SANDERSON FARMS, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
January 31, 2010

NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation have been included. Operating results for the three months ended January 31, 2010 are not necessarily indicative of the results that may be expected for the year ending October 31, 2010.

The consolidated balance sheet at October 31, 2009 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. For further information, reference is made to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended October 31, 2009.

Subsequent events have been evaluated through the time of filing on February 23, 2010 which represents the date the Condensed Consolidated Financial Statements were issued.

NOTE 2 INVENTORIES

Inventories consisted of the following:

	January 31, 2010	October 31, 2009
	(In thousands)	
Live poultry-broilers and breeders	\$ 98,568	\$ 88,054
Feed, eggs and other	21,628	20,637
Processed poultry	22,548	20,768
Processed food	5,289	6,796
Packaging materials	4,662	4,266
	\$ 152,695	\$ 140,521

Inventories of live poultry and feed, eggs and other were higher at January 31, 2010 as compared to October 31, 2009. This increase is the result of normal inventory reductions at October 31, 2009 in anticipation of the holiday season when demand for chicken is historically at its lowest point in the year.

The increase in inventory of processed poultry resulted primarily from additional units of export product in inventory at January 31, 2010 as compared to October 31, 2009, which resulted from the timing of export sales.

NOTE 3 STOCK COMPENSATION PLANS

Refer to Note 8 of the Company's October 31, 2009 audited financial statements for further information on our employee benefit plans and stock based compensation plans. Total stock based compensation expense during the three months ended January 31, 2010 and January 31, 2009 was \$2,688,000 and \$866,000, respectively, and is detailed below.

During the three months ended January 31, 2010, participants in the Company's Management Share Purchase Plan purchased a total of 10,125 shares of restricted stock at an average price of \$42.95 per share and the Company issued 2,504 matching restricted shares. During the three months ended January 31, 2010 and 2009 the Company recorded compensation cost, included in the total stock based compensation expense above, of \$54,000 and \$52,000, respectively, related to the Management Share Purchase Plan.

On November 1, 2009, the Company entered into performance share agreements that grant certain officers and key employees the right to receive a target number of 70,000 shares of the Company's common stock, subject to the Company's achievement of certain performance measures. The Company also has performance share agreements in place with certain officers and key employees that were entered into during fiscal 2008 and 2009. The aggregate target number of shares specified in performance share agreements outstanding as of January 31, 2010 totaled 196,637. The Company recorded compensation cost, included in the total stock based compensation expense above, of \$1,028,000 and \$0 during the three months ended January 31, 2010 and January 31, 2009, respectively, related to the performance share agreements entered into during 2009 and 2010. No compensation cost has been recorded for the performance share agreements entered into in fiscal 2008.

Table of Contents

Also on November 1, 2009 the Company granted 70,000 shares of restricted stock to certain officers and key management employees. The restricted stock had a grant date fair value of \$36.80 per share and vests four years from the date of the grant. On December 21, 2009, the Company granted 31,850 shares of restricted stock to key management employees. The restricted stock had a grant date fair value of \$41.94 per share with 50% of the shares vesting immediately on December 21, 2009 and the remaining 50% of shares vesting one year later on December 21, 2010. The Company also has non-vested restricted stock grants outstanding that were granted during the five previous fiscal years with certain officers, key employees and outside directors. The aggregate number of shares outstanding at January 31, 2010 related to all restricted stock grants totaled 527,091. During the three months ended January 31, 2010 and 2009 the Company recorded compensation cost, included in the total stock based compensation expense above, of \$1,606,000 and \$814,000, respectively, related to restricted stock grants.

NOTE 4 EARNINGS PER SHARE

In June 2008, the Financial Accounting Standards Board (FASB) issued FSP EITF No. 03-6-1, codified in ASC 260, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. ASC 260 clarifies that share-based payment awards entitling holders to receive non-forfeitable dividends before vesting should be considered participating securities and thus included in the calculation of basic earnings per share. Effective November 1, 2009, these awards are now included in the calculation of basic earnings per share under the two-class method, a change that reduces both basic and diluted earnings per share. The two-class method allocates earnings for the period between common shareholders and other security holders. The participating awards receiving dividends will be allocated the same amount of income as if they were outstanding shares. All prior period earnings per share data presented have been adjusted retrospectively to conform to the provisions of the new requirements. Previously, the Company included unvested share payment awards in the calculation of diluted earnings per share under the treasury stock method.

The following table presents the effect the adoption of ASC 260 has on affected financial statement line items, weighted average shares outstanding, and per share amounts for the three months ended January 31, 2010 and 2009. The adoption had no effect on the Company's retained earnings or other components of equity.

		For the three months ended			
		January 31, 2010		January 31, 2009	
		Two-class	Treasury	Two-class	Treasury
		method	stock	method	stock
		(In thousands, except share and per share data)			
Net income (loss)		\$ 15,817	\$ 15,817	(\$6,749)	(\$6,749)
Distributed and undistributed (earnings) losses to unvested restricted stock		(\$457)	\$ 0	\$ 152	\$ 0
Distributed and undistributed earnings (losses) to common shareholders	Basic	\$ 15,360	\$ 15,817	(\$6,597)	(\$6,749)
Weighted average shares outstanding	Basic	20,360	20,360	20,296	20,296
Weighted average shares outstanding	Diluted	20,370	20,744	20,296	20,296
Earnings (loss) per common share	Basic	\$ 0.75	\$ 0.78	(\$0.33)	(\$0.33)
Earnings (loss) per common share	Diluted	\$ 0.75	\$ 0.76	(\$0.33)	(\$0.33)

NOTE 5 NEW ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued SFAS No. 157 Fair Value Measurements (SFAS 157), codified in ASC 820. This standard defines fair value, establishes a framework for measuring fair value in accordance with accounting principles generally accepted in the United States of America and expands disclosure about fair value measurements. This pronouncement applies whenever other accounting standards require or permit assets or liabilities to be measured

at fair value. Accordingly, this statement does not require any new fair value measurements. The Company adopted ASC 820 effective November 1, 2008 for its financial assets and liabilities

Table of Contents

and the adoption had no material effect on the Company's consolidated financial position, results of operations or cash flows. The Company adopted ASC 820 for its non-financial assets and liabilities that are recognized at fair value on a non-recurring basis on November 1, 2009 and the adoption did not have a material impact on the Company's consolidated financial position, results of operations or cash flows.

NOTE 6 FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts for cash and temporary cash investments approximate their fair values. Fair values for debt are based on quoted market prices or published forward interest rate curves. The fair value and carrying value of the Company's borrowings under its credit facilities, long-term debt and capital lease obligations were as follows (in millions):

	January 31, 2010		October 31, 2009	
	Fair Value	Carrying Value	Fair Value	Carrying Value
Total Debt (in millions)	\$109	\$ 104	\$109	\$ 104

NOTE 7 OTHER MATTERS

The Company is involved in various claims and litigation incidental to its business. Although the outcome of these matters cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operations or financial position. The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. After a considerable analysis of each case, the Company determines the amount of reserves required, if any. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed reasonably estimable and probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of reserves or by accruals of losses to reflect any adverse determinations in these legal proceedings.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Sanderson Farms, Inc.

We have reviewed the condensed consolidated balance sheet of Sanderson Farms, Inc. and subsidiaries as of January 31, 2010, and the related condensed consolidated statements of operations and cash flows for the three-month periods ended January 31, 2010 and 2009. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Sanderson Farms, Inc. and subsidiaries as of October 31, 2009, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended not presented herein, and in our report dated December 21, 2009, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of October 31, 2009, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ Ernst & Young LLP

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
General

The following Discussion and Analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations included in Item 7 of the Company's Annual Report on Form 10-K for its fiscal year ended October 31, 2009.

This Quarterly Report, and other periodic reports filed by the Company under the Securities Exchange Act of 1934, and other written or oral statements made by it or on its behalf, may include forward-looking statements, which are based on a number of assumptions about future events and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and estimates expressed in such statements. These risks, uncertainties and other factors include, but are not limited to the following:

- (1) Changes in the market price for the Company's finished products and feed grains, both of which may fluctuate substantially and exhibit cyclical characteristics typically associated with commodity markets.
- (2) Changes in economic and business conditions, monetary and fiscal policies or the amount of growth, stagnation or recession in the global or U.S. economies, either of which may affect the value of inventories, the collectability of accounts receivable or the financial integrity of customers, and the ability of the end user or consumer to afford protein.
- (3) Changes in the political or economic climate, trade policies, laws and regulations or the domestic poultry industry of countries to which the Company or other companies in the poultry industry ship product, and other changes that might limit the Company's or the industry's access to foreign markets.
- (4) Changes in laws, regulations, and other activities in government agencies and similar organizations applicable to the Company and the poultry industry and changes in laws, regulations and other activities in government agencies and similar organizations related to food safety.
- (5) Various inventory risks due to changes in market conditions.
- (6) Changes in and effects of competition, which is significant in all markets in which the Company competes, and the effectiveness of marketing and advertising programs. The Company competes with regional and national firms, some of which have greater financial and marketing resources than the Company.
- (7) Changes in accounting policies and practices adopted voluntarily by the Company or required to be adopted by accounting principles generally accepted in the United States.
- (8) Disease outbreaks affecting the production performance and/or marketability of the Company's poultry products.
- (9) Changes in the availability and cost of labor and growers.

Readers are cautioned not to place undue reliance on forward-looking statements made by or on behalf of Sanderson Farms. Each such statement speaks only as of the day it was made. The Company undertakes no obligation to update or to revise any forward-looking statements. The factors described above cannot be controlled by the Company. When used in this quarterly report, the words "believes", "estimates", "plans", "expects", "should", "outlook", and "anticipates" expressions as they relate to the Company or its management are intended to identify forward-looking statements. The Company's poultry operations are integrated through its control of all functions relative to the production of its chicken products, including hatching egg production, hatching, feed manufacturing, raising chickens to marketable age ("grow out"), processing, and marketing. Consistent with the poultry industry, the Company's profitability is substantially impacted by the market prices for its finished products and feed grains, both of which may fluctuate substantially and exhibit cyclical characteristics typically associated with commodity markets. Other costs, excluding feed grains, related to the profitability of the Company's poultry operations, including hatching egg production, hatching, growing, and processing cost, are responsive to efficient cost containment programs and management practices.

The Company's prepared chicken product line includes approximately 75 institutional and consumer packaged chicken items that it sells nationally, primarily to distributors and food service establishments. A majority of the prepared chicken items are made to the specifications of food service users.

Table of Contents

On January 12, 2006, the Company announced that sites in Waco and McLennan County, Texas had been selected for the construction of a new poultry complex, consisting of a processing plant, hatchery and wastewater treatment facility. The processing plant began processing chickens on August 6, 2007, and was originally planned to reach full production of approximately 1.25 million head of chickens per week during the fourth quarter of fiscal 2008. However, because of poor market fundamentals in the second half of calendar 2008, moving the plant to full capacity was delayed until the third quarter of fiscal 2009.

Sanderson Farms announced plans on April 24, 2008, to invest approximately \$126.5 million for construction of a new feed mill, poultry processing plant and hatchery on separate sites in Kinston and Lenoir County, North Carolina. On June 26, 2008, the Company announced its decision to postpone the project due to market conditions and escalating grain prices. On July 23, 2009, the Company announced plans to proceed with the construction and start-up of the Company's Kinston, North Carolina, poultry complex with a revised budget of approximately \$121.4 million. The Kinston facilities will comprise a state-of-the-art poultry complex with the capacity to process 1.25 million birds per week for the retail chill pack market. At full capacity, the complex will employ approximately 1,500 people, will require 130 contract growers, and will be equipped to process and sell 6.7 million pounds per week of dressed poultry meat. Construction began during August 2009 and the Company expects initial operation of the new complex to begin during the first quarter of fiscal 2011.

EXECUTIVE OVERVIEW OF RESULTS

The Company's margins improved primarily as a result of higher overall market prices for poultry products during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. The Company believes overall market prices for poultry products have improved due more from the tightening of the supply of poultry products than an improvement in demand from consumers. While demand for fresh chicken in the retail grocery store market has been stable, demand for chicken consumed away from home has remained soft. The Company expects demand for chicken products in food service markets to remain soft through fiscal 2010 and until overall economic conditions in the United States and traffic in restaurants improve. In addition to improved poultry markets, the average cost of feed in broiler flocks sold during the first quarter of fiscal 2010 as compared to the same quarter a year ago decreased 1.38 cents per pound, or 4.6%. Feed grain market prices remain relatively high versus historical averages, but market prices have decreased from January highs following the USDA's crop estimates issued January 12, 2010. While the company has not priced all of its grain needs for the balance of the fiscal year, had we priced those needs at February 22, 2010 market prices, feed grain costs would be approximately \$1.3 million lower during fiscal 2010 as compared to fiscal 2009.

RESULTS OF OPERATIONS

Net sales for the three months ended January 31, 2010 were \$420.1 million as compared to \$388.9 million for the three months ended January 31, 2009, an increase of \$31.2 million or 8.0%. Net sales of poultry products for the three months ended January 31, 2010 and January 31, 2009 were \$391.5 million and \$360.7 million, respectively, an increase of \$30.8 million or 8.5%. The increase in net sales of poultry products resulted from an increase in the average sales price of poultry products of 12.5%, partially offset by a decrease in the pounds of poultry products sold of 3.5%. The Company actually processed 21.9 million more pounds of poultry products during the first quarter of 2010 as compared to the first quarter of fiscal 2009 as a result of the planned reductions in pounds of poultry produced during the first quarter of fiscal 2009 in response to weak demand from food service customers, but this increase in pounds processed was offset by fewer pounds of export products sold during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. As a result, processed pounds in inventory increased by 11 million pounds during the quarter. Overall market prices for poultry products improved during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. Urner Barry market prices for bulk leg quarters, boneless breast meat and tenders increased during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 by 11.6%, 6.2% and 2.9%, respectively. In addition, market prices for jumbo wings were at historically high levels averaging 36.4% higher during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. A simple average of the Georgia dock prices for whole birds decreased 5.3% during the first quarter of fiscal 2010 as compared to the same period a year ago. Net sales of prepared chicken products for the three months ended January 31, 2010 and 2009 were \$28.6 million and \$28.2 million, respectively, or an increase of 1.7%. This increase resulted from an increase in the

average sales price of prepared chicken products sold of 2.1%, offset by a slight decrease in the pounds of prepared chicken products sold of 50,000 pounds or 0.4%.

Cost of sales for the first quarter of fiscal 2010 was \$378.0 million as compared to \$383.9 million during the first quarter of fiscal 2009, a decrease of \$5.9 million or 1.5%. Cost of sales of poultry products sold during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 were \$352.6 million and \$358.8 million, respectively, a decrease of \$6.2 million or 1.7%. As illustrated in the table below, the decrease in the cost of sales of poultry products sold resulted from a decrease in the pounds of poultry products sold of 3.5%, and a decrease in feed costs per pound of 4.6%. These decreases were offset by an increase in the other cost per pound of poultry products sold of 8.4%.

Table of Contents

Poultry Cost of Sales
(In thousands, except percentages and per pound data)

Description	First Quarter 2010		First Quarter 2009		Incr/(Decr)		% Incr/(Decr)	
	Dollars	Per Pnd	Dollars	Per Pnd	Dollars	Per Pnd	Dollars	Per Pnd
Feed in broiler flocks sold	\$ 165,458	\$0.2832	\$ 179,860	\$0.2970	\$(14,402)	\$(0.0138)	(8.01)%	(4.65)%
All other cost of sales	\$ 187,170	\$0.3204	\$ 178,953	\$0.2955	\$ 8,217	\$ 0.0248	4.59%	8.39%
Total poultry cost of sales	\$ 352,628	\$0.6036	\$ 358,813	\$0.5925	\$ (6,185)	\$ 0.0110	(1.72)%	1.86%

Poultry Pounds

Sold 584,256 605,564

The average cost of feed in broiler flocks sold during the first quarter of fiscal 2010 as compared to the same quarter a year ago decreased \$14.4 million or 1.38 cents per pound. Excluding feed in broiler flocks sold, all other costs of sales increased \$8.2 million or 2.48 cents per pound of poultry products sold. These other costs of sales of poultry products include labor, contract grower pay, packaging, freight and certain fixed costs, among other costs, and the increase per pound in these costs is reflective of the decrease in poultry pounds sold. Costs of sales of the Company's prepared chicken products were \$25.4 million as compared to \$25.1 million during fiscal 2009, an increase of \$316,000 or 1.3%.

Selling, general and administrative costs for the three months ended January 31, 2010 and January 31, 2009 were \$16.4 million and \$11.9 million, respectively. The increase in selling, general and administrative costs of \$4.5 million during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 resulted from additional charges related to the Company's stock compensation plan, as described in note 3 above, and additional administrative charges including \$260,000 related to the start up of the new Kinston and Lenoir County, North Carolina poultry complex. The Company expects start up cost to be \$2.7 million during the final three quarters of fiscal 2010. All such costs will be recorded as administrative costs until the plant begins operations, scheduled to begin during the first quarter of fiscal 2011.

Operating income for the first quarter of fiscal 2010 was \$25.7 million as compared to an operating loss of \$6.9 million for the first quarter of fiscal 2009, an improvement of \$32.6 million. This improvement in the Company's operating income resulted primarily from the overall improvement in market prices of poultry products during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009, as described above.

Interest expense during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 was \$1.1 million and \$3.2 million, respectively. The decrease of \$2.1 million in interest expense during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 resulted primarily from lower average outstanding debt and lower interest rates. During the first quarter of fiscal 2010 the Company capitalized \$51,000 in interest cost to construction of the new complex in Kinston and Lenoir County, North Carolina. The Company did not capitalize any interest cost during the first quarter of fiscal 2009.

The Company's effective tax rate for the first quarter of fiscal 2010 was 35.7% and differs from the statutory federal rate due to state income taxes, certain nondeductible expenses for federal income tax purposes and state tax credits. The Company's effective tax rate during the first quarter of fiscal 2009 was 33.5% and differs from the statutory federal rate due to state income taxes, certain nondeductible expenses for federal income tax purposes and tax credits available as a result of Hurricane Katrina and state credits unrelated to the hurricane. The federal tax credits related to Hurricane Katrina expired on August 29, 2009, and unless Congress extends the credit, the Company will not benefit from such credits during fiscal 2010. Assuming the Katrina credits are not extended, the Company expects its

effective tax rate to be approximately 35.7% for the remainder of fiscal 2010.

Net income for the three months ended January 31, 2010 was \$15.8 million or \$0.75 per share as compared to a net loss of \$6.7 million or \$0.33 per share for the three months ended January 31, 2009.

Liquidity and Capital Resources

The Company's working capital at January 31, 2010 was \$165.1 million and its current ratio was 3.1 to 1. The Company's working capital and current ratio at October 31, 2009 was \$162.7 million and 3.1 to 1. The Company's principal sources of liquidity include cash from operations and borrowings under the Company's \$300.0 million revolving credit facility with nine banks. At January 31, 2010, the Company has \$251.8 million available, if needed, under this revolving credit facility.

Cash flows provided by (used in) operating activities during the first quarter of fiscal 2010 and fiscal 2009 were \$16.0 million and (\$16.4) million, respectively. The improvement in cash flows from operations of \$32.4 million resulted primarily from overall higher market prices for poultry products during the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009, which resulted in increased cash received from customers of \$34.7 million. During fiscal 2010, the Company paid bonuses earned by employees and accrued by the Company during fiscal 2009. During fiscal 2009 the Company did not pay any bonuses.

Table of Contents

Cash flows used in investing activities during the first quarter of fiscal 2010 and 2009 were \$23.3 million and \$7.2 million, respectively. The Company's capital expenditures during the first quarter of fiscal 2010 were \$23.3 million and included \$12.7 million for construction of the Company's new Kinston and Lenoir County, North Carolina complex. During the first quarter of fiscal 2009, the Company spent approximately \$7.2 million on planned capital projects. Excluding the Kinston and Lenoir County complex under construction, the Company's capital expenditures during fiscal 2010 and 2009 were \$10.6 million and \$7.2 million, respectively.

Cash flows provided by (used in) financing activities during the first quarter of fiscal 2010 and 2009 were (\$0.2) million and \$19.8 million, respectively. The Company borrowed no additional funds under its revolving credit facility during the first quarter of fiscal 2010, and funded payments of bonuses earned during fiscal 2009, but paid in fiscal 2010 and payments related to the construction of the new poultry complex in Kinston and Lenoir County, North Carolina from cash flows from operations. During the first quarter of fiscal 2009 the Company's unfavorable profit margin required it to borrow \$20.0 million from its revolving credit facility to fund operations.

The Company's capital budget for fiscal 2010 is approximately \$137.9 million and will be funded by cash on hand, internally generated working capital, cash flows from operations and, if needed, borrowings under the Company's revolving line of credit. The Company has \$251.8 million available under the revolving line of credit at January 31, 2010. The fiscal 2010 capital budget includes approximately \$107.4 million for construction of the poultry complex in Kinston, North Carolina. Excluding the complex in North Carolina, the Company's capital budget for fiscal 2010 would be \$30.5 million.

Sanderson Farms announced plans on April 24, 2008, to invest approximately \$126.5 million for construction of a new feed mill, poultry processing plant and hatchery on separate sites in Kinston and Lenoir County, North Carolina. On June 26, 2008, the Company announced its decision to postpone the project due to market conditions and escalating grain prices. On July 23, 2009, the Company announced plans to proceed with the construction and start-up of the Company's Kinston, North Carolina, poultry complex with a revised budget of approximately \$121.4 million. The Kinston facilities will comprise a state-of-the-art poultry complex with the capacity to process 1,250,000 birds per week for the retail chill pack market. At full capacity, the complex will employ approximately 1,500 people, will require 130 contract growers, and will be equipped to process and sell 6.7 million pounds per week of dressed poultry meat. Construction began during August 2009 and the Company expects initial operations at the new complex to begin during the first quarter of fiscal 2011.

On May 1, 2008, the Company entered into a new revolving credit facility to, among other things, increase the available credit to \$300.0 million, increase the capital expenditure limits to allow construction of the Kinston, North Carolina facility, and to change the covenant requiring a maximum debt to total capitalization ratio of 50% during fiscal 2008, 55% during fiscal 2009 and not to exceed 50% for fiscal 2010 and thereafter. The credit remains unsecured and, unless extended, will expire on May 1, 2013. As of January 31, 2010 the Company had borrowed \$40.0 million under the revolving credit facility.

On October 9, 2008, the Company announced that it filed a Form S-3 shelf registration statement with the Securities and Exchange Commission to register for possible future sale shares of the Company's common and/or preferred stock at an aggregate offering price not to exceed \$1.0 billion. The stock may be offered by the Company in amounts, at prices and on terms to be determined by the board of directors if and when shares are issued.

The Company regularly evaluates both internal and external growth opportunities, including acquisition opportunities and the possible construction of new production assets, and conducts due diligence activities in connection with such opportunities. The cost and terms of any financing to be raised in conjunction with any growth opportunity, including the Company's ability to raise debt or equity capital on terms and at costs satisfactory to the Company, and the effect of such opportunities on the Company's balance sheet, are critical considerations in any such evaluation.

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with accounting standards generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions, and the differences could be material.

The Company's Summary of Significant Accounting Policies, as described in Note 1 of the Notes to the Consolidated Financial Statements that are filed with the Company's latest report on Form 10-K, should be read in conjunction with this Management's Discussion and Analysis of Financial Condition and Results of Operations. Management believes that the critical accounting policies and estimates that are material to the Company's Consolidated Financial Statements are those described below.

Allowance for Doubtful Accounts

In the normal course of business, the Company extends credit to its customers on a short-term basis. Although credit risks associated with our customers are considered minimal, the Company routinely reviews its accounts receivable balances and makes provisions for

Table of Contents

probable doubtful accounts. In circumstances where management is aware of a specific customer's inability to meet its financial obligations to the Company, a specific reserve is recorded to reduce the receivable to the amount expected to be collected. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligations to us), our estimates of the recoverability of amounts due us could be reduced by a material amount, and the allowance for doubtful accounts and related bad debt expense would increase by the same amount.

Inventories

Processed food and poultry inventories and inventories of feed, eggs, medication and packaging supplies are stated at the lower of cost (first-in, first-out method) or market. If market prices for poultry or feed grains move substantially lower, the Company would record adjustments to write down the carrying values of processed poultry and feed inventories to fair market value, which would increase the Company's costs of sales.

Live poultry inventories of broilers are stated at the lower of cost or market and breeders at cost less accumulated amortization. The cost associated with broiler inventories, consisting principally of chicks, feed, medicine and payments to the growers who raise the chicks for us, are accumulated during the growing period. The cost associated with breeder inventories, consisting principally of breeder chicks, feed, medicine and grower payments are accumulated during the growing period. Capitalized breeder costs are then amortized over nine months using the straight-line method. Mortality of broilers and breeders is charged to cost of sales as incurred. If market prices for chicken, feed or medicine or if grower payments increase (or decrease) during the period, the Company could have an increase (or decrease) in the market value of its inventory as well as an increase (or decrease) in costs of sales. Should the Company decide that the nine month amortization period used to amortize the breeder costs is no longer appropriate as a result of operational changes, a shorter (or longer) amortization period could increase (or decrease) the costs of sales recorded in future periods. High mortality from disease or extreme temperatures would result in abnormal charges to cost of sales to write-down live poultry inventories.

Long-Lived Assets

Depreciable long-lived assets are primarily comprised of buildings and machinery and equipment. Depreciation is provided by the straight-line method over the estimated useful lives, which are 15 to 39 years for buildings and 3 to 12 years for machinery and equipment. An increase or decrease in the estimated useful lives would result in changes to depreciation expense.

The Company continually evaluates the carrying value of its long-lived assets for events or changes in circumstances that indicate that the carrying value may not be recoverable. As part of this evaluation, the Company estimates the future cash flows expected to result from the use of the asset and its eventual disposal. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized to reduce the carrying value of the long-lived asset to the estimated fair value of the asset. If the Company's assumptions with respect to the future expected cash flows associated with the use of long-lived assets currently recorded change, then the Company's determination that no impairment charges are necessary may change and result in the Company recording an impairment charge in a future period. The Company did not identify any indicators of impairment during the current fiscal period.

Accrued Self Insurance

Insurance expense for workers' compensation benefits and employee-related health care benefits are estimated using historical experience and actuarial estimates. Stop-loss coverage is maintained with third party insurers to limit the Company's total exposure. Management regularly reviews the assumptions used to recognize periodic expenses. Any resulting adjustments to accrued claims are reflected in current operating results. If historical experience proves not to be a good indicator of future expenses, if management were to use different actuarial assumptions, or if there is a negative trend in the Company's claims history, there could be a significant increase or decrease in cost of sales depending on whether these expenses increased or decreased, respectively.

Income Taxes

The Company determines its effective tax rate by estimating its permanent differences resulting from differing treatment of items for financial and income tax purposes. The Company is periodically audited by taxing authorities and considers any adjustments made as a result of the audits in considering the tax expense. Any audit adjustments

affecting permanent differences could have an impact on the Company's effective tax rate.

Table of Contents

Contingencies

The Company is involved in various claims and litigation incidental to its business. Although the outcome of these matters cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operations or financial position. The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. After a considerable analysis of each case, the Company determines the amount of reserves required, if any. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed reasonably estimable and probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of reserves or by accruals of losses to reflect any adverse determinations in these legal proceedings.

New Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157 Fair Value Measurements (SFAS 157), codified in ASC 820. This standard defines fair value, establishes a framework for measuring fair value in accordance with accounting principles generally accepted in the United States of America and expands disclosure about fair value measurements. This pronouncement applies whenever other accounting standards require or permit assets or liabilities to be measured at fair value. Accordingly, this statement does not require any new fair value measurements. The Company adopted ASC 820 effective November 1, 2008 for its financial assets and liabilities and the adoption had no material effect on the Company's consolidated financial position, results of operations or cash flows. The Company adopted ASC 820 for its non-financial assets and liabilities that are recognized at fair value on a non-recurring basis on November 1, 2009 and the adoption did not have a material impact on the consolidated financial position results of operations or cash flows.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company is a purchaser of certain commodities, primarily corn and soybean meal, for use in manufacturing feed for its chickens. As a result, the Company's earnings are affected by changes in the price and availability of such feed ingredients. Feed grains are subject to volatile price changes caused by factors described below that include demand, weather, size of harvest, transportation and storage costs and the agricultural policies of the United States and foreign governments. The price fluctuations of feed grains have a direct and material effect on the Company's profitability. The Company generally will purchase feed ingredients for deferred delivery that typically range from one month to twelve months after the time of purchase. Once purchased, the Company can price its grain at market prices at any time prior to delivery of the grain. The grain purchases are made directly with our usual grain suppliers, which are companies in the regular business of supplying grain to end users, and do not involve options to purchase. The pricing of such purchases occur when senior management concludes that market factors indicate that prices at the time the grain is needed are likely to be higher than current prices, or where, based on current and expected market prices for the Company's poultry products, management believes it can price feed ingredients at levels that will allow the Company to earn a reasonable return for its shareholders. Market factors considered by management in determining whether or not and to what extent to buy grain for deferred delivery and to price grain include:

Current market prices;

Current and predicted weather patterns in the United States, South America, China and other grain producing areas, as such weather patterns might affect the planting, growing, harvesting and yield of feed grains;

The expected size of the harvest of feed grains in the United States and other grain producing areas of the world as reported by governmental and private sources;

Current and expected changes to the agricultural policies of the United States and foreign governments;

The relative strength of United States currency and expected changes therein as it might impact the ability of foreign countries to buy United States feed grain commodities;

The current and expected volumes of export of feed grain commodities as reported by governmental and private sources;

The current and expected use of available feed grains for uses other than as livestock feed grains (such as the use of corn for the production of ethanol, which use is impacted by the price of crude oil and governmental policy); and

Current and expected market prices for the Company's poultry products.

Table of Contents

The Company purchases physical grain, not financial instruments such as puts, calls or straddles that derive their value from the value of physical grain. Thus, the Company does not use derivative financial instruments as defined by SFAS 133, Accounting for Derivative Instruments and Hedging Activities. The Company does not enter into any derivative transactions or purchase any grain-related contracts other than the physical grain contracts described above.

The cost of feed grains is recognized in cost of sales, on a first-in-first-out basis, at the same time that the sales of the chickens that consume the feed grains are recognized.

The Company's interest expense is sensitive to changes in the general level of U.S. interest rates. The Company maintains certain of its debt as fixed rate in nature to mitigate the impact of fluctuations in interest rates. The fair value of the Company's fixed rate debt approximates the carrying amount at January 31, 2010. Management believes the potential effects of near-term changes in interest rates on the Company's debt are not material.

The Company is a party to no other market risk sensitive instruments requiring disclosure.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of January 31, 2010. There have been no changes in the Company's internal control over financial reporting during the fiscal quarter ended January 31, 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in various claims and litigation incidental to its business. Although the outcome of these matters cannot be determined with certainty, management, upon the advice of counsel, is of the opinion that the final outcome should not have a material effect on the Company's consolidated results of operations or financial position. The Company recognizes the costs of legal defense for the legal proceedings to which it is a party in the periods incurred. After a considerable analysis of each case, the Company determines the amount of reserves required, if any. At this time, the Company has not accrued any reserve for any of these matters. Future reserves may be required if losses are deemed reasonably estimable and probable due to changes in the Company's assumptions, the effectiveness of legal strategies, or other factors beyond the Company's control. Future results of operations may be materially affected by the creation of reserves or by accruals of losses to reflect any adverse determinations in these legal proceedings.

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in the Company's Form 10-K for the fiscal year ended October 31, 2009 other than as reflected in the revised risk factors set forth below:

A decrease in demand for our products in the export markets could materially and adversely affect our results of operations.

Nearly all of our customers are based in the United States, but some of our United States based customers resell frozen poultry products in the export markets. Our chicken products are sold in Russia and other former Soviet countries, China and Mexico, among other countries. Any disruption to the export markets, such as trade embargos, import bans, duties or quotas could materially impact our sales or create an oversupply of chicken in the United States. This, in turn, could cause domestic poultry prices to decline. Any quotas or bans in the future could materially and adversely affect our sales and our results of operations.

On January 19, 2010, Russia banned imports of U.S. poultry because of its concerns about the U.S. practice of treating poultry meat with chlorine to kill bacteria that can cause food poisoning. On February 5, 2010, China announced that it would impose

Table of Contents

anti-dumping duties on U.S. chicken products beginning on February 13, 2010. The duty applicable to Sanderson Farms products is 64.5%. Since the imposition of the Russian embargo and the Chinese duty, our customers who resell our frozen chicken products in Russia and China have been able to sell those products in alternative markets. However, this could create an oversupply of chicken in those other markets and could cause poultry prices in those other markets to decline, which would adversely affect our results of operations. If an oversupply of chicken products in those markets occurs, we may sell those products in the United States. This, in turn, could cause domestic poultry prices to decline, which would further adversely affect our results of operations.

Inclement weather, such as excessive heat or storms, could hurt our flocks, which could in turn have a material adverse affect on our results of operations.

Extreme weather in the Gulf South region where we operate, such as excessive heat, hurricanes or other storms, could impair the health or growth of our flocks or interfere with our hatching, production or shipping operations. Some scientists believe that climate change could increase the frequency and severity of adverse weather events. Extreme weather, regardless of its cause, could affect our business due to power outages; fuel shortages; damage to infrastructure from powerful winds, rising water or extreme temperatures; disruption of shipping channels; less efficient or non-routine operating practices necessitated by adverse weather or increased costs of insurance coverage in the aftermath of such events, among other things. Any of these factors could materially and adversely affect our results of operations. We may not be able to recover through insurance all of the damages, losses or costs that may result from weather events, including those that may be caused by climate change.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

During its first fiscal quarter, the company repurchased shares of its common stock as follows:

Period		(a) Total Number of Shares Purchased ¹	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ²	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
November 1, 2009	November 30, 2009	10,414	\$ 39.91	10,414	976,624
December 1, 2009	December 31, 2009	5,147	\$ 42.00	5,147	971,477
January 1, 2010	January 31, 2010	0	\$ 00.00	0	971,477
Total		15,561	\$ 40.60	15,561	971,477

¹ All purchases were made pursuant to the Company's Stock Incentive Plan under which participants may satisfy tax withholding obligations incurred upon the vesting of restricted stock by requesting the Company to withhold shares with a value equal to the amount of the withholding obligation.

² On October 22, 2009, the Company announced that its Board of Directors

expanded its stock repurchase program to cover the repurchase of up to 1 million shares. The Company had previously announced on April 28, 2008 that its Board of Directors had authorized the repurchase of up to 225,000 shares over a period of four years from that date. Under the stock repurchase program, shares may be purchased from time to time at prevailing prices in open market transactions or in negotiated purchases, subject to market conditions, share price and other considerations. The Company has repurchased 28,523 shares as of January 31, 2010 under the authorized stock repurchase program.
