Forward Looking Statements

We have made forward-looking statements in this document within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended. These statements, including estimates of future net sales and consolidated EBITDA contained in the section titled Management's Discussion and Analysis of Financial Condition and Results of Operations, are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed results of operations. Also, statements including words such as believes, expects, anticipates, intends, estimates, or similar expressions are forward-looking statements. We have based these forward-looking statements on our current expectations and projections about the growth of our business, our financial performance and the development of our industry. Because these statements reflect our current views concerning future events, these forward-looking statements involve risks and uncertainties. Investors should note that many factors, as more fully described in Management's Discussion and Analysis of Financial Condition and Results of Operations, Business and elsewhere in this Report could affect our future financial results and could cause our actual results to differ materially from those expressed in forward-looking statements contained in this Report. Important factors that could cause our actual results to differ materially from the expectations reflected in the forward-looking statements in this Report include, among others:

our ability to successfully develop, commercialize and market new products;

results of clinical trials on new products;

competition for the business of our branded and generic products, and in connection with our acquisition of rights to intellectual property assets;

market acceptance of our future products;

government regulation of the pharmaceutical industry;

our dependence on a small number of products;

our dependence on outside manufacturers for the manufacture of our products;

our dependence on third parties to supply raw materials and to provide services for the core aspects of our business;

new regulatory action or lawsuits relating to the use of narcotics in most of our core products;

our exposure to product liability claims and product recalls and the possibility that we may not be able to adequately insure ourselves;

our ability to protect our proprietary technology;

our ability to successfully implement our acquisition strategy;

the availability of controlled substances that constitute the active ingredients of some of our products and products in development;

the availability of third-party reimbursement for our products; and

our dependence on sales to a limited number of large pharmacy chains and wholesale drug distributors for a large portion of our total net sales.

We do not undertake any obligation to update our forward-looking statements after the date of this Report for any reason, even if new information becomes available or other events occur in the future.

**ENDO PHARMACEUTICALS HOLDINGS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)
FOR THE THREE MONTHS ENDED MARCH 31, 2002**

1. CONSOLIDATED FINANCIAL STATEMENTS

In the opinion of management, the accompanying condensed consolidated financial statements of Endo Pharmaceuticals Holdings Inc. (the Company or we) and its subsidiaries, which are unaudited, include all normal and recurring adjustments necessary to present fairly the Company's financial position as of March 31, 2002 and the results of operations and cash flows for the periods presented. The accompanying consolidated balance sheet as of December 31, 2001 is derived from the Company's audited financial statements. Certain information and footnote disclosure normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted as promulgated by APB Opinion No. 28 and Rule 10.01 of Regulation S-X. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto as of and for the year ended December 31, 2001 contained in the Company's Annual Report on Form 10-K. Certain reclassifications have been made to the prior period's financial statements to conform with the classifications used in 2002.

2. RECENT ACCOUNTING PRONOUNCEMENTS

In June 1998, the FASB issued SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, which was effective for all fiscal years beginning after June 15, 2000. SFAS 133, as amended by SFAS 137 and SFAS 138, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. If the derivative is designated in a fair value hedge, the changes in the fair value of the derivative and the hedged item are recognized in earnings. If the derivative is designated as a cash flow hedge, changes in the fair value of the derivative are recorded in other comprehensive income (OCI) and are recognized in the income statement when the hedged item affects earnings. SFAS 133 defines new requirements for designation and documentation of hedging relationships as well as ongoing effectiveness assessments in order to use hedge accounting. A derivative that does not qualify as a hedge is marked to fair value through earnings.

At January 1, 2001, we recorded \$228,000 as an accumulated transition adjustment as a reduction to earnings.

In December 1999, the SEC issued SAB 101, entitled Revenue Recognition in Financial Statements, as amended, effective as of October 1, 2000, which summarizes the SEC's views in applying generally accepted accounting principles to revenue recognition. The adoption of this guideline had no effect on our financial statements.

In March 2000, the FASB issued Financial Accounting Series Interpretation No. 44 entitled Accounting for Certain Transactions Involving Stock Compensation, which provides clarification to Accounting Principles Board Opinion No. 25 (APB No. 25), Accounting for Stock Issued to Employees. The adoption of this interpretation had no effect on our financial statements.

In June 2001, the FASB issued SFAS No. 141, Business Combinations, and SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 141 was effective for all business combinations completed after June 30, 2001. SFAS No. 142 is effective for fiscal years beginning after December 15, 2001. SFAS No. 141 requires that all business combinations be accounted for under the purchase method only and that certain acquired intangible assets in a business combination be recognized as assets apart from goodwill. SFAS No. 142 establishes revised reporting requirements for goodwill and other intangible assets. See note 3 to the consolidated financial statements.

3. GOODWILL AND OTHER INTANGIBLES

Effective January 1, 2002, we adopted the provisions of SFAS No. 142, Goodwill and Other Intangible Assets.

Table of Contents

Goodwill and other intangible assets consist of the following (in thousands):

	March 31, 2002	December 31, 2001
Goodwill	\$ 181,079	\$ 182,318
Amortizable Intangibles:		
Licenses		
\$11,000 \$11,000		
Patents		
3,200 3,200		
14,200 14,200		
Less accumulated amortization		
(1,889) (1,705)		
Other Intangibles, net		
\$12,311 \$12,495		

We have one reportable segment, pharmaceutical products. Goodwill arose as a result of the August 26, 1997 acquisition of certain branded and generic pharmaceutical products, related rights and certain assets of DuPont Pharmaceuticals Company (DuPont , formerly The DuPont Merck Pharmaceutical Company, DuPont Merck Pharma and Endo Laboratories, L.L.C.) and the July 17, 2000 acquisition of Algos Pharmaceutical Corporation (Algos). Although goodwill arose in two separate transactions, the components of our operating segment have been integrated and are managed as one reporting unit. Our components extensively share assets and other resources with the other components of our business.. In addition, our components do not maintain discrete financial information. Accordingly, the components of our business have been aggregated into one reporting unit and will be evaluated as such for goodwill impairment. Goodwill will be evaluated for impairment on an annual basis on January 1st of each year unless events or circumstances indicate that an impairment has occurred between annual dates. Goodwill has been evaluated for impairment upon the adoption of SFAS No. 142 and no impairment has been identified.

Effective January 1, 2002, the carrying amount of workforce-in-place was reclassified as goodwill. The cost of license fees is capitalized and is being amortized on a straight-line basis over their estimated useful life of twenty years. The cost of acquired patents is capitalized and is being amortized on a straight-line basis over their estimated useful life of seventeen years.

The pro forma effect of the adoption of SFAS No. 141 and SFAS No. 142 is as follows:

4. COMPENSATION RELATED TO STOCK OPTIONS**Endo Pharma LLC 1997 Executive and Employee Stock Option Plans**

On November 25, 1997, the Company established the 1997 Employee Stock Option Plan and the 1997 Executive Stock Option Plan (collectively, the 1997 Stock Option Plans). Pursuant to the Recapitalization of the Company on July 17, 2000, the 1997 Stock Option Plans were amended and restated. The Endo Pharma LLC Amended and Restated 1997 Employee Stock Option Plan and the Endo Pharma LLC Amended and Restated 1997 Executive Stock Option Plan (collectively, the Endo Pharma LLC 1997 Stock Option Plans) reserve an aggregate of 25,615,339 shares of Common Stock of the Company held by Endo Pharma LLC for issuance. Stock options granted under the Endo Pharma LLC 1997 Stock Option Plans expire no later than December 31, 2012 unless an initial public offering of the Company Common Stock held by Endo Pharma LLC occurs, in which case the stock options granted will expire on August 26, 2007. The effect of the Recapitalization has been reflected in the accompanying financial statements. Subsequent to the Merger, the exercise of stock options pursuant to the Endo Pharma LLC 1997 Stock Option Plans does not result in the issuance of additional shares in the Company.

Edgar Filing: ENDO PHARMACEUTICALS HOLDINGS INC - Form 10-Q

The Class C stock options vest in four discrete tranches contingent upon (i) the Common Stock of the Company exceeding a defined closing price threshold for ninety consecutive trading days, (ii) the closing price of the Common Stock of the Company on the last trading day of such ninety consecutive trading day period being greater than or equal to 85% of the defined closing price and (iii) the holder being a director, officer or employee of the Company or any of its subsidiaries on such date. The defined closing price thresholds are as follows:

Option Class	MorphiDex® is Approved On or Prior to December 31, 2002	MorphiDex® is Not Approved On or Prior to December 31, 2002
	Common Stock Closing Price Threshold	Common Stock Closing Price Threshold
C1A and C1B	\$6.06	\$4.28
C2		
\$9.38 \$6.62		
C3		
\$14.99 \$10.58		
C4		
\$24.50 \$17.29		

If these share price targets are achieved resulting in the vesting of each tranche of options, the Company will record up to four non-cash compensation charges related to the vesting of certain of the options. Under performance-based options, the measurement of expense is calculated and recorded as a non-cash charge at the time performance is achieved as the difference between the market price of the stock and the exercise price of the options.

Table of Contents

If these charges are recorded by the Company in connection with the above options, they will be significant. They will, however, not result in the issuance of additional shares of Company Common Stock. The aforementioned conditions have been achieved for the Class C1A, Class C1B and Class C2 stock options and therefore these stock options have vested. Accordingly, a non-cash compensation charge of \$15.3 million was recorded in the fourth quarter of 2000 for the vesting of the Class C1A and Class C1B stock options and a non-cash compensation charge of \$37.3 million was recorded in the third quarter of 2001 for the vesting of the Class C2 stock options.

The Class C1A, C1B, C2, C3 and C4 stock options are generally exercisable, if vested, upon the earlier of (i) the occurrence of a sale, disposition or transfer (Transfer) of Common Stock, after which Kelso no longer owns any shares of Common Stock or (ii) January 1, 2006.

Endo Pharma LLC 2000 Supplemental Executive and Employee Stock Option Plans

Pursuant to the Merger and Recapitalization of the Company on July 17, 2000, the Endo Pharma LLC 2000 Supplemental Employee Stock Option Plan and the Endo Pharma LLC 2000 Supplemental Executive Stock Option Plan (collectively, the Endo Pharma LLC 2000 Supplemental Stock Option Plans) were established. The Endo Pharma LLC 2000 Supplemental Stock Option Plans reserve an aggregate of 10,672,314 shares of Common Stock of the Company held by Endo Pharma LLC for issuance. The Endo Pharma LLC 2000 Supplemental Stock Option Plans are only effective on January 1, 2003 in the event that we have not received the approval from the U.S. Food and Drug Administration for MorphoDex® for the treatment of pain by December 31, 2002. Stock options granted under the Endo Pharma LLC 2000 Supplemental Stock Option Plans expire no later than December 31, 2012 unless an initial public offering of the Company Common Stock held by Endo Pharma LLC occurs, in which case the stock options granted will expire on August 26, 2007. The exercise of stock options pursuant to the Endo Pharma LLC 2000 Supplemental Stock Option Plans does not result in the issuance of additional shares in the Company, however, may result in additional non-cash compensation charges upon issuance and/or attainment of defined common stock price targets. These charges may be substantial. The Endo Pharma LLC 2000 Supplemental Stock Option Plans are not currently effective, therefore no options have been granted.

5. WARRANTS

Class A Transferable Warrants and Class B Non-Transferable Warrants

The Class A Transferable Warrants and Class B Non-Transferable Warrants are exercisable at an exercise price of \$.01 per share into a specified number of shares of Common Stock depending on the timing of the FDA's approval of MorphoDex® for one or more pain indications. These warrants become exercisable on the fifth business day following the date on which we receive approval from the FDA with respect to MorphoDex® for the treatment of one or more pain indications. These warrants will remain exercisable for a period of six months after the exercisability date, at which time they will expire. If the FDA does not approve MorphoDex® by March 31, 2003, each of these warrants expires without any payment therefor.

If the FDA approves MorphoDex® on or prior to September 30, 2002, then upon exercise of these warrants, each warrant will be exercisable into 0.633803 shares of Common Stock. If the FDA approves MorphoDex® after September 30, 2002 and prior to March 31, 2003, then upon exercise of these warrants, each warrant will be exercisable into 0.263158 shares of Common Stock. If the FDA does not approve MorphoDex® before March 31, 2003, each of these warrants becomes void and all rights in respect of these warrants will cease.

On December 5, 2001, we commenced a tender offer to purchase up to 13,500,000 of our outstanding Class A Transferable Warrants and any and all of our outstanding Class B Non-Transferable Warrants. This tender offer expired at midnight on January 25, 2002. As of December 31, 2001, there were outstanding 17,810,526 of these warrants. We accepted an aggregate of 8,585,262 Class A Transferable Warrants and Class B Non-Transferable Warrants for payment at a purchase price of \$0.75 per warrant. We used cash on hand to finance the purchase of the tendered warrants. Following the purchase by us, there were outstanding 9,225,264 of these warrants.

Table of Contents

Pre-Merger Endo Warrants

The Pre-Merger Endo Warrants are exercisable at an exercise price of \$.01 per share into a specified number of shares of Common Stock if the FDA does not approve MorphoDex® for any pain indication prior to December 31, 2002. As of March 31, 2002, there were outstanding 71,328,424 of these warrants. If the FDA does not approve MorphoDex® before December 31, 2002, then these warrants become exercisable and upon exercise, each warrant will be exercisable into 0.416667 shares of Common Stock for a total of 29,720,177 shares of Common Stock.

6. RELATED PARTY TRANSACTIONS

On July 14, 2000, Endo Pharma LLC was formed to ensure that the stock options granted pursuant to the 1997 Employee Stock Option Plan and the 1997 Executive Stock Option Plan (collectively, as amended and restated, the Endo Pharma LLC 1997 Stock Option Plans) diluted only the pre-Merger holders of Endo Common Stock (see Note 4). Subsequent to the Merger, only currently outstanding shares of Common Stock of the Company held by Endo Pharma LLC will be issued upon the exercise of these stock options. Because Endo Pharma LLC, and not the Company, will provide the shares issued upon the exercise of the options, the Company has entered into a tax sharing agreement with Endo Pharma LLC under which the Company will pay to Endo Pharma LLC the amount of the tax benefits it receives as a result of the exercise of these stock options into shares of Common Stock held by Endo Pharma LLC for the years in which these tax benefits arise. As of March 31, 2002, no payments have been made or accrued.

7. COMMITMENTS AND CONTINGENCIES

We have entered into employment agreements with certain members of management.

We have entered into certain collaboration agreements with third parties for the development of pain management products. These agreements require us to share in the development costs of such products and grant marketing rights to us for such products. If our third party partners are unable to fund their portion of the collaboration project with us, this may adversely affect our results of operations and cash flows in the foreseeable future.

We are, and may in the future be, subject to various claims or legal proceedings arising out of the normal course of business with respect to commercial matters, including product liabilities, patent infringement matters, governmental regulation and other actions. We cannot predict the timing or outcome of these claims or proceedings. Currently, the Company is not involved in any claim and/or legal proceeding with respect to which the amount of ultimate liability will, in the opinion of management, materially affect our financial position, results of operations or liquidity.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Except for the historical information contained in this Report, this Report, including the following discussion, contains forward-looking statements that involve risks and uncertainties.

Overview

We, through our wholly owned subsidiary, Endo Pharmaceuticals Inc., are engaged in the research, development, sales and marketing of branded and generic prescription pharmaceuticals used primarily for the treatment and management of pain. Branded products comprised approximately 76%, 67% and 58% of net sales for the years ended December 31, 2000, 2001 and the three months ended March 31, 2002. On August 26, 1997, an affiliate of Kelso & Company and the then members of management entered into an asset purchase agreement with the then DuPont Merck Pharmaceutical Company to acquire certain branded and generic pharmaceutical products and exclusive worldwide rights to a number of new chemical entities in the DuPont research and development pipeline from DuPont Merck through the newly-formed Endo Pharmaceuticals Inc.

On July 17, 2000, we completed our merger with Algos. In the merger, we issued to the former Algos stockholders, in the aggregate, 17,810,526 shares of our common stock and 17,810,526 warrants to purchase in the aggregate up to 20,575,507 additional shares of our common stock in certain circumstances as more fully described under note 5 to the consolidated financial statements in this report. In the merger, we also issued to our pre-merger stockholders, in the aggregate, 71,328,424 warrants to purchase in the aggregate up to 29,720,177 additional shares of common stock in certain other circumstances as more fully described under note 5 to the consolidated financial statements in this report.

The stock of Endo Pharmaceuticals Inc. is our only asset and we have no other operations or business.

In May 2001, we entered into a long-term manufacturing and development agreement with Novartis Consumer Health, Inc., whereby Novartis has agreed to manufacture certain of our commercial products and products in development. We have incurred and expect to continue to incur significant costs associated with the preparation of Novartis' manufacturing operations under this agreement. These costs primarily relate to the preparation of test batches of drug product for FDA approval and our own quality assessment and administrative costs relating to the shifting of existing production to Novartis.

Our quarterly results have fluctuated in the past, and may continue to fluctuate. These fluctuations are primarily due to the timing of new product launches, purchasing patterns of our customers, market acceptance of our products and the impact of competitive products and pricing.

Critical Accounting Policies

To understand our financial statements, it is important to understand our accounting policies. The preparation of our financial statements in conformity with accounting principles generally accepted in the United States (generally accepted accounting principles) requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of these judgments can be subjective and complex, and, consequently, actual results may differ from these estimates. For any given individual estimate or assumption made by us, there may also be other estimates or assumptions that are reasonable. We believe, however, that given current facts and circumstances, it is unlikely that applying any such other reasonable judgment would cause a material adverse effect on our consolidated results of operations, financial position or cash flows for the periods represented in this Report.

Our most critical accounting policies include the determination of sales deductions for estimated chargebacks, rebates, sales incentives and allowances, royalties and returns and losses, the utilization of deferred tax assets and the assessment of impairment of goodwill and other intangible assets. Note 2 to our consolidated financial statements contained in our annual report on Form 10K describes our significant accounting policies.

Table of Contents**Results of Operations***Goodwill and Other Intangibles*

Effective January 1, 2002, we adopted the provisions of SFAS No. 142, Goodwill and Other Intangible Assets.

Goodwill represents a significant portion of our assets and stockholders' equity. As of March 31, 2002, goodwill comprised approximately 38% of our total assets and 62% of our stockholders' equity. We assess the potential impairment of goodwill by comparing the fair value of goodwill to its carrying value for our one reporting unit. An impairment loss would be recognized when the estimated fair value is less than its carrying amount. As a result of the significance of goodwill, our results of operations and financial position in a future period could be negatively impacted should an impairment of goodwill occur.

We have one reportable segment, pharmaceutical products. Goodwill arose as a result of the August 26, 1997 acquisition of certain branded and generic pharmaceutical products, related rights and certain assets of DuPont Pharmaceuticals Company (DuPont , formerly The DuPont Merck Pharmaceutical Company, DuPont Merck Pharma and Endo Laboratories, L.L.C.) and the July 17, 2000 acquisition of Algos Pharmaceutical Corporation (Algos). Although goodwill arose in two separate transactions, the components of our operating segment have been integrated and are managed as one reporting unit. Our components extensively share assets and other resources with the other components of our business and have similar economic characteristics. In addition, our components do not maintain discrete financial information. Accordingly, the components of our business have been aggregated into one reporting unit and will be evaluated as such for goodwill impairment. Goodwill will be evaluated for impairment on an annual basis on January 1st of each year unless events or circumstances indicate that an impairment has occurred between annual dates. Goodwill has been evaluated for impairment upon the adoption of SFAS No. 142 on January 1, 2002 and, based on the fair value of our reporting unit, no impairment has been identified.

Goodwill and other intangible assets consist of the following (in thousands):

	March 31, 2002	December 31, 2001
Goodwill	\$ 181,079	\$ 182,318

Amortizable Intangibles:

Licenses

\$11,000 \$11,000

Patents

3,200 3,200

14,200 14,200

Less accumulated amortization

(1,889) (1,705)

Other Intangibles, net

\$12,311 \$12,495

Effective January 1, 2002, the carrying amount of workforce-in-place was reclassified as goodwill. The cost of license fees is capitalized and is being amortized on a straight-line basis over their estimated useful life of twenty years. The cost of acquired patents is capitalized and is being amortized on a straight-line basis over their estimated useful life of seventeen years.

Compensation Related to Stock Options

During our fourth quarter ended December 31, 2000 we incurred a non-cash charge of \$15.3 million, and during our third quarter ended September 30, 2001, we recorded a non-cash charge of \$37.3 million, in each case for stock-based compensation relating to the vesting of options that were issued under the Endo Pharma LLC stock option plans. Under these plans, tranches of options vest when we attain certain stock price targets. As each tranche vests, we incur a non-cash charge representing the difference between the market price of the shares underlying the options and the exercise price of such options. We may in the future incur up to two additional charges in relation to the Endo Pharma LLC options as a result of the attainment of these common stock price targets. These charges may be substantial. These options are exercisable into shares of common stock that are presently held by Endo Pharma LLC. As a result, the exercise of these options will not result in

Edgar Filing: ENDO PHARMACEUTICALS HOLDINGS INC - Form 10-Q

the issuance of additional shares of common stock.

In connection with the Algos merger and our related recapitalization on July 17, 2000, the Endo Pharma LLC 2000 Supplemental Employee Stock Option Plan and the Endo Pharma LLC 2000 Supplemental Executive Stock Option Plan (collectively, the Endo Pharma LLC 2000 Supplemental Stock Option Plans) were established. The Endo Pharma LLC 2000 Supplemental Stock Option Plans reserve an aggregate of 10,672,314 shares of our common stock that is held by Endo Pharma LLC for issuance.

Table of Contents

The Endo Pharma LLC 2000 Supplemental Stock Option Plans are only effective on January 1, 2003 in the event that we have not received the approval from the FDA of MorphiDex® for the treatment of pain by December 31, 2002. The exercise of stock options pursuant to the Endo Pharma LLC 2000 Supplemental Stock Option Plans does not result in the issuance of additional shares in the Company, however, may result in additional non-cash compensation charges upon issuance and/or attainment of defined common stock price targets. These charges may be substantial. The Endo Pharma LLC 2000 Supplemental Stock Option Plans are not currently effective, therefore no options have been granted.

All the options we have granted pursuant to the Endo Pharmaceuticals Holdings Inc. 2000 Stock Incentive Plan have exercise prices equal to the market price of our stock on the date granted and, under generally accepted accounting principles, a measurement date had occurred on the date of grant. Consequently, we do not expect to incur a charge upon the vesting or exercise of those options.

Net Sales

Our net sales consist of revenues from sales of our pharmaceutical products, less estimates for certain chargebacks, rebates, sales incentives and allowances, royalties and the cost of returns and losses. We estimate the accrual for sales deductions based on historical data, estimated future trends and other competitive factors. Net sales are recognized when products are shipped.

The following table presents our unaudited net sales by product category for the three months ended March 31, 2002 and 2001.

100% 100%		

Three Months Ended March 31, 2002 Compared to the Three Months Ended March 31, 2001

Net sales for the three months ended March 31, 2002 increased by 70% to \$67.0 million from \$39.4 million in the comparable 2001 period. This increase in net sales was primarily due to the increase in net sales of Lidoderm®, the first FDA-approved product for the treatment of the pain of post-herpetic neuralgia, certain generic products and the new strengths of Percocet®.

Table of Contents

In September 1999, we launched Lidoderm®, which continues to gain market share due to our ongoing promotional and educational efforts. Net sales of Lidoderm® increased to \$10.0 million from \$3.6 million in the comparable 2001 period. Percocet® net sales increased 16% to \$23.5 million from \$20.2 million in the comparable 2001 period due to the new strengths of Percocet® launched in November 2001. In April 2001, generic equivalents of Percocet® 7.5/500 and Percocet® 10.0/650 were introduced. In November 2001, we launched Percocet® 7.5/325 and Percocet® 10.0/325 which do not currently have generic equivalents. Generic products increased to \$28.2 million from \$10.6 million in the comparable 2001 period primarily due to the growth of our generic morphine sulfate extended release tablets and Endocet®. In November 1998, we launched the 15mg, 30mg and 60mg strengths, in May 2001, we launched the 100mg strength and in September 2001, we launched the 200mg strength of our generic morphine sulfate extended release tablets. These products continue to gain market share. In April 2001, we launched two new strengths of our generic product Endocet®. Generic competition with our products may have a material impact on our results of operations and cash flows in the future.

Gross profit for the three months ended March 31, 2002 increased by 80% to \$48.1 million from \$26.7 million in the comparable 2001 period. Gross profit margins increased to 72% from 68% due to a more favorable mix of higher margin brand and generic products resulting from the product launches discussed above, and the discontinuation of some lower margin non-core products. In addition, the increase in gross profit margins was also due to the existing fixed cost nature of our manufacturing relationship with Bristol-Myers Squibb Pharma Company (formerly DuPont Pharmaceuticals), currently our most significant contract manufacturing relationship. If we achieve our forecast for revenue and product mix, we expect the increase in gross profits and gross profit margins to continue.

Selling, general and administrative expenses for the three months ended March 31, 2002 increased by 48% to \$23.6 million from \$15.9 million in the comparable 2001 period. This increase was due to a \$4.2 million increase in sales and promotional efforts in 2002 over the comparable 2001 period to support Lidoderm® and Percocet®. In addition, we experienced an increase in personnel-related costs in the general and administrative functions in order to support our new product marketing and new product development.

Research and development expenses for the three months ended March 31, 2002 increased by 46% to \$13.4 million from \$9.2 million in the comparable 2001 period. This increase was due to our increased spending on new products under development that are focused in pain management. We are currently conducting Phase III clinical trials on MorphiDex® and on both an oral extended-release and oral immediate-release version of oxymorphone.

Depreciation and amortization for the three months ended March 31, 2002 decreased to \$.8 million from \$12.4 million in the comparable 2001 period. Effective January 1, 2002, we have adopted the provisions of SFAS 142, Goodwill and Other Intangible Assets and will no longer amortize goodwill unless evidence of an impairment exists. If SFAS 142 had been adopted as of January 1, 2001, depreciation and amortization for the three months ended March 31, 2001 would have been \$.7 million.

Interest expense, net for the three months ended March 31, 2002 decreased by 54% to \$1.6 million from \$3.5 million in the comparable 2001 period. This decrease is substantially due to the repayment on October 29, 2001 of the term loans outstanding on our credit facility. Interest expense for the three months ended March 31, 2002 substantially represents the accretion of promissory notes issued to Bristol-Myers Squibb which bear no interest and therefore have been discounted in the accompanying financial statements. For the three months ended March 31, 2001, due to the adoption of SFAS 133 on January 1, 2001, the Company recorded a \$.2 million charge for the accumulated transition adjustment relating to derivative instruments that do not qualify as a hedge under SFAS 133.

Income tax (benefit) for the three months ended March 31, 2002 increase to \$3.4 million from nil in the comparable 2001 period. This increase is due to the increase in income before income tax for the three months ended March 31, 2002. For the three months ended March 31, 2001, we recorded a valuation allowance on our existing deferred tax assets due to the uncertainty of the utilization of such amounts in the foreseeable future. During the fourth quarter of 2001, we evaluated our anticipated future taxable income based upon the repayment of our outstanding term loans, new product approvals and other existing and estimated future product performance and determined that it is more likely than not that we will utilize our deferred tax benefits. Accordingly, we reversed our valuation reserves that had been recorded against those deferred tax assets.

Table of Contents

Liquidity and Capital Resources

Net cash provided by operating activities increased by \$3.9 million to \$29.1 million for the three months ended March 31, 2002 from \$25.2 million for the three months ended March 31, 2001. This increase was due to the cash provided by the increase in net sales and gross profit for the three months ended March 31, 2002 compared to the three months ended March 31, 2001 offset by an increase in selling, general and administrative expenses and research and development expenses for the three months ended March 31, 2002 as compared to the three months ended March 31, 2001.

Net cash utilized in investing activities decreased by \$1.1 million to \$.1 million for the three months ended March 31, 2002 from \$1.2 million for the three months ended March 31, 2001 due to the purchase in 2001 of leasehold improvements and other furniture and fixtures related to our principal executive offices and the implementation of an electronic document management system during 2001.

Net cash utilized in financing activities increased by \$2.6 million to \$6.7 million for the three months ended March 31, 2002 from \$4.1 million for the three months ended March 31, 2001. During the three months ended March 31, 2002, we utilized \$6.7 million of cash, including fees, to repurchase 8.6 million Class A Transferable Warrants and Class B Non-Transferable Warrants. During the three months ended March 31, 2001, we made a scheduled principal payment on our term loans which were repaid in full on October 29, 2001.

In its annual report filed on Form 10K for the year ended December 31, 2001, Penwest Pharmaceuticals Co., a collaboration partner of Endo with which Endo has an alliance agreement and with which Endo is developing one of its pipeline projects, stated that its existing capital resources, will enable Penwest to maintain currently planned operations at least through March 31, 2003. If Penwest is unable to fund their portion of the collaboration project with Endo, this may adversely affect our results of operations and cash flows in the foreseeable future.

Our cash and cash equivalents totaled \$117.7 million at March 31, 2002. We believe that our (a) cash and cash equivalents, (b) cash flow from operations and (c) our credit facility (which has an available unused line of credit of \$75 million) will be sufficient to meet our normal operating, investing and financing requirements in the foreseeable future, including the funding of our pipeline projects in the event that our collaboration partners are unable to fund their portion of any particular project. We may use a portion of our cash and cash equivalents to repay all or a portion of the notes that we have issued to Bristol-Myers Squibb Company (formerly DuPont Pharmaceuticals) or for possible acquisitions.

In December 2001, we amended and restated our senior secured credit facility with a number of lenders, including affiliates of certain of the underwriters of our recent public offering. This amended and restated credit facility provides for a line of credit of \$75.0 million and a delayed draw term loan of \$25.0 million. The line of credit and delayed draw term loan mature December 21, 2006. Any loans outstanding under the credit facility are secured by a first priority security interest in substantially all of our assets. The credit facility contains representations and warranties, covenants, events of default and other provisions customarily found in similar agreements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

During the fourth quarter of 2001, we repaid the remaining outstanding balance of our variable rate term loans. Prior to the repayment of our variable rate term loans, our primary market risk exposure was to changes in interest rates (LIBOR) on our variable rate borrowings. As of March 31, 2002, we only have outstanding fixed rate borrowings. These fixed rate borrowings are substantially comprised of promissory notes payable to Bristol-Myers Squibb issued in consideration for manufacturing and supply services provided under the Manufacturing and Supply Agreement. The promissory notes issued annually over the initial five year term of the Manufacturing and Supply Agreement have an aggregate face value of \$23.0 million per year and are payable on August 26, 2002. The promissory notes bear no interest and therefore have been discounted in the accompanying financial statements using our borrowing rate for similar instruments at the time of borrowing. We also financed a portion of the purchase price of the Acquisition through the issuance of a promissory note to DuPont. The note has a face value of \$3.9 million and is payable on August 26, 2002. The promissory note bears no interest and therefore has been discounted in the

Table of Contents

accompanying financial statements using a rate which approximates our borrowing rate for similar instruments at the time of borrowing. On December 21, 2001, we entered into a new credit facility that provides for a line of credit of \$75.0 million and a delayed draw term loan of \$25.0 million. Borrowings under the new credit facility are variable rate borrowings. There are no amounts outstanding under the new credit facility. We do not utilize financial instruments for trading purposes and hold no derivative financial instruments that could expose us to significant market risk. We monitor interest rates and enter into interest rate agreements as considered appropriate.

PART II

OTHER INFORMATION

Item 1. *Legal Proceedings.*

On October 20, 2000, The Purdue Frederick Company and related companies (Purdue Frederick) filed suit against us and our subsidiary, Endo Pharmaceuticals Inc. (EPI), in the U.S. District Court for the Southern District of New York alleging that EPI's bioequivalent version of Purdue Frederick's OxyContin® (oxycodone hydrochloride extended-release tablets), 40mg strength, infringes three of its patents. This suit arose after EPI provided the plaintiffs with notice that its ANDA submission for a bioequivalent version of Purdue Frederick's OxyContin®, 40mg strength, challenged the listed patents for OxyContin® 40mg tablets. On March 13, 2001, Purdue Frederick filed a second suit against us and EPI in the U.S. District Court for the Southern District of New York alleging that EPI's bioequivalent versions of Purdue Frederick's OxyContin®, 10mg and 20mg strengths, infringe the same three patents. This suit arose from EPI having amended its earlier ANDA on February 9, 2001 to add bioequivalent versions of the 10mg and 20mg strengths of OxyContin®. On August 30, 2001, Purdue Frederick filed a third suit against us and EPI in the U.S. District Court for the Southern District of New York alleging that EPI's bioequivalent version of Purdue Frederick's OxyContin®, 80mg strength, infringes the same three patents. This suit arose from EPI having amended its earlier ANDA on July 30, 2001 to add the bioequivalent version of the 80mg strength of OxyContin®.

For each of the 10mg, 20mg, 40mg and 80mg strengths of this product, EPI made the required Paragraph IV certification against the patents listed in the FDA's Orange Book as covering these strengths of OxyContin®. EPI has pleaded counterclaims that the patents asserted by Purdue Frederick are invalid, unenforceable and/or not infringed by EPI's formulation of oxycodone hydrochloride extended-release tablets, 10mg, 20mg, 40mg and 80mg strengths. EPI has also counterclaimed for antitrust damages based on allegations that Purdue Frederick obtained the patents through fraud on the United States Patent and Trademark Office and is asserting them while aware of their invalidity and unenforceability. However, we cannot make any assurances as to the outcome of this patent challenge. Purdue Frederick was granted a preliminary injunction (Purdue Pharma L.P. v. Boehringer Ingelheim GmbH, 98 F. Supp. 2d 362 (SDNY 2000)), which decision was affirmed on appeal (Purdue Pharma L.P. v. Boehringer Ingelheim GmbH, 237 F.3d 1359 (Fed. Cir. 2001)), against a different manufacturer based on the same patents that are being asserted against us and EPI, and in the same court in which Purdue Frederick sued. We believe the defenses rejected in the preliminary injunction decision and in the appellate decision do not substantially impact the principal defenses raised by us and EPI.

On November 15, 2001, SmithKline Beecham Corporation (and related companies) filed suit against EPI in the U.S. District Court for the Eastern District of Pennsylvania alleging that EPI's bioequivalent version of SmithKline's Paxil®, 40 mg strength, infringes five of its patents. The FDA accepted EPI's ANDA submission for a bioequivalent version of SmithKline's Paxil®, 40 mg strength, earlier in 2001. In this ANDA, EPI made the required Paragraph IV certification against all of the SmithKline patents listed in the FDA's Orange Book as covering Paxil®. Paxil® is indicated for the treatment of depression, obsessive compulsive disorder and panic disorder. Although we believe the patents asserted by SmithKline Beecham are invalid and/or not infringed, no assurance can be given as to the outcome of this patent challenge process.

Litigation similar to that described above may also result from products we currently have in development, as well as those that we may develop in the future. We, however, cannot predict the timing or outcome of any such litigation, or whether any such litigation will be brought against us.

Table of Contents

On November 15, 2001, EPI was named, along with ten other pharmaceutical companies, as a defendant in a class action lawsuit filed by Bennie Toombs in the United States District Court for the Western District of Louisiana. According to the complaint, each of the defendant pharmaceutical companies had allegedly manufactured and sold products containing phenylpropanolamine (PPA). The complaint alleges that the defendants failed to adequately warn plaintiff of the hazards of the use of the subject products containing PPA and that as a result of this failure to warn, plaintiffs suffered injury. The action has been transferred by order of the United States Judicial Panel on Multidistrict Litigation to the Western District of Washington, where it has been consolidated for pretrial proceedings with other cases involving claims against manufacturers of PPA-containing products. EPI is not a party to any of these other actions and intends to vigorously defend itself in the *Toombs* litigation.

In addition to the above, the Company is involved in, or has been involved in, arbitrations or legal proceedings that arise from the normal course of its business. The Company cannot predict the timing or outcome of these claims and proceedings. Currently, the Company is not involved in any arbitration and/or legal proceeding that it expects to have a material effect on its business, financial condition or results of operations and cash flows.
