Outlook for 2006:

Based upon the strong results and positive development in the third quarter of 2006, the outlook for the full year has been adjusted compared to the report for the second quarter of 2006.

The strong growth in mobile subscriptions gives Telenor a solid foundation for further growth in revenues. We expect a growth in reported revenues of around 35%.

We expect a continued high growth in EBITDA, in particular driven by the international mobile operations. Telenor will continue previously introduced initiatives and identify new means of improving cost efficiency.

We expect the EBITDA margin before other income and expenses for 2006 to be around 36%.

We expect high capital expenditure to continue, and capital expenditure as a proportion of revenues is expected to be around 20%.

Capital expenditure is expected to continue to be driven by high subscription growth within Telenor's mobile operations in emerging markets. A growing share of Telenor's revenues and profits is derived from operations outside Norway. Currency fluctuations may to an increasing extent influence the reported figures in Norwegian Krone.

Political risk, including regulatory conditions, may also influence the profits.
