Unless the context otherwise requires or as otherwise indicated, references to we, our, us and the Company refer to Ladder Capital Corp and i subsidiaries and, for periods prior to February 2014, refer to its predecessor Ladder Capital Finance Holdings LLLP and its subsidiaries.

The Company hereby furnishes the following information regarding its business that was prepared in connection with the financing activities intended to repay certain of its funding debt and for general corporate purposes, including additional originations and investments in the Company s core investment products.

The information below summarizes our preliminary financial data as of and for the three months ended June 30, 2014, for which consolidated financial statements are not yet available. The preliminary financial data included has been prepared by, and is the responsibility of, the Company s management. Our independent registered public accounting firm, PricewaterhouseCoopers LLP, has not audited, reviewed, compiled or performed any procedures on this preliminary financial data, and accordingly, does not express an opinion or other form of assurance with respect to this preliminary financial data. The estimated ranges for the three months ended June 30, 2014 are preliminary and may change. There can be no assurance that our final results of operations for such periods will not differ from these estimates. Any such changes could be material. These estimates should not be viewed as a substitute for our full interim financial statements prepared in accordance with GAAP, which will be filed with the SEC pursuant to the Securities Exchange Act of 1934. In addition, these preliminary results of operations for the three months ended June 30, 2014 are not necessarily indicative of the results to be achieved for any future period.

As shown in the table below, for the three months ended June 30, 2014 compared to the three months ended June 30, 2013:

• Loan originations and purchases in the second quarter of 2014 are estimated to be higher than during the same period a year before primarily due to the stabilizing of credit spreads which began at the end of the fourth quarter of 2013.

• Proceeds from sales of loans during the second quarter of 2014 are estimated to be higher than in the same period in 2013 primarily due to higher loan origination activity during the second quarter of 2014.

• Net interest income in the second quarter of 2014 is estimated to be higher than during the same period in 2013 primarily attributable to the increase in securities investment balances during 2014 compared to the same period a year ago, partially offset by the increase in debt balance.

• Sales of loans, net increased in the second quarter of 2014 in comparison to the second quarter of 2013. Results from derivative transactions in the second quarter of 2014 reflect the decreasing interest rates prevailing during that period while second quarter of 2013 results from derivative transactions reflected a rising interest rate trend.

[•] The year-over-year estimated increase in second quarter Core Earnings was due to the increase in income from the sale of loans, net as previously discussed. The estimated year-over-year decreases in second quarter income before taxes, was primarily the result of an increase in income from the sale of loans, net as well as an offsetting net loss from derivative transactions in the second quarter of 2014, compared to a net gain from derivative transactions in the second quarter of 2013.

Based on management s analysis for the period ended June 30, 2014, we expect to report our financial results and position within the estimated ranges set forth in the following table (the corresponding metrics for the prior periods are provided for the basis of comparison):

Core Earnings per Share is not applicable for reporting periods prior to the first quarter of 2014, during which we completed our initial public offering and related reorganization.

3

We present Core Earnings and Core Earnings per Share because we believe they assist investors in comparing our performance across reporting periods on a consistent basis by excluding non-cash expenses and unrecognized results from derivatives and Agency interest-only securities, which we believe makes comparisons across reporting periods more relevant by eliminating timing differences related to changes in the values of assets and derivatives. In addition, we use Core Earnings and Core Earnings per Share: (i) to evaluate our earnings from operations and (ii) because management believes that it may be a useful performance measure for us.

Core Earnings and Core Earnings per Share have limitations as an analytical tool. Some of these limitations are:

• Core Earnings and Core Earnings per Share do not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of our ongoing operations and is not necessarily indicative of cash necessary to fund cash needs;

• Core Earnings per Share is based on a non-GAAP estimate of Ladder s effective tax rate, including the impact of New York City Unincorporated Business Tax, assuming the conversion of all shares of Class B common stock into share of Class A common stock. Ladder s actual tax rate may differ materially from this estimate; and

• Other companies in our industry may calculate Core Earnings and Core Earnings per Share differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, Core Earnings and Core Earnings per Share should not be considered in isolation or as a substitute for net income or earnings per share as an alternative to cash flow as a measure of our liquidity or any other performance measures calculated in accordance with GAAP.

In the future we may incur gains and losses that are the same as or similar to some of the adjustments in this presentation. Our presentation of Core Earnings and Core Earnings per Share should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.
