**LIFE TECHNOLOGIES CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

1. Basis of Presentation

Financial Statement Preparation

The unaudited consolidated financial statements have been prepared by Life Technologies Corporation according to the rules and regulations of the Securities and Exchange Commission (SEC) and, therefore, certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted. The Company has evaluated subsequent events through the date the financial statements were issued.

In the opinion of management, the accompanying unaudited consolidated financial statements for the periods presented reflect all adjustments, which are normal and recurring, necessary to fairly state the financial position, results of operations and cash flows. These unaudited consolidated financial statements should be read in conjunction with the audited financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009 filed with the SEC on February 26, 2010.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principles of Consolidation

The consolidated financial statements include the accounts of Life Technologies Corporation and its majority owned or controlled subsidiaries collectively referred to as Life Technologies (the Company). All significant intercompany accounts and transactions have been eliminated in consolidation. For purposes of these Notes to Consolidated Financial Statements, gross profit is defined as revenues less cost of revenues including amortization of purchased intangibles and gross margin is defined as gross profit divided by revenues. Operating income is defined as gross profit less operating expenses, and operating margin is defined as operating income divided by revenues.

Reclassification

The Company has reclassified the historically presented divisional revenue to conform to the current year presentation. The reclassification had no impact on previously reported results of operations or financial position.

Long-Lived Assets

The Company periodically re-evaluates the original assumptions and rationale utilized in the establishment of the carrying value and estimated lives of its long-lived assets. The criteria used for these evaluations include management's estimate of the asset's continuing ability to generate income from operations and positive cash flow in future periods as well as the strategic significance of any intangible asset to the Company's business objectives. If assets are considered to be impaired, the impairment recognized is the amount by which the carrying value of the assets exceeds the fair value of the assets, which is determined by applicable market prices, when available. The Company did not recognize a significant impairment during the period.

Computation of Earnings Per Share

Basic earnings per share are computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect the potential dilution that could occur from the following items:

Convertible subordinated notes where the effect of those securities is dilutive;

Dilutive stock options;

Table of Contents

Dilutive restricted stock; and

Dilutive Employee Stock Purchase Plan (ESPP)

Computations for basic and diluted earnings per share are as follows:

	Net Income	Shares	Earnings Per Share
(in thousands, except per share data) (unaudited)	(Numerator)	(Denominator)	
Three Months Ended March 31, 2010			
Basic earnings per share:

Net income plus assumed conversions	\$ 15,604	175,380	\$ 0.09
Potentially dilutive securities not included above since they are antidilutive:			
Antidilutive stock options		17,803	
3 ¹ / ₄ % Convertible Senior Notes due 2025		7,124	
2% Convertible Senior Notes due 2023		10,258	
1 ¹ / ₂ % Convertible Senior Notes due 2024		8,821	

Share-Based Compensation

The Company has various stock plans in which share-based compensation has been made or will be made in future periods. Under these plans, the Company has the ability to grant stock options, restricted stock units and restricted stock awards. Stock option awards are granted to eligible employees and directors at an exercise price equal to no less than the fair market value of such stock on the date of grant, generally vest over a period of time ranging up to five years, are exercisable in whole or in installments and expire ten years from the date of grant. Restricted stock awards

and restricted stock units are granted to eligible employees and directors and represent rights to receive shares of common stock at a future date.

Prior to February 1, 2010, the Company had a qualified (the 2004 Plan) employee stock purchase plan whereby eligible employees of Life Technologies (previously known as Invitrogen Corporation) could elect to withhold up to 15% of their compensation to purchase shares of the Company's stock on a quarterly basis at a discounted price equal to 85% of the lower of the employee's offering price or the closing price of the stock on the date of purchase. The Company also had a qualified (the 1999 Plan) employee stock purchase plan whereby eligible legacy Applied Biosystems Inc. (AB) employees could elect to withhold up to 10% of their compensation to purchase shares of the Company's stock on a quarterly basis at a discounted price equal to 85% of the lower of the employee's offering price or the closing price of the stock on the date of purchase.

Effective February 1, 2010 the Company has a new qualified employee stock purchase plan (the 2010 Plan) which will ultimately cover all eligible employees of the Company. Eligible employees may elect to withhold up to 15% of their compensation to purchase shares of the Company's stock on a quarterly basis at a discounted price equal to 85% of the lower of the employee's offering price or the closing price of the stock on the date of purchase. The 2010 Plan replaces the 1999 Plan acquired as a result of the AB acquisition. Employees grandfathered under the 2004 Plan may continue to purchase under the 2004 Plan for a maximum of two years from the offering date of their subscription.

Table of Contents

The Company uses the Black-Scholes option-pricing model (Black-Scholes model) to value share-based employee stock option and purchase right awards. The determination of fair value of stock-based payment awards using an option-pricing model requires the use of certain estimates and assumptions that affect the reported amount of share-based compensation cost recognized in the Consolidated Statements of Operations. Among these include the expected term of options, estimated forfeitures, expected volatility of the Company's stock price, expected dividends and the risk-free interest rate.

The expected term of share-based awards represents the weighted-average period the awards are expected to remain outstanding and is an input in the Black-Scholes model. In determining the expected term of options, the Company considered various factors including the vesting period of options granted, employees' historical exercise and post-vesting employment termination behavior, expected volatility of the Company's stock and aggregation by homogeneous employee groups. The Company used a combination of the historical volatility of its stock price and the implied volatility of market-traded options of the Company's stock with terms of up to approximately two years to estimate the expected volatility assumption input to the Black-Scholes model in accordance with *ASC Topic 718, Compensation - Stock Compensation*. The Company's decision to use a combination of historical and implied volatility was based upon the availability of actively traded options of its stock and its assessment that such a combination was more representative of future expected stock price trends. The risk-free interest rate is based upon United States Treasury securities with remaining terms similar to the expected term of the share-based awards. The expected dividend yield assumption is based on the Company's expectation of future dividend payouts. The Company has never declared or paid any cash dividends on its common stock and currently does not anticipate paying such cash dividends.

Stock Options and Purchase Rights

The underlying assumptions used to value employee stock options and purchase rights granted during the three months ended March 31, 2010 and 2009 were as follows:

(unaudited)	Three months ended March 31,	
	2010	2009
<i>Stock Options</i>		
Weighted average risk free interest rate	1.99%	1.68%
Expected term of share-based awards	4.4 yrs	4.5 yrs
Expected stock price volatility	31%	46%
Expected dividend yield	0%	0%
Weighted average fair value of share-based awards granted	\$ 14.77	\$ 11.39
<i>Purchase Rights</i>		
Weighted average risk free interest rate	0.59%	1.61%
Expected term of share-based awards	0.82 yrs	0.4 yrs
Expected stock price volatility	44%	52%
Expected dividend yield	0%	0%
Weighted average fair value of share-based awards granted	\$ 9.06	\$ 7.87

The Company is required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods on a cumulative basis in the period the estimated forfeiture rate changes. The Company considered its historical experience of pre-vesting option forfeitures as the basis to arrive at its estimated annual pre-vesting option forfeiture rate of 5.7% and 6.5% per year for the three months ended March 31, 2010 and 2009, respectively. All option awards, including those with graded vesting, were valued as a single award with a single average expected term and are amortized on a straight-line basis over the requisite service period of the awards, which is generally the vesting period. At March 31, 2010, there was \$66.2 million remaining in unrecognized compensation cost related to employee stock options, which is expected to be recognized over a weighted average period of 1.9 years. No compensation cost was capitalized in inventory during the three months ended March 31, 2010 as the amounts involved were not material.

Edgar Filing: Life Technologies Corp - Form 10-Q

Total share-based compensation expense for employee stock options and purchase rights for the three months ended March 31, 2010 and 2009 was comprised of the following:

(in thousands, except per share amounts) (unaudited)	Three months ended March 31,	
	2010	2009
Cost of revenues	\$ 1,305	\$ 913
Selling, general and administrative	7,581	7,678
Research and development	1,622	1,304
Share-based compensation expense before taxes	10,508	9,895
Related income tax benefits	2,840	2,594
Share-based compensation expense, net of taxes	\$ 7,668	\$ 7,301
Net share-based compensation expense per common share:		
Basic	\$ 0.04	\$ 0.04
Diluted	\$ 0.04	\$ 0.04

Table of Contents

Restricted Stock Units

Restricted stock units represent a right to receive shares of common stock at a future date determined in accordance with the participant's award agreement. An exercise price and monetary payment are not required for receipt of restricted stock units or the shares issued in settlement of the award. Instead, consideration is furnished in the form of the participant's services to the Company. Restricted stock units have cliff vesting terms which range from one to five years; however, these units generally vest over two to three years. Compensation cost for these awards is based on the estimated fair value on the date of grant and recognized as compensation expense on a straight-line basis over the requisite service period. There were no pre-vesting forfeitures estimated for the three months ended March 31, 2010 and 2009. For the three months ended March 31, 2010 and 2009, the Company recognized \$8.1 million and \$3.9 million, respectively, in share-based compensation cost related to these restricted stock unit awards. At March 31, 2010, there was \$102.7 million remaining in unrecognized compensation cost related to these awards, which is expected to be recognized over a weighted average period of 2.6 years. The weighted average fair value of restricted stock units granted during the three months ended March 31, 2010 and 2009 was \$51.99 and \$29.06, respectively.

Recent Accounting Pronouncements

In October 2009, The Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2009-14, *Revenue Arrangements Containing Software Elements*, updating ASC Topic 605, *Revenue Recognition*. This guidance amends ASU 2009-13 to exclude from its scope all tangible products containing both software and non-software components that operate together to deliver the product's essential functionality. This guidance is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted; therefore, the Company has adopted this pronouncement in the fiscal year beginning January 1, 2010 along with other related pronouncements. Upon adoption, the pronouncement did not have a material impact on its consolidated financial statements and is not expected to have a material impact on our future operating results.

In October 2009, FASB issued ASU 2009-13, *Multiple-Deliverable Revenue Arrangements a Consensus of the FASB Emerging Issues Task Force*, updating ASC Topic 605, *Revenue Recognition*. ASU 2009-13 requires multiple-deliverable arrangements to be separated using a selling price hierarchy for determining the selling price of a deliverable and significantly expands disclosure requirements of such arrangements. The selling price for each deliverable will be based on vendor-specific objective evidence (VSOE) if available, the third-party evidence if VSOE is not available, or estimated selling price if VSOE and third-party evidence are not available. Arrangement consideration will be allocated at the inception of the arrangement to all deliverables using the relative selling price method. The relative selling price method allocates any discount in the arrangement proportionally to each deliverable on the basis of each deliverable's estimated selling price. This guidance is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted; therefore, the Company has adopted this pronouncement in the fiscal year beginning January 1, 2010 along with other related pronouncements. Upon adoption, the pronouncement did not have a material impact on its consolidated financial statements and is not expected to have a material impact on our future operating results.

2. Composition of Certain Financial Statement Items

Fair Value of Financial Instruments

The Company has certain financial instruments in which the carrying value does not equal the fair value. The estimated fair value of the convertible senior notes is determined by using observable market information and valuation methodologies that correlate fair value with the market price of the Company's common stock, and the estimated fair value of the senior notes, the secured loan, and the term loans was determined by using observable market information.

Table of Contents

The fair value and carrying amounts of the Company's long-term debt obligations were as follows:

	Fair Value		Carrying Amounts	
	March 31, 2010 (unaudited)	December 31, 2009	March 31, 2010 (unaudited)	December 31, 2009
(in thousands)				
3.375% Senior Notes (principal due 2013)	\$252,745	\$	\$249,886	\$
4.400% Senior Notes (principal due 2015)	507,125		498,365	
6.000% Senior Notes (principal due 2020)	767,505		748,479	
2% Convertible Senior Notes (principal due 2023)	530,365	535,081	343,730	339,595
1 1/2% Convertible Senior Notes (principal due 2024)	508,500	472,500	414,171	409,858
3 1/4% Convertible Senior Notes (principal due 2025)	412,444	400,750	338,652	336,481
Term Loan A		1,313,375		1,330,000
Term Loan B		645,713		642,500
Secured Loan	34,375	34,800	34,375	34,800

For details on the carrying amounts of the long-term debt obligations, refer to Note 4 Long-Term Debt.

The carrying amounts of financial instruments such as cash equivalents, foreign cash accounts, accounts receivable, prepaid expenses, other current assets, accounts payable, accrued expenses, and other current liabilities approximate the related fair values due to the short-term maturities of these instruments.

The Company invests its excess cash in marketable securities, money market funds, corporate notes, government securities, highly liquid debt instruments, time deposits, and certificates of deposit with original maturities of three months or less at the date of purchase. These instruments are readily convertible into cash. The Company has established guidelines that maintain safety and liquidity. The Company considers all highly liquid investments with maturities of three months or less from the date of purchase to be cash equivalents. The cost of securities sold is based on the specific identification method.

Investments consisted of the following:

	March 31, 2010 (unaudited)	December 31, 2009
(in thousands)		
Short-term		
Bank deposits	\$ 13,231	\$ 10,766
Total short-term investments	13,231	10,766
Long-term		
Auction rate securities	29,964	30,827
Put option	4,411	3,973
Equity securities	7,951	345,367
Total long-term investments	42,326	380,167
Total investments	\$ 55,557	\$ 390,933

The Company evaluates its investments in equity and debt securities that are accounted for using the equity method or cost method or that are classified as available-for-sale or held-to-maturity to determine whether an

other-than-temporary impairment or a credit loss exists at period end for such investments. In January 2010, the Company completed the sale of its equity method investment in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture to Danaher Corporation. The investment represented \$337.4 million in equity securities at December 31, 2009. Refer to Note 3 Business Combinations for further detail on the divestiture. At March 31, 2010, the aggregate carrying amounts of cost method investments in non-publicly traded companies, which approximated the fair value of the investments, was \$8.0 million. The assessment of fair value is based on valuation methodologies using Level 3 unobservable inputs, which include discounted cash flows, estimates of sales proceeds and appraisals, as appropriate. At March 31, 2010, the Company did not carry any available-for-sale securities. During the three months ended March 31, 2010, there were no unrealized gains or losses recorded in accumulated other comprehensive income and there were no gains or losses reclassified out of accumulated other comprehensive income to earnings as a result of the sales of available-for-sale securities. In addition, the Company did not recognize any net gains or losses related to the trading securities for the three months ended March 31, 2010.

Table of Contents

ASC Topic 820, Fair Value Measurements and Disclosures has redefined fair value and required the Company to establish a framework for measuring fair value and expand disclosures about fair value measurements. The framework requires for the valuation of assets and liabilities subject to fair value measurements using a three tiered approach and fair value measurement be classified and disclosed in one of the following three categories:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices for similar assets and liabilities in active markets, quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table represents the financial instruments measured at fair value on a recurring basis on the financial statements of the Company subject to *ASC Topic 820, Fair Value Measurements and Disclosures* and the valuation approach applied to each class of financial instruments:

	Fair Value Measurements at Reporting Date			
	Using			
	Balance	Quoted	Significant	Significant
	at	Prices in	Other	
	March	Active	Observable	Unobservable
(in thousands)(unaudited)	31,	Markets	Inputs	Inputs
Description	2010	for	(Level 2)	(Level 3)
		Identical		
		Assets		
		(Level 1)		
Bank time deposits	\$ 13,231	\$ 13,231	\$	\$
Money market funds	108,899	108,899		
Deferred compensation plan assets- mutual funds	23,665	23,665		
Assets-derivative forward exchange contracts	24,853		24,853	
Auction rate securities	29,964			29,964
Put option	4,411			4,411
Total assets	\$ 205,023	\$ 145,795	\$ 24,853	\$ 34,375
Liabilities-derivative forward exchange contracts	14,028		14,028	
Total liabilities	\$ 14,028	\$	\$ 14,028	\$

At March 31, 2010, the carrying value of the financial instruments measured and classified within Level 1 was based on quoted prices and marked to market.

Exchange traded derivatives are valued using quoted market prices and classified within Level 1 of the fair value hierarchy. Level 2 derivatives include foreign currency forward contracts for which fair value is determined by using observable market spot rates and forward points adjusted by risk-adjusted discount rates. The risk-adjusted discount rate is derived by United States dollar zero coupon yield bonds for the corresponding duration of the maturity of derivatives, then adjusted with a counter party default risk for the value of our derivative assets or our credit risk for the value of our derivative liabilities. Credit risk is derived by observable credit default swaps (CDS) spreads. Because

CDS spreads information is not available for our Company, our credit risk is determined by analyzing CDS spreads of similar size public entities in the same industry with similar credit ratings. The value of our derivatives discounted by risk-adjusted discount rates represents the present value of amounts estimated to be received for the assets or paid to transfer the liabilities at the measurement date from a marketplace participant in settlement of these instruments.

As of March 31, 2010, the Company holds \$34.4 million in auction rate securities with UBS Investment Bank. Auction rate securities are collateralized long-term debt instruments that provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined intervals, typically every seven to thirty-five days. The underlying assets of the auction rate securities we hold, including the securities for which auctions have failed, are student loans which are guaranteed by the United States government under the Federal Education Loan Program. Beginning in February 2008, auctions failed for the Company's holdings because sell orders exceeded buy orders. As a result of the failed auctions, the Company is holding illiquid securities because the funds associated with these failed auctions will not be accessible until the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process, or the security matures. In August 2008, UBS announced that it agreed to a settlement in principle with the SEC and other state regulatory agencies represented by North American Securities Administrators Association to restore liquidity to all remaining clients who hold auction rate securities. UBS committed to repurchase auction rate securities from their private clients at par beginning January 1, 2009. During the three months ended March 31, 2010, UBS repurchased \$0.4 million of auction rate securities at par from the Company. The Company intends to have the settlement of the remaining balance of \$34.4

Table of Contents

million completed by July 2012. Until UBS fully redeems the Company's auction rate securities, UBS has loaned the Company at par without recourse and with accrued interest charges at the same rate as the yields earned on the underlying securities that serve as collateral for the loan. Because the Company has a right to sell its auction rate securities to UBS, this right is considered to be a put option, however, this put option does not meet the definition of a derivative under *ASC Topic 815, Derivatives and Hedging*, as auction rate securities are not readily convertible to cash. Thus, this put option will not be subsequently adjusted to fair value each reporting period. To create accounting symmetry for the fair value movement between auction rate securities and the put option, the Company elected the fair value option for the put option in accordance with *ASC Topic 820*, upon the execution of the loan agreement with UBS on the election date in November 2008. At the same time, the Company elected a transfer of auction rate securities from available-for-sale securities to trading securities due to the nature of the market conditions and the Company's intended holding period.

The Company anticipates that any future changes in the fair value of the put option will be offset by the changes in the underlying fair value of the related auction rate securities with no material net impact to the Consolidated Statements of Operations. This is further supported as the Company has already been provided a loan for the par value of the auction rate securities by UBS. The put option will continue to be measured at fair value utilizing Level 3 inputs until the earlier of its maturity or exercise. During the three months ended March 31, 2010, the Company did not recognize a net gain or loss related to the auction rate securities and the related put option. The fair market value of auction rate securities and the put option at March 31, 2010 and December 31, 2009 are reflected in long term investments in the Consolidated Balance Sheets.

For those financial instruments with significant Level 3 inputs, the following table summarizes the activity for the three months ended March 31, 2010 by investment type:

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3)		
	Auction Rate Securities	Put Option	Total
(in thousands)(unaudited)			
Beginning balance at January 1, 2010	\$ 30,827	\$ 3,973	\$ 34,800
Transfers into Level 3			
Total realized/unrealized gains (losses)			
Included in earnings	(438)	438	
Purchases, issuances and settlements	(425)		(425)
Ending balance at March 31, 2010	\$ 29,964	\$ 4,411	\$ 34,375
Total amount of unrealized losses for the period included in other comprehensive loss attributable to the change in fair market value of related assets still held at the reporting date	\$	\$	\$

All realized and unrealized gains or losses related to financial instruments whose fair value is determined based on Level 3 inputs are included in other income.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The non-financial assets and liabilities are recognized at fair value subsequent to initial recognition when they are deemed to be other-than-temporarily impaired. There were no non-financial assets and liabilities deemed to be other-than-temporarily impaired and measured at fair value on a nonrecurring basis for the three months ended March 31, 2010.

Foreign Currency and Derivative Financial Instruments

Some of the Company's reporting entities conduct a portion of their business in currencies other than the entity's functional currency. These transactions give rise to receivables and payables that are denominated in currencies other than the entity's functional currency. The value of these receivables and payables is subject to changes in currency exchange rates from the point in which the transactions are originated until the settlement in cash. Both realized and unrealized gains and losses in the value of these receivables and payables are included in the determination of net income. Net currency exchange gains recognized on business transactions, net of hedging transactions, were \$3.8 million and \$1.4 million for the three months ended March 31, 2010 and March 31, 2009, respectively, and such gains are included in other income in the Consolidated Statements of Operations.

To manage the foreign currency exposure risk, we use derivatives for activities in entities which have receivables and payables denominated in a currency other than the entity's functional currency. Realized and unrealized gains or losses on the value of financial contracts entered into to hedge the exchange rate exposure of these receivables and payables are also included in the determination of net income as they have not been designated for hedge accounting under *ASC Topic 815, Derivatives and Hedging*. These contracts, which settle April 2010 through August 2010, effectively fix the exchange rate at which these specific receivables and payables will

Table of Contents

be settled in, so that gains or losses on the forward contracts offset the gains or losses from changes in the value of the underlying receivables and payables. At March 31, 2010, the Company had a notional principal amount of \$1,243.9 million in foreign currency forward contracts outstanding to hedge currency risk relative to our foreign receivables and payables.

The Company's international operating units conduct business in, and have functional currencies that differ from the parent entity, and therefore, the ultimate conversion of these sales to cash in United States dollars is subject to fluctuations in foreign currency. The Company's intent is to limit this exposure on the Company's Consolidated Statement of Operations and Consolidated Statement of Cash Flows from changes in currency exchange rates through hedging. Upon entering derivative transactions, when the United States dollar strengthens significantly against foreign currencies, the decline in the United States dollar value of future foreign currency revenue is offset by gains in the value of the forward contracts designated as hedges. Conversely, when the United States dollar weakens, the opposite occurs. The Company's currency exposures vary, but are primarily concentrated in the euro, British pound sterling, Japanese yen and Canadian dollar. The Company uses foreign currency forward contracts to mitigate foreign currency risk on forecasted foreign currency intercompany sales which are expected to be settled through December 2010. The change in fair value prior to their maturity is accounted for as cash flow hedges, and recorded in other comprehensive income, net of tax, in the Consolidated Balance Sheets according to *ASC Topic 815, Derivatives and Hedging*. To the extent any portion of the forward contracts is determined to not be an effective hedge, the increase or decrease in value prior to the maturity is recorded in other income or expense in the Consolidated Statements of Operations.

At March 31, 2010, the Company had a notional principal amount of \$491.9 million in foreign currency forward contracts outstanding to hedge foreign currency revenue risk under *ASC Topic 815, Derivatives and Hedging*. During the three months ended March 31, 2010, the Company did not have any material losses or gains related to the ineffective portion of its hedging instruments in other expense in the Consolidated Statements of Operations. No hedging relationships were terminated as a result of ineffective hedging or forecasted transactions no longer probable of occurring for foreign currency forward contracts. The Company continuously monitors the probability of forecasted transactions as part of the hedge effectiveness testing. The Company reclasses deferred gains or losses reported in accumulated other comprehensive income into revenue when the consolidated earnings are impacted, which for intercompany sales are when the inventory is sold to a third party. For intercompany sales hedging, the Company uses an inventory turnover ratio for each international operating unit to align the timing of a hedged item and a hedging instrument to impact the Consolidated Statements of Operations during the same reporting period. At March 31, 2010, the Company expects to recognize \$13.3 million of net gains on derivative instruments currently classified under accumulated other comprehensive income to revenue offsetting the change in revenue due to foreign currency translation during the next twelve months.

In January of 2009, the Company entered into interest rate swap agreements that effectively convert variable rate interest payments to fixed rate interest payments for a notional amount of \$1,000.0 million (a portion of term loan A) of which \$300.0 million of swap payment arrangements would have expired in January of 2012 and \$700.0 million of swap payment arrangements would have expired in January of 2013. During February 2010, term loan A and term loan B were fully repaid in conjunction with the new senior notes issuance. As a result, the Company has de-designated the hedging relationship since the forecasted transactions are no longer probable of occurring and has recognized a \$12.9 million loss during the three months ended March 31, 2010 as a result of the discontinuance of the cash flow hedges in accordance with *ASC Topic 815, Derivatives and Hedging*. During the three months ended March 31, 2010 and 2009, there was no recognized gain or loss related to the ineffective portion of its hedging instruments in other expense in the Consolidated Statements of Operations.

The following table summarizes the fair values of derivative instruments at March 31, 2010 and December 31, 2009:

Asset Derivatives		Liability Derivatives	
Fair Value		Fair Value

* De minimus amount recognized in the hedge relationship.

** The \$7.8 million was a part of the \$12.9 million loss on discontinuance of cash flow hedge related to Term Loan A's interest rate swap. The difference of \$5.1 million was recognized in OCI in 2009. The entire \$12.9 million was reclassified from AOCI into other income during the three months ended March 31, 2010, as the forecasted transaction was no longer probable of occurring.

Concentration of Credit Risk

Our derivatives instruments have an element of risk in that the counterparties may be unable to meet the terms of the agreements. We attempt to minimize this risk by limiting the counterparties to a diverse group of highly-rated domestic and international financial institutions. In the event of non-performance by these counterparties, the asset position carrying values of our financial instruments represent the maximum amount of loss we could incur as of March 31, 2010. However, we do not expect to record any losses as a result of counterparty default in the foreseeable future. We do not require and are not required to pledge collateral for these financial instruments. The Company does not use derivative financial instruments for speculation or trading purposes or for activities other than risk

management and we are not a party to leveraged derivatives. In addition, we do not carry any master netting arrangements to mitigate the credit risk. The Company continually evaluates the costs and benefits of its hedging program.

Other financial instruments that potentially subject us to concentrations of credit risk are cash and cash equivalents, investments, and accounts receivable. We attempt to minimize the risks related to cash and cash equivalents and investments by using highly-rated financial institutions that invest in a broad and diverse range of financial instruments. We have established guidelines relative to credit ratings and maturities intended to maintain safety and liquidity. Concentration of credit risk with respect to accounts receivable is limited due to our large and diverse customer base, which is dispersed over different geographic areas. Allowances are maintained for potential credit losses and such losses have historically been within our expectations. Our investment portfolio is maintained in accordance with our investment policy which defines allowable investments, specifies credit quality standards and limits the credit exposure of any single issuer.

Table of Contents***Inventories***

Inventories, net of reserves, consisted of the following:

	March 31, 2010 (unaudited)	December 31, 2009

Total accrued expenses and other current liabilities	\$ 197,155	\$ 203,139

3. Business Combinations and Divestitures***Divestiture of Equity Investment***

In January 2010, the Company completed the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture to Danaher Corporation for \$435.9 million in cash, excluding transactions costs, and recorded a gain of \$45.1 million, which is subject to certain working capital adjustments, in other income in Consolidated Statements of Operations. Included in the sale was the carrying value of the equity investments of \$330.4 million, accounts receivable of \$71.3 million, net inventory of \$55.1 million, other current assets of \$17.6 million, long term assets of \$13.7 million, accounts payable of \$9.8 million, other current liabilities of \$80.8 million, and long term liabilities of \$6.7 million. The transaction allows the Company to focus on its core competencies for biological solutions in life science research, genomic medicine, molecular diagnostics and applied markets. The Company acquired the joint venture as a part of the merger with AB consummated in November 2008. The Company accounted for its investment in the joint venture using the equity method which required us to show our share of earnings or losses from the investment in other income as a single amount in accordance with the guidance in *ASC Topic 323, Investments Equity Method and Joint Ventures*. At December 31, 2009, the investment value in the equity was \$337.4 million which was included in long term investments in the Consolidated Balance Sheets.

Immaterial Acquisitions

The Company completed several additional stock acquisitions that were not material individually or collectively to the overall consolidated financial statements and the results of operations. These acquisitions have been included in the consolidated financial statements from the respective dates of the acquisitions. For acquisitions consummated after January 1, 2009, the Company accounted for these acquisitions in accordance with ASC Topic 805, Business Combinations when such stock acquisitions met the qualification and definition of a business under the guidance, otherwise the Company accounted for the acquisitions as asset purchases. For acquisitions consummated prior to January 1, 2009, the Company accounted for such stock acquisitions in accordance with SFAS 141, Business Combinations when such stock acquisitions met the qualification and definition of a business under the guidance, otherwise the Company accounted for the acquisitions as asset purchases.

Table of Contents*Business Consolidation Costs*

The Company continues to integrate recent and pending acquisitions and divestitures into its operations and recorded approximately \$25.3 million and \$27.4 million of costs for the three months ended March 31, 2010 and 2009, respectively, related to these efforts. Expenses for the three months ended March 31, 2010 and 2009 related primarily to integration and restructuring efforts, including severance and site consolidation, currently underway related to various mergers, acquisitions and divestitures. In association with the AB merger the Company has undergone a separate restructuring plan. For details on the restructuring plan related to the AB merger, refer to Note 10 Restructuring Costs. In undergoing the various restructuring plans, the Company anticipates cost savings and revenue synergies as a result of the combination of the acquired businesses. The cost savings are expected to be driven by operating efficiencies and elimination of redundant positions as well as the elimination of duplicate facilities. Revenue synergies are expected to be driven by increased market presence and leveraging of the combination of ours and acquired products, services, and technologies.

4. Long-Term Debt

Long-term debt consisted of the following:

	March 31, 2010 (unaudited)	December 31, 2009
(in thousands)		
3.375% Senior Notes (principal due 2013), net of unamortized discount	\$ 249,886	\$
4.400% Senior Notes (principal due 2015), net of unamortized discount	498,365	
6.000% Senior Notes (principal due 2020), net of unamortized discount	748,479	
2% Convertible Senior Notes (principal due 2023), net of unamortized discount	343,730	339,595
1 1/2% Convertible Senior Notes (principal due 2024), net of unamortized discount	414,171	409,858
3 1/4% Convertible Senior Notes (principal due 2025), net of unamortized discount	338,652	336,481
Term Loan A		1,330,000
Term Loan B		642,500
Secured Loan	34,375	34,800
Capital leases	7,862	8,556
 Total debt	 2,635,520	 3,101,790
Less current portion	(345,860)	(481,701)
 Total long-term debt	 \$ 2,289,660	 \$ 2,620,089

Senior Notes

In February 2010, the Company issued \$1,500.0 million of fixed rate unsecured notes which consisted of an aggregate principal amount of \$250.0 million of 3.375% Senior Notes due 2013 (the 2013 Notes) at an issue price of 99.95%, an aggregate principal amount of \$500.0 million of 4.400% Senior Notes due 2015 (the 2015 Notes) at an issue price of 99.67% and an aggregate principal amount of \$750.0 million of 6.000% Senior Notes due 2020 (the 2020 Notes) at an issue price of 99.80%. As a result, at the time of issuance, the Company recorded \$0.1 million, \$1.7 million, and \$1.5 million of debt discounts for the 2013 Notes, 2015 Notes, and 2020 Notes, respectively. At March 31, 2010, the unamortized debt discount balance was \$0.1 million, \$1.6 million, and \$1.5 million for the 2013 Notes, 2015 Notes, and 2020 Notes, respectively. The debt discounts are amortized over the lives of the associated Notes. The aggregate net proceeds from the Notes offering were \$1,484.8 million after deducting the underwriting discount of \$11.9 million. Total deferred financing costs associated with the issuance of the senior notes were

\$14.4 million, including \$11.9 million of the underwriting discount and \$2.5 million of legal and accounting fees. At March 31, 2010, the unamortized issuance costs were \$14.3 million, which are expected to be recognized over a weighted average period of 7.4 years. The Company recognized total interest expense of \$8.4 million for the three months ended March 31, 2010 for the Notes based on the effective interest rates of 3.39%, 4.47% and 6.03% for the 2013, 2015 and 2020 Notes, respectively.

The Notes are unsecured and unsubordinated obligations with interest payable semi-annually. The Company, at its option, may redeem the 2013 Notes, the 2015 Notes, and the 2020 Notes, in each case, in whole or in part at any time at a redemption price equal to the greater of 100% of the principal amount of the notes to be redeemed and the sum of the present values of the remaining scheduled payments of the notes to be redeemed discounted on a semi-annual basis at a treasury rate equal to a comparable United States Treasury Issue at the redemption date plus 30 basis points in the case of the 2013 Notes and the 2015 Notes, and 35 basis points

Table of Contents

in the case of the 2020 Notes, plus accrued and unpaid interest through the date of redemption, if any. The indenture also requires under certain circumstances that the Company make an offer to purchase then outstanding Notes equal to 101% of the principal amount plus any accrued and unpaid interest to the date of repurchase upon the occurrence of a change of control. The indenture governing the Notes contains certain covenants that, among other things, limit the Company's ability to create or incur certain liens and engage in sale and leaseback transactions. In addition, the indenture limits the Company's ability to consolidate, merge, sell, convey, transfer, lease or otherwise dispose of all or substantially all of its property and assets. These covenants are subject to certain exceptions and qualifications.

The entire net proceeds from the Notes offering were used to repay the outstanding balance of term loan A and term loan B in February 2010, together with the net of tax proceeds from the sale of our 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture, and cash on hand.

The Credit Agreement

In November 2008, the Company entered into a \$2,650.0 million credit agreement (the Credit Agreement) consisting of a revolving credit facility of \$250.0 million, a term loan A facility of \$1,400.0 million, and a term loan B facility of \$1,000.0 million to fund a portion of the cash consideration paid as part of the AB merger. During February 2010, the Company used the proceeds from the issuance of the Senior Notes, the net of tax proceeds from the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture, along with cash on hand to pay off entire outstanding term loan principal of \$1,972.5 million, which consisted of the carrying value of \$1,330.0 million of the term loan A and \$642.5 million of the term loan B, plus respective accrued interest due on the date of repayment. The Company recognized a loss of \$54.2 million on unamortized deferred financing costs associated with the repayments of term loan A and term loan B during the three months ended March 31, 2010. The Credit Agreement remains for the revolving credit facility of \$250.0 million at March 31, 2010.

The Company entered into interest rate swaps with a \$1,000.0 million notional amount in January 2009 to convert a portion of variable rate interest payments of term loan A to fixed rate interest payments. As a result of the repayment of term loan A in February 2010, the Company de-designated and terminated the interest rate swaps in accordance with *ASC Topic 815, Derivatives and Hedging* as the underlying transaction was no longer probable of occurring. The Company recognized a \$12.9 million loss in conjunction with the termination of the interest rate swaps during the three months ended March 31, 2010.

The interest for the term loan A was computed based on the Company's leverage ratio as prescribed by the indenture. As a result, for the three months ended March 31, 2010 and 2009, the interest rate on the term loan A was at LIBOR plus 2.5%. The term loan B was at the base rate plus 2.0% for both three months ended March 31, 2010 and 2009. During the three months ended March 31, 2010, the Company recognized aggregate interest expense, net of hedging transactions, of \$11.0 million, based on the weighted average interest rates of 2.76% and 5.25%, for term loan A and term loan B, respectively. During the three months ended March 31, 2009, the Company recognized aggregate interest expense, net of hedging transactions, of \$26.2 million, based on the weighted average interest rates of 3.32% and 5.25%, for term loan A and term loan B, respectively.

Convertible Senior Notes

Effective January 1, 2009, The Company adopted a bifurcation requirement prescribed by *ASC Topic 470-20, Debt with Conversion and Other Options* with the retrospective application for our outstanding \$1,150 million of Convertible Senior Notes, which consisted of \$350.0 million related to the 2% Convertible Senior Note (2023 Note), \$450.0 million related to the 1¹/₂% Convertible Senior Note (2024 Note) and \$350.0 million related to the 3¹/₄% Convertible Senior Note (2025 Note). Upon adoption of the provision, the Company retroactively recognized the carrying amount of \$100.0 million, \$129.8 million, and \$47.6 million for the equity components of the 2023, 2024 and 2025 Notes, respectively, with deferred tax impacts of \$39.1 million, \$50.7 million and \$18.6 million for the 2023, 2024 and 2025 Notes, respectively, and a liability component classified in long term debt of \$250.0 million, \$320.2 million and \$302.4 million for the 2023, 2024 and 2025 Notes, respectively. The terms of the 2023 Notes, 2024 Notes, and 2025 Notes require the Company to settle the par value of such notes in cash and deliver shares only for the excess, if any, of the notes' conversion value based on conversion prices of \$34.12, \$51.02, and \$49.13 per

share, respectively, over their par values.

In conjunction with the adoption of the provision, the Company applied the guidance to the Company's debt issuance costs. As a result, the Company allocated the underlying issuance costs associated with the Convertible Senior Notes to equity in the same ratio as when determining the appropriate debt discount. The Company allocated \$6.9 million to equity with a deferred tax impact of \$2.7 million, and reduced the amount of the debt issuance costs by \$6.9 million.

Table of Contents

At March 31, 2010 the Company carried unamortized debt discounts of \$6.0 million, \$35.8 million and \$11.3 million for the 2023, 2024 and 2025 Notes, respectively, which are expected to be recognized over a weighted average period of 1.6 years. At December 31, 2009, the Company carried unamortized debt discounts of \$10.4 million, \$40.4 million and \$13.5 million for the 2023, 2024 and 2025 Notes, respectively. The Company recognized total interest cost of \$17.4 million and \$16.7 million for the three months ended March 31, 2010 and 2009, respectively, based on the effective interest rates of 7.21%, 6.10% and 5.95% for the 2023, 2024 and 2025 Notes, respectively. The interest expense consisted of \$6.3 million and \$6.3 million of contractual interest based on the stated coupon rate and \$11.1 million and \$10.4 million of amortization of the discount on the liability component for the three months ended March 31, 2010 and 2009, respectively.

At March 31, 2010, the Company has classified the carrying value of \$343.7 million on the 2023 Note in current liabilities according to the respective indenture, which allows our Note holders to require the Company to purchase all or a portion of the Notes at par plus any accrued and unpaid interest at the earliest on August 1, 2010. In the event that the holders do not exercise such rights, the remaining balance of the Note will be reclassified back to long-term debt.

5. Lines of Credit

Under the Credit Agreement, the Company entered into a revolving credit facility of \$250.0 million (the Revolving Credit Facility) with Bank of America, N.A in November 2008. Interest rates on outstanding borrowings are determined by reference to LIBOR or to an alternate base rate, with margins determined based on changes in the Company's leverage ratio. If necessary, the Company currently anticipates using the proceeds of the Revolving Credit Facility for the purpose of general working capital and capital expenditures and/or other capital needs as they may arise. As of March 31, 2010, the Company has issued \$14.1 million in letters of credit under the Revolving Credit Facility, and accordingly, the remaining available credit is \$235.9 million.

At March 31, 2010, the Company's foreign subsidiaries in China, Japan, and India had available bank lines of credit denominated in local currency to meet short-term working capital requirements. The credit facilities bear interest at a fixed rate, the respective bank's prime rate, or the TIBOR rate. The United States dollar equivalent of these facilities totaled \$13.4 million, none of which was outstanding at March 31, 2010. Additionally, the Company's Japan subsidiary has an outstanding letter of credit with United States dollar equivalent of \$3.2 million at March 31, 2010 to support its import duty.

The weighted average interest rate of the Company's total lines of credit was 2.82% at March 31, 2010.

6. Commitments and Contingencies

Letters of Credit

The Company had outstanding letters of credit totaling \$43.4 million at March 31, 2010, of which \$11.7 million was to support liabilities associated with the Company's self-insured worker's compensation programs, \$4.5 million was to support its building lease requirements, \$24.0 million was to support performance bond agreements, and \$3.2 million was to support duty on imported products.

Executive Employment Agreements

The Company has employment contracts with key executives that provide for the continuation of salary if terminated for reasons other than cause, as defined in those agreements. At March 31, 2010, future employment contract commitments for such key executives were approximately \$35.1 million for the remainder of fiscal year 2010.

Contingent Acquisition Obligations

As a result of current and prior year acquisitions, the Company may have payment obligations based on certain technological milestones, patent milestones and the achievement of future gross sales of the acquired companies. Some of the purchase agreements the Company has entered into do not limit the payments to a maximum amount, or restrict the payments deadline. For acquisitions accounted for under SFAS 141, *Business Combinations*, the Company will account for any such contingent payments as an addition to the purchase price of the acquired company. For acquisitions accounted for under ASC Topic 805, *Business Combinations*, these

Table of Contents

obligations will be accounted for at fair value at the time of acquisition with subsequent revisions reflected in the Statement of Operations. During the three months ended March 31, 2010, none of the contingent payments were earned.

Environmental Liabilities

As a result of the merger with Applied Biosystems Inc., the Company assumed certain environmental exposures. At March 31, 2010, the environmental reserves, which were not discounted, were approximately \$1.7 million, including current reserves of \$1.6 million. In addition, some of the assumed environmental reserves are covered under insurance policies. At March 31, 2010, the Company also has receivables of approximately \$1.1 million, of which \$1.0 million is included in short-term assets, for expected reimbursements under the insurance policies.

The Company assumed certain environmental exposures as a result of the merger with Dexter Corporation in 2000 and recorded reserves to cover estimated environmental clean-up costs. The environmental reserves, which were not discounted, were approximately \$6.6 million at March 31, 2010, including current reserves of \$2.8 million. In addition, the Company has an insurance policy to cover these assumed environmental exposures.

Based upon currently available information, the Company believes that it has adequately provided for these environmental exposures and that the outcome of these matters will not have a material adverse effect on its Consolidated Results of Operations.

Litigation

The Company is subject to potential liabilities under government regulations and various claims and legal actions that are pending or may be asserted. These matters have arisen in the ordinary course and conduct of the Company's business, as well as through acquisitions, and some are expected to be covered, at least partly, by insurance. Claim estimates that are probable and can be reasonably estimated are reflected as liabilities of the Company. The ultimate resolution of these matters is subject to many uncertainties. It is reasonably possible that some of the matters that are pending or may be asserted could be decided unfavorably to the Company. Although the amount of liability at March 31, 2010 with respect to these matters cannot be ascertained, the Company believes that any resulting liability should not materially affect its Consolidated Financial Statements.

Indemnifications

In the normal course of business, we enter into agreements under which we indemnify third parties for intellectual property infringement claims or claims arising from breaches of representations or warranties. In addition, from time to time, we provide indemnity protection to third parties for claims relating to past performance arising from undisclosed liabilities, product liabilities, environmental obligations, representations and warranties, and other claims. In these agreements, the scope and amount of remedy, or the period in which claims can be made, may be limited. It is not possible to determine the maximum potential amount of future payments, if any, due under these indemnities due to the conditional nature of the obligations and the unique facts and circumstances involved in each agreement. Payments made related to these indemnifications have not been and are not expected to be material to our Consolidated Financial Position.

Guarantees

There are two types of guarantees, which are the guarantee of pension benefits for a divested business and product warranties, related to our business activities that are included in *ASC Topic 460, Guarantees*.

Pension Benefits

As part of the Applied Biosystems' divestiture of the Analytical Instruments business in fiscal 1999, the purchaser of the Analytical Instruments business is paying for the pension benefits for employees of a former German subsidiary. However, we guaranteed payment of these pension benefits should the purchaser fail to do so, as these payment obligations were not transferable to the buyer under German law. The guaranteed payment obligation, which approximated \$55.5 million at March 31, 2010, is not expected to have a material adverse effect on the Consolidated Financial Statements.

Product Warranties

We accrue warranty costs for product sales at the time of shipment based on historical experience as well as anticipated product performance. Our product warranties extend over a specified period of time ranging up to two years from the date of sale depending

Table of Contents

on the product subject to warranty. The product warranty accrual covers parts and labor for repairs and replacements covered by our product warranties. We periodically review the adequacy of our warranty reserve, and adjust, if necessary, the warranty percentage and accrual based on actual experience and estimated costs to be incurred.

The following table provides the analysis of the warranty reserve for the three months ended March 31, 2010 and 2009:

(in thousands) (unaudited)	2010	2009
Balance at January 1	\$ 12,586	\$ 12,616
Accruals for warranties	(5,257)	2,526
Settlements made during the year	(1,816)	(3,512)
Currency translation	(149)	(330)
Balance at March 31	\$ 5,364	\$ 11,300

7. Pension Plans and Postretirement Health and Benefit Program

The Company has several defined benefit pension plans covering its United States employees and employees in several foreign countries.

The components of net periodic pension cost (income) for the Company's pension plans and postretirement benefits plans for the three months ended March 31, 2010 and 2009 were as follows:

(in thousands) (unaudited)	Domestic Plans	
	Three months ended March	
	31	
	2010	2009
Service cost	\$ 8,861	\$ 9,115
Interest cost	(8,558)	(8,858)
Expected return on plan assets	15	
Amortization of prior service cost	477	59
Amortization of actuarial loss	(5,473)	
Settlement gain*		
Net periodic pension (income) cost	\$ (4,678)	\$ 391

(in thousands) (unaudited)	Postretirement Plans	
	Three months ended March	
	31	
	2010	2009
Service cost	\$ 46	\$ 53
Interest cost	329	921
Expected return on plan assets	(98)	(149)
Amortization of prior service cost	60	60
Amortization of actuarial loss	197	149
Total periodic pension cost	\$ 534	\$ 1,034

Foreign Plans

(in thousands) (unaudited)	Three months ended March 31	
	2010	2009
Service cost	\$ 986	\$ 1,146
Interest cost	1,419	1,161
Expected return on plan assets	(1,094)	(851)
Amortization of actuarial loss	58	64
Settlement loss	18	
Net periodic pension cost	\$ 1,387	\$ 1,520

* A settlement gain related to the lump sum benefit that the Company paid out during the three months ended March 31, 2010 in conjunction with the restructuring efforts that occurred upon the merger with AB as permitted by the plan provision upon termination.

8. Income Taxes

Income taxes are determined using an estimated annual effective tax rate applied against income, and then adjusted for the tax impacts of certain significant and discrete items. For the three months ended March 31, 2010, the Company treated the tax impact related to the following as discrete events for which the tax effect was recognized separately from the application of the estimated

Table of Contents

annual effective tax rate: (i) sale of the Mass Spectrometry division (ii) early extinguishment of debt; and (iii) benefits relating to certain prior acquisitions. The Company's effective tax rate recorded for the period ended March 31, 2010 was 15.7%. Excluding the impact of the discrete items discussed above, the effective tax rate would have been 25.1%.

In accordance with the disclosure requirements as described in *ASC Topic 740, Income Taxes*, the Company has classified uncertain tax positions as non-current income tax liabilities unless expected to be paid in one year. The Company's continuing practice is to recognize interest and/or penalties related to income tax matters in income tax expense.

The Company is subject to routine compliance reviews on various tax matters around the world in the ordinary course of business. Currently, income tax audits are in Austria, China, Italy, Norway, Singapore, United Kingdom, and the United States.

9. Stock Repurchase Program

In July 2007, the Board of Directors of the Company approved a program authorizing management to repurchase up to \$500.0 million of common stock over the next three years, of which \$265.0 million remains open and available for purchase at March 31, 2010. The cost of repurchased shares are included in treasury stock and reported as a reduction in stockholders' equity. No shares were repurchased for the three months ended March 31, 2010 and 2009.

10. Restructuring Costs

In November 2008, the Company completed the merger with AB to form a company that combines both businesses into a global leader in biotechnology reagents and instrument systems dedicated to improving the human condition. In connection with the merger and the desire to achieve synergies associated with economies of scale, the Company initiated a restructuring plan under two phases; the first phase was launched immediately after the merger date to complete in the short term, and the second phase was launched to complete in approximately two years, to provide one-time termination costs including severance costs and retention bonuses related to elimination of duplicative positions and change in control agreements to mostly sales, finance, IT, research and development, and customer services employees, one-time relocation costs to those employees whose employment positions have been moved to another location, and one-time charges associated with closure of certain leased facilities which are no longer being used in the Company's operations for both acquiree's and acquirer's employees and facilities. The Company finalized its restructuring plan during the fiscal year 2009 and expects to complete its entire plan in early 2011.

For the restructuring activities related to the acquired company's employees and facilities (the first phase), the activities have been accounted for in accordance with Emerging Issues Task Force (EITF) Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination*. As a result, the Company increased the purchase price of AB by \$98.2 million, which consisted of \$90.3 million, \$0.7 million, and \$7.2 million of one-time termination costs, one-time relocation costs, and one-time site closure costs, respectively. If the actual payment is less than the expected amount, any excess reserves will be reversed with a corresponding decrease in goodwill. If the actual payment exceeds the expected amount, any additional costs will be recorded in business consolidation costs in the Consolidated Statements of Operations.

The following table summarizes the restructuring activity accounted for under EITF 95-3 *Recognition of Liabilities in Connection with a Purchase Business Combination* for the period ended March 31, 2010, as well as the remaining restructuring accrual in the Consolidated Balance Sheets at March 31, 2010:

	One-Time Termination Costs	One-Time Site Closure Costs	One-Time Relocation Costs	Total
(in thousands) (unaudited)				
Restructuring accrual at December 31, 2009	\$ 10,221	\$ 477	\$ 4,752	\$ 15,450
Amounts paid	(5,846)	(71)	(1,006)	(6,923)
Other adjustment		(49)		(49)
Foreign currency translation	(8)		(95)	(103)
Restructuring accrual at March 31, 2010	\$ 4,367	\$ 357	\$ 3,651	\$ 8,375

The restructuring activities related to the acquirer's employees and facilities, as well as the activities related to the acquiree's employees and facilities initiated under the second phase were accounted for under *ASC Topic 420, Exit or Disposal Cost*. The Company estimates that total restructuring expenses related to such activities will be approximately \$50.5 million, which consists of \$34.7 million for one-time termination costs, \$8.1 million for one-time relocation costs, and \$7.7 million for site closures. The Company anticipates that the restructuring plan will be completed during the fiscal year 2011. During the three months ended March

Table of Contents

31, 2010, \$12.1 million, \$2.7 million, and \$0.1 million of one-time termination costs, one-time relocation costs, and one-time site closure costs, respectively, were included in business consolidation costs in the Consolidated Statements of Operations.

The following table summarizes the restructuring activity accounted for under *ASC Topic 420, Exit or Disposal Cost* for the period ended March 31, 2010, as well as the remaining restructuring accrual in the Consolidated Balance Sheets at March 31, 2010:

	One-Time Termination Costs	One-Time Site Closure Costs	One-Time Relocation Costs	Total
(in thousands) (unaudited)				
Restructuring reserves as of December 31, 2009	\$ 9,274	\$ 445	\$ 1,379	\$ 11,098
Charged to expenses	12,051	87	2,670	14,808
Amounts paid	(6,626)	(340)	(436)	(7,402)

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of financial condition and results of operations should be read in conjunction with the Unaudited Consolidated Financial Statements and Notes thereto included elsewhere in this report and the Consolidated Financial Statements and Notes thereto included in our annual report on Form 10-K for the fiscal year ended December 31, 2009.

Forward-looking Statements

Any statements in this Quarterly Report on Form 10-Q about our expectations, beliefs, plans, objectives, prospects, financial condition, assumptions or future events or performance are not historical facts and are forward-looking statements. These statements are often, but not always, made through the use of words or phrases such as "believe," "anticipate," "should," "intend," "plan," "will," "expects," "estimates," "projects," "positioned," "strategy," "outlook." Additionally, statements concerning future matters, such as the development of new products, enhancements of technologies, sales levels and operating results and other statements regarding matters that are not historical facts and are forward-looking statements. Accordingly, these statements involve estimates, assumptions and uncertainties that could cause actual results to differ materially from the results expressed in the statements. Potential risks and uncertainties include, but are not limited to, those detailed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009, filed with the Securities and Exchange Commission on February 26, 2010. Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and their emergence is impossible for us to predict. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Any forward-looking statements are qualified in their entirety by reference to the factors discussed throughout this Quarterly Report on Form 10-Q.

OVERVIEW

Revenues for the three months ended March 31, 2010 were \$884.9 million, with net income of \$91.5 million.

Our Business

We are a global biotechnology tools company dedicated to helping our customers make scientific discoveries and applying those discoveries to ultimately improve the quality of life. Our systems, reagents, and services enable researchers to accelerate scientific exploration, driving to discoveries and developments that better the quality of life. Life Technologies customers do their work across the biological spectrum, advancing genomic medicine, regenerative science, molecular diagnostics, agricultural and environmental research, and 21st century forensics. The Company employs approximately 9,000 people, has a presence in more than 160 countries, and possesses a rapidly growing intellectual property estate of over 3,900 patents and exclusive licenses.

Our systems and reagents enable, simplify and accelerate a broad spectrum of biological research of genes, proteins and cells within academic and life science research and commercial applications. Our scientific expertise assists in making biodiscovery research techniques more effective and efficient for pharmaceutical, biotechnology, agricultural, clinical, government and academic scientific professionals with backgrounds in a wide range of scientific disciplines.

The Company operates our business under four divisions—Molecular Biology Systems, Genetic Systems, Cell Systems and Mass Spectrometry. The Mass Spectrometry division, which was comprised of a 50% interest in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture that the Company acquired as a part of the AB merger, was sold in January 2010. The Company accounted for this investment using the equity method. The MBS division includes the molecular biology based technologies including basic and real-time PCR, RNAi, DNA synthesis, thermo-cycler instrumentation, cloning and protein expression profiling and protein analysis. The CS division includes all product lines used in the study of cell function, including cell culture media and sera, stem cells and related tools, cellular imaging products, antibodies, drug discovery services, and cell therapy related products. The GS division includes sequencing systems and reagents, including capillary electrophoresis and the SOLiD system, as well as reagent kits developed specifically for applied markets, such as forensics, food safety and pharmaceutical quality monitoring. Upon completion of the merger with AB in November 2008, we commenced the process of integrating the businesses and administration of the combined companies. A key part of this process was a

reorganization of the business, research and development, and sales and marketing organizations within Life Technologies such that they are focused on optimizing the unique technologies and capabilities of the combined companies to drive new developments and business performance.

Table of Contents

In January 2010, the Company completed the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture to Danaher Corporation for \$435.9 million in cash, excluding transactions costs, with a gain of \$45.1 million, which is subject to certain working capital adjustments. The transaction allows the Company to focus on its core competencies for biological solutions in life science research, genomic medicine, molecular diagnostics and applied markets.

The Company offers many different products and services, and is continually developing and/or acquiring others. Some of our specific product categories include the following:

High-throughput gene cloning and expression technology, which allows customers to clone and expression-test genes on an industrial scale.

Pre-cast electrophoresis products, which improve the speed, reliability and convenience of separating nucleic acids and proteins.

Antibodies, which allow researchers to capture and label proteins, visualize their location through use of dyes and discern their role in disease.

Magnetic beads, which are used in a variety of settings, such as attachment of molecular labels, nucleic acid purification, and organ and bone marrow tissue type testing.

Molecular Probes fluorescence-based technologies, which facilitate the labeling of molecules for biological research and drug discovery.

Transfection reagents, which are widely used to transfer genetic elements into living cells enabling the study of protein function and gene regulation.

PCR and Real Time PCR systems, reagents and assays, which enable researchers to amplify and detect targeted nucleic acids (DNA and RNA molecules) for a host of applications in molecular biology.

Cell culture media and reagents used to preserve and grow mammalian cells, which are used in large scale cGMP bio-production facilities to produce large molecule biologic therapies.

RNA Interference reagents, which enable scientists to selectively turn off genes in biology systems to gain insight into biological pathways.

Capillary electrophoresis and SOLiD™ DNA sequencing systems and reagents, which are used to discover sources of genetic and epigenetic variation, to catalog the DNA structure of organisms, to verify the composition of genetic research material, and to apply these genetic analysis discoveries in markets such as forensic human identification and clinical diagnostics.

The principal markets for our products include the life sciences research market and the biopharmaceutical production market. We divide our principal market and customer base into principally three categories:

Life science researchers. The life sciences research market consists of laboratories generally associated with universities, medical research centers, government institutions such as the United States National Institutes of Health, or the NIH, and other research institutions as well as biotechnology, pharmaceutical, diagnostic, energy, agricultural, and chemical companies. Researchers at these institutions are using our products and services in a broad spectrum of scientific activities, such as: searching for drugs or other techniques to combat a wide variety of diseases, such as cancer and viral and bacterial disease; researching diagnostics for disease identification or for improving the efficacy of drugs to targeted patient groups; and assisting in vaccine design, bioproduction, and agriculture. Our products and services provide the research tools needed for genomics studies, proteomics studies, gene splicing, cellular analysis,

and other key research applications that are required by these life science researchers. In addition, our research tools are important in the development of diagnostics for disease determination as well as identification of patients for more targeted therapy.

Commercial producers of biopharmaceutical and other high valued proteins. We serve industries that apply genetic engineering to the commercial production of useful but otherwise rare or difficult to obtain substances, such as proteins, interferons, interleukins, t-PA and monoclonal antibodies. The manufacturers of these materials require larger quantities of the same sera and other

Table of Contents

cell growth media that we provide in smaller quantities to researchers. Industries involved in the commercial production of genetically engineered products include the biotechnology, pharmaceutical, food processing and agricultural industries.

Users who apply our technologies to enable or improve particular activities. We provide tools that apply our technology to enable or improve activities in particular markets, which we refer to as applied markets. The current focus of our products for these markets is in the areas of: forensic analysis, which is used to identify individuals based on their DNA; quality and safety testing, such as testing required to measure food, beverage, or environmental quality, and pharmaceutical manufacturing quality and safety; and biosecurity, which refers to products needed in response to the threat of biological terrorism and other malicious, accidental, and natural biological dangers. The Applied Biosystems branded forensic testing and human identification products and services are innovative and market-leading tools that have been widely accepted by investigators and laboratories in connection with criminal investigations, the exoneration of individuals wrongly accused or convicted of crimes, identifying victims of disasters, and paternity testing.

CRITICAL ACCOUNTING POLICIES

During the current fiscal year, the Company has adopted, ASU 2009-14, *Revenue Arrangements Containing Software Elements*, and ASU 2009-13, *Multiple-Deliverable Revenue Arrangements a Consensus of the FASB Emerging Issues Task Force*. For additional information on the recent accounting pronouncements impacting our business, see Note 1 of the Notes to Consolidated Financial Statements.

RESULTS OF OPERATIONS**First Quarter of 2010 Compared to the First Quarter of 2009**

The following table compares revenues and gross margin for the first quarter of 2010 and 2009:

	Three months ended March 31,			%
(in millions) (unaudited)	2010	2009	Increase	Increase
Molecular Biology Systems	\$ 431.5	\$ 381.1	\$ 50.4	13%
Cell Systems	213.8	192.3	21.5	11%
Genetic Systems	237.6	208.5	29.1	14%
Corporate and other	2.0	(6.2)	8.2	NM
Total revenues	\$ 884.9	\$ 775.7	\$ 109.2	14%
Total gross profit	\$ 533.1	\$ 384.7	\$ 148.4	39%
Total gross profit margin %	60.2%	49.6%		

Revenue

The Company's revenues increased by \$109.2 million or 14% for the first quarter of 2010 compared to the first quarter of 2009. The increase in revenue is driven primarily by an increase of \$77.2 million in volume and pricing and increases of \$28.8 million in favorable currency impacts, including hedging.

The Company operates our business under four divisions – Molecular Biology Systems, Genetic Systems, Cell Systems and Mass Spectrometry. The Mass Spectrometry division, which was comprised of a 50% interest in a joint venture that the Company acquired as a part of the AB acquisition, was sold in January 2010. The Company accounted for this investment in the joint venture using the equity method. Our share of earnings or losses, including revenue, was included in other income. The Molecular Biology Systems (MBS) division includes the molecular biology based technologies including basic and real-time PCR, RNAi, DNA synthesis, thermo-cycler instrumentation, cloning and protein expression profiling and protein analysis. Revenue in this division increased by \$50.4 million or 13% in the first quarter of 2010 compared to the first quarter of 2009. This increase was driven primarily by \$34.6 million in increased volume and pricing, increases of \$13.6 million in favorable currency impacts, and increases of \$2.2 million from acquisitions. The Cell Systems (CS) division includes all product lines used in the study of cell

function, including cell culture media and sera, stem cells and related tools, cellular imaging products, antibodies, drug discovery services, and cell therapy related products. Revenue in this division increased \$21.5 million or 11% in the first quarter of 2010 compared to the first quarter of 2009. This increase was driven primarily by \$15.4 million in increased volume and pricing and increases of \$6.1 million in favorable currency impacts. The Genetic System (GS) division includes sequencing systems and reagents, including capillary electrophoresis and the SOLiD system, as well as reagent kits developed specifically for applied markets, such as forensics, food safety and pharmaceutical

Table of Contents

quality monitoring. Revenue in this division increased by \$29.1 million or 14% in the first quarter of 2010 compared to the first quarter of 2009. This increase was driven primarily by \$25.1 million in increased volume and pricing and increases of \$9.0 million in favorable currency impacts, offset by decreases of \$5.0 million from divestitures of a product line.

Gross Profit

Gross profit increased \$148.4 million or 39% in the first quarter of 2010 compared to the first quarter of 2009. The increase in gross profit was driven primarily by \$61.7 million in increased volume and pricing, a decrease of \$58.9 in purchase accounting inventory revaluations, and \$22.8 million in favorable currency impacts.

Operating Expenses

The following table compares operating expenses for the first quarter of 2010 and 2009:

	Three months ended March 31, 2010		2009		\$ Increase/ (decrease)	% Increase/ (decrease)
	Operating expense	As a percentage of revenues	Operating expense	As a percentage of revenues		
(in millions)(unaudited)						
Operating Expenses:						
Selling, general and administrative	\$259.7	29%	\$241.1	31%	\$ 18.6	8%
Research and development	86.4	10%	80.3	10%	6.1	8%
Business consolidation costs	25.3	3%	27.4	4%	(2.1)	(8%)

Selling, general and administrative

For the first quarter of 2010, selling, general and administrative expenses increased \$18.6 million or 8% compared to the first quarter of 2009. This increase was driven primarily by \$7.0 million in unfavorable currency impacts, an increase of \$5.9 million in compensation, bonuses and benefits, and an increase of \$4.5 million in purchased services.

Research and development

For the first quarter of 2010, research and development expenses increased \$6.1 million or 8% compared to the first quarter of 2009. This increase was driven primarily by an increase of \$11.2 million in compensation, bonus and benefits, an increase of \$5.4 million in depreciation and other expenses. This increase was primarily offset by a decrease of \$7.4 million in purchased services and a decrease of \$3.3 million in rent and utilities.

Business Consolidation Costs

Business consolidation costs for the first quarter of 2010 were \$25.3 million, compared to \$27.4 million in the first quarter of 2009, and represent costs to integrate recent and pending acquisitions and divestitures into the Company's operations. The expenses for both quarters related primarily to integration and restructuring efforts, including severance and site consolidation, currently underway related to various mergers, acquisitions and divestitures. In undergoing the various restructuring plans, the Company anticipates cost savings and revenue synergies as a result of the combination of the acquired businesses. Offsetting some of the business consolidation cost expense during the three months ended March 31, 2010, the Company recognized a gain of \$6.4 million upon the settlement of an outstanding legal claim in which the outcome was favorable to the Company's estimate. The legal settlement was directly integration related and therefore offset the business consolidation cost expense.

Other Income (Expense)***Interest Income***

Interest income was \$1.3 million for the first quarter of 2010 compared to \$1.4 million for the first quarter of 2009.

Interest income in the future will be affected by changes in short-term interest rates and changes in cash balances, which may materially increase or decrease as a result of acquisitions, debt repayment, stock repurchase programs and other financing activities.

Table of Contents**Interest Expense**

Interest expense was \$41.5 million for the first quarter of 2010 compared to \$48.1 million for the first quarter of 2009. The decrease in interest expenses was primarily driven by lower balance in debts by paying off the term loans in February 2010, partially offset with interest expenses incurred related to the \$1,500.0 million of fixed rate unsecured notes issued in February 2010.

The Company adopted a bifurcation requirement on our convertible debt prescribed by *ASC Topic 470-20, Debt with Conversion and Other Options* in the first quarter of 2009 and as a result has incurred an additional \$11.1 million in expense in the first quarter of 2010 and \$10.4 million in the first quarter of 2009.

During February 2010, the Company fully repaid the outstanding term loans, recognized a loss of \$54.2 million of deferred financing costs. The loss is separately identified in the Consolidated Statements of Operations as a Loss on early extinguishment of debt .

Other Income (Expense), Net

Other income (expense), net, was \$(4.0) million for the first quarter of 2010 compared to \$0.2 million for the same period of 2009. Included in the first quarter of 2010 was a loss on the discontinuance of cash flow hedges of \$12.9 million, a \$1.2 million expense related to the amortization of purchased intangibles and amortization of deferred revenue fair market value adjustments attributable to the joint venture, and \$0.4 million in other miscellaneous expenses, offset with a gain from the recovery on an impaired security of \$6.7 million and foreign currency gains of \$3.8 million.

During January 2010, the Company completed the sale of its 50% ownership stake in the Applied Biosystems/MDS Analytical Technologies Instruments joint venture and selected assets and liabilities directly attributable to the joint venture to Danaher Corporation for \$435.9 million in cash, excluding transactions costs, and recorded a gain of \$45.1 million, which is subject to certain working capital adjustments. The gain is separately identified in the Consolidated Statements of Operations as a Gain on divestiture of equity investments .

Provision for Income Taxes

The provision for income taxes as a percentage of pre-tax income from continuing operations was 15.7% for the first quarter of 2010 compared with a benefit of 246.6% for the first quarter of 2009. The abnormal effective tax rate of the first quarter of 2009 was due primarily to a release of a valuation allowance related to a capital loss carry forward which generated a net tax benefit of \$25.0 million for the first quarter of 2009. In the first quarter of 2010, the effective tax rate of 15.7% was reduced from the estimated annual effective tax rate of 25.1%, primarily due to the tax impacts relating to the following: (i) sale of the Mass Spectrometry division (ii) early extinguishment of debt; and (iii) benefits relating to certain prior year acquisitions.

The differences between the U.S. federal statutory tax rate and the Company's effective tax rate without the discrete items are as follows:

Statutory U.S. federal income tax rate	35.0%
State income tax	1.2
Foreign earnings taxed at non-U.S. rates (includes a significant benefit relating to the Singapore tax exemption grant)	(11.8)
Repatriation of other foreign earnings, net of related benefits	1.3
Credits and incentives	(2.5)
Non-deductible compensation & other adjustments	1.4
Other	0.5
Effective income tax rate	25.1%

The federal R&D credit expired at the end of 2009. If the federal R&D credit is reinstated and retroactive to the beginning of the Company's tax year, then the Company's effective tax rate would be reduced by approximately 1.2%.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Our future capital requirements and the adequacy of our available funds will depend on many factors, including future business acquisitions, future stock or debt repayment or repurchases, scientific progress in our research and development programs and the magnitude of those programs, our ability to establish collaborative and licensing arrangements, the cost involved in preparing, filing, prosecuting, maintaining and enforcing patent claims and competing technological and market developments. We intend to continue our strategic investment activities in new product development, in-licensing technologies and acquisitions that support our platforms. In light of the current market conditions surrounding the credit market, the risk of the inability to obtain credit in the market is a potential risk. We believe that our annual positive cash flow generation and secured financing arrangements allow the company to mitigate this risk and ensures the company has the necessary working capital requirements to fund continued operations. The Company has, and expects to be able to continue to generate positive cash flow from operations to fund both short term and long term cash needs. Should changes in the Company's cash needs occur, the Company could seek additional financing and believes such financing would be obtained at reasonable rates.

In February 2010, the Company issued \$1,500.0 million of unsecured bonds in which the proceeds, in combination with proceeds from the sale of its joint venture and on hand cash, were used to fully repay the existing term loans. The Company believes, based on its risk profile, with strong cash generation and the history of paying down debt in a timely manner, it will have the ability to raise funding in the future through public and private markets. However, the Company does not anticipate the need for additional financing and expects to fund future operation and future debt repayment through the generation of cash from operations.

Cash and cash equivalents were \$609.2 million at March 31, 2010, an increase of \$12.6 million from December 31, 2009 primarily due to cash provided by investing activities of \$394.1 million and cash provided by operating activities of \$70.8 million, offset by cash used in financing activities of \$454.4 million.

Operating Activities

Operating activities provided net cash of \$70.8 million through the first quarter of 2010 primarily from our net income of \$91.5 million plus net non-cash charges of \$60.0 million, partially offset by a decrease in cash from operating assets and liabilities of \$80.7 million. Non-cash charges were primarily comprised of amortization of intangibles of \$72.1 million, amortization of deferred debt issuance costs of \$57.8 million, depreciation of \$31.5 million, stock-based compensation expense of \$18.6 million, and non-cash interest expense of \$11.1 million resulting from the retrospective adoption of a bifurcation requirement on our convertible debt as prescribed by *ASC Topic 470-20, Debt with Conversion and Other Options*, offset by a change in deferred income taxes which resulted in a use of cash of \$92.3 million and gain of \$45.1 million on the sale of the Mass Spectrometry joint venture. The decrease of \$80.7 million in cash within operating assets and liabilities was mainly due a \$122.7 million decrease in accounts payable, accrued expenses and other liabilities which was driven primarily by the payment of annual bonuses in the first quarter of the year, a \$17.4 million increase in trade accounts receivable, and a \$26.1 million increase in inventories, partially offset by an \$84.5 million net increase in income tax liabilities, primarily driven by the sale of the joint venture. The movement in cash as a result of changes in operating assets and liabilities is consistent with normal ongoing operations.

The Company's pension plans and post retirement benefit plans are funded in accordance with local statutory requirements or by voluntary contributions. The funding requirement is based on the funded status, which is measured by using various actuarial assumptions, such as interest rate, rate of compensation increase, or expected return on plan assets. The Company's future contribution may change when new information is available or local statutory requirement is changed. Any large funding requirements would be a reduction to operating cash flow. At the current time, the Company is in compliance with all funding requirements.

In March 2010, The Patient Protection and Affordable Care Act was amended to eliminate the current employer tax deduction for prescription drug coverage that is reimbursed through Medicare Part D coverage subsidies. The Company has assessed this amendment and recorded a \$1.4 million impact related to a change in its tax deduction for its Medicare Part D subsidies during the three months ended March 31, 2010. The Company is currently assessing the other components of the Patient Protection and Affordable Care Act to determine the impact on current and future periods. Although the Company does not believe that the amended Act will have a material impact on its consolidated

financial statements, the Company will continuously monitor the potential financial impact by evaluating the assumptions its uses for its postretirement health benefit plan as well as any additional regulations or the guidance that may be provided in the future.

Investing Activities

Net cash provided by investing activities through the first quarter of 2010 was \$394.1 million. The cash was primarily provided by \$462.8 million associated with the divestiture of the joint venture, which included cash collected on behalf of, and owed to,

Table of Contents

Danaher as part of a related Transition Services Agreement, and other miscellaneous transaction-related cash flows. The net of tax proceeds from the transaction were used to pay down the term loans. The cash proceeds from the divestiture were offset by cash used for purchases of property plant and equipment of \$30.3 million and \$34.6 million in cash considerations associated with acquisition related activities. The Company does not believe that the divestiture of Mass Spectrometry joint venture will materially alter its future cash flows.

The Company has undertaken restructuring activities in connection with the merger of Applied Biosystems, which primarily include one-time termination costs, such as severance costs related to elimination of duplicative positions and change in control agreements to mostly sales, finance, IT, research and development, and customer services. The restructuring plan also includes charges associated with the closure of certain leased facilities and one-time relocation costs for the employees whose employment positions have been moved to another location. At March 31, 2010, the Company had restructuring accruals of \$26.0 million pursuant to this plan, and payments are expected to be fully paid by early 2011. Total restructuring expenditures are estimated to be approximately \$148.7 million, of which \$133.4 million were incurred and recorded in the financial statements and \$107.2 million were paid since the inception of the plan. The Company expects the restructuring activities to result in long term cost savings in cost of goods sold as well as in selling, general and administrative costs related to the efficiencies in procurement and manufacturing as well as the reduction of redundant and excess overhead. The Company expects long term cost savings in excess of the costs to complete the plan.

Financing Activities

Net cash used in financing activities through the first quarter of 2010 was \$454.4 million. The primary drivers were principal payments on long term obligations of \$1,972.5 million, partially offset by proceeds from the issuance of \$1,496.7 million of fixed rate unsecured senior notes and the exercise of employee stock options and purchase rights of \$39.9 million. The Company does not believe that the senior notes issuance and repayment of the term loans will materially alter its future cash flows.

In February 2010, the Company issued \$1,500.0 million of fixed rate unsecured notes which consisted of an aggregate principal amount of \$250.0 million of 3.375% Senior Notes due 2013 (the 2013 Notes), an aggregate principal amount of \$500.0 million of 4.400% Senior Notes due 2015 (the 2015 Notes) and an aggregate principal amount of \$750.0 million of 6.000% Senior Notes due 2020 (the 2020 Notes). The net proceeds from the Notes offering were \$1,484.8 million with the debt discounts of \$3.3 million as well as the underwriting discount of \$11.9 million. The proceeds were used to fully repay the term loans. Total costs incurred to issue the Notes were \$14.4 million including the underwriting discount of \$11.9 million. The Company recognized total interest cost of \$8.4 million for the three months ended March 31, 2010 for the Notes based on the effective interest rates of 3.39%, 4.47% and 6.03% for the 2013, 2015 and 2020 Notes, respectively.

The Company repaid \$1,330.0 million and \$642.5 million of outstanding term loan A and term loan B, respectively, in February 2010 with the proceeds from the issuance of the senior notes, net of tax proceeds from the sales of the joint venture, along with cash on hand. The term loan A and term loan B were entered in November 2008 under the Credit Agreement together with Revolving Credit Facility of \$250.0 million to fund a portion of the cash consideration paid as part of the AB merger. The remainder of the borrowing was used to pay for merger transaction costs, to facilitate normal operations, and to refinance credit facility outstanding previous to the merger. Had the term loans been still outstanding at March 31, 2010, the term loan A would have required us to make quarterly principal repayments through 2013 and the term loan B would have required us to make a lump sum principal repayment in 2015. During the three months ended March 31, 2010 and 2009, the interest on term loan A was LIBOR plus 2.5% and term loan B was at the Base Rate plus 2.0%, which resulted in aggregate interest payments, net of hedging transactions, of \$11.0 million and \$26.2 million, respectively, for the three months ended March 31, 2010 and 2009.

The Company has issued \$14.1 million in letters of credit through the Revolving Credit Facility, and, accordingly, the remaining credit available under that facility is \$235.9 million. The Company's foreign subsidiaries in China, Japan, and India had available bank lines of credit denominated in local currency to meet short-term working capital requirements. The United States dollar equivalent of these facilities totaled \$13.4 million, none of which was outstanding at March 31, 2010.

At March 31, 2010, the Company is in material compliance with all of its debt covenants.

Table of Contents

OFF BALANCE SHEET ARRANGEMENTS

The Company does not have any material off balance sheet arrangements. For further discussion on the Company's commitments and contingencies, refer to Note 6 Commitments and Contingencies in the notes to the Consolidated Financial Statements.

CONTRACTUAL OBLIGATIONS

We did not enter into any material contractual obligations during the three months ended March 31, 2010. We have no material contractual obligations not fully recorded on our Consolidated Balance Sheets or fully disclosed in the Notes to our Consolidated Financial Statements.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk related to changes in foreign currency exchange rates, commodity prices and interest rates, and we selectively use financial instruments to manage these risks. We do not enter into financial instruments for speculation or trading purposes. These financial exposures are monitored and managed by us as an integral part of our overall risk management program, which recognizes the unpredictability of financial markets and seeks to reduce potentially adverse effects on our results.

Foreign Currency Exchange Rates

We have operations through legal entities in Europe, Asia-Pacific and the Americas. As a result, our financial position, results of operations and cash flows can be affected by fluctuations in foreign currency exchange rates. As of March 31, 2010, the Company had \$419.2 million of accounts receivable and \$88.0 million of accounts payable, respectively, denominated in a foreign currency. The Company has accounts receivables and payables denominated in both the functional currency of the legal entity as well as receivables and payables denominated in a foreign currency that differs from the functional currency of the legal entity. For receivables and payables denominated in the legal entity's functional currency, the Company does not have financial statement risk, and therefore does not hedge such transactions. For those receivables and payables denominated in a currency that differs from the functional currency of the legal entity, the Company hedges such transactions to prevent financial statement risk. As a result, a hypothetical movement in foreign currency rates would not be expected to have a material financial statement impact on the settlement of these outstanding receivables and payables.

Both realized and unrealized gains or losses on the value of these receivables and payables were included in other income and expense in the Consolidated Statements of Operations. Net currency exchange gains recognized on business transactions, net of hedging transactions, was \$3.8 million for the three months ended March 31, 2010 and were included in other income and expense in the Consolidated Statements of Operations. These gains and losses arise from the timing of cash collections compared to the hedged transactions, which can vary based on timing of actual customer payments.

The Company's intercompany foreign currency receivables and payables are primarily concentrated in the euro, British pound sterling, Canadian dollar and Japanese yen. Historically, we have used foreign currency forward contracts to mitigate foreign currency risk on these intercompany foreign currency receivables and payables. At March 31, 2010, the Company had a notional principal amount of \$1,243.9 million in foreign currency forward contracts outstanding to hedge currency risk on specific intercompany and the third-party receivables and payables denominated in a currency that differs from the legal entity's functional currency. These foreign currency forward contracts as of March 31, 2010, which settle in April 2010 through August 2010, effectively fix the exchange rate at which these specific receivables and payables will be settled, so that gains or losses on the forward contracts offset the losses or gains from changes in the value of the underlying receivables and payables. The Company does not have any material short-term un-hedged foreign currency intercompany receivables or payables at March 31, 2010. Refer to Note 2 Financial Instruments in the notes to the Consolidated Financial Statements for more information on the Company's hedging programs.

The notional principal amounts provide one measure of the transaction volume outstanding as of period end, but do not represent the amount of our exposure to market loss. In many cases, outstanding principal amounts offset assets and liabilities and the Company's exposure is less than the notional amount. The estimates of fair value are based on applicable and commonly used pricing models using prevailing financial market information. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying

exposures, will depend on actual market conditions during the remaining life of the instruments.

Table of Contents*Cash Flow Hedges*

The ultimate United States dollar value of future foreign currency sales generated by our reporting units is subject to fluctuations in foreign currency exchange rates. The Company's intent is to limit this exposure from changes in currency exchange rates through hedging. When the dollar strengthens significantly against the foreign currencies, the decline in the United States dollar value of future foreign currency revenue is offset by gains in the value of the forward contracts designated as hedges. Conversely, when the dollar weakens, the opposite occurs. The Company uses foreign currency forward contracts to mitigate foreign currency risk on forecasted foreign currency sales which are expected to be settled within the next nine months. The change in fair value prior to their maturity was accounted for as cash flow hedges, and recorded in other comprehensive income, net of tax, in the Consolidated Balance Sheets according to *ASC Topic 815, Derivatives and Hedging*. To the extent any portion of the forward contracts is determined to not be an effective hedge, the increase or decrease in value prior to the maturity was recorded in other income or expense in the Consolidated Statements of Operations.

During the three months ended March 31, 2010, the Company recognized immaterial net losses related to the ineffective portion of its hedging instruments in other expense in the Consolidated Statements of Operations and no hedging relationships were terminated as a result of ineffective hedging related to the forward contracts. The Company continually monitors the probability of forecasted transactions as part of the hedge effectiveness testing. At March 31, 2010, the Company had a notional principal amount of \$491.9 million in foreign currency forward contracts outstanding to hedge foreign currency revenue risk under *ASC Topic 815, Derivatives and Hedging*, and the fair value of foreign currency forward contracts is reported in other current assets or other current liabilities in the Consolidated Balance Sheet as appropriate. The Company reclasses deferred gains or losses reported in accumulated other comprehensive income into revenue when the underlying foreign currency sales occur and are recognized in consolidated earnings. The Company uses inventory turnover ratio for each international operating unit to align the timing of a hedged item and a hedging instrument to impact the Consolidated Statements of Operations during the same reporting period. At March 31, 2010, the Company expects to reclass \$13.3 million of net gains on derivative instruments from accumulated other comprehensive income to earnings during the next twelve months. At March 31, 2010, a hypothetical 10% change in foreign currency rates against the United States dollar would result in a decrease or an increase of \$44.0 million in the fair value of foreign currency derivatives accounted for under cash flow hedges. Actual gains or losses could differ materially from this analysis based on changes in the timing and amount of currency rate movements.

During the three months ended March 31, 2010, the Company recognized a \$12.9 million loss as a result of the discontinuance of swap payment arrangements related to the term loan A payoff in February 2010 as the forecasted transactions are no longer probable of occurring.

Commodity Prices

Our exposure to commodity price changes relates to certain manufacturing operations that utilize certain commodities such as raw materials. We manage our exposure to changes in those prices primarily through our procurement and sales practices.

Interest Rates

Our investment portfolio is maintained in accordance with our investment policy which defines allowable investments, specifies credit quality standards and limits the credit exposure of any single issuer. The fair value of our cash equivalents, marketable securities, and derivatives is subject to change as a result of changes in market interest rates and investment risk related to the issuers' credit worthiness or our own credit risk. The Company uses credit default swap spread to derive risk-adjusted discount rate to measure the fair value of some of our financial instruments. At March 31, 2010, we had \$684.2 million in cash, cash equivalents, restricted cash, short-term investments and long-term investments, all of which approximated the fair value. Changes in market interest rates would not be expected to have a material impact on the fair value of \$641.9 million of our cash, cash equivalents, restricted cash, and short-term investments at March 31, 2010, as these consisted of highly liquid securities with short-term maturities. The Company accounts for \$8.0 million of its long term investments in non-publicly traded companies under the cost method, thus, changes in market interest rates would not be expected to have an impact on these investments. Gain or losses from the changes in market interest rates in our other long term investments of

\$34.4 million would not be material. Refer to Note 2 Fair Value of Financial Instruments in the notes to the Consolidated Financial Statements for more information on the Company's investments.

Fair Value Measurements

ASC Topic 820, Fair Value Measurements and Disclosures requires certain financial and non-financial assets and liabilities measured at fair value using a three tiered approach. The assets and liabilities which used level 3 or significant unobservable inputs to measure the fair value represent an insignificant portion of total Company's financial positions at March 31, 2010. The Company

Table of Contents

already received a cash loan for the value of the auction rate securities from UBS and therefore does not believe there is any credit risk on these investments. For further discussion on the Company's fair value measurements and valuation methodologies, refer to Note 2 Fair Value of Financial Instruments in the notes to the Consolidated Financial Statements for more information on the Company's investments.

ITEM 4. Controls and Procedures

We are responsible for maintaining disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Disclosure controls and procedures are controls and other procedures designed to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Based on our management's evaluation (with the participation of our Chief Executive Officer and Chief Financial Officer) of our disclosure controls and procedures as required by Rule 13a-15 under the Securities Exchange Act, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective to achieve their stated purpose as of March 31, 2010, the end of the period covered by this report.

There have been no changes to the Company's internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

We are engaged in various legal actions arising in the ordinary course of our business and believe that the ultimate outcome of these actions will not have a material adverse effect on our business or financial condition.

ITEM 1A. Risk Factors
