Investment Description

- Linked to an equally weighted equity index basket comprised of the S&P 500® Index (50%) and the EURO STOXX 50® Index (50%).
 - Unlike ordinary debt securities, the securities do not pay interest or repay a fixed amount of principal at maturity. Instead, the securities provide for a Redemption Amount that may be greater than, equal to or less than the principal amount of the securities, depending on the performance of the Basket from the Starting Level to the Ending Level.
 - The Redemption Amount will reflect the following terms:
 - **If the value of the Basket increases:**
- You will receive the principal amount plus 125% participation in the upside performance of the Basket, subject to a maximum total return at maturity of 14% to 18% (to be determined on the Pricing Date) of the principal amount

- **If the value of the Basket does not change or decreases by not more than 10%:**

You will be repaid the principal amount

- **If the value of the Basket decreases by more than 10%:**

You will receive less than the principal amount and will have 1-to-1 downside exposure to the decrease in the value of the Basket in excess of 10%

- Investors may lose up to 90% of the principal amount

- Any positive return on the securities will be limited to the return represented by the Capped Value

- All payments on the securities are subject to the credit risk of CIBC, and you will have no ability to pursue the securities included in the Basket Components for payment; if CIBC defaults on its obligations, you could lose some or all of your investment

- No periodic interest payments or dividends

- No exchange listing; designed to be held to maturity

*To the extent that the Issuer makes any change to the expected Pricing Date or expected Issue Date, the Final Valuation Date and Stated Maturity Date may also be changed in the Issuer's discretion to ensure that the term of the securities remains the same.

The Issuer's estimated value of the securities on the date of the accompanying preliminary pricing supplement, based on the Issuer's internal pricing models, is expected to be between \$947.10 and \$974.90 per security. While the estimated value of the securities on the Pricing Date may differ from the estimated value set forth above, the Issuer does not expect it to differ significantly absent a material change in market conditions or other relevant factors. The final pricing supplement relating to the securities will set forth the Issuer's estimated value of the securities on the Pricing Date, which will not be less than \$947.10 per security. The estimated value of the securities is not an indication of actual profit to the Issuer or to any of the Issuer's affiliates, nor is it an indication of the price, if any, at which Wells Fargo Securities, LLC (Wells Fargo Securities) or any other person may be willing to buy the securities from you at any time after issuance. See The Estimated Value of the Securities in the accompanying preliminary pricing supplement.

Investing in the securities involves significant risks. See Selected Risk Considerations in this term sheet and Risk Factors beginning on page PRS-8 of the accompanying preliminary pricing supplement, page S-1 of the underlying supplement, page S-1 of the prospectus supplement and page 1 of the prospectus.

This introductory term sheet does not provide all of the information that an investor should consider prior to making an investment decision.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive on the Stated Maturity Date and the resulting pre-tax rate of return will depend on the actual Ending Level and Capped Value.

How the Redemption Amount Is Calculated

The Redemption Amount will be determined as follows:

- If the Ending Level is greater than the Starting Level, the Redemption Amount will be equal to the lesser of:

(i) \$1,000 *plus*

(ii) the Capped Value

- If the Ending Level is less than or equal to the Starting Level, but greater than or equal to the Threshold Level, the Redemption Amount will be equal to \$1,000

- If the Ending Level is less than the Threshold Level, the Redemption Amount will be equal to \$1,000 *minus*

In such a case, you will lose up to 90% of your principal amount.

How the Ending Level Is Calculated

The Ending Level will be calculated based on the weighted returns of the Basket Components and will be equal to the product of (i) 100 and (ii) an amount equal to 1 plus the sum of: (A) 50% of the Component Return of the SPX and (B) 50% of the Component Return of the SX5E.

The Component Return of a Basket Component will be equal to:

$$\frac{\text{Final Component Level} - \text{Initial Component Level}}{\text{Initial Component Level}}$$

Initial Component Level

where,

- the Initial Component Level will be the Closing Level of such Basket Component on the Pricing Date; and
- the Final Component Level will be the Closing Level of such Basket Component on the Final Valuation Date.
