Gilat' Selected by JSC NURSAT to Deploy Broadband Satellite  
Communications Solution

- SkyEdge II network and NetEdge Gateways will support connectivity services for corporate customers throughout Kazakhstan -

Petah Tikva, Israel, 21 February, 2012 -- Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced it was selected by JSC NURSAT, one of Kazakhstan's national satellite service providers, to deploy a broadband satellite IP network based on Gilat's advanced Sky Edge II System.

The SkyEdge II VSAT network will provide JSC NURSAT with an end-to-end solution for IP-connectivity and enable broadband communication services designed for advanced corporate users. The network is designed to link several regional centers in a multi-star topology to the two geographically redundant SkyEdge II hubs located in Almaty and Astana, and includes Gilat's NetEdge™ gateway solution which makes it possible to connect remote sites to regional centers with more efficient connectivity than mesh or SCPC solutions.

"Gilat's advanced platform will allow us to expand our network reach and capacity in an effort to meet the rising demand in corporate broadband connectivity services," said Kenes Shangereyev, General Manager, JSC NURSAT. "The platform's unique configuration, and ability to offer a cost effective means to manage satellite bandwidth, will enable us to offer a robust broadband network to our corporate customers, coupled with the highest quality service delivery."

"We are proud to be selected by JSC NURSAT for this important project, as it enables us to continue our support of Kazakhstan's growing demand for a broad and efficient satellite-based IP infrastructure," said Arie Rozichner, Gilat's Regional Vice President of Eurasia. "It is exciting to have our expertise in deploying such networks receive once again the industry's vote of confidence."

#### About JSC NUSAT

NURSAT is the leading telecommunications operator in Kazakhstan. The Company's satellite network covers more than 80 cities of the vast Republic. Along with its satellite channels, NURSAT owns fiber-optic and copper infrastructure that provides extra reliability and integrity for service provisioning. The Company's telecommunication nodes in Kazakhstan and its teleport in Moscow are integrated into one network, and its control Centre in Almaty allows supporting efficient monitoring and round-the-clock network operations. For more information visit NURSAT.

#### About Gilat

Gilat Satellite Networks Ltd. is a leading provider of products and professional services for satellite-based broadband communications networks worldwide. Gilat was founded in 1987 and has shipped over one million Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 22 sales and service offices worldwide. Gilat develops and markets an expansive range of broadband satellite solutions including high-performance VSATs under the SkyEdge™ and SkyEdge II brands, low-profile antennas for satcom-on-the-move, under the RaySat Antenna Systems and the StealthRay™ brands and next generation solid-state power amplifiers for mission-critical defense and broadcast satellite communications systems under the Wavestream brand. Gilat's wholly-owned subsidiary, Spacenet Inc., is a leading provider of managed network services in North America to the business and government segments.
