**Item 4.02 Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review**

On March 22, 2007, the Company's management and the audit committee of the board of directors concluded that the Company's consolidated financial statements for the year ended December 31, 2005 and for each of the quarters from June 30, 2005 through September 30, 2006, should not be relied upon because of errors in accounting for the Company's exclusive distribution agreement in Canada, as described below.

In May 2005, the Company entered into a five-year agreement with a Canadian company to serve as the Company's exclusive distributor in Canada. The distribution agreement requires the Company to pay a distribution fee to the distributor. Prior to October 1, 2006, the Company classified this distribution fee in operating expenses. The Company has since concluded that this fee should be classified as an adjustment to gross sales in arriving at net sales, similar to trade rebates and other adjustments to gross sales. Further, the Company has concluded that the distribution fee should be accrued and expensed at the time of sale to the distributor. Previously, the Company expensed the fee when billed by the distributor to the Company.

The Company's management and the audit committee have determined that the adjustments noted above resulted from a material weakness in internal control related to the lack of a formal process to evaluate and document all of the accounting implications that may be associated with new and non-routine contracts, including distribution agreements.

As a result of the foregoing adjustments, the Company, upon recommendation of its audit committee and upon concurrence of its board of directors, will restate its financial statements for the quarterly periods ended June 30, 2005 (unaudited) and September 30, 2005 (unaudited) and the financial statements and accompanying notes for the year ended December 31, 2005 (audited) and the unaudited financial statements for the first three quarters of 2006. The restatement will have no impact on the Company's consolidated operating cash flows for the affected periods. A summary of the expected impact of the restatement upon the Company's consolidated balance sheets and consolidated statements of operations is outlined below:
