14.The rules for transfer of shares set forth in Article 10 of the Guidelines for Repurchase of Shares by Listed and OTC Companies:

The repurchased shares within three years after the repurchase execution complete date, will be authorized to the Chairman to transfer to employees for one time or for several times. The eligibility is as follows:full-time regular employees of the Company who serve in the Company for at least one year from the base record date;the employees of Company or its subsidiaries who devoted special contribution and approved by the Chairman. The number of options that can be granted to an employee will be determined by a number of factors, including seniority, job grade, contribution,or other conditions deemed relevant by the management. The exercise price is the average repurchase execution price. If the exercise price is below the closing price of the date this plan is finalized, the closing price of the date of this plan will become the exercise price. If before the option can be exercised, the company's common share volume increases, the Company should adjust the exercise price accordingly.

15.The rules for conversion or subscription of shares set forth in Article 11 of the Guidelines for Repurchase of Shares by Listed and OTC Companies:

Not Applicable

16.Declaration that the financial state of the Company has been considered by the board of directors and that its capital maintenance will not be affected: The aforesaid total volume of the repurchase accounts for 3.23% of the Company's outstanding shares,and the maximum dollar amount needed accounts for 18.3% of the Company's current assets. The board of directors has considered the financial situation of the Company. The repurchase plan will not hurt the capital maintenance of the Company.

17.Appraisal by a CPA or securities underwriter of the reasonableness of the share repurchase price:The CPA firm of the Company considers the repurchase volume and price of this repurchase plan to transfer to employees will have

Oki Electric Enhances its ASIC Product Offerings Through Collaboration with UMC

1. Date of occurrence of the event: 2003/03/10

2. Cause of occurrence: Oki Electric Industry Co., Ltd. (TSE 6703),

Japan's leading electronics manufacturing company, and world

leading semiconductor foundry UMC (NYSE UMC) announced today that

a new ASIC product line will be introduced by Oki. This marks the first

result of comprehensive business partnership between the two companies

announced on September 4, 2002. The new ASIC product line from Oki,

the MG7xK family, uses UMC's 0.15( $\mu$ )m process.

Under the alliance with UMC, Oki Electric will provide its entire portfolio

of strategic IP for use in the foundry's Gold IP program.

Customers can access various Oki IP offerings through UMC's Gold IP

program, including the licensed ARM ( $\mu$ )Processor cores and its ( $\mu$ )PLAT design

platform, as well as standard Gold IP offerings such as high performance

ADCs and DACs, SERDES, and high-speed I/Os. The partnership allows Oki

customers to reduce the cost and time of their design efforts by giving

them proven IP solutions with UMC's qualified silicon cores, which

are already in volume production.

By integrating design rules and process parameters with UMC under

the partnership, Oki's new ASICs, the MG7xK family (MG74K/75K/76K),

benefits Oki's customers, cutting the time to production to less than

six months for development and release of a fully tested, production

ready 0.15( $\mu$ )m less than half the industry norm of 12-18 months. This

shortened time-to-production is achieved by using UMC's proven 0.15( $\mu$ )m

manufacturing process which allows Oki to bypass the production ramp-up

stage and the learning curve typically needed during the transition to

smaller geometries.

The new MG7xK family improves speed per gate for more than 30% and 20%

## Edgar Filing: UNITED MICROELECTRONICS CORP - Form 6-K

higher integration. It also offers a 25% reduction in power consumption. This system ASIC is ideal for use in network equipment, PC peripherals, and general electronic appliances. For dramatically shorter development times, it supports the (mu)PLAT, Oki's integrated platform solution for system LSI development, which is based on ARM7TDMI and ARM946E-S.

Oki will begin marketing the new MG7xK family in April 2003.

As an added benefit of the foundry relationship, Oki plans to migrate to 0.13(mu)m ASIC products within the next year.
