Depreciation and amortization		90		90
Adjusted EBITDA	\$	72	\$	104

Adjusted EBITDA was \$72 million for the second quarter of 2012 compared to \$104 million for the same period of 2011. The decline primarily resulted from a reduction in energy gross margin because of lower prices and reduced generation volumes as well as lower contracted and capacity revenues in Eastern PJM and Western PJM/MISO. The decline was partially offset by increased realized value of hedges and

lower adjusted operating and other expenses, primarily from lower project, outage and maintenance expenses.

The adjusted net loss was \$107 million for the second quarter of 2012 compared to the adjusted net loss of \$82 million for the same period of 2011. The increase in adjusted net loss was primarily related to the same items that affected adjusted EBITDA, partially offset by lower interest expense.

GenOn's net loss was \$228 million for the second quarter of 2012 compared to the net loss of \$138 million for the same period of 2011. The increase in net loss was primarily a result of increased unrealized losses and the same items that affected adjusted net loss. These were partially offset by a reduction in large scale remediation and settlement costs, the reversal of the Potomac River settlement obligation and a decrease in Mirant/RRI merger-related costs.

Net cash used in operating activities was \$39 million for the second quarter of 2012 compared to net cash used in operating activities of \$203 million for the same period of 2011.

Adjusted EBITDA	\$ 173	\$ 309

The decline primarily resulted from a reduction in energy gross margin because of lower prices and reduced generation volumes as well as lower contracted and capacity revenues in Eastern PJM and Western PJM/MISO. These items were partially offset by increased

realized value of hedges and an improvement in adjusted operating and other expenses, primarily related to lower project, outage and maintenance expenses and Mirant/RRI merger cost savings.
