PART I

ITEM 1. BUSINESS

Introduction

The Toro Company was incorporated in Minnesota in 1935 as a successor to a business founded in 1914 and reincorporated in Delaware in 1983. Unless the context indicates otherwise, the terms "company," "Toro," "we," "us," and "our" refer to The Toro Company and its consolidated subsidiaries. Our executive offices are located at 8111 Lyndale Avenue South, Bloomington, Minnesota, 55420-1196, and our telephone number is (952) 888-8801. Our web site for corporate and investor information is www.thetorocompany.com, which also contains links to our branded product sites. The information contained on our web sites or connected to our web sites is not incorporated by reference into this Annual Report on Form 10-K and should not be considered part of this report.

We design, manufacture, and market professional turf maintenance equipment and services, turf irrigation systems, landscaping equipment and lighting, agricultural micro-irrigation systems, rental and construction equipment, and residential yard and snow removal products. We produced our first mower for golf course use in 1921 when we mounted five reel mowers on a Toro tractor, and we introduced our first lawn mower for residential use in 1935. We have continued to enhance our product lines ever since. We classify our operations into three reportable business segments: Professional, Residential, and Distribution. Our Distribution segment, which consists of our company-owned domestic distributorships, has been combined with our corporate activities and is shown as "Other." Net sales of our three reportable segments accounted for the following percentages of our consolidated net sales for fiscal 2013: Professional, 70 percent; Residential, 29 percent; and Other, 1 percent.

Our products are advertised and sold at the retail level under the primary trademarks of Toro®, Exmark®, Irritrol®, Hayter®, Pope®, Unique Lighting Systems®, Lawn-Boy®, and Lawn Genie®, most of which are registered in the United States and/or in the primary countries outside the United States where we market such products. This report also contains trademarks, trade names, and service marks that are owned by other persons or entities, such as The Home Depot.

We emphasize quality and innovation in our products, customer service, manufacturing, and marketing. We strive to provide well-built, dependable products supported by an extensive service network. We have committed funding for research, development, and engineering in order to improve existing products and develop new products. Through these efforts, we seek to be responsive to trends that may affect our target markets now and in the future. A significant portion of our revenues have historically been, and we expect will continue to be, attributable to new and enhanced products. We define new products as those introduced in the current and previous two fiscal years. We plan to continue to pursue targeted acquisitions using a disciplined approach that adds value while supplementing our existing brands and product portfolio.

Our purpose is to help our customers enrich the beauty, productivity, and sustainability of the land. Our mission is to be the leading worldwide provider of outdoor landscaping products, support services, and integrated systems that help customers preserve and beautify their outdoor landscapes with environmentally responsible solutions of customer-valued quality and innovation.

Products by Market

We strive to be a leader in adapting advanced technologies to products and services that provide solutions for turf care maintenance, landscapes, agricultural fields, construction, and residential demands. The following is a summary of our products, by market, for the Professional segment and our products for the Residential segment:

Professional We design professional turf, landscape, construction, and agricultural products and market them worldwide through a network of distributors and dealers as well as directly to government customers, rental companies, and large retailers. These channel partners then sell our products primarily to professional users engaged in creating and renovating landscapes; irrigating turf and agricultural fields; installing, repairing, and replacing underground utilities; and maintaining turf, such as golf courses, sports fields, municipal properties, and residential and commercial landscapes.

Landscape Contractor Market. We market products to landscape contractors under the Toro and Exmark brands. Products for the landscape contractor market include zero-turn radius riding mowers, heavy-duty walk behind mowers, mid-size walk behind mowers, stand-on mowers, and turf renovation and tree care equipment. We also offer some products with electronic fuel injection engine options, which provide improved fuel efficiency and lower emissions. In fiscal 2013, we enhanced our line of Toro Z Master® Commercial 3000 Series mowers, featuring our

Edgar Filing: TORO CO - Form 10-K

TURBO FORCE® cutting deck, integrated pump, and wheel motors designed for professional results, performance, and dependability. We also introduced a 30" walk behind mower under the Toro and Exmark brands, which features a wider deck that increases productivity yet maintains durability and contains a timed, twin-blade cutting system. In fiscal 2013, we introduced the RED Onboard Intelligence Platform, which is featured as part of the Exmark Lazer Z® X-Series zero-turn riding mowers. The platform enables communication and response between key systems, and safeguards machine health through monitoring and controlling key

Table of Contents

components, such as the engine and clutch, and ultimately optimizes machine life and productivity. In addition, in fiscal 2013 we introduced the new Exmark Vantage® X-Series stand-on mower, featuring a patented Enhanced Control System which provides improved comfort and ergonomics for the operator.

Sports Fields and Grounds Market. Products for the sports fields and grounds market include riding rotary mowers and attachments, aerators, and debris management products, which include versatile debris vacuums, blowers, and sweepers. Other products include multipurpose vehicles, such as the Toro Workman®, that can be used for turf maintenance, towing, and industrial hauling. In fiscal 2013, we began offering versions of these products which are compliant with Tier 4 diesel engine emission requirements. These products are sold through distributors, who then sell to owners and/or managers of sports fields, governmental properties, and residential and commercial landscapes.

Golf Market. Products for the golf course market include large reel and rotary riding products for fairway, rough and trim cutting; riding and walking mowers for putting greens and specialty areas; greens rollers; turf sprayer equipment; utility vehicles; aeration equipment; and bunker maintenance equipment. In fiscal 2013, we introduced the Reelmaster® 3550-D, which features a productive 82" cutting width, enhanced ground-following capability with turf-friendly tires, and three-wheel drive system designed for traction in hilly and wet conditions. In addition, in fiscal 2013, we began offering versions of our golf products which are compliant with Tier 4 diesel engine emission requirements.

We also manufacture and market underground irrigation systems for the golf course market, including sprinkler heads, controllers, turf sensors, and electric, battery-operated, and hydraulic valves. These irrigation systems are designed to use computerized management systems and a variety of other technologies to help customers manage their consumption of water. Our 835S/855S Series golf sprinklers are equipped with a unique TruJectory feature that provides enhanced water distribution control as well as uniformity, nozzle flexibility, and system efficiency. Our Network VP® Satellite combines modular flexibility, ease of use, and increased control in a single controller with programming to the individual station level that supports station-based flow management. Our Turf Guard® wireless soil monitoring systems are designed to measure soil moisture, salinity, and temperature through buried wireless sensors that communicate through an Internet server for processing and presentation to a user through the web. Our R Series conversion assemblies enable the upgrade of select competitive sprinklers to our patented technologies, such as our TruJectory sprinklers with adjustable height of spray capability. Our popular Lynx® central control system allows superintendents to control the irrigation of their course from a web-enabled device, or via our National Support Network, which provides remote troubleshooting. In fiscal 2013, we introduced the Toro Twilight Golf lighting system, a collection of LED-powered cup lights and removable perimeter lighting fixtures designed to illuminate putting greens during club events or special functions.

Residential/Commercial Irrigation and Lighting Market. Turf irrigation products marketed under the Toro and Irritrol brands include rotors; sprinkler bodies and nozzles; plastic, brass, and hydraulic valves; drip tubing and subsurface irrigation; electric control devices; and wired and wireless rain, freeze, climate, and soil sensors. These products are designed for use in residential and commercial turf irrigation applications and can be installed into new systems or used to replace or retrofit existing systems. Most of the product lines are designed for professionally installed, underground automatic irrigation. Electric controllers activate valves and sprinklers in a typical irrigation system. Our Irritrol Climate Logic® smart device automatically adjusts irrigation system watering times based on real-time weather data from an on-site sensor combined with historical averages, while our multiple award-winning Toro Precision Soil Sensor wirelessly transmits soil moisture content to any modern day irrigation controller and signals whether or not a watering cycle is needed. Our Precision Series Spray Nozzles are designed to provide water distribution uniformity while reducing the use of water without affecting the health of landscapes. Both the Toro and Irritrol brands achieved Environmental Protection Agency ("EPA") WaterSense certification for numerous irrigation controller families and models. In fiscal 2013, we introduced the EVOLUTION® Series, an intuitive, menu-based controller family that offers computer programming, lighting control, multiple soil sensors, smart add-ons, and downloadable updates through a USB device.

Our retail irrigation products are marketed under the Toro and Lawn Genie brand names. These products are designed for homeowner installation and include sprinkler heads, valves, timers, sensors, and drip irrigation systems. The XTRA SMART® ECXTRA sprinkler timer and its intuitive, online Scheduling Advisor recommends the proper watering schedule based on the local weather, plant type, and sprinkler type.

We manufacture and market lighting products under the Unique Lighting Systems brand name consisting of a line of high quality, professionally installed lighting fixtures and transformers for residential and commercial landscapes. Our lighting product line is offered through distributors and landscape contractors that also purchase our irrigation products. In fiscal 2013, we expanded our offering of FLEX Series drop-in LED lamps and also introduced the LIGHT LOGIC remote control system that provides operators with wireless scene control for landscape lighting.

Micro-Irrigation Market. Products for the micro-irrigation market include products that regulate the flow of water for drip irrigation, including Aqua-Traxx® PBX drip tape, Aqua-Traxx® PC (pressure-compensating) drip tape, Blue Stripe® polyethylene tubing, BlueLine® drip line, and NGE® emitters, all used in agriculture, mining,

Table of Contents

and landscape applications. In addition to these core products, we offer a full complement of control devices and connection options to complete the system. These products are sold mainly through dealers and distributors who then sell to end-users for use primarily in vegetable fields, fruit and nut orchards, vineyards, landscapes, and mines. In fiscal 2013, we expanded our product offering of the Neptune® thinwall dripline into the North America market, featuring a medium-durability dripline that enables growers to install a subsurface drip irrigation system designed to last for up to ten years and to allow growers of medium-length crops to adopt drip irrigation at a more economical cost than other traditional irrigation methods. In addition, in fiscal 2013, we introduced AquaFlow 3.2 Drip Irrigation Design Software, a new software package used to help design drip irrigation systems. Also, in late fiscal 2013, we began operations at our new micro-irrigation facility in China in order to support the anticipated global growth of our micro-irrigation business and enable expansion into new markets.

Rental and Construction Market. Our compact utility loaders are the cornerstone products for our Toro Sitework Systems business, which are designed to improve the efficiency in creation and renovation of landscapes. We offer over 35 attachments for our compact utility loaders, including trenchers, augers, vibratory plows, and backhoes. In late fiscal 2013, we launched the STX-38 Stump Grinder featuring high maneuverability and hydraulic sweep control.

Products for the rental market include compact utility loaders, walk-behind trenchers, stump grinders, and turf renovation products, many of which are also sold to landscape contractors. We also have a new line of rental products that feature concrete and mortar mixers, material handlers, compaction equipment, and other concrete power tools, which were released as Toro-branded products after being acquired in fiscal 2012.

Our presence in the construction market is driven by an equipment line of vibratory plows, trenchers, and horizontal directional drills, all of which are used in the installation, repair, and replacement of underground utilities with minimal impact on surrounding landscapes or structures. In late fiscal 2013, we introduced the Toro Pro Sneak Vibratory Plow that delivers consistent and powerful plowing in a compact, maneuverable package.

Residential We market our residential products to homeowners through a variety of distribution channels, including outdoor power equipment dealers, hardware retailers, home centers, mass retailers, and over the Internet. These products are sold mainly in North America, Europe, and Australia, with the exception of snow removal products that are sold primarily in North America and Europe. We also license our trademark on certain home solutions products as a means of expanding our brand presence.

Walk Power Mower Products. We manufacture and market numerous walk power mower models under our Toro and Lawn-Boy brand names, as well as the Pope brand in Australia and the Hayter brand in the United Kingdom. Models differ as to cutting width, type of starter mechanism, method of grass clipping discharge, deck type, operational controls, and power sources, and are either self-propelled or push mowers. We also offer a line of rear-roller walk power mowers, a design that provides a striped finish, for the United Kingdom market.

Riding Products. We manufacture and market riding products under the Toro brand name. Riding products primarily consist of zero-turn radius mowers that are designed to save homeowners time by using superior maneuverability to cut around obstacles more quickly and easily than tractor technology. Our TimeCutter® SS zero-turn radius mowers are equipped with our innovative Smart Speed® control system, which is designed to allow the operator to choose different ground speed ranges with the flip of a lever and without changing the blade or engine speed. We also sell lawn and garden tractor riding products, as well as direct-collect riding mowers that are manufactured and sold in the European market. Many models of our riding products are available with a variety of engines, decks, transmissions, and accessories.

Home Solutions Products. We design and market home solutions products under the Toro and Pope brand names, including electric, gas, and cordless grass trimmers, electric and cordless hedge trimmers, electric and gas blower-vacuums, and electric snow throwers. In Australia, we also design and market underground and hose-end retail irrigation products under the Pope brand name. In fiscal 2013, we enhanced and broadened our product offering of lithium-ion battery powered trimmers and blowers, including products that feature variable speed control for multiple applications and performance without the hassle or maintenance of gas-powered engines.

Gas Snow Removal Products. We manufacture and market a range of gas-powered single-stage and two-stage snow thrower models. Single-stage snow throwers are walk behind units with lightweight four-cycle gasoline engines. Most single-stage snow thrower models include Power Curve® snow thrower technology and some feature our Quick Shoot control system that enables operators to quickly change snow-throwing direction. Our innovative pivoting scraper is designed to keep the rotor in constant contact with the pavement. Our two-stage snow throwers are generally designed for relatively large areas of deep, heavy snow and use four-cycle engines. Our two-stage snow throwers include a line of innovative models featuring our patented Anti-Clogging System and Quick Stick® chute control technology. In late fiscal 2012, we enhanced our portfolio of compact two-stage snow throwers by introducing a new line of Power Max® snow throwers featuring a one-piece frame designed to provide maximum strength and durability and reliable performance in cold-weather conditions.

Table of Contents

Financial Information about International Operations and Business Segments

We currently manufacture our products in the United States ("U.S."), Mexico, Australia, the United Kingdom, Italy, and Romania for sale throughout the world. In late fiscal 2013, we began manufacturing micro-irrigation products in China. We maintain sales offices in the United States, Belgium, the United Kingdom, France, Australia, Singapore, Japan, China, Italy, Korea, and Germany. New product development is pursued primarily in the United States. Our net sales outside the U.S. were 30.1 percent, 30.3 percent, and 32.3 percent of total consolidated net sales for fiscal 2013, 2012, and 2011, respectively.

A portion of our cash flow is derived from sales and purchases denominated in foreign currencies. To reduce the uncertainty of foreign currency exchange rate movements on these sales and purchase commitments, we enter into foreign currency exchange contracts for select transactions. For additional information regarding our foreign currency exchange contracts, see Part II, Item 7A, "Quantitative and Qualitative Disclosures about Market Risk" of this report. For additional financial information regarding our international operations and geographical areas, and each of our three reportable business segments, see Note 12 of the Notes to Consolidated Financial Statements, in the section entitled "Segment Data," included in Part II, Item 8, "Financial Statements and Supplementary Data" of this report.

Engineering and Research

We are committed to an ongoing engineering program dedicated to developing innovative new products and improvements in the quality and performance of existing products. However, a focus on innovation also carries certain risks that new technology could be slow to be accepted or not accepted by the marketplace. We attempt to mitigate these risks through our focus on and commitment to understanding our customers' needs and requirements. We invest time upfront with customers, using "Voice of the Customer" tools, to help us develop innovative products that are intended to meet or exceed customer expectations. We use Design for Manufacturing and Assembly ("DFM/A") tools to ensure early manufacturing involvement in new product designs intended to reduce production costs. DFM/A focuses on reducing the number of parts required to assemble new products, as well as designing products to move more efficiently through the manufacturing process. We strive to make improvements to our new product development system as part of our continuing focus on Lean methods to shorten development time, reduce costs, and improve quality.

Our engineering expenses are primarily incurred in connection with the development of new products that may have additional applications or represent extensions of existing product lines, improvements to existing products, and cost reduction efforts. Our expenditures for engineering and research were \$64.6 million (3.2 percent of net sales) in fiscal 2013, \$60.1 million (3.1 percent of net sales) in fiscal 2012, and \$57.0 million (3.0 percent of net sales) in fiscal 2011.

Manufacturing and Production

In some areas of our business we serve as a fully integrated manufacturer, while in others we are primarily an assembler. We have strategically identified specific core manufacturing competencies for vertical integration and have chosen outside vendors to provide other services. We design component parts in cooperation with our vendors, contract with them for the development of tooling, and then enter into agreements with these vendors to purchase component parts manufactured using the tooling. In addition, our vendors regularly test new technologies to be applied in the design and production of component parts. Manufacturing operations include robotic and computer-automated equipment to speed production, reduce costs, and improve the quality, fit, and finish of our products. Operations are also designed to be flexible enough to accommodate product design changes that are necessary to respond to market conditions and changing customer requirements.

In order to utilize our manufacturing facilities and technology more effectively, we pursue continuous improvements in our manufacturing processes with the use of Lean methods that are intended to streamline work and eliminate waste. We spend considerable effort to reduce manufacturing costs through Lean methods and process improvement, product and platform design, application of advanced technologies, enhanced environmental management systems, SKU consolidation, safety improvements, and improved supply-chain management. We also have agreements with other third party manufacturers to manufacture products on our behalf.

Our professional products are manufactured throughout the year. Our residential lawn and garden products are also generally manufactured throughout the year. However, our residential snow removal products are manufactured in the summer and fall months but may be extended into the winter months, depending upon demand. Our products are tested in conditions and locations similar to those in which they are used. We use computer-aided design and manufacturing systems to shorten the time between initial concept and final production. DFM/A principles are used throughout the product development process to optimize product quality and cost.

Edgar Filing: TORO CO - Form 10-K

Our production levels and inventory management goals are based on estimates of retail demand for our products, taking into account production capacity, timing of shipments, and field inventory levels. Our production system utilizes Kanban, supplier pull, and build-to-order methodologies in our manufacturing facilities as appropriate for the business units they support in order to better align the production of our products to meet customer demand. We believe this has resulted in improved service levels for our participating suppliers, distributors, and dealers.

Table of Contents

We periodically shut down production at our manufacturing facilities in order to allow for maintenance, rearrangement, capital equipment installation, and as needed, to adjust for market demand. Capital expenditures for fiscal 2014 are planned to be approximately \$65 million as we expect to continue to invest in new product tooling and replacement production equipment, as well as expansion and construction of facilities, including the construction of a new corporate facility and expansion of our product development and test capacities.

Raw Materials

We purchase raw materials such as steel, aluminum, petroleum-based resins, linerboard, and other commodities, and components, such as engines, transmissions, transaxles, hydraulics, and electric motors, for use in our products. In addition, we are a purchaser of components and parts containing various commodities, including steel, aluminum, copper, lead, rubber, and others that are integrated into our end products. During fiscal 2013, we experienced lower average commodity costs compared to the average prices paid for commodities in fiscal 2012, which benefited our gross margin growth rate in fiscal 2013 as compared to fiscal 2012. We anticipate commodity prices in fiscal 2014 to be higher compared to average prices paid for commodities during fiscal 2013. Historically, we have mitigated, and we currently expect to continue to mitigate, commodity cost increases, in part, by collaborating with suppliers, reviewing alternative sourcing options, substituting materials, engaging in internal cost reduction efforts, and increasing prices on some of our products, all as appropriate.

Most of the raw materials and components used in our products are also affected by commodity cost pressures, are commercially available from a number of sources, and are in adequate supply. However, certain of our components are sourced from single suppliers. In fiscal 2013, we experienced no significant work stoppages because of shortages of raw materials or commodities. The highest raw material and component costs are generally for steel, engines, hydraulic components, transmissions, plastic resin, and electric motors, all of which we purchase from several suppliers around the world.

Service and Warranty

Our products are warranted to ensure customer confidence in design, workmanship, and overall quality. Warranty coverage is generally for specified periods of time and on select products' hours of usage, and generally covers parts, labor, and other expenses for non-maintenance repairs. Warranty coverage generally does not cover operator abuse or improper use. An authorized company distributor or dealer must perform warranty work. Distributors and dealers submit claims for warranty reimbursement and are credited for the cost of repairs, labor, and other expenses as long as the repairs meet our prescribed standards. Warranty expense is accrued at the time of sale based on the type and estimated number of products under warranty, historical average costs incurred to service warranty claims, the trend in the historical ratio of claims to sales, the historical length of time between the sale and resulting warranty claim, and other minor factors. Special warranty reserves are also accrued for major rework campaigns. Service support outside of the warranty period is provided by authorized distributors and dealers at the customer's expense. We sell extended warranty coverage on select products for a prescribed period after the original warranty period expires.

Product Liability

We have rigorous product safety standards and continually work to improve the safety and reliability of our products. We monitor for accidents and possible claims and establish liability estimates based on internal evaluations of the merits of individual claims. We purchase insurance coverage for catastrophic product liability claims for incidents that exceed our self-insured retention levels.

Patents and Trademarks

We own patents, trademarks, and trade secrets related to our products in the U.S. and certain countries outside the U.S. in which we conduct business. We expect to apply for future patents and trademarks, as appropriate, in connection with the development of innovative new products, services, and enhancements. Although we believe that, in the aggregate, our patents are valuable, and patent protection is beneficial to our business and competitive positioning, our patent protection will not necessarily deter or prevent competitors from attempting to develop similar products. We are not materially dependent on any one or more of our patents. However, certain Toro trademarks that contribute to our identity and the recognition of our products and services, including the Toro® name and logo, are an integral part of our business.

We regularly review certain patents issued by the United States Patent and Trademark Office ("USPTO") and international patent offices to help avoid potential liability with respect to others' patents. Additionally, we periodically review competitors' products to prevent possible infringement of our patents by others. We believe these activities help us minimize our risk of being a defendant in patent infringement litigation. We are currently involved in patent litigation cases where we are asserting our patents against competitors and defending against

patent infringement assertions by others.

Similarly, we periodically monitor various trademark registers and the market to prevent infringement of and damage to our trademarks by others. We are currently involved in trademark oppositions where we are asserting our trademarks against third parties who are attempting to establish rights in trademarks that are confusingly similar to ours. We believe these activities help minimize risk of harm to our trademarks, and help maintain distinct products and services that we believe are well regarded in the marketplace.

Table of Contents**Seasonality**

Sales of our residential products, which accounted for 29 percent of total consolidated net sales in fiscal 2013, are seasonal, with sales of lawn and garden products occurring primarily between February and June, depending upon seasonal weather conditions and demand for our products. Sales of snow removal products occur primarily between July and January, depending upon seasonal snow falls, demand, and product availability. Opposite seasons in global markets in which we sell our products somewhat moderate this seasonality of our residential product sales. Seasonality of professional product sales also exists, but is tempered because the selling season in the Southern U.S. and in our markets in the Southern hemisphere continues for a longer portion of the year than in Northern regions of the world.

Overall, our worldwide sales levels are historically highest in our fiscal second quarter and retail demand is generally highest in our fiscal third quarter. Typically, our accounts receivable balances increase between January and April because of higher sales volumes and extended payment terms made available to our customers. Accounts receivable balances typically decrease between May and December when payments are received. Our financing requirements are subject to variations due to seasonal changes in working capital levels, which typically increase in the first half of our fiscal year and decrease in the second half of our fiscal year. Seasonal cash requirements of our business are financed from a combination of cash balances, cash flows from operations, and our bank credit lines.

The following table shows total consolidated net sales and net earnings for each fiscal quarter as a percentage of the total fiscal year.

Quarter	Fiscal 2013		Fiscal 2012	
	Net Sales	Net Earnings	Net Sales	Net Earnings
First	22%	20%	22%	16%
Second	34	51	35	53
Third	25	26	26	31
Fourth	19	3	17	0

Effects of Weather

From time to time, weather conditions in particular geographic regions or markets may adversely or positively affect sales of some of our products and field inventory levels and result in a negative or positive impact on our future net sales. If the percentage of our net sales from outside the U.S. increases, our dependency on weather in any one part of the world decreases. Nonetheless, weather conditions could materially affect our future net sales.

Working Capital

Our businesses are seasonally working capital intensive and require funding for purchases of raw materials used in production, replacement parts inventory, payroll and other administrative costs, capital expenditures, establishment of new facilities, expansion and upgrading of existing facilities, as well as for financing receivables from customers that are not financed with Red Iron. We fund our operations through a combination of cash and cash equivalents, cash flows from operations, short-term borrowings under our credit facilities, and long-term debt. Cash management is centralized and intercompany financing is used, wherever possible, to provide working capital to wholly owned subsidiaries as needed. In addition, our credit facilities are available for additional working capital needs, acquisitions, or other investment opportunities.

Distribution and Marketing

We market the majority of our products through approximately 40 domestic and 120 international distributors, as well as a large number of outdoor power equipment dealers, hardware retailers, home centers, and mass retailers in more than 90 countries worldwide.

Edgar Filing: TORO CO - Form 10-K

Professional products are sold to distributors primarily for resale to golf courses, sports fields, industrial facilities, contractors, and government customers, and in some markets for resale to dealers. We also sell some professional segment products directly to government customers and rental companies, as well as to end-users in certain international markets. Select residential/commercial irrigation and lighting products are sold to professional irrigation and lighting distributors, and certain retail irrigation products are sold directly to home centers. Products for the rental and construction market are sold directly to dealers and rental companies. Toro and Exmark landscape contractor products are also sold directly to dealers in certain regions of North America.

Residential products, such as walk power mowers, riding products, and snow throwers, are generally sold directly to home centers, dealers, hardware retailers, and mass retailers. In certain markets, these same products are sold to distributors for resale to hardware retailers and dealers. Home solutions products are primarily sold directly to home centers, mass retailers, and hardware retailers. We also sell selected residential products over the Internet. Internationally, residential products are sold directly to dealers and mass merchandisers in Australia, Canada, and select countries in Europe. In most other countries, residential products are mainly sold to distributors for resale to dealers and mass retailers.

During fiscal 2013, we owned two domestic distribution companies. Our primary purposes in owning domestic distributorships are to facilitate ownership transfers while improving operations and to test and deploy new strategies and business practices that could be replicated by our independent distributors.

Our distribution systems are intended to assure quality of sales and market presence, as well as to provide effective after-purchase service and support. We believe our distribution network provides a competitive advantage in marketing and selling our products, in part, because our primary distribution network is

Table of Contents

focused on selling and marketing our products, and because of the long-term relationships they have established and experienced personnel they utilize to deliver high levels of customer satisfaction.

Our current marketing strategy is to maintain distinct brands and brand identification for Toro®, Exmark®, Irritrol®, Hayter®, Pope®, Unique Lighting Systems®, Lawn-Boy®, and Lawn Genie® products.

We advertise our residential products during appropriate seasons throughout the year mainly on television, on the radio, in print, and via the Internet. Professional products are advertised mainly in print and through direct mail programs, as well as on the Internet. Most of our advertising emphasizes our brand names. Advertising is purchased by us, as well as through cooperative programs with distributors, dealers, hardware retailers, home centers, and mass retailers.

Customers

Overall, we believe that in the long-term we are not dependent on any single customer; however, the Residential segment of our business is dependent on The Home Depot as a customer, which accounted for approximately 10 percent and 11 percent of our total consolidated gross sales in fiscal 2013 and 2012, respectively. While the loss of any substantial customer, including The Home Depot, could have a material adverse short-term impact on our business, we believe that our diverse distribution channels and customer base should reduce the long-term impact of any such loss.

Backlog of Orders

Our backlog of orders is dependent upon when customers place orders, and is not necessarily an indicator of our expected results for our fiscal 2014 net sales. The approximate backlog of orders as of October 31, 2013 and 2012 was \$91.2 million and \$123.9 million, respectively, a decrease of 26.4 percent. Our backlog of orders as of the end of fiscal 2012 was abnormally high, mainly for our professional segment diesel engine products subject to Tier 4 diesel engine emission requirements that began to phase in for products manufactured after January 1, 2013. As a result of these new emission requirements, we implemented price increases in order to cover the additional costs associated with the Tier 4 technologies. Consequently, customers placed orders prior to the price increases going into effect, which resulted in an abnormally high amount of backlog of orders as of the end of fiscal 2012, and was not duplicated as of the end of fiscal 2013. We expect the existing backlog of orders will be filled in early fiscal 2014.

Competition

Our products are sold in highly competitive markets throughout the world. The principal competitive factors in our markets are product innovation, quality and reliability, pricing, product support and customer service, warranty, brand awareness, reputation, distribution, shelf space, and financing options. We believe we offer total solutions and full service packages with high quality products that have the latest technology and design innovations. In addition, by selling our products through a network of distributors, dealers, hardware retailers, home centers, and mass retailers, we offer comprehensive service support during and after the warranty period. We compete in many product lines with numerous manufacturers, some of which have substantially larger operations and financial resources than us. We believe that we have a competitive advantage because we manufacture a broad range of product lines, we are committed to product innovation and customer service, we have a strong history in and focus on maintaining turf and landscapes, and our distribution channels position us well to compete in various markets.

Internationally, residential segment products face more competition because many foreign competitors design, manufacture, and market products in their respective countries. We experience this competition primarily in Europe. In addition, fluctuations in the value of the U.S. dollar may affect the price of our products in foreign markets, thereby impacting their competitiveness. We provide pricing support, as needed, to foreign customers to remain competitive in international markets.

Environmental Matters and Other Governmental Regulation

We are subject to numerous international, federal, state, and other governmental laws, rules, and regulations relating to, among others, climate change; emissions to air and discharges to water; restrictions placed on water usage and water availability; product and associated packaging; restricted substances, including "conflict minerals" disclosure rules; import and export compliance, including country of origin certification requirements; worker and product user health and safety; energy efficiency; product life-cycles; and the generation, use, handling, labeling,

Edgar Filing: TORO CO - Form 10-K

collection, management, storage, transportation, treatment, and disposal of hazardous substances, wastes, and other regulated materials. For example:

The United States EPA, the California Air Resources Board, and similar regulators in other U.S. states and foreign jurisdictions in which we sell our products have phased in, or are phasing in, emission regulations setting maximum emission standards for certain equipment. Specifically, the EPA adopted increasingly stringent engine emission regulations, including Tier 4 emission requirements applicable to diesel engines in specified horsepower ranges that are used in some of our professional segment products. Beginning January 1, 2013, such requirements expanded to additional horsepower categories and, accordingly, applied to more of our products.

The United States federal government, several U.S. states, and certain international jurisdictions in which we sell our products, including the European Union ("EU") and each of its member states, have implemented one or more of the following:

Table of Contents

(i) product life-cycle laws, rules, or regulations, which are intended to reduce waste and environmental and human health impact, and require manufacturers to collect, dispose, and recycle certain products, including some of our products, at the end of their useful life, including the Waste Electrical and Electronic Equipment ("WEEE") directive or similar product life-cycle management laws, rules, or regulations, which mandate the labeling, collection, and disposal of specified waste electrical and electronic equipment, including some of our products; (ii) the Restriction on the use of Hazardous Substances ("RoHS") directive or similar substance level laws, rules, or regulations, which restrict the use of several specified hazardous materials in the manufacture of specific types of electrical and electronic equipment, including some of our products; (iii) country of origin laws, rules, or regulations, which require certification of the geographic origin of our finished goods products and/or components used in our products through documentation and/or physical markings, as applicable; and (iv) energy efficiency laws, rules, or regulations, which are intended to reduce the use and inefficiencies associated with energy and natural resource consumption and require specified efficiency ratings and capabilities for certain products, including some of our products.

Our products, when used by residential customers, may be subject to various federal, state, and international laws, rules, and regulations that are designed to protect consumers, including rules and regulations of the United States Consumer Product Safety Commission.

Although we believe that we are in substantial compliance with currently applicable laws, rules, and regulations, we are unable to predict the ultimate impact of adopted or future laws, rules, and regulations on our business. Such laws, rules, or regulations may cause us to incur significant expenses to achieve or maintain compliance, may require us to modify our products, may adversely affect the price of or demand for some of our products, and may ultimately affect the way we conduct our operations. Failure to comply with these current or future regulations could lead to fines and other penalties, including restrictions on the importation of our products into, or the sale of our products in, one or more jurisdictions until compliance is achieved.

We are also involved in the evaluation and clean-up of a limited number of properties currently and previously owned. We do not expect that these matters will have a material adverse effect on our consolidated financial position or results of operations.

Customer Financing

Wholesale Financing. In fiscal 2009, we established Red Iron Acceptance, LLC ("Red Iron"), as a joint venture with TCF Inventory Finance, Inc. ("TCFIF"), a subsidiary of TCF National Bank. The purpose of Red Iron is to provide inventory financing, including floor plan and open account receivable financing, to distributors and dealers of our products in the U.S. and select distributors of our products in Canada. Under a separate arrangement, TCF Commercial Finance Canada, Inc. ("TCFCFC") provides inventory financing to dealers of our products in Canada. Under these financing arrangements, down payments are not required and, depending on the finance program for each product line, finance charges are incurred by us, shared between us and the distributor and/or the dealer, or paid by the distributor or dealer. Red Iron retains a security interest in the distributors' and dealers' financed inventories, and those inventories are monitored regularly. Floor plan terms to the distributors and dealers require payment as the equipment, which secures the indebtedness, is sold to customers or when payment terms become due, whichever occurs first. Rates are generally indexed to LIBOR plus a fixed percentage that differs based on whether the financing is for a distributor or dealer. Rates may also vary based on the product that is financed.

We continue to provide financing in the form of open account terms directly to home centers and mass retailers; general line irrigation dealers; international distributors and dealers, other than the Canadian distributors and dealers to whom Red Iron provides financing arrangements; micro-irrigation dealers and distributors; government customers; and rental companies. Some independent international dealers continue to finance their products with third party sources.

End-User Financing. We have agreements with third party financing companies to provide lease-financing options to golf course and sports fields and grounds equipment customers in the U.S and select countries in Europe. The purpose of these agreements is to increase sales by giving buyers of our products alternative financing options when purchasing our products.

We also have agreements with third party financing companies to provide financing programs under both generic and private label programs in the U.S. and Canada. These programs, offered primarily to Toro and Exmark dealers, provide end-user customers revolving and installment lines of credit for Toro and Exmark products, parts, and services.

Distributor Financing. Occasionally, we enter into long-term loan agreements with some distributors. These transactions are used for expansion of the distributors' businesses, acquisitions, refinancing working capital agreements, or ownership transitions. As of October 31, 2013, we had outstanding note receivables from two companies in the aggregate amount of \$1.1 million.

Employees

During fiscal 2013, we employed an average of 5,002 employees. The total number of employees as of October 31, 2013 was 5,057. We consider our employee relations to be good. Three collective bargaining agreements, each expiring in May 2014, October 2014, and October 2016, cover approximately 16 percent of our total employees. We also retain temporary and seasonal workers, mainly at our distribution centers and manufacturing facilities, as well as part-time workers, independent contractors, and consultants.

Table of Contents

Available Information

We are a U.S. public reporting company under the Securities Exchange Act of 1934, as amended ("Exchange Act"), and file reports, proxy statements, and other information with the Securities and Exchange Commission ("SEC"). Copies of these reports, proxy statements, and other information can be inspected and copied at the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Because we make filings to the SEC electronically, you may also access this information from the SEC's home page on the Internet at <http://www.sec.gov>.

We make available, free of charge on our web site www.thetorocompany.com (select the "Investor Information" link and then the "Financials" link), our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements on Schedule 14A, Section 16 reports, amendments to those reports, and other documents filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The information contained on our web site or connected to our web site is not incorporated by reference into this Annual Report on Form 10-K and should not be considered part of this report.

Forward-Looking Statements

This Annual Report on Form 10-K contains, or incorporates by reference, not only historical information, but also forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended ("Securities Act"), and Section 21E of the Exchange Act, and that are subject to the safe harbor created by those sections. In addition, we or others on our behalf may make forward-looking statements from time to time in oral presentations, including telephone conferences and/or web casts open to the public, in press releases or reports, on our web sites or otherwise. Statements that are not historical are forward-looking and reflect expectations and assumptions. Forward-looking statements are based on our current expectations of future events, and often can be identified in this report and elsewhere by using words such as "expect," "strive," "looking ahead," "outlook," "guidance," "forecast," "goal," "optimistic," "anticipate," "continue," "plan," "estimate," "project," "believe," "should," "could," "will," "would," "possible," "may," "likely," "intend," and similar expressions or future dates. Our forward-looking statements generally relate to our future performance, including our anticipated operating results, liquidity requirements, and financial condition; our business strategies and goals; and the effect of laws, rules, regulations, new accounting pronouncements, and outstanding litigation on our business and future performance.

Forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or implied. The most significant factors known to us that could materially adversely affect our business, operations, industry, financial position, or future financial performance are described below in Part I, Item 1A, "Risk Factors." We caution readers not to place undue reliance on any forward-looking statement which speaks only as of the date made and to recognize that forward-looking statements are predictions of future results, which may not occur as anticipated. Actual results could differ materially from those anticipated in the forward-looking statements and from historical results, due to the risks and uncertainties described elsewhere in this report, including in Part I, Item 1A, "Risk Factors," as well as others that we may consider immaterial or do not anticipate at this time. The risks and uncertainties described in this report, including in Part I, Item 1A, "Risk Factors," are not exclusive and further information concerning our company and our businesses, including factors that potentially could materially affect our operating results or financial condition, may emerge from time to time.

We undertake no obligation to update forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements. We advise you, however, to consult any further disclosures we make on related subjects in our future Quarterly Reports on Form 10-Q and Current Reports on Form 8-K that we file with or furnish to the SEC.

ITEM 1A. RISK FACTORS

The following are significant factors known to us that could materially adversely affect our business, operating results, financial condition, or future financial performance.

If economic conditions and outlook in the United States and in other countries in which we conduct business do not continue to improve or if they worsen, our net sales and earnings could be adversely affected.

Economic conditions and outlook in the U.S. and in other countries in which we conduct business can impact demand for our products and, ultimately, our net sales. These include, but are not limited to, recessionary conditions; slow or negative economic growth rates; the impact of U.S. federal debt, state debt, and sovereign debt defaults and austerity measures by certain European countries; slow down or reductions in levels of golf course development, renovation, and improvement; golf course closures; reduced levels of home ownership, construction, and

Edgar Filing: TORO CO - Form 10-K

sales; home foreclosures; negative consumer confidence; reduced consumer spending levels resulting from tax increases or other factors; prolonged high unemployment rates; higher commodity and components costs and fuel prices; inflationary or deflationary pressures; reduced credit availability or unfavorable credit terms for our distributors, dealers, and

Table of Contents

end-user customers; higher short-term, mortgage, and other interest rates; and general economic and political conditions and expectations. In the past, some of these factors have caused our distributors, dealers, and end-user customers to reduce spending and delay or forego purchases of our products, which have had an adverse effect on our net sales and earnings. If economic conditions and outlook in the U.S. and in other countries in which we conduct business do not further improve, or if they worsen, our net sales and earnings could be adversely affected in the future.

Weather conditions may reduce demand for some of our products and adversely affect our net sales or otherwise adversely affect our operating results.

From time to time, weather conditions in a particular geographic region may adversely affect sales and field inventory levels of some of our products. For example, in the past, drought conditions have had an adverse effect on sales of certain mowing equipment products, unusually rainy weather or severe drought conditions that result in watering bans have had an adverse effect on sales of our irrigation products, and lower snow fall accumulations in key markets have had an adverse effect on sales of our snow thrower products. Similarly, adverse weather conditions in one season may negatively impact customer purchasing patterns and our net sales for some of our products in another season. For example, lower snow fall accumulations may result in lower winter season revenues for landscape contractor professionals, causing such customers to forego or postpone spring purchases of our mowing products. To the extent that unfavorable weather conditions are exacerbated by global climate change or otherwise, our sales and other operating results may be affected to a greater degree than we have previously experienced.

Increases in the cost, or disruption in the availability, of raw materials and components that we purchase and/or increases in our other costs of doing business, such as transportation costs, may adversely affect our profit margins and businesses.

We purchase raw materials such as steel, aluminum, petroleum-based resins, linerboard, and other commodities, and components, such as engines, transmissions, transaxles, hydraulics, and electric motors, for use in our products. In addition, we are a purchaser of components and parts containing various commodities, including steel, aluminum, copper, lead, rubber, and others that are integrated into our end products. To the extent that commodity prices increase and we do not have firm pricing from our suppliers, or our suppliers are not able to honor such prices, increases in the cost of such raw materials and components and parts may adversely affect our profit margins if we are unable to pass along to our customers these cost increases in the form of price increases or otherwise reduce our cost of goods sold. Historically, we have mitigated commodity cost increases, in part, by collaborating with suppliers, reviewing alternative sourcing options, substituting materials, engaging in internal cost reduction efforts, and increasing prices on some of our products, all as appropriate. However, we may not be able to fully offset such increased costs in the future. Further, if our price increases are not accepted by our customers and the market, our net sales, profit margins, earnings, and market share could be adversely affected. Increases in our other costs of doing business may also adversely affect our profit margins and business. For example, an increase in fuel costs may result in an increase in our transportation costs, which also could adversely affect our operating results and business. Although most of the raw materials and components used in our products are generally commercially available from a number of sources and in adequate supply, certain components are sourced from single suppliers. Any disruption in the availability of such raw materials and components from our suppliers, our inability to timely or otherwise obtain substitutes for such items, or any deterioration in our relationships with or the financial viability of our suppliers could adversely affect our business.

Our professional segment net sales are dependent upon certain factors, including, golf course revenues and the amount of investment in golf course renovations and improvements; the level of new golf course development and golf course closures; the level of homeowners who outsource their lawn care; the level of residential and commercial construction; continued acceptance of and demand for micro-irrigation solutions for agricultural markets; the availability of cash or credit to professional segment customers on acceptable terms to finance new product purchases; and the amount of government revenues, budget, and spending levels for grounds maintenance equipment.

Our professional segment products are sold by distributors or dealers, or directly to government customers, rental companies, and professional users engaged in maintaining and creating landscapes, such as golf courses, sports fields, residential and commercial landscapes, and governmental and municipal properties. Accordingly, our professional segment net sales are impacted by golf course revenues and the amount of investment in golf course renovations and improvements; the level of new golf course development and golf course closures; the level of homeowners who outsource their lawn care; continued acceptance of and demand for micro-irrigation solutions for agricultural markets; the level of residential and commercial construction; availability of cash or credit on acceptable terms to finance new product purchases; and the amount of government spending for new grounds maintenance equipment. Among other things, any one or a combination of the

Table of Contents

following factors could have an adverse effect on our professional segment net sales:

reduced levels of investment in golf course renovations and improvements and new golf course development; reduced number of golf rounds played at public and private golf courses resulting in reduced revenue for such golf courses; decreased membership at private golf courses resulting in reduced revenue and, in certain cases, financial difficulties for such golf courses; and increased number of golf course closures, any one of which or any combination of which could result in a decrease in spending and demand for our products;

reduced consumer and business spending, causing homeowners and landscape contractor professionals to forego or postpone purchases of our products;

low or reduced levels of commercial and residential construction, resulting in a decrease in demand for our products;

a decline in acceptance of and demand for micro-irrigation solutions for agricultural markets;

reduced tax revenue, increased governmental expenses in other areas, tighter government budgets and government deficits, generally resulting in reduced government spending for grounds maintenance equipment; and

product availability issues if we underestimate or overestimate demand, which could negatively impact our net sales and hinder our ability to meet customer demand.

Additionally, lower sales of professional segment products that carry higher profit margins than our residential segment products could negatively impact our profit margins and net earnings.

Our residential segment net sales are dependent upon consumers buying our residential segment products at mass retailers and home centers, such as The Home Depot, Inc., the amount of product placement at retailers, consumer confidence and spending levels, and changing buying patterns of customers.

The elimination or reduction of shelf space assigned to our residential products by retailers could adversely affect our residential segment net sales. Our residential segment net sales also are dependent upon buying patterns of customers. For example, as consumers purchase products at home centers and mass retailers that offer broader and lower price points, we have experienced increased demand and sales of our residential segment products purchased at retailers. The Home Depot is a substantial customer of ours, which accounted for approximately 10 to 11 percent of our total consolidated gross sales in each of fiscal 2013, 2012, and 2011. We believe that our diverse distribution channels and customer base should reduce the long-term impact on us if we were to lose The Home Depot or any other substantial customer. However, the loss of any substantial customer, a significant reduction in sales to The Home Depot or other customers, or our inability to respond to future changes in buying patterns of customers or new distribution channels could have a material adverse impact on our business and operating results. Changing buying patterns of customers could also result in reduced sales of one or more of our residential segment products, resulting in increased inventory levels. Our residential lawn and garden products are generally manufactured throughout the year and our residential snow removal products are manufactured in the summer and fall months but may be extended into the winter months, depending upon demand. However, our production levels and inventory management goals for our residential segment products are based on estimates of retail demand for our products, taking into account production capacity, timing of shipments, and field inventory levels. If we overestimate or underestimate demand during a given season, we may not maintain the appropriate inventory levels, which could negatively impact our net sales or working capital, and hinder our ability to meet customer demand.

We face intense competition in all of our product lines with numerous manufacturers, including some that have larger operations and financial resources than us. We may not be able to compete effectively against competitors' actions, which could harm our business and operating results.

Our products are sold in highly competitive markets throughout the world. Principal competitive factors in our markets include product innovation, quality and reliability, pricing, product support and customer service, warranty, brand awareness, reputation, distribution, product placement and shelf space, and financing options. We compete in many product lines with numerous manufacturers, some of which have substantially larger operations and financial resources than us. As a result, they may be able to adapt more quickly to new or emerging technologies and changes in customer preferences, or devote greater resources to the development, promotion, and sale of their products than we can. In addition, competition could increase if new companies enter the market, existing competitors consolidate their operations or if existing competitors expand their product lines or intensify efforts within existing product lines. Our current products, products under development, and our ability to develop new and improved products may be insufficient to enable us to compete effectively with our competitors. Internationally, our residential segment products typically face more competition where foreign competitors design, manufacture, and market products in their respective countries. We experience this competition primarily in Europe. In addition, fluctuations in the value of the U.S. dollar may affect the

price of our products in foreign markets, thereby impacting their competitiveness. We may not be able to compete effectively against competitors' actions, which may include the movement by competitors with manufacturing operations to low cost countries for significant cost and price reductions, and could harm our business and operating results.

Table of Contents

A significant percentage of our consolidated net sales are generated outside of the United States, a portion of which are financed by third parties, and we intend to continue to expand our international operations. Our international operations require significant management attention and financial resources, expose us to difficulties presented by international economic, political, legal, accounting, and business factors, and may not be successful or produce desired levels of net sales.

We currently manufacture our products in the U.S., Mexico, Australia, the United Kingdom, Italy, Romania, and China for sale throughout the world. We maintain sales offices in the United States, Belgium, the United Kingdom, France, Australia, Singapore, Japan, China, Italy, Korea, and Germany. Our net sales outside the U.S. were 30.1 percent, 30.3 percent, and 32.3 percent of our total consolidated net sales for fiscal 2013, 2012, and 2011, respectively. International markets have, and will continue to be, a focus for us for revenue growth. We believe many opportunities exist in the international markets, and over time, we intend for international net sales to comprise a larger percentage of our total consolidated net sales. Several factors, including weakened international economic conditions or the impact of sovereign debt defaults by certain European countries, could adversely affect our international net sales. Additionally, the expansion of our existing international operations and entry into additional international markets require significant management attention and financial resources. Many of the countries in which we manufacture or sell our products, or otherwise have an international presence are, to some degree, subject to political, economic, and/or social instability, including drug cartel-related violence, which may disrupt our production activities and maquiladora operations based in Juarez, Mexico. Our international operations expose us and our representatives, agents, and distributors to risks inherent in operating in foreign jurisdictions. These risks include:

increased costs of customizing products for foreign countries;

difficulties in managing and staffing international operations and increases in infrastructure costs including legal, tax, accounting, and information technology;

the imposition of additional U.S. and foreign governmental controls or regulations; new or enhanced trade restrictions and restrictions on the activities of foreign agents, representatives, and distributors; and the imposition of increases in, costly and lengthy import and export licensing and other compliance requirements, customs duties and tariffs, import and export quotas and other trade restrictions, license obligations, and other non-tariff barriers to trade;

the imposition of U.S. and/or international sanctions against a country, company, person, or entity with whom we do business that would restrict or prohibit our continued business with the sanctioned country, company, person, or entity;

international pricing pressures;

laws and business practices favoring local companies;

adverse currency exchange rate fluctuations;

longer payment cycles and difficulties in enforcing agreements and collecting receivables through certain foreign legal systems;

difficulties in enforcing or defending intellectual property rights; and

multiple, changing, and often inconsistent enforcement of laws, rules, and regulations, including rules relating to environmental, health, and safety matters.

Our international operations may not produce desired levels of net sales or one or more of the factors listed above may harm our business and operating results. Any material decrease in our international sales or profitability could also adversely impact our operating results.

In addition, a portion of our international net sales are financed by third parties. The termination of our agreements with these third parties, any material change to the terms of our agreements with these third parties or in the availability or terms of credit offered to our international customers by these third parties, or any delay in securing replacement credit sources, could adversely affect our sales and operating results.

If we are unable to continue to enhance existing products, as well as develop and market new products, that respond to customer needs and preferences and achieve market acceptance, we may experience a decrease in demand for our products, and our net sales, which have historically benefited from sales of new products, may be adversely affected.

One of our growth strategies is to develop innovative, customer-valued products to generate revenue growth. In the past, our sales from new products, which we define as those introduced in the current and previous two fiscal years, have represented a significant component of our net sales and are expected to continue to represent a significant component of our future net sales. We may not be able to compete as effectively

Edgar Filing: TORO CO - Form 10-K

with our competitors, and ultimately satisfy the needs and preferences of our customers, unless we can continue to enhance existing products and develop new innovative products in the markets in which we compete. Product development requires significant financial, technological, and other resources. Product improvements and new product introductions also require significant research, planning, design, development, engineering, and testing at the technological, product, and manufacturing process levels and we may not be able to timely develop and introduce product improvements or new products. Our competitors' new products may beat our products to market, be higher quality or more reliable, be more effective with more features and/or less expensive than our products, obtain better market

Table of Contents

acceptance, or render our products obsolete. Any new products that we develop may not receive market acceptance or otherwise generate any meaningful net sales or profits for us relative to our expectations based on, among other things, existing and anticipated investments in manufacturing capacity and commitments to fund advertising, marketing, promotional programs, and research and development.

Our reliance upon patents, trademark laws, and contractual provisions to protect our proprietary rights may not be sufficient to protect our intellectual property from others who may sell similar products. Our products may infringe the proprietary rights of others.

We hold patents relating to various aspects of our products and believe that proprietary technical know-how is important to our business and their loss could have a material adverse effect on our business and operating results. Proprietary rights relating to our products are protected from unauthorized use by third parties only to the extent that they are covered by valid and enforceable patents or are maintained in confidence as trade secrets. We cannot be certain that we will be issued any patents from any pending or future patent applications owned by or licensed to us, or that the claims allowed under any issued patents will be sufficiently broad to protect our technology. In the absence of enforceable patent protection, we may be vulnerable to competitors who attempt to copy our products or gain access to our trade secrets and know-how. Others may initiate litigation to challenge the validity of our patents, or allege that we infringe their patents, or they may use their resources to design comparable products that do not infringe our patents. We may incur substantial costs if our competitors or others initiate litigation to challenge the validity of our patents, or allege that we infringe their patents, or if we initiate any proceedings to protect our proprietary rights. If the outcome of any such litigation is unfavorable to us, our business, operating results, and financial condition could be adversely affected. We also cannot be certain that our products or technologies have not infringed or will not infringe the proprietary rights of others. Any such infringement could cause third parties, including our competitors, to bring claims against us, resulting in significant costs, possible damages and substantial uncertainty. We could also be forced to develop an alternative that could be costly and time-consuming, or acquire a license, which we might not be able to do on terms favorable to us, or at all.

We also rely on trade secrets and proprietary know-how that we seek to protect, in part, by confidentiality agreements with our employees, suppliers, and consultants. These agreements may be breached, and we may not have adequate remedies for any such breach. Even if these confidentiality agreements are not breached, our trade secrets may otherwise become known or be independently developed by competitors.

We manufacture our products at, and distribute our products from, several locations in the U.S. and internationally. Any disruption at any of these facilities or our inability to cost-effectively expand existing, open and manage new, and/or move production between manufacturing facilities could adversely affect our business and operating results.

We currently manufacture most of our products at seven locations in the U.S., two locations in Mexico, and one location in each of Australia, Italy, the United Kingdom, Romania, and China. We also have several locations that serve as distribution centers, warehouses, test labs, and corporate offices. In addition, we have agreements with other third-party manufacturers to manufacture products on our behalf. These facilities may be affected by natural or man-made disasters and other external events, including drug cartel-related violence that may disrupt our production activities and maquiladora operations based in Juarez, Mexico. In the event that one of our manufacturing facilities was affected by a disaster or other event, we could be forced to shift production to one of our other manufacturing facilities. Although we maintain insurance for damage to our property and disruption of our business from casualties, such insurance may not be sufficient to cover all of our potential losses. Any disruption in our manufacturing capacity could have an adverse impact on our ability to produce sufficient inventory of our products or may require us to incur additional expenses in order to produce sufficient inventory, and therefore, may adversely affect our net sales and operating results. Any disruption or delay at our manufacturing facilities, including a work slowdown, strike, or similar action at any one of our three facilities operating under a collective bargaining agreement or the failure to renew or enter into new collective bargaining agreements, including two that each expire in May 2014 and October 2014, could impair our ability to meet the demands of our customers, and our customers may cancel orders or purchase products from our competitors, which could adversely affect our business and operating results.

Our operating results may also be adversely affected if we are unable to cost-effectively open and manage new manufacturing and distribution facilities, and move production between such facilities as needed from time to time. In fiscal 2012, we began operations at a new micro-irrigation facility in Ploiesti, Romania and in late fiscal 2013, we acquired a company and began operations at a new micro-irrigation facility in China in order to support anticipated growth of our micro-irrigation business and enable future capacity expansion. If our operations at the new facility in Romania do not produce the anticipated manufacturing and operational efficiencies, the acquisition of our new facility in China does not produce the anticipated sales and profitability targets, or the micro-irrigation products produced at either of these facilities are not accepted into new geographic markets at expected levels, we may

Table of Contents

not recover our investment in these facilities and our operating results may be adversely affected.

We intend to grow our business through acquisitions and alliances, stronger customer relations, and new joint ventures and partnerships, which could be risky and may harm our business.

One of our growth strategies is to drive growth in our businesses and accelerate opportunities to expand our global presence through targeted acquisitions and alliances, stronger customer relations, and new joint ventures and partnerships that add value while considering our existing brands and product portfolio. The benefits of an acquisition or new alliance, joint venture, or partnership may take more time than expected to develop or integrate into our operations, and we cannot guarantee that previous or future acquisitions, alliances, joint ventures, or partnerships will in fact produce any benefits. In addition, acquisitions, alliances, joint ventures, and partnerships may involve a number of risks, including:

diversion of management's attention;

difficulties in integrating and assimilating the operations and products of an acquired business or in realizing projected efficiencies, cost savings, and synergies;

inability to successfully integrate or develop a distribution channel for acquired product lines;

potential loss of key employees or customers of the acquired businesses or adverse effects on existing business relationships with suppliers and customers;

adverse impact on overall profitability if acquired businesses do not achieve the financial results projected in our valuation models;

reallocation of amounts of capital from other operating initiatives and/or an increase in our leverage and debt service requirements to pay the acquisition purchase prices, which could in turn restrict our ability to access additional capital when needed or to pursue other important elements of our business strategy;

inaccurate assessment of additional post-acquisition investments, undisclosed, contingent or other liabilities or problems, unanticipated costs associated with an acquisition, and an inability to recover or manage such liabilities and costs; and

incorrect estimates made in the accounting for acquisitions, incurrence of non-recurring charges, and write-off of significant amounts of goodwill or other assets that could adversely affect our operating results.

Our ability to grow through acquisitions will depend, in part, on the availability of suitable candidates at acceptable prices, terms, and conditions, our ability to compete effectively for acquisition candidates, and the availability of capital and personnel to complete such acquisitions and run the acquired business effectively. These risks could be heightened if we complete a large acquisition or multiple acquisitions within a relatively short period of time. In addition, some acquisitions may require the consent of the lenders under our credit agreements. We cannot predict whether such approvals would be forthcoming or the terms on which the lenders would approve such acquisitions. Any potential acquisition could impair our operating results, and any large acquisition could, among other things, impair our financial condition.

Fluctuations in foreign currency exchange rates could result in declines in our reported net sales and net earnings.

Because the functional currency of most of our foreign operations is the applicable local currency, we are exposed to foreign currency exchange rate risk arising from transactions in the normal course of business, such as sales and loans to wholly owned subsidiaries, as well as sales to third party customers, purchases from suppliers, and bank lines of credit with creditors denominated in foreign currencies. Our reported net sales and net earnings are subject to fluctuations in foreign currency exchange rates. Because our products are manufactured or sourced primarily from the U.S. and Mexico, a stronger U.S. dollar and Mexican peso generally have a negative impact on our operating results, while a weaker dollar and peso generally have a positive effect. Our primary foreign currency exchange rate exposure is with the Euro, the Australian dollar, the Canadian dollar, the British pound, the Mexican peso, the Japanese yen, the Chinese Yuan, and the Romanian New Leu against the U.S. dollar, as well as the Romanian New Leu against the Euro. While we actively manage the exposure of our foreign currency market risk in the normal course of business by entering into various foreign exchange contracts, these instruments involve risks and may not effectively limit our underlying exposure from foreign currency exchange rate fluctuations or minimize our net earnings and cash volatility associated with foreign currency exchange rate changes. Further, a number of financial institutions similar to those that serve as counterparties to our foreign exchange contracts have been adversely affected by the unprecedented distress in the worldwide credit markets during the past few years. The failure of one or more counterparties to our foreign currency exchange rate contracts to fulfill their obligations to us could adversely affect our operating results.

Our business, properties, and products are subject to governmental regulation with which compliance may require us to incur expenses, or modify our products or operations, and non-compliance may result in harm to our reputation and/or expose us to penalties. Governmental regulation may also adversely affect the demand for some of our products and our operating results.

Our business, properties, and products are subject to numerous international, federal, state, and other governmental laws, rules, and regulations relating to, among other things; climate change;

Table of Contents

emissions to air and discharges to water; restrictions placed on water usage and water availability; product and associated packaging; restricted substances, including "conflict minerals" disclosure rules; import and export compliance, including country of origin certification requirements; worker and product user health and safety; energy efficiency; product life-cycles; and the generation, use, handling, labeling, collection, management, storage, transportation, treatment, and disposal of hazardous substances, wastes, and other regulated materials. Although we believe that we are in substantial compliance with currently applicable laws, rules, and regulations, we are unable to predict the ultimate impact of adopted or future laws, rules, and regulations on our business, properties, or products. Any of these laws, rules, or regulations may cause us to incur significant expenses to achieve or maintain compliance, require us to modify our products, adversely affect the price of or demand for some of our products, and ultimately affect the way we conduct our operations. Failure to comply with any of these laws, rules, or regulations could result in harm to our reputation and/or could lead to fines and other penalties, including restrictions on the importation of our products into, and the sale of our products in, one or more jurisdictions until compliance is achieved. In addition, our competitors may adopt strategies with respect to regulatory compliance that differ significantly from our strategies. This may have the effect of changing customer preferences and our markets in ways that we did not anticipate, which may adversely affect market demand for our products and, ultimately, our net sales and financial results. Other changes in laws and regulations also may adversely affect our operating results, including, (i) taxation and tax policy changes, tax rate changes, new tax laws, revised tax law interpretations, or expiration of the domestic research tax credit, which individually or in combination may cause our effective tax rate to increase, or (ii) new, recently enacted, or revised healthcare laws or regulations, which may cause us to incur higher employee healthcare and related costs.

Increasingly stringent engine emission regulations could impact our ability to sell certain of our products into the market and appropriately price certain of our products, which could negatively affect our competitive position and financial results.

The EPA adopted increasingly stringent engine emission regulations, including Tier 4 emission requirements applicable to diesel engines in specified horsepower ranges that are used in some of our products. Beginning January 1, 2013, such requirements expanded to additional horsepower categories and, accordingly, apply to more of our products. Although we have developed plans to achieve substantial compliance with Tier 4 diesel engine emission requirements, these plans are subject to many variables including, among others, the ability of our suppliers to provide compliant engines on a timely basis or our ability to meet our production schedule. If we are unable to successfully execute such plans, our ability to sell our products into the market may be inhibited, which could adversely affect our competitive position and financial results. To the extent in which we are able to implement price increases to cover or partially offset costs related to research, development, engineering, and other expenses to design Tier 4 diesel engine compliant products in the form of price increases to our customers, and/or our competitors implement different strategies with respect to compliance with Tier 4 diesel engine emission requirements, we may experience lower market demand for our products that may, ultimately, adversely affect our profit margins, net sales, and overall financial results. Additionally, as customers' buying patterns change to purchase our products in advance of price increases on compliant products, we have and may continue to experience abnormal fluctuation in sales and our financial results of any one period may not be representative of expected financial results in subsequent periods. We believe our financial results during the first quarter of fiscal 2013 were positively impacted by these patterns and our second and third quarter periods of fiscal 2013 were negatively impacted. We expect that our first quarter of fiscal 2014 and possibly future quarters may also be negatively impacted. Alternatively, if our competitors implement different strategies with respect to compliance with Tier 4 requirements that, either in the short term or over the long term, enable them to limit price increases, introduce product modifications that gain widespread market acceptance, or otherwise changing customer preferences and buying patterns in ways that we do not currently anticipate, we may experience lower market demand for our products that may, ultimately, adversely affect our net sales, profit margins, and overall financial results.

Climate change and climate change regulations may adversely impact our operations.

There is growing concern from members of the scientific community and the general public that an increase in global average temperatures due to emissions of greenhouse gases ("GHG") and other human activities have or will cause significant changes in weather patterns and increase the frequency and severity of natural disasters. We are currently subject to rules limiting emissions and other climate related rules and regulations in certain jurisdictions where we operate. In addition, we may become subject to additional legislation and regulation regarding climate change, and compliance with any new rules could be difficult and costly. Concerned parties, such as legislators, regulators, and non-governmental organizations, are considering ways to reduce GHG emissions. Foreign, federal, state and local regulatory and legislative bodies have proposed various legislative and regulatory measures relating to climate change, regulating GHG emissions and energy policies. If such legislation is enacted, we could incur increased energy, environmental and other costs and capital expenditures to comply with the limitations. Due to uncertainty in the regulatory

Table of Contents

and legislative processes, as well as the scope of such requirements and initiatives, we cannot currently determine the effect such legislation and regulation may have on our products and operations.

We are required to comply with the "conflict minerals" rules promulgated by the SEC, which will impose costs on us and could raise reputational and other risks.

As required under the Dodd-Frank Wall Street Reform and Consumer Protection Act, in August 2012, the SEC promulgated final rules regarding disclosure of the use of certain minerals, known as "conflict minerals," which are mined from the Democratic Republic of the Congo and adjoining countries, as well as procedures regarding manufacturers' efforts to discover the origin of such minerals and metals produced from those minerals. These conflict minerals are commonly referred to as "3TG" and include tin, tantalum, tungsten, and gold. The conflict minerals rules required us to engage in due diligence efforts for the 2013 calendar year and such efforts are ongoing. Our initial disclosures are required no later than May 31, 2014 and subsequent disclosures are required no later than May 31 of each following year. We have, and we expect that we will continue to, incur additional costs and expenses, which may be significant in order to comply with these rules, including for (i) due diligence to determine whether conflict minerals are necessary to the functionality or production of any of our products and, if so, verify the sources of such conflict minerals; and (ii) any changes that we may desire to make to our products, processes, or sources of supply as a result of such diligence and verification activities. Since our supply chain is complex, ultimately we may not be able to sufficiently discover the origin of the conflict minerals used in our products through the due diligence procedures that we implement, which may adversely affect our reputation with our customers, shareholders, and other stakeholders. In such event, we may also face difficulties in satisfying customers who require that all of our products are certified as conflict mineral free. If we are not able to meet such requirements, customers may choose not to purchase our products, which could adversely affect our sales and the value of portions of our inventory. Further, there may be only a limited number of suppliers offering conflict free minerals and, as a result, we cannot be sure that we will be able to obtain metals, if necessary, from such suppliers in sufficient quantities or at competitive prices. Any one or a combination of these various factors could harm our business, reduce market demand for our products, and adversely affect our profit margins, net sales, and overall financial results.

The costs of complying with the various environmental laws related to our ownership and/or lease of real property, such as clean-up costs and liability that may be associated with certain hazardous waste disposal activities, could adversely affect our financial condition and operating results.

Because we own and lease real property, various environmental laws may impose liability on us for the costs of cleaning up and responding to hazardous substances that may have been released on our property, including releases unknown to us. These environmental laws and regulations could also require us to pay for environmental remediation and response costs at third-party locations where we disposed of or recycled hazardous substances. We are currently involved in the evaluation and clean-up of a limited number of properties we either currently or previously owned. Although we do not expect that these current matters will have a material adverse effect on our financial position or operating results, our future costs of complying with the various environmental requirements, as they now exist or may be altered in the future, could adversely affect our financial condition and operating results.

Legislative enactments could impact the competitive landscape within our markets and affect demand for our products.

Various legislative proposals, if enacted, could put us in a competitively advantaged or disadvantaged position and affect customer demand for our products relative to the product offerings of our competitors. For example, any fiscal-stimulus or other legislative enactment that inordinately impacts the lawn and garden, outdoor power equipment, or irrigation industries generally by promoting the purchase, such as through customer rebate or other incentive programs, of certain types of mowing or irrigation equipment or other products that we sell, could impact us positively or negatively, depending on whether we manufacture products that meet the specified legislative criteria, including in areas such as fuel efficiency, alternative energy or water usage, or if, as a result of such legislation, customers perceive our product offerings to be relatively more or less attractive than our competitors' product offerings. We cannot currently predict whether any such legislation will be enacted, what any such legislation's specific terms and conditions would encompass, how any such legislation would impact the competitive landscape within our markets, or how, if at all, any such legislation might ultimately affect customer demand for our products or our operating results.

Table of Contents

We operate in many different jurisdictions and we could be adversely affected by violations of the U.S. Foreign Corrupt Practices Act and similar worldwide anti-corruption laws.

The U.S. Foreign Corrupt Practices Act and similar worldwide anti-corruption laws generally prohibit companies and their intermediaries from making certain improper payments for the purpose of obtaining or retaining business. The continued expansion of our international operations could increase the risk of violations of these laws in the future. Significant violations of these laws, or allegations of such violations, could harm our reputation, could disrupt our business, and could result in significant fines and penalties that could have a material adverse effect on our results of operations or financial condition.

Management information systems are important to the efficient operation of our business. If our management information systems fail to adequately perform, or if we experience an interruption in their operation, our business and operating results could be adversely affected.

We have many management information systems that are important to the efficient operation of our business, some of which are managed by third parties. These management information systems are used to record, process, summarize, transmit, and store electronic information, and to manage or support a variety of business processes and activities, including, among other things, our accounting and financial functions, including maintaining our internal controls; our manufacturing and supply chain processes; and the data related to our research and development efforts. The failure of our management information systems to perform properly, or difficulties encountered in the development of new systems or the upgrade of existing systems, could disrupt our business, which may result in decreased sales, increased overhead costs, excess or obsolete inventory, and product shortages, causing our business and operating results to suffer. Although we take steps to secure our management information systems, including our computer systems, intranet and internet sites, email and other telecommunications and data networks, the security measures we have implemented may not be effective and our systems may be vulnerable to theft, loss, damage and interruption from a number of potential sources and events, including unauthorized access or security breaches, natural or man-made disasters, cyber attacks, computer viruses, power loss, or other disruptive events. Our reputation, brand, and financial condition could be adversely affected if, as a result of a significant cyber event or otherwise, our operations are disrupted or shutdown; our confidential, proprietary information is stolen or disclosed; data is manipulated or destroyed; we incur costs or are required to pay fines in connection with stolen customer, employee, or other confidential information; we must dedicate significant resources to system repairs or increase cyber security protection; or we otherwise incur significant litigation or other costs.

We are subject to product liability claims, product quality issues, and other litigation from time to time that could adversely affect our operating results or financial condition.

The manufacture, sale, and use of our products expose us to significant risks associated with product liability claims. If a product liability claim or series of claims is brought against us for uninsured liabilities or in excess of our insurance coverage, and it is ultimately determined that we are liable, our business could suffer. While we believe that we appropriately instruct our customers on the proper usage of our products, we cannot ensure that they will implement our instructions accurately or completely. If our products are defective or used incorrectly by our customers, injury may result and this could give rise to product liability claims against us or adversely affect our brand image or reputation. Any losses that we may suffer from any liability claims, and the effect that any product liability litigation may have upon the reputation and marketability of our products, may have a negative impact on our business and operating results. Some of our products or product improvements were developed relatively recently and defects or risks that we have not yet identified may give rise to product liability claims. Additionally, we could experience a material design or manufacturing failure in our products, a quality system failure, other safety issues, or heightened regulatory scrutiny that could warrant a recall of some of our products. A recall of some of our products could also result in increased product liability claims. Unforeseen product quality problems in the development and production of new and existing products could also result in loss of market share, reduced sales, rework costs, and higher warranty expense.

We are also subject to other litigation from time to time that could adversely affect our operating results or financial condition.

If we are unable to retain our key employees, and attract and retain other qualified personnel, we may not be able to meet strategic objectives and our business could suffer.

Our ability to meet our strategic objectives and otherwise grow our business will depend to a significant extent on the continued contributions of our leadership team. Our future success will also depend in large part on our ability to identify, attract, and retain other highly qualified managerial, technical, sales and marketing, and customer service personnel. Competition for these individuals is intense, and we may not succeed in identifying, attracting, or

Table of Contents

retaining qualified personnel. The loss or interruption of services of any of our key personnel, the inability to identify, attract, or retain qualified personnel in the future, delays in hiring qualified personnel, or any employee work slowdowns, strikes, or similar actions could make it difficult for us to conduct and manage our business and meet key objectives, which could harm our business, financial condition, and operating results.

As a result of our financing joint venture with TCFIF, we are dependent upon the joint venture to provide competitive inventory financing programs, including floor plan and open account receivable financing, to certain distributors and dealers of our products. Any material change in the availability or terms of credit offered to our customers by the joint venture, any termination or disruption of our joint venture relationship or any delay in securing replacement credit sources could adversely affect our net sales and operating results.

In fiscal 2009, we established a financing joint venture with TCFIF for the purpose of providing reliable, competitive financing to our distributors and dealers in the U.S. and select distributors of our products in Canada to support their businesses and increase our net sales, as well as to free up our working capital for our other strategic purposes. As a result, we are dependent upon the joint venture for our inventory financing programs, including floor plan and open account receivable financing. Additionally, we are dependent upon TCFIF to provide inventory financing to dealers of our products in Canada.

The availability of financing from our joint venture or otherwise will be affected by many factors, including, among others, the overall credit markets, the credit worthiness of our dealers and distributors, and regulations that may affect TCFIF, as the majority owner of the joint venture and a subsidiary of TCF National Bank, a national banking association. Any material change in the availability or terms of credit offered to our customers by the joint venture, any termination or disruption of our joint venture relationship or any delay in securing replacement credit sources could adversely affect our sales and operating results.

The terms of our credit arrangements and the indentures governing our senior notes and debentures could limit our ability to conduct our business, take advantage of business opportunities and respond to changing business, market, and economic conditions. Additionally, we are subject to counterparty risk in our credit arrangements.

Our credit arrangements and the indentures governing our 6.625% senior notes and 7.800% debentures include a number of financial and operating restrictions. For example, our credit arrangements contain financial covenants that, among other things, require us to maintain a minimum interest coverage ratio and a maximum debt to earnings ratio. Our credit arrangements and/or indentures also contain provisions that restrict our ability, subject to specified exceptions, to, among other things:

make loans and investments, including acquisitions and transactions with affiliates;

create liens or other encumbrances on our assets;

dispose of assets;

enter into contingent obligations;

engage in mergers or consolidations; and

pay dividends that are significantly higher than those currently being paid, make other distributions to our shareholders or redeem shares of our common stock.

These provisions may limit our ability to conduct our business, take advantage of business opportunities, and respond to changing business, market, and economic conditions. In addition, they may place us at a competitive disadvantage relative to other companies that may be subject to fewer, if any, restrictions or may otherwise adversely affect our business. Transactions that we may view as important opportunities, such as significant acquisitions, may be subject to the consent of the lenders under our credit arrangements, which consent may be withheld or granted subject to conditions specified at the time that may affect the attractiveness or viability of the transaction.

Although we have in place a \$150 million revolving credit facility that does not expire until July 2015, market deterioration or other factors could jeopardize the counterparty obligations of one or more of the banks participating in our facility, which could have an adverse effect on our business if we are not able to replace such credit facility or find other sources of liquidity on acceptable terms.

If we are unable to comply with the terms of our credit arrangements and indentures, especially the financial covenants, our credit arrangements could be terminated and our senior notes and debentures could become due and payable.

Edgar Filing: TORO CO - Form 10-K

We cannot assure you that we will be able to comply with all of the terms of our credit arrangements and indentures, especially the financial covenants. Our ability to comply with such terms depends on the success of our business and our operating results. Various risks, uncertainties, and events beyond our control could affect our ability to comply with the terms of our credit arrangements and/or indentures. If we were out of compliance with any covenant required by our credit arrangements following any applicable cure periods, the banks could terminate their commitments unless we could negotiate a covenant waiver. The banks could condition such waiver on amendments to the terms of our credit arrangements that may be unfavorable to us. In addition, our 6.625% senior notes and 7.800% debentures could become due and payable if we were unable to obtain a covenant waiver or refinance our

Table of Contents

medium-term debt under our credit arrangements. If our credit rating falls below investment grade and/or our average debt to earnings before interest, tax, depreciation, and amortization ("EBITDA") ratio rises above 2.00, the interest rate we currently pay on outstanding debt under our credit arrangements would increase, which could adversely affect our operating results.

We are expanding our corporate facilities and could experience disruptions to our operations in connection with such expansion efforts.

We are currently expanding our corporate facilities, driven by our need to expand the space available for our product development and test capacities, as well as our need for additional information technology and office space. We expect the expansion of our corporate facilities to be completed in fiscal 2014. We are financing such expansion efforts with cash on hand and cash from operating activities. The expansion of our corporate facilities entails risks that could cause disruption in the operations of our business. Such risks include potential interruption in data flow; unforeseen construction, scheduling, engineering, environmental, or geological problems; and unanticipated cost increases.

Our business is subject to a number of other miscellaneous risks that may adversely affect our operating results, financial condition, or business.

Other miscellaneous risks that could affect our business include:

our ability to achieve the revenue growth and operating earnings goals of our "Destination 2014" initiative;

natural or man-made disasters or global pandemics, which may result in shortages of raw materials and components, higher fuel and commodity costs, delays in shipments to customers, and increases in insurance premiums;

financial viability of distributors and dealers, changes in distributor ownership, changes in channel distribution of our products, relationships with our distribution channel partners, our success in partnering with new dealers, and our customers' ability to pay amounts owed to us;

a decline in retail sales or financial difficulties of our distributors or dealers, which could cause us to repurchase financed product; and

the threat of terrorist acts and war, which may result in heightened security and higher costs for import and export shipments of components or finished goods, reduced leisure travel, and contraction of the U.S. and worldwide economies.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents**ITEM 2. PROPERTIES**

As of October 31, 2013, we utilized manufacturing, distribution, warehouse, and office facilities totaling approximately 6 million square feet of space worldwide. We also had approximately 72 acres of excess land in Wisconsin adjacent to a distribution center, 36 acres of land in Minnesota utilized as a testing and storage facility, 10 acres of land in Minnesota held for future expansion, and 21 acres of land in California used as a testing site. Plant utilization varies during the year depending on the production cycle. We consider each of our current facilities to be in good operating condition. Management believes we have sufficient manufacturing capacity for fiscal 2014, although strategies for future operational growth are currently being assessed. We are expanding our corporate facilities located in Bloomington, Minnesota, which includes the construction of a new facility to accommodate our need to expand the space available for our product development and test capacities. We expect occupancy of the new facility to take place in fiscal 2014. Our significant facilities are listed below by location, ownership, and function as of October 31, 2013:

Location	Ownership	Products Manufactured / Use
Bloomington, MN	Owned/Leased	Corporate headquarters, warehouse, and test lab
El Paso, TX	Owned/Leased	Components for professional and residential products and distribution center
Ankeny, IA	Leased	Residential and professional distribution center
Plymouth, WI	Owned	Professional and residential parts distribution center
Juarez, Mexico	Leased	Professional and residential products
Tomah, WI	Owned/Leased	Professional products and distribution center
Windom, MN	Owned/Leased	Residential and professional products and warehouse
Beatrice, NE	Owned/Leased	Professional products, test facility, and office
Riverside, CA	Owned/Leased	Professional products, test facility, distribution center, and office
Xiamen City, China	Leased	Professional products, distribution center, and office
Braeside, Australia	Leased	Distribution center, service area, and office
Hertfordshire, United Kingdom	Owned	Professional and residential products, distribution center, test lab, and office
Ploiesti, Romania	Owned	Professional products, distribution center, test lab, and office
Shakopee, MN	Owned	Components for professional and residential products
El Cajon, CA	Owned/Leased	Professional and residential products, distribution center, test lab, and office
Brooklyn Center, MN	Leased	Distribution facility, service area, and office
St. Louis, MO	Leased	Distribution facility, service area, and office
Sanford, FL	Leased	Professional products and distribution center
Fiano Romano, Italy	Owned	Professional products, distribution center, and office
Beverley, Australia	Owned	Professional products, distribution center, service area, and office
Baraboo, WI	Leased	Professional distribution center
Capena, Italy	Leased	Distribution center
Oevel, Belgium	Owned	Distribution center, service area, and office
Kent, WA	Leased	Distribution facility, service area, and office
Abilene, TX	Leased	Office, professional products, and service center

ITEM 3. LEGAL PROCEEDINGS

We are a party to litigation in the ordinary course of business. Litigation occasionally involves claims for punitive, as well as compensatory, damages arising out of the use of our products. Although we are self-insured to some extent, we maintain insurance against certain product liability losses. We are also subject to litigation and administrative and judicial proceedings with respect to claims involving asbestos and the discharge of hazardous substances into the environment. Some of these claims assert damages and liability for personal injury, remedial investigations or clean-up, and other costs and damages. We are also typically involved in commercial disputes, employment disputes, and patent litigation cases in the ordinary course of business. To prevent possible infringement of our patents by others, we periodically review competitors' products. To avoid potential liability with respect to others' patents, we regularly review certain patents issued by the USPTO and foreign patent offices. We believe these activities help us minimize our risk of being a defendant in patent infringement litigation. We are currently involved in patent litigation cases where we are asserting and defending against claims of patent infringement.

For a description of our material legal proceedings, see Note 13 of the Notes to Consolidated Financial Statements under the heading "Commitments and Contingent Liabilities - Litigation" included in Item 8, Financial Statements and Supplementary Data of this Annual Report on Form 10-K, which is incorporated into this Item 3 by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents

EXECUTIVE OFFICERS OF THE REGISTRANT

The list below identifies those persons designated by our Board of Directors as executive officers of the company. The list sets forth each such person's age and position with the company as of December 12, 2013, as well as other positions held by them for at least the last five years. There are no family relationships between any director, executive officer, or person nominated to become a director or executive officer of the company. There are no arrangements or understandings between any executive officer and any other person pursuant to which he or she was selected as an officer of the company.

Name, Age, and Position with the Company	Business Experience During the Last Five or More Years
Michael J. Hoffman 58, Chairman of the Board, President and Chief Executive Officer	Chairman of the Board since March 2006, Chief Executive Officer since March 2005 and President since October 2004.
Judy L. Altmaier 52, Vice President, Exmark	Vice President, Exmark since June 2013. From October 2011 to June 2013, she served as Vice President, Operations and Quality Management. From October 2009 to October 2011, she served as Vice President, Operations. From January 2009 to October 2009, she served as Vice President/General Manager of Operations, Auto Group Americas for Eaton Corporation, a diversified industrial manufacturer.
William E. Brown, Jr. 52, Group Vice President, Commercial and Irrigation Businesses	Group Vice President, Commercial and Irrigation Businesses since March 2013. From March 2012 to March 2013, he served as Group Vice President, International and Commercial Businesses. From August 2010 to March 2012, he served as Vice President, International Business. From February 2009 to July 2010, he served as Vice President, Residential and Landscape Contractor Businesses. From November 2006 to February 2009, he served as Vice President, Consumer and Landscape Contractor Business Toro.
Philip A. Burkart 51, Vice President, Irrigation Business	Vice President, Irrigation Business since September 2010, which includes responsibility for our Western-based distributor. From November 2006 to September 2010, he served as Vice President, Irrigation Businesses.
Timothy P. Dordell 51, Vice President, Secretary and General Counsel	Vice President, Secretary and General Counsel since May 2007.
Michael D. Drazan 55, Vice President, Global Micro-Irrigation Business	Vice President, Global Micro-Irrigation Business since March 2012. From February 2009 to March 2012, he served as Vice President, Contractor Business and Chief Information Officer, which included responsibility for our Exmark and Sitework Systems Businesses and our Information Services function. In September 2010, he also assumed responsibility for our Micro-Irrigation Business and Corporate Accounts. From November 2007 to February 2009, he served as Chief Information Officer and Vice President, Corporate Services.
Blake M. Grams 46, Vice President, Global Operations	Vice President, Global Operations since June 2013. From December 2008 to June 2013, he served as Vice President, Corporate Controller.
Michael J. Happe 42, Group Vice President, Residential and Contractor Businesses	Group Vice President, Residential and Contractor Businesses since March 2012, which includes responsibility for our Residential and Landscape Contractor Toro, Exmark, and Sitework Systems Businesses and our Midwestern-based distributor. From August 2010 to March 2012, he served as Vice President, Residential and Landscape Contractor Businesses. From December 2008 to July 2010, he served as Vice President, Commercial Business. From November 2007 to December 2008, he served as General Manager, Commercial Business.
Thomas J. Larson 56, Vice President, Corporate Controller	Vice President, Corporate Controller since June 2013. From December 2008 to June 2013, he served as Vice President, Treasurer. He retained the office of Treasurer until July 2013.

Edgar Filing: TORO CO - Form 10-K

Richard M. Olson

49, Vice President, International Business

Vice President, International Business since March 2013. From March 2012 to March 2013, he served as Vice President, Exmark. From September 2010 to March 2012, he served as General Manager, Exmark. From April 2008 to September 2010, he served as Managing Director, Operations.

Renee J. Peterson

52, Vice President, Treasurer and Chief Financial Officer

Vice President, Treasurer and Chief Financial Officer since July 2013. From August 2011 to July 2013, she served as Vice President, Finance and Chief Financial Officer. In March 2012, she also assumed responsibility for our Information Services function. From July 2009 to August 2011, she served as Vice President Finance and Planning for the Truck and Automotive Segments of Eaton Corporation, a diversified industrial manufacturer. From September 2008 to July 2009, she served as Vice President Finance, Information Technology and Business Development for the Automotive Segment of Eaton Corporation.

Peter M. Ramstad

56, Vice President, Human Resources and Business Development

Vice President, Human Resources and Business Development since November 2007.

Darren L. Redetzke

49, Vice President, Commercial Business

Vice President, Commercial Business since August 2010. From December 2008 to July 2010, he served as Vice President, International Business. From November 2007 to December 2008, he served as General Manager, International Business.

Kurt D. Svendsen

47, Vice President, Information Services

Vice President, Information Services since June 2013. From September 2011 to June 2013, he served as Managing Director, Corporate Communications and Investor Relations. From August 2010 to September 2011, he served as Director, Investor and Public Relations. From November 2007 to August 2010, he served as Director, Business Development.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is listed for trading on the New York Stock Exchange and trades under the symbol "TTC." The high, low, and last sales prices for our common stock and cash dividends paid for each of the quarterly periods for fiscal 2013 and 2012 were as follows:

Fiscal year ended					
October 31, 2013		First	Second	Third	Fourth
Market price per share of common stock					
High sales price		\$ 45.18	\$ 48.59	\$ 50.14	\$ 59.50
Low sales price		40.25	43.14	44.17	47.56
Last sales price		44.93	45.19	49.38	58.94
Cash dividends per share of common stock¹		0.14	0.14	0.14	0.14

Fiscal year ended					
October 31, 2012		First	Second	Third	Fourth

1

During fiscal 2013, our annual dividend guideline was 20 to 30 percent of our three-year average net earnings per share for the current and previous two fiscal years. In December 2013, we increased our annual dividend guideline to 30 to 40 percent of our three-year average net earnings per share. However, future cash dividends will depend upon our financial condition, capital requirements, results of operations, and other factors deemed relevant by our Board of Directors. Restrictions on our ability to pay dividends are disclosed in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 6 of the Notes to Consolidated Financial Statements included in Item 8, Financial Statements and Supplementary Data.

2

Market prices and per share data have been adjusted for all periods presented to reflect the impact of the company's two-for-one stock split effective June 29, 2012.

Common Stock 175,000,000 and 100,000,000 shares authorized, \$1.00 par value, as of October 31, 2013 and 2012, respectively. 56,788,723 and 58,266,482 shares outstanding as of October 31, 2013 and 2012, respectively.

On March 12, 2013, following approval of our shareholders at our 2013 annual meeting of shareholders, we amended our Restated Certificate of Incorporation by filing a Certificate of Amendment to Restated Certificate of Incorporation with the Secretary of State of the State of Delaware

Edgar Filing: TORO CO - Form 10-K

to increase the number of authorized shares of common stock from 100,000,000 to 175,000,000.

Preferred Stock 1,000,000 voting shares and 850,000 non-voting shares authorized, \$1.00 par value, no shares outstanding.

Shareholders As of December 12, 2013, we had approximately 3,762 shareholders of record.

Purchases of Equity Securities The following table sets forth information with respect to shares of our common stock purchased by the company during each of the three fiscal months in our fourth quarter ended October 31, 2013.

Period	Total Number of Shares Purchased ^{1,2,3}	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ¹	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs ¹
August 3, 2013 through August 30, 2013	12,309	\$ 49.81	7,141	4,758,528
August 31, 2013 through September 27, 2013	755	54.32		4,758,528
September 28, 2013 through October 31, 2013	416,399	55.19	415,466	4,343,062
Total	429,463	\$ 55.04	422,607	

- 1 On December 11, 2012, the Board of Directors authorized the repurchase of 5,000,000 shares of our common stock in open-market or in privately negotiated transactions. This program has no expiration date but may be terminated by the Board at any time.
- 2 Includes 5,923 shares of our common stock surrendered by employees to satisfy minimum tax withholding obligations upon vesting of restricted stock granted under our stock-based compensation plans. These 5,923 shares were not repurchased under our repurchase program, described in footnote 1 above.
- 3 Includes 933 units (shares) of our common stock purchased in open-market transactions at an average price of \$56.01 per share on behalf of a rabbi trust formed to pay benefit obligations to participants in deferred compensation plans. These 933 shares were not repurchased under our repurchase program, described in footnote 1 above.

1

Per share data and sales prices have been adjusted for all periods presented to reflect the impact of the company's two-for-one stock split effective June 29, 2012.

2

Average net working capital is defined as monthly average accounts receivable plus inventory less trade payables.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis ("MD&A") provides material historical and prospective disclosures intended to enable investors and other readers to assess our financial condition and results of operations. Statements that are not historical are forward-looking and involve risks and uncertainties, including those discussed in Part I, Item 1A, "Risk Factors" and elsewhere in this report. These risks could cause our actual results to differ materially from any future performance suggested below.

OVERVIEW

We design, manufacture, and market professional turf maintenance equipment and services, turf irrigation systems, landscaping equipment and lighting, agricultural micro-irrigation systems, rental and construction equipment, and residential yard and snow removal products. We sell our products worldwide through a network of distributors, dealers, hardware retailers, home centers, mass retailers, and over the Internet. Our businesses are organized into three reportable business segments: Professional, Residential, and Distribution. Our Distribution segment, which consists of our company-owned domestic distributorships, has been combined with our corporate activities and is shown as "Other." We strive to provide innovative, well-built, and dependable products supported by an extensive service network. A significant portion of our revenues has historically been, and we expect will continue to be, attributable to new and enhanced products. We define new products as those introduced in the current and previous two fiscal years.

Table of Contents

Summary of Fiscal 2013 Results

In fiscal 2013, we achieved record net sales and crossed over the \$2 billion milestone for the first time in our history. Net earnings increased at a double digit growth rate of 19.5 percent to \$154.8 million compared to fiscal 2012. Our fiscal 2013 results included the following items of significance:

Net sales for fiscal 2013 increased by 4.2 percent compared to fiscal 2012 to a record of \$2,041.4 million. This increase was primarily attributable to increased demand for our products resulting from the successful introduction of new and enhanced products that were well received by customers, particularly for landscape contractor equipment products, continued market growth and demand for our micro-irrigation products, increased sales in the rental and construction market, and incremental sales from acquisitions of \$6.4 million. However, lower sales of residential products, mainly from poor weather conditions that negatively impacted sales of snow thrower and walk power mower products, hampered our overall net sales growth.

Professional segment net sales, which represented 70 percent of our total consolidated net sales in fiscal 2013, grew 7.2 percent in fiscal 2013 compared to fiscal 2012. Shipments increased due to strong demand for our landscape contractor equipment products due mainly to the successful introduction of new products, higher global sales of our micro-irrigation products from continued market growth and demand for our drip irrigation solutions for agricultural markets, and golf renovation projects that drove higher sales of our golf irrigation systems. Additionally, price increases introduced on some products, increased sales and demand in the rental and construction market, and incremental sales of \$6.4 million from acquisitions contributed to our professional segment net sales increase in fiscal 2013 compared to fiscal 2012.

Our residential segment net sales were down by 2.1 percent in fiscal 2013 compared to fiscal 2012 due primarily to lower shipments and demand for snow thrower products as a result of the lack of snowfall during the past two winter seasons in key markets. Additionally, adverse spring weather conditions negatively impacted our net sales and demand for walk power mowers during the key selling period. However, sales of Pope irrigation products in Australia, zero-turn radius riding mowers, and handheld trimmer and blower products were up due to positive customer response to newly introduced and enhanced products, as well as favorable weather conditions.

International net sales for fiscal 2013 were up 3.5 percent compared to fiscal 2012 due mainly to increased demand in Europe, Middle East, and Africa ("EMEA") and Asia for our micro-irrigation and golf equipment products. However, changes in foreign currency exchange rates resulted in a reduction of our total net sales of approximately \$13 million in fiscal 2013. International net sales comprised 30.1 percent of our total consolidated net sales in fiscal 2013 compared to 30.3 percent in fiscal 2012 and 32.3 percent in fiscal 2011.

In late fiscal 2013, we completed the acquisition of a micro-irrigation company located in China.

Fiscal 2013 net earnings of \$154.8 million rose 19.5 percent compared to fiscal 2012, and diluted net earnings per share increased 22.4 percent in fiscal 2013 to \$2.62 compared to \$2.14 in fiscal 2012.

Gross margin was 35.5 percent in fiscal 2013, an increase of 110 basis points from 34.4 percent in fiscal 2012. This improvement was the result of price increases on some of our products, cost reduction efforts, favorable product mix, and lower commodity prices. However, unfavorable foreign currency exchange rate movements and unabsorbed manufacturing costs hampered our gross margin growth rate in fiscal 2013.

Selling, general, and administrative ("SG&A") expense was up 5.7 percent in fiscal 2013 compared to fiscal 2012. SG&A expense as a percentage of net sales in fiscal 2013 also increased to 24.2 percent compared to 23.9 percent in fiscal 2012. These increases reflect higher spending for marketing and warehousing, increased incentive compensation expense, investments in new product development, and incremental costs from acquisitions of \$4 million, somewhat offset by lower warranty expense.

Receivables increased by 6.6 percent as of the end of fiscal 2013 compared to the end of fiscal 2012 as a result of higher sales volumes. Our average inventory levels were up by 14.3 percent during fiscal 2013 compared to fiscal 2012 as we built inventory in anticipation of strong demand for products impacted by Tier 4 diesel engine emission requirements, as well as higher inventory levels from the rollout of product offerings as a result of the growth of our rental and construction business. Average net working capital (accounts receivable plus inventory less trade payables) as a percent of net sales was 16.6 percent as of the end of fiscal 2013 compared to 15.2 percent as of the end of fiscal 2012. Our domestic field inventory levels were up as of the end of fiscal 2013 compared to the end of fiscal 2012 due, in part, to anticipated strong retail demand in fiscal 2014 for our professional segment products subject to Tier 4 diesel engine emission requirements, as well as the expansion of our rental and construction business from

recent acquisitions.

We continued our history of paying quarterly cash dividends in fiscal 2013. We increased our fiscal 2013 quarterly cash dividend by 27.3 percent to \$0.14 per share compared to our quarterly cash dividend in fiscal 2012 of \$0.11 per share.

Our stock repurchase program returned nearly \$100 million in cash to our shareholders during fiscal 2013, which reduced our number of shares outstanding. This reduction resulted in a benefit to our diluted net earnings per share of approximately \$0.07 per share in fiscal 2013 compared to fiscal 2012.

Table of Contents

Destination 2014

Our multi-year initiative, "Destination 2014," will take us to our centennial in 2014 and into our second century. This four-year initiative, which began with our 2011 fiscal year, is intended to focus our efforts on driving our legacy of excellence through building caring relationships and engaging in innovation. Through our Destination 2014 initiative, we strive to achieve our goals by pursuing a progression of annual milestones. Each fiscal year we set forth associated organic revenue growth, operating earnings, and employee engagement goals, such as continuous improvement projects with cross-functional collaboration, and we also strive to continue to focus on the progress we made through our previous initiatives, such as working capital.

Organic Revenue Growth. We intend to pursue strategic growth of our existing businesses and product categories with an annual organic revenue growth goal. One of our goals of our Destination 2014 initiative is to achieve \$100 million in organic revenue growth in each of fiscal 2011, 2012, 2013, and 2014. We define organic revenue growth as the increase in net sales, less net sales from acquisitions that occurred in the prior twelve-month period. While we exceeded our organic revenue growth goal of \$100 million for fiscal 2011, we fell short of achieving that goal in fiscal 2013 and 2012.

Operating Earnings Growth. As part of our Destination 2014 growth goals, we also have set an earnings goal to raise operating earnings as a percentage of net sales to 12 percent by the end of fiscal 2014. In fiscal 2011, 2012, and 2013, we made progress towards this goal by achieving operating earnings as a percentage of net sales of 9.8 percent, 10.5 percent, and 11.3 percent, respectively.

Outlook for Fiscal 2014

As we approach our centennial in fiscal 2014, we intend to continue to rely on principles that have sustained our longevity, which include, among many others, the importance of remaining ever vigilant and poised to flexibly respond with innovative solutions to new challenges. We have taken, and intend to continue to take, proactive measures with investments intended to generate customer demand, gain market share, and achieve strong financial results. We believe our fiscal 2014 financial performance will include, among many others, the following main factors:

We anticipate fiscal 2014 net sales in our professional segment to increase compared to fiscal 2013, led by anticipated continued growth in the worldwide micro-irrigation market. Precision irrigation products remain a long-term focus for us as we help our customers find solutions to conserve water as the need to become more efficient in water usage is expected to drive demand for our products. We also expect recent global investments in manufacturing capacity and infrastructure that expanded our market presence to contribute to sales growth of our micro-irrigation products in fiscal 2014. In late fiscal 2013, we launched our Toro branded underground utility products, and we anticipate continued growth and demand in the rental and construction market to positively impact our professional segment sales growth in fiscal 2014. Additionally, ongoing demand for our innovative landscape contractor equipment, along with the introduction of an array of new products in fiscal 2014, is expected to drive customer demand and contribute to our sales growth. Sales in the golf market are anticipated to be flat to slightly up in fiscal 2014 as golf rounds in the U.S. were down in fiscal 2013 from unfavorable weather conditions that may result in tighter budgets for golf courses to replace aged equipment in fiscal 2014.

We expect our residential segment net sales to increase in fiscal 2014 compared to fiscal 2013 as we assume weather conditions to improve in fiscal 2014 compared to the cool spring weather in fiscal 2013 that negatively impacted sales of our walk power mowers, and we anticipate the domestic economy to continue its slow rate of recovery. We anticipate new products, such as our new line of Lawn-Boy walk power mowers, to be well received by customers, and increased product placement to drive sales growth for our residential segment in fiscal 2014.

We intend to continue to focus on international markets to grow our revenues, and our long-term goal is for international sales to comprise a larger percentage of our total consolidated net sales. Recently, we have invested in new international markets, namely Asia and Eastern Europe for our micro-irrigation business, as we anticipate future worldwide demand to increase for our water conserving drip irrigation products for agricultural markets. We plan to continue investing in new products designed specifically for international markets and in infrastructure around the world, connecting us more closely to our customers and increasing our global presence. However, uncertainty with the economies of some European countries is expected to linger into fiscal 2014, which may hamper our international net sales growth. Additionally, recent foreign currency exchange rate trends could hinder our international net sales in fiscal 2014.

During fiscal 2014, we anticipate our gross margin rate to improve compared to fiscal 2013 as we continue to place additional emphasis on productivity improvements intended to reduce production costs while realizing greater efficiencies in our processes.

Edgar Filing: TORO CO - Form 10-K

However, competitive pricing challenges are expected to restrict our gross margin growth rate along with anticipated higher commodity costs in fiscal 2014 as compared to fiscal 2013.

We expect net earnings and diluted net earnings per share to be up in fiscal 2014 compared to fiscal 2013, driven mainly by our anticipated sales growth and an improvement in our gross margin rate. Additionally, we anticipate a further reduction in our diluted shares outstanding due to repurchases of our common stock.

Table of Contents

As announced on December 5, 2013, our Board of Directors increased our fiscal 2014 first quarter cash dividend by 42.9 percent to \$0.20 per share compared to the quarterly cash dividend paid in the first quarter of fiscal 2013. Additionally, during the first quarter of fiscal 2014, we changed our annual dividend guideline from 20 to 30 percent to 30 to 40 percent of our three-year average net earnings per share for the current and previous two fiscal years.

In fiscal 2014, we plan to place emphasis on improving asset utilization with a focus on reducing the amount of working capital in the supply chain. We anticipate average inventory levels to be slightly lower in fiscal 2014 compared to fiscal 2013, and we anticipate our average net working capital as a percentage of net sales in fiscal 2014 to be lower as compared to fiscal 2013.

We will continue to keep a cautionary eye on the global economic environment, retail demand, field inventory levels, commodity prices, weather conditions, competitive actions, expenses, and other factors identified in Part I, Item 1A, "Risk Factors" of this report, which could cause our actual results to differ from our anticipated outlook.

RESULTS OF OPERATIONS

Fiscal 2013 net earnings were \$154.8 million compared to \$129.5 million in fiscal 2012, an increase of 19.5 percent. Fiscal 2013 diluted net earnings per share were \$2.62, an increase of 22.4 percent from \$2.14 per share in fiscal 2012. The primary factors contributing to the net earnings improvement were higher net sales, an increase in gross profit, higher other income, and a decrease in our effective tax rate, somewhat offset by an increase in SG&A expense. Our net earnings per diluted share were also benefited by approximately \$0.07 per share in fiscal 2013 compared to fiscal 2012 as a result of reduced shares outstanding from repurchases of our common stock.

Fiscal 2012 net earnings were \$129.5 million compared to \$117.7 million in fiscal 2011, an increase of 10.1 percent. Fiscal 2012 diluted net earnings per share were \$2.14, an increase of 15.7 percent from \$1.85 per share in fiscal 2011. The primary factors contributing to the net earnings improvement were higher net sales, an increase in gross profit, leveraging of fixed SG&A costs over higher sales volumes, and a pre-tax charge of \$4.7 million in fiscal 2011 associated with a rework for a non-safety quality issue for our walk power mowers that was not duplicated in fiscal 2012. However, our tax rate in fiscal 2012 was higher compared to our tax rate in fiscal 2011 due to the expiration of the domestic research tax credit on December 31, 2011. Our net earnings per diluted share were also benefited by approximately \$0.10 per share in fiscal 2012 compared to fiscal 2011 as a result of reduced shares outstanding from repurchases of our common stock.

The following table summarizes our results of operations as a percentage of our consolidated net sales.

Fiscal years ended October 31	2013	2012	2011
Net sales	100.0%	100.0%	100.0%
Cost of sales	(64.5)	(65.6)	(66.2)
Gross margin	35.5	34.4	33.8
SG&A expense	(24.2)	(23.9)	(24.0)
Operating earnings	11.3	10.5	9.8
Interest expense	(0.8)	(0.9)	(0.9)
Other income, net	0.6	0.4	0.3
Provision for income taxes	(3.5)	(3.4)	(3.0)
Net earnings	7.6%	6.6%	6.2%

Fiscal 2013 Compared With Fiscal 2012

Net Sales. Worldwide net sales in fiscal 2013 were \$2,041.4 million compared to \$1,958.7 million in fiscal 2012, an increase of 4.2 percent. This net sales improvement was attributable to the following factors:

Edgar Filing: TORO CO - Form 10-K

Increased shipments and demand for professional segment products, mainly landscape contractor equipment, the successful introduction of new and enhanced products that were well received by customers, continued acceptance and demand for our drip irrigation solutions in agricultural markets, and golf renovation projects that drove demand for our golf irrigation systems. Additionally, price increases introduced on some products, increased sales and demand in the rental market, as well as incremental sales from acquisitions of \$6.4 million, contributed to our net sales growth in fiscal 2013.

Increased sales of Pope irrigation products in Australia, zero-turn radius riding mowers, and handheld trimmer and blower products in our residential segment due to positive customer response to newly introduced and enhanced products, as well as favorable weather conditions.

Higher international net sales due primarily to increased demand in the EMEA region and Asia for micro-irrigation and golf equipment products. However, changes in foreign currency exchange rates resulted in a reduction of our net sales of approximately \$13 million in fiscal 2013.

Somewhat offsetting those sales increases were:

A decline in overall residential segment net sales primarily from lower shipments of snow thrower products due to the lack of snowfall during the past two winter seasons in certain key markets. In addition, shipments of walk power mowers were down due to adverse spring weather conditions that negatively impacted demand and our sales during the key selling period.

Lower sales of our retail irrigation products as a result of reduced product placement at a key customer.

Table of Contents

Gross Margin. Gross margin represents gross profit (net sales less cost of sales) as a percentage of net sales. See Note 1 of the Notes to Consolidated Financial Statements, in the section entitled "Cost of Sales," for a description of expenses included in cost of sales. Gross margin increased by 110 basis points to 35.5 percent in fiscal 2013 from 34.4 percent in fiscal 2012. This improvement was mainly the result of the following factors:

- Price increases on some of our professional segment products.
- Cost reduction efforts from productivity and process improvement initiatives.
- Favorable product mix from increased sales of products that carry higher average gross margins.
- Lower average prices paid for commodities in fiscal 2013 compared to fiscal 2012.

Somewhat offsetting those positive factors were:

- Unfavorable foreign currency exchange rate movements.
- Unabsorbed manufacturing costs, mainly from lower plant utilization and plant realignment.

Selling, General, and Administrative Expense. SG&A expense increased \$26.7 million, or 5.7 percent, in fiscal 2013 compared to fiscal 2012. See Note 1 of the Notes to Consolidated Financial Statements, in the section entitled "Selling, General, and Administrative Expense," for a description of expenses included in SG&A expense. SG&A expense rate represents SG&A expense as a percentage of net sales. SG&A expense rate in fiscal 2013 increased by 30 basis points to 24.2 percent compared to 23.9 percent in fiscal 2012. The increase in SG&A expense was driven mainly by the following factors:

- Higher sales and marketing expense of \$9 million.
- An increase in warehousing costs of \$6 million, mainly related to our new distribution facility in Ankeny, Iowa, plus higher inventory levels.
- Higher incentive compensation expense of \$6 million as a result of improved financial performance.
- Continued investments in new product development that resulted in higher engineering expense of \$4 million.
- Incremental costs from acquisitions of approximately \$4 million.

Somewhat offsetting those increases in SG&A expense was a decline in warranty expense of \$4.5 million.

Interest Expense. Interest expense for fiscal 2013 decreased by 4.1 percent compared to fiscal 2012 as a result of higher capitalized interest from capital projects and lower average debt levels.

Other Income, Net. Other income, net consists mainly of our proportionate share of income or losses from equity investments (affiliates), currency exchange rate gains and losses, litigation settlements and recoveries, interest income, and retail financing revenue. Other income for fiscal 2013 was \$12.3 million compared to \$7.6 million in fiscal 2012, an increase of \$4.7 million. This increase in other income, net was due mainly to a recovery for a litigation settlement of \$3 million, an increase in income from our equity investment in Red Iron of \$1 million, and lower foreign currency exchange rate losses of \$1 million in fiscal 2013 compared to fiscal 2012.

Provision for Income Taxes. The effective tax rate for fiscal 2013 was 31.7 percent compared to 34.0 percent in fiscal 2012. The reduction in the effective tax rate was primarily the result of the retroactive reenactment of the domestic research tax credit.

We anticipate our tax rate for fiscal 2014 to be higher than our fiscal 2013 tax rate due to the expiration of the domestic research tax credit that is set to expire on December 31, 2013.

Fiscal 2012 Compared With Fiscal 2011

Net Sales. Worldwide net sales in fiscal 2012 were \$1,958.7 million compared to \$1,884.0 million in fiscal 2011, an increase of 4.0 percent. This net sales improvement was attributable to the following factors:

Increased shipments of professional segment products largely resulting from the successful introduction of new and enhanced products that were well received by customers and resulted in increased sales, strong demand for domestic golf and landscape contractor equipment as customers replaced their aged inventory, market growth and demand for our drip irrigation solutions in agricultural markets, and incremental sales of \$22.1 million from acquisitions. Additionally, a weaker average U.S. dollar compared to other currencies in which we transact business accounted for approximately \$2 million of our overall net sales increase.

Higher shipments and demand of walk power mowers, zero-turn radius riding mowers, and trimmers in our residential segment due to positive customer response to newly introduced products and favorable weather conditions drove strong demand. Additionally, sales of Pope products in Australia were up due to more favorable weather conditions in fiscal 2012 as compared to fiscal 2011.

Somewhat offsetting those sales increases were:

A decline in overall residential segment net sales primarily from lower shipments of snow thrower products and service parts due to reduced demand resulting from the lack of snowfall during the 2011-2012 winter season.

A decrease in international net sales in both our professional and residential segments due mainly to lower sales in Europe as a result of economic weakness and uncertainty in that region during fiscal 2012.

Table of Contents

Gross Margin. Gross margin increased by 60 basis points to 34.4 percent in fiscal 2012 from 33.8 percent in fiscal 2011. This improvement was mainly the result of the following factors:

Price increases on some of our products.

Lower manufacturing costs from higher plant utilization, mainly related to increased production and demand for our products.

Rework costs in fiscal 2011 for a non-safety quality issue that affected a large number of our residential segment walk power mowers that was not duplicated in fiscal 2012.

Somewhat offsetting those positive factors were:

Higher average prices paid for commodities in fiscal 2012 compared to fiscal 2011.

Unfavorable product mix and lower gross margins on product sales from acquisitions in fiscal 2012 compared to fiscal 2011.

Selling, General, and Administrative Expense. SG&A expense rate in fiscal 2012 decreased by 10 basis points to 23.9 percent compared to 24.0 percent in fiscal 2011 due to fixed SG&A costs spread over higher sales volumes. However, the increase in SG&A expense of \$15.3 million was driven mainly by incremental costs from acquisitions of \$7.2 million and higher self-insured health care expenses from unfavorable claims experience. Somewhat offsetting those increases in SG&A expense were a decline in marketing expenses of \$6.3 million due mainly to incentive programs in fiscal 2011 that were not duplicated to the same degree in fiscal 2012 and lower incentive compensation expense of \$4.2 million attributable to lower than planned financial results in fiscal 2012.

Interest Expense. Interest expense for fiscal 2012 slightly decreased by 0.4 percent compared to fiscal 2011 as a result of lower average debt levels.

Other Income, Net. Other income for fiscal 2012 was \$7.6 million compared to \$7.3 million in fiscal 2011, an increase of \$0.3 million, or 3.4 percent. This increase in other income, net was due mainly to an increase in income from our equity investment in Red Iron, somewhat offset by lower interest income in fiscal 2012 compared to fiscal 2011.

Provision for Income Taxes. The effective tax rate for fiscal 2012 was 34.0 percent compared to 32.7 percent in fiscal 2011. The increase in the effective tax rate was primarily the result of the expiration of the domestic research tax credit on December 31, 2011.

PERFORMANCE BY BUSINESS SEGMENT

As more fully described in Note 12 of the Notes to Consolidated Financial Statements, we operate in three reportable business segments: Professional, Residential, and Distribution. Our Distribution segment, which consists of our company-owned domestic distributorships, has been combined with our corporate activities and is shown as "Other." Operating earnings for our Professional and Residential segments are defined as earnings from operations plus other income, net. Operating loss for the Other segment includes earnings (loss) from our wholly owned domestic distribution companies, corporate activities, other income, and interest expense.

The following information provides perspective on our business segments' net sales and operating results.

Professional

Professional segment net sales represented 70 percent of consolidated net sales for fiscal 2013, 68 percent for fiscal 2012, and 66 percent for fiscal 2011. The following table shows the professional segment net sales, operating earnings, and operating earnings as a percent of net sales.

(Dollars in millions)

Fiscal years ended October 31	2013	2012	2011
--------------------------------------	-------------	-------------	-------------

Net sales	\$ 1,425.3	\$ 1,329.5	\$ 1,239.1
% change from prior year	7.2%	7.3%	14.2%
Operating earnings	\$ 254.4	\$ 232.1	\$ 205.0
As a percent of net sales	17.9%	17.5%	16.5%

Net Sales. Worldwide net sales for the professional segment in fiscal 2013 were up by 7.2 percent compared to fiscal 2012 primarily as a result of the following factors:

Successful introduction of new and enhanced products that were well received by customers and resulted in increased sales and demand, particularly for landscape contractor equipment.

Higher global sales of our micro-irrigation products from continued market growth and demand for our drip irrigation solutions for agricultural markets, as well as additional manufacturing capacity that increased production and enabled higher sales of our micro-irrigation products.

Increased sales and demand in the rental and construction market from broadening our customer base as part of our acquisitions in fiscal 2012, improved market conditions, and new product introductions.

Incremental sales of \$6.4 million from acquisitions.

Increased sales of golf and grounds equipment and irrigation systems as a result of price increases, higher demand, and golf renovation projects in the U.S., as well as golf projects in Asia and the EMEA region. Additionally, our domestic field inventory levels were up as of the end of fiscal 2013 compared to the end of fiscal 2012 due, in part, to anticipated strong retail demand in fiscal 2014 for our professional segment products subject to Tier 4 diesel engine emission requirements, as well as the expansion of our rental and construction business from recent acquisitions.

Somewhat offsetting those sales increases were lower sales of our retail irrigation products as a result of reduced product placement at a key customer.

Worldwide net sales for the professional segment in fiscal 2012 were up by 7.3 percent compared to fiscal 2011 primarily from the successful introduction of new and enhanced products, and higher

Table of Contents

shipments and demand for domestic golf and landscape contractor equipment as customers replaced their aged inventory. Additionally, golf rounds played were up in fiscal 2012 compared to fiscal 2011 resulting in increased revenue for golf courses and related investments in equipment. Net sales of micro-irrigation products also increased due to acceptance and demand for our drip irrigation solutions for agricultural markets, additional manufacturing capacity that increased production and enabled higher sales of our micro-irrigation products, and dealer expansion that assisted us to better meet the growing market demand for agricultural irrigation products. Incremental sales of \$22.1 million from acquisitions also benefited our professional segment net sales for fiscal 2012. Somewhat offsetting those sales increases were lower sales in Europe as a result of economic weakness and uncertainty in that region during fiscal 2012.

Operating Earnings. Operating earnings for the professional segment in fiscal 2013 increased 9.6 percent compared to fiscal 2012 due primarily to higher sales volumes and an improvement in gross margin. Expressed as a percentage of net sales, professional segment operating margins increased 40 basis points to 17.9 percent in fiscal 2013 compared to 17.5 percent in fiscal 2012. The following factors impacted professional segment operating earnings:

Higher gross margin in fiscal 2013 compared to fiscal 2012 as a result of the same factors discussed previously in the Gross Margin section.

A slight decline in SG&A expense rate in fiscal 2013 compared to fiscal 2012 due mainly to leveraging fixed SG&A costs over higher sales volumes and lower warranty expense.

Operating earnings for the professional segment in fiscal 2012 increased 13.2 percent compared to fiscal 2011 due primarily to higher sales volumes. Expressed as a percentage of net sales, professional segment operating margins increased 100 basis points to 17.5 percent in fiscal 2012 compared to 16.5 percent in fiscal 2011. The operating profit improvement was due to higher gross margin as a result of price increases on some products and manufacturing efficiencies from higher plant utilization, mainly related to increased production and demand for our products. Those gross margin improvements were somewhat offset by higher average commodity prices and lower gross margins on product sales from acquisitions. Additionally, a decline in SG&A expense rate due mainly to leveraging fixed SG&A costs over higher sales volumes and a decline in marketing expenses, somewhat offset by higher warranty expense, contributed to our professional segment operating margin improvement in fiscal 2012 compared to fiscal 2011.

Residential

Residential segment net sales represented 29 percent of consolidated net sales for fiscal 2013, 31 percent for fiscal 2012, and 33 percent for fiscal 2011. The following table shows the residential segment net sales, operating earnings, and operating earnings as a percent of net sales.

(Dollars in millions)

Fiscal years ended October 31	2013	2012	2011
Net sales	\$ 594.4	\$ 607.4	\$ 623.9
% change from prior year	(2.1)%	(2.6)%	5.8%
Operating earnings	\$ 62.0	\$ 57.9	\$ 54.4
As a percent of net sales	10.4%	9.5%	8.7%

Net Sales. Worldwide net sales for the residential segment in fiscal 2013 were down by 2.1 percent compared to fiscal 2012 primarily as a result of the following factors:

Lower shipments and demand for snow thrower products due to the lack of snowfall during the past two winter seasons in certain key markets.

A decrease in sales of walk power mowers due to adverse spring weather conditions that negatively impacted demand and our sales during the key selling period.

Somewhat offsetting the decrease in residential segment net sales were:

Increased sales of Pope irrigation products in Australia as a result of dry weather conditions in that region.

Higher shipments and demand of zero-turn radius riding mowers and handheld trimmer and blower products due mainly to positive customer response to newly introduced and enhanced products, as well as favorable fall weather conditions.

Worldwide net sales for the residential segment in fiscal 2012 were down by 2.6 percent compared to fiscal 2011 primarily as a result of lower shipments and demand for our snow thrower products and service parts due to the lack of snowfall during the 2011-2012 winter season. Somewhat offsetting the decrease in residential segment net sales included higher shipments and demand of walk power mowers, zero-turn radius riding mowers, and trimmers due to positive customer response to newly introduced products and favorable weather conditions that drove strong demand. Sales of Pope products in Australia were also up due to more favorable weather conditions in fiscal 2012 compared to fiscal 2011.

Operating Earnings. Operating earnings for the residential segment in fiscal 2013 increased 7.2 percent compared to fiscal 2012. Expressed as a percentage of net sales, residential segment operating margins increased 90 basis points to 10.4 percent in fiscal 2013 compared to 9.5 percent in fiscal 2012. The following factors impacted residential segment operating earnings:

Higher gross margins from cost reduction efforts and lower commodity costs, somewhat offset by unabsorbed manufacturing costs from lower plant utilization as we cut production due to lower sales volumes of snow thrower products and walk power mowers.

Table of Contents

Higher SG&A expense rate due to fixed SG&A costs over lower sales volumes, somewhat offset by lower warranty expense.

Higher other income due to a recovery from a litigation settlement.

Operating earnings for the residential segment in fiscal 2012 increased 6.4 percent compared to fiscal 2011. Expressed as a percentage of net sales, residential segment operating margins increased 80 basis points to 9.5 percent in fiscal 2012 compared to 8.7 percent in fiscal 2011 due to higher gross margins from costs incurred in fiscal 2011 associated with a rework for a non-safety quality issue that affected a large number of our walk power mowers that was not duplicated in fiscal 2012, somewhat offset by unfavorable product mix and higher commodity costs. Additionally, lower SG&A expense, mainly from a decrease in marketing and warranty expense related to costs incurred in fiscal 2011 for incentive programs and special warranty modifications, respectively, that were not duplicated in fiscal 2012, contributed to our residential segment operating margin improvement in fiscal 2012 as compared to fiscal 2011.

Other**(Dollars in millions)****Fiscal years ended October 31**

	2013	2012	2011
Net sales	\$ 21.8	\$ 21.8	\$ 21.0
% change from prior year	0.0%	3.6%	37.7%
Operating loss	\$ (89.7)	\$ (93.7)	\$ (84.6)

Net Sales. Net sales for the other segment includes sales from our wholly owned domestic distribution companies less sales from the professional and residential segments to those distribution companies. The other segment net sales in fiscal 2013 were even at \$21.8 million compared to fiscal 2012.

The other segment net sales in fiscal 2012 increased 3.6 percent compared to fiscal 2011 due to increased sales at our U.S. Midwestern-based distribution company.

Operating Loss. Operating loss for the other segment in fiscal 2013 decreased by 4.3 percent compared to fiscal 2012. This loss decrease was primarily attributable to litigation recovery in fiscal 2013, lower foreign currency exchange rate losses, and an increase in income from our equity investment in Red Iron.

Operating loss for the other segment in fiscal 2012 increased by 10.8 percent compared to fiscal 2011. This loss increase was primarily attributable to an increase in our self-insured health care costs and higher bad debt expense, somewhat offset by an increase in income from our equity investment in Red Iron and lower incentive compensation expense.

FINANCIAL CONDITION**Working Capital**

Throughout fiscal 2013, our average net working capital increased primarily from higher average inventory levels as we built inventory in anticipation of higher demand for our products prior to the phase-in of applicable Tier 4 diesel engine emission requirements, as well as higher inventory levels from the rollout of product offerings due to the growth of our rental and construction business. Additionally, average inventory levels were up for our residential segment due to lower sales volumes as a result of unfavorable weather conditions in the first half of fiscal 2013.

The following table highlights several key measures of our working capital performance.

2013 2012

(Dollars in millions)
Fiscal years ended October 31

Average cash and cash equivalents	\$ 123.0	\$ 104.3
Average receivables, net	198.9	185.2
Average inventories	298.0	260.8
Average accounts payable	158.3	149.0
Average days outstanding for receivables	36	35
Average inventory turnover (times)	4.42	4.93

Average net receivables increased by 7.4 percent in fiscal 2013 compared to fiscal 2012 and our average days outstanding for receivables were slightly up, to 36 days in fiscal 2013 compared to 35 days in fiscal 2012 primarily as a result of customer mix. Average inventories increased by 14.3 percent in fiscal 2013 compared to fiscal 2012, as described above. Additionally, average trade payables increased by 6.2 percent due mainly to higher volume of purchases and our supply chain initiatives. As a result of higher average inventory levels and receivables, our average net working capital (accounts receivable plus inventory less trade payables) as a percentage of net sales increased to 16.6 percent as of the end of fiscal 2013 compared to 15.2 percent as of the end of fiscal 2012.

In fiscal 2014, we intend to place emphasis on improving asset utilization, with an increased focus on reducing the amount of working capital in the supply chain, adjusting production plans, and maintaining or improving order replenishment and service levels to end users. Notwithstanding these efforts, we expect average receivables to increase in fiscal 2014 compared to fiscal 2013 due to anticipated higher sales volumes. We anticipate average inventory turnover to improve and average inventory levels to be slightly lower in fiscal 2014 as compared to fiscal 2013 due, in part, to increasing emphasis on improving asset management. Additionally, inventory levels in fiscal 2013 were higher for products impacted by Tier 4 diesel engine emission requirements, discussed previously, that will not be duplicated to the same extent in fiscal 2014. We also anticipate average accounts payable to increase in fiscal 2014 as compared to fiscal 2013, driven by continued focus on our supply chain initiatives.

Table of Contents**Capital Expenditures and Other Long-Term Assets**

Fiscal 2013 capital expenditures of \$49.4 million were higher by 14.3 percent compared to fiscal 2012. This increase was primarily attributable to capital expenditures for new product tooling, replacement production equipment, implementation of new information systems, and expansion of facilities. Capital expenditures for fiscal 2014 are planned to be approximately \$65 million as we expect to continue to invest in new product tooling and replacement production equipment, as well as expansion and construction of facilities, including the expansion of our corporate facilities located in Bloomington, Minnesota, which includes the construction of a new corporate facility to accommodate our need to expand space available for our product development and test capacities.

Long-term assets as of October 31, 2013 were \$349.5 million compared to \$323.1 million as of October 31, 2012, an increase of 8.2 percent. This increase was due primarily to a higher amount of capital expenditures in fiscal 2013 compared to fiscal 2012, as discussed above, and an increase in long-term deferred income taxes. Included in long-term assets as of October 31, 2013 and 2012 was goodwill in the amount of \$91.9 million and \$92.0 million, respectively. Based on our annual impairment analysis, we determined there was no goodwill impairment for any of our reporting units as their related fair values were substantially in excess of their carrying values.

Capital Structure

The following table details the components of our total capitalization and debt-to-capitalization ratio.

(Dollars in millions)

October 31	2013	2012
Long-term debt, including current portion	\$ 223.5	\$ 225.3
Stockholders' equity	358.7	312.4
Debt-to-capitalization ratio	38.4%	41.9%

Our debt-to-capitalization ratio decreased in fiscal 2013 compared to fiscal 2012 due to an increase in stockholders' equity from higher net earnings somewhat offset by an increase in dividends paid and repurchases of shares of our common stock in fiscal 2013 as compared to fiscal 2012.

Liquidity and Capital Resources

Our businesses are seasonally working capital intensive and require funding for purchases of raw materials used in production, replacement parts inventory, payroll and other administrative costs, capital expenditures, establishment of new facilities, expansion and upgrading of existing facilities, as well as for financing receivables from customers that are not financed with Red Iron. We believe that anticipated cash generated from operations, together with our fixed rate long-term debt, bank credit lines, and cash on hand, will provide us with adequate liquidity to meet our anticipated operating requirements. We believe that the funds available through existing financing arrangements and forecasted cash flows will be sufficient to provide the necessary capital resources for our anticipated working capital needs, capital expenditures, investments, debt repayments, quarterly cash dividend payments, and stock repurchases for at least the next twelve months. As of October 31, 2013, cash and short-term investments held by our foreign subsidiaries that are not available to fund domestic operations unless repatriated were \$24.8 million. We currently do not intend to repatriate this cash held by our foreign subsidiaries; however, if circumstances changed and these funds were needed for our U.S. operations, we would be required to accrue and pay U.S. taxes to repatriate these funds.

Cash Dividends

Each quarter in fiscal 2013, our Board of Directors declared a cash dividend of \$0.14 per share, which was a 27.3 percent increase over our cash dividend of \$0.11 per share paid each quarter in fiscal 2012. As announced on December 5, 2013, our Board of Directors recently increased our fiscal 2014 first quarter cash dividend by 42.9 percent to \$0.20 per share from the quarterly cash dividend paid in the first quarter of fiscal 2013. Additionally, during the first quarter of fiscal 2014, we changed our annual dividend guideline from 20 to 30 percent to 30 to 40 percent of our

three-year average net earnings per share for the current and previous two fiscal years.

Authorized Shares of Common Stock

On March 12, 2013, following approval by our shareholders at our 2013 annual meeting of shareholders, we amended our Restated Certificate of Incorporation by filing a Certificate of Amendment to Restated Certificate of Incorporation to increase the number of authorized shares of common stock from 100 million to 175 million.

Cash Flow

Cash flows provided by (used in) operating, investing, and financing activities during the past three fiscal years are shown in the following table.

(Dollars in millions)	Cash Provided by (Used in)		
Fiscal years ended October 31	2013	2012	2011
Operating activities	\$ 221.9	\$ 185.8	\$ 113.9
Investing activities	(44.8)	(47.3)	(69.3)
Financing activities	(118.3)	(93.0)	(140.1)
Effect of exchange rates on cash	(1.7)	(0.5)	(1.0)
Net cash provided (used)	\$ 57.1	\$ 45.0	\$ (96.5)
Cash and cash equivalents as of fiscal year end	\$ 183.0	\$ 125.9	\$ 80.9

Table of Contents

Cash Flows From Operating Activities. Our primary source of funds is cash generated from operations. In fiscal 2013, cash provided by operating activities increased \$36.1 million, or 19.4 percent, from fiscal 2012. This improvement was due to a decrease in inventory levels and higher net earnings, somewhat offset by an increase in accounts receivable.

In fiscal 2012, cash provided by operating activities increased \$71.9 million, or 63.2 percent, from fiscal 2011. This increase was due mainly to an increase in accounts payable and accrued liabilities as of the end of fiscal 2012 compared to the end of fiscal 2011, as well as higher net earnings.

Cash Flows From Investing Activities. Capital expenditures and acquisitions are a significant use of our capital resources. These investments are intended to enable sales growth for expanding markets and in new markets, help us to meet product demand, and increase our manufacturing efficiencies and capacity. Cash used in investing activities in fiscal 2013 decreased \$2.6 million, or 5.4 percent, from fiscal 2012 due to lower amounts of cash utilized for acquisitions, somewhat offset by an increase in purchases of property, plant, and equipment.

Cash used in investing activities was down 31.7 percent in fiscal 2012 compared to fiscal 2011 due mainly to lower levels of purchases of property, plant, and equipment and cash used for acquisitions.

Cash Flows From Financing Activities. Cash used in financing activities increased \$25.3 million, or 27.1 percent, in fiscal 2013 compared to fiscal 2012 due to higher amounts of cash paid for dividends and repurchases of our common stock, as well as lower amounts of proceeds from exercises of stock options.

Cash used in financing activities decreased by 33.6 percent in fiscal 2012 compared to fiscal 2011. This decrease was primarily attributable to lower amounts of cash utilized to repurchase our common stock in fiscal 2012 compared to fiscal 2011, plus an increase in proceeds from exercises of stock options and tax benefits from stock-based awards.

Credit Lines and Other Capital Resources

Our businesses are seasonal, with accounts receivable balances historically increasing between January and April, as a result of typically higher sales volumes and extended payment terms made available to our customers, and typically decreasing between May and December when payments are received. The seasonality of production and shipments causes our working capital requirements to fluctuate during the year. Seasonal cash requirements are financed from operations, cash on hand, and with short-term financing arrangements, including our \$150.0 million unsecured senior four-year revolving credit facility that expires in July 2015. Included in our \$150.0 million revolving credit facility is a \$20.0 million sublimit for standby letters of credit and a \$20.0 million sublimit for swingline loans. At our election, and with the approval of the named borrowers on the revolving credit facility, the aggregate maximum principal amount available under the facility may be increased by an amount up to \$100.0 million in aggregate. Funds are available under the revolving credit facility for working capital, capital expenditures, and other lawful purposes, including, but not limited to, acquisitions and stock repurchases. Interest expense on this credit line is determined based on a LIBOR rate (or other rates quoted by the Administrative Agent, Bank of America, N.A.) plus a basis point spread defined in the credit agreement. In addition, our non-U.S. operations maintain unsecured short-term lines of credit in the aggregate amount of approximately \$12.5 million. These facilities bear interest at various rates depending on the rates in their respective countries of operation. As of October 31, 2013, we had no outstanding short-term debt under these lines of credit. As of October 31, 2013, we had \$14.6 million of outstanding letters of credit and \$147.9 million of unutilized availability under our credit agreements. Additionally, as of October 31, 2013, we had \$223.5 million outstanding in long-term debt that includes \$100 million in aggregate principal amount of 7.8% debentures due June 15, 2027 and \$125.0 million in aggregate principal amount of 6.625% senior notes due May 1, 2037.

Our revolving credit facility contains standard covenants, including, without limitation, financial covenants, such as the maintenance of minimum interest coverage and maximum debt to earnings ratios; and negative covenants, which among other things, limit loans and investments, disposition of assets, consolidations and mergers, transactions with affiliates, restricted payments, contingent obligations, liens, and other matters customarily restricted in such agreements. Most of these restrictions are subject to certain minimum thresholds and exceptions. Under the revolving credit facility, we are not limited in the amount for payments of cash dividends and stock repurchases as long as our debt to EBITDA ratio from the previous quarter compliance certificate is less than or equal to 2.75; however, we are limited to \$50 million per fiscal year if our debt to EBITDA ratio from the previous quarter compliance certificate is greater than 2.75. As of October 31, 2013, we are not limited in the amount for payments of cash dividends and stock repurchases as our debt to EBITDA ratio was below 2.75. We were in compliance with all covenants related to our credit agreement for our revolving credit facility as of October 31, 2013, and we expect to be in compliance with all covenants during fiscal 2014. If we were out of compliance with any debt covenant required by this credit agreement following the applicable cure period, the banks could terminate their commitments unless we could negotiate a covenant waiver from the banks. In addition, our long-term senior notes and debentures could become due and payable if we were unable to obtain a covenant waiver or refinance our short-term debt under our credit agreement. If our credit rating falls below investment grade and/or our average debt to EBITDA ratio rises above 2.00, the basis point spread over LIBOR (or other rates quoted by the Administrative Agent, Bank of America, N.A.)

Table of Contents

we currently pay on our outstanding short-term debt under the credit agreement would increase. However, the credit commitment could not be cancelled by the banks based solely on a ratings downgrade. Our debt rating for long-term unsecured senior, non-credit enhanced debt was unchanged during fiscal 2013 by Standard and Poor's Ratings Group at BBB and by Moody's Investors Service at Baa3.

Share Repurchase Plan

During fiscal 2013, we continued repurchasing shares of our common stock in the open market, thereby reducing our shares outstanding. In addition, our repurchase programs provided shares for use in connection with our equity compensation programs. As of October 31, 2013, 4,343,062 shares remained available for repurchase under our Board authorization. We expect to continue repurchasing shares of our common stock in fiscal 2014 depending upon market conditions and our cash position.

The following table provides information with respect to repurchases of our common stock during the past three fiscal years.

(Dollars in millions, except per share data)

Fiscal years ended October 31	2013	2012	2011

Does not include shares of our common stock surrendered by employees to satisfy minimum tax withholding obligations upon vesting of restricted stock granted under our stock-based compensation plans.

Customer Financing Arrangements

Wholesale Financing. In fiscal 2009, we established our Red Iron joint venture with TCFIF. The purpose of Red Iron is to provide inventory financing, including floor plan and open account receivable financing, to distributors and dealers of our products in the U.S. and select distributors of our products in Canada to enable our distributors and dealers to carry representative inventories of our products. Under a separate arrangement, TCFIF provides inventory financing to dealers of our products in Canada. Under these financing arrangements, down payments are not required and, depending on the finance program for each product line, finance charges are incurred by us, shared between us and the distributor and/or the dealer, or paid by the distributor or dealer. Red Iron retains a security interest in the distributors' and dealers' financed inventories, and those inventories are monitored regularly. Floor plan terms to the distributors and dealers require payment as the equipment, which secures the indebtedness, is sold to customers or when payment terms become due, whichever occurs first. Rates are generally indexed to LIBOR plus a fixed percentage that differs based on whether the financing is for a distributor or dealer. Rates may also vary based on the product that is financed. Red Iron financed \$1,211.5 million of new receivables for dealers and distributors during fiscal 2013, of which \$260.9 million was outstanding as of October 31, 2013.

Some independent international dealers continue to finance their products with a third party financing company. This third party financing company purchased \$26.5 million of receivables from us during fiscal 2013, of which \$13.3 million was outstanding as of October 31, 2013.

We also enter into limited inventory repurchase agreements with third party financing companies and Red Iron for receivables financed by them. As of October 31, 2013, we were contingently liable to repurchase up to a maximum amount of \$10.2 million of inventory related to receivables under these financing arrangements. We have repurchased immaterial amounts of inventory from third party financing companies and Red Iron over the past three fiscal years. However, a decline in retail sales or financial difficulties of our distributors or dealers could cause this situation to change and thereby require us to repurchase financed product up to but not exceeding our limited obligation, which could have an adverse effect on our operating results.

We continue to provide financing in the form of open account terms to home centers and mass retailers; general line irrigation dealers; international distributors and dealers other than the Canadian distributors and dealers to whom Red Iron provides financing arrangements; micro-irrigation dealers and distributors; government customers; and rental companies.

Edgar Filing: TORO CO - Form 10-K

End-User Financing. We have agreements with third party financing companies to provide lease-financing options to golf course and sports fields and grounds equipment customers in the U.S. and select countries in Europe. The purpose of these agreements is to increase sales by giving buyers of our products alternative financing options when purchasing our products. We have no contingent liabilities for residual value or credit collection risk under these agreements with third party financing companies.

From time to time, we enter into agreements where we provide recourse to third party finance companies in the event of default by the customer for lease payments to the third party finance company. Our maximum exposure for credit collection under those arrangements as of October 31, 2013 was \$1.7 million.

Termination or any material change to the terms of our end-user financing arrangements, availability of credit for our customers, including any delay in securing replacement credit sources, or significant financed product repurchase requirements, could have a material adverse impact on our future operating results.

Distributor Financing. From time to time, we enter into long-term loan agreements with some distributors. These transactions are used for expansion of the distributors' businesses, acquisitions, refinancing working capital agreements, or facilitation of ownership changes. As of October 31, 2013, we had outstanding

Table of Contents

note receivables in the aggregate of \$1.1 million from two companies, which is included in other current assets on our consolidated balance sheet.

Off-Balance Sheet Arrangements and Contractual Obligations

The following table summarizes our contractual obligations as of October 31, 2013.

(Dollars in thousands) Contractual Obligation	Payments Due By Period				Total
	Less Than 1 Year	1-3 Years	3-5 Years	More than 5 Years	
Long-term debt¹	\$	\$	\$	\$225,000	\$225,000
Interest payments	16,081	32,162	32,163	228,254	308,660
Deferred compensation arrangements²	665	1,014	1,014	84	2,777
Purchase obligations³	26,997				26,997
Operating leases⁴	14,632	21,851	9,495	27,187	73,165
Other⁵	1,395				1,395
Total	\$ 59,770	\$55,027	\$42,672	\$480,525	\$637,994

1 Principal payments in accordance with our long-term debt agreements.

2 The unfunded deferred compensation arrangements, covering certain current and retired management employees, consists primarily of salary and bonus deferrals under our deferred compensation plans. Our estimated distributions in the contractual obligations table are based upon a number of assumptions, including termination dates and participant elections. Deferred compensation balances are invested according to the election of the participant in an array of funds that is substantially similar to the array of funds offered under The Toro Company Investment, Savings and Employee Stock Ownership Plan, and are payable at the election of the participant.

3 Purchase obligations represent contracts or commitments for the purchase of raw materials and capital expenditures, including expansion of our corporate facilities.

4 Operating lease obligations do not include payments to property owners covering real estate taxes and common area maintenance.

5 Payment obligation issued in connection with an acquisition.

As of October 31, 2013, we also had \$12.7 million in outstanding letters of credit issued, including standby letters of credit, during the normal course of business, as required by some vendor contracts. In addition to the above contractual obligations, we may be obligated for additional cash outflows of \$4.6 million of unrecognized tax benefits, including interest and penalties. The payment and timing of any such payments is affected by the ultimate resolution of the tax years that are under audit or remain subject to examination by the relevant taxing authorities.

Market Risk

Due to the nature and scope of our operations, we are subject to exposures that arise from fluctuations in interest rates, foreign currency exchange rates, and commodity prices. We are also exposed to equity market risk pertaining to the trading price of our common stock. Additional information is presented in Part II, Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," and Note 14 of the Notes to Consolidated Financial Statements.

Inflation

We are subject to the effects of inflation, deflation, and changing prices. During fiscal 2013, we experienced lower average commodity costs compared to the average prices paid for commodities in fiscal 2012, which benefited our gross margin growth rate in fiscal 2013 as compared to fiscal 2012. We will continue to closely follow commodities that affect our product lines, and we anticipate average prices paid for some commodities to be higher in fiscal 2014 as compared to fiscal 2013. Historically, we have mitigated, and we currently expect to continue to mitigate, commodity cost increases, in part, by collaborating with suppliers, reviewing alternative sourcing options, substituting materials, engaging in internal cost reduction efforts, and increasing prices on some of our products, all as appropriate.

Acquisitions

On September 30, 2013, during the fourth quarter of fiscal 2013, we completed the acquisition of certain assets and assumed certain liabilities for a company in China that manufactures water-efficient drip irrigation products, sprinklers, emitters, and filters for agriculture, landscaping, and green house production. The purchase price of this acquisition was \$3.5 million.

On April 25, 2012, during the second quarter of fiscal 2012, we completed the acquisition of certain assets for an equipment line of concrete and mortar mixers, material handlers, compaction equipment, and other concrete power tools for the rental and construction market. On February 10, 2012, also during the second quarter of fiscal 2012, we completed the acquisition of certain assets and assumed certain liabilities for an equipment line of vibratory plows, trenchers, and horizontal directional drills for the construction market. On December 9, 2011, during the first quarter of fiscal 2012, we completed the acquisition of certain assets and assumed certain liabilities for a greens roller product line for the golf course market. The aggregate purchase price of these acquisitions was \$11.1 million.

These acquisitions were immaterial based on our consolidated financial condition and results of operations and all were accounted for as business combinations.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

In preparing our consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP"), we must make decisions that impact the reported amounts of assets, liabilities, revenues and expenses, and related disclosures. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. In reaching such decisions, we apply judgments based on our understanding and analysis of the relevant circumstances, historical experience, and actuarial valuations. Actual amounts could differ from those estimated at the time the consolidated financial statements are prepared.

Our significant accounting policies are described in Note 1 of the Notes to Consolidated Financial Statements. Some of those significant accounting policies require us to make difficult subjective or

Table of Contents

complex judgments or estimates. An accounting estimate is considered to be critical if it meets both of the following criteria: (i) the estimate requires assumptions about matters that are highly uncertain at the time the accounting estimate is made, and (ii) different estimates reasonably could have been used, or changes in the estimate that are reasonably likely to occur from period to period may have a material impact on the presentation of our financial condition, changes in financial condition, or results of operations. Our critical accounting estimates include the following:

Warranty Reserve. Warranty coverage on our products is generally for specified periods of time and on select products hours of usage, and generally covers parts, labor, and other expenses for non-maintenance repairs. Warranty coverage generally does not cover operator abuse or improper use. At the time of sale, we accrue a warranty reserve by product line for estimated costs in connection with future warranty claims. We also establish reserves for major rework campaigns. The amount of our warranty reserves is based primarily on the estimated number of products under warranty, historical average costs incurred to service warranty claims, the trend in the historical ratio of claims to sales, and the historical length of time between the sale and resulting warranty claim. We periodically assess the adequacy of our warranty reserves based on changes in these factors and record any necessary adjustments if actual claim experience indicates that adjustments are necessary. Actual claims could be higher or lower than amounts estimated, as the amount and value of warranty claims are subject to variation due to such factors as performance of new products, significant manufacturing or design defects not discovered until after the product is delivered to customers, product failure rates, and higher or lower than expected service costs for a repair. We believe that analysis of historical trends and knowledge of potential manufacturing or design problems provide sufficient information to establish a reasonable estimate for warranty claims at the time of sale. However, since we cannot predict with certainty future warranty claims or costs associated with servicing those claims, our actual warranty costs may differ from our estimates. An unexpected increase in warranty claims or in the costs associated with servicing those claims would result in an increase in our warranty accrual and a decrease in our net earnings.

Sales Promotions and Incentives. At the time of sale to a customer, we record an estimate for sales promotion and incentive costs that are classified as a reduction from gross sales or as a component of SG&A expense. Examples of sales promotion and incentive programs include rebate programs on certain professional products sold to distributors, volume discounts, retail financing support, floor planning, cooperative advertising, commissions, and other sales discounts and promotional programs. The estimates for sales promotion and incentive costs are based on the terms of the arrangements with customers, historical payment experience, field inventory levels, volume purchases, and expectations for changes in relevant trends in the future. Actual results may differ from these estimates if competitive factors dictate the need to enhance or reduce sales promotion and incentive accruals or if customer usage and field inventory levels vary from historical trends. Adjustments to sales promotions and incentive accruals are made from time to time as actual usage becomes known in order to properly estimate the amounts necessary to generate consumer demand based on market conditions as of the balance sheet date.

Inventory Valuation. We value our inventories at the lower of the cost of inventory or net realizable value, with cost determined by either the last-in, first-out ("LIFO") method for most U.S. inventories or the first-in, first-out ("FIFO") method for all other inventories. We establish reserves for excess, slow moving, and obsolete inventory based on inventory levels, expected product life, and forecasted sales demand. Valuation of inventory can also be affected by significant redesign of existing products or replacement of an existing product by an entirely new generation product. In assessing the ultimate realization of inventories, we are required to make judgments as to future demand requirements compared with inventory levels. Reserve requirements are developed according to our projected demand requirements based on historical demand, competitive factors, and technological and product life cycle changes. It is possible that an increase in our reserve may be required in the future if there is a significant decline in demand for our products and we do not adjust our production schedule accordingly.

We also record a reserve for inventory shrinkage. Our inventory shrinkage reserve represents anticipated physical inventory losses that are recorded based on historical loss trends, ongoing cycle-count and periodic testing adjustments, and inventory levels.

Though management considers reserve balances adequate and proper, changes in economic conditions in specific markets in which we operate could have an effect on the reserve balances required.

Accounts and Notes Receivable Valuation. We value accounts and notes receivable net of an allowance for doubtful accounts. Each fiscal quarter, we prepare an analysis of our ability to collect outstanding receivables that provides a basis for an allowance estimate for doubtful accounts. In doing so, we evaluate the age of our receivables, past collection history, current financial conditions of key customers, and economic conditions. Based on this evaluation, we establish a reserve for specific accounts and notes receivable that we believe are uncollectible, as well as an estimate of uncollectible receivables not specifically known. A deterioration in the financial condition of any key customer, inability of customers to obtain bank credit lines, or a significant slow-down in the economy could have a material negative impact on our ability to collect a portion or all of the accounts and notes receivable. We believe that an analysis of historical trends and our current knowledge of potential collection problems provide us with sufficient information

Table of Contents

to establish a reasonable estimate for an allowance for doubtful accounts. However, since we cannot predict with certainty future changes in the financial stability of our customers or in the general economy, our actual future losses from uncollectible accounts may differ from our estimates. In the event we determined that a smaller or larger uncollectible accounts reserve is appropriate, we would record a credit or charge to SG&A expense in the period that we made such a determination.

New Accounting Pronouncement to be Adopted

In December 2011, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*. ASU No. 2011-11 requires entities to disclose gross and net information about both instruments and transactions eligible for offset in the statement of financial position and those subject to an agreement similar to a master netting arrangement. This would include derivatives and other financial securities arrangements. We will adopt this guidance in our first quarter of fiscal 2014, as required. The adoption of this guidance is not expected to have a material impact on our consolidated financial statements.

No other new accounting pronouncement that has been issued but not yet effective for us during fiscal 2013 has had or is expected to have a material impact on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk stemming from changes in foreign currency exchange rates, interest rates, and commodity prices. We are also exposed to equity market risk pertaining to the trading price of our common stock. Changes in these factors could cause fluctuations in our earnings and cash flows. See further discussion on these market risks below.

Foreign Currency Exchange Rate Risk. In the normal course of business, we actively manage the exposure of our foreign currency exchange rate market risk by entering into various hedging instruments, authorized under company policies that place controls on these activities, with counterparties that are highly rated financial institutions. Our hedging activities involve primarily the use of forward currency contracts. We also utilize cross currency swaps to offset intercompany loan exposures. We use derivative instruments only in an attempt to limit underlying exposure from currency fluctuations and to minimize earnings and cash flow volatility associated with foreign currency exchange rate changes and not for trading purposes. We are exposed to foreign currency exchange rate risk arising from transactions in the normal course of business, such as sales to third party customers, sales and loans to wholly owned foreign subsidiaries, foreign plant operations, and purchases from suppliers. Because our products are manufactured or sourced primarily from the U.S. and Mexico, a stronger U.S. dollar and Mexican peso generally have a negative impact on our results from operations, while a weaker dollar and peso generally have a positive effect. Our primary foreign currency exchange rate exposures are with the Euro, the Australian dollar, the Canadian dollar, the British pound, the Mexican peso, the Japanese yen, the Chinese Yuan, and the Romanian New Leu against the U.S. dollar, as well as the Romanian New Leu against the Euro.

We enter into various contracts, primarily forward contracts that change in value as foreign currency exchange rates change, to protect the value of existing foreign currency assets, liabilities, anticipated sales, and probable commitments. Decisions on whether to use such contracts are made based on the amount of exposures to the currency involved and an assessment of the near-term market value for each currency. Worldwide foreign currency exchange rate exposures are reviewed monthly. The gains and losses on these contracts offset changes in values of the related exposures. Therefore, changes in values of these hedge instruments are highly correlated with changes in market values of underlying hedged items both at inception of the hedge and over the life of the hedge contract. Further information regarding gains and losses on our derivative instruments is presented in Note 14 of the Notes to Consolidated Financial Statements.

The following foreign currency exchange contracts held by us have maturity dates in fiscal 2014 and 2015. All items are non-trading and stated in U.S. dollars. Some derivative instruments we enter into do not meet cash flow hedge accounting criteria; therefore, changes in fair value are recorded in other income, net. The average contracted rate, notional amount, pre-tax value of derivative instruments in accumulated other comprehensive loss ("AOCL"), and fair value impact of derivative instruments in other income, net as of and for the fiscal year ended October 31, 2013 were as follows:

	Average	Notional	Value in	Fair
Dollars in thousands	Contracted	Amount	AOCL	Value
(except average contracted rate)	Rate		Income	Impact
			(Loss)	Gain
				(Loss)

Buy U.S. \$/Sell Australian dollar	0.9294	\$79,155.2	\$ (336.0)	\$ 707.1
Buy U.S. \$/Sell Canadian dollar	1.0359	8,678.7	124.4	(12.4)
Buy U.S. \$/Sell Euro	1.3481	97,402.8	(1,089.0)	(1,315.8)
Buy U.S. \$/Sell British pound	1.6001	3,969.8		(0.5)
Buy Euro/ Sell U.S. \$	1.3585	6,256.9		(117.1)
Buy Mexican peso/ Sell U.S. \$	14.4183	11,624.1	112.3	1,033.1
Buy Euro/Sell Romanian New Leu	4.4345	11,541.7	(217.6)	(326.1)
Buy Japanese Yen/ Sell U.S. \$	98.0800		(17.3)	

Our net investment in foreign subsidiaries translated into U.S. dollars is not hedged. Any changes in foreign currency exchange rates would be reflected as a foreign currency translation adjustment, a component of accumulated other comprehensive loss in stockholders' equity, and would not impact net earnings.

Table of Contents

Interest Rate Risk. Our market risk on interest rates relates primarily to LIBOR-based short-term debt from commercial banks, as well as the potential increase in fair value of long-term debt resulting from a potential decrease in interest rates. We generally do not use interest rate swaps to mitigate the impact of fluctuations in interest rates. Included in long-term debt is \$223.5 million of fixed-rate debt that is not subject to variable interest rate fluctuations. As a result, we have no earnings or cash flow exposure due to market risks on our long-term debt obligations. As of October 31, 2013, the estimated fair value of long-term debt with fixed interest rates was \$243.1 million compared to its carrying amount of \$223.5 million. Market risk for fixed-rate, long-term debt is estimated as the potential increase in fair value, resulting from a hypothetical 10 percent decrease in interest rates, and amounts to approximately \$16.8 million. The fair value is estimated by discounting the projected cash flows using the rate that similar amounts and terms of debt could currently be borrowed.

During the second quarter of fiscal 2007, we entered into three treasury lock agreements based on a 30-year U.S. Treasury security with a principal balance of \$30 million for two of the agreements and \$40 million for the third agreement. These treasury lock agreements provided for a single payment at maturity, which was April 23, 2007, based on the change in value of the reference treasury security. These agreements were designated as cash flow hedges and resulted in a net settlement of \$0.2 million. This loss was recorded in accumulated other comprehensive loss, and will be amortized to interest expense over the 30-year term of the senior notes.

Commodity Risk. We are subject to market risk from fluctuating market prices of certain purchased commodity raw materials including steel, aluminum, petroleum-based resin, and linerboard. In addition, we are a purchaser of components and parts containing various commodities, including steel, aluminum, copper, lead, rubber, and others that are integrated into our end products. While such materials are typically available from numerous suppliers, commodity raw materials are subject to price fluctuations. We generally buy these commodities and components based upon market prices that are established with the vendor as part of the purchase process. We generally attempt to obtain firm pricing from most of our suppliers for volumes consistent with planned production. To the extent that commodity prices increase and we do not have firm pricing from our suppliers, or our suppliers are not able to honor such prices, we may experience a decline in our gross margins to the extent we are not able to increase selling prices of our products or obtain manufacturing efficiencies to offset increases in commodity costs. Further information regarding rising prices for commodities is presented in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this report in the section entitled "Inflation." We enter into fixed-price contracts for future purchases of natural gas in the normal course of operations as a means to manage natural gas price risks. In fiscal 2013, our manufacturing facilities enter into these fixed-price contracts for approximately 15 to 40 percent of their monthly-anticipated usage.

Equity Price Risk. The trading price volatility of our common stock impacts compensation expense related to our stock-based compensation plans. Further information is presented in Note 10 of the Notes to Consolidated Financial Statements regarding our stock-based compensation plans.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended, for The Toro Company and its subsidiaries. This system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

The company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements, and even when determined to be effective, can only provide reasonable assurance with respect to financial statement preparation and presentation. In addition, projection of any evaluation of the effectiveness of internal control over financial reporting to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree or compliance with the policies or procedures may deteriorate.

Management, with the participation of the company's Chairman of the Board, President, and Chief Executive Officer and Vice President, Treasurer and Chief Financial Officer, evaluated the effectiveness of the company's internal control over financial reporting as of October 31, 2013. In making this evaluation, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control - Integrated Framework (1992)*. Based on this assessment, management concluded that the company's internal control over financial reporting was effective as of October 31, 2013. Our internal control over financial reporting as of October 31, 2013, has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report which is included herein.

/s/ Michael J. Hoffman

Chairman of the Board, President, and Chief Executive Officer

/s/ Renee J. Peterson

Vice President, Treasurer and Chief Financial Officer

Further discussion of the Company's internal controls and procedures is included in Part II, Item 9A, "Controls and Procedures" of this report.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Stockholders and Board of Directors
The Toro Company:

We have audited the accompanying consolidated balance sheets of The Toro Company and subsidiaries as of October 31, 2013 and 2012 and the related consolidated statements of earnings, comprehensive income, stockholders' equity, and cash flows for each of the fiscal years in the three-year period ended October 31, 2013. In connection with our audits of the consolidated financial statements, we have audited the financial statement schedule listed in Item 15(a) 2. We also have audited The Toro Company's internal control over financial reporting as of October 31, 2013 based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Toro Company's management is responsible for these consolidated financial statements and the identified financial statement schedule, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements and financial statement schedule included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of The Toro Company and subsidiaries as of October 31, 2013 and 2012 and the results of their operations and their cash flows for each of the fiscal years in the three-year period ended October 31, 2013, in conformity with U.S. generally accepted accounting principles. In our opinion, the identified financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein. Also in our opinion, The Toro Company maintained, in all material respects, effective internal control over financial reporting as of October 31, 2013 based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

The financial statements should be read in conjunction with the Notes to Consolidated Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share data)

1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RELATED DATA

Basis of Presentation and Consolidation

The accompanying consolidated financial statements include the accounts of the company and its wholly owned subsidiaries. The company uses the equity method to account for investments over which it has the ability to exercise significant influence over operating and financial policies. Consolidated net earnings include the company's share of the net earnings (losses) of these companies. The cost method is used to account for investments in companies that the company does not control and for which it does not have the ability to exercise significant influence over operating and financial policies. These investments are recorded at cost. All intercompany accounts and transactions have been eliminated from the consolidated financial statements.

Accounting Estimates

In preparing the consolidated financial statements in conformity with United States ("U.S.") generally accepted accounting principles ("GAAP"), management must make decisions that impact the reported amounts of assets, liabilities, revenues, expenses, and the related disclosures, including disclosures of contingent assets and liabilities. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. Estimates are used in determining, among other items, sales promotions and incentive accruals, incentive compensation accruals, inventory valuation, warranty reserves, earnout liabilities, allowance for doubtful accounts, pension and postretirement accruals, self-insurance accruals, and useful lives of tangible and intangible assets. These estimates and assumptions are based on management's best estimates and judgments. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors that management believes to be reasonable under the circumstances, including the current economic environment. Management adjusts such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with certainty, actual amounts could differ significantly from those estimated at the time the consolidated financial statements are prepared. Changes in those estimates will be reflected in the consolidated financial statements in future periods.

Reclassifications

Certain amounts from prior years' financial statements have been reclassified to conform to the current year presentation. The reclassifications had no impact on results of operations as previously reported.

Cash and Cash Equivalents

The company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents and are stated at cost, which approximates fair value. As of October 31, 2013, cash and short-term investments held by the company's foreign subsidiaries that are not available to fund domestic operations unless repatriated were \$24,837.

Receivables

The company's financial exposure to collection of accounts receivable is reduced due to its Red Iron Acceptance, LLC ("Red Iron") joint venture with TCF Inventory Finance, Inc. ("TCFIF"), as further discussed in Note 3. For receivables not serviced through Red Iron, the company grants credit to customers in the normal course of business and performs on-going credit evaluations of customers. Receivables are recorded at original carrying amount less reserves for estimated uncollectible accounts, as described below.

Allowance for Doubtful Accounts

The company estimates the balance of allowance for doubtful accounts by analyzing the age of account and note receivable balances and applying historical write-off trend rates. The company also estimates separately specific customer balances when it is deemed probable that the balance is uncollectible. Account balances are charged off against the allowance when all collection efforts have been exhausted.

Inventory Valuations

Inventories are valued at the lower of cost or net realizable value, with cost determined by the last-in, first-out ("LIFO") method for most inventories. The first-in, first-out ("FIFO") method is used for all other inventories, constituting 33 and 31 percent of total inventories as of October 31, 2013 and 2012, respectively. The company establishes a reserve for excess, slow-moving, and obsolete inventory that is equal to the difference between the cost and estimated net realizable value for that inventory. These reserves are based on a review and comparison of current inventory levels to the planned production, as well as planned and historical sales of the inventory. During fiscal 2013, LIFO layers were reduced. This reduction resulted in charging lower inventory costs prevailing in previous years to cost of sales, thus reducing cost of sales by \$122. During fiscal 2012 and 2011, no LIFO inventory layers were reduced.

Table of Contents

Inventories as of October 31 were as follows:

	2013	2012
Raw materials and work in progress	\$ 87,668	\$ 91,465
Finished goods and service parts	217,796	223,459
Total FIFO value	305,464	314,924
Less: adjustment to LIFO value	65,375	63,807
Total	\$ 240,089	\$ 251,117

Property and Depreciation

Property, plant, and equipment are carried at cost. The company provides for depreciation of plant and equipment utilizing the straight-line method over the estimated useful lives of the assets. Buildings, including leasehold improvements, are generally depreciated over 10 to 45 years, and equipment over two to seven years. Tooling costs are generally depreciated over three to five years using the straight-line method. Software and web site development costs are generally amortized over two to five years utilizing the straight-line method. Expenditures for major renewals and improvements, which substantially increase the useful lives of existing assets, are capitalized, and maintenance and repairs are charged to operating expenses as incurred. Interest is capitalized during the construction period for significant capital projects. During the fiscal years ended October 31, 2013, 2012, and 2011, the company capitalized \$722, \$256, and \$230 of interest, respectively.

Property, plant, and equipment as of October 31 was as follows:

	2013	2012
Land and land improvements	\$ 27,632	\$ 27,325
Buildings and leasehold improvements	133,866	129,353
Machinery and equipment	284,492	268,571
Tooling	173,039	166,319
Computer hardware and software	73,302	65,861
Construction in process	29,173	25,678
Subtotal	721,504	683,107
Less: accumulated depreciation	536,408	502,584
Total property, plant, and equipment, net	\$ 185,096	\$ 180,523

During fiscal years 2013, 2012, and 2011, the company recorded depreciation expense of \$48,207, \$46,840, and \$43,539, respectively.

Goodwill and Indefinite-Life Intangible Assets

Goodwill represents the cost of acquisitions in excess of the fair values assigned to identifiable net assets acquired. Goodwill is assigned to reporting units based upon the expected benefit of the synergies of the acquisition. Goodwill and some trade names, which are considered to have indefinite lives, are not amortized; however, the company reviews them for impairment annually during each fourth fiscal quarter or more frequently if changes in circumstances or occurrence of events suggest the remaining value may not be recoverable.

The company reviewed the fair value of its reporting units that have goodwill on their respective balance sheets with their corresponding carrying amount (with goodwill) during the fourth quarter of fiscal 2013. The company determined that it has eight reporting units, which are the same as its eight operating segments. Six reporting units contain goodwill on their respective balance sheets. As of August 30, 2013, the company performed an analysis of qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform a two-step goodwill impairment test. Based on the company's analysis of qualitative factors, the company determined that it was not necessary to perform a two-step goodwill impairment test for any of its reporting units.

As of August 30, 2013, the company also performed an analysis of qualitative factors to determine whether it is more likely than not that its indefinite-life intangible assets, which consist of certain trade names, are impaired. Based on this analysis, the company concluded its indefinite-life intangible assets were not impaired. In fiscal 2012, the company determined that it was necessary to perform a quantitative impairment analysis of its indefinite-life intangible assets. Based on the company's impairment analysis, the company wrote down \$400 of an indefinite-life intangible asset during fiscal 2012.

Other Long-Lived Assets

Other long-lived assets include property, plant, and equipment and definite-life intangible assets, which are identifiable assets that arose from purchase acquisitions consisting primarily of patents, non-compete agreements, customer relationships, trade names, and developed technology, and are amortized on a straight-line basis over periods ranging from 1.5 to 13 years. The company reviews other long-lived assets, including property, plant, and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. An impairment loss is recognized when estimated undiscounted future cash flows from the operation or disposition of the asset group are less than the carrying amount of the asset group. Asset groups have identifiable cash flows and are largely independent of other asset groups. Measurement of an impairment loss is based on the excess of the carrying amount of the asset group over its fair value. Fair value is measured using a discounted cash flow model or independent appraisals, as appropriate. For long-lived assets to be abandoned, the company tests for potential impairment. If the company commits to a plan to abandon a long-lived asset before the end of its previously estimated useful life, depreciation estimates are revised.

Table of Contents

Based on the company's impairment analysis, the company wrote down \$824, \$691, and \$109 of other long-lived assets during fiscal 2013, 2012, and 2011, respectively.

Accounts Payable

The company has a customer-managed services agreement with a third party to provide a web-based platform that facilitates participating suppliers' ability to finance payment obligations from the company with a designated third party financial institution. Participating suppliers may, at their sole discretion, make offers to finance one or more payment obligations of the company prior to their scheduled due dates at a discounted price to a participating financial institution.

The company's obligations to its suppliers, including amounts due and scheduled payment dates, are not affected by suppliers' decisions to finance amounts under this arrangement. However, the company's right to offset balances due from suppliers against payment obligations is restricted by this arrangement for those payment obligations that have been financed by suppliers. As of October 31, 2013 and 2012, \$16,572 and \$16,159, respectively, of the company's outstanding payment obligations had been placed on the accounts payable tracking system.

Insurance

The company is self-insured for certain losses relating to medical, dental, and workers' compensation claims, and product liability occurrences. Specific stop loss coverages are provided for catastrophic claims in order to limit exposure to significant claims. Losses and claims are charged to operations when it is probable a loss has been incurred and the amount can be reasonably estimated. Self-insured liabilities are based on a number of factors, including historical claims experience, an estimate of claims incurred but not reported, demographic and severity factors, and utilizing valuations provided by independent third-party actuaries.

Accrued Warranties

The company provides an accrual for estimated future warranty costs at the time of sale. The company also establishes accruals for major rework campaigns. The amount of warranty accruals is based primarily on the estimated number of products under warranty, historical average costs incurred to service warranty claims, the trend in the historical ratio of claims to sales, and the historical length of time between the sale and resulting warranty claim. The company periodically assesses the adequacy of its warranty accruals based on changes in these factors and records any necessary adjustments if actual claim experience indicates that adjustments are necessary.

The changes in accrued warranties were as follows:

Fiscal years ended October 31	2013	2012
Beginning balance	\$ 69,848	\$ 62,730
Warranty provisions	41,067	38,439
Warranty claims	(35,529)	(35,431)
Changes in estimates	(3,209)	3,910
Additions from acquisitions		200
Ending balance	\$ 72,177	\$ 69,848

Derivatives

Derivatives, consisting mainly of forward currency contracts, are used to hedge most foreign currency transactions, including forecasted sales and purchases denominated in foreign currencies. The company also utilizes cross currency swaps to offset foreign currency intercompany loan exposures. Derivatives are recognized on the consolidated balance sheet at fair value. If the derivative is designated as a cash flow hedge, the effective portion of the change in the fair value of the derivative is recorded as a component of other comprehensive income within the

consolidated statements of comprehensive income and the consolidated statements of stockholders' equity, and recognized in earnings when the hedged item affects earnings. Derivatives that do not meet the requirements for hedge accounting are adjusted to fair value through other income, net in the consolidated statements of earnings.

Foreign Currency Translation and Transactions

The functional currency of the company's foreign operations is generally the applicable local currency. The functional currency is translated into U.S. dollars for balance sheet accounts using current exchange rates in effect as of the balance sheet date and for revenue and expense accounts using a weighted-average exchange rate during the fiscal year. The translation adjustments are deferred as a component of other comprehensive income within the consolidated statements of comprehensive income and the consolidated statements of stockholders' equity. Gains or losses resulting from transactions denominated in foreign currencies are included in other income, net in the consolidated statements of earnings.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years that those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax

Table of Contents

expense in the period that includes the enactment date. A valuation allowance is provided when, in management's judgment, it is more likely than not that some portion or all of the deferred tax asset will not be realized. The company has reflected the necessary deferred tax assets and liabilities in the accompanying consolidated balance sheets. Management believes the future tax deductions will be realized principally through carryback to taxable income in prior years, future reversals of existing taxable temporary differences, and future taxable income.

The company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50 percent likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The company also records interest and penalties related to unrecognized tax benefits in income tax expense.

Revenue Recognition

The company recognizes revenue for product sales when persuasive evidence of an arrangement exists, title and risk of ownership passes to the customer, the sales price is fixed or determinable, and collectability is probable. These criteria are typically met at the time product is shipped, or in the case of certain agreements, when product is delivered. A provision is made at the time the related revenue is recognized for estimated product returns, floor plan costs, rebates, and other sales promotional expenses. Sales, use, value-added, and other excise taxes are not recognized in revenue. Freight revenue billed to customers is included in net sales.

The company ships some of its products to a key retailer's seasonal distribution centers on a consignment basis. The company retains title to its products stored at the seasonal distribution centers. As the company's products are removed from the seasonal distribution centers by the key retailer and shipped to the key retailer's stores, title passes from the company to the key retailer. At that time, the company invoices the key retailer and recognizes revenue for these consignment transactions. The company does not offer a right of return for products shipped to the key retailer's stores from the seasonal distribution centers. From time to time, the company also stores inventory on a consignment basis at other customers' locations. The amount of consignment inventory as of October 31, 2013 and 2012 was \$18,283 and \$20,339, respectively.

Revenue earned from service and maintenance contracts is recognized ratably over the contractual period. Revenue from extended warranty programs is deferred at the time the contract is sold and amortized into net sales using the straight-line method over the extended warranty period.

Sales Promotions and Incentives

At the time of sale, the company records an estimate for sales promotion and incentive costs. Examples of sales promotion and incentive programs include rebate programs on certain professional products sold to distributors, volume discounts, retail financing support, commissions, and other sales discounts and promotional programs. The estimates of sales promotion and incentive costs are based on the terms of the arrangements with customers, historical payment experience, field inventory levels, volume purchases, and expectations for changes in relevant trends in the future. The expense of each program is classified as a reduction from gross sales.

Cost of Sales

Cost of sales primarily comprises direct materials and supplies consumed in the manufacture of product, as well as manufacturing labor, depreciation expense, and direct overhead expense necessary to convert purchased materials and supplies into finished product. Cost of sales also includes inbound freight costs, outbound freight costs for shipping products to customers, obsolescence expense, cost of services provided, and cash discounts on payments to vendors.

Selling, General, and Administrative Expense

Selling, general, and administrative expense primarily comprises payroll and benefit costs, occupancy and operating costs of distribution and corporate facilities, warranty expense, depreciation and amortization expense on non-manufacturing assets, advertising and marketing expenses, selling expenses, engineering and research costs, information systems costs, incentive and profit sharing expense, and other miscellaneous administrative costs, such as legal costs for internal and outside services that are expensed as incurred.

Cost of Financing Distributor / Dealer Inventory

The company enters into limited inventory repurchase agreements with a third party financing company and Red Iron. The company has repurchased immaterial amounts of inventory under these repurchase agreements over the last three fiscal years. However, an adverse change in retail sales could cause this situation to change, and thereby require the company to repurchase a portion of financed product. See Note 13 for additional information regarding the company's repurchase arrangements.

Included as a reduction to net sales are costs associated with programs under which the company shares the expense of financing distributor and dealer inventories, referred to as floor plan expenses. This charge represents interest for a pre-established length of time based on a predefined rate from a contract with third party financing sources to finance distributor and dealer inventory purchases. These financing arrangements are used by the company as a marketing tool to assist customers to buy inventory. The

Table of Contents

financing costs for distributor and dealer inventories were \$19,729, \$19,492, and \$16,394 for the fiscal years ended October 31, 2013, 2012, and 2011, respectively.

Advertising

General advertising expenditures are expensed the first time advertising takes place. Production costs associated with advertising are expensed in the period incurred. Cooperative advertising represents expenditures for shared advertising costs that the company reimburses to customers and is classified as a component of selling, general, and administrative expense. These obligations are accrued and expensed when the related revenues are recognized in accordance with the programs established for various product lines. Advertising costs were \$48,071, \$46,947, and \$49,362 for the fiscal years ended October 31, 2013, 2012, and 2011, respectively.

Stock-Based Compensation

The company's stock-based compensation awards are generally granted to executive officers, other employees, and non-employee members of the company's Board of Directors, and include performance share awards that are contingent on the achievement of performance goals of the company, non-qualified stock options, restricted stock units, and restricted stock awards. Compensation expense equal to the grant date fair value is recognized for these awards over the vesting period and is classified in selling, general and administrative expense. See Note 10 for additional information regarding stock-based compensation plans.

Net Earnings Per Share

Basic net earnings per share is calculated using net earnings available to common stockholders divided by the weighted-average number of shares of common stock outstanding during the year plus the assumed issuance of contingent shares. Diluted net earnings per share is similar to basic net earnings per share except that the weighted-average number of shares of common stock outstanding plus the assumed issuance of contingent shares is increased to include the number of additional shares of common stock that would have been outstanding assuming the issuance of all potentially dilutive shares, such as common stock to be issued upon exercise of options, contingently issuable shares, and restricted common stock and units.

Reconciliations of basic and diluted weighted-average shares of common stock outstanding are as follows:

BASIC

(Shares in thousands)

Fiscal years ended October 31

Weighted-average number of shares of common stock	57,898	59,440	62,530
Assumed issuance of contingent shares	24	6	4

Weighted-average number of shares of common stock and assumed issuance of contingent shares	57,922	59,446	62,534
--	---------------	--------	--------

DILUTED

(Shares in thousands)

Fiscal years ended October 31

Weighted-average number of shares of common stock and assumed issuance of contingent shares	57,922	59,446	62,534
Effect of dilutive securities	1,183	1,172	1,060

Weighted-average number of shares of common stock, assumed issuance of contingent and restricted shares, and effect of dilutive securities	59,105	60,618	63,594
---	---------------	--------	--------

Incremental shares from options and restricted stock are computed by the treasury stock method. Options and restricted stock of 182,868, 33,427, and 417,436 during fiscal 2013, 2012, and 2011, were excluded from the computation of diluted earnings per share because they were anti-dilutive.

Cash Flow Presentation

The consolidated statements of cash flows are prepared using the indirect method, which reconciles net earnings to cash flow from operating activities. The necessary adjustments include the removal of timing differences between the occurrence of operating receipts and payments and their recognition in net earnings. The adjustments also remove from operating activities cash flows arising from investing and financing activities, which are presented separately from operating activities. Cash flows from foreign currency transactions and operations are translated at an average exchange rate for the period. Cash paid for acquisitions is classified as investing activities.

New Accounting Pronouncement Adopted

In February 2013, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. ASU No. 2013-02 requires entities to disclose, for items reclassified out of accumulated other comprehensive income (loss) and into net income in their entirety, the effect of the reclassification on each affected net income line item. ASU No. 2013-02 also requires a cross reference to other required U.S. GAAP disclosures for accumulated other comprehensive income (loss) reclassification items that are not reclassified in their entirety into net income. The effective date of ASU No. 2013-02 is for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2012, and early adoption is permitted. The company adopted this guidance in its fiscal 2013 fourth quarter. The adoption of this guidance did not have an impact on the company's consolidated financial statements.

2 ACQUISITIONS

On September 30, 2013, during the fourth quarter of fiscal 2013, the company completed the acquisition of certain assets and assumed certain liabilities for a company in China that manufactures water-efficient drip irrigation products, sprinklers, emitters, and filters for agriculture, landscaping, and green house production. The net purchase price of this acquisition was \$3,496, of which \$2,101 was paid in cash and the remaining balance of \$1,395 will be paid in cash in fiscal 2014.

On April 25, 2012, during the second quarter of fiscal 2012, the company completed the acquisition of certain assets for an equipment line of concrete and mortar mixers, material handlers, compaction equipment, and other concrete power tools for the rental and construction market. On February 10, 2012, also during the second quarter of fiscal 2012, the company completed the acquisition of certain assets and assumed certain liabilities for an equipment line of vibratory plows, trenchers, and horizontal directional drills for the underground utilities market. On December 9, 2011, during the first quarter of fiscal 2012, the company completed the acquisition of certain assets and assumed certain liabilities for a greens roller product line for the golf course market. The aggregate purchase price of these acquisitions was \$11,112, which included cash payments and issuance of long-term notes.

On June 24, 2011, the company completed the acquisition of certain assets of, and assumed certain liabilities for an equipment line of turf renovation equipment, including aerators, seeders, and power rakes, for the landscape, rental, municipal, and golf markets. On January 17, 2011, the company completed the acquisition of certain assets of, and assumed certain liabilities for a line of professionally installed landscape lighting fixtures and transformers for residential and commercial use. The aggregate net purchase price of these acquisitions during fiscal 2011 was \$24,150, which included cash payments, the issuance of long-term notes, and estimated contingent consideration. The contingent consideration is based on annual financial results over certain thresholds as defined in the acquisition agreements.

The purchase price of these acquisitions was allocated to the identifiable assets acquired and liabilities assumed based on estimates of their fair value, with the excess purchase price for acquisitions recorded as goodwill. Additional purchase accounting disclosures have been omitted given the immateriality of these acquisitions in relation to the company's consolidated financial condition and results of operations. See Note 5 for further details related to the acquired intangible assets.

3 INVESTMENT IN JOINT VENTURE

In fiscal 2009, the company and TCFIF, a subsidiary of TCF National Bank, established Red Iron, a joint venture in the form of a Delaware limited liability company that provides inventory financing, including floor plan and open account receivable financing, to distributors and dealers of the company's products in the U.S. and select distributors of the company's products in Canada. Additionally, in connection with the joint venture, the company and an affiliate of TCFIF entered into an arrangement to provide inventory financing to dealers of the company's products in Canada. In fiscal 2012, the company and TCFIF entered into amendments to certain of the agreements pertaining to Red Iron, among other things, to extend the initial term of Red Iron until October 31, 2017, subject to unlimited automatic two-year extensions thereafter. Either the company or TCFIF may elect not to extend the initial term or any subsequent term by giving one-year notice to the other party of its intention not to extend the term.

The company owns 45 percent of Red Iron and TCFIF owns 55 percent of Red Iron. The company accounts for its investment in Red Iron under the equity method of accounting. Each of the company and TCFIF contributed a specified amount of the estimated cash required to enable Red Iron to purchase the company's inventory financing receivables and to provide financial support for Red Iron's inventory financing programs. Red Iron borrows the remaining requisite estimated cash utilizing a \$450,000 secured revolving credit facility established under a credit agreement between Red Iron and TCFIF. The company's total investment in Red Iron as of October 31, 2013 and 2012 was \$13,300 and \$12,545, respectively. The company has not guaranteed the outstanding indebtedness of Red Iron. The company has agreed to repurchase products repossessed by Red Iron and the TCFIF Canadian affiliate, up to a maximum aggregate amount of \$7,500 in a calendar year. In addition, the company has provided recourse to Red Iron for certain outstanding receivables, which amounted to

Edgar Filing: TORO CO - Form 10-K

a maximum amount of \$465 and \$211 as of October 31, 2013 and 2012, respectively.

Under the repurchase agreement between Red Iron and the company, Red Iron provides financing for certain dealers and distributors. These transactions are structured as an advance in the form of a payment by Red Iron to the company on behalf of a distributor or dealer with respect to invoices financed by Red Iron. These payments extinguish the obligation of the dealer or distributor to make payment to the company under the terms of the applicable invoice. Under separate agreements between Red Iron and the dealers and distributors, Red Iron provides loans to the dealers and distributors for the advances paid by Red Iron to the company. The net amount of new receivables financed for dealers and distributors under this arrangement during fiscal 2013, 2012, and 2011 was \$1,211,470, \$1,191,343, and \$1,111,778, respectively.

Summarized financial information for Red Iron is presented as follows:

For the twelve months ended October 31	2013	2012	2011
Revenue	\$ 22,418	\$ 19,765	\$ 17,116
Net income	15,776	13,326	11,070

Total other intangible assets, net		\$ 61,136	\$ (32,828)	\$28,308

October 31, 2012	Estimated Life (Years)	Gross Carrying Amount	Accumulated Amortization	Net
Patents	1.5-13	\$ 9,593	\$ (8,031)	\$ 1,562
Non-compete agreements	1.5-10	6,303	(3,656)	2,647
Customer-related	1.5-13	8,312	(3,826)	4,486
Developed technology	1.5-10	27,727	(10,196)	17,531
Trade names	1.5-5	1,515	(557)	958
Other		800	(800)	
Total amortizable		54,250	(27,066)	27,184
Non-amortizable trade names		4,881		4,881
Total other intangible assets, net		\$ 59,131	\$ (27,066)	\$32,065

The change in gross carrying amount of other intangible assets of \$2,005 from October 31, 2013 compared to October 31, 2012 was the result of intangible assets acquired from a company located in China and changes in foreign currency exchange rates.

Amortization expense for intangible assets for the fiscal years ended October 31, 2013, 2012, and 2011 was \$5,769, \$6,008, and

\$4,967, respectively. Estimated amortization expense for the succeeding fiscal years is as follows: 2014, \$5,623; 2015, \$5,431; 2016, \$4,912; 2017, \$4,017; 2018, \$1,989; and after 2018, \$1,455.

6 SHORT-TERM CAPITAL RESOURCES

As of October 31, 2013, the company had a \$150,000 unsecured senior four-year revolving credit facility that expires in July 2015. Included in this \$150,000 revolving credit facility is a sublimit of \$20,000 for standby letters of credit and a sublimit for swingline loans of \$20,000. At the election of the company, and the approval of the named borrowers on the revolving credit facility, the aggregate maximum principal amount available under the facility may be increased by an amount up to \$100,000 in aggregate. Funds are available under the revolving credit facility for working capital, capital expenditures, and other lawful purposes, including, but not limited to, acquisitions and stock repurchases. Interest expense on this credit line is determined based on a LIBOR rate (or other rates quoted by the Administrative Agent, Bank of America, N.A.) plus a basis point spread defined in the credit agreement. The company had no outstanding short-term debt as of October 31, 2013 and 2012 under the revolving credit facility. The company's non-U.S. operations also maintain unsecured short-term lines of credit in the aggregate amount of \$12,502. These facilities bear interest at various rates depending on the rates in their respective countries of operation. The company had no outstanding short-term debt as of October 31, 2013 and 2012 under these lines of credit.

The revolving credit facility contains standard covenants, including, without limitation, financial covenants, such as the maintenance of minimum interest coverage and maximum debt to earnings ratios; and negative covenants, which among other things, limit loans and investments, disposition of assets, consolidations and mergers, transactions with affiliates, restricted payments, contingent obligations, liens and other matters customarily restricted in such agreements. Most of these restrictions are subject to certain minimum thresholds and exceptions. Under the revolving credit facility, the company is not limited in the amounts for payments of cash dividends and stock repurchases as long as the debt to earnings before interest, tax, depreciation, and amortization ("EBITDA") ratio from the previous quarter compliance certificate is less than or equal to 2.75; however, the company is limited to \$50,000 per fiscal year if the debt to EBITDA ratio from the previous quarter compliance certificate is greater than 2.75. In fiscal 2013, 2012 and 2011, the company was not limited in the amount for payments of cash dividends and stock repurchases as its debt to EBITDA ratio was below 2.75. The company was in compliance with all covenants related to the lines of credit described above as of October 31, 2013 and 2012.

7 LONG-TERM DEBT

A summary of long-term debt as of October 31 is as follows:

	2013	2012
7.800% Debentures, due June 15, 2027	\$ 100,000	\$ 100,000
6.625% Senior Notes, due May 1, 2037	123,544	123,482
Other		1,858
Total long-term debt	223,544	225,340
Less current portion		1,858
Long-term debt, less current portion	\$ 223,544	\$ 223,482

On April 26, 2007, the company issued \$125,000 in aggregate principal amount of 6.625% senior notes due May 1, 2037. The senior notes were priced at 98.513% of par value, and the resulting discount of \$1,859 associated with the issuance of these senior notes is being amortized over the term of the notes using the effective interest rate method. The underwriting fee and direct debt issue costs totaling \$1,524 will be amortized over the life of the notes. Although the coupon rate of the senior notes is 6.625%, the effective interest rate is 6.741% after taking into account the issuance discount. Interest on the senior notes is payable semi-annually on May 1 and November 1 of each year. The senior notes are unsecured senior obligations of the company and rank equally with the company's other unsecured and unsubordinated indebtedness from time to time outstanding. The indentures under which the senior notes were issued contain customary covenants and event of default provisions. The company may redeem some or all of the senior notes at any time at the greater of the full principal amount of the senior notes being redeemed or the present value of the remaining scheduled payments of principal and interest discounted to the redemption date on a semi-annual basis at the treasury rate plus 30 basis points, plus, in both cases, accrued and unpaid interest. In the event of the occurrence of both (i) a change of control of the company, and (ii) a downgrade of the notes below an investment grade rating by both Moody's Investors Service, Inc. and Standard & Poor's Ratings Services within a specified period, the company would be required to make an offer to purchase the senior notes at a price equal to 101% of the principal amount of the senior notes plus accrued and unpaid interest to the date of repurchase.

Edgar Filing: TORO CO - Form 10-K

In connection with the issuance in June 1997 of \$175,000 in long-term debt securities, the company paid \$23,688 to terminate three forward-starting interest rate swap agreements with notional amounts totaling \$125,000. These swap agreements had been entered into to reduce exposure to interest rate risk prior to the issuance of the new long-term debt securities. As of the inception of one of the swap agreements, the company had received payments that were recorded as deferred income to be recognized as an adjustment to interest expense over the term of the new debt securities. As of the date the swaps were terminated, this deferred

income totaled \$18,710. The excess termination fees over the deferred income recorded has been deferred and is being recognized as an adjustment to interest expense over the term of the debt securities issued. As of October 31, 2013, the company had \$2,153 remaining in other assets for the excess termination fees over deferred income.

Principal payments required on long-term debt in each of the next five fiscal years ending October 31 are as follows: 2014, \$0; 2015, \$0; 2016, \$0; 2017, \$0; 2018, \$0; and after 2018, \$225,000.

8 STOCKHOLDERS' EQUITY

Stock Split. On May 24, 2012, the company announced that its Board of Directors declared a two-for-one stock split of the company's common stock, effected in the form of a 100 percent stock dividend. The stock split was distributed or paid on June 29, 2012, to shareholders of record as of June 15, 2012. As a result of this action, approximately 29.4 million shares were issued to shareholders of record as of June 15, 2012. The par value of the common stock remains at \$1.00 per share and; accordingly, approximately \$29,390 was transferred from retained earnings to common stock. All share and per share amounts have been retroactively updated to reflect this stock split.

Common Shares Authorized. On March 12, 2013, following the approval by the company's shareholders at its 2013 annual meeting of shareholders, the company amended its Restated Certificate of Incorporation by filing a Certificate of Amendment to Restated Certificate of Incorporation to increase the number of authorized shares from 100 million to 175 million.

Stock Repurchase Program. On December 11, 2012, the company's Board of Directors authorized the repurchase of 5 million shares of the company's common stock in open-market or in privately negotiated transactions. This program has no expiration date but may be terminated by the Board at any time. During fiscal 2013, 2012, and 2011, the company paid \$98,842, \$92,719, and \$129,955 to repurchase an aggregate of 2,131,615 shares, 2,591,039 shares, and 4,592,760 shares, respectively. As of October 31, 2013, 4,343,062 shares remained authorized for repurchase.

Treasury Shares. As of October 31, 2013, the company had 21,275,717 treasury shares at a cost of \$1,081,086. As of October 31, 2012, the company had 19,797,958 treasury shares at a cost of \$1,012,536. On November 30, 2011, the company's Board of Directors authorized the retirement of 30 million treasury shares, as adjusted for the company's two-for-one stock split, previously discussed.

Accumulated Other Comprehensive Loss.

Components of accumulated other comprehensive loss ("AOCL"), net of tax, within the consolidated statements of stockholders' equity are as follows:

As of October 31	2013	2012	2011
Foreign currency translation adjustments	\$ 7,778	\$ 5,436	\$ 2,904
Pension and retiree medical benefits	3,683	4,328	3,800
Derivative instruments	1,109	210	122
Total accumulated other comprehensive loss	\$ 12,570	\$ 9,974	\$ 6,826

The components and activity of accumulated other comprehensive loss are as follows:

	Foreign Currency Translation Adjustments	Pension and Post- retirement Benefits	Cash Flow Derivative Instruments	Total
October 31, 2012	\$ 5,436	\$ 4,328	\$ 210	\$ 9,974
Other comprehensive loss before reclassifications	2,342		1,870	4,212
Amounts reclassified from AOCL		(645)	(971)	(1,616)

Net current period other comprehensive loss (income)	\$	2,342	\$	(645)	\$	899	\$	2,596
October 31, 2013	\$	7,778	\$	3,683	\$	1,109	\$	12,570

Accumulated other comprehensive loss associated with pension and postretirement benefits are included in Note 11. Details of amounts reclassified from accumulated other comprehensive loss to the respective line items in net earnings for cash flow derivative instruments are included in Note 14.

9 INCOME TAXES

A reconciliation of the statutory federal income tax rate to the company's consolidated effective tax rate is summarized as follows:

Fiscal years ended October 31	2013	2012	2011
Statutory federal income tax rate	35.0%	35.0%	35.0%
Increase (reduction) in income taxes resulting from:			
Domestic manufacturer's deduction	(2.0)	(2.0)	(1.8)
State and local income taxes, net of federal income tax benefit	1.5	1.5	1.4
Effect of foreign source income	(0.3)	0.2	0.2
Domestic research tax credit	(2.4)	(0.2)	(2.4)
Other, net	(0.1)	(0.5)	0.3
Consolidated effective tax rate	31.7%	34.0%	32.7%

Edgar Filing: TORO CO - Form 10-K

Components of the provision for income taxes were as follows:

Fiscal years ended October 31	2013	2012	2011
Provision for income taxes:			
Current			
Federal	\$ 61,388	\$ 59,405	\$ 47,922
State	5,108	4,609	3,963
Non-U.S.	5,734	3,854	7,103
Current provision	\$ 72,230	\$ 67,868	\$ 58,988
Deferred			
Federal	\$ 824	\$ (685)	\$ (31)
State	91	(132)	(211)
Non-U.S.	(1,277)	(330)	(1,578)
Deferred benefit	(362)	(1,147)	(1,820)
Total provision for income taxes	\$ 71,868	\$ 66,721	\$ 57,168

Earnings before income taxes were as follows:

Fiscal years ended October 31	2013	2012	2011
Earnings before income taxes:			
U.S.	\$ 213,509	\$ 189,206	\$ 160,444
Non-U.S.	13,204	7,056	14,382
Total	\$ 226,713	\$ 196,262	\$ 174,826

During the fiscal years ended October 31, 2013, 2012, and 2011, respectively, \$6,134, \$9,017, and \$2,988 was added to stockholders' equity reflecting the permanent book to tax difference in accounting for tax benefits related to employee stock-based award transactions.

The tax effects of temporary differences that give rise to the net deferred income tax assets are presented below:

October 31	2013	2012
Deferred tax assets (liabilities):		
Allowance for doubtful accounts	\$ 1,635	\$ 1,959
Inventory items	3,969	4,595
Warranty reserves and other accruals	38,168	39,559
Employee benefits	18,315	16,466
Depreciation	(2,467)	(4,389)
Other	5,550	9,625
Deferred tax assets	\$ 65,170	\$ 67,815
Valuation allowance	(5,572)	(6,781)

Net deferred tax assets **\$ 59,598** \$ 61,034

The valuation allowance as of October 31, 2013 and 2012 principally applies to capital loss carryforwards and foreign net operating loss carryforwards that are expected to expire prior to utilization.

As of October 31, 2013, the company had net operating loss carryforwards of approximately \$16,679 in foreign jurisdictions. The carryforward periods on the company's foreign loss carryforwards are as follows: \$10,477 that do not expire; none that expire in fiscal years 2014 thru 2017; and \$6,202 that expire between fiscal years 2018 and 2021.

As of October 31, 2013, the company had approximately \$52,587 of accumulated undistributed earnings from subsidiaries outside the U.S. that are considered to be reinvested indefinitely. No deferred tax liability has been provided for such earnings.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

Balance as of October 31, 2012	\$ 4,421
Decrease as a result of tax positions taken during a prior period	(626)
Increase as a result of tax positions taken during the current period	940
Decrease relating to settlements with taxing authorities	(214)
Reduction as a result of a lapse of the applicable statute of limitations	(15)
 Balance as of October 31, 2013	 \$4,506

Included in the balance of unrecognized tax benefits as of October 31, 2013 are potential benefits of \$3,276 that, if recognized, would affect the effective tax rate from continuing operations.

The company recognizes potential accrued interest and penalties related to unrecognized tax benefits as a component of the provision for income taxes. In addition to the liability of \$4,506 for unrecognized tax benefits as of October 31, 2013 was an amount of approximately \$66 for accrued interest and penalties. To the extent interest and penalties are not assessed with respect to uncertain tax positions, the amounts accrued will be revised and reflected as an adjustment to the provision for income taxes.

The company anticipates that total unrecognized tax benefits will not change significantly within the next 12 months.

The company is subject to U.S. federal income tax as well as income tax of numerous state and foreign jurisdictions. The company is generally no longer subject to U.S. federal tax examinations for taxable years before fiscal 2010 and with limited exceptions, state and foreign income tax examinations for fiscal years before 2008.

10 STOCK-BASED COMPENSATION PLANS

The company maintains The Toro Company 2010 Equity and Incentive Plan, as amended, for officers, other employees, and non-employee members of the company's Board of Directors. The company's incentive plan allows it to grant equity-based compensation awards, including stock options, restricted stock and restricted stock unit awards, and performance share awards.

Edgar Filing: TORO CO - Form 10-K

The compensation costs related to stock-based awards were as follows:

Fiscal years ended October 31	2013	2012	2011
Stock option awards	\$ 4,710	\$ 4,200	\$ 4,654
Restricted stock and restricted stock unit awards	1,694	1,721	699
Performance share awards	3,833	3,582	3,180
Total compensation cost for stock-based awards	\$ 10,237	\$ 9,503	\$ 8,533
Tax benefit realized for tax deductions from stock-based awards	\$ 10,614	\$ 13,266	\$ 4,469

The number of unissued shares of common stock available for future equity-based grants under the company's equity-based compensation plan was 3,873,904 as of October 31, 2013. Stock options, restricted stock and restricted stock units, and performance shares are issued from treasury shares.

Stock Option Awards. Under the company's incentive plan, stock options are granted with an exercise price equal to the closing price of the company's common stock on the date of grant, as reported by the New York Stock Exchange. Options are generally granted to officers, other employees, and non-employee members of the company's Board of Directors on an annual basis in the first quarter of the company's fiscal year. Options generally vest one-third each year over a three-year period and have a ten-year term. Other options granted to certain non-officer employees vest in full on the three-year anniversary of the date of grant and have a ten-year term. Compensation expense equal to the grant date fair value is generally recognized for these awards over the vesting period. Stock options granted to officers and other employees are subject to accelerated expensing if the option holder meets the retirement definition set forth in the plan. In that case, the fair value of the options is expensed in the fiscal year of grant because the option holder must be employed as of the end of the fiscal year in which the options are granted in order for the options to continue to vest following retirement. Similarly, if a non-employee director has served on the company's Board of Directors for ten full fiscal years or more, the fair value of the options granted is fully expensed on the date of the grant.

The table below presents stock option activity for fiscal 2013:

	Stock Option Awards	Weighted Average Exercise Price	Weighted Average Contractual Life(years)	Intrinsic Value
Outstanding as of October 31, 2012	3,199,816	\$22.54	6.0	\$ 62,982
Granted	381,639	42.14		
Exercised	(498,513)	18.63		
Cancelled	(13,164)	35.91		
Outstanding as of October 31, 2013	3,069,778	\$25.55	5.9	\$ 102,493
Exercisable as of October 31, 2013	2,220,781	\$21.97	4.9	\$ 82,099

As of October 31, 2013, there was \$1,712 of total unrecognized compensation expense related to unvested stock options. That cost is expected to be recognized over a weighted-average period of 1.9 years.

The following table presents the total market value of stock options exercised and the total intrinsic value of options exercised during the following fiscal years:

Fiscal years ended October 31	2013	2012	2011
-------------------------------	------	------	------

Market value of stock options exercised	\$ 23,160	\$ 35,901	\$ 25,592
Intrinsic value of options exercised	13,875	16,061	11,434

The fair value of each stock option is estimated on the date of grant using the Black-Scholes valuation method with the assumptions noted in the table below. The expected life is a significant assumption as it determines the period for which the risk-free interest rate, volatility, and dividend yield must be applied. The expected life is the average length of time in which officers, other employees, and non-employee directors are expected to exercise their stock options, which is primarily based on historical experience. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. Expected volatilities are based on the movement of the company's common stock over the most recent historical period equivalent to the expected life of the option. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury rate over the expected life at the time of grant. Dividend yield is estimated over the expected life based on the company's historical cash dividends paid, expected future cash dividends and dividend yield, and expected changes in the company's stock price.

Edgar Filing: TORO CO - Form 10-K

The following table illustrates the valuation assumptions of stock-based compensation for the following fiscal years:

Fiscal years ended October 31	2013	2012	2011
Expected life of option in years	6	6	6
	35.18%	34.87%	33.34%
Expected volatility	35.19%	35.02%	33.43%
Weighted-average volatility	35.19%	35.01%	33.42%
			1.72%
Risk-free interest rate	0.88%	1.20%	2.36%
	1.04%	1.31%	1.04%
Expected dividend yield	1.07%	1.40%	1.16%
Weighted-average dividend yield	1.07%	1.32%	1.05%
Weighted-average fair value at date of grant	\$13.03	\$8.56	\$10.15

Restricted Stock and Restricted Stock Unit Awards. Under the company's incentive plan, restricted stock and restricted stock unit awards are generally granted to certain non-officer employees. Occasionally, restricted stock or restricted stock unit awards may be granted in connection with hiring, mid-year promotions, leadership transition, or retention. In fiscal 2013, the company began granting restricted stock unit awards. Restricted stock and restricted stock unit awards generally vest one-third each year over a three-year period, or vest in full on the three-year anniversary of the date of grant. Such awards may have performance-based rather than time-based vesting requirements. Compensation expense equal to the grant date fair value, which is equal to the closing price of the company's common stock on the date of grant multiplied by the number of shares subject to the restricted stock and restricted stock unit awards, is recognized for these awards over the vesting period.

The company granted restricted stock and restricted stock unit awards during the following fiscal years as follows:

Fiscal years ended October 31	2013	2012	2011
Weighted-average fair value at date of grant	\$ 46.10	\$ 33.61	\$ 27.17
Fair value of restricted stock and restricted stock unit awards vested	1,207	967	37

The table below summarizes the activity during fiscal 2013 for unvested restricted stock and restricted stock unit awards:

	Restricted Stock and Units	Weighted-Average Fair Value at Date of Grant
Unvested as of October 31, 2012	114,914	\$ 30.02
Granted	41,270	46.10
Vested	(42,214)	28.59
Forfeited	(4,682)	37.45
Unvested as of October 31, 2013	109,288	\$ 36.32

As of October 31, 2013, there was \$1,894 of total unrecognized compensation expense related to unvested restricted stock and restricted stock unit awards. That cost is expected to be recognized over a weighted-average period of 2.1 years.

Performance Share Awards. The company grants performance share awards to executive officers and other employees under which they are entitled to receive shares of the company's common stock contingent on the achievement of performance goals of the company, which are generally measured over a three-year period. The number of shares of common stock a participant receives will be increased (up to 200 percent of target levels) or reduced (down to zero) based on the level of achievement of performance goals and vest at the end of a three-year period. Performance share awards are generally granted on an annual basis in the first quarter of the company's fiscal year. Compensation expense is recognized for these awards on a straight-line basis over the vesting period based on the per share fair value as of the date of grant and the probability of achieving each performance goal.

The company granted performance share awards as follows:

Fiscal years ended October 31	2013	2012	2011
Weighted-average fair value at date of grant	\$ 42.06	\$ 28.24	\$ 31.76
Fair value of performance share awards vested	9,057	1,828	1,429

The table below summarizes the activity during fiscal 2013 for unvested performance share awards:

	Performance Shares	Weighted-Average Fair Value at Date of Grant
Unvested as of October 31, 2012	583,332	\$ 26.33
Granted	152,800	42.06
Vested	(215,332)	20.37
Forfeited		
Unvested as of October 31, 2013	520,800	\$ 33.41

As of October 31, 2013, there was \$3,497 of total unrecognized compensation expense related to unvested performance share awards. That cost is expected to be recognized over a weighted-average period of 1.7 years.

11 EMPLOYEE RETIREMENT PLANS

The company maintains The Toro Company Investment, Savings, and Employee Stock Ownership Plan for eligible employees. The company's expenses under this plan were \$14,931, \$14,304, and \$12,686 for the fiscal years ended October 31, 2013, 2012, and 2011, respectively.

In addition, the company and its subsidiaries have defined benefit, supplemental, and other retirement plans covering certain employees in the U.S. and the United Kingdom. The projected benefit obligation of these plans as of October 31, 2013 and 2012 was \$42,034 and \$41,701, respectively, and the net liability amount recognized in the consolidated balance sheets as of October 31, 2013 and 2012 was \$3,982 and \$3,881, respectively. The

Edgar Filing: TORO CO - Form 10-K

accumulated benefit obligation of these plans as of October 31, 2013 and 2012 was \$39,967 and \$39,612, respectively. The funded status of these plans as of October 31, 2013 and 2012 was \$9,063 and \$10,510, respectively. The fair value of the plan assets as of October 31, 2013 and 2012 was \$32,971 and \$31,191, respectively. The net expense recognized in the consolidated financial statements for these plans was \$1,149, \$703, and \$1,520 for the fiscal years ended October 31, 2013, 2012, and 2011, respectively.

Amounts recognized in accumulated other comprehensive loss consisted of:

Fiscal years ended October 31	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Total
2013			
Net actuarial loss	\$ 2,915	\$ 611	\$3,526
Net prior service cost (credit)	289	(132)	157
Accumulated other comprehensive loss	\$ 3,204	\$ 479	\$3,683
2012			
Net actuarial loss	\$ 3,316	\$ 926	\$4,242
Net prior service cost (credit)	324	(238)	86
Accumulated other comprehensive loss	\$ 3,640	\$ 688	\$4,328

The following amounts are included in accumulated other comprehensive loss as of October 31, 2013 and are expected to be recognized as components of net periodic benefit cost during fiscal 2014.

	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Total
Net actuarial loss	\$ 424	\$ 14	\$ 438
Net prior service cost (credit)	51	(168)	(117)
Total	\$ 475	\$ (154)	\$ 321

Amounts recognized in net periodic benefit cost and other comprehensive income consisted of:

Fiscal years ended October 31	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Total
2013			
Net actuarial gain	\$ (1,170)	\$ (283)	\$ (1,453)
Amortization of unrecognized prior service (credit) cost	(34)	106	72
Amortization of unrecognized actuarial loss (gain)	768	(32)	736

Total recognized in other comprehensive loss (income)	\$	(436)	\$	(209)	\$	(645)
Total recognized in net periodic benefit cost and other comprehensive loss (income)	\$	117	\$	387	\$	504
2012						
Net actuarial loss (gain)	\$	298	\$	(1,130)	\$	(832)
Curtailment loss		311				311
Prior service cost		186				186
Amortization of unrecognized prior service (credit) cost		(55)		106		51
Amortization of unrecognized actuarial loss (gain)		919		(107)		812
Total recognized in other comprehensive loss (income)	\$	1,659	\$	(1,131)	\$	528
Total recognized in net periodic benefit cost and other comprehensive loss (income)	\$	1,522	\$	(291)	\$	1,231

The company has omitted the remaining disclosures for its defined benefit plans and postretirement healthcare plan as the company deems these plans to be immaterial to its consolidated financial position and results of operations.

12 SEGMENT DATA

The company's businesses are organized, managed, and internally grouped into segments based on differences in products and services. Segment selection was based on the manner in which management organizes segments for making operating and investment decisions and assessing performance. The company has identified eight operating segments and has aggregated those segments into three reportable segments: Professional, Residential, and Distribution. The aggregation of the company's segments is based on the segments having the following similarities: economic characteristics, types of products and services, types of production processes, type or class of customers, and method of distribution. The company's Distribution segment, which consists of company-owned domestic distributorships, has been combined with the company's corporate activities and elimination of intersegment revenues and expenses and is shown as "Other" due to the insignificance of the segment.

Edgar Filing: TORO CO - Form 10-K

The Professional business segment consists of turf and landscape equipment and irrigation products. Turf and landscape equipment products include sports fields and grounds maintenance equipment, golf course mowing and maintenance equipment, landscape contractor mowing equipment, landscape creation and renovation equipment, rental and construction equipment, and other maintenance equipment. Irrigation and lighting products consist of sprinkler heads, electric and hydraulic valves, controllers, computer irrigation central control systems, and micro-irrigation drip tape and hose products, as well as professionally installed lighting products offered through distributors and landscape contractors that also purchase irrigation products. Professional business segment products are sold mainly through a network of distributors and dealers to professional users engaged in maintaining golf courses, sports fields, municipal properties, agricultural fields, and residential and commercial landscapes, as well as directly to government customers, rental companies, and large retailers.

The Residential business segment consists of walk power mowers, riding mowers, snow throwers, replacement parts, and home solutions products, including trimmers, blowers, blower-vacuums, and underground and hose-end retail irrigation products sold in Australia. Residential business segment products are sold to homeowners through a network of distributors and dealers, and through a broad array of home centers, hardware retailers, and mass retailers, as well as over the Internet.

The Other segment consists of the company's Distribution segment and corporate activities and elimination of intersegment revenues and expenses. Corporate activities include general corporate expenditures (finance, human resources, legal, information services, public relations, and similar activities) and other unallocated corporate assets and liabilities, such as corporate facilities, parts inventory, and deferred tax assets.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies in Note 1. The company evaluates the performance of its professional and residential business segment results based on earnings from operations plus other income, net. Operating loss for the Other segment includes earnings (loss) from domestic wholly owned distribution companies, corporate activities, other income, and interest expense. The business segment's operating profits or losses include direct costs incurred at the segment's operating level plus allocated expenses, such as profit sharing and manufacturing expenses. The allocated expenses represent costs that these operations would have incurred otherwise, but do not include general corporate expenses, interest expense, and income taxes. The company accounts for intersegment gross sales at current market prices.

The following table shows summarized financial information concerning the company's reportable segments:

Fiscal years ended October 31	Professional	Residential	Other	Total
2013				
Net sales	\$ 1,425,259	\$ 594,411	\$ 21,761	\$2,041,431
Intersegment gross sales	40,416	402	(40,818)	
Earnings (loss) before income taxes	254,424	62,033	(89,744)	226,713
Total assets	528,926	167,918	305,904	1,002,748
Capital expenditures	32,362	7,838	9,227	49,427
Depreciation and amortization	34,706	10,321	9,107	54,134
2012				
Net sales	\$ 1,329,504	\$ 607,435	\$ 21,751	\$1,958,690
Intersegment gross sales	37,324	26	(37,350)	
Earnings (loss) before income taxes	232,104	57,889	(93,731)	196,262
Total assets	527,159	169,899	238,141	935,199
Capital expenditures	29,313	4,164	9,765	43,242

2011				
Net sales	\$ 1,239,068	\$ 623,889	\$ 20,996	\$1,883,953
Intersegment gross sales	35,539	3,560	(39,099)	
Earnings (loss) before income taxes	205,009	54,410	(84,593)	174,826
Total assets	497,388	202,222	171,053	870,663
Capital expenditures	43,933	5,615	7,899	57,447
Depreciation and amortization	31,380	9,846	7,280	48,506

Edgar Filing: TORO CO - Form 10-K

The following table presents the details of the other segment operating loss before income taxes:

Fiscal years ended October 31	2013	2012	2011
Corporate expenses	\$ (85,359)	\$ (81,376)	\$ (72,726)
Interest expense	(16,210)	(16,906)	(16,970)
Other income	11,825	4,551	5,103
Total	\$ (89,744)	\$ (93,731)	\$ (84,593)

The following table presents net sales for groups of similar products and services:

Fiscal years ended October 31	2013	2012	2011
Equipment	\$ 1,649,489	\$ 1,586,864	\$ 1,529,470
Irrigation and lighting	391,942	371,826	354,483
Total	\$ 2,041,431	\$ 1,958,690	\$ 1,883,953

Table of Contents

Sales to one customer in the residential segment accounted for 10 percent of total consolidated gross sales in fiscal 2013 and 11 percent of consolidated gross sales in both fiscal 2012 and 2011.

Geographic Data

The following geographic area data includes net sales based on product shipment destination. Long-lived assets consist of net property, plant, and equipment, which is determined based on physical location in addition to allocated capital tooling from U.S. plant facilities.

Fiscal years ended October 31	United States	Foreign Countries	Total
2013			
Net sales	\$ 1,426,060	\$ 615,371	\$2,041,431
Long-lived assets	143,547	41,549	185,096
2012			
Net sales	\$1,364,377	\$ 594,313	\$1,958,690
Long-lived assets	137,708	42,815	180,523
2011			
Net sales	\$1,276,038	\$ 607,915	\$1,883,953
Long-lived assets	145,169	45,971	191,140

13 COMMITMENTS AND CONTINGENT LIABILITIES

Leases

Total rental expense for operating leases was \$24,399, \$22,166, and \$21,840 for the fiscal years ended October 31, 2013, 2012, and 2011, respectively. As of October 31, 2013, future minimum lease payments under noncancelable operating leases amounted to \$73,165 as follows: 2014, \$14,632; 2015, \$12,544; 2016, \$9,307; 2017, \$5,283; 2018, \$4,212 and after 2018, \$27,187.

Customer Financing

Wholesale Financing. In fiscal 2009, Toro Credit Company sold its receivable portfolio to Red Iron, the company's joint venture with TCFIF. See Note 3 for additional information related to Red Iron. Some products sold to independent dealers in Australia finance their products with a third party finance company. This third party financing company purchased \$26,526 of receivables from the company during fiscal 2013. As of October 31, 2013, \$13,273 of receivables financed by the third party financing company, excluding Red Iron, was outstanding.

The company also enters into limited inventory repurchase agreements with third party financing companies and Red Iron for receivables financed by third party financing companies and Red Iron. As of October 31, 2013, the company was contingently liable to repurchase up to a maximum amount of \$10,153 of inventory related to receivables under these financing arrangements. The company has repurchased only immaterial amounts of inventory under these repurchase agreements since inception.

End-User Financing. The company has agreements with third party financing companies to provide lease-financing options to golf course and sports fields and grounds equipment customers in the U.S. and select countries in Europe. The company has no contingent liabilities for residual value or credit collection risk under these agreements with third party financing companies.

From time to time, the company enters into agreements where it provides recourse to third party finance companies in the event of default by the customer for lease payments to the third party finance company. The company's maximum exposure for credit collection as of October 31, 2013 was \$1,744.

Purchase Commitments

As of October 31, 2013, the company had \$8,400 of noncancelable purchase commitments with some suppliers for materials and supplies as part of the normal course of business. The company also entered into an agreement for the construction of a new corporate facility at its Bloomington, Minnesota location for a maximum obligation, subject to certain exceptions, of \$19,876.

Letters of Credit

Letters of credit are issued by the company during the normal course of business, as required by some vendor contracts. As of October 31, 2013 and 2012, the company had \$12,681 and \$12,963, respectively, in outstanding letters of credit.

Litigation

General. The company is party to litigation in the ordinary course of business. Such matters are generally subject to uncertainties and to outcomes that are not predictable with assurance and that may not be known for extended periods of time. Litigation occasionally involves claims for punitive, as well as compensatory, damages arising out of the use of the company's products. Although the company is self-insured to some extent, the company maintains insurance against certain product liability losses. The company is also subject to litigation and administrative and judicial proceedings with respect to claims involving asbestos and the discharge of hazardous substances into the environment. Some of these claims assert damages and liability for personal injury, remedial investigations or clean up and other costs and damages. The company is also typically involved in commercial disputes, employment disputes, and patent litigation cases in which it is asserting or defending against patent infringement claims. To prevent possible infringement of the company's patents by others, the company periodically reviews competitors' products. To avoid potential liability with respect to others' patents, the company regularly reviews certain patents issued by the United States Patent and Trademark

Table of Contents

Office and foreign patent offices. Management believes these activities help minimize its risk of being a defendant in patent infringement litigation. The company records a liability in its consolidated financial statements for costs related to claims, including future legal costs, settlements and judgments, where the company has assessed that a loss is probable and an amount can be reasonably estimated. If the reasonable estimate of a probable loss is a range, the company records the most probable estimate of the loss or the minimum amount when no amount within the range is a better estimate than any other amount. The company discloses a contingent liability even if the liability is not probable or the amount is not estimable, or both, if there is a reasonable possibility that a material loss may have been incurred. In the opinion of management, the amount of liability, if any, with respect to these matters, individually or in the aggregate, will not materially affect its consolidated results of operations, financial position, or cash flows.

Canadian Lawnmower Engine Horsepower Marketing and Sales Practices Litigation. In March 2010, individuals who claimed to have purchased lawnmowers in Canada filed class action litigation against the company and other defendants that, similar to the class action litigation previously filed by plaintiffs in the United States and settled by the company pursuant to a settlement agreement that became final in February 2011, (i) contained allegations under applicable Canadian law that the horsepower labels on the products the plaintiffs purchased were inaccurate, (ii) sought certification of a class of all persons in Canada who, beginning January 1, 1994 purchased a lawnmower containing a gas combustible engine up to 30 horsepower that was manufactured or sold by the company and other defendants, and (iii) sought under applicable Canadian law unspecified compensatory and punitive damages, attorneys' costs and fees, and equitable relief. In June 2013, the company and certain other defendants, in order to avoid further protracted and expensive litigation, entered into a settlement agreement to resolve all claims against them in the Canadian litigation. As a group, such settling defendants agreed to pay an aggregate amount of CAD \$4,200. In September 2013, courts in Ontario and Quebec held hearings to consider the settlement, which was subsequently approved and became final in October 2013.

14 FINANCIAL INSTRUMENTS

Concentrations of Credit Risk

Financial instruments, which potentially subject the company to concentrations of credit risk, consist principally of accounts receivable that are concentrated in the professional and residential business segments. The credit risk associated with these segments is limited because of the large number of customers in the company's customer base and their geographic dispersion, except for the residential segment that has significant sales to The Home Depot.

Derivative Instruments and Hedging Activities

The company is exposed to foreign currency exchange rate risk arising from transactions in the normal course of business, such as sales to third party customers, sales and loans to wholly owned foreign subsidiaries, foreign plant operations, and purchases from suppliers. The company actively manages the exposure of its foreign currency exchange rate market risk by entering into various hedging instruments, authorized under company policies that place controls on these activities, with counterparties that are highly rated financial institutions. The company's hedging activities primarily involve the use of forward currency contracts, as well as cross currency swaps that are intended to offset intercompany loan exposures. The company uses derivative instruments only in an attempt to limit underlying exposure from foreign currency exchange rate fluctuations and to minimize earnings and cash flow volatility associated with foreign currency exchange rate changes. Decisions on whether to use such contracts are primarily based on the amount of exposure to the currency involved and an assessment of the near-term market value for each currency. The company's policy does not allow the use of derivatives for trading or speculative purposes. The company also made an accounting policy election to use the portfolio exception permitted in ASU No. 2011-04 with respect to measuring counterparty credit risk for derivative instruments, and to measure the fair value of a portfolio of financial assets and financial liabilities on the basis of the net open risk position with each counterparty. The company's primary currency exchange rate exposures are with the Euro, the Australian dollar, the Canadian dollar, the British pound, the Mexican peso, the Japanese yen, the Chinese Yuan, and the Romanian New Leu against the U.S. dollar, as well as the Romanian New Leu against the Euro.

The company entered into an International Swap Dealers Association Master Agreement ("ISDA") with each counterparty that permits the net settlement of amounts owed under their respective contracts. Under these master netting agreements, net settlement generally permits the company or the counterparty to determine the net amount payable or receivable for contracts due on the same date or in the same currency for similar types of derivative transactions. The company records the fair value of its derivative contracts at the net amount in its consolidated balance sheets.

Cash Flow Hedges. The company recognizes all derivative instruments as either assets or liabilities at fair value on the consolidated balance sheet and formally documents relationships between cash flow hedging instruments and hedged transactions, as well as its risk-management objective and strategy for undertaking hedge transactions. This process includes linking all derivatives to the forecasted transactions, such as sales to third parties and foreign plant operations. Changes in fair values of outstanding

Table of Contents

cash flow hedge derivatives, except the ineffective portion, are recorded in other comprehensive income ("OCI"), until net earnings is affected by the variability of cash flows of the hedged transaction. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in net earnings. The consolidated statement of earnings classification of effective hedge results is the same as that of the underlying exposure. Results of hedges of sales and foreign plant operations are recorded in net sales and cost of sales, respectively, when the underlying hedged transaction affects net earnings. The maximum amount of time the company hedges its exposure to the variability in future cash flows for forecasted trade sales and purchases is two years. Results of hedges of intercompany loans are recorded in other income, net as an offset to the remeasurement of the foreign loan balance.

The company formally assesses, at a hedge's inception and on an ongoing basis, whether the derivatives that are designated as hedges have been highly effective in offsetting changes in the cash flows of the hedged transactions and whether those derivatives may be expected to remain highly effective in future periods. When it is determined that a derivative is not, or has ceased to be, highly effective as a hedge, the company discontinues hedge accounting prospectively. When the company discontinues hedge accounting because it is no longer probable, but it is still reasonably possible that the forecasted transaction will occur by the end of the originally expected period or within an additional two-month period of time thereafter, the gain or loss on the derivative remains in AOCL and is reclassified to net earnings when the forecasted transaction affects net earnings. However, if it is probable that a forecasted transaction will not occur by the end of the originally specified time period or within an additional two-month period of time thereafter, the gains and losses that were in AOCL are recognized immediately in net earnings. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the company carries the derivative at its fair value on the consolidated balance sheet, recognizing future changes in the fair value in other income, net. For the fiscal years ended October 31, 2013 and 2012, there were no gains or losses on contracts reclassified into earnings as a result of the discontinuance of cash flow hedges. As of October 31, 2013, the notional amount of outstanding forward contracts designated as cash flow hedges was \$134,186. Additionally, the company has one cross currency interest rate swap instrument outstanding as of October 31, 2013 for a fixed pay notional of 36,593 Romanian New Leu and receive floating notional of 8,500 Euro.

Derivatives Not Designated as Hedging Instruments. The company also enters into foreign currency contracts that include forward currency contracts and cross currency swaps to mitigate the remeasurement of specific assets and liabilities on the consolidated balance sheet. These contracts are not designated as hedging instruments. Accordingly, changes in the fair value of hedges of recorded balance sheet positions, such as cash, receivables, payables, intercompany notes, and other various contractual claims to pay or receive foreign currencies other than the functional currency, are recognized immediately in other income, net, on the consolidated statements of earnings together with the transaction gain or loss from the hedged balance sheet position.

The following table presents the fair value of the company's derivatives and consolidated balance sheet location.

	Asset Derivatives				Liability Derivatives			
	October 31, 2013		October 31, 2012		October 31, 2013		October 31, 2012

Table of Contents

The following table presents the impact of derivative instruments on the consolidated statements of earnings and the consolidated statements of comprehensive income for the company's derivatives designated as cash flow hedging instruments for the fiscal years ended October 31, 2013 and 2012, respectively.

Gain (Loss) Recognized in OCI on Derivatives, net of tax (Effective Portion)	Location of Gain (Loss) Reclassified from AOCL into Income (Effective Portion)	Gain (Loss) Reclassified from AOCL into Income (Effective Portion)	Location of Gain (Loss) Recognized in Income on Derivatives (Ineffective Portion and excluded from Effectiveness Testing)
October 31, 2012		October 31, 2013	October 31, 2012
7 \$ (1,751)	Net sales	\$ (805)	(3,561) Other income, net
1) 1,194	Cost of sales	473	1,500
0) 463	Other income, net	(639)	133
4) \$ (94)	Total	\$ (971)	(1,928)

As of October 31, 2013, the company anticipates to reclassify approximately \$1,338 of losses from AOCL to earnings during the next twelve months.

The following table presents the impact of derivative instruments on the consolidated statements of earnings for the company's derivatives not designated as hedging instruments.

	Location of Gain (Loss) Recognized in Net Earnings	Gain (Loss) Recognized in Net Earnings Fiscal Year Ended	
		October 31, 2013	October 31, 2012
Forward currency contracts	Other income, net	\$ (1,402)	\$ 4,165
Cross currency contracts	Other income, net	(483)	379
Total		\$ (1,885)	\$ 4,544

During the second quarter of fiscal 2007, the company entered into three treasury lock agreements based on a 30-year U.S. Treasury security with a principal balance of \$30,000 each for two of the agreements and \$40,000 for the third agreement. These treasury lock agreements provided for a single payment at maturity, which was April 23, 2007, based on the change in value of the reference treasury security. These agreements were designated as cash flow hedges and resulted in a net settlement of \$182, which was recorded in AOCL, and will be amortized to interest expense over the 30-year term of the senior notes. The unrecognized loss portion of the fair value of these agreements in AOCL as of October 31, 2013 and 2012 was \$143 and \$149, respectively.

Fair Value

The company categorizes its assets and liabilities into one of three levels based on the assumptions (inputs) used in valuing the asset or liability. Estimates of fair value for financial assets and financial liabilities are based on the framework established in the accounting guidance for fair value measurements. The framework defines fair value, provides guidance for measuring fair value, and requires certain disclosures. The framework discusses valuation techniques such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). The framework utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Level 1 provides the most reliable measure of fair value, while Level 3 generally requires significant management judgment. The three levels are defined as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs reflecting management's assumptions about the inputs used in pricing the asset or liability.

Cash balances are valued at their carrying amounts in the consolidated balance sheets, which are reasonable estimates of their fair value due to their short-term nature. Forward currency contracts are valued based on observable market transactions of forward currency prices and spot currency rates as of the reporting date. The fair value of cross currency contracts is determined using discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs such as interest rates and foreign currency exchange rates. In addition, credit valuation adjustments, which consider the impact of any credit enhancements to the contracts, such as collateral postings, thresholds, mutual puts, and guarantees, are incorporated in the fair values to account for potential nonperformance risk. The unfunded deferred compensation liability is primarily subject to changes in fixed-income investment contracts based on current yields. For accounts receivable and

Edgar Filing: TORO CO - Form 10-K

Table of Contents

accounts payable, carrying amounts are a reasonable estimate of fair value given their short-term nature.

Assets and liabilities measured at fair value on a recurring basis, as of October 31, 2013 and 2012, respectively, are summarized below:

October 31, 2013	Fair Value	Level 1	Level 2	Level 3
Assets:				
Cash and cash equivalents	\$ 182,993	\$ 182,993	\$	
Forward currency contracts	1,266		1,266	
Total assets	\$ 184,259	\$ 182,993	\$ 1,266	
Liabilities:				
Forward currency contracts	\$ 1,931		\$ 1,931	
Cross currency contracts	443		443	
Deferred compensation liabilities	2,777		2,777	
Total liabilities	\$ 5,151		\$ 5,151	

October 31, 2012	Fair Value	Level 1	Level 2	Level 3
Assets:				
Cash and cash equivalents	\$125,856	\$125,856	\$	
Forward currency contracts	995		995	
Cross currency contracts	1,046		1,046	
Total assets	\$127,897	\$125,856	\$ 2,041	
Liabilities:				
Forward currency contracts	\$ 2,114		\$ 2,114	
Deferred compensation liabilities	3,547		3,547	
Total liabilities	\$ 5,661		\$ 5,661	

There were no transfers between Level 1 and Level 2 during the fiscal years ended October 31, 2013 and 2012.

As of October 31, 2013, the estimated fair value of long-term debt with fixed interest rates was \$243,074 compared to its carrying amount of \$223,544. As of October 31, 2012, the estimated fair value of long-term debt with fixed interest rates was \$262,458 compared to its carrying amount of \$226,858. The fair value is estimated by discounting the projected cash flows using the rate at which similar amounts of debt could currently be borrowed. Long-term debt is a Level 2 liability in the fair value hierarchy.

15 SUBSEQUENT EVENTS

The company evaluated all subsequent events and concluded that no subsequent events have occurred that would require recognition in the financial statements or disclosure in the notes to the financial statements.

16 **QUARTERLY FINANCIAL DATA** (unaudited)

Summarized quarterly financial data for fiscal 2013 and 2012 are as follows:

Fiscal year ended**October 31, 2013**

Quarter	First	Second	Third	Fourth
Net sales	\$ 444,661	\$ 704,486	\$ 509,918	\$ 382,366
Gross profit	165,817	252,301	178,031	128,648
Net earnings	31,396	78,402	40,097	4,950
Basic net earnings per share¹	0.54	1.35	0.70	0.09
Diluted net earnings per share¹	0.53	1.32	0.68	0.08

Fiscal year ended**October 31, 2012**

Quarter	First	Second	Third	Fourth
Net sales	\$ 423,835	\$ 691,485	\$ 504,076	\$ 339,294
Gross profit	146,651	235,422	178,122	112,899
Net earnings	19,923	68,818	40,549	251
Basic net earnings per share¹	0.33	1.15	0.69	0.00
Diluted net earnings per share¹	0.33	1.13	0.67	0.00

1

Net earnings per share amounts do not sum to equal full year total due to changes in the number of shares outstanding during the periods and rounding.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

The company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) that are designed to provide reasonable assurance that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, the company recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply judgment in evaluating the cost-benefit relationship of possible internal controls. The company's management evaluated, with the participation of the company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of the company's disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, the company's Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures were effective as of the end of such period to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information relating to the company and its consolidated subsidiaries is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures. The company's management report on internal control over financial reporting is included in this report in Part II, Item 8, "Financial Statements and Supplementary Data" under the caption "Management's Report on Internal Control over Financial Reporting." The report of KPMG LLP, the company's independent registered public accounting firm, regarding the effectiveness of the company's internal control over financial reporting is included in this report in Part II, Item 8, "Financial Statements and Supplementary Data" under the caption "Report of Independent Registered Public Accounting Firm." There was no change in the company's internal control over financial reporting that occurred during the company's fourth fiscal quarter ended October 31, 2013 that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information on executive officers required by this item is incorporated by reference from "Executive Officers of the Registrant" in Part I of this report. Additional information on certain executive officers and other information required by this item is incorporated by reference to information to be contained under the captions "Section 16(a) Beneficial Ownership Reporting Compliance," "Proposal One Election of Directors Information About Board Nominees and Continuing Directors," "Corporate Governance Code of Conduct and Code of Ethics for our CEO and Senior Financial Officers," and "Corporate Governance Board Committees Audit Committee," in the company's proxy statement for its 2014 Annual Meeting of Shareholders to be filed with the SEC.

During the fourth quarter of fiscal 2013, the company did not make any material changes to the procedures by which shareholders may recommend nominees to the board of directors, as described in the company's proxy statement for its 2013 Annual Meeting of Shareholders. The company has a Code of Ethics for its CEO and Senior Financial Officers, a copy of which is posted on the company's web site at www.thetorocompany.com (select the "Investor Information" link and then the "Corporate Governance" link). The company intends to satisfy the disclosure requirements of Item 5.05 of Form 8-K and applicable NYSE rules regarding amendments to or waivers from any provision of its code of ethics by posting such information on its web site at www.thetorocompany.com (select the "Investor Information" link and then the "Corporate Governance" link).

ITEM 11. EXECUTIVE COMPENSATION

Information required by this item is incorporated by reference to information to be contained under the captions "Executive Compensation" and "Corporate Governance – Director Compensation" in the company's proxy statement for its 2014 Annual Meeting of Shareholders to be filed with the SEC.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by this item is incorporated by reference to information to be contained under the captions "Stock Ownership" and "Equity Compensation Plan Information" in the company's proxy statement for its 2014 Annual Meeting of Shareholders to be filed with the SEC.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by this item is incorporated by reference to information to be contained under the caption "Corporate Governance – Director Independence" and "Corporate Governance – Policies and Procedures Regarding Related Person Transactions" in the company's proxy statement for its 2014 Annual Meeting of Shareholders to be filed with the SEC.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information required by this item is incorporated by reference to information to be contained under the captions "Proposal Two – Ratification of Selection of Independent Registered Public Accounting Firm – Audit, Audit-Related, Tax and Other Fees" and "Proposal Two – Ratification of Selection of Independent Registered Public Accounting Firm – Pre-Approval Policies and Procedures" in the company's proxy statement for its 2014 Annual Meeting of Shareholders to be filed with the SEC.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) 1. List of Financial Statements

The following consolidated financial statements of The Toro Company and its consolidated subsidiaries are included in Part II, Item 8, "Financial Statements and Supplementary Data" of this report:

Management's Report on Internal Control over Financial Reporting.

Report of Independent Registered Public Accounting Firm.

Consolidated Statements of Earnings for the fiscal years ended October 31, 2013, 2012, and 2011.

Consolidated Statements of Comprehensive Income for the fiscal years ended October 31, 2013, 2012, and 2011.

Consolidated Balance Sheets as of October 31, 2013 and 2012.

Consolidated Statements of Cash Flows for the fiscal years ended October 31, 2013, 2012, and 2011.

Consolidated Statements of Stockholders' Equity for the fiscal years ended October 31, 2013, 2012, and 2011.

Notes to Consolidated Financial Statements.

(a) 2. List of Financial Statement Schedules

Edgar Filing: TORO CO - Form 10-K

The following financial statement schedule of The Toro Company and its subsidiaries is included herein:

Schedule II Valuation and Qualifying Accounts

All other schedules are omitted because the required information is inapplicable or the information is presented in the consolidated financial statements or related notes.

(a) 3. List of Exhibits

The following exhibits are incorporated herein by reference or are filed or furnished with this report as indicated below:

Exhibit Number	Description
