THE ZWEIG FUND, INC.

NOTES TO SCHEDULE OF INVESTMENTS

MARCH 31, 2010
(UNAUDITED)

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and those differences could be significant.

A. SECURITY VALUATION:

The Fund utilizes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels.

- . Level 1 -- quoted prices in active markets for identical securities
- . Level 2 -- prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- . Level 3 -- prices determined using significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

A description of the valuation techniques applied to the Funds major categories of assets and liabilities measured at fair value on a recurring basis is as follows:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price and are categorized as Level 1 in the hierarchy. Restricted equity securities and private placements that are not widely traded, are illiquid or are internally fair valued by the advisor, are generally categorized as Level 3 in the hierarchy.

Certain foreign securities may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In such cases the Fund fair values foreign securities using an external pricing service which considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American depository receipts, financial futures, exchange-traded funds, and certain indexes as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Debt securities, including restricted securities, are valued based on evaluated quotations received from independent pricing services or from dealers who make markets in such securities. For most bond types, the pricing service utilizes matrix pricing which considers yield or price of bonds of comparable quality, coupon, maturity, current cash flows, type, and current day trade information, as well as dealer supplied prices. These valuations are generally categorized as Level 2 in the hierarchy. Structured debt instruments also incorporate collateral analysis and utilize cash flow models for valuation and are generally categorized as Level 2 in the hierarchy. Pricing services do not provide pricing for all securities and therefore dealer supplied prices are utilized representing indicative bids based on pricing models used by market makers in the security and are generally categorized as Level 2 in the hierarchy. Debt securities that are not widely traded, are illiquid, or are internally fair valued by the advisor are generally categorized as Level 3 in the hierarchy.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized as Level 1 in the hierarchy. Over the counter (OTC) derivative contracts, which include forward currency contracts and equity linked instruments, do not require material subjectivity as pricing inputs are observed from actively quoted markets and are categorized as Level 2 in the hierarchy.

Investments in open-end mutual funds are valued at their closing net asset value determined as of the close of business of the New York Stock Exchange (generally 4:00 p.m. Eastern time) each business day and are categorized as Level 1 in the hierarchy.

Short-term Notes having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

A summary of the inputs used to value the Funds' net assets by each major security type is disclosed at the end of the Schedule of Investments for each Fund. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

B. SECURITY TRANSACTIONS AND RELATED INCOME:

Security transactions are recorded on the trade date. Dividend income is recorded on the ex-dividend date, or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Realized gains and losses are determined on the identified cost basis.

C. FOREIGN CURRENCY TRANSLATION:

Foreign securities and other assets and liabilities are valued using the foreign currency exchange rate effective at the end of the reporting period. Cost of investments is translated at the currency exchange rate effective at the trade date. The gain or loss resulting from a change in currency exchange rates between the trade and settlement dates of a portfolio transaction is treated as a gain or loss on foreign currency. Likewise, the gain or loss resulting from a change in currency exchange rates between the date income is accrued and paid is treated as a gain or loss on foreign currency. The Fund does not isolate that portion of the results of operations arising from changes

Edgar Filing: ZWEIG FUND INC /MD/ - Form N-Q

in exchange rates and that portion arising from changes in the market prices of securities.

NOTE 2 -- FEDERAL INCOME TAX INFORMATION

(\$ REPORTED IN THOUSANDS)

At March 31, 2010, federal tax cost and aggregate gross unrealized appreciation (depreciation) of securities held by the Fund were as follows:

| FEDERAL TAX COST | UNREALIZED APPRECIATION | UNREALIZED DEPRECIATION | NET UNREALIZED APPRECIATION (DEPRECIATION) |
|---------------------|----------------------------|----------------------------|--|
| \$352,269 | \$43,052 | \$ (22,285) | \$20,767 |

NOTE 3 -- SUBSEQUENT EVENT EVALUATIONS

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that the following subsequent event requires recognition or disclosure in these financial statements.

The Annual Meeting of Shareholders of The Zweig Fund, Inc. was held on May 11, 2010. Shareholders of the fund re-elected George R. Aylward and Alden C. Olson to serve as Directors until the third succeeding Annual Meeting in 2013.
