The accompanying notes are an integral part of the Consolidated Financial Statements.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

All amounts in the Notes to the Unaudited Consolidated Financial Statements are in millions except per share amounts.

1. ACCOUNTING POLICIES

Basis of Presentation and Principles of Consolidation

The accompanying financial statements include the consolidated accounts of The Kroger Co., its wholly-owned subsidiaries, and the variable interest entities in which the Company is the primary beneficiary. The January 30, 2016 balance sheet was derived from audited financial statements and, due to its summary nature, does not include all disclosures required by generally accepted accounting principles (GAAP). Significant intercompany transactions and balances have been eliminated. References to the Company in these Consolidated Financial Statements mean the consolidated company.

In the opinion of management, the accompanying unaudited Consolidated Financial Statements include all normal, recurring adjustments that are necessary for a fair presentation of results of operations for such periods but should not be considered as indicative of results for a full year. The financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been omitted, pursuant to SEC regulations. Accordingly, the accompanying Consolidated Financial Statements should be read in conjunction with the financial statements in the Company s Annual Report on Form 10-K for the fiscal year ended January 30, 2016.

The unaudited information in the Consolidated Financial Statements for the second quarters and two quarters ended August 13, 2016 and August 15, 2015, includes the results of operations of the Company for the 12 and 28-week periods then ended.

Refer to Note 6 for a description of changes to the Consolidated Statements of Operations and Consolidated Statements of Cash Flows for a recently adopted accounting standard regarding the presentation of employee share-based compensation payments.

2. MERGER

On December 18, 2015, the Company closed its merger with Roundy s, Inc. (Roundy s). In the second quarter of 2016, there was a purchase price allocation adjustment to reduce goodwill and other current liabilities by \$8.

Edgar Filing: KROGER CO - Form 10-Q

Pro forma results of operations, assuming the transaction had taken place at the beginning of 2014, are included in the following table. The pro forma information includes historical results of operations of Roundy's and adjustments for interest expense that would have been incurred due to financing the merger, depreciation and amortization of the assets acquired and excludes the pre-merger transaction related expenses incurred by Roundy's and the Company. The pro forma information does not include efficiencies, cost reductions, synergies or investments in our Customer 1st Strategy expected to result from the merger. The unaudited pro forma financial information is not necessarily indicative of the results that actually would have occurred had the merger been completed at the beginning of 2014.

	Second Quarter Ended August 15, 2015		Two Quarters Ended August 15, 2015	
Sales	\$	26,525	\$	60,861
Net earnings including noncontrolling interests		432		1,059
Net earnings attributable to noncontrolling interests				5
Net earnings attributable to The Kroger Co.	\$	432	\$	1,054

3. DEBT OBLIGATIONS

Long-term debt consists of:

	August 13, 2016	January 30, 2016
1.14% to 8.00% Senior Notes due through 2043	\$ 9,833	\$ 9,826
5.00% to 12.75% Mortgages due in varying amounts through 2027	50	58
0.63% to 0.66% Commercial paper borrowings due through August 2016	1,275	990
Other	509	522
Total debt, excluding capital leases and financing obligations	11,667	11,396
Less current portion	(2,725)	(2,318)
Total long-term debt, excluding capital leases and financing obligations	\$ 8,942	\$ 9,078

In anticipation of future debt refinancing in fiscal years 2016 through 2019, the Company, in the first and second quarters of 2016, entered into additional forward-starting interest rate swap agreements with an aggregate notional amount totaling \$1,500. After entering into these additional forward-starting interest rate swaps, the Company has a total of \$1,900 notional amount of forward-starting interest rate swaps outstanding. The forward-starting interest rate swaps entered into in the first two quarters of 2016 were designated as cash-flow hedges as defined by GAAP.

4. BENEFIT PLANS

The following table provides the components of net periodic benefit cost for the Company-sponsored defined benefit pension plans and other post-retirement benefit plans for the second quarters of 2016 and 2015.

	Second Quarter Ended			
	Pension Benefits		Other Benefits	
	August 13, 2016	August 15, 2015	August 13, 2016	August 15, 2015
Components of net periodic benefit cost:				
Service cost	\$ 15	\$ 16	\$ 2	\$ 3
Interest cost	43	39	3	2
Expected return on plan assets	(55)	(53)		
Amortization of:				
Prior service cost			(2)	(3)
Actuarial loss (gain)	15	24	(2)	(1)
Net periodic benefit cost	\$ 18	\$ 26	\$ 1	\$ 1

The following table provides the components of net periodic benefit cost for the Company-sponsored defined benefit pension plans and other post-retirement benefit plans for the first two quarters of 2016 and 2015.

	Two Quarters Ended			
	Pension Benefits		Other Benefits	
	August 13, 2016	August 15, 2015	August 13, 2016	August 15, 2015
Components of net periodic benefit cost:				
Service cost	\$ 36	\$ 35	\$ 5	\$ 6
Interest cost	101	90	6	6
Expected return on plan assets	(128)	(124)		
Amortization of:				
Prior service cost			(4)	(6)
Actuarial loss (gain)	34	55	(5)	(3)
Net periodic benefit cost	\$ 43	\$ 56	\$ 2	\$ 3

The Company is not required and does not expect to make any contributions to its Company-sponsored defined benefit pension plans in 2016.

The Company contributed \$117 and \$107 to employee 401(k) retirement savings accounts in the first two quarters of 2016 and 2015, respectively.

The Company also contributes to various multi-employer pension plans based on obligations arising from most of its collective bargaining agreements. These plans provide retirement benefits to participants based on their service to contributing employers. The Company recognizes expense in connection with these plans as contributions are funded.

During the second quarter of 2016, the Company incurred a charge of \$111, \$71 net of tax, due to commitments arising from the restructuring of certain multi-employer pension plan obligations during the second quarter of 2016.

5. EARNINGS PER COMMON SHARE

Net earnings attributable to The Kroger Co. per basic common share equal net earnings attributable to The Kroger Co. less income allocated to participating securities divided by the weighted-average number of common shares outstanding. Net earnings attributable to The Kroger Co. per diluted common share equal net earnings attributable to The Kroger Co. less income allocated to participating securities divided by the weighted-average number of common shares outstanding, after giving effect to dilutive stock options. The following table provides a reconciliation of net earnings attributable to The Kroger Co. and shares used in calculating net earnings attributable to The Kroger Co. per basic common share to those used in calculating net earnings attributable to The Kroger Co. per diluted common share:

	Second Quarter Ended August 13, 2016			Second Quarter Ended August 15, 2015		
	Earnings (Numerator)	Shares (Denominator)	Per Share Amount	Earnings (Numerator)	Shares (Denominator)	Per Share Amount
Net earnings attributable to The Kroger Co. per basic common share	\$ 380	943	\$ 0.40	\$ 429	963	\$ 0.44
Dilutive effect of stock options		16			14	
Net earnings attributable to The Kroger Co. per diluted common share	\$ 380	959	\$ 0.40	\$ 429	977	\$ 0.44
	Two Quarters Ended August 13, 2016			Two Quarters Ended August 15, 2015		
	Earnings (Numerator)	Shares (Denominator)	Per Share Amount	Earnings (Numerator)	Shares (Denominator)	Per Share Amount
Net earnings attributable to The Kroger Co. per basic common share	\$ 1,070	949	\$ 1.13	\$ 1,042	966	\$ 1.08
Dilutive effect of stock options		17			15	

Edgar Filing: KROGER CO - Form 10-Q

Net earnings attributable to The Kroger Co. per diluted common share

\$	1,070	966	\$	1.11	\$	1,042	981	\$	1.06
----	-------	-----	----	------	----	-------	-----	----	------

The Company had combined undistributed and distributed earnings to participating securities totaling \$3 in the second quarter of 2016 and \$4 in the second quarter of 2015. For the first two quarters of 2016 and 2015, the Company had combined undistributed and distributed earnings to participating securities of \$9 and \$10, respectively.

The Company had options outstanding for approximately 8 million and 2 million shares during the second quarters of 2016 and 2015, respectively, that were excluded from the computations of net earnings per diluted common share because their inclusion would have had an anti-dilutive effect on net earnings per share. The Company had options outstanding for approximately 6 million shares in the first two quarters of 2016 and 1 million shares in the first two quarters of 2015 that were excluded from the computations of net earnings per diluted common share because their inclusion would have had an anti-dilutive effect on earnings per share.

6. RECENTLY ADOPTED ACCOUNTING STANDARDS

In September 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. This amendment eliminates the requirement to retrospectively account for adjustments made to provisional amounts recognized in a business combination. This amendment became effective for the Company beginning January 31, 2016, and was adopted prospectively in accordance with the standard. The adoption of this amendment did not have an effect on the Company's Consolidated Balance Sheets or Consolidated Statements of Operations.

During the second quarter of 2016, the Company adopted ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. This amendment addresses several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. As a result of the adoption, the Company recognized \$23 and \$39 of excess tax benefits related to share-based payments in its provision for income taxes for the second quarter and first two quarters ended August 13, 2016, respectively. These items were historically recorded in additional paid-in capital. In addition, for the first two quarters of 2016, cash flows related to excess tax benefits are classified as an operating activity. Cash paid on employees' behalf related to shares withheld for tax purposes is classified as a financing activity. Retrospective application of the cash flow presentation requirements resulted in increases to both Net cash provided by operating activities and Net cash used by financing activities of \$55 for the first two quarters of 2016 and \$77 for the first two quarters of 2015. The Company's stock compensation expense continues to reflect estimated forfeitures.

7. RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers, as amended by several subsequent ASUs, which provides guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. Per ASU 2015-14, Deferral of Effective Date, this guidance will be effective for the Company in the first quarter of its fiscal year ending February 2, 2019. Early adoption is permitted as of the first quarter of the Company's fiscal year ending February 3, 2018. The Company is currently in the process of evaluating the effect of adoption of this ASU on its Consolidated Financial Statements.

In November 2015, the FASB issued ASU 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes. This amendment requires deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. This guidance will be effective for the fiscal year ending February 3, 2018. Early adoption is permitted. The implementation of this amendment will not have an effect on the Company's Consolidated Statements of Operations and will not have a significant effect on the Company's Consolidated Balance Sheets.

In February 2016, the FASB issued ASU 2016-02, Leases, which provides guidance for the recognition of lease agreements. The standard's core principle is that a company will now recognize most leases on its balance sheet as lease liabilities with corresponding right-of-use assets. This guidance will be effective in the first quarter of fiscal year ending February 1, 2020. Early adoption is permitted. The adoption of this ASU will result in a significant increase to the Company's Consolidated Balance Sheets for lease liabilities and right-of-use assets, and the Company is currently evaluating the other effects of adoption of this ASU on its Consolidated Financial Statements.

8. COMMITMENTS AND CONTINGENCIES

The Company continuously evaluates contingencies based upon the best available evidence.

The Company believes that allowances for loss have been provided to the extent necessary and that its assessment of contingencies is reasonable. To the extent that resolution of contingencies results in amounts that vary from the Company's estimates, future earnings will be charged or credited.

Litigation Various claims and lawsuits arising in the normal course of business, including suits charging violations of certain antitrust, wage and hour, or civil rights laws, as well as product liability cases, are pending against the Company. Some of these suits purport or have been determined to be class actions and/or seek substantial damages. Any damages that may be awarded in antitrust cases will be automatically trebled. Although it is not possible at this time to evaluate the merits of all of these claims and lawsuits, nor their likelihood of success, the Company is of the belief that any resulting liability will not have a material effect on the Company's financial position, results of operations, or cash flows.

The Company continually evaluates its exposure to loss contingencies arising from pending or threatened litigation and believes it has made provisions where it is reasonably possible to estimate and where an adverse outcome is probable. Nonetheless, assessing and predicting the outcomes of these matters involve substantial uncertainties. Management currently believes that the aggregate range of loss for the Company's exposure is not material to the Company. It remains possible that despite management's current belief, material differences in actual outcomes or changes in management's evaluation or predictions could arise that could have a material adverse effect on the Company's financial condition, results of operations, or cash flows.

9. FAIR VALUE MEASUREMENTS

GAAP establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The three levels of the fair value hierarchy defined in the standards are as follows:

Level 1 Quoted prices are available in active markets for identical assets or liabilities;

Level 2 Pricing inputs are other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable;

Level 3 Unobservable pricing inputs in which little or no market activity exists, therefore requiring an entity to develop its own assumptions about the assumptions that market participants would use in pricing an asset or liability.

For items carried at (or adjusted to) fair value in the Consolidated Financial Statements, the following tables summarize the fair value of these instruments at August 13, 2016 and January 30, 2016:

August 13, 2016 Fair Value Measurements Using

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Trading Securities	\$ 50	\$	\$	\$ 50
Long-Lived Assets			337	337
Interest Rate Hedges		(182)		(182)
Total	\$ 50	\$ (182)	\$ 337	\$ 205

January 30, 2016 Fair Value Measurements Using

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Trading Securities	\$ 48	\$	\$	\$ 48
Available-For-Sale Securities	41			41
Long-Lived Assets			7	7
Interest Rate Hedges		(26)		(26)

Edgar Filing: KROGER CO - Form 10-Q

Total	\$	89	\$	(26)	\$	7	\$	70
-------	----	----	----	------	----	---	----	----

In the first two quarters of 2016, the Company sold all available-for-sale securities for a gain of \$27, which was recorded to Operating, general and administrative within the Consolidated Statements of Operations.

The Company values interest rate hedges using observable forward yield curves. These forward yield curves are classified as Level 2 inputs.

During the second quarter of 2016, the Company entered into agreements with a third party. As part of the consideration for entering these agreements, we received a financial instrument that derives its value from the third party's business operations. We used the Monte-Carlo simulation method to determine the fair value of this financial instrument. The Monte-Carlo simulation is a generally accepted statistical technique used to generate a defined number of valuation paths in order to develop a reasonable estimate of the fair value of this financial instrument. The assumptions used in the Monte-Carlo simulation are classified as Level 3 inputs. The financial instrument was valued at \$335 and recorded in Other assets within the Consolidated Balance Sheets. As the financial instrument was obtained in exchange for certain obligations, we also recognized offsetting deferred revenue liabilities in Other current liabilities and Other long-term liabilities within the Consolidated Balance Sheets. The deferred revenue will be amortized to Sales within the Consolidated Statements of Operations over the term of the agreements.

Fair value measurements of non-financial assets and non-financial liabilities are primarily used in the impairment analysis of goodwill, other intangible assets, and long-lived assets, and in the valuation of store lease exit costs. The Company reviews goodwill and other intangible assets for impairment annually, during the fourth quarter of each fiscal year, and as circumstances indicate the possibility of impairment. See Note 3 to the Consolidated Financial Statements in the Annual Report on Form 10-K for the fiscal year ended January 30, 2016 for further discussion related to the Company's carrying value of goodwill. Long-lived assets and store lease exit costs were measured at fair value on a nonrecurring basis using Level 3 inputs as defined in the fair value hierarchy. See Note 1 to the Consolidated Financial Statements in the Annual Report on Form 10-K for the fiscal year ended January 30, 2016 for further discussion of the Company's policies regarding the valuation of long-lived assets and store lease exit costs. For the first two quarters of 2016, long-lived assets with a carrying amount of \$13 were written down to their fair value of \$2 resulting in an impairment charge of \$11. For the first two quarters of 2015, long-lived assets with a carrying amount of \$30 were written down to their fair value of \$4 resulting in an impairment charge of \$26. In fiscal year 2015, long-lived assets with a carrying amount of \$53 were written down to their fair value of \$7, resulting in an impairment charge of \$46.

Fair Value of Other Financial Instruments

Current and Long-term Debt

The fair value of the Company's long-term debt, including current maturities, was estimated based on the quoted market prices for the same or similar issues adjusted for illiquidity based on available market evidence. If quoted market prices were not available, the fair value was based upon the net present value of the future cash flow using the forward interest rate yield curve in effect at August 13, 2016 and January 30, 2016. At August 13, 2016, the fair value of total debt was \$12,956 compared to a carrying value of \$11,667. At January 30, 2016, the fair value of total debt was \$12,344 compared to a carrying value of \$11,396.

Cash and Temporary Cash Investments, Store Deposits In-Transit, Receivables, Prepaid and Other Current Assets, Trade Accounts Payable, Accrued Salaries and Wages and Other Current Liabilities

The carrying amounts of these items approximated fair value.

Other Assets

The fair values of these investments were estimated based on quoted market prices for those or similar investments, or estimated cash flows, if appropriate. At August 13, 2016 and January 30, 2016, the carrying and fair value of long-term investments for which fair value is determinable was \$132 and \$128, respectively. At August 13, 2016 and January 30, 2016, the carrying value of notes receivable for which fair value is determinable was \$184 and \$145, respectively.

10. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table represents the changes in AOCI by component for the first two quarters of 2015 and 2016:

	Cash Flow Hedging Activities(1)	Available for sale Securities(1)	Pension and Postretirement Defined Benefit Plans(1)	Total(1)
Balance at January 31, 2015	\$ (49)	\$ 17	\$ (780)	\$ (812)
OCI before reclassifications(2)	17	7		24
Amounts reclassified out of AOCI(3)			29	29
Net current-period OCI	17	7	29	53
Balance at August 15, 2015	\$ (32)	\$ 24	\$ (751)	\$ (759)
Balance at January 30, 2016	\$ (51)	\$ 20	\$ (649)	\$ (680)
OCI before reclassifications(2)	(98)	(6)		(104)
Amounts reclassified out of AOCI(3)	1	(14)	15	2
Net current-period OCI	(97)	(20)	15	(102)
Balance at August 13, 2016	\$ (148)	\$	\$ (634)	\$ (782)

(1) All amounts are net of tax.

(2) Net of tax of \$10 and \$4 for cash flow hedging activities and available for sale securities, respectively, for the first two quarters of 2015. Net of tax of \$(58) and \$(3) for cash flow hedging activities and available for sale securities, respectively, for the first two quarters of 2016.

(3) Net of tax of \$17 for pension and postretirement defined benefit plans for the first two quarters of 2015. Net of tax of \$(13) for available for sale securities and \$10 for pension and postretirement defined benefit plans for the first two quarters of 2016.

Edgar Filing: KROGER CO - Form 10-Q

The following table represents the items reclassified out of AOCI and the related tax effects for the second quarter and first two quarters of 2016 and 2015:

	Second Quarter Ended		Two Quarters Ended	
	August 13, 2016	August 15, 2015	August 13, 2016	August 15, 2015
Gains on cash flow hedging activities				
Amortization of gains and losses on cash flow hedging activities(1)	\$	\$	\$ 1	\$
Tax expense				
Net of tax			1	
Available for sale securities				
Realized gains and losses on available for sale securities(2)		(27)		(27)
Tax expense		13		13
Net of tax		(14)		(14)
Pension and postretirement defined benefit plan items				
Amortization of amounts included in net periodic pension expense(3)		11	21	25
Tax expense		(5)	(8)	(10)
Net of tax		6	13	15
Total reclassifications, net of tax	\$	(8)	\$ 13	\$ 2
			\$	29

(1) Reclassified from AOCI into interest expense.

(2) Reclassified from AOCI into operating, general and administrative expense.

(3) Reclassified from AOCI into merchandise costs and operating, general and administrative expense. These components are included in the computation of net periodic pension expense (see Note 4 to the Company's Consolidated Financial Statements for additional details).

11. INCOME TAXES

The effective income tax rate was 31.1% in the second quarter of 2016, compared to 34.4% for the second quarter of 2015. The effective income tax rate was 32.7% for the first two quarters of 2016, compared to 34.5% for the first two quarters of 2015. The effective income tax rate for the second quarter of 2016 and the first two quarters of 2016 differed from the federal statutory rate primarily due to the recognition of excess tax benefits related to share-based payments after the adoption of ASU 2016-09, which caused a reduction in income tax expense of \$23 in the second quarter of 2016 and \$39 in the first two quarters of 2016, and the benefit from tax credits and deductions, partially offset by the effect of state income taxes. Excess tax benefits related to share-based payments were historically recorded in additional paid-in capital prior to the adoption of ASU 2016-09. The effective income tax rate for the second quarter of 2015 and the first two quarters of 2015 differed from the federal statutory rate primarily due to the benefit from the favorable conclusion of certain tax audits and the benefit from tax credits and deductions, partially offset by the effect of state income taxes.

12. SUBSEQUENT EVENTS

Edgar Filing: KROGER CO - Form 10-Q

On September 2, 2016, the Company closed its merger with Modern HC Holdings, Inc. (ModernHEALTH) by purchasing all outstanding shares of ModernHEALTH for approximately \$390. The Company financed the transaction with commercial paper and is in the process of determining the purchase price allocation. ModernHEALTH is a leading specialty pharmacy.

On June 22, 2016, the Board of Directors approved a \$500 share repurchase program. On September 15, 2016, the Board of Directors approved an additional \$500 share repurchase authority to supplement the June 2016 program (together, the 2016 Share Repurchase Programs). During the third quarter of 2016, the Company used an additional \$124 of cash to repurchase 4 million common shares at an average price of \$30.89 per share. As of September 20, 2016, the Company has \$876 remaining under the 2016 Share Repurchase Programs.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following analysis should be read in conjunction with the Consolidated Financial Statements.

OVERVIEW

Notable items for the second quarter and first two quarters of 2016 are:

- Net earnings per diluted share of \$0.40 for the quarter and \$1.11 for the first two quarters of 2016.
- Net earnings for the second quarter and first two quarters of 2016 includes \$111 million (\$71 million after-tax) of charges to operating, general and administrative expenses related to the restructuring of certain pension obligations to help stabilize associates' future benefits (Second Quarter 2016 Adjusted Items).
- Adjusted net earnings per diluted share of \$0.47 for the quarter and \$1.18 for the first two quarters of 2016.
- Identical supermarket sales, excluding fuel, increased 1.7% for the quarter and 2.1% for the first two quarters of 2016.
- Increased number of households shopping with us, visits per household, and market share.
- Results include unfavorable pricing and cost effects of sales leveraging from transitioning to a challenging, deflationary operating environment.
- During the first two quarters of 2016, we returned \$1.3 billion to shareholders from share repurchases and dividend payments.

The following table provides a reconciliation of net earnings attributable to The Kroger Co. to adjusted net earnings attributable to The Kroger Co. and a reconciliation of net earnings attributable to The Kroger Co. per diluted common share to adjusted net earnings attributable to The

Edgar Filing: KROGER CO - Form 10-Q

Kroger Co. per diluted common share, for the second quarter and the first two quarters of 2016 and 2015 (\$ in millions, except per share amounts):

	Second Quarter Ended			Two Quarters Ended		
	August 13, 2016	August 15, 2015	Percentage Change	August 13, 2016	August 15, 2015	Percentage Change
Net earnings attributable to The Kroger Co.	\$ 383	\$ 433	(11.5)%	\$ 1,079	\$ 1,052	2.6%
Second Quarter 2016 Adjusted Items(1)(2)	71			71		
Adjusted net earnings attributable to The Kroger Co.	\$ 454	\$ 433	4.8%	\$ 1,150	\$ 1,052	9.3%
Net earnings attributable to The Kroger Co. per diluted common share	\$ 0.40	\$ 0.44	(9.1)%	\$ 1.11	\$ 1.06	4.7%
Second Quarter 2016 Adjusted Items(3)	0.07			0.07		
Adjusted net earnings attributable to The Kroger Co. per diluted common share	\$ 0.47	\$ 0.44	6.8%	\$ 1.18	\$ 1.06	11.3%
Average number of common shares used in diluted calculation	959	977		966	981	

(1) The amount presented represents the after-tax effect of the Adjusted Items.

(2) This pre-tax adjustment for the Second Quarter 2016 Adjusted Items were \$111 million.

(3) The amounts presented represent the net earnings per diluted common share effect of the Adjusted Items.

RESULTS OF OPERATIONS*Sales***Total Sales**

(\$ in millions)

	August 13, 2016	Second Quarter Ended Percentage Change	August 15, 2015	Percentage Change(2)	August 13, 2016	Two Quarters Ended Percentage Change	August 15, 2015	Percentage Change(3)
Total supermarket sales without fuel	\$ 22,153	7.2%	\$ 20,657	5.2%	\$ 51,688	7.7%	\$ 48,013	5.6%
Fuel sales	3,473	(13.4)%	4,009	(18.8)%	7,376	(14.1)%	8,582	(22.8)%
Other sales(1)	939	7.6%	873	17.2%	2,105	5.5%	1,995	19.8%
Total sales	\$ 26,565	4.0%	\$ 25,539	0.9%	\$ 61,169	4.4%	\$ 58,590	0.5%

(1) Other sales primarily relate to sales at convenience stores, excluding fuel; jewelry stores; food production plants to outside customers; variable interest entities; specialty pharmacy; in-store health clinics; digital coupon services; and online sales by Vitacost.com.

(2) This column represents the percentage increase in the second quarter of 2015, compared to the second quarter of 2014.

(3) This column represents the percentage increase in the first two quarters of 2015, compared to the first two quarters of 2014.

Total sales increased in the second quarter of 2016, compared to the second quarter of 2015, by 4.0%. The increase in total sales for the second quarter of 2016, compared to the second quarter of 2015, was primarily due to our increase in total supermarket sales, without fuel, partially offset by a decrease in fuel sales due to a decrease in the average retail fuel price of 17.5%. The increase in total supermarket sales without fuel for the second quarter of 2016, compared to second quarter of 2016, was primarily due to our identical supermarket sales increase, excluding fuel, of 1.7%, our merger with Roundy's and an increase in supermarket square footage. Identical supermarket sales, excluding fuel, for the second quarter of 2016, compared to the second quarter of 2015, increased primarily due to an increase in the number of households shopping with us and an increase in visits per household, partially offset by product cost deflation. Total fuel sales decreased 13.4% in the second quarter of 2016, compared to the second quarter of 2015, primarily due to a decrease in the average retail fuel price of 17.5%, partially offset by an increase in fuel gallons sold of 5.0%. The decrease in the average retail fuel price was caused by a decrease in the product cost of fuel.

Total sales increased in the first two quarters of 2016, compared to the first two quarters of 2015, by 4.4%. The increase in total sales for the first two quarters of 2016, compared to the first two quarters of 2015, was primarily due to our increase in total supermarket sales without fuel, partially offset by a decrease in fuel sales due to a decrease in the average retail fuel price of 18.4%. The increase in total supermarket sales, without fuel, for the first two quarters of 2016, compared to first two quarters of 2016, was primarily due to our identical supermarket sales increase, excluding fuel, of 2.1%, our merger with Roundy's and an increase in supermarket square footage. Identical supermarket sales,

Edgar Filing: KROGER CO - Form 10-Q

excluding fuel, for the first two quarters of 2016, compared to the first two quarters of 2015, increased primarily due to an increase in the number of households shopping with us and an increase in visits per household, partially offset by product cost deflation. Total fuel sales decreased 14.1% in the first two quarters of 2016, compared to the first two quarters of 2015, primarily due to a decrease in the average retail fuel price of 18.4%, partially offset by an increase in fuel gallons sold of 5.3%. The decrease in the average retail fuel price was caused by a decrease in the product cost of fuel.

We define a supermarket as identical when it has been in operation without expansion or relocation for five full quarters. Although identical supermarket sales is a relatively standard term, numerous methods exist for calculating identical supermarket sales growth. As a result, the method used by our management to calculate identical supermarket sales may differ from methods other companies use to calculate identical supermarket sales. We urge you to understand the methods used by other companies to calculate identical supermarket sales before comparing our identical supermarket sales to those of other such companies. Fuel discounts received at our fuel centers and earned based on in-store purchases are included in all of the identical supermarket sales results calculations illustrated below and reduce our identical supermarket sales results. Differences between total supermarket sales and identical supermarket sales primarily relate to changes in supermarket square footage. Identical supermarket sales include sales from all departments at identical multi-department stores and Roundy's stores that are identical as if they were part of the Company in the prior year. Our identical supermarket sales results are summarized in the table below. We used the identical supermarket dollar figures presented below to calculate percentage changes for the second quarter and first two quarters of 2016.

Identical Supermarket Sales

(\$ in millions)

	August 13, 2016	Percentage Change	Second Quarter August 15, 2015	Percentage Change(1)
Including fuel centers	\$ 23,938	(0.5)%	\$ 24,053	1.3%
Excluding fuel centers	\$ 21,264	1.7%	\$ 20,917	5.3%

(1) This column represents the percentage increase in identical supermarket sales in the second quarter of 2015, compared to the second quarter of 2014.

Identical Supermarket Sales

(\$ in millions)

	August 13, 2016	Percentage Change	Two Quarters Ended August 15, 2015	Percentage Change(1)
Including fuel centers	\$ 55,250	0.0%	\$ 55,251	0.9%
Excluding fuel centers	\$ 49,559	2.1%	\$ 48,544	5.5%

(1) This column represents the percentage increase in identical supermarket sales in the first two quarters of 2015, compared to the first two quarters of 2014.

Gross Margin and FIFO Gross Margin

Our gross margin rate, as a percentage of sales, was 22.09% for the second quarter of 2016, as compared to 21.44% for the second quarter of 2015. The increase in the gross margin rate, as a percentage of sales, in the second quarter of 2016, compared to the second quarter of 2015, resulted primarily from lower fuel sales, a lower LIFO charge and our merger with Roundy's due to its historically higher gross margin rate, partially offset by continued investments in lower prices for our customers, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment and increased warehousing, advertising and shrink costs, as a percentage of sales. Lower fuel sales increase our gross margin rate, as a percentage of sales, due to the very low gross margin rate, as a percentage of sales, on fuel sales compared to non-fuel sales.

Our gross margin rate, as a percentage of sales, was 22.57% for the first two quarters of 2016, as compared to 21.79% for the first two quarters of 2015. The increase in the gross margin rate, as a percentage of sales, in the first two quarters of 2016, compared to the first two quarters of 2015, resulted primarily from lower fuel sales, a lower LIFO charge and our merger with Roundy's due to its historically higher gross margin rate, partially offset by continued investments in lower prices for our customers, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment and increased warehousing, advertising and shrink costs, as a percentage of sales.

We calculate FIFO gross margin as sales less merchandise costs, including advertising, warehousing, and transportation expenses, but excluding the LIFO charge. Merchandise costs exclude depreciation and rent expenses. Our LIFO charge was \$12 million for the second quarter of 2016 compared to \$21 million for the second quarter of 2015. Our LIFO charge was \$27 million for the first two quarters of 2016 and \$48 million for the first two quarters of 2015. FIFO gross margin is a non-GAAP financial measure and should not be considered as an alternative to gross margin or any other GAAP measure of performance. FIFO gross margin should not be reviewed in isolation or considered as a substitute for our financial results as reported in accordance with GAAP. FIFO gross margin is an important measure used by management to evaluate merchandising and operational effectiveness. Management believes FIFO gross margin is a useful metric to investors and analysts because it measures our day-to-day merchandising and operational effectiveness.

Our FIFO gross margin rate was 22.13% for the second quarter of 2016, as compared to 21.52% for the second quarter of 2015. Our fuel sales lower our gross margin rate, as a percentage of sales, due to the very low gross margin rate on fuel sales as compared to non-fuel sales. Excluding the effect of fuel and Roundy's, our FIFO gross margin rate decreased 13 basis points in the second quarter of 2016, compared to the second quarter of 2015. The decrease in FIFO gross margin rate, excluding fuel and Roundy's, in the second quarter of 2016, compared to the second quarter of 2015, resulted primarily from continued investments in lower prices for our customers, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment and increased warehousing, advertising and shrink costs, as a percentage of sales.

Our FIFO gross margin rate was 22.61% for the first two quarters of 2016, as compared to 21.87% for the first two quarters of 2015. Excluding the effect of fuel and Roundy s, our FIFO gross margin rate decreased six basis points for the first two quarters of 2016, compared to the first two quarters of 2015. This decrease in FIFO gross margin rate, excluding fuel and Roundy s, in the first two quarters of 2016, compared to the first two quarters of 2015, resulted primarily from continued investments in lower prices for our customers, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment and increased warehousing, advertising and shrink costs, as a percentage of sales.

Operating, General and Administrative Expenses

OG&A expenses consist primarily of employee-related costs such as wages, healthcare benefit costs, retirement plan costs, utility, and credit card fees. Rent expense, depreciation and amortization expense, and interest expense are not included in OG&A.

OG&A expenses, as a percentage of sales, increased 91 basis points to 16.84% for the second quarter of 2016 from 15.93% for the second quarter of 2015. The increase in the OG&A rate in the second quarter of 2016, compared to the second quarter of 2015, resulted primarily from a decrease in fuel sales, the Second Quarter 2016 Adjusted Items, our merger with Roundy s due to its historically higher OG&A rate, compared to our other retail divisions, investments in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy and increases in credit card and healthcare benefit costs, partially offset by increased supermarket sales, productivity improvements, continuing cost control efforts and decreases in incentive plans and utility costs, as a percentage of sales. Our fuel sales lower our OG&A rate, as a percentage of sales, due to the very low OG&A rate, as a percentage of sales, of fuel sales compared to non-fuel sales. Excluding the effect of fuel, the Second Quarter 2016 Adjusted Items and Roundy s, our OG&A rate decreased 16 basis points in the second quarter of 2016, compared to the second quarter of 2015. The decrease in the adjusted OG&A rate, excluding fuel, the Second Quarter 2016 Adjusted Items and Roundy s, in the second quarter of 2016, compared to the second quarter of 2015, resulted primarily from increased supermarket sales, productivity improvements, continuing cost control efforts and decreases in incentive plans and utility costs, partially offset by investments in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy and increases in credit card and healthcare benefit costs, as a percentage of sales.

OG&A expenses, as a percentage of sales, increased 68 basis points to 16.76% for the first two quarters of 2016 from 16.08% for the first two quarters of 2015. The increase in the OG&A rate in the first two quarters of 2016, compared to the first two quarters of 2015, resulted primarily from a decrease in fuel sales, the Second Quarter 2016 Adjusted Items, our merger with Roundy s due to its historically higher OG&A rate, compared to our other retail divisions, investments in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy and increases in chargebacks related to credit card chip technology implementation, credit card and healthcare benefit costs, partially offset by increased supermarket sales, productivity improvements, effective cost controls and decreases in incentive plans and utility costs, as a percentage of sales. Excluding the effect of fuel, the Second Quarter 2016 Adjusted Items and Roundy s, our OG&A rate decreased 13 basis points in the first two quarters of 2016, compared to the first two quarters of 2015. The decrease in the adjusted OG&A rate, excluding fuel, the Second Quarter 2016 Adjusted Items and Roundy s, in the first two quarters of 2016, compared to the first two quarters of 2015, resulted primarily from increased supermarket sales, productivity improvements, effective cost controls and decreases in incentive plans and utility costs, partially offset by investments in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy and increases in chargebacks related to credit card chip technology implementation, credit card and healthcare benefit costs, as a percentage of sales.

Rent Expense

Rent expense was \$205 million in the second quarter of 2016 compared to \$155 million in the second quarter of 2015. Rent expense, as a percentage of sales, was 0.77% in the second quarter of 2016, compared to 0.61% in the second quarter of 2015. Rent expense was \$467 million in the first two quarters of 2016 compared to \$370 million in the first two quarters of 2015. Rent expense, as a percentage of sales, was 0.76% in the first two quarters of 2016, compared to 0.63% in the first two quarters of 2015. The increase in rent expense for both comparative periods, as a percentage of sales and total dollars, is primarily due to our merger with Roundy's and its higher volume of leased versus owned supermarkets, lower fuel sales increasing our rent expense rate, as a percentage of sales, and increasing retail square footage. Excluding Roundy's, rent expense, as a percentage of sales, increased 5 basis points in the second quarter of 2016, compared to the second quarter of 2015, and increased 1 basis point in the first two quarters of 2016, compared to the first two quarters of 2015. The increase for both comparative periods is due to lower fuel sales increasing our rent expense rate, as a percentage of sales, and increasing retail square footage.

Depreciation and Amortization Expense

Depreciation and amortization expense was \$525 million, or 1.98% of total sales, for the second quarter of 2016 compared to \$477 million, or 1.87% of total sales, for the second quarter of 2015. Depreciation and amortization expense was \$1.2 billion, or 1.99% of total sales, for the first two quarters of 2016 compared to \$1.1 billion, or 1.87% of total sales, for the first two quarters of 2015. The increase in our depreciation and amortization expense for both comparative periods, in total dollars and as a percentage of sales, was the result of additional depreciation on capital investments, excluding mergers and lease buyouts of \$3.8 billion, during the rolling four quarter period ending with the second quarter of 2016, and our merger with Roundy s.

Operating Profit and FIFO Operating Profit

Operating profit was \$665 million, or 2.50% of sales, for the second quarter of 2016, compared to \$774 million, or 3.03% of sales, for the second quarter of 2015. Operating profit, as a percentage of sales, decreased 53 basis points in the second quarter of 2016, compared to the second quarter of 2015, primarily due to continued investments in lower prices for our customers and in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy, the Second Quarter 2016 Adjusted Items, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment, our merger with Roundy s due to its historically lower operating profit rate, compared to our other retail divisions, and increases in credit card, warehousing, advertising, shrink and healthcare benefit costs, partially offset by increased supermarket sales, the effect of fuel sales, a lower LIFO charge, productivity improvements, continuing cost control efforts and decreases in incentive plans and utility costs, as a percentage of sales.

Operating profit was \$1.9 billion, or 3.05% of sales, for the first two quarters of 2016, compared to \$1.9 billion, or 3.20% of sales, for the first two quarters of 2015. Operating profit, as a percentage of sales, decreased 15 basis points in the first two quarters of 2016, compared to the first two quarters of 2015, primarily due to continued investments in lower prices for our customers and in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy, the Second Quarter 2016 Adjusted Items, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment, our merger with Roundy s due to its historically lower operating profit rate, compared to our other retail divisions, and increases in chargebacks related to credit card chip technology implementation, credit card, warehousing, advertising, shrink and healthcare benefit costs, partially offset by increased supermarket sales, the effect of fuel sales, a lower LIFO charge, productivity improvements, effective cost controls and decreases in incentive plans and utility costs, as a percentage of sales.

We calculate FIFO operating profit as operating profit excluding the LIFO charge. FIFO operating profit is a non-GAAP financial measure and should not be considered as an alternative to operating profit or any other GAAP measure of performance. FIFO operating profit should not be reviewed in isolation or considered as a substitute for our financial results as reported in accordance with GAAP. FIFO operating profit is an important measure used by management to evaluate operational effectiveness. Management believes FIFO operating profit is a useful metric to investors and analysts because it measures our day-to-day operational effectiveness. Since fuel discounts are earned based on in-store purchases, fuel operating profit does not include fuel discounts, which are allocated to our in-store supermarket location departments. We also derive OG&A expenses, rent and depreciation and amortization through the use of estimated allocations in the calculation of fuel operating profit.

Edgar Filing: KROGER CO - Form 10-Q

FIFO operating profit was \$677 million, or 2.55% of sales, for the second quarter of 2016, compared to \$795 million, or 3.11% of sales, for the second quarter of 2015. Fuel sales lower our operating profit rate due to the very low operating profit rate, as a percentage of sales, of fuel sales compared to non-fuel sales. FIFO operating profit, as a percentage of sales excluding fuel, the Second Quarter 2016 Adjusted Items and the effects of our Roundy's merger, decreased 7 basis points in the second quarter of 2016, compared to 2015. The decrease in our adjusted FIFO operating profit rate in the second quarter of 2016, compared to the second quarter of 2015, was primarily due to continued investments in lower prices for our customers and in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy, unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment and increases in credit card, warehousing, advertising, shrink and healthcare benefit costs, partially offset by increased supermarket sales, a lower LIFO charge, productivity improvements, continuing cost control efforts and decreases in incentive plans and utility costs, as a percentage of sales.

FIFO operating profit was \$1.9 billion, or 3.09% of sales, for the first two quarters of 2016, compared to \$1.9 billion, or 3.28% of sales, for the first two quarters of 2015. FIFO operating profit, as a percentage of sales excluding fuel, the Second Quarter 2016 Adjusted Items and the effects of our Roundy's merger, decreased 2 basis points in the first two quarters of 2016, compared to 2015. The decrease in our adjusted FIFO operating profit rate in the first two quarters of 2016 compared to the first two quarters of 2015, was primarily due to continued investments in lower prices for our customers and in additional labor hours, amidst a deflationary operating environment, to support unit growth and our Customer 1st Strategy, unfavorable pricing and cost effects of sales leveraging

from transitioning to a deflationary operating environment and increases in chargebacks related to credit card chip technology implementation, credit card, warehousing, advertising, shrink and healthcare benefit costs, partially offset by increased supermarket sales, the effect of fuel sales, a lower LIFO charge, productivity improvements, effective cost controls and decreases in incentive plans and utility costs, as a percentage of sales.

Income Taxes

The effective income tax rate was 31.1% in the second quarter of 2016, compared to 34.4% for the second quarter of 2015. The effective income tax rate was 32.7% for the first two quarters of 2016, compared to 34.5% for the first two quarters of 2015. The effective income tax rate for the second quarter of 2016 and the first two quarters of 2016 differed from the federal statutory rate primarily due to the recognition of excess tax benefits related to share-based payments after the adoption of ASU 2016-09, which caused a reduction in income tax expense of \$23 million in the second quarter of 2016 and \$39 million in the first two quarters of 2016, and the benefit from tax credits and deductions, partially offset by the effect of state income taxes. Excess tax benefits related to share-based payments were historically recorded in additional paid-in capital prior to the adoption of ASU 2016-09. The effective income tax rate for the second quarter of 2015 and the first two quarters of 2015 differed from the federal statutory rate primarily due to the benefit from the favorable conclusion of certain tax audits and the benefit from tax credits and deductions, partially offset by the effect of state income taxes.

Net Earnings and Net Earnings Per Diluted Share

Our net earnings are based on the factors discussed in the Results of Operations section.

Net earnings of \$0.40 per diluted share for the second quarter of 2016 represented a decrease of 9.1% from net earnings of \$0.44 per diluted share for the second quarter of 2015. Excluding the Second Quarter 2016 Adjusted Items, adjusted net earnings for second quarter 2016 totaled \$454 million, or \$0.47 per diluted share, compared to net earnings for the second quarter of 2015 of \$433 million, or \$0.44 per diluted share. The net earnings for the second quarter of 2015 do not include any adjusted items. We believe the adjusted net earnings per diluted share metric presents more accurate quarter-over-quarter and year-over-year comparisons for our financial results because the Second Quarter 2016 Adjusted Items were not the result of our normal operations. The 6.8% increase in adjusted net earnings per diluted share for the second quarter of 2016, compared to net earnings per diluted share for the second quarter of 2015, resulted primarily from increased earnings from fuel, a lower Last-In, First-Out (LIFO) charge, lower tax expense due to the adoption of a recently issued accounting standard and lower weighted average common shares outstanding due to common share repurchases, partially offset by lower non-fuel First-In, First Out (FIFO) operating profit primarily due to unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment.

For the first two quarters of 2016, net earnings totaled \$1.1 billion, or \$1.11 per diluted share, compared to \$1.1 billion, or \$1.06 per diluted share for the same period of 2015. Excluding the Second Quarter 2016 Adjusted Items, adjusted net earnings for the first two quarters of 2016 totaled \$1.2 billion, or \$1.18 per diluted share, compared to net earnings for the first two quarters of 2015 of \$1.1 billion, or \$1.06 per diluted share. The net earnings for the first two quarters of 2015 do not include any adjusted items. The 11.3% increase in adjusted net earnings per diluted share for the first two quarters of 2016, compared to net earnings per diluted share for the first two quarters of 2015, resulted primarily from an increase in non-fuel FIFO operating profit, increased earnings from fuel, a lower LIFO charge, lower income tax expense due to the adoption of a recently issued accounting standard and lower weighted average common shares outstanding due to common share repurchases, partially offset by unfavorable pricing and cost effects of sales leveraging from transitioning to a deflationary operating environment.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flow Information

Net cash provided by operating activities

We generated \$3.0 billion of cash from operating activities during the first two quarters of 2016 compared to \$2.8 billion during the first two quarters of 2015. The cash provided by operating activities came from net earnings including noncontrolling interests, adjusted for non-cash expenses, and changes in working capital. The cash provided from operating activities increased in the first two quarters of 2016 versus 2015, primarily due to an increase in net earnings including noncontrolling interests, higher depreciation and amortization and an increase in other long-term liabilities due to commitments arising from the restructuring of certain multi-employer pension plan obligations during the second quarter of 2016. Changes in working capital provided cash from operating activities of \$575 million in the first two quarters of 2016 and \$589 million in the first two quarters of 2015. The decrease in cash provided by

changes in working capital for the first two quarters of 2016, compared to the first two quarters of 2015, was primarily due to lower cash provided by trade accounts payable, partially offset by lower tax payments due to a 2015 tax deduction associated with tangible property regulations.

Net cash used by investing activities

We used \$1.9 billion of cash for investing activities during the first two quarters of 2016 compared to \$1.7 billion during the first two quarters of 2015. The amount of cash used for investing activities increased in the first two quarters of 2016 versus 2015, primarily due to increased cash payments for capital investments, partially offset by increased proceeds from the sale of assets.

Net cash used by financing activities

We used \$1.1 billion of cash for financing activities in the first two quarters of 2016 and 2015. The amount of cash used for financing activities for the first two quarters of 2016, compared to the first two quarters of 2015, decreased \$72 million primarily due to an increase in borrowings on commercial paper, offset by higher repurchases of our outstanding common shares.

Debt Management

As of August 13, 2016, we maintained a \$2.75 billion (with the ability to increase by \$750 million), unsecured revolving credit facility that, unless extended, terminates on June 30, 2019. Outstanding borrowings under the credit facility, the commercial paper borrowings, and some outstanding letters of credit, reduce funds available under the credit facility. As of August 13, 2016, we had \$1.3 billion of outstanding commercial paper and no borrowings under our credit facility. The outstanding letters of credit that reduce funds available under our credit facility totaled \$13 million as of August 13, 2016.

Our bank credit facility and the indentures underlying our publicly issued debt contain various restrictive covenants. As of August 13, 2016, we were in compliance with the financial covenants. Furthermore, management believes it is not reasonably likely that we will fail to comply with these financial covenants in the foreseeable future.

Total debt, including both the current and long-term portions of capital leases and lease-financing obligations, increased \$341 million as of August 13, 2016 compared to fiscal year end 2015 debt of \$12.1 billion. The increase in debt is primarily due to increased commercial paper borrowings.

Common Share Repurchase Program

Edgar Filing: KROGER CO - Form 10-Q

During the second quarter of 2016, we invested \$44 million to repurchase 1.2 million Kroger common shares at an average price of \$36.39 per share. For the first two quarters of 2016, we invested \$1.1 billion to repurchase 28.3 million Kroger common shares at an average price of \$37.87 per share. These shares were reacquired under two separate share repurchase programs. The first is a \$500 million share repurchase program authorized by our Board of Directors and announced on June 25, 2015. On March 10, 2016, our Board of Directors approved an additional \$500 million share repurchase authority to supplement the June 2015 program (together, the Share Repurchase Programs). The Share Repurchase Programs were exhausted during the first quarter of 2016. The second is a program that uses the cash proceeds from the exercises of stock options by participants in Kroger's stock option and long-term incentive plans as well as the associated tax benefits.

On June 22, 2016, our Board of Directors approved a \$500 million share repurchase program. On September 15, 2016, our Board of Directors approved an additional \$500 million share repurchase authority to supplement the June 2016 program (together, the 2016 Share Repurchase Programs). During the third quarter of 2016, the Company used an additional \$124 million of cash to repurchase 4 million common shares at an average price of \$30.89 per share. As of September 20, 2016, we have \$876 million remaining under the 2016 Share Repurchase Programs.

Liquidity Needs

We estimate our liquidity needs over the next twelve-month period to range from \$6.4 to \$6.9 billion, which includes anticipated requirements for working capital, capital expenditures, interest payments and scheduled principal payments of debt and commercial paper, offset by cash on hand at the end of the second quarter of 2016. Based on current operating trends, we believe that cash flows from operating activities and other sources of liquidity, including borrowings under our commercial paper program and bank credit facility, will be adequate to meet our liquidity needs for the next twelve months and for the foreseeable future beyond the next twelve months. We have approximately \$1.3 billion of commercial paper and \$1.3 billion of senior notes maturing in the next twelve

months, which is included in the \$6.4 to \$6.9 billion range of estimated liquidity needs. The commercial paper matures in the third quarter of 2016, \$800 million of senior notes mature in the third quarter of 2016 and \$450 million of senior notes mature in the fourth quarter of 2016. We expect to refinance this debt by issuing additional senior notes or commercial paper on favorable terms based on our past experience. We believe we have adequate coverage of our debt covenants to continue to maintain our current investment grade debt ratings and to respond effectively to competitive conditions.

CAPITAL INVESTMENTS

Capital investments, excluding mergers, acquisitions and the purchase of leased facilities, totaled \$1 billion for the second quarter of 2016, compared to \$812 million for the first quarter of 2015. Capital investments, excluding mergers, acquisitions and the purchase of leased facilities, totaled \$2.2 billion in the first two quarters of 2016 and \$1.7 billion in the first two quarters of 2015. Capital expenditures for the purchase of leased facilities totaled \$5 million for the first two quarters of 2016 compared to \$16 million for the first two quarters of 2015. During the rolling four quarter period ending with the second quarter of 2016, we opened, acquired, expanded, or relocated 232 supermarkets and also completed 149 major within-the-wall remodels. In the fourth quarter of 2015, we acquired 151 supermarkets due to our merger with Roundy s. Total supermarket square footage at the end of the second quarter of 2016 increased 7.6% from the end of the second quarter of 2015. Excluding mergers, acquisitions and operational closings, total supermarket square footage at the end of the second quarter of 2016 increased 2.6% over the end of the second quarter of 2015.

RETURN ON INVESTED CAPITAL

We calculate return on invested capital (ROIC) by dividing adjusted operating profit for the prior four quarters by the average invested capital. Adjusted operating profit is calculated by excluding certain items included in operating profit, and adding back our LIFO charge, depreciation and amortization and rent to our U.S. GAAP operating profit of the prior four quarters. Average invested capital is calculated as the sum of (i) the average of our total assets, (ii) the average LIFO reserve, (iii) the average accumulated depreciation and amortization and (iv) a rent factor equal to total rent for the last four quarters multiplied by a factor of eight; minus (i) the average taxes receivable, (ii) the average trade accounts payable, (iii) the average accrued salaries and wages and (iv) the average other current liabilities, excluding accrued income taxes. Averages are calculated for ROIC by adding the beginning balance of the first quarter and the ending balance of the fourth quarter, of the last four quarters, and dividing by two. We use a factor of eight for our total rent as we believe this is a common factor used by our investors, analysts and rating agencies. ROIC is a non-GAAP financial measure of performance. ROIC should not be reviewed in isolation or considered as a substitute for our financial results as reported in accordance with GAAP. ROIC is an important measure used by management to evaluate our investment returns on capital. Management believes ROIC is a useful metric to investors and analysts because it measures how effectively we are deploying our assets.

Although ROIC is a relatively standard financial term, numerous methods exist for calculating a company s ROIC. As a result, the method used by our management to calculate ROIC may differ from methods other companies use to calculate their ROIC. We urge you to understand the methods used by other companies to calculate their ROIC before comparing our ROIC to that of such other companies.

Edgar Filing: KROGER CO - Form 10-Q

The following table provides a calculation of return on invested capital on a rolling four quarters basis ended August 13, 2016 and August 15, 2015. The August 13, 2016 calculation of return on invested capital excludes the financial position and results for the Roundy's transaction.

	Rolling Four Quarters Ended (\$ in millions)	
	August 13, 2016	August 15, 2015
Return on Invested Capital		
Numerator		
Operating profit	\$ 3,565	\$ 3,439
LIFO charge	7	141
Depreciation and amortization	2,211	2,020
Rent	820	694
Adjustments for pension plan agreements	111	
Other	(103)	
Adjusted operating profit	\$ 6,611	\$ 6,294
Denominator		
Average total assets	\$ 32,722	\$ 29,900
Average taxes receivable(1)	(64)	(36)
Average LIFO reserve	1,297	1,222
Average accumulated depreciation and amortization	18,333	16,884
Average trade accounts payable	(5,492)	(5,169)
Average accrued salaries and wages	(1,218)	(1,175)
Average other current liabilities(2)	(3,326)	(2,966)
Adjustment for Roundy's transaction	(1,421)	
Rent x 8	6,560	5,552
Average invested capital	\$ 47,391	\$ 44,212
Return on Invested Capital	13.95%	14.24%

(1) As of August 13, 2016 and August 15, 2015, taxes receivable were \$79 million and \$48 million, respectively.

(2) As of August 13, 2016 and August 15, 2015, other current liabilities did not include accrued income taxes. Accrued income taxes are removed from other current liabilities in the calculation of average invested capital.

CRITICAL ACCOUNTING POLICIES

We have chosen accounting policies that we believe are appropriate to report accurately and fairly our operating results and financial position, and we apply those accounting policies in a consistent manner. Our critical accounting policies are summarized in our Annual Report on Form 10-K for the fiscal year ended January 30, 2016.

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. We base our estimates on historical experience and other factors we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could vary from those estimates.

RECENTLY ADOPTED ACCOUNTING STANDARDS

In September 2015, the FASB issued ASU 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments*. This amendment eliminates the requirement to retrospectively account for adjustments made to provisional amounts recognized in a business combination. This amendment became effective for us beginning January 31, 2016, and was adopted prospectively in accordance with the standard. The adoption of this amendment did not have an effect on our Consolidated Balance Sheets or Consolidated Statements of Operations.

During the second quarter of 2016, we adopted ASU 2016-09, *Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. This amendment addresses several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. As a result of the adoption, we recognized \$23 million and \$39 million of excess tax benefits related to share-based payments in our provision for income taxes for the second quarter and first two quarters ended August 13, 2016. These items were historically recorded in additional paid-in capital. In addition, for the first two quarters of 2016, cash flows related to excess tax benefits are classified as an operating activity. Cash paid on employees' behalf related to shares withheld for tax purposes is classified as a financing activity. Retrospective application of the cash flow presentation requirements resulted in increases to both *Net cash provided by operating activities* and *Net cash used by financing activities* of \$55 million for the first two quarters of 2016 and \$77 million for the first two quarters of 2015. Our stock compensation expense continues to reflect estimated forfeitures.

RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers*, which provides guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. Per ASU 2015-14, *Deferral of Effective Date*, this guidance will be effective for us in the first quarter of our fiscal year ending February 2, 2019. Early adoption is permitted as of the first quarter of our fiscal year ending February 3, 2018. We are currently in the process of evaluating the effect of adoption of this ASU on our Consolidated Financial Statements.

In November 2015, the FASB issued ASU 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes*. This amendment requires deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. This guidance will be effective for our fiscal year ending February 3, 2018. Early adoption is permitted. The implementation of this amendment will not have an effect on our Consolidated Statements of Operations and will not have a significant effect on our Consolidated Balance Sheets.

In February 2016, the FASB issued ASU 2016-02, *Leases*, which provides guidance for the recognition of lease agreements. The standard's core principle is that a company will now recognize most leases on its balance sheet as lease liabilities with corresponding right-of-use assets. This guidance will be effective for us in the first quarter of fiscal year ending February 1, 2020. Early adoption is permitted. The adoption of this ASU will result in a significant increase to our Consolidated Balance Sheets for lease liabilities and right-of-use assets, and we are currently evaluating the other effects of adoption of this ASU on our Consolidated Financial Statements. We believe our current off-balance sheet leasing commitments are reflected in our investment grade debt rating.

OUTLOOK

This discussion and analysis contains certain forward-looking statements about our future performance. These statements are based on management's assumptions and beliefs in light of the information currently available to it. Such statements are indicated by words such as comfortable, committed, will, expect, goal, should, intend, target, believe, anticipate, plan, and similar words or phrases. These statements are subject to uncertainties and other factors that could cause actual results to differ materially. These include the specific risk factors identified in Risk Factors and Outlook in our Annual Report on Form 10-K for our last fiscal year and any subsequent filings, as well as those identified below.

Statements elsewhere in this report and below regarding our expectations, projections, beliefs, intentions or strategies are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. While we believe that the statements are accurate, uncertainties about the general economy, our labor relations, our ability to execute our plans on a timely basis and other uncertainties described below could cause actual results to differ materially.

- We expect net earnings to be \$2.03 to \$2.13 per diluted share in 2016. Our 2016 adjusted net earnings per diluted share guidance range is \$2.10 to \$2.20, which excludes the \$0.07 charge from our commitment to restructure certain multi-employer pension obligations. Over the long-term, we expect to achieve our net earnings per diluted share growth rate guidance of 8% to 11%, plus a growing dividend.
- We expect identical supermarket sales growth, excluding fuel, for the remainder of 2016 to be in the 0.5% to 1.5% range, which is 1.4% to 1.8% for the full year.
- We expect full-year FIFO operating margin in 2016, excluding fuel, to decline slightly compared to 2015 results.
- We expect capital investments, excluding mergers, acquisitions and purchases of leased facilities, to be \$3.6 to \$3.9 billion for 2016 and for 2017. For 2016, these capital investments include approximately 85 major projects covering new stores, expansions and relocations; 150-170 major remodels; and other investments including minor remodels and technology and infrastructure to support our Customer 1st business strategy.
- For 2016, we expect supermarket square footage growth of approximately 2.9% to 3.3% before mergers, acquisitions and operational closings.
- We expect 2016 year-end ROIC to decrease compared to the fiscal 2015 result, excluding Roundy's and ModernHEALTH.

- We expect the 2016 tax rate to be approximately 35%, excluding the effect of early adopting ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting and the resolution of certain tax items.
- For 2016, we anticipate product cost deflation, excluding fuel, through early 2017. We also expect an annualized LIFO charge of approximately \$50 million, primarily related to our pharmacy inventory.
- We expect 2016 Company-sponsored pension plans expense to be approximately \$80 million. We do not expect to make a cash contribution in 2016.
- For 2016, we expect to contribute \$260 million to multi-employer pension funds, excluding the multi-employer pension commitment entered into during the second quarter of 2016. We continue to evaluate and address our potential exposure to under-funded multi-employer pension plans. Although these liabilities are not a direct obligation or liability for Kroger, any new agreements that would commit us to fund certain multi-employer plans will be expensed when our commitment is probable and an estimate can be made.
- We are currently negotiating agreements with UFCW for Fry's in Arizona and for store associates in Atlanta and Michigan. We are also negotiating an agreement with the Teamsters for our Roundy's distribution center in Wisconsin. Negotiations this year will be challenging as we must have competitive cost structures in each market while meeting our associates' needs for solid wages and good quality, affordable health care and retirement benefits. Also, continued long term financial viability of our current Taft Hartley pension plan participation is important to address.

Various uncertainties and other factors could cause actual results to differ materially from those contained in the forward-looking statements. These include:

- The extent to which our sources of liquidity are sufficient to meet our requirements may be affected by the state of the financial markets and the effect that such condition has on our ability to issue commercial paper at acceptable rates. Our ability to borrow under our committed lines of credit, including our bank credit facilities, could be impaired if one or more of our lenders under those lines is unwilling or unable to honor its contractual obligation to lend to us, or in the event that natural disasters or weather conditions interfere with the ability of our lenders to lend to us. Our ability to refinance maturing debt may be affected by the state of the financial markets.

- Our ability to achieve sales, earnings and cash flow goals may be affected by: labor negotiations or disputes; changes in the types and numbers of businesses that compete with us; pricing and promotional activities of existing and new competitors, including non-traditional competitors, and the aggressiveness of that competition; our response to these actions; the state of the economy, including interest rates, the inflationary and deflationary trends in certain commodities, and the unemployment rate; the effect that fuel costs have on consumer spending; volatility of fuel margins; changes in government-funded benefit programs; manufacturing commodity costs; diesel fuel costs related to our logistics operations; trends in consumer spending; the extent to which our customers exercise caution in their purchasing in response to economic conditions; the inconsistent pace of the economic recovery; changes in inflation or deflation in product and operating costs; stock repurchases; our ability to retain pharmacy sales from third party payors; consolidation in the healthcare industry, including pharmacy benefit managers; our ability to negotiate modifications to multi-employer pension plans; natural disasters or adverse weather conditions; the potential costs and risks associated with potential cyber-attacks or data security breaches; the success of our future growth plans; and the successful integration of Harris Teeter and Roundy s. Our ability to achieve sales and earnings goals may also be affected by our ability to manage the factors identified above. Our ability to execute our financial strategy may be affected by our ability to generate cash flow.

- During the first three quarters of each fiscal year, our LIFO charge and the recognition of LIFO expense is affected primarily by estimated year-end changes in product costs. Our fiscal year LIFO charge is affected primarily by changes in product costs at year-end.

- If actual results differ significantly from anticipated future results for certain reporting units including variable interest entities, an impairment loss for any excess of the carrying value of the reporting units goodwill over the implied fair value would have to be recognized.

- Our effective tax rate may differ from the expected rate due to changes in laws, the status of pending items with various taxing authorities, and the deductibility of certain expenses.

- Changes in our product mix may negatively affect certain financial indicators. For example, we continue to add supermarket fuel centers to our store base. Since fuel generates lower profit margins than our supermarket sales, we expect to see our FIFO gross margins decline as fuel sales increase.

We cannot fully foresee the effects of changes in economic conditions on Kroger's business.

Other factors and assumptions not identified above could also cause actual results to differ materially from those set forth in the forward-looking information. Accordingly, actual events and results may vary significantly from those included in, contemplated or implied by forward-looking statements made by us or our representatives. We undertake no obligation to update the forward-looking information contained in this filing.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes in our exposure to market risk from the information provided in Item 7A. Quantitative and Qualitative Disclosures About Market Risk in our Annual Report on Form 10-K for the fiscal year ended January 30, 2016.

Item 4. Controls and Procedures.

The Chief Executive Officer and the Chief Financial Officer, together with a disclosure review committee appointed by the Chief Executive Officer, evaluated Kroger's disclosure controls and procedures as of the quarter ended August 13, 2016, the end of the period covered by this report. Based on that evaluation, Kroger's Chief Executive Officer and Chief Financial Officer concluded that Kroger's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15(d)-15(e) of the Exchange Act) were effective as of the end of the period covered by this report to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

In connection with the evaluation described above, there was no change in Kroger's internal control over financial reporting during the quarter ended August 13, 2016, that has materially affected, or is reasonably likely to materially affect, Kroger's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

Various claims and lawsuits arising in the normal course of business, including suits charging violations of certain antitrust, wage and hour, or civil rights laws, as well as product liability cases, are pending against the Company. Some of these suits purport or have been determined to be class actions and/or seek substantial damages. Any damages that may be awarded in antitrust cases will be automatically trebled. Although it is not possible at this time to evaluate the merits of all of these claims and lawsuits, nor their likelihood of success, the Company is of the belief that any resulting liability will not have a material adverse effect on the Company's financial position, results of operations, or cash flows.

The Company continually evaluates its exposure to loss contingencies arising from pending or threatened litigation and believes it has made provisions where it is possible to reasonably estimate and where an adverse outcome is probable. Nonetheless, assessing and predicting the outcomes of these matters involve substantial uncertainties. It remains possible that despite management's current belief, material differences in actual outcomes or changes in management's evaluation or predictions could arise that could have a material adverse impact on the Company's financial condition, results of operations, or cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c)

ISSUER PURCHASES OF EQUITY SECURITIES

Period(1)	Total Number of Shares Purchased(2)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(3)	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(4) (in millions)
First four weeks				
May 22, 2016 to June 18, 2016	76,215	\$ 35.87	76,215	\$ 500
Second four weeks				
June 19, 2016 to July 16, 2016	1,676,260	\$ 36.61	516,511	\$ 500
Third four weeks				
July 17, 2016 to August 13, 2016	619,781	\$ 36.30	619,781	\$ 500
Total	2,372,256	\$ 36.50	1,212,507	\$ 500

(1) The reported periods conform to our fiscal calendar composed of thirteen 28-day periods. The second quarter of 2016 contained three 28-day periods.

(2) Includes (i) shares repurchased under a \$500 million share repurchase program authorized by the Board of Directors and announced on June 25, 2015 and the supplemental \$500 million of share repurchase authority approved by the Board of Directors and announced on March 10, 2016 (together, the Share Repurchase Programs), (ii) shares repurchased under a program announced on December 6, 1999 to repurchase common shares to reduce dilution resulting from our employee stock option and long-term incentive plans, under which repurchases are limited to proceeds received from exercises of stock options and the tax benefits associated therewith (1999 Repurchase Program), and (iii) 1,159,749 shares that were surrendered to the Company by participants under our long-term incentive plans to pay for taxes on restricted stock awards.

(3) Represents shares repurchased under the Share Repurchase Programs and the 1999 Repurchase Program.

(4) On June 22, 2016, our Board of Directors approved a new \$500 million share repurchase program, and no repurchases were made under this program during the second quarter of 2016. On September 15, 2016, our Board of Directors approved an additional \$500 million share repurchase authority to supplement the June 2016 program (together, the 2016 Share Repurchase Programs). The amounts shown in this column reflect the amount remaining

under the 2016 Share Repurchase Programs as of the specified period end dates. Amounts available under the 1999 Repurchase Program are dependent upon option exercise activity. The 2016 Share Repurchase Programs and the 1999 Repurchase Program do not have an expiration date but may be terminated by our Board of Directors at any time.

Item 6. Exhibits.

- EXHIBIT 3.1 - Amended Articles of Incorporation are hereby incorporated by reference to Exhibit 3.1 of the Company's Quarterly Report on Form 10-Q for the quarter ended May 22, 2010, as amended by the Amendment to Amended Articles of Incorporation, which is hereby incorporated by reference to Exhibit 3.1 of the Company's Quarterly Report on Form 10-Q for the quarter ended May 23 2015.
- EXHIBIT 3.2 - The Company's regulations are hereby incorporated by reference to Exhibit 3.2 of the Company's Quarterly Report on Form 10-Q for the quarter ended May 26, 2007.
- EXHIBIT 4.1 - Instruments defining the rights of holders of long-term debt of the Company and its subsidiaries are not filed as Exhibits because the amount of debt under each instrument is less than 10% of the consolidated assets of the Company. The Company undertakes to file these instruments with the SEC upon request.
- EXHIBIT 10.1* - Form of Performance Unit Agreement Under Long-Term Incentive Plans.
- EXHIBIT 31.1 - Rule 13a-14(a) / 15d-14(a) Certifications - Chief Executive Officer.
- EXHIBIT 31.2 - Rule 13a-14(a) / 15d-14(a) Certifications - Chief Financial Officer.
- EXHIBIT 32.1 - Section 1350 Certifications.
- EXHIBIT 99.1 - Additional Exhibit - Statement of Computation of Ratio of Earnings to Fixed Charges.
- EXHIBIT 101.INS - XBRL Instance Document.
- EXHIBIT 101.SCH - XBRL Taxonomy Extension Schema Document.
- EXHIBIT 101.CAL - XBRL Taxonomy Extension Calculation Linkbase Document.
- EXHIBIT 101.DEF - XBRL Taxonomy Extension Definition Linkbase Document.
- EXHIBIT 101.LAB - XBRL Taxonomy Extension Label Linkbase Document.
- EXHIBIT 101.PRE - XBRL Taxonomy Extension Presentation Linkbase Document.

* Management contract or compensatory plan or arrangement.
