First Midwest Bancorp, Inc. (the “Company”) is a bank holding company headquartered in the Chicago suburb of Itasca, Illinois with operations throughout the greater Chicago metropolitan area as well as central and western Illinois. Our principal subsidiary is First Midwest Bank, which provides a broad range of commercial and retail banking services to consumer, commercial and industrial, and public or governmental customers. We are committed to meeting the financial needs of the people and businesses in the communities where we live and work by providing customized banking solutions, quality products, and innovative services that fulfill those financial needs.

AVAILABLE INFORMATION

We file annual, quarterly, and current reports; proxy statements; and other information with the Securities and Exchange Commission (“SEC”), and we make this information available free of charge on or through the investor relations section of our web site at www.firstmidwest.com/aboutinvestor_overview.asp. The following documents are also posted on our web site or are available in print upon the request of any stockholder to our Corporate Secretary:

- Certificate of Incorporation
 - Company By-laws
- Charters for our Audit, Compensation, and Nominating and Corporate Governance Committees
 - Related Person Transaction Policies and Procedures
 - Corporate Governance Guidelines
- Code of Ethics and Standards of Conduct (the “Code”), which governs our directors, officers, and employees
 - Code of Ethics for Senior Financial Officers.

Within the time period required by the SEC and the Nasdaq Stock Market, we will post on our web site any amendment to the Code and any waiver applicable to any executive officer, director, or senior financial officer (as defined in the Code). In addition, our web site includes information concerning purchases and sales of our securities by our executive officers and directors, as well as any disclosure relating to certain non-GAAP financial measures (as defined in the SEC’s Regulation G) that we may make public orally, telephonically, by webcast, by broadcast, or by similar means from time to time.

Our Corporate Secretary can be contacted by writing to First Midwest Bancorp, Inc., One Pierce Place, Itasca, Illinois 60143, Attn: Corporate Secretary. The Company’s Investor Relations Department can be contacted by telephone at (630) 875-7533 or by e-mail at investor.relations@firstmidwest.com.

CAUTIONARY STATEMENT PURSUANT TO THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

We include or incorporate by reference in this Quarterly Report on Form 10-Q, and from time to time our management may make, statements that may constitute “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts, but instead represent only management’s beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Although we believe the expectations reflected in any forward-looking statements are reasonable, it is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in such statements. In some cases, you can identify these statements by forward-looking words such as “may,” “might,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “predict,” “potential,” or “continue,” and the negative of these terms and other comparable terminology. We caution you not to place undue reliance on forward-looking statements, which speak only as of the date of this report, or when made.

Forward-looking statements are subject to known and unknown risks, uncertainties, and assumptions and may include projections relating to our future financial performance including our growth strategies and anticipated trends in our business. For a detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements, you should refer to our Annual Report on Form 10-K for the year ended December 31, 2008 and the sections entitled “Risk Factors” in Part II Item 1A of this report and “Management’s Discussion and Analysis of Results of Operations,” as well as our subsequent periodic and current reports filed with the SEC. These risks and uncertainties are not exhaustive however. Other sections of this report describe additional factors that could adversely impact our business and financial performance.

Since mid-2007 the financial services industry and the securities markets in general have been materially and adversely affected by significant declines in the values of nearly all asset classes and by a serious lack of liquidity. While liquidity has improved and market volatility has generally lessened, the overall loss of investor confidence has brought a new level of risk to financial institutions in addition to the risks normally associated with competition and free market economies. The

Company has attempted to list those risks elsewhere in this report and consider them as it makes disclosures regarding forward-looking statements. Nevertheless, given the uncertain economic times, new risks and uncertainties may emerge very quickly and unpredictably, and it is not possible to predict all risks and uncertainties. We cannot assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We are under no duty to update any of these forward-looking statements after the date of this report to conform our prior statements to actual results or revised expectations, and we do not intend to do so.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated interim financial statements of First Midwest Bancorp, Inc. (the “Company”), a Delaware corporation, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission for quarterly reports on Form 10-Q and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles (“GAAP”) for complete annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company’s 2008 Annual Report on Form 10-K (“2008 10-K”).

The accompanying unaudited consolidated interim financial statements have been prepared in accordance with U.S. GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the quarter and six months ended June 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009.

The consolidated financial statements include the accounts and results of operations of the Company and its subsidiaries after elimination of all significant intercompany accounts and transactions. Certain reclassifications have been made to prior periods to conform to the current period presentation. U.S. GAAP requires management to make certain estimates and assumptions. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

2. RECENT ACCOUNTING PRONOUNCEMENTS

GAAP Codification: In June 2009, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, a replacement of FASB Statement No. 162. The Codification reorganizes the U.S. GAAP pronouncements into approximately 90 accounting topics, includes relevant guidance from the SEC, and displays all topics in a consistent format. When released on July 1, 2009, the Codification became the single official source of non-governmental U.S. GAAP, superseding existing literature from the FASB, American Institute of Certified Public Accountants, Emerging Issues Task Force (“EITF”) and related sources. All other non-grandfathered non-SEC accounting literature not included in the Codification is considered non-authoritative.

Following this statement, the FASB will not issue new standards in the form of Statements, FASB Staff Positions (“FSPs”), or EITF abstracts. Instead, it will issue Accounting Standards Updates and will consider them authoritative in their own right. SFAS No. 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009 (or beginning for the third quarter 2009 reporting period). Since the Codification does not change GAAP, the release of this statement and the Codification will not impact the Company’s financial position, results of operations, or liquidity. However, it will change how users research accounting issues and how the Company references accounting literature within its quarterly and annual financial statements.

Consolidation of Variable Interest Entities: In June 2009, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R). The statement changes how a company determines when a variable interest entity (“VIE”) – an entity that is insufficiently capitalized or is not controlled through voting or similar rights – should be consolidated. SFAS No. 167 replaces the quantitative approach for determining which company, if any, has a controlling financial interest in a VIE with a more qualitative approach focused on identifying which company has the power to direct the activities of a VIE that most significantly impact the entity’s economic performance. Before this statement, a troubled

debt restructuring was not an event that required reconsideration of whether an entity is a VIE and whether the company is the primary beneficiary of the VIE. This statement eliminates that exception and requires ongoing reassessment of troubled debt restructurings and whether a company is the primary beneficiary of a VIE. In addition, it requires a company to disclose how its involvement with a VIE affects the company's financial statements. SFAS No. 167 is effective for annual and interim periods beginning after November 15, 2009 (or January 1, 2010 for calendar-year companies) and is applicable to VIEs formed before and after the effective date. The Company is currently evaluating the impact of adopting this standard on its financial position, results of operations, and liquidity.

Transfers of Financial Assets: In June 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets. The statement requires a company to disclose more information about transfers of financial assets, including securitization transactions. It eliminates the concept of a "qualifying special-purpose entity" ("QSPE") from U.S. GAAP, changes the criteria for removing transferred assets from the balance sheet, and requires additional disclosures about a transferor's continuing involvement in transferred assets. Companies typically use special purpose entities to fulfill a specific objective

and to isolate the firm from financial risk. Before this statement, QSPEs generally were off-balance sheet entities that were exempt from consolidation. This statement eliminates that exemption from consolidation. Accordingly, many QSPEs that currently are off balance sheet could require consolidation under this statement. SFAS No. 166 is effective for financial asset transfers occurring after January 1, 2010 for calendar-year companies. The effect of these new requirements on the Company's financial position, results of operations, and liquidity will depend on the types and terms of financial asset transfers (including securitizations) executed by the Company in 2010 and beyond.

Fair Value Measurements: Effective January 1, 2008, the Company adopted FASB Statement No. 157, Fair Value Measurements ("SFAS No. 157"). Upon adoption, SFAS No. 157 provided a single definition of fair value, established a framework for measuring fair value, and required additional disclosures about fair value measurements. SFAS No. 157 applies whenever an entity is measuring fair value under other accounting standards that require or permit fair value measurements. On October 10, 2008, to clarify the application of SFAS No. 157 in inactive markets, the FASB issued FASB Staff Position ("FSP") Financial Accounting Standards ("FAS") 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active. Specifically, the FSP addressed the use of broker quotes and pricing services and how an entity's own input assumptions (such as discount rates used in cash flow projections) should be considered when measuring fair value when relevant observable market data does not exist. On April 9, 2009, the FASB provided additional fair value measurement guidance by issuing FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. Specifically, the FSP concludes that if there has been a significant decrease in the volume and level of activity in relation to the normal market activity, transactions or quoted prices may not be the best indicator of fair value. Further analysis of the transactions or quoted prices may be needed, and a significant adjustment to the transactions or quoted prices may be necessary to estimate fair value in accordance with SFAS No. 157. The FSP expands disclosures by requiring entities to disclose its inputs and valuation assumptions for both interim and annual periods. In addition, the FSP requires the SFAS No. 157 disclosures to be presented by major security type (such as mortgage-backed securities or collateralized debt obligations), rather than disclosure by major category (such as trading securities and available-for-sale securities).

SFAS No. 157 was effective for financial assets and liabilities on January 1, 2008 and for non-financial assets and liabilities on January 1, 2009. The FSP to address estimating fair value when the volume and level of activity in the market have decreased significantly is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. Effective for first quarter 2009, the Company elected to early adopt FSP FAS 157-4. The adoption of these standards did not have a material impact on the Company's financial position, results of operations, or liquidity. Refer to Note 14, "Fair Value," for the Company's fair value measurement disclosures.

Subsequent Events: Effective July 1, 2009, the Company adopted FASB Statement No. 165, Subsequent Events, ("SFAS No. 165"). SFAS No. 165 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. SFAS No. 165 defines (i) the period after the balance sheet date during which a reporting entity's management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and (iii) the disclosures an entity should make about events or transactions that occurred after the balance sheet date. The adoption of this standard did not have a material impact on the Company's financial position, results of operations, or liquidity.

Interim Period Fair Value Disclosures: Effective April 1, 2009, the Company adopted FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods as well as in annual financial statements. Since the FSP affects only disclosures, it did not impact the Company's financial position, results of operations, or liquidity upon adoption.

Other-Than-Temporary Impairment: Effective January 1, 2009, the Company adopted FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, related to the presentation and disclosure of other-than-temporary impairments on debt securities in its financial statements. Under the prior impairment guidance, an entity was required to assess whether it has the intent and ability to hold a security to recovery when determining whether the impairment is other-than-temporary. The FSP amends the prior guidance, and, once an impairment has been determined, requires an entity to:

- Recognize the entire impairment as an other-than-temporary impairment against earnings if an entity intends to sell the security or if it is “more-likely-than-not” that it will be required to sell the security before recovery of its cost basis.
- Recognize only the credit loss portion of the impairment against income as an other-than-temporary impairment if the entity does not intend to sell the security and it is not likely that it will be forced to do so before recovering its cost basis. The balance of the impairment loss would be charged to other comprehensive income.

- Upon adoption, recalculate any previous impairment taken, and only the credit loss portion would remain recognized in earnings, with the remainder (or liquidity portion) added back to retained earnings (with an offsetting reduction of accumulated other comprehensive income) as an after-tax cumulative adjustment.
- Expand the disclosure requirements for interim and annual periods to provide more detail on the types of available-for-sale and held-to-maturity debt securities held (by major security type, such as mortgage-backed securities or collateralized debt obligations), including information about investments in an unrealized loss position for which an other-than-temporary impairment has or has not been recognized. In addition, a company is required to disclose the reasons why an other-than-temporary impairment was recognized in earnings and the method and inputs used to calculate the portion of the impairment (or credit loss) recognized in earnings.

The FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. As the Company elected to early adopt this FSP during first quarter 2009, it was also required to adopt FSP FAS 157-4. Refer to Note 3, "Securities," for the impact of adopting this FSP and Note 14, "Fair Value," for the Company's fair value measurement disclosures.

Business Combinations: In December 2007, the FASB issued SFAS No. 141(R), Business Combinations ("SFAS No. 141(R)"). SFAS No. 141(R) will significantly change how entities apply the acquisition method to business combinations. The most significant changes affecting how the Company will account for business combinations under this statement include:

- The acquisition date will be the date the acquirer obtains control.
- All (and only) identifiable assets acquired, liabilities assumed, and noncontrolling interests in the acquiree will be stated at fair value on the acquisition date.
- Assets or liabilities arising from noncontractual contingencies will be measured at their acquisition date fair value only if it is more likely than not that they meet the definition of an asset or liability on the acquisition date.
- Adjustments subsequently made to the provisional amounts recorded on the acquisition date will be made retroactively during a measurement period not to exceed one year.
- Acquisition-related restructuring costs that do not meet the criteria in SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, will be expensed as incurred.
- Transaction costs will be expensed as incurred except for debt or equity issuance costs, which will be accounted for in accordance with other generally accepted accounting principles.
- Reversals of deferred income tax valuation allowances and income tax contingencies after the acquisition date will be recognized in earnings.
 - The reserve for loan losses of an acquiree will not be permitted to be recognized by the acquirer.

In addition, SFAS No. 141(R) will require new and modified disclosures about subsequent changes to acquisition-related contingencies, contingent consideration, noncontrolling interests, acquisition-related transaction costs, fair values, cash flows not expected to be collected for acquired loans, and an enhanced goodwill rollforward. The Company will apply SFAS No. 141(R) to all future business combinations. The effect of these new requirements on the Company's financial position, results of operations, or liquidity will depend on the volume and terms of acquisitions in 2009 and beyond, but will likely increase the amount and change the timing of recognizing expenses related to acquisition activities.

Derivative Disclosures: Effective January 1, 2009, the Company adopted SFAS No. 161, Disclosures About Derivative Instruments and Hedging Activities – an amendment of SFAS No. 133, which requires an entity to provide greater transparency about how its derivative and hedging activities affect its financial statements. SFAS No. 161 requires enhanced disclosures about: (i) how and why an entity uses derivative instruments; (ii) how derivative instruments and related hedged items are accounted for under SFAS No. 133; and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations, and cash flows. Since SFAS No. 161 affects only disclosures, it did not impact the Company's financial position, results of operations, or liquidity upon

adoption. Refer to Note 13, "Derivative Instruments and Hedging Activities," for the Company's derivative disclosures.

Disclosures about Pension Plan Assets: Effective January 1, 2009, the Company adopted FSP FAS 132(R)-1, Disclosures about Plan Assets. This FSP requires additional disclosures about plan assets of a defined benefit pension or other postretirement plan. The FSP has two main objectives. First, it requires additional disclosures about major categories of plan assets and concentrations of risk within plan assets. Second, it applies the requirements of SFAS No. 157 to defined benefit plans by requiring disclosure of the inputs and valuation techniques used to measure the fair value of plan assets and the effect of fair value measurements using unobservable inputs on changes in plan assets for the period. Adoption of this FSP affects disclosures only and therefore had no impact on the Company's financial position, results of operations, or liquidity. The adoption of this FSP will impact future annual disclosures related to the Company's defined benefit pension plan.

Earnings Per Share Under Two-Class Method: Effective January 1, 2009, the Company adopted FSP EITF No. 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities. This FSP requires an entity to include participating share-based payment transactions, prior to vesting, in the earnings allocation in computing earnings per share. Participating share-based payment awards are those that contain nonforfeitable rights to dividends, even if granted prior to when an award vests. For the Company, participating share-based payment awards include restricted stock awards that have a right to receive dividends prior to vest. The adoption of this FSP did not have a material impact on the Company's earnings per share computations. Refer to Note 9, "Earnings Per Common Share," for the Company's earnings per share disclosures.

3. SECURITIES

As discussed in Note 2, "Recent Accounting Pronouncements," effective January 1, 2009, the Company adopted new guidance related to the recognition of other-than-temporary impairment. The effect of the adoption as of January 1, 2009 is presented in the table below.

Incremental Effect of Applying FSP FAS 115-2 and FAS 124-2 on Individual Line Items
in the Consolidated Statements of Financial Condition
(Dollar amounts in thousands)

	Before Application of the FSP	Adjustments	After Application of the FSP

Income tax expense on net realized gains	\$ 2,587	\$ (1,801)	\$ 5,794	\$ 137

Trading gains (losses), net (1)	\$ 1,360	\$ 40	\$ 738	\$ (1,380)
---------------------------------	----------	-------	--------	------------

(1) Net trading (losses) gains, representing changes in the fair value of the trading securities portfolio, are included as a component of noninterest income in the Consolidated Statements of Income.

During the first six months of 2008, the Company recorded other-than-temporary impairments (“OTTI”) of \$8.2 million related to five asset-backed collateralized debt obligations (“CDO”). During the first six months of 2009, the Company recorded OTTI of \$7.1 million related to four trust preferred CDOs. FSP FAS 115-2 and FAS 124-2 require that only the credit portion of an OTTI be recognized through income beginning first quarter 2009. In deriving the credit component of the

ranging from LIBOR plus 125 basis points to LIBOR plus 160 basis points. If a decline in fair value below carrying value was not attributable to credit loss and the Company did not intend to sell the security or believe it would be required to sell the security prior to recovery, the Company recorded the decline in fair value in accumulated other comprehensive income.

Changes in the amount of credit losses recognized in earnings on trust preferred CDOs are summarized in the following table.

Changes in Credit Losses Recognized in Earnings
(Dollar amounts in thousands)

	Quarter Ended June 30, 2009	Six Months Ended June 30, 2009
Balance at beginning of period	\$ 9,269	\$ 6,331

Equity securities	-	-	1,376	178	1,376	178
Total	\$ 33,994	\$ 681	\$ 436,338	\$ 72,717	\$ 470,332	\$ 73,398
As of December 31, 2008						
Collateralized mortgage obligations	\$ 27,142	\$ 49	\$ 39,923	\$ 3,065	\$ 67,065	\$ 3,114
	113	1	6,246	73	6,359	74

Other mortgage-backed securities						
State and municipal	144,997	5,783	174,141	7,112	319,138	12,895
Collateralized debt obligations	-	-	28,004	36,797	28,004	36,797
Corporate debt securities	23,092	2,586	-	-	23,092	2,586
Equity securities	-	-	1,065	239	1,065	239
Total	\$ 195,344	\$ 8,419	\$ 249,379	\$ 47,286	\$ 444,723	\$ 55,705

Collateralized mortgage obligations and other mortgage-backed securities are either backed by U.S. Government-owned agencies or issued by U.S. Government-sponsored enterprises. State and municipal securities are issuances by state and municipal authorities, all of which carry investment grade ratings, with the majority supported by third-party insurance. Management does not believe any individual unrealized loss as of June 30, 2009 represents an other-than-temporary impairment. The unrealized losses associated with these securities are not believed to be attributable to credit quality, but rather to changes in interest rates and temporary market movements. In addition, the Company has both the intent and ability to hold the securities with unrealized losses for a period of time necessary to recover the amortized cost, or to maturity and more than likely will not be forced to sell them before recovering its cost basis.

The unrealized loss on CDOs as of June 30, 2009 of \$51.5 million reflects the market's negative bias toward structured investment vehicles given the current interest rate and liquidity environment. The Company does not believe this loss is an other-than-temporary impairment. The Company expects no change in its net cash flows from these investments from what was originally anticipated, and the Company has both the intent and ability to hold them until maturity or recovery and more than likely will not be forced to sell them before recovering its cost basis. The Company's estimation of cash flows for these investments and resulting fair values were based upon its own cash flow modeling in accordance with SFAS No. 157, as described in Note 14, "Fair Value."

4. LOANS

Loan Portfolio (Dollar amounts in thousands)

	June 30, 2009	December 31, 2008
Commercial and industrial	\$ 1,457,413	\$ 1,490,101
Agricultural	210,675	216,814
Commercial real estate:		
Office, retail, and industrial	1,117,748	1,025,241
Residential construction	458,913	509,059
Commercial construction	204,042	258,253
Multi-family	305,976	286,963
Other commercial real estate	880,515	827,651
Consumer	534,303	547,784
Real estate – 1-4 family	171,186	198,197
Total loans	\$ 5,340,771	\$ 5,360,063
Deferred loan fees included in total loans	\$ 8,309	\$ 8,503
Overdrawn demand deposits included in total loans	\$ 4,523	\$ 7,702

The Company primarily lends to small to mid-sized businesses, commercial real estate customers, and consumers in the market areas in which the Company operates. Within these areas, the Company diversifies its loan portfolio by loan type, industry, and borrower.

It is the Company's policy to review each prospective credit in order to determine the appropriateness and, when required, the adequacy of security or collateral to obtain prior to making a loan. In the event of borrower default, the Company seeks recovery in compliance with state lending laws and the Company's lending standards and credit monitoring procedures.

5. RESERVE FOR LOAN LOSSES AND IMPAIRED LOANS

Reserve for Loan Losses (Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Balance at beginning of period	\$ 116,001	\$ 64,780	\$ 93,869	\$ 61,800
Loans charged-off	(24,940)	(4,991)	(52,183)	(11,732)
Recoveries of loans previously charged-off	205	535	1,170	1,196
Net loans charged-off	(24,735)	(4,456)	(51,013)	(10,536)

Provision for loan losses	36,262	5,780	84,672	14,840
Balance at end of period	\$ 127,528	\$ 66,104	\$ 127,528	\$ 66,104

Impaired, Non-accrual, and Past Due Loans
(Dollar amounts in thousands)

	June 30, 2009	December 31, 2008
Impaired loans:		
Impaired loans with valuation reserve required (1)	\$ 81,916	\$ 58,439
Impaired loans with no valuation reserve required	167,138	72,397
Total impaired loans	\$ 249,054	\$ 130,836
Non-accrual loans:		
Impaired loans on non-accrual	\$ 230,177	\$ 123,492
Other non-accrual loans (2)	7,076	4,276
Total non-accrual loans	\$ 237,253	\$ 127,768
Restructured loans	\$ 18,877	\$ 7,344
Loans past due 90 days or more and still accruing interest	\$ 26,071	\$ 36,999
Valuation reserve related to impaired loans	\$ 25,432	\$ 10,177

(1) These impaired loans require a valuation reserve because the estimated value of the loans or related collateral is less than the recorded investment in the loans.

(2) These loans are not considered for impairment since they are part of a small balance, homogeneous portfolio.

The average total recorded investment in impaired loans was \$185.9 million for the six months ended June 30, 2009 and \$19.3 million for the six months ended June 30, 2008. Interest income recognized on impaired loans was \$45,000 for the six months ended June 30, 2009 and \$50,000 for the six months ended June 30, 2008. Interest income recognized on impaired loans is recorded using the cash basis of accounting. As of June 30, 2009, the Company had \$25.8 million of additional funds committed to be advanced in connection with impaired loans.

6. ASSETS HELD FOR SALE

As of June 30, 2009, the Company held 10 parcels of vacant land for sale. The total carrying value of \$1.8 million as of June 30, 2009 is included in premises, furniture, and equipment in the Consolidated Statements of Financial Condition. The Company had no assets classified as held for sale as of December 31, 2008. During first quarter 2009, the Company reviewed all of its vacant properties that are potentially marketable, and elected to place the 10 parcels on the market. The estimated fair value of these parcels is greater than the book value as of June 30, 2009. Therefore, no impairment loss was required to be recognized related to these properties.

7. MATERIAL TRANSACTION AFFECTING STOCKHOLDERS' EQUITY

On March 16, 2009, the Company's Board of Directors announced a reduction in its quarterly common stock dividend from \$0.225 per share to \$0.010 per share. This reduction approximates \$42 million in retained capital over the course of a year.

On May 27, 2009, the Company's Board of Directors announced a quarterly common stock dividend of \$0.010 per share.

8. COMPREHENSIVE INCOME

Comprehensive income is the total of reported net income and all other revenues, expenses, gains, and losses that bypass reported net income under U.S. GAAP. The Company includes the following items, net of tax, in other comprehensive income in the Consolidated Statements of Changes in Stockholders' Equity: changes in unrealized gains or losses on securities available-for-sale, changes in the fair value of derivatives designated under cash flow hedges, and changes in the funded status of the Company's pension plan.

Components of Other Comprehensive Income
(Dollar amounts in thousands)

	Six Months Ended June 30, 2009			Six Months Ended June 30, 2008		
	Before Tax	Tax Effect	Net of Tax	Before Tax	Tax Effect	Net of Tax

	3,981	2,577	4,032	2,376

(1) Represents stock options and common stock warrants for which the exercise price is greater than the average market price of the Company's common stock.

10. PENSION PLAN

Net Periodic Benefit Pension Expense
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Components of net periodic benefit cost:				
Service cost	\$ 2,160	\$ 618	\$ 3,363	\$ 1,516
Interest cost	2,148	488	3,343	1,197
Expected return on plan assets	(2,995)	(610)	(4,662)	(1,497)
Recognized net actuarial loss	346	139	539	342
Amortization of prior service cost	3	-	4	1
Net periodic cost	\$ 1,662	\$ 635	\$ 2,587	\$ 1,559

The Company contributed \$8.0 million to its pension plan in April 2009.

11. INCOME TAXES

Income Tax Expense
(Dollar amounts in thousands)

Quarters Ended June 30, Six Months Ended June 30,

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

	2009	2008	2009	2008
(Loss) income before income tax				
(benefit) expense	\$ (3,710)	\$ 27,024	\$ (7,524)	\$ 57,140
Income tax (benefit) expense:				
Federal income tax (benefit) expense	\$ (5,803)	\$ 4,104	\$ (10,794)	\$ 11,054
State income tax (benefit)	(570)	(4,077)	(5,120)	(5,949)
Total income tax (benefit) expense	\$ (6,373)	\$ 27	\$ (15,914)	\$ 5,105
Effective income tax rate	N/M	0.1 %	N/M	8.9 %

N/M – Not meaningful.

Federal income tax expense, and the related effective income tax rate, is primarily influenced by the amount of tax-exempt income derived from investment securities and bank owned life insurance (“BOLI”) in relation to pre-tax income. State income tax expense, and the related effective tax rate, is influenced by the amount of state tax-exempt income in relation to pre-tax income, and state tax rules relating to consolidated/combined reporting and sourcing of income and expense.

The decrease in income tax expense from second quarter 2008 to second quarter 2009 was primarily attributable to a decrease in federal income tax resulting from the decrease in pre-tax income for those periods. This decrease was partially offset by \$4.9 million in state income tax benefits recorded in second quarter 2008 under FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes (“FIN 48”).

Income tax expense for the first six months of 2009 decreased in comparison to the same period in 2008 due to a decrease in federal income tax resulting from the decrease in pre-tax income. State tax benefits decreased during this time, reflecting the net effect of recording state income tax benefits totaling \$4.1 million in first quarter 2009 and \$4.9 million in second quarter 2008 (as referenced above) under FIN 48.

12. COMMITMENTS, GUARANTEES, AND CONTINGENT LIABILITIES

Credit Extension Commitments and Guarantees

In the normal course of business, the Company enters into a variety of financial instruments with off-balance sheet risk to meet the financing needs of its customers, to reduce its exposure to fluctuations in interest rates, and to conduct lending activities. These instruments principally include commitments to extend credit, standby letters of credit, and commercial letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Statements of Financial Condition.

Contractual or Notional Amounts of Financial Instruments (Dollar amounts in thousands)

	June 30, 2009	December 31, 2008
Commitments to extend credit:		
Home equity lines	\$278,135	\$293,221
Credit card lines to businesses	24,139	12,417
1-4 family real estate construction	67,054	87,050
Commercial real estate	195,047	286,368
All other commitments	745,601	844,226
Letters of credit:		
1-4 family real estate construction	20,615	21,301
Commercial real estate	36,066	35,536
All other	79,242	89,175
Recourse on assets securitized	9,075	9,344

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party and are most often issued in favor of a municipality where construction is taking place to ensure the borrower adequately completes the construction.

The maximum potential future payments guaranteed by the Company under standby letters of credit arrangements are equal to the contractual amount of the commitment. The unamortized fees associated with the Company's standby letters of credit, which are included in other liabilities in the Consolidated Statements of Financial Condition, totaled \$756,000 as of June 30, 2009 and \$700,000 as of December 31, 2008. The Company will amortize these amounts into income over the commitment period. As of June 30, 2009, standby letters of credit had a remaining weighted-average term of approximately 13.6 months, with remaining actual lives ranging from less than one year to 6.0 years. If a commitment is funded, the Company may seek recourse through the liquidation of the underlying collateral provided including real estate, physical plant and property, marketable securities, or cash.

Pursuant to the securitization of certain 1-4 family mortgage loans in fourth quarter 2004, the Company is obligated by agreement to repurchase at recorded value any non-performing loans, defined as loans past due greater than 90 days. During the six months ended June 30, 2008, the Company repurchased \$686,000 of non-performing loans and charged-off \$28,000 related to those loans. In second quarter 2009, the Company received \$183,000 in satisfaction for one of the loans

repurchased in 2008. During the first six months of 2009, the Company was not required to repurchase any of these loans, but charged-off \$66,000 related to a loan repurchased in 2008. The aggregate outstanding balance of securitized loans subject to this recourse obligation was \$9.1 million as of June 30, 2009 and \$9.3 million as of December 31, 2008. Per its agreement, the Company's recourse obligations will end on November 30, 2011. The carrying value of the Company's recourse liability, which is included in other liabilities in the Consolidated Statements of Financial Condition, totaled approximately \$150,000 as of June 30, 2009 and December 31, 2008.

Legal Proceedings

As of June 30, 2009, there were certain legal proceedings pending against the Company and its subsidiaries in the ordinary course of business. The Company does not believe that liabilities, individually or in the aggregate, arising from these proceedings, if any, would have a material adverse effect on the consolidated financial condition of the Company as of June 30, 2009.

13. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Accounting Policy for Derivative Financial Instruments

In the ordinary course of business, the Company enters into derivative transactions as part of its overall interest rate risk management strategy to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. All derivative instruments are recorded at fair value as either other assets or other liabilities. Subsequent changes in a derivative's fair value are recognized in earnings unless specific hedge accounting criteria are met.

On the date the Company enters into a derivative contract, it designates the derivative instrument as either a fair value hedge, cash flow hedge, or as a non-hedge derivative instrument. Derivative instruments designated in a hedge relationship to mitigate exposure to changes in the fair value of an asset or liability attributable to a particular risk, such as interest rate risk, are considered to be fair value hedges. Derivative instruments designated in a hedge relationship to mitigate exposure to variability in expected future cash flows to be received or paid related to an asset or liability or other types of forecasted transactions are considered to be cash flow hedges. The Company formally documents all relationships between hedging instruments and hedged items as well as its risk management objective and strategy for undertaking each hedge transaction.

For effective derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative instrument, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in current earnings during the period of the change in fair values. For derivative instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income. The unrealized gain or loss is reclassified into earnings in the same period or periods during which the hedged transaction affects earnings (for example, when a hedged item is terminated or redesignated). For all hedge relationships, derivative gains and losses not effective in hedging the change in fair value or expected cash flows of the hedged item are recognized immediately in current earnings during the period of change.

At the hedge's inception and at least quarterly thereafter, a formal assessment is performed to determine whether changes in the fair values or cash flows of the derivative instruments have been highly effective in offsetting changes in the fair values or cash flows of the hedged item and whether they are expected to be highly effective in the future. If a derivative instrument designated as a hedge is terminated or ceases to be highly effective, hedge accounting is discontinued prospectively and the gain or loss is amortized to earnings. For fair value hedges, the gain or loss is amortized over the remaining life of the hedged asset or liability. For cash flow hedges, the gain or loss is amortized over the same period(s) that the forecasted hedged transactions impact earnings. If the hedged item is disposed of, or

the forecasted transaction is no longer probable, any fair value adjustments are included in the gain or loss from the disposition of the hedged item. In the case of a forecasted transaction that is no longer probable, the gain or loss is included in earnings immediately.

Hedging Strategy

The Company maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. The Company usually designates derivative instruments used to manage interest rate risk into hedge relationships with the specific assets, liabilities, or cash flows being hedged. Some derivative instruments used for interest rate risk management may not be designated as part of a hedge relationship if the derivative instrument has been moved out of a hedge relationship because the hedge was deemed not effective or if operational or cost constraints make it prohibitive to apply hedge accounting.

Management uses derivative instruments to protect against the risk of interest rate movements on the value of certain assets and liabilities and on future cash flows. The derivative instruments the Company primarily uses are interest rate swaps with indices that relate to the pricing of specific assets and liabilities. The nature and volume of the derivative instruments used to manage interest rate risk depend on the level and type of assets and liabilities held and the risk management strategies for the current and anticipated interest rate environment.

As with any financial instrument, derivative instruments have inherent risks, primarily market and credit risk. Market risk is the adverse effect a change in interest rates, currency, equity prices, or implied volatility has on the value of a financial instrument. Market risk associated with changes in interest rates is managed by establishing and monitoring limits as to the degree of risk that may be undertaken as part of the Company's overall market risk monitoring process, which includes the use of net interest income and economic value of equity simulation methodologies. This process is carried out by the Company's Asset Liability Management Committee. See further discussion of this process in Item 3, "Quantitative and Qualitative Disclosures About Market Risk," of this Form 10-Q.

Fair Value Hedges - During 2008 and 2009, the Company hedged the fair value of fixed rate commercial real estate loans through the use of pay fixed, receive variable interest rate swaps. In 2008, the Company also hedged the fair value of fixed rate, junior subordinated debentures through the use of pay variable, receive fixed interest rate swaps.

Derivative contracts are valued using observable market prices, if available, or cash flow projection models acquired from third parties. Pricing models used for valuing derivative instruments are regularly validated by testing through comparison with other third parties. The valuations and expected lives presented in the following table are based on yield curves, forward yield curves, and implied volatilities that were observable in the cash and derivatives markets on June 30, 2009 and December 31, 2008.

Other Derivative Activities - The Company had no other derivative instruments as of June 30, 2009 or December 31, 2008. The Company does not enter into derivative transactions for purely speculative purposes.

Interest Rate Derivatives Portfolio
(Dollar amounts in thousands)

	June 30, 2009		December 31, 2008	
Fair Value Hedges				
Related to fixed rate commercial loans				
Notional amount outstanding	\$19,498		\$19,982	
Weighted-average interest rate received	2.23	%	3.16	%
Weighted-average interest rate paid	6.40	%	6.39	%
Weighted-average maturity (in years)	8.27		8.76	
Derivative liability fair value	\$(1,335))	\$(2,628))

	Quarters Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Gains (losses) on hedged items recognized in noninterest income:	\$	\$	\$	\$
Gains (losses) on swaps	1,045	444	1,293	14
(Losses) gains on loans	(1,045)	(446)	(1,298)	(6)
Net hedge ineffectiveness (1)	\$ -	\$ (2)	\$ (5)	\$ 8
Gains recognized in net interest income (2)	\$ 40	\$ 39	\$ 80	\$ 45

- (1) Included in other noninterest income in the Consolidated Statements of Income.
- (2) The gain represents the fair value adjustments on discontinued fair value hedges in connection with our subordinated fixed rate debt that are being amortized through earnings over the remaining life of the hedged item (debt). In addition to these amounts, interest accruals on fair value hedges are also reported in net interest income.

Credit Risk

Credit risk occurs when the counterparty to a derivative contract with an unrealized gain fails to perform according to the terms of the agreement. Credit risk is managed by limiting the aggregate amount of net unrealized gains in agreements

outstanding, monitoring the size and the maturity structure of the derivatives, applying uniform credit standards maintained for all activities with credit risk, and collateralizing gains. The Company maintains a policy limiting credit exposure to any one counterparty to not more than 2.5% of stockholders' equity. In addition, the Company has established bilateral collateral agreements with its major derivative dealer counterparties that provide for exchanges of marketable securities or cash to collateralize either party's net gains above an agreed-upon minimum threshold. On June 30, 2009, these collateral agreements covered 100% of the fair value of the Company's interest rate swaps outstanding. Net losses with counterparties must be collateralized with either cash or U.S. Government and U.S. Government-sponsored agency securities. The Company pledged cash of \$2.7 million as of both June 30, 2009 and December 31, 2008 to collateralize net losses with counterparties. No other collateral was required to be pledged as of June 30, 2009 or December 31, 2008.

As of June 30, 2009 and December 31, 2008, all of the Company's derivative instruments contained provisions that require the Company's debt to remain above a certain credit rating by each of the major credit rating agencies. If the Company's debt were to fall below that credit rating, it would be in violation of those provisions, and the counterparties to the derivative instruments could terminate the swap transaction and demand cash settlement of the derivative instrument.

14. FAIR VALUE

The Company measures, monitors, and discloses certain of its assets and liabilities on a fair value basis. Fair value is used on a recurring basis to account for trading securities, securities available-for-sale, mortgage servicing rights, derivative assets, and derivative liabilities. In addition, fair value is used on a non-recurring basis to apply lower-of-cost-or-market accounting to other real estate owned ("OREO"); evaluate assets or liabilities for impairment, including collateral-dependent impaired loans, goodwill, and other intangibles; and for disclosure purposes. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company measures fair value in accordance with FASB Statement No. 157, Fair Value Measurements ("SFAS No. 157"). SFAS No. 157 was effective for the Company on January 1, 2008 for financial assets and liabilities and on January 1, 2009 for non-financial assets and liabilities. Depending upon the nature of the asset or liability, the Company uses various valuation techniques and input assumptions when estimating fair value, all of which are in accordance with SFAS No. 157.

SFAS No. 157 requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value into three broad levels based on the reliability of the input assumptions. The hierarchy gives the highest priority to level 1 measurements and the lowest priority to level 3 measurements. The three levels of the fair value hierarchy are defined as follows:

- Level 1 – Unadjusted quoted prices for identical assets or liabilities traded in active markets.
- Level 2 – Observable inputs other than level 1 prices, such as quoted prices for similar instruments; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The categorization of where an asset or liability falls within the hierarchy is based on the lowest level of input that is significant to the fair value measurement.

Assets and Liabilities Measured at Fair Value

The following table provides the hierarchy level and fair value for each major type of assets and liabilities measured at fair value as of June 30, 2009.

Fair Value Measurements
(Dollar amounts in thousands)

	June 30, 2009				
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)		Total
Assets and liabilities measured at fair value on a recurring basis					
Assets:					
Trading securities	\$ 12,203	\$ -	\$ -		\$ 12,203
Securities available-for-sale:					
Collateralized mortgage obligations (1)	-	387,419	-		387,419
Other mortgage-backed securities (1)	-	212,030	16,222		228,252
State and municipal securities	-	757,985	-		757,985
Collateralized debt obligations	-	-	20,315		20,315
Corporate debt securities	-	32,307	-		32,307
Equity securities	18,668	5,136	-		23,804
Total securities available-for-sale	18,668	1,394,877	36,537		1,450,082
Mortgage servicing rights (2)	-	-	1,005		1,005
Total assets	\$ 30,871	\$ 1,394,877	\$ 37,542		\$ 1,463,290
Liabilities:					
Derivative liabilities (2)	\$ -	\$ 1,335	\$ -		\$ 1,335
Assets measured at fair value on a non-recurring basis					
Collateral-dependent impaired loans (3)	\$ -	\$ -	\$ 64,565		\$ 64,565
Other real estate owned (4)	-	-	50,640		50,640
Total assets	\$ -	\$ -	\$ 115,205		\$ 115,205

(1) These securities are backed by residential mortgages.

(2) Mortgage servicing rights are included in other assets, and derivative liabilities are included in other liabilities in the Consolidated Statements of Financial Condition.

(3) Represents the carrying value of loans for which adjustments are based on the appraised or market-quoted value of the collateral.

(4) Represents the estimated fair value, net of selling costs, based on appraised value.

Valuation Methodology

The following describes the valuation methodologies used by the Company for assets and liabilities measured at fair value, including the general classification of the assets and liabilities pursuant to the valuation hierarchy.

Trading Securities – Trading securities represent diversified investment securities held in a grantor trust under deferred compensation arrangements in which plan participants may direct amounts earned to be invested in securities other than Company common stock. Trading securities are reported at fair value, with unrealized gains and losses included in noninterest income. The fair value of trading securities is based on quoted market prices in active exchange markets and, therefore, is classified in level 1 of the valuation hierarchy.

Securities Available-for-Sale – Substantially all available-for-sale securities are fixed income instruments that are not quoted on an exchange, but may be traded in active markets. The fair value of these securities is based on quoted market prices obtained from external pricing services or dealer market participants where trading in an active market exists. In obtaining such data from external pricing services, the Company has evaluated the methodologies used to develop the fair values in order to determine whether such valuations are representative of an exit price in the Company’s principal markets. The Company’s principal markets for its securities portfolio are the secondary institutional markets, with an exit price that is based on bid level pricing in those markets. Examples of such securities measured at fair value are U.S. Treasury and Agency securities, municipal bonds, collateralized mortgage obligations, and other mortgage-backed securities. These securities are generally classified in level 2 of the valuation hierarchy. In certain cases where there is limited activity or less transparency

for inputs to the valuation, securities are classified in level 3 of the valuation hierarchy. For instance, in the valuation of certain collateralized mortgage and debt obligations and high-yield debt securities, the determination of fair value may require benchmarking to similar instruments or analyzing default and recovery rates.

Due to the illiquidity in the secondary market for the Company's seven trust-preferred CDOs, especially since the disruption in the credit markets, the Company determined that dealer quotes did not reflect the best estimate of fair value. Therefore, the Company, with the assistance of two structured credit valuation firms, estimated the value of these securities using discounted cash flows and has classified these investments in level 3 of the valuation hierarchy.

The valuation for each of the seven CDOs relies on independently verifiable historical financial data. The valuation firm performs a credit analysis of each of the entities comprising the collateral underlying each CDO in order to estimate the likelihood of default by any of these entities on their trust-preferred obligation. Cash flows are modeled based upon the contractual terms of the CDO, discounted to their present values, and used to derive the estimated fair value of the individual CDO, as well as any credit loss or impairment.

The component of loss for any CDO that is deemed to be an other-than-temporary impairment, if any, is determined by comparing the current amortized cost to the discounted cash flows for each CDO using each CDO's specific contractual yield. The contractual yields for these CDOs range from the London Interbank Offered Rate ("LIBOR") plus 125 to 160 basis points.

The fair value for each CDO is determined by discounting the estimated cash flows by a rate ranging from LIBOR plus 1,000 to 1,500 basis points, depending upon the specific CDO. The discount rate used is intended to reflect the higher risk inherent in these securities given the current market. Currently, four of these CDOs are deferring interest payments. The Company has ceased accruing interest on these securities.

Carrying Value of Level 3 Securities Available-for-Sale
(Dollar amounts in thousands)

	Quarter Ended June 30, 2009			Six Months Ended June 30, 2009		
	Other Mortgage- Backed Securities	Collateralized Debt Obligations	Total	Other Mortgage- Backed Securities	Collateralized Debt Obligations	Total
Balance at beginning of period	\$ 16,287	\$ 34,527	\$ 50,814	\$ 16,632	\$ 42,086	\$ 58,718
Total losses:						
Included in earnings (1)	-	(4,133)	(4,133)	-	(7,071)	(7,071)
Included in other comprehensive loss	58	(10,079)	(10,021)	316	(14,677)	(14,361)
Purchases, sales, issuances, and settlements	(123)	-	(123)	(726)	(23)	(749)
Balance at end of period	\$ 16,222	\$ 20,315	\$ 36,537	\$ 16,222	\$ 20,315	\$ 36,537
Change in unrealized losses recognized in earnings relating to securities still held at end of period	\$-	\$ (4,133)	\$(4,133)	\$-	\$ (7,071)	\$(7,071)

(1)Included in securities gains, net in the Consolidated Statements of Income.

In the table above, the net losses recognized in earnings represent non-cash impairment charges recognized on certain CDOs that were deemed to be other-than-temporarily impaired.

Mortgage Servicing Rights – The Company records its mortgage servicing rights at fair value in accordance with SFAS No. 156, Accounting for Servicing of Financial Assets, an amendment of SFAS No. 140. Mortgage servicing rights do not trade in an active market with readily observable prices. Accordingly, the Company determines the fair value of mortgage servicing rights by estimating the present value of the future cash flows associated with the mortgage loans being serviced. Mortgage servicing rights are included in other assets in the Consolidated Statements of Financial Condition. Key economic assumptions used in measuring the fair value of mortgage servicing rights include weighted-average prepayment speeds and weighted-average discount rates. While market-based data is used to determine the input assumptions, the Company

incorporates its own estimates of assumptions market participants would use in determining the fair value of mortgage servicing rights and classifies them in level 3 of the valuation hierarchy.

Carrying Value of Mortgage Servicing Rights
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Balance at beginning of period	\$1,284	\$1,799	\$1,461	\$1,877
Total (losses) gains included in earnings (1):				
Due to changes in valuation inputs and assumptions (2)	(179)	(71)	(276)	(54)
Other changes in fair value (3)	(100)	(96)	(180)	(191)
Balance at end of period	\$1,005	\$1,632	\$1,005	\$1,632
Contractual servicing fees earned during the period (1)	\$78	\$100	\$163	\$205

(1) Included in other service charges, commissions, and fees in the Consolidated Statements of Income.

(2) Principally reflects changes in prepayment speed assumptions.

(3) Primarily represents changes in expected cash flows over time due to payoffs and paydowns.

Derivative Assets and Derivative Liabilities – The interest rate swaps entered into by the Company are executed in the dealer market and priced based on market quotes obtained from the counterparty that transacted the derivative contract. The market quotes were developed by the counterparty using market observable inputs, which primarily include LIBOR for swaps. As the fair value estimates for interest rate swaps are primarily based on LIBOR, which is a market observable input, derivatives are classified in level 2 of the valuation hierarchy. For its derivative assets and liabilities, the Company also considers non-performance risk, including the likelihood of default by itself and its counterparties, when evaluating whether the market quotes from the counterparty are representative of an exit price. The Company has a policy of executing derivative transactions only with counterparties above a certain credit rating. Credit risk is also mitigated through the pledging of collateral when certain thresholds are reached. The likelihood of the Company’s default is considered remote and its credit rating has remained stable over the past recent history. For these reasons, non-performance risk is considered extremely low, and accordingly, any such credit risk adjustments to the Company’s derivative assets and liabilities would be immaterial.

Collateral-Dependent Impaired Loans – The carrying value of impaired loans is disclosed in Note 5, “Reserve for Loan Losses and Impaired Loans.” The Company does not record loans at fair value on a recurring basis. However, from time to time, fair value adjustments are recorded on these loans to reflect (1) partial write-downs that are based on the current appraised or market-quoted value of the underlying collateral or (2) the full charge-off of the loan carrying value. In some cases, the properties for which market quotes or appraised values have been obtained are located in areas where comparable sales data is limited, outdated, or unavailable. Accordingly, fair value estimates, including those obtained from real estate brokers or other third-party consultants, for collateral-dependent impaired loans are classified in level 3 of the valuation hierarchy.

In accordance with the provisions of SFAS No. 114, during the first six months of 2009 collateral-dependent impaired loans with a carrying value of \$128.0 million, less transfers to OREO of \$30.0 million, were written down to their fair value of \$64.6 million, resulting in a provision for loan losses of \$33.4 million, which was included in earnings.

Other Real Estate Owned – OREO includes properties acquired in partial or total satisfaction of certain loans. Properties are recorded at the lower of the recorded investment in the loans for which the properties previously served

as collateral or the fair value, which represents the estimated sales price of the properties on the date acquired less estimated selling costs. Any write-downs in the carrying value of a property at the time of acquisition are charged against the reserve for loan losses. Management periodically reviews the carrying value of OREO properties. Any write-downs of the properties subsequent to acquisition, as well as gains or losses on disposition and income or expense from the operations of OREO, are recognized in operating results in the period they occur. Fair value is generally based on third party appraisals and internal estimates and is therefore considered a Level 3 valuation.

During the first six months of 2009, OREO properties with a carrying value of \$18.4 million were written down to their fair value of \$15.2 million, resulting in a charge to earnings of \$2.3 million and a charge to the reserve for loan losses of \$884,000.

Goodwill and Other Intangible Assets – Goodwill represents the excess of purchase price over the fair value of net assets acquired using the purchase method of accounting. Other intangible assets represent purchased assets that also lack physical substance but can be distinguished from goodwill because of contractual or other legal rights or because the asset is capable of being sold or exchanged either on its own or in combination with a related contract, asset, or liability.

Goodwill and other intangible assets are subject to impairment testing, which requires a significant degree of management judgment. Goodwill is tested at least annually for impairment or more often if events or circumstances between annual tests indicate that there may be impairment. The testing is performed using the market capitalization method and, if necessary, by comparing the carrying value of goodwill with the anticipated future cash flows.

Identified intangible assets that have a finite useful life are amortized over that life in a manner that reflects the estimated decline in the economic value of the identified intangible asset. Identified intangible assets that have a finite useful life are reviewed annually to determine whether there have been any events or circumstances to indicate that the recorded amount is not recoverable from projected undiscounted net operating cash flows.

The annual test of goodwill and identified intangible assets performed as of October 1, 2008 did not indicate that an impairment charge was required. Additional goodwill impairment testing was conducted in first quarter 2009, when general economic conditions deteriorated significantly and the Company experienced a substantial decline in market capitalization. The additional testing did not indicate that an impairment charge was required. The Company assessed whether there were any indicators of impairment in second quarter 2009 and concluded that additional impairment testing was not required.

If the testing had resulted in impairment, the Company would have classified goodwill and other intangible assets subjected to nonrecurring fair value adjustments as Level 3. Additional information regarding goodwill, other intangible assets, and impairment policies can be found in Note 7 of “Notes to Consolidated Financial Statements” in Item 8 of the Company’s 2008 10-K.

Fair Value Disclosure of Other Assets and Liabilities

U.S. GAAP requires disclosure of the estimated fair values of certain financial instruments, both assets and liabilities, on and off-balance sheet, for which it is practical to estimate the fair value. Because the estimated fair values provided herein exclude disclosure of the fair value of certain other financial instruments and all non-financial instruments, any aggregation of the estimated fair value amounts presented would not represent the underlying value of the Company. Examples of non-financial instruments having significant value include the future earnings potential of significant customer relationships and the value of the Company’s trust division operations and other fee-generating businesses. In addition, other significant assets including property, plant, and equipment and goodwill are not considered financial instruments and, therefore, have not been valued.

Various methodologies and assumptions have been utilized in management’s determination of the estimated fair value of the Company’s financial instruments, which are detailed below. The fair value estimates are made at a discrete point in time based on relevant market information. Because no market exists for a significant portion of these financial instruments, fair value estimates are based on judgments regarding future expected economic conditions, loss experience, and risk characteristics of the financial instruments. These estimates are subjective, involve uncertainties, and cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

In addition to the valuation methodology explained above for financial instruments recorded at fair value, the following methods and assumptions were used in estimating the fair value of financial instruments that are carried at cost in the Consolidated Statements of Financial Condition.

Short-Term Financial Assets and Liabilities – For financial instruments with a shorter-term or with no stated maturity, prevailing market rates, and limited credit risk, the carrying amounts approximate fair value. Those financial instruments include cash and due from banks, funds sold and other short-term investments, mortgages held for sale, bank owned life insurance, accrued interest receivable, and accrued interest payable.

Securities Held-to-Maturity - The fair value of securities held-to-maturity is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Loans - The fair value of loans was estimated using present value techniques by discounting the future cash flows of the remaining maturities of the loans, and, when applicable, prepayment assumptions were considered based on historical experience and current economic and lending conditions. The discount rate was based on the LIBOR yield curve, with rate adjustments for liquidity and credit risk. The primary impact of credit risk on the present value of the loan portfolio, however,

was accommodated through the use of the reserve for loan losses, which is believed to represent the current fair value of probable incurred losses for purposes of the fair value calculation.

Deposit Liabilities - The fair values disclosed for demand deposits, savings deposits, NOW accounts, and money market deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The fair value for fixed-rate time deposits was estimated using present value techniques by discounting the future cash flows based on the LIBOR yield curve, plus or minus the spread associated with current pricing.

Borrowed Funds - The fair value of repurchase agreements and FHLB advances is estimated by discounting the agreements based on maturities using the rates currently offered for repurchase agreements of similar remaining maturities. The carrying amounts of federal funds purchased, federal term auction facilities, and other borrowed funds approximate their fair value due to their short-term nature.

Subordinated Debt - The fair value of subordinated debt was determined using available market quotes.

Standby Letters of Credit - The fair value of standby letters of credit represent deferred fees arising from the related off-balance sheet financial instruments. These deferred fees approximate the fair value of these instruments and are based on several factors, including the remaining terms of the agreement and the credit standing of the customer.

Commitments - Given the limited interest rate exposure posed by the commitments outstanding at year-end due to their general variable nature, combined with the general short-term nature of the commitment periods entered into, termination clauses provided in the agreements, and the market rate of fees charged, the Company has estimated the fair value of commitments outstanding to be immaterial.

15. SUBSEQUENT EVENTS

We have evaluated subsequent events through the date our financial statements were issued, or August 10, 2009. We do not believe any subsequent events have occurred that would require further disclosure or adjustment to our financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

The discussion presented below provides an analysis of our results of operations and financial condition for the quarters ended June 30, 2009 and 2008. When we use the terms "First Midwest," the "Company," "we," "us," and "our," mean First Midwest Bancorp, Inc., a Delaware Corporation, and its consolidated subsidiaries. When we use the term "Bank," we are referring to our wholly-owned banking subsidiary, First Midwest Bank. Management's discussion and analysis should be read in conjunction with the consolidated financial statements and accompanying notes presented elsewhere in this report, as well as in our 2008 Annual Report on Form 10-K ("2008 10-K"). Results of operations for the quarter and six months ended June 30, 2009 are not necessarily indicative of results to be expected for the year ending December 31, 2009. Unless otherwise stated, all earnings per common share data included in this section and throughout the remainder of this discussion are presented on a diluted basis.

PERFORMANCE OVERVIEW

General Overview

Our banking network provides a full range of business and retail banking and trust and advisory services through 94 banking branches, one operational facility, and one dedicated lending office primarily in suburban metropolitan Chicago. The primary sources of our revenue are net interest income and fees from financial services provided to customers. Business volumes tend to be influenced by overall economic factors including market interest rates, business spending, consumer confidence, and competitive conditions within the marketplace.

- (1) All ratios are presented on an annualized basis.
- (2) For a further discussion of this industry-wide special deposit assessment, see the section titled “Noninterest Expense” of this Form 10-Q.
- (3) The Company’s accounting and reporting policies conform to U.S. generally accepted accounting principles (“GAAP”) and general practice within the banking industry. As a supplement to GAAP, the Company has provided this non-GAAP performance result. The Company believes that this non-GAAP financial measure is useful because it allows investors to assess the Company’s operating performance. Although this non-GAAP financial measure is intended to enhance investors’ understanding of the Company’s business and performance, this non-GAAP financial measure should not be considered an alternative to GAAP.

Highlights					
Total assets	\$ 7,767,312	\$ 8,528,341	\$ 8,311,025	\$ (761,029)	\$ (543,713)
Total loans	5,340,771	5,360,063	5,182,355	(19,292)	158,416
Total deposits	5,766,656	5,585,754	5,785,163	180,902	(18,507)
Transactional deposits	3,778,879	3,457,954	3,684,976	320,925	93,903
Loans to deposits ratio	92.6%	96.0%	89.6%		
Transaction deposits to total deposits	65.5%	61.9%	63.7%		

Net income was \$2.7 million, before adjustment for preferred dividends and non-vested restricted shares, with \$63,000 available to common shareholders after such adjustments compared to income of \$27.0 million for second quarter 2008. We recorded a loss before taxes of \$3.7 million for second quarter 2009 compared to income of \$27.0 million for second quarter 2008, with the difference largely due to higher provision for loan losses, partially offset by an increase in net securities gains. Provision for loan losses for second quarter 2009 was \$36.3 million compared to \$5.8 million for second quarter 2008. Pre-tax earnings, excluding the provision for loan losses, net market-related gains, and FDIC special deposit insurance assessment from each period, were \$29.4 million for second quarter 2009 and \$37.4 million for second quarter 2008, with the decline substantially due to increases in operating expenses of \$2.9 million incurred to remediate loans and maintain other real estate owned, a \$2.6 million reversal of year to date interest accrued on loans placed on non-accrual, and a \$2.3 million increase in FDIC deposit insurance assessment apart from the special assessment noted above.

Performance for the quarter reflected the execution of a number of planned steps taken to strengthen the overall company and navigate what remains a very difficult operating environment. We increased loan loss reserves by \$11.5 million to 2.39% of total loans, restructured an additional \$21.3 million in delinquent loans, reduced early stage delinquencies by nearly 30%, and held total non-accrual loans, including loans past due 90 days or more, at essentially the March 31, 2009 level. Concurrently, we took advantage of market conditions to sell securities at a net gain and redeploy other assets that, in combination, enabled us to improve our key capital ratios.

We continued to generate solid core operating results due to strong net interest margins, an efficient operating model, a sizable and increasing core deposit base, and a flexible balance sheet that provided considerable liquidity. As noted above, this performance enabled us to absorb a significant increase in loan loss provisioning, higher credit remediation costs, and the FDIC deposit insurance assessment and, at the same time, strengthen our overall capital position.

Loans outstanding at June 30, 2009 were \$5.3 billion, an increase of \$158.4 million from prior year. For the same 12-month period, average transactional deposits increased \$87.4 million to \$3.7 billion. The increase in transactional deposits was due largely to growth in money market account balances.

Tax-equivalent net interest margin remained solid at 3.53% for second quarter 2009. While down slightly from second quarter 2008, the year-to-date 2009 margin was elevated from the same period of 2008.

Fee-based revenues for the quarter and six-month periods ended June 30, 2009 decreased from the same periods in 2008, and reflected the impact of lower transaction volumes caused by reduced consumer spending on overdraft fees as well as card-based fees. Though trust and advisory fees also declined from the same periods in 2008, on a linked-quarter basis, assets under management as of June 30, 2009 increased by \$260.8 million from March 31, 2009.

Although noninterest expense for the quarter and six-month periods ended June 30, 2009 increased \$9.3 million and \$8.3 million, respectively, from the same periods in 2008, over half the increase for each period was due to higher FDIC deposit premium assessments, including a special industry-wide assessment. The remainder was due to higher expenses associated with other real estate owned and loan remediation costs.

Net securities gains of \$10.7 million from sales of mortgage-backed and municipal securities more than offset impairment charges of \$4.1 million associated with four trust-preferred collateralized debt obligations.

EARNINGS PERFORMANCE

Net Interest Income

Net interest income equals the difference between interest income plus fees earned on interest-earning assets and interest expense incurred on interest-bearing liabilities. The level of interest rates and the volume and mix of interest-earning assets and interest-bearing liabilities impact net interest income. Net interest margin represents net interest income as a percentage of total average interest-earning assets. The accounting policies underlying the recognition of interest income on loans, securities, and other interest-earning assets are included in the “Notes to Consolidated Financial Statements” contained in our 2008 10-K.

Our accounting and reporting policies conform to U.S. generally accepted accounting principles (“GAAP”) and general practice within the banking industry. For purposes of this discussion, both net interest income and net interest margin have been adjusted to a fully tax-equivalent basis to more appropriately compare the returns on certain tax-exempt loans and securities to those on taxable interest-earning assets. Although we believe that these non-GAAP financial measures enhance investors’ understanding of our business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The effect of such adjustment is presented in the following table.

Table 2
Effect of Tax-Equivalent Adjustment
(Dollar amounts in thousands)

	Quarters Ended June 30,			Six Months Ended June 30,		
	2009	2008	% Change	2009	2008	% Change
Net interest income (GAAP)	\$ 60,391	\$ 60,326	0.1	\$ 124,610	\$ 118,826	4.9
Tax-equivalent adjustment	5,091	5,603	(9.1)	10,519	11,157	(5.7)
Tax-equivalent net interest income	\$ 65,482	\$ 65,929	(0.7)	\$ 135,129	\$ 129,983	4.0

Table 3 summarizes changes in our average interest-earning assets and interest-bearing liabilities as well as interest income and interest expense related to each category of assets and funding sources and the average interest rates earned and paid on each. The table also shows the trend in net interest margin on a quarterly basis for 2009 and 2008, including the tax-equivalent yields on interest-earning assets and rates paid on interest-bearing liabilities. Table 3 also details increases in income and expense for each of the major categories of interest-earning assets and analyzes the extent to which such variances are attributable to volume and rate changes. Interest income and yields are presented on a tax-equivalent basis assuming a federal income tax rate of 35%, which includes the tax-equivalent adjustment as presented in Table 2 above.

Tax-equivalent net interest margin was 3.53% for second quarter 2009, down 14 basis points from 3.67% for first quarter 2009 and 5 basis points from 3.58% for second quarter 2008. During second quarter 2009, we placed loans on non-accrual status and accordingly reversed interest accrued to date of \$2.6 million. Excluding this adjustment, second quarter net margin would have been approximately 3.67%.

For the six months ended June 30, 2009, tax-equivalent net interest margin was 3.60% up 5 basis points from 3.55% for first six months of 2008. As of June 30, 2009, our loan-to-deposit ratio is 92.6%, with nearly two-thirds of our customer deposits consisting of demand, NOW, money market, and savings transactional accounts.

Second quarter and year-to-date 2009 net interest margins reflect our strong core deposit base and our ability to effectively manage our cost of funds. With approximately one-half of our loan portfolio tied to floating indices, the 175 basis point decline in the Federal Reserve's federal funds rate during fourth quarter 2008 resulted in declines in second quarter and year-to-date average yields of 95 basis points and 106 basis points, respectively, compared to the same periods in 2008. This negative impact was substantially offset by a shift in funding toward less expensive transactional deposits. As a result, the rates paid on interest-bearing liabilities for second quarter and year-to-date 2009 declined 100 basis points and 124 basis points, respectively, compared to the same periods in 2008.

As shown in Table 3, second quarter 2009 tax-equivalent interest income declined \$16.7 million compared to second quarter 2008. The increase in interest-earning assets increased interest income by \$1.6 million, while a decline in the average rate earned on interest-earning assets reduced interest income by \$18.3 million. Second quarter 2009 interest expense declined \$16.2 million compared to second quarter 2008. The decrease in interest-bearing liabilities decreased interest expense by \$1.5

million, and the shift to less expensive wholesale borrowing, coupled with an overall decrease in the average rate paid on interest-bearing liabilities reduced interest expense by \$14.7 million.

As shown in Table 4, tax-equivalent interest income for the six months ended June 30, 2009 declined \$33.8 million compared to the same period in 2008. The increase in interest-earning assets increased interest income by \$8.9 million, while a decline in the average rate earned on interest-earning assets reduced interest income by \$42.7 million. Interest expense for the first six months of 2008 declined \$39.0 million compared to the six months ended June 30, 2008. The increase in interest-bearing liabilities increased interest expense by \$338,000, while the decrease in the average rate paid on interest-bearing liabilities reduced interest expense by \$39.3 million.

We continue to use multiple interest rate scenarios to rigorously assess the direction and magnitude of changes in interest rates and their impact on net interest income. A description and analysis of our market risk and interest rate sensitivity profile and management policies is included in Item 3, “Quantitative and Qualitative Disclosures About Market Risk,” of this Form 10-Q.

Other income	1,013	834	21.5	1,509	1,574	(4.1)
Subtotal operating revenues	23,399	27,001	(13.3)	44,570	53,472	(16.6)
Trading gains (losses), net	1,360	40	3,300.0	738	(1,380)	(153.5)
Gains on securities sales, net	10,768	1,344	701.2	21,928	8,593	155.2
Securities impairment losses	(4,133)	(5,962)	(30.7)	(7,071)	(8,243)	(14.2)
Total noninterest income	\$31,394	\$22,423	40.0	\$60,165	\$52,442	14.7

Our total noninterest income increased \$9.0 million and \$7.7 million for second quarter and year-to-date 2009, respectively, compared to the same periods in 2008. The increases were driven largely by significantly higher net gains on sales of securities, which offset declines for the quarter and six-month periods in fee-based revenues from the same periods in 2008.

Fee-based revenues decreased 11.6% and 12.5% for second quarter and year-to-date 2009, respectively, from the same periods in 2008. These decreases largely stem from the impact of lower transaction volumes resulting from reduced consumer spending on overdraft fees as well as card-based fees. Further, trust and investment advisory fees declined from comparable periods in 2008 due to the adverse impact of lower asset values on revenues.

Service charges on deposit accounts declined 14.9% for second quarter 2009 compared to second quarter 2008 and 14.1% for the six months ended June 30, 2009 compared to the same period in 2008 due to the reduced consumer spending referred to above.

Other service charges, commissions, and fees declined 9.8% for second quarter 2009 and 15.1% year-to-date compared to the same periods in 2008. The declines were due to reduced merchant fees and lower sales of third-party annuity and investment products.

BOLI income represents benefit payments received and the change in cash surrender value (“CSV”) of the policies, net of premiums paid. The change in CSV is attributable to earnings or losses credited to policies, based on investments made by the insurer. In 2009, BOLI income declined \$986,000 and \$2.9 million from second quarter and year-to-date periods in 2008, respectively. In fourth quarter 2008, management elected to accept lower market returns in order to

reduce its risk to market volatility through investment in shorter-duration, lower-yielding money market instruments. See the section titled "Investment in Bank Owned Life Insurance" for a discussion of our investment in BOLI.

Other income, which consists primarily of safe deposit box rentals and miscellaneous recoveries, increased \$179,000 for second quarter 2009 compared to second quarter 2008 and declined \$65,000 for the first six months of 2009 compared to the first six months of 2008.

Trading gains (losses) result from the change in fair value of trading securities. Such trading securities represent diversified investment securities held in a grantor trust under deferred compensation arrangements in which plan participants may direct amounts earned to be invested in securities other than Company stock. The change is substantially offset by an adjustment to salaries and benefits expense.

We recognized a net securities gain and securities impairment losses for each period presented. For a discussion of these items, see the section titled “Investment Portfolio Management.”

Noninterest Expense

Total noninterest expense	\$ 59,233	\$ 49,945	18.6	\$ 107,627	\$ 99,288	8.4
Full-time equivalent (“FTE”) employees	1,766	1,828	(3.4)	1,767	1,831	(3.5)
Efficiency ratio	61.45%	51.67%		56.90%	52.83%	

Noninterest expense increased \$9.3 million for second quarter 2009 compared to second quarter 2008 and \$8.3 million for the six months ended June 30, 2009 compared to the six months ended June 30, 2008. The increases were primarily due to an increase in the annual deposit premium assessed by the FDIC, in addition to an industry-wide special deposit assessment of \$3.5 million in second quarter 2009 (as further explained below), and increases in other real estate owned expenses and loan remediation.

In May 2009, the FDIC issued a final rule which levied a special assessment applicable to all insured depository institutions totaling 5 basis points of each institution’s total assets less Tier 1 capital as of June 30, 2009, not to exceed 10 basis points of domestic deposits. The special assessment is part of the FDIC’s efforts to rebuild the Deposit Insurance Fund (“DIF”). Deposit insurance expense during the quarter and six-month periods ended June 30, 2009 included a \$3.5 million accrual related to the special assessment. The final rule also allows the FDIC to impose additional special assessments of 5 basis points for the third and fourth quarters of 2009, if the FDIC estimates the DIF reserve ratio will fall to a level that would adversely affect public confidence in federal deposit insurance or to a level

that would be close to or below zero. Any additional special assessment would also be capped at 10 basis points of domestic deposits. We cannot provide any assurance as to the ultimate amount or timing of any such special assessments, should such special assessments occur, as such special assessments depend upon a variety of factors, which are beyond our control. The remainder of the increase in FDIC insurance resulted from higher rates charged on deposit balances.

Salaries and wages increased in second quarter 2009 compared to second quarter 2008 due to an increase in the obligation to participants under deferred compensation plans resulting from changes in the fair value of trading securities held on behalf of plan participants. Salaries and wages declined in the six months ended June 30, 2009 compared to the six months ended June

30, 2008 as the increase in the obligation due under deferred compensation plans and annual general merit increases were more than offset by declines in incentive compensation and share-based compensation expense.

Of the \$322,000 increase in technology and related costs from second quarter 2008 to second quarter 2009, \$248,000 was due to a new voice over internet protocol (“VoIP”), which is used for the delivery of voice communications over networks such as the Internet. This investment in technology, which we expect will be more than offset by future savings, positions us for the future by providing us with a much more cost-effective means of communicating and transferring data. This cost also provides a savings in telephone expense, which is included in other expenses. The remaining variance in technology and related costs resulted from standard contractual increases. The new VoIP also accounted for \$502,000 of the increase for the six months ended June 30, 2009 compared to the same period in 2008.

OREO expense, net, consists of real estate taxes, insurance and maintenance, as well as further write downs of carrying value to reflect declines in estimated value during the period, net of any rental income. Of the amounts separately shown as OREO expense, net, \$2.0 million and \$2.3 million represent further writedowns of OREO during second quarter and year-to-date 2009 periods, respectively. The balance of OREO properties increased from \$7.0 million at June 30, 2008 to \$50.6 million at June 30, 2009.

The declines in other expenses were spread over various noninterest expense categories including freight and courier expense, telephone, supplies, and amortization expense.

The efficiency ratio expresses noninterest expense as a percentage of tax-equivalent net interest income plus total fees and other income. Operating efficiency for second quarter 2009 was 61.45% compared to 51.67% for second quarter 2008. Excluding the impact of the special FDIC assessment and increase in the obligation due to participants under deferred compensation plans, the efficiency ratio for second quarter 2009 would be reduced to 56.2%.

Income Taxes

Our accounting policies underlying the recognition of income taxes in the Consolidated Statements of Financial Condition and Income are included in Notes 1 and 15 to the Consolidated Financial Statements of our 2008 10-K.

Federal income tax expense and the related effective tax rate are primarily influenced by the amount of tax-exempt income derived from investment securities and BOLI in relation to pre-tax income. State income tax expense and the related effective tax rate are influenced by the amount of state tax-exempt income in relation to pre-tax income, and state tax rules relating to consolidated/combined reporting and sourcing of income and expense.

Income tax benefits totaled \$6.4 million in second quarter 2009 compared to income tax expense of \$27,000 in second quarter 2008. This decrease was primarily attributable to a decrease in federal income tax resulting from the decrease in pre-tax income for those periods. This decrease was partially offset by \$4.9 million in state income tax benefits recorded in second quarter 2008 under FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes, (“FIN 48”).

Income tax benefits totaled \$15.9 million for the six months ended June 30, 2009 compared to income tax expense of \$5.1 million for the six months ended June 30, 2008. This decrease was primarily attributable to a decrease in federal income tax resulting from the decrease in pre-tax income from 2008 to 2009. State tax benefits decreased during this time, reflecting the net effect of recording state income tax benefits totaling \$4.1 million in first quarter 2009 and \$4.9 million in second quarter 2008 (as referenced above) under FIN 48.

FINANCIAL CONDITION

Investment Portfolio Management

We manage our investment portfolio to maximize the return on invested funds within acceptable risk guidelines, to meet pledging and liquidity requirements, and to adjust balance sheet interest rate sensitivity to insulate net interest income against the impact of changes in interest rates.

We adjust the size and composition of our securities portfolio according to a number of factors, including expected loan growth, anticipated changes in collateralized public funds on account, the interest rate environment, and the related value of various segments of the securities markets. The following provides a valuation summary of our investment portfolio.

Table 7

(1) The effective duration of the securities portfolio represents the estimated percentage change in the fair value of the securities portfolio given a 100 basis point change up or down in the level of interest rates. This measure is used as a gauge of the portfolio's price volatility at a single point in time and is not intended to be a precise predictor of future fair values, as such values will be influenced by a number of factors.

(2) Average life is presented in years and represents the weighted-average time to receive all future cash flows, using the dollar amount of principal paydowns, including estimated principal prepayments, as the weighting factor.

As of June 30, 2009, our securities portfolio totaled \$1.5 billion, decreasing 33.2% from December 31, 2008, as we took advantage of opportunities in the market to sell securities at a net gain. During the first and second quarters of 2009, we sold approximately \$725 million of mortgage-backed and municipal securities that generated \$11.1 million and \$10.8 million of gains, respectively. These gains were partly offset by impairment charges during first and second quarters of 2009 of \$3.0 million and \$4.1 million, respectively, related to our trust preferred CDOs.

Our investments in trust preferred CDOs are supported by the credit of the underlying banks and insurance companies. The \$14.7 million increase in unrealized loss on these securities since December 31, 2008 reflects the market's perception of the overall deterioration in the strength of the financial sector and its negative bias toward structured investment vehicles given

the current interest rate and liquidity environment. We do not believe this loss is an other-than-temporary impairment. We expect no change in our net cash flows from these investments from what was originally anticipated, and we have both the intent and ability to hold them until maturity or recovery. Our estimation of cash flows for these investments and resulting fair values were based upon our own cash flow modeling in accordance with FASB No. 157, Fair Value Measurements, as described in Note 14 of “Notes to Consolidated Financial Statements”.

State and municipal securities have an unrealized loss of \$9.9 million at June 30, 2009 compared to an unrealized loss of \$289,000 at December 31, 2008. The adverse change in fair value of municipal securities primarily reflects the sale of securities at a gain over the past two quarters. The unrealized loss in the remaining portfolio is due to the uncertainty in the marketplace and the significant lack of liquidity for these debt securities. These securities continue to carry investment grade ratings with the bulk of them supported by the general revenues of the issuing governmental entity and supported by third-party insurance. We do not believe the unrealized loss on any of these is other-than-temporary.

Other securities include corporate bonds and other miscellaneous equity securities. We do not believe the unrealized loss on any of these is other-than-temporary.

---	--------------	--------------	-------

Outstanding loans totaled \$5.3 billion as of June 30, 2009, an annualized decrease of 0.8% from December 31, 2008. During the six-month period ended June 30, 2009, we extended approximately \$60 million in new credit, net of paydowns, which was more than offset by net charge-offs and conversion of loans to other real estate owned.

Non-performing Assets

Generally loans are placed on non-accrual status if principal or interest payments become 90 days or more past due and/or management deems the collectibility of the principal and/or interest to be in question. Loans to customers whose financial condition has deteriorated are considered for non-accrual status whether or not the loan is 90 days or more past due.

Once interest accruals are discontinued, accrued but uncollected interest is charged to current year operations. Subsequent receipts on non-accrual loans are recorded as a reduction of principal, and interest income is recorded only after principal recovery is reasonably assured. Classification of a loan as non-accrual does not preclude the ultimate collection of loan principal or interest.

We continue to accrue interest on certain loans 90 days or more past due when such loans are well secured and collection of principal and interest is expected within a reasonable period.

Restructured loans are loans on which, due to deterioration in the borrower's financial condition, the original terms have been modified in favor of the borrower or either principal or interest has been forgiven. Restructured loans generally result in lower payments than originally required and therefore, have a lower risk of loss due to nonperformance than loans classified as non-accrual. We do not accrue interest on any restructured loan until such time as we believe all principal and interest under its modified terms are reasonably assured. Until such time, these loans continue to be reported as non-accrual loans.

Once the borrower demonstrates the ability to meet the modified terms of the restructured loan, we once again accrue interest. However, by regulation, such restructured loans continue to be separately reported as restructured until after the calendar year in which the restructuring occurred, providing the loan was restructured at market rate and terms.

Other real estate owned ("OREO") represents property acquired as the result of borrower defaults on loans. OREO properties are recorded at estimated fair value, less estimated selling costs. Write-downs occurring at foreclosure are charged against the reserve for loan losses. On an ongoing basis, the carrying values of these properties may be reduced based upon new appraisals and/or market indications. Write-downs are recorded for subsequent declines in value and are included in other noninterest expense along with other expenses related to maintaining the properties.

The following table provides a comparison of our non-performing assets and past due loans to prior periods.

Non-accrual loans plus loans 90 days or more past due increased during second quarter 2009 but the rate of increase was significantly less than that experienced during first quarter 2009. In addition, we employed certain strategies during the second quarter to improve the overall composition of non-performing assets, such as restructuring loans, reducing early stage delinquencies, and accelerating efforts to control and facilitate sales of OREO properties. These strategies may improve the ultimate collection of delinquent loans as well as reduce the time required to convert assets to cash.

Non-accrual loans increased from \$183.5 million at March 31, 2009 to \$237.3 million at June 30, 2009, or \$53.7 million. This increase was primarily due to loans past due 90 days or more being placed on non-accrual. The total of non-accrual loans plus loans 90 days or more past due as of June 30, 2009 increased only \$5.9 million compared to March 31, 2009 and represented 4.93% of total loans at June 30, 2009. This compares to an increase of \$92.7 million during the quarter ended March 31, 2009. In addition the total of loans 30-89 days past due declined \$16.2 million, or 29.8%, from March 31, 2009.

At June 30, 2009, we had restructured loans totaling \$30.1 million, an increase of \$21.3 million from March 31, 2009. Included in this total at June 30, 2009 were loans totaling \$11.2 million classified as non-accrual.

OREO totaled \$50.6 million compared to \$39.0 million at March 31, 2009, and is comprised of 83 properties. For a number of loans where foreclosure was deemed appropriate, we sought to shorten the foreclosure process by seeking deeds-in-lieu of foreclosure for the underlying collateral.

Table 11
OREO Properties by Type
(Dollar amounts in thousands)

	June 30, 2009		March 31, 2009		December 31, 2008	
	Number of Properties	Amount	Number of Properties	Amount	Number of Properties	Amount
Single family homes	46	\$ 9,724	38	\$ 9,486	34	\$ 6,967
Land parcels	15	25,914	11	21,286	7	10,672
Multi-family units	13	2,210	13	4,778	11	3,682

Total OREO properties	83	\$ 50,640	71	\$ 38,984	60	\$ 24,368

We are encouraged by the results of our second quarter remediation efforts. Notwithstanding these results, we expect economic conditions to remain difficult, at least in the near term. As such, the level of non-performing assets going forward will depend upon the pace and timing of an overall economic recovery and the real estate market in particular, as well as our ability to continue to manage early-stage delinquencies and convert existing non-performing assets to cash.

Construction Portfolio

Total construction loans of \$784.3 million consist of residential construction, commercial construction, and commercial land. Our residential construction portfolio accounts for approximately 56% of the total non-accrual loans plus loans 90 days or more past due at June 30, 2009. Nearly one-third of all residential construction loans fall within one of these two problem loan categories. This \$458.9 million portfolio represents loans to developers of residential properties and, as such, is particularly susceptible to declining real estate values.

The following table provides details on the nature of these construction portfolios.

Table 12
Construction Loans by Type
(Dollar amounts in thousands)

	Residential Construction		Commercial Construction		Commercial Land		Combined	Non-accrual Plus 90 Days Past Due	
	Amount	Percent of Total	Amount	Percent of Total	Amount	Percent of Total		Percent of Total	Loans
As of June 30, 2009									
Raw Land	\$ 88,417	19.3	\$ 5,510	2.7	\$ 47,458	39.1	\$ 141,385	18.0	\$ 30,710
	176,902	38.5	20,069	9.8	59,319	48.9	256,290	32.7	66,689

Construction	37,321	8.1	27,176	13.3	-	-	64,497	8.2	15,842
Completed structures	136,118	29.7	149,066	73.1	14,597	12.0	299,781	38.2	39,726
Mixed and other	20,155	4.4	2,221	1.1	9	-	22,385	2.9	-
Total	\$ 458,913	100.0	\$ 204,042	100.0	\$ 121,383	100.0	\$ 784,338	100.0	\$ 152,967
Non-accrual plus 90-days or more past due loans	\$ 148,253		\$ 689		\$ 4,025		\$ 152,967		
Non-accrual plus 90-days or more past due loans as a percent of total loans	32.3%		0.3%		3.3%		19.5%		

Approximately 82% of the portfolio consists of either developed land or developed land with partially or substantially completed construction.

Our disclosure with respect to impaired loans is contained in Note 5 of “Notes to Consolidated Financial Statements” in Item 8 of this Form 10-K.

Reserve for Loan Losses

The reserve for loan losses is a reserve established through a provision for probable loan losses charged to expense, which represents management’s best estimate of probable losses that have been incurred within the existing portfolio of loans. The reserve, in the judgment of management, is necessary to provide for estimated loan losses and risks inherent in the loan portfolio. The reserve for loan losses consists of three components: (i) specific reserves established for expected losses on individual loans for which the recorded investment in the loan exceeds the value of the loan; (ii) reserves based on historical loan loss experience for each loan category; and (iii) reserves based on general, current economic conditions as well as specific economic factors believed to be relevant to the markets in which we operate. Management evaluates the sufficiency of the reserve for loan losses based on the combined total of the specific, historical loss, and general components. Management believes that the reserve for loan losses of \$127.5 million is adequate to absorb credit losses inherent in the loan portfolio as of June 30, 2009.

Portions of the reserve may be allocated for specific credits. However, the entire reserve is available for any credit that, in management’s judgment, should be charged off. While management utilizes its best judgment and information available, the ultimate adequacy of the reserve is dependent upon a variety of factors beyond our control, including the performance of our loan portfolio, the economy, changes in interest rates, and the interpretation by regulatory authorities of loan classifications.

Reserve for loan losses to non-accrual plus 90 days past due loans	48%		57%	
Reserve for loan losses to non-performing loans	45%		55%	

(1) Includes commercial construction and commercial land.

We increased our reserve for loan losses to \$127.5 million as of June 30, 2009, up \$11.5 million from March 31, 2009 and \$33.7 million from December 31, 2008. The reserve for loan losses as a percent of loans was 2.39% as of June 30, 2009, up from 2.15% at March 31, 2009 and 1.75% as of December 31, 2008. Total loans charged-off, net of recoveries, in second quarter 2009 were 1.85% of average loans compared to 1.98% and 1.38% for first quarter 2009 and fourth quarter 2008, respectively. Approximately 43% of the reserve at June 30, 2009 is allocated to residential construction loans.

The reserve for loan losses as a percent of non-accrual loans plus loans 90 days past due was 48% at June 30, 2009 compared to 45% at March 31, 2009 and 57% at December 31, 2008.

Charge-offs of residential construction loans and commercial & industrial loans each accounted for approximately 37% of total charge-offs for the six-month period ended June 30, 2009.

The accounting policies underlying the establishment and maintenance of the reserve for loan losses are discussed in Notes 1 and 5 to the Consolidated Financial Statements of our 2008 10-K.

INVESTMENT IN BANK OWNED LIFE INSURANCE

We purchase life insurance policies on the lives of certain directors and officers and are the sole owner and beneficiary of the policies. We invest in these policies, known as BOLI, to provide an efficient form of funding for long-term retirement and other employee benefit costs. Therefore, our BOLI policies are intended to be long-term investments to provide funding for long-term liabilities. We record these BOLI policies as a separate line item in the Consolidated Statements of Financial Condition at each policy's respective CSV, with changes recorded in noninterest

income in the Consolidated Statements of Income. As of June 30, 2009, the CSV of BOLI assets totaled \$197.6 million compared to \$198.5 million as of December 31, 2008.

Of our total BOLI portfolio as of June 30, 2009, 24.1% is in general account life insurance distributed between 10 insurance carriers, all of which carry investment grade ratings. This general account life insurance typically includes a feature guaranteeing minimum returns. The remaining 75.9% is in separate account life insurance, which is managed by third party investment advisors under pre-determined investment guidelines. Stable value protection is a feature available with respect to separate account life insurance policies that is designed to protect, within limits, a policy's CSV from market fluctuations on underlying investments. Our entire separate account portfolio has stable value protection, purchased from a highly rated

financial institution. To the extent fair values on individual contracts fall below 80%, the CSV of the specific contracts may be reduced or the underlying assets transferred to short-duration investments, resulting in lower earnings.

In comparison to second quarter 2008, BOLI income declined \$986,000 for second quarter 2009. During fourth quarter 2008 and second quarter 2009, management elected to accept lower market returns in order to improve our regulatory capital ratios by reducing risk-weighted assets and reduce our risk to market volatility through investment in shorter-duration, lower yielding money market instruments.

FUNDING AND LIQUIDITY MANAGEMENT

The following table provides a comparison of average funding sources for the quarter ended June 30, 2009, December 31, 2008, and June 30, 2008. We believe that average balances, rather than period-end balances, are more meaningful in analyzing funding sources because of the inherent fluctuations that may occur on a monthly basis within most funding categories.

Average interest rate paid on borrowed funds	1.24%	1.56%	2.79%		
Weighted-average maturity of FHLB advances	3.2 months	5.4 months	3.5 months		
Weighted-average interest rate of FHLB advances	3.59%	2.68%	4.02%		

N/M – Not meaningful.

Total average deposits for second quarter 2009 decreased 1.5% from second quarter 2008 and increased 1.6% from December 31, 2008, with a decline in time deposits being offset by increases in transactional deposits.

Average transactional deposits for second quarter 2009 were \$3.74 billion, an increase of \$283.6 million from fourth quarter 2008 and \$87.4 million from second quarter 2008. The increase from December 31, 2008 is due primarily to normal

seasonality as a result of deposits of tax receipts by our municipal customers. The year-over year increase is due largely to growth in money market account balances.

Securities sold under agreements to repurchase, federal funds purchased, and term auction facilities generally mature within 1 to 90 days from the transaction date.

MANAGEMENT OF CAPITAL

Capital Measurements

The Federal Reserve Board (“FRB”), the primary regulator of the Company and the Bank, establishes minimum capital requirements that must be met by member institutions. We have managed our capital ratios to consistently maintain such measurements in excess of the FRB minimum levels to be considered “well-capitalized,” which is the highest capital category established.

Capital resources of financial institutions are also regularly measured by tangible equity ratios, which are non-GAAP measures. Tangible common equity equals total shareholders’ equity as defined by GAAP less goodwill and other intangible assets and preferred stock, which does not benefit common shareholders. Tangible assets equals total assets as defined by GAAP less goodwill and other intangible assets. The tangible equity ratios are a valuable indicator of a financial institution’s capital strength since they eliminate intangible assets from shareholders’ equity.

The following table presents our consolidated measures of capital as of the dates presented and the capital guidelines established by the FRB to be considered “well-capitalized.”

Table 16
Capital Measurements
(Dollar amounts in thousands)

	June 30, 2009	June 30, 2008	December 31, 2008	Regulatory Minimum For “Well- Capitalized”	Excess Over Required Minimums at June 30, 2009	
Regulatory capital ratios:						
Total capital to risk-weighted assets	15.21%	11.87%	14.36%	10.00%	52%	\$ 330,216
Tier 1 capital to risk-weighted assets	12.38%	9.29%	11.60%	6.00%	106%	\$ 403,907
Tier 1 leverage to average assets	9.87%	7.56%	9.41%	5.00%	97%	\$ 386,757
Regulatory capital ratios, excluding preferred stock (1):						
Total capital to risk-weighted assets	12.17%	11.87%	11.44%	10.00%	22%	\$ 137,216
Tier 1 capital to risk-weighted assets	9.33%	9.29%	8.68%	6.00%	55%	\$ 210,907
Tier 1 leverage to average assets	7.44%	7.56%	7.04%	5.00%	49%	\$ 193,757
	7.36%	7.35%	6.79%	N/A (3)		

Tier 1 common capital to
risk-weighted
assets (2) (3)

Tangible equity ratios:

Tangible common equity to tangible assets	5.56%	5.45%	5.23%	N/A (3)
Tangible common equity, excluding other comprehensive loss, to tangible assets	6.23%	5.90%	5.45%	N/A (3)
Tangible common equity to risk-weighted assets	6.57%	6.79%	6.53%	N/A (3)

(1) These ratios exclude the impact of \$193.0 million in preferred shares issued to the U.S. Treasury in December 2009 as part of its Capital Purchase Plan (“CPP”). For additional discussion of the preferred share issuance and the CPP, refer to Note 12 to the Consolidated Financial Statements of our 2008 Form 10-K.

(2) Excludes the impact of \$193.0 million in preferred shares and \$125.0 million in trust preferred securities.

(3) Ratio is not subject to formal FRB regulatory guidance.

Regulatory and tangible common equity ratios were improved in comparison to December 31, 2008, with such improvement driven by a redeployment of assets, which reduced total risk-based assets and a decline in total assets, with the decline primarily due to a reduction in the size of the investment securities portfolio.

The Board of Directors reviews the Company's capital plan each quarter, giving consideration to the current and expected operating environment as well as an evaluation of various capital alternatives.

Dividends

As part of a larger commitment to grow the tangible common equity component of total capital, on March 16, 2009, our Board of Directors announced a reduction in our quarterly dividend from \$0.225 per share to \$0.01 per share. This reduction equates to approximately \$42 million in retained capital over the course of a year.

On May 27, 2009, the Company's Board of Directors announced a quarterly common stock dividend of \$0.010 per share.

Since we elected to participate in the Capital Purchase Program, our ability to increase quarterly common stock dividends above \$0.310 per share will be subject to the applicable restrictions of this program for three years following the sale of the preferred stock.

CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with GAAP and are consistent with predominant practices in the financial services industry. Critical accounting policies are those policies that management believes are the most important to our financial position and results of operations. Application of critical accounting policies requires management to make estimates, assumptions, and judgments based on information available at the date of the financial statements that affect the amounts reported in the financial statements and accompanying notes. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

We have numerous accounting policies, of which the most significant are presented in Note 1, "Summary of Significant Accounting Policies," to the Consolidated Financial Statements of our 2008 10-K. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has determined that our accounting policies with respect to the reserve for loan losses, evaluation of impairment of securities, and income taxes are the accounting areas requiring subjective or complex judgments that are most important to our financial position and results of operations, and, as such, are considered to be critical accounting policies, as discussed in our 2008 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates, and equity prices. Interest rate risk is our primary market risk and is the result of repricing, basis, and option risk. A description and analysis of our interest rate risk management policies is included in Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," contained in our 2008 10-K.

We seek to achieve consistent growth in net interest income and net income while managing volatility that arises from shifts in interest rates. The Bank's Asset and Liability Management Committee ("ALCO") oversees financial risk management by developing programs to measure and manage interest rate risks within authorized limits set by the Bank's Board of Directors. ALCO also approves the Bank's asset/liability management policies, oversees the formulation and implementation of strategies to improve balance sheet positioning and earnings, and reviews the Bank's interest rate sensitivity position. Management uses net interest income and economic value of equity simulation modeling tools to analyze and capture short-term and long-term interest rate exposures.

Net Interest Income Sensitivity

The analysis of net interest income sensitivities assesses the magnitude of changes in net interest income resulting from changes in interest rates over a 12-month horizon using multiple rate scenarios. These scenarios include, but are not limited to, a "most likely" forecast, a flat to inverted or unchanged rate environment, a gradual increase and decrease of 200 basis

points that occur in equal steps over a six-month time horizon, and immediate increases and decreases of 200 and 300 basis points.

This simulation analysis is based on actual cash flows and repricing characteristics for balance sheet and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. This simulation analysis includes management's projections for activity levels in each of the product lines we offer. The analysis also incorporates assumptions based on the historical behavior of deposit rates and balances in relation to interest rates. Because these assumptions are inherently uncertain, the simulation analysis cannot definitively measure net interest income or predict the impact of the fluctuation in interest rates on net interest income. Actual results may differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

We monitor and manage interest rate risk within approved policy limits. Our current interest rate risk policy limits are determined by measuring the change in net interest income over a 12-month horizon assuming a 200 basis point gradual increase and decrease in all interest rates compared to net interest income in an unchanging interest rate environment. Current policy limits this exposure to plus or minus 8% of the anticipated level of net interest income over the corresponding 12-month horizon assuming no change in current interest rates. As of June 30, 2009 and December 31, 2008, the percent change expected assuming a gradual decrease in interest rates was outside of policy. However, given the current market conditions as of June 30, 2009 and December 31, 2008, the Bank's Board of Directors temporarily authorized operations outside of policy limits.

Analysis of Net Interest Income Sensitivity
(Dollar amounts in thousands)

	Gradual Change in Rates (1)		Immediate Change in Rates			
	-200	+200	-200	+200	-300 (2)	+300
June 30, 2009:						
Dollar change	\$ (23,575)	\$ (20,144)	\$ (37,121)	\$ (23,471)	\$ N/M	\$ (29,270)
Percent change	-8.9%	-7.6%	-13.9%	-8.8%	N/M	-11.0%
December 31, 2008:						
Dollar change	\$ (28,797)	\$ (21,942)	\$ (43,001)	\$ (24,416)	\$ N/M	\$ (30,604)
Percent change	-10.4%	-7.9%	-15.5%	-8.8	N/M	-11.0

Reflects an assumed uniform change in interest rates across all terms that occurs in equal (1) steps over a six-month horizon.

(2) N/M – Due to the low level of interest rates as of June 30, 2009 and December 31, 2008, in management's judgment, an assumed 300 basis point drop in interest rates was deemed not meaningful in the existent interest rate environment.

Overall, the change in interest rate risk volatility from December 31, 2008 under both rising and declining interest rate assumptions is less negative. The security sales of approximately \$725 million during the six months ended June 30, 2009 reduced the volume of longer dated assets, and allowed for a reduction in shorter-term liabilities, thus improving the interest rate risk volatility under both rising and falling interest rates.

Economic Value of Equity

In addition to the simulation analysis, management uses an economic value of equity sensitivity technique to understand the risk in both shorter- and longer-term positions and to study the impact of longer-term cash flows on earnings and capital. In determining the economic value of equity, we discount present values of expected cash flows

on all assets, liabilities, and off-balance sheet contracts under different interest rate scenarios. The discounted present value of all cash flows represents our economic value of equity. Economic value of equity does not represent the true fair value of asset, liability, or derivative positions because certain factors are not considered, such as credit risk, liquidity risk, and the impact of future changes to the balance sheet. Our policy guidelines call for preventative measures to be taken in the event that an immediate increase or decrease in interest rates of 200 basis points is estimated to reduce the economic value of equity by more than 20%.

Analysis of Economic Value of Equity
(Dollar amounts in thousands)

	Immediate Change in Rates	
	-200	+200
June 30, 2009:		
Dollar change	\$ (88,948)	\$ (38,948)
Percent change	-6.4%	-2.8%
December 31, 2008:		
Dollar change	\$ (89,123)	\$ (54,136)
Percent change	-6.8%	-4.1%

As of June 30, 2009, the estimated sensitivity of the economic value of equity to changes in interest rates reflected less negative exposure to higher and lower interest rates compared to that existing at December 31, 2008. The changes from year-end 2008 are driven by the sale of longer-dated securities. As discussed in the section titled ‘Net Interest Income Sensitivity,’ these sales helped to reduce price volatility.

ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this report, (the ‘‘Evaluation Date’’), the Company carried out an evaluation, under the supervision and with the participation of the Company’s management, including the Company’s President and Chief Executive Officer and its Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15 of the Securities and Exchange Act of 1934 (the ‘‘Exchange Act’’). Based on that evaluation, the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer concluded that as of the Evaluation Date, the Company’s disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms. There were no changes in the Company’s internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company disclosed any material pending litigation matters relating to the Company in Item 3 of Part I of its Annual Report on Form 10-K for the year ended December 31, 2008. For the six months ended June 30, 2009, there were no material developments with regard to any previously disclosed matters, and no other matters were reported during the period, although there were certain legal proceedings pending against the Company and its subsidiaries in the ordinary course of business at June 30, 2009. Based on presently available information, the Company believes that any liabilities arising from these proceedings would not have a material adverse effect on the consolidated financial position of the Company.

ITEM 1A. RISK FACTORS

The Company provided a discussion of certain risks and uncertainties faced by the Company in its Annual Report on Form 10-K for the year ended December 31, 2008. However, these factors may not be the only risks or uncertainties the Company faces. Additional risks that the Company does not yet know of or that it currently thinks are immaterial may also impair its business operations.

Based on currently available information, the Company has not identified any new or material changes in the Company's risk factors as previously disclosed.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

51

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On May 20, 2009, the Company held its 2009 Annual Meeting of Stockholders at which the Company's stockholders voted for each matter as set forth below in the table below.

	Number of Shares Voted (1)		
	For	Against	Abstain
1) Election of seven directors for a three-year term ending in 2012 (1) (2):			
Barbara A. Boigegrain	41,556,695	1,425,601	101,632
Bruce S. Chelberg	41,383,182	1,605,550	95,197
Joseph W. England	41,463,378	1,524,055	96,495
Patrick J. McDonnell	41,510,879	1,480,230	92,820
Robert P. O'Meara	41,351,556	1,626,724	105,650
Thomas J. Schwartz	41,341,165	1,654,900	87,864
Michael L. Scudder	41,417,287	1,579,028	87,615

Other directors whose term of office continued after the meeting were: John F. Chlebowski, Jr., Brother James Gaffney, FSC, Thomas M. Garvin, John E. Rooney, Ellen A. Rudnick, John L. Sterling, and J. Stephen Vanderwoude.

2) Ratification of Independent Auditors (1)	42,002,051	874,921	206,956
3) Approval of Amended and Restated Omnibus Stock and Incentive Plan (3)	32,313,387	4,277,108	886,296
4) Approval of executive compensation (1)	39,977,129	2,342,045	764,754

(1)Represents 88.4% of votable shares as of March 23, 2009.

(2)Each of the seven directors received votes in favor of at least 96.0% of shares voted.

(3)Represents 87.0% of shares voted.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit Number	Description of Documents	Sequential Page #
3.1	Restated Certificate of Incorporation is incorporated herein by reference to Exhibit 3 to the Annual Report on Form 10-K dated December 31, 2008.	
3.2	Restated Bylaws of the Company is incorporated herein by reference to Exhibit 3 to the Annual Report on Form 10-K dated December 31, 2008.	
10.1	Amended and Restated First Midwest Bancorp, Inc. Omnibus Stock and Incentive Plan as of May 20, 2009 is incorporated herein by reference to Annex B to the Definitive Proxy Statement of the Company dated April 8, 2009.	
11	Statement re: Computation of Per Share Earnings - The computation of basic and diluted earnings per share is included in Note 9 of the Company's Notes to Consolidated Financial Statements included in "ITEM 1. FINANCIAL STATEMENTS" of this document.
