Item 3, Quantitative and Qualitative Disclosures about Market Risk.

Uses of Capital

Uses of cash to enhance shareholder return include dividends to shareholders. In January, April and August 2014, the board of directors declared regular quarterly cash dividends of 44 cents per share for an indicated annual rate of \$1.76 per share. During the first nine months of 2014, we used \$208 million to pay cash dividends to shareholders.

PROPERTY CASUALTY INSURANCE RESERVES

For the business lines in the commercial and personal lines insurance segments, and in total for the excess and surplus lines segment, the following table details gross reserves among case, IBNR (incurred but not reported) and loss expense reserves, net of salvage and subrogation reserves. Reserving practices are discussed in our 2013 Annual Report on Form 10-K, Item 7, Property Casualty Insurance Loss and Loss Expense Obligations and Reserves, Page 99.

Total gross reserves at September 30, 2014, increased \$152 million compared with December 31, 2013. Case reserves for losses increased \$111 million while IBNR reserves increased by \$22 million and total loss expense reserves increased by \$19 million. Accounting for the majority of the total gross increase was the aggregate of our auto lines of business and our excess and surplus lines segment.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 55

LIFE POLICY AND INVESTMENT CONTRACT RESERVES

Gross life policy and investment contract reserves were \$2.484 billion at September 30, 2014, compared with \$2.390 billion at year-end 2013, reflecting continued growth in life insurance policies in force. We discuss our life insurance reserving practices in our 2013 Annual Report on Form 10-K, Item 7, Life Insurance Policyholder Obligations and Reserves, Page 106.

OTHER MATTERS**SIGNIFICANT ACCOUNTING POLICIES**

Our significant accounting policies are discussed in our 2013 Annual Report on Form 10-K, Item 8, Note 1, Summary of Significant Accounting Policies, Page 128, and updated in this quarterly report Item 1, Note 1, Accounting Policies.

In conjunction with those discussions, in the Management's Discussion and Analysis in the 2013 Annual Report on Form 10-K, management reviewed the estimates and assumptions used to develop reported amounts related to the most significant policies. Management discussed the development and selection of those accounting estimates with the audit committee of the board of directors.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our greatest exposure to market risk is through our investment portfolio. Market risk is the potential for a decrease in securities' fair value resulting from broad yet uncontrollable forces such as: inflation, economic growth or recession, interest rates, world political conditions or other widespread unpredictable events. It is comprised of many individual risks that, when combined, create a macroeconomic impact.

Our view of potential risks and our sensitivity to such risks is discussed in our 2013 Annual Report on Form 10-K, Item 7a, Quantitative and Qualitative Disclosures about Market Risk, Page 112.

The fair value of our investment portfolio was \$14.188 billion at September 30, 2014, up \$692 million from year-end 2013, including an increase in the common equities portfolio of \$275 million.

(In millions)	At September 30, 2014				At December 31, 2013			
	Cost or amortized cost	Percent to total	Fair value	Percent to total	Cost or amortized cost	Percent to total	Fair value	Percent to total
Taxable fixed maturities	\$5,910	50.9	% \$6,371	44.9	% \$5,814	52.1	% \$6,211	46.0
Tax-exempt fixed maturities	3,014	25.9	3,151	22.2	2,824	25.3	2,910	21.6
Common equities	2,552	22.0	4,488	31.6	2,396	21.5	4,213	31.2
Nonredeemable preferred equities	145	1.2	178	1.3	127	1.1	162	1.2
Total	\$11,621	100.0	% \$14,188	100.0	% \$11,161	100.0	% \$13,496	100.0

At September 30, 2014, our consolidated investment portfolio included \$30 million of assets for which values are based on prices or valuation techniques that require significant management judgment (Level 3 assets). This represented less than 1 percent of investment portfolio assets measured at fair value. See Item 1, Note 3, Fair Value Measurements, for additional discussion of our valuation techniques. We have generally obtained and evaluated two nonbinding quotes from brokers; then our investment professionals determined our best estimate of fair value. These investments include private placements, small issues and various thinly traded securities.

In addition to our investment portfolio, the total investments amount reported in our condensed consolidated balance sheets includes Other invested assets. Other invested assets included \$30 million of life policy loans plus \$37 million of private equity investments at September 30, 2014.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 56

FIXED-MATURITY INVESTMENTS

By maintaining a well-diversified fixed-maturity portfolio, we attempt to reduce overall risk. We invest new money in the bond market on a regular basis, targeting what we believe to be optimal risk-adjusted after-tax yields. Risk, in this context, includes interest rate, call, reinvestment rate, credit and liquidity risk. We do not make a concerted effort to alter duration on a portfolio basis in response to anticipated movements in interest rates. By regularly investing in the bond market, we build a broad, diversified portfolio that we believe mitigates the impact of adverse economic factors.

Our investment portfolio had no European sovereign debt holdings at September 30, 2014. On that date, we owned other European-based securities, primarily corporate bonds, totaling \$425 million in fair value. The composition of our European-based holdings at September 30, 2014, did not materially change from the \$455 million fair value total at year-end 2013. We discussed our European-based holdings in our 2013 Annual Report on Form 10-K, Item 7a, Quantitative and Qualitative Disclosures about Market Risk, Page 114.

In the first nine months of 2014, the increase in fair value of our fixed-maturity portfolio was due to a decline in interest rates as well as a spread tightening in both the corporate and municipal bond markets. At September 30, 2014, our fixed-maturity portfolio with an average rating of A2/A was valued at 106.7 percent of its amortized cost, compared with 105.6 percent at December 31, 2013.

Credit ratings at September 30, 2014, compared with December 31, 2013, for the fixed-maturity portfolio were:

(In millions)	At September 30, 2014			At December 31, 2013		
	Total	Percent		Total	Percent	
	fair value	to total		fair value	to total	
Moody's Ratings and Standard & Poor's Ratings combined:						
Aaa, Aa, A, AAA, AA, A	\$5,741	60.3	%	\$5,468	59.9	%
Baa, BBB	3,260	34.2		3,197	35.1	
Ba, BB	250	2.6		231	2.5	
B, B	16	0.2		16	0.2	
Caa, CCC, Ca	3	0.0		4	0.0	
Nonrated	252	2.7		205	2.3	
Total	\$9,522	100.0	%	\$9,121	100.0	%

Attributes of the fixed-maturity portfolio include:

	At September 30, 2014		At December 31, 2013	
Weighted average yield-to-amortized cost	4.7	%	4.9	%
Weighted average maturity	6.4	yrs	6.2	yrs
Effective duration	4.4	yrs	4.5	yrs

We discuss maturities of our fixed-maturity portfolio in our 2013 Annual Report on Form 10-K, Item 8, Note 2, Investments, Page 135, and in this quarterly report Item 2, Investments Results of Operations.

TAXABLE FIXED MATURITIES

Our taxable fixed-maturity portfolio, with a fair value of \$6.371 billion at September 30, 2014, included:

(In millions)	At September 30, 2014	At December 31, 2013
Investment-grade corporate	\$5,308	\$5,293
States, municipalities and political subdivisions	313	301
Below investment-grade corporate	262	240
Commercial mortgage-backed	254	143
Government sponsored enterprises	210	200
Foreign government	10	10
Convertibles and bonds with warrants attached	7	17
United States government	7	7
Total	\$6,371	\$6,211

Our strategy is to buy and typically hold fixed-maturity investments to maturity, but we monitor credit profiles and fair value movements when determining holding periods for individual securities. With the exception of United States agency issues that include United States government and government-sponsored enterprises, no individual issuer's securities accounted for more than 1.0 percent of the taxable fixed-maturity portfolio at September 30, 2014. Our investment-grade corporate bonds had an average rating of Baa1 by Moody's or BBB+ by Standard & Poor's and represented 83.3 percent of the taxable fixed-maturity portfolio's fair value at September 30, 2014, compared with 85.2 percent at year-end 2013.

The heaviest concentration in our investment-grade corporate bond portfolio, based on fair value at September 30, 2014, is the financial-related sectors – including banking, financial services and insurance – representing 35.3 percent, compared with 32.8 percent at year-end 2013. We believe our weighting in financial-related sectors is below the average for the corporate bond market as a whole.

Most of the \$313 million of securities issued by states, municipalities and political subdivisions included in our taxable fixed-maturity portfolio at September 30, 2014, were Build America Bonds.

Our taxable fixed-maturity portfolio at September 30, 2014, included \$254 million of commercial mortgage-backed securities with an average rating of Aa1/AA.

TAX-EXEMPT FIXED MATURITIES

At September 30, 2014, we had \$3.151 billion of tax-exempt fixed-maturity securities with an average rating of Aa2/AA by Moody's and Standard & Poor's. We traditionally have purchased municipal bonds focusing on general obligation and essential services issues, such as water, waste disposal or others. The portfolio is well diversified among approximately 1,000 municipal bond issuers. No single municipal issuer accounted for more than 0.8 percent of the tax-exempt fixed-maturity portfolio at September 30, 2014. The following table shows our municipal bond holdings in our larger states:

(In millions)

	Local issued general obligation bonds	Special revenue bonds	State issued general obligation bonds	Total fair value	Percent to total

Total	\$1,912	\$940	\$58	\$2,910	100.0	%

Interest Rate Sensitivity Analysis

Because of our strong surplus, long-term investment horizon and ability to hold most fixed-maturity investments until maturity, we believe the company is adequately positioned if interest rates were to rise. Although the fair values of our existing holdings may suffer, a higher rate environment would provide the opportunity to invest cash flow in higher-yielding securities, while reducing the likelihood of untimely redemptions of currently callable securities. While higher interest rates would be expected to continue to increase the number of fixed-maturity holdings trading below 100 percent of amortized cost, we believe lower fixed-maturity security values due solely to interest rate changes would not signal a decline in credit quality. We continue to manage the portfolio with an eye toward both meeting current income needs and managing interest rate risk.

Our dynamic financial planning model uses analytical tools to assess market risks. As part of this model, the effective duration of the fixed-maturity portfolio is continually monitored by our investment department to evaluate the theoretical impact of interest rate movements.

The table below summarizes the effect of hypothetical changes in interest rates on the fair value of the fixed-maturity portfolio:

(In millions)	Interest rate shift in basis points				
	-200	-100	-	100	200
At September 30, 2014	\$10,389	\$9,951	\$9,522	\$9,096	\$8,681
At December 31, 2013	\$9,968	\$9,545	\$9,121	\$8,708	\$8,316

The effective duration of the fixed-maturity portfolio as of September 30, 2014, was 4.4 years, compared with 4.5 years at year-end 2013. The above table is a theoretical presentation showing that an instantaneous, parallel shift in the yield curve of 100 basis points could produce an approximately 4.5 percent change in the fair value of the fixed-maturity portfolio. Generally speaking, the higher a bond is rated, the more directly correlated movements in its fair value are to changes in the general level of interest rates, exclusive of call features. The fair values of average- to lower-rated corporate bonds are additionally influenced by the expansion or contraction of credit spreads.

In our dynamic financial planning model, the selected interest rate change of 100 to 200 basis points represents our view of a shift in rates that is quite possible over a one-year period. The rates modeled should not be considered a prediction of future events as interest rates may be much more volatile in the future. The analysis is not intended to provide a precise forecast of the effect of changes in rates on our results or financial condition, nor does it take into account any actions that we might take to reduce exposure to such risks.

EQUITY INVESTMENTS

Our equity investments, with a fair value totaling \$4.666 billion at September 30, 2014, include \$4.488 billion of common stock securities of companies generally with strong indications of paying and growing their dividends. Other criteria we evaluate include increasing sales and earnings, proven management and a favorable outlook. We believe our equity investment style is an appropriate long-term strategy. While our long-term financial position would be affected by prolonged changes in the market valuation of our investments, we believe our strong surplus position and cash flow provide a cushion against short-term fluctuations in valuation. Continued payment of cash dividends by the issuers of our common equity holdings can provide a floor to their valuation. A \$100 million unrealized change in the value of the common stocks owned at period end would cause a change of \$65 million, or approximately 40 cents per share, in our shareholders' equity.

At September 30, 2014, BlackRock Inc. (NYSE:BLK) was our largest single common stock holding with a fair value of 3.1 percent of our publicly-traded common stock portfolio and 1.0 percent of the total investment portfolio. We had

14 holdings among eight different sectors each with a fair value greater than \$100 million.

UNREALIZED INVESTMENT GAINS AND LOSSES

At September 30, 2014, unrealized investment gains before taxes for the consolidated investment portfolio totaled \$2.603 billion and unrealized investment losses amounted to \$36 million.

The unrealized investment gains at September 30, 2014, were due to a pretax net gain position in our fixed-maturity portfolio of \$598 million and a net gain position in our equity portfolio of \$1.969 billion. The net gain position in our fixed-maturity portfolio had grown in recent years prior to 2013 and in 2014 due largely to a declining interest rate environment. During 2013, that portfolio's net gain position decreased \$388 million largely due to lower valuations for fixed-maturity securities from rising interest rates. The net gain position for our current fixed-maturity holdings will naturally decline over time as individual securities mature. In addition, changes in interest rates can cause rapid, significant changes in fair values of fixed-maturity securities and the net gain position, as discussed in Quantitative and Qualitative Disclosures about Market Risk. The seven largest contributors to our common stock portfolio net gain position were Exxon Mobil Corporation (NYSE:XOM), The Procter & Gamble Company (NYSE:PG), Honeywell International Inc. (NYSE:HON), Chevron Corporation (NYSE:CVX), Johnson & Johnson (NYSE:JNJ), BlackRock Inc. and RPM International (NYSE:RPM), which had a combined net gain position of \$579 million.

Unrealized Investment Losses

We expect the number of securities trading below amortized cost to fluctuate as interest rates rise or fall and credit spreads expand or contract due to prevailing economic conditions. Further, amortized costs for some securities are revised through OTTI recognized in prior periods. At September 30, 2014, 300 of the 3,024 securities we owned had fair values below amortized cost, compared with 556 of the 2,879 securities we owned at year-end 2013. The 300 holdings with fair values below cost or amortized cost at September 30, 2014, represented 7.6 percent of fair value of our investment portfolio and \$36 million in unrealized losses.

294 of the 300 holdings had fair value between 90 percent and 100 percent of amortized cost at September 30, 2014. Nine of these 300 holdings are equity securities that may be subject to OTTI charges taken through earnings should they not recover by the recovery dates we determined. The fair value of these nine equity securities was \$227 million, and they accounted for \$7 million in unrealized losses. The remaining 285 securities primarily consist of fixed-maturity securities whose current valuation is largely the result of interest rate factors. The fair value of these 285 securities was \$809 million, and they accounted for \$20 million in unrealized losses.

Six of the 300 holdings had fair value between 70 percent and 90 percent of amortized cost at September 30, 2014.

¶We believe these six fixed-maturity securities will continue to pay interest and ultimately pay principal upon maturity. The issuers of these six securities have strong cash flow to service their debt and

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 61

meet their contractual obligation to make principal payments. The fair value of these securities was \$43 million, and they accounted for \$9 million in unrealized losses.

No securities were trading below 70 percent of amortized cost at September 30, 2014.

The table below reviews fair values and unrealized losses by investment category and by the overall duration of the securities' continuous unrealized loss position.

At September 30, 2014, 212 fixed-maturity securities with a total unrealized loss of \$20 million had been in an unrealized loss position for 12 months or more. Of that total, no fixed-maturity securities had fair values below 70 percent of amortized cost; Two fixed-maturity securities with a fair value of \$12 million had a fair value from 70 percent to less than 90 percent of amortized cost and accounted for \$2 million in unrealized losses; and 210 fixed-maturity securities with a fair value of \$539 million had fair values from 90 percent to less than 100 percent of amortized cost and accounted for \$18 million in unrealized losses.

At September 30, 2014, four equity securities with a total unrealized loss of \$5 million had been in an unrealized loss position for 12 months or more. These four equity securities with a fair value of \$97 million had fair values from

90 percent to less than 100% of amortized cost.

At September 30, 2014, applying our invested asset impairment policy, we determined that the total of \$25 million, for securities in an unrealized loss position for 12 months or more in the table above, were not other-than-temporarily impaired.

Cincinnati Financial Corporation Third-Quarter 2014 10-Q

Page 62

During the third quarter of 2014, no securities were written down through impairment charges, for a total of four during the nine months ended September 30, 2014. OTTI resulted in a pretax, noncash charge of \$1 million for the nine months ended September 30, 2014. During the first nine months of 2013, we wrote down five securities resulting in \$2 million in OTTI charges.

During full-year 2013, we wrote down seven securities and recorded \$2 million in OTTI charges.

At December 31, 2013, 40 fixed-maturity investments with a total unrealized loss of \$5 million had been in an unrealized loss position for 12 months or more. Of that total, no fixed-maturity investments had fair values below 70 percent of amortized cost. No equity investments had been in an unrealized loss position for 12 months or more as of December 31, 2013.

The following table summarizes the investment portfolio by severity of decline:

(In millions)

At September 30, 2014	Number of issues	Cost or amortized cost	Fair value	Gross unrealized gain/loss	Gross investment income
Taxable fixed maturities:					
Fair valued below 70% of amortized cost	—	\$—	\$—	\$—	\$—
Fair valued at 70% to less than 100% of amortized cost	137	634	609	(25)	14
Fair valued at 100% and above of amortized cost	1,269	5,276	5,762	486	208
Securities sold in current year	—	—	—	—	7
Total	1,406	5,910	6,371	461	229
Tax-exempt fixed maturities:					
Fair valued below 70% of amortized cost	—	—	—	—	—
Fair valued at 70% to less than 100% of amortized cost	154	247	243	(4)	4
Fair valued at 100% and above of amortized cost	1,361	2,767	2,908	141	75
Securities sold in current year	—	—	—	—	3
Total	1,515	3,014	3,151	137	82
Common equities:					
Fair valued below 70% of cost	—	—	—	—	—
Fair valued at 70% to less than 100% of cost	3	191	185	(6)	4
Fair valued at 100% and above of cost	72	2,361	4,303	1,942	88
Securities sold in current year	—	—	—	—	2
Total	75	2,552	4,488	1,936	94
Nonredeemable preferred equities:					
Fair valued below 70% of cost	—	—	—	—	—
Fair valued at 70% to less than 100% of cost	6	43	42	(1)	1
Fair valued at 100% and above of cost	22	102	136	34	6
Securities sold in current year	—	—	—	—	—
Total	28	145	178	33	7
Portfolio summary:					
Fair valued below 70% of cost or amortized cost	—	—	—	—	—
Fair valued at 70% to less than 100% of cost or amortized cost	300	1,115	1,079	(36)	23
Fair valued at 100% and above of cost or amortized cost	2,724	10,506	13,109	2,603	377
Investment income on securities sold in current year	—	—	—	—	12
Total	3,024	\$11,621	\$14,188	\$2,567	\$412
At December 31, 2013					
Portfolio summary:					
Fair valued below 70% of cost or amortized cost	—	\$—	\$—	\$—	\$—
Fair valued at 70% to less than 100% of cost or amortized cost	556	1,681	1,602	(79)	41
Fair valued at 100% and above of cost or amortized cost	2,323	9,480	11,894	2,414	471
Investment income on securities sold in current year	—	—	—	—	23
Total	2,879	\$11,161	\$13,496	\$2,335	\$535

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures – The company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)).

Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The company's management, with the participation of the company's chief executive officer and chief financial officer, has evaluated the effectiveness of the design and operation of the company's disclosure controls and procedures as of September 30, 2014. Based upon that evaluation, the company's chief executive officer and chief financial officer concluded that the design and operation of the company's disclosure controls and procedures provided reasonable assurance that the disclosure controls and procedures are effective to ensure:

that information required to be disclosed in the company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and

that such information is accumulated and communicated to the company's management, including its chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting – During the three months ended September 30, 2014, there were no changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II – Other Information

Item 1. Legal Proceedings

Neither the company nor any of our subsidiaries is involved in any litigation believed to be material other than ordinary, routine litigation incidental to the nature of our business.

Item 1A. Risk Factors

Our risk factors have not changed materially since they were described in our 2013 Annual Report on Form 10-K filed February 27, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

We did not sell any of our shares that were not registered under the Securities Act during the first nine months of 2014. The board of directors has authorized share repurchases since 1996. Purchases are expected to be made generally through open market transactions. During the third quarter of 2014, we acquired 62,284 shares for \$3 million from associates as consideration for options exercised. During the first nine months of 2014, we acquired 224,745 shares for \$11 million from associates as consideration for options exercised. The board gives management discretion to purchase shares at reasonable prices in light of circumstances at the time of purchase, subject to SEC regulations. On October 24, 2007, the board of directors expanded the existing repurchase authorization to approximately 13 million shares. We have 5,099,493 shares available for purchase under our programs at September 30, 2014.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
July 1-31, 2014	100,000	\$46.07	100,000	5,299,493

Edgar Filing: CINCINNATI FINANCIAL CORP - Form 10-Q
