UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d)

of the Securities Exchange Act of 1934

For the Quarterly Period Ended June 30, 2008

Commission File Number 000-32627

(Exact name of registrant as specified in its charter)

Georgia
(State or other jurisdiction of

incorporation or organization)

P. O. Box 455, 1010 North Way, Darien, Georgia 31305

58-1423423
(IRS Employer

Identification No.)

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

(Address of principal executive offices) (Zip Code)

(912) 437-4141

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company.)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of July 31, 2008, 3,176,331 shares of the registrant's common stock, par value \$1.25 per share, were outstanding.

Southeastern Banking Corporation

Notes to Consolidated Financial Statements

(Unaudited)

1. Accounting and Reporting Policy for Interim Periods

The accompanying unaudited consolidated financial statements of Southeastern Banking Corporation and subsidiary (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. These statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statement presentation. In the opinion of management, all adjustments necessary for a fair presentation have been made. These adjustments, consisting of normal, recurring accruals, include estimates for various fringe benefits and other transactions normally determined or settled at year-end. Operating results for the quarter and six months ended June 30, 2008 are not necessarily indicative of trends or results to be expected for the full year 2008. The Company operates within one business segment, community banking, providing a full range of services to individual, corporate, and government customers in southeast Georgia and northeast Florida. The condensed consolidated balance sheet as of December 31, 2007 has been extracted from the audited financial statements included in the Company's 2007 Annual Report to Shareholders. For further information, refer to the consolidated financial statements and related notes included in the Annual Report on Form 10-K for the year ended December 31, 2007. There have been no significant changes to the Company's Accounting Policies as disclosed in the 2007 Form 10-K. Certain reclassifications, with no effect on total assets or net income, have been made to prior period amounts to conform to the current period presentation.

2. Recent Accounting Standards

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. SFAS 159 permits companies to fair value certain financial assets and liabilities on an instrument-by-instrument basis with changes in fair value recognized in earnings as they occur. The election to fair value a financial asset or liability is generally irrevocable. Adoption of this statement is not expected to have a material impact on the Company's financial position or results of operations.

In December 2007, the FASB issued SFAS No. 141R, Business Combinations, which revises SFAS 141 and changes multiple aspects of the accounting for business combinations. Under the guidance in SFAS 141R, the acquisition method must be used, which requires the acquirer to recognize most identifiable assets acquired, liabilities assumed, and noncontrolling interests in the acquiree at their full fair value on the acquisition date. Goodwill is to be recognized as the excess of the consideration transferred plus the fair value of the noncontrolling interest over the fair values of the identifiable net assets acquired. Subsequent changes in the fair value of contingent consideration classified as a liability are to be recognized in earnings, while contingent consideration classified as equity is not to be remeasured. Costs such as transaction costs are to be excluded from acquisition accounting, generally leading to recognizing expense and additionally, restructuring costs that do not meet certain criteria at acquisition date are to be subsequently recognized as post-acquisition costs. For calendar year companies, SFAS 141R is effective for business combinations consummated on or after January 1, 2009. Adoption of this statement is not expected to have a material impact on the Company's financial position or results of operations.

Table of Contents

Southeastern Banking Corporation

Notes to Consolidated Financial Statements

(Unaudited)

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133. This statement requires enhanced disclosures about the use of derivative instruments, the accounting for derivative instruments under SFAS 133 and related interpretations, and the impact of derivative instruments and related hedged items on financial position, financial performance, and cash flows, particularly from a risk perspective. SFAS 157 is effective for fiscal years beginning after November 15, 2008. Adoption of this statement is not expected to have a material impact on the Company's financial position or results of operations.

3. Fair Value Measurements

Effective January 1, 2008, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The statement applies whenever other statements require or permit assets or liabilities to be measured at fair value. The statement does not expand the use of fair value in any new circumstances.

SFAS 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, the statement establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Level 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs other than quoted prices that are observable for the asset or liability such as interest rates, exchange rates, and yield curves that are observable at commonly quoted intervals, volatilities, prepayment speeds, credit risks, and default rates. Level 3 inputs are unobservable inputs for assets or liabilities, which are typically based on an entity's own assumptions, as there is little, if any, related market activity. The determination of the fair value hierarchy within which the measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, considering factors specific to the asset or liability.

The table on the next page presents the Company's assets and liabilities measured at fair value on a recurring basis as of June 30, 2008, aggregated by the level in the fair value hierarchy within which those measurements fall.

Total assets at fair value	\$	\$ 95,482,253	\$	\$ 95,482,253

4. Subsequent Events
FHLB Borrowings

The Company has a line of credit from the Federal Home Loan Bank of Atlanta (the "FHLB") to meet general liquidity and other needs. Under this line and subject to collateral constraints, the Company can borrow, in total or increments, up to 16% of the Bank's total assets; at June 30, 2008, maximum borrowings available under this line approximated \$69,724,000. Advances outstanding with the FHLB totaled \$5,000,000 at June 30, 2008 and December 31, 2007. The outstanding advance, which matures March 17, 2010, accrues interest at an effective rate of 6.00%, payable quarterly. The \$5,000,000 advance is convertible into a three-month Libor-based floating rate anytime at the option of the FHLB. At June 30, 2008, the advance was secured by mortgage-backed securities with an aggregate carrying value of \$6,015,971. Subsequent to June 30, the securities collateral was released, and approximately \$26,783,000 in qualifying residential and commercial real estate loans were pledged to collateralize current and future advances under this line of credit.

Stock Option Plan

The Company's 2006 Stock Option Plan (the "Plan"), which was shareholder-approved in June 2007, permits the grant of stock options to employees covering up to 150,000 shares of common stock. The Company believes that such awards better aligns the interests of employees with those of shareholders. Any options granted generally have an exercise price equal to the fair market value of the Company's stock on the grant date and vest based on four years of continuous service. These options have ten-year contractual terms and expire if not exercised. On July 21, 2008, the Company granted 42,000 shares at an exercise price of \$19.50; no options were granted prior to this date.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Analysis should be read in conjunction with the 2007 Annual Report on Form 10-K and the consolidated financial statements & related notes on pages 3 - 9 of this quarterly filing. The Company's accounting policies, which are described in detail in Form 10-K, are integral to understanding the results reported. The Company's accounting policies require management's judgment in valuing assets, liabilities, commitments, and contingencies. A variety of factors could affect the ultimate value that is obtained when earning income, recognizing an expense, recovering an asset, or relieving a liability. This Analysis contains forward-looking statements with respect to business and financial matters. Actual results may vary significantly from those contained in these forward-looking statements. See the sections entitled Critical Accounting Policies and Forward-Looking Statements within this Analysis.

Description of Business

Southeastern Banking Corporation, with assets exceeding \$438,774,000, is a financial services company with operations in southeast Georgia and northeast Florida. Southeastern Bank (SEB), the Company's wholly-owned commercial bank subsidiary, offers a full line of commercial and retail services to meet the financial needs of its customer base through its seventeen branch locations and ATM network. Services offered include traditional deposit and credit services, long-term mortgage originations, and credit cards. SEB also offers 24-hour delivery channels, including internet and telephone banking, and through an affiliation with Raymond James Financial Services, provides insurance agent and investment brokerage services.

Financial Condition

Consolidated assets totaled \$438,774,674 at June 30, 2008, up \$2,388,957 from year-end 2007. Growth in the investment securities and loan portfolios was largely offset by declines in cash and due from banks. Specifically, investment securities grew \$5,824,011, and loans, \$2,040,153; cash and due from banks, which includes correspondent balances and cash letters in transit, declined \$5,536,432. Loans comprised approximately 67%, investment securities, 32%, and bank-owned life insurance, 1%, of earning assets at June 30, 2008 versus 68%, 31%, and 1% at December 31, 2007. Overall, earning assets approximated 91% of total assets at June 30, 2008. During the year-earlier period, total assets grew \$3,750,061 or 0.91%. An increase in loans outstanding, particularly real estate construction and residential mortgage balances, was the main factor in the 2007 results. Refer to the Liquidity section of this Analysis for details on deposits and other funding sources.

Investment Securities

On a carrying value basis, investment securities grew \$5,824,011 or 4.83% since December 31, 2007. Purchases of securities during the three-month period, primarily comprising short-term securities with original maturities of 90 days or less, approximated \$441,285,000, and redemptions, \$434,040,000. The use of Agency discount notes to collateralize public funds was the predominant factor in the purchase and redemption activity year-to-date. As further discussed on page 11, additional purchases year-to-date were centered in mortgage-backed securities issued by Fannie Mae (FNMA) and Freddie Mac (FHLMC), U.S. Small Business Administration participation certificates, and corporate bonds. The remaining redemptions were primarily attributable to various issuers' exercise of call options and other prepayments as a result of the current low-rate interest environment. The effective repricing of redeemed securities impacts current and future earnings results; refer to the Interest Rate and Market Risk/Interest Rate Sensitivity and Operations sections of this Analysis for more details. In conjunction with asset/liability management, the Company continues to increase its proportionate holdings of mortgage-backed securities, corporates, and municipals when feasible to reduce its exposure to

Table of Contents

Agency securities with call features. At June 30, 2008, mortgage-backed securities, corporates, and municipals comprised 26%, 20%, and 24% of the portfolio. Overall, securities comprised 32% of earning assets at June 30, 2008, up from 31% at year-end 2007. Including short-term Agency discount notes, the portfolio yield approximated 5.32% during the first half of 2008.

Management believes the credit quality of the investment portfolio remains sound, with 55.81% of the carrying value of debt securities being backed by the U.S. Treasury or other U.S. Government-sponsored agencies at June 30, 2008. The Company does not own any collateralized debt obligations, widely known as CDOs, secured by subprime residential mortgage-backed securities. Additionally, the Company does not own any private label mortgage-backed securities. During the first six months, the Company purchased an additional \$17,208,749 in conventional mortgage-backed securities issued by FNMA and FHLMC due to the spreads available in these investments relative to coupon Agencies. Mortgage-backed securities issued by FNMA and FHLMC are collateralized foremost by the underlying mortgages and secondly, by FNMA and FHLMC themselves. On August 8, 2008, Standard and Poor's Ratings Services, one of the premier rating agencies, affirmed its senior debt rating on both FNMA and FHLMC, acknowledging the strong explicit and implicit U.S. Government support FNMA and FHLMC hold in the marketplace. Besides FNMA and FHLMC, the Company also owned Ginnie Mae mortgage securities with a carrying value of \$670,648 at June 30, 2008. All of the Company's corporate bonds were rated BBB or higher, and the majority, A- or higher, by at least one nationally recognized rating agency at June 30, 2008 except for three non-rated trust preferred securities with a carrying value of \$3,481,361. Management restricts purchases of trust preferred securities, which often are not rated, to issues of large bank holding companies domiciled in the southeastern United States. Although the individual security may not be rated, the issuing bank holding company or subsidiary must have a strong stand-alone credit rating or other credit metrics. The Company increased its holdings of corporate bonds, including longer-term corporates, by \$15,467,214 or 146% year-to-date due to the high yields and relative value available in this sector. Within the municipal portfolio, all holdings were highly rated, investment grade securities other than twelve non-rated Georgia issues. In analyzing non-rated municipals, management considers debt service coverage and whether the bonds support essential services such as water/sewer systems and education. Management reviews bond ratings and market valuations on a regular basis.

The weighted average life of the portfolio approximated 4 years at June 30, 2008; management expects a moderate extension in duration during the remainder of 2008. The amortized cost and estimated fair value of investment securities are delineated in the table below:

<i>Investment Securities by Category</i>	<i>Amortized Cost</i>	<i>Unrealized Gains</i>	<i>Unrealized Losses</i>	<i>Fair Value</i>
<i>June 30, 2008</i>

Total investment securities	\$ 127,917	\$ 813	\$ 2,053	\$ 126,677

¹ Includes Agency discount notes with original maturities of three months or less.

Table of Contents

At June 30, the market value of the investment portfolio reflected \$1,240,538 in net unrealized losses, mostly in the corporate portfolio. Management is optimistic these market values will recover, particularly as system-wide credit, capital, and liquidity issues facing banks and their affiliates are fully addressed. For more details on investment securities and related fair value, refer to the Capital Adequacy section of this Analysis. The Company did not have a concentration in the obligations of any issuer other than the U.S. Government and its sponsored agencies at June 30, 2008; the single largest corporate holding, securities issued by a regional bank holding company, comprised 4.37% of the total securities portfolio.

Loans

Loans, net of unearned income, grew 0.83% or \$2,238,095 since year-end 2007. The net loans to deposits ratio aggregated 74.23% at June 30, 2008 versus 74.43% at December 31, 2007, and 79.01% a year ago. The commercial portfolio posted the largest growth, increasing \$4,160,484 or 4.68% year-to-date. Nonfarm real estate, agricultural, and other commercial/industrial loans within the commercial portfolio grew \$1,494,324, \$301,586, and \$3,812,785; governmental loans fell \$1,448,211. Balances in the real estate residential mortgage portfolio grew a modest \$2,856,653 to \$42,844,808 at June 30, 2008. Conversely, real estate construction balances, predominantly residential in nature and concentrated in the Company's coastal markets, declined \$3,282,121 or 2.67% at June 30, 2008 compared to December 31, 2007. Most of the loans in the real estate-construction portfolio are preparatory to customers' attainment of permanent financing or developer's sale and are, by nature, short-term and somewhat cyclical; swings in these account balances are normal and to be expected, particularly in the current economic cycle. Although the Company, like peer institutions of similar size, originates permanent mortgages for new construction, it historically has not held or serviced long-term mortgage loans for its own portfolio. Rather, permanent mortgages are typically brokered through a mortgage underwriter or government agency. The Company receives mortgage origination fees for its participation in these origination transactions; refer to the disclosures provided under Results of Operations for more details. The Company is in the process of expanding and revamping its mortgage origination department and in the future will also originate, hold, and service such mortgage loans in-house on a limited scale. Consumer loans declined \$1,503,107 at June 30, 2008 compared to year-end 2007; these loans comprised 5.95% of the total portfolio at June 30, 2008.

Due to economic uncertainties within the Company's markets, particularly in the real estate sector, and resultant concerns regarding credit opportunities, management expects loan volumes to flatten or decline moderately the remainder of 2008. During the same period in 2007, net loans grew 10.85% or \$26,890,083. A \$22,334,114 or 15.56% increase in real estate construction and residential mortgage loans was the primary factor in the 2007 results. Loans outstanding are presented by type in the table below:

<i>Loans by Category</i> <i>(In thousands)</i>	June 30, 2008	December 31, 2007	June 30, 2007
Commercial, financial, and agricultural ¹	\$ 93,005	\$ 88,844	\$ 91,438
Real estate construction	119,813	123,095	116,707
Real estate residential mortgage ²	42,845	39,988	49,179
Consumer, including credit cards	16,182	17,686	17,452
Loans, gross	271,845	269,613	274,776
Unearned income	130	136	121
Loans, net	\$ 271,715	\$ 269,477	\$ 274,655

¹ Includes obligations of states and political subdivisions.

² Typically have final maturities of 15 years or less. In the third quarter of 2008, the Company will begin originating, holding, and servicing longer-term mortgage loans in-house on a limited scale.

Table of Contents

Although the Company's loan portfolio is diversified, significant portions of its loans are collateralized by real estate. At June 30, 2008, approximately 82% of the loan portfolio was comprised of loans with real estate as the primary collateral. As required by policy, real estate loans are collateralized based on certain loan-to-appraised value ratios. A geographic concentration in loans arises given the Company's operations within a regional area of southeast Georgia and northeast Florida. The Company continues to closely monitor real estate valuations in its markets and consider any implications on the allowance for loan losses and the related provision. On an aggregate basis, commitments to extend credit and standby letters of credit approximated \$49,029,000 at June 30, 2008; because a substantial amount of these contracts expire without being drawn upon, total contractual amounts do not represent future credit exposure or liquidity requirements. The Company has not funded or incurred any losses on letters of credit in 2008 year-to-date.

Nonperforming Assets

Nonperforming assets consist of nonaccrual and restructured loans, foreclosed real estate, and other repossessed assets. Overall, nonperforming assets aggregated \$2,223,768 at June 30, 2008, up \$1,156,934 or 108.45% from year-end 2007. As a percent of total assets, nonperforming assets totaled 0.51% at June 30, 2008 versus 0.24% at year-end 2007 and 0.21% at June 30, 2007. The transfers of a \$475,000 residential real estate loan secured by waterfront property and a \$441,000 relationship secured by assorted real estate and equipment to nonaccrual status were the largest factors in the nonperforming assets increase year-to-date. On May 11, 2008, tornadoes heavily damaged portions of McIntosh County, where the Company has two banking offices. As a result of these tornadoes, a single relationship of \$284,000 was placed on nonaccrual status; due to insurance and other payments, this credit balance declined to \$89,000 at June 30, 2008, and upon renewal in July, these credits were returned to accruing status. The Company has not incurred and does not anticipate losses resulting from other relationships impacted by the tornadoes. Individual concentrations within nonaccrual balances included the aforementioned \$1,005,000 credits and loans to three separate borrowers averaging \$81,000 each at June 30, 2008; due to the underlying real estate collateral coverage, no significant losses, if any, are expected on these balances. Nonaccrual balances did not include any industry concentrations at June 30, 2008. Subsequent to June 30, two additional relationships totaling \$1,209,000 were placed on nonaccrual status and foreclosure proceedings begun; no losses, if any, are anticipated on the underlying residential lots. No other material credits have been transferred to or removed from nonaccrual status during 2008 to-date. See the subsection entitled Policy Note for criteria used by management in classifying loans as nonaccrual. The allowance for loan losses approximated 2.47X the nonperforming loans balance at June 30, 2008 versus 6.16X at year-end 2007 and 5.68X a year ago. No significant activity occurred within foreclosed real estate balances or other repossessed assets during the first half of 2008. Foreclosed real estate balances remained concentrated in residential real estate at June 30, 2008.

Loans past due 90 days or more approximated \$233,000, or less than 1% of net loans, at June 30, 2008. Management is unaware of any material concentrations within these past due balances; the vast majority, or 79%, of these past due balances were real estate-secured. The table on the next page provides further information about nonperforming assets and loans past due 90 plus days.

Table of Contents

Nonperforming assets to net loans			
plus foreclosed/repossessed assets	0.82%	0.40%	0.32%

¹ Does not include restructured loans that yield a market rate.

² Includes only other real estate acquired through foreclosure or in settlement of debts previously contracted.

Loans past due 30-89 days comprised 1.38% of net loans at June 30, 2008, totaling approximately \$3,739,000. A single real estate relationship approximating \$1,714,000 comprised 46% of these past due balances; this particular credit is included in the real estate impairments discussed in the next paragraph. The next three largest loans in these past due totals, all real estate-secured, averaged \$117,000 each.

Additional loans classified as impaired under SFAS No. 114, Accounting by Creditors for Impairment of a Loan an amendment of FASB Statements No. 5 and 15, which include certain loans past due 30-89 days, totaled approximately \$14,763,000 at June 30, 2008. Approximately \$12,702,000 of this classified balance pertained to five separate borrowers whose loan repayment was expected to come from commercial or residential real estate development or lot loan sales of the underlying collateral. Due to lagging sales and ongoing deterioration in the real estate market, payment of principal and interest on these coastal real estate loans has come from borrower reserves or other resources, constituting a change in the initial source of payment/terms of these loans. Management reviews all loans with total credit exposure of \$500,000 or more at least quarterly and evaluates underlying collateral, assuming salvage values and estimating any allowance necessary to cover projected losses at worst case scenario liquidation. After adjustments for collateral value shortfalls, the allowance for loan losses allocated to these five credits approximated \$703,000 at June 30, 2008. The \$703,000 assumes a significant loss if the underlying real estate required liquidation currently. The remaining classified balance at June 30, 2008 pertained to one commercial borrower in the timber industry; this \$2,061,000 credit relationship is secured primarily by accounts receivable and log inventory and secondly, by logging equipment. No allowance was deemed necessary for this credit under the SFAS 114 calculation at June 30, 2008. Although this timber credit was not past due as to either principal or interest, the long-term outlook for the hardwood industry is particularly troubling, and management is aggressively seeking to reduce its exposure under these lines. The Company continues to closely monitor real estate valuations in its markets, particularly given lingering distress in the coastal real estate sector, and consider any implications on the allowance for loan losses and the related provision. No additional relationships have been identified as impaired under SFAS 114 subsequent to June 30, 2008. As further discussed in the Allowance for Loan Losses subsection of this Analysis, management believes the allowance was adequate at June 30, 2008.

Table of Contents

Policy Note. Loans classified as nonaccrual have been placed in nonperforming, or impaired, status because the borrower's ability to make future principal and/or interest payments has become uncertain. The Company considers a loan to be nonaccrual with the occurrence of any one of the following events: a) interest or principal has been in default 90 days or more, unless the loan is well-collateralized and in the process of collection; b) collection of recorded interest or principal is not anticipated; or c) income on the loan is recognized on a cash basis due to deterioration in the financial condition of the debtor. Smaller balance consumer loans are generally not subject to the above-referenced guidelines and are normally placed on nonaccrual status or else charged-off when payments have been in default 90 days or more. Nonaccrual loans are reduced to the lower of the principal balance of the loan or the market value of the underlying real estate or other collateral net of selling costs. Any impairment in the principal balance is charged against the allowance for loan losses; subsequent charge-offs may be required as a result of changes in the market value of collateral or other repayment prospects. Accrued interest on any loan placed on nonaccrual status is reversed. Interest income on nonaccrual loans, if subsequently recognized, is recorded on a cash basis. No interest is subsequently recognized on nonaccrual loans until all principal has been collected. Loans are classified as restructured when either interest or principal has been reduced or deferred because of deterioration in the borrower's financial position. Foreclosed real estate represents real property acquired by foreclosure or directly by title or deed transfer in settlement of debt. Provisions for subsequent devaluations of foreclosed real estate are charged to operations, while costs associated with improving the properties are generally capitalized. Refer to the footnotes accompanying the consolidated financial statements for more details on the Company's accounting and reporting policies on impaired loans and other real estate.

Allowance for Loan Losses

The Company continuously reviews its loan portfolio and maintains an allowance for loan losses available to absorb losses inherent in the portfolio. The six-month provision for loan losses at June 30, 2008 totaled \$231,000, and net charge-offs, \$33,058. The comparable provision and net recovery amounts at June 30, 2007 were \$135,000 and \$1,635. Economic uncertainties on real estate-secured loans and credits pertaining to the timber industry were primary factors in the continuing provision in 2008; these and other loans will continue to be monitored, and the provision adjusted accordingly. Net charge-offs represented 0.02% of average loans at June 30, 2008 compared to net recoveries of less than 0.01% at June 30, 2007 and net charge-offs of 0.10% in 2006. No single charge-off exceeded \$10,000 at June 30, 2008. As further mentioned in other sections of this Analysis, the Company is committed to the early recognition of problem loans and to an appropriate and adequate level of allowance. The adequacy of the allowance is further discussed in the next subsection of this Analysis. Activity in the allowance is presented in the table on the next page.

Table of Contents*Allowance for Loan Losses*

<i>Six Months Ended June 30, (Dollars in thousands)</i>	2008	2007	2006

¹ Net of unearned income

² Annualized.

The Company prepares a comprehensive analysis of the allowance for loan losses at least quarterly. SEB's Board of Directors is responsible for affirming the allowance methodology and assessing the general and specific allowance factors in relation to estimated and actual net charge-off trends. Such evaluation considers prior loss experience, the risk rating distribution of the portfolio, the impact of current internal and external influences on credit loss, and the levels of nonperforming loans. Specific allowances for loan losses are established for large impaired loans evaluated on an individual basis. The specific allowance established for these loans is based on a thorough analysis of the most probable source of repayment, including the present value of the loan's expected future cash flows, the loan's estimated market value, or the estimated fair value of the underlying collateral. General allowances are established for loans grouped into pools based on similar characteristics. In this process, general allowance factors established are based on an analysis of historical charge-off experience and expected loss given default derived from the Company's internal risk rating process. Other adjustments may be made to the allowance for the pools after an assessment of internal and external influences on credit quality that are reflected in the historical loss or risk rating data. These influences typically include recent loss experience in specific portfolio segments, trends in loan quality, changes in market focus, and concentrations of credit. This element also requires a high degree of managerial judgment to anticipate the impact that economic trends, legislative or governmental actions, or other unique

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

market and/or portfolio issues will have on credit losses. Unallocated allowances relate to inherent losses that are not included elsewhere in the allowance. The qualitative factors associated with unallocated allowances include the inherent imprecisions in models and lagging or incomplete data. Because of their subjective nature, these risk factors are carefully reviewed by management and revised as conditions indicate. Based on its analyses, management believes the allowance was adequate at June 30, 2008.

Table of Contents

Other Commitments

Other than replacement of the branch facility in Yulee, Florida, renovation of other SEB offices, and purchase of Check 21 hardware and software, the Company had no material plans or commitments for capital expenditures as of June 30, 2008. Estimated remaining costs associated with new construction, renovations-in-progress, and equipment purchases at June 30, 2008 were \$1,600,000.

Liquidity

Liquidity is managed to ensure sufficient cash flow to satisfy demands for credit, deposit withdrawals, and other corporate needs. The Company's sources of funds include a large, stable deposit base and secured advances from the FHLB. Additional liquidity is provided by payments and maturities, including both principal and interest, of the loan and investment securities portfolios. At June 30, 2008, loans¹ and investment securities with carrying values exceeding \$165,000,000 were scheduled to mature in one year or less. The investment portfolio has also been structured to meet liquidity needs prior to asset maturity when necessary. The Company's liquidity position is further strengthened by its access, on both a short- and long-term basis, to other local and regional funding sources.

Funding sources primarily comprise customer-based core deposits but also include borrowed funds and cash flows from operations. Customer-based core deposits, the Company's largest and most cost-effective source of funding, comprised 84% of the funding base at June 30, 2008, down 100 basis points from year-end 2007 levels. The year-to-date variation in core deposits is primarily attributable to an increase in large time certificate balances held by local government customers. Borrowed funds, which variously encompass U.S. Treasury demand notes, federal funds purchased, and FHLB advances, totaled \$12,588,970 at June 30, 2008 versus \$12,974,523 at December 31, 2007. More specifically, the maximum amount of U.S. Treasury demand notes available to the Company at June 30, 2008 totaled \$3,000,000, of which \$1,434,970 was outstanding. Unused borrowings under unsecured federal funds lines of credit from other banks, each with varying terms and expiration dates, totaled \$23,000,000. Additionally, under a credit facility with the FHLB, the Company can borrow up to 16% of SEB's total assets; at June 30, 2008, unused borrowings, which are subject to collateral requirements, approximated \$65,724,000. Refer to the subsection entitled FHLB Advances for details on the Company's outstanding balance with the FHLB. Cash flows from operations also constitute a significant source of liquidity. Net cash from operations derives primarily from net income adjusted for noncash items such as depreciation and amortization, accretion, and the provision for loan losses.

Management believes the Company has the funding capacity, from operating activities or otherwise, to meet its financial commitments in 2008. Refer to the Capital Adequacy section of this Analysis for details on treasury stock purchases and intercompany dividend policy and the Financial Condition section for details on unfunded loan commitments.

¹ No cash flow assumptions other than final contractual maturities have been made for installment loans. Nonaccrual loans are excluded.

Deposits

Deposits grew \$3,970,103 or 1.10% since year-end 2007. Interest-bearing deposits grew \$3,808,539 or 1.28% while noninterest-bearing deposits increased a mere \$161,564. The growth in interest-bearing deposits was concentrated in time certificates, particularly large dollar certificates, as NOW/MMA and savings balances declined \$3,841,052. Time certificate balances of \$100,000 or more comprised \$5,461,315 of the six-month growth in certificates and 46% of certificate totals at June 30, 2008. Virtually all of the

Table of Contents

growth in large dollar certificates resulted from one government customer. Lower balance certificate totals grew \$2,188,276 or 3.20% since December 31, 2007 as customers moved funds from savings to increase available returns. Funding costs associated with deposits declined 6.54% overall at June 30, 2008 versus June 30, 2007 due to reductions in cost of funds; see the Results of Operations section of this Analysis for more details. Overall, interest-bearing deposits comprised 82.35%, and noninterest-bearing deposits, 17.65%, of total deposits at June 30, 2008. The distribution of interest-bearing balances at June 30, 2008 and certain comparable quarter-end dates is shown in the table below:

<i>Deposits</i> <i>(Dollars in thousands)</i>	June 30, 2008		December 31, 2007		June 30, 2007	
	<i>Balances</i>	<i>Percent of Total</i>	<i>Balances</i>	<i>Percent of Total</i>	<i>Balances</i>	<i>Percent of Total</i>
Interest-bearing demand deposits ¹	\$ 114,608	38.02%	\$ 116,154	39.03%	\$ 89,333	33.75%
Savings	60,477	20.06%	62,772	21.09%	70,998	26.82%

¹ NOW and money market accounts.

Deposits of one local governmental body comprised approximately \$29,009,000 and \$39,525,000 of the overall deposit base at June 30, 2008 and December 31, 2007. The Company had no brokered deposits at June 30, 2008.

Approximately 80% of time certificates at June 30, 2008 were scheduled to mature within the next twelve months. The composition of average deposits and the fluctuations therein at June 30 for the last two years is shown in the Average Balances table included in the Operations section of this Analysis.

FHLB Advances

Advances outstanding with the FHLB totaled \$5,000,000 at June 30, 2008, unchanged from year-end 2007. The outstanding advance, which matures March 17, 2010, accrues interest at an effective rate of 6.00%, payable quarterly. The advance is convertible into a three-month Libor-based floating rate anytime at the option of the FHLB. Year-to-date, interest expense on the advance approximated \$150,000. At June 30, 2008, the advance was secured by mortgage-backed securities with an aggregate carrying value of \$6,015,971. Subsequent to June 30, the securities collateral was released, and approximately \$26,783,000 in qualifying residential and commercial real estate loans were pledged to collateralize current and future advances under this line of credit.

Interest Rate and Market Risk/Interest Rate Sensitivity

The normal course of business activity exposes the Company to interest rate risk. Fluctuations in interest rates may result in changes in the fair market value of the Company's financial instruments, cash flows, and net interest income. The asset/liability committee regularly reviews the Company's exposure to interest rate risk and formulates strategy based on acceptable levels of interest rate risk. The overall objective of this process is to optimize the Company's financial position, liquidity, and net interest income, while limiting volatility to net interest income from changes in interest rates. The Company uses gap analysis and simulation modeling to measure and manage interest rate sensitivity.

An indicator of interest rate sensitivity is the difference between interest rate sensitive assets and interest rate sensitive liabilities; this difference is known as the interest rate sensitivity gap. In an asset sensitive, or positive, gap position, the amount of interest-earning assets maturing or repricing within a given period exceeds the amount of interest-bearing liabilities maturing or repricing within that same period. Conversely, in a liability sensitive, or negative, gap position, the amount of interest-bearing liabilities maturing or

Table of Contents

repricing within a given period exceeds the amount of interest-earning assets maturing or repricing within that time period. During a period of rising rates, a negative gap would tend to affect net interest income adversely, while a positive gap would theoretically result in increased net interest income. In a falling rate environment, a negative gap would tend to result in increased net interest income, while a positive gap would affect net interest income adversely. The gap analysis below provides a snapshot of the Company's interest rate sensitivity position at June 30, 2008:

<i>Interest Rate Sensitivity</i>	<i>Repricing Within</i>				<i>Total</i>
	<i>0 - 3 Months</i>	<i>4 - 12 Months</i>	<i>One - Five Years</i>	<i>More Than Five Years</i>	
<i>June 30, 2008</i> <i>(Dollars in thousands)</i>

¹ Distribution of maturities for available-for sale-securities is based on amortized cost. Additionally, distribution of maturities for mortgage-backed securities is based on expected average lives, which may be different from the contractual terms. Equity securities, if any, are excluded.

² No cash flow assumptions other than final contractual maturities have been made for installment loans with fixed rates. Nonaccrual loans are excluded.

³ NOW, money market, and savings account balances are included in the 0-3 months repricing category.

As shown in the preceding table, the Company's cumulative gap position remained negative through the short-term repricing intervals at June 30, 2008, approximating \$(35,052,000) at three months and \$(71,291,000) through one-year. Excluding traditionally nonvolatile NOW balances from the gap calculation, the cumulative gap at June 30, 2008 totaled \$61,013,000 at three months and \$24,774,000 at twelve months, effectively reflecting the Company's asset sensitive position. Compared to year-end 2007, the cumulative three-month gap position widened 249.96%, and the one-year gap, 71.28%, at June 30, 2008. The widening of the short-term gap position at June 30, 2008 was attributable to several factors, including reductions in securities with original maturities of 90 days or less and increases in deposits with short maturities. Other than seasonal

variations, primarily in deposit balances, and moderate extension of maturities in the investment portfolio, no significant changes are anticipated in the gap position during the

Table of Contents

remainder of 2008; however, as further discussed below, the aggressive rate cuts promulgated by the Federal Reserve have negatively affected net interest income in 2008. Shortcomings are inherent in any gap analysis since certain assets and liabilities may not move proportionally as rates change. For example, the gap analysis presumes that all loans² and securities¹ will perform according to their contractual maturities when, in many cases, actual loan terms are much shorter than the original terms and securities are subject to early redemption.

In addition to gap analysis, the Company uses simulation modeling to test the interest rate sensitivity of net interest income and the balance sheet. Contractual maturity and repricing characteristics of loans are incorporated into the model, as are prepayment assumptions, maturity data, and call options within the investment portfolio. Non-maturity deposit accounts are modeled based on past experience. Simulation results quantify interest rate risks under various interest rate scenarios. Based on the Company's latest analysis, the simulation model estimates that a gradual 300 basis points rise in rates over the next twelve months would increase net interest income approximately 7%; a gradual 300 basis points decline in rates would reduce net interest income approximately 8.00%. An immediate downward shock of 200 basis points would adversely impact net interest income approximately 12% over the next year; a similar upward shock would increase net interest income approximately 16%. Limitations inherent with simulation modeling include: a) In a down rate environment, competitive and other factors constrain timing of rate cuts on deposit products whereas loans tied to prime and other variable indexes reprice instantaneously and securities with call or other prepayment features are likely to be redeemed prior to stated maturity and replaced at lower rates (lag effect); and b) Changes in balance sheet mix, for example, unscheduled pay-offs of large commercial loans, are oftentimes difficult to forecast.

The Company has not in the past, but may in the future, utilize interest rate swaps, financial options, financial futures contracts, or other rate protection instruments to reduce interest rate and market risks.

Impact of Inflation

The effects of inflation on the local economy and the Company's operating results have been relatively modest the last several years. Because substantially all the Company's assets and liabilities, including cash, securities, loans, and deposits, are monetary in nature, their values are less sensitive to the effects of inflation than to changing interest rates. As discussed in the preceding section, the Company attempts to control the impact of interest rate fluctuations by managing the relationship between its interest sensitive assets and liabilities.

Capital Adequacy

Federal banking regulators have established certain capital adequacy standards required to be maintained by banks and bank holding companies. These regulations define capital as either Tier 1 (primarily shareholders' equity) or Tier 2 (certain debt instruments and a portion of the allowance for loan losses). The Company and SEB are subject to a minimum Tier 1 capital ratio (Tier 1 capital to risk-weighted assets) of 4%, total capital ratio (Tier 1 plus Tier 2 to risk-weighted assets) of 8%, and Tier 1 leverage ratio (Tier 1 to average quarterly assets) of 4%. To be considered a well-capitalized institution, the Tier 1 capital, total capital, and Tier 1 leverage ratios must equal or exceed 6%, 10%, and 5%, respectively. Banks and bank holding companies are prohibited from including unrealized gains and losses on debt securities in the calculation of risk-based capital but are permitted to include up to 45 percent of net unrealized pre-tax holding gains on equity securities in Tier 2 capital. The Company did not have any unrealized gains on equity securities includible in the risk-based capital calculations for any of the periods presented. The Company is committed to maintaining its well-capitalized status.

The Company's capital ratios for the most recent periods are presented in the table on the next page.

Table of Contents

	June 30, 2008	December 31, 2007	June 30, 2007
Capital Ratios <i>(Dollars in thousands)</i>			
Tier 1 capital:			
Realized shareholders' equity	\$ 58,368	\$ 56,721	\$ 55,029
Intangible assets and other adjustments	(419)	(448)	(477)
Total Tier 1 capital	57,949	56,273	54,552
Tier 2 capital:			
Portion of allowance for loan losses	4,105	3,930	3,792
Allowable long-term debt			
Total Tier 2 capital	4,105	3,930	3,792
Total risk-based capital	\$ 62,054	\$ 60,203	\$ 58,344
Risk-weighted assets	\$ 327,811	\$ 313,827	\$ 302,816
Risk-based ratios:			
Tier 1 capital	17.68%	17.93%	18.01%
Total risk-based capital	18.93%	19.18%	19.27%
Tier 1 leverage ratio	13.28%	13.60%	13.13%
Realized shareholders' equity to assets	13.27%	13.00%	13.25%

Book value per share grew a modest \$0.53 or 2.97% during the first six months of 2008 to \$18.38 at June 30, 2008. Dividends declared totaled \$0.25, down 10.71% or \$0.03 from 2007. The decline in the declared dividend resulted primarily from a change in dividend structure: Traditionally, the Company has declared regular quarterly dividends, and in the fourth quarter, an extra dividend for payment the following January; in 2007, the Company did not declare an extra dividend, intending for future dividends to be paid in equal installments over four quarters, eventually in the same quarter as declared. In 2006, the regular quarterly dividends totaled \$0.135 per share, and the extra dividend, \$0.48. In 2007, although the dividend declared was \$0.67 for the year or \$0.14 per quarter, the paid dividend totaled \$1.035. In February 2008 and also in August, the Company declared a regular quarterly dividend of \$0.25. Management believes the new dividend structure better aligns the Company with market practices. For more specifics on the Company's dividend policy, refer to the subsection immediately following. Accumulated other comprehensive loss, which measures net fluctuations in the fair values of investment securities, declined \$1,093,815 at June 30, 2008 compared to year-end 2007 due primarily to market losses on corporate holdings. Further details on corporate and other investment securities and their associated fair values are contained in the Financial Condition section of this Analysis.

Under existing authorization, the Company can purchase up to \$15,000,000 in treasury stock. From 2000-2007, the Company repurchased 402,466 shares on the open market and through private transactions at an average price of \$20.64 per share. During the first half of 2008, the Company purchased an additional 2,000 shares at an aggregate purchase price of \$42,126 or \$21.06 per share. The maximum consideration available for additional purchases, at prices to be determined in the future, is \$6,649,969. Any acquisition of additional shares will be dictated by market conditions. There is no expiration date for the treasury authorization.

Refer to the Financial Condition and Liquidity sections of this Analysis for details on planned capital expenditures.

Dividend Policy

The Parent Company is a legal entity separate and distinct from its subsidiaries, and its revenues and liquidity position depend primarily on the payment of dividends from its subsidiaries. State banking regulations limit the amount of dividends SEB may pay

Table of Contents

without prior approval of the regulatory agencies. Year-to-date, SEB has paid 50% or \$1,582,000 of the \$3,164,000 in cash dividends available to the Company in 2008 without such approval. The Company uses regular dividends paid by SEB in order to pay quarterly dividends to its own shareholders. Management anticipates that the Company will continue to pay cash dividends on a recurring basis.

Results of Operations

Net income for the second quarter of 2008 totaled \$1,274,116, down \$379,233 or 22.94% from June 30, 2007 but up 5.38% from March 31, 2008. On a per share basis, quarterly earnings totaled \$0.40 at June 30, 2008 versus \$0.52 at June 30, 2007 and \$0.38 at March 31, 2008. Year-to-date, net income declined \$840,972 to \$2,483,144 at June 30, 2008 from \$3,324,116 in 2007. Per share income for the six-month period approximated \$0.78 at June 30, 2008 versus \$1.04 at June 30, 2007. The return on beginning equity for the six-month period totaled 8.76% at June 30, 2008, down from 12.60% at June 30, 2007. A reduction in net interest margin was the overriding factor in the 2008 results. Variations in net interest income and noninterest income/expense are further discussed within the next two subsections of this Analysis; the provision for loan losses is separately discussed within the Financial Condition section.

Net Interest Income

Due to asset sensitivity and margin compression, net interest income declined \$620,589 or 12.57% during the second quarter of 2008 compared to 2007. Year-to-date, net interest income fell \$1,257,341 or 12.76% from 2007. Simply put, asset sensitivity means earnings on loans and other assets generally decline quicker than expenses on deposits and other liabilities when rates drop. Rate movements promulgated by the Federal Reserve in 2008 to-date have been particularly rapid and aggressive: Prime dropped from 7.25% at December 31, 2007 to the current rate of 5.00% by April 30, 2008. Loans tied to prime and other variable indexes repriced instantaneously in a down rate environment, and securities with call or other prepayment features are normally redeemed prior to stated maturity and replaced at lower rates. Management has cut deposit rates multiple times in 2008 although competitive and other factors preclude simultaneous and proportionate declines in these rates. Reducing cost of funds in the current economic cycle has been particularly difficult since liquidity constraints have compelled regional and other banks to rely more heavily on deposits, particularly time certificates, for funding; this reliance has kept deposit costs higher and lowered margins and spreads for competitor banks attempting to maintain market share. Following the six-month trend, net interest income for the entire fiscal 2008 is projected to lag 2007 results by approximately 14%. To recap, the net interest margin approximated 4.57% at June 30, 2008 versus 5.41% a year ago; the interest rate spread, 3.94% versus 4.41%. Interest earnings on loans and other earning assets fell \$2,075,101 and \$4,305, while earnings on investments and federal funds sold increased \$412,752 and \$49,635 from same period results in 2007. Significant declines in asset yields precipitated the 2008 results. Asset yields averaged 6.81% year-to-date at June 30, 2008 versus 7.93% in 2007; see the interest differential table on page 23 for more details on changes in interest income attributable to volume and rates at June 30, 2008 versus 2007. Interest expense on deposits and other borrowed funds declined \$392,090 or 16.17% during the second quarter of 2008 versus 2007 and \$359,678 year-to-date. Cost of funds dropped 65 basis points from 2007 levels, totaling 2.87% at June 30, 2008 versus 3.52% at June 30, 2007. The reduced funding costs resulted primarily from lower rates on NOW/MMA and savings deposits at June 30, 2008 compared to 2007. As previously discussed, higher average balances, competitive pressure, and the aforementioned lag effect have constrained any significant rate reductions in time certificates. Refer to the Liquidity and Interest Sensitivity sections of this Analysis for more details on deposit fluctuations and the Company's asset sensitivity.

The intense competition for loans and deposits continues in 2008 and shows no sign of abating. The high number of new and existing financial institutions in the Company's market areas essentially guarantees downward pressure on net interest spreads and margins as all participants struggle to amass and grow market share. Volume of assets and deposits will become even more important as margins

Table of Contents

decline. Strategies implemented by management to increase average loans outstanding emphasize competitive pricing on loan products and development of additional loan relationships, all without compromising portfolio quality. Management's strategy for deposits is to closely manage anticipated market increases and maintain a competitive position with respect to pricing and products. Comparative details about average balances, income/expense, and average yields earned and rates paid on interest-earning assets and liabilities for the last two years are provided in the next table.

¹ Average loans are shown net of unearned income. Nonperforming loans are included. Income on nonaccrual loans, if recognized, is recorded on a cash basis.

² Includes loan fees and late charges.

³ Securities are presented on an amortized cost basis. Investment securities with original maturities of three months or less are included, as applicable.

⁴ Interest income on tax-exempt loans and securities is presented on a taxable-equivalent basis, using a federal income tax rate of 34%. No adjustments have been made for any state tax benefits or the nondeductible portion of interest expense.

⁵ NOW and money market accounts.

⁶ Averages presented generally represent average daily balances.

Analysis of Changes in Net Interest Income

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

The average balance table above provides detailed information about average balances, income/expense, and average yields earned and rates paid on interest-earning assets and interest-bearing liabilities for the six months ended June 30, 2008 and 2007. The table on the next page summarizes the changes in interest income and interest expense attributable to volume and rates during this period.

Table of Contents

Interest Differential ¹	2008 Compared to 2007 Increase (Decrease) Due to		
	Volume	Rate	Net
<i>Six Months Ended June 30, (In thousands)</i>			
Interest income

Total interest expense	737	(1,097)	(360)
Net change in net interest income	\$ (495)	\$ (806)	\$ (1,301)

¹ Changes in net interest income are attributed to either changes in average balances (volume change) or changes in average rates (rate change) for earning assets and sources of funds on which interest is received or paid. Volume change is calculated as change in volume times the previous rate while rate change is change in rate times the previous volume. The rate/volume change, change in rate times change in volume, is allocated between volume change and rate change at the ratio each component bears to the absolute value of their total.

² Includes loan fees. See the average balances table on the previous page for more details.

³ Interest income on tax-exempt loans and securities is presented on a taxable-equivalent basis, using a federal income tax rate of 34%. No adjustments have been made for any state tax benefits or the nondeductible portion of interest expense.

⁴ Now and money market accounts.

⁵ The entire change in net interest income attributable to the Company's initial borrowings under these credit facilities has been allocated to the change in volume. Similarly, when these facilities are unutilized in subsequent years, the change in net interest income is allocated to the change in volume.

Noninterest Income and Expense

Noninterest income increased \$66,322 or 6.35% during the second quarter of 2008 compared to 2007 and \$30,865 year-to-date. Key elements in the quarterly and year-to-date results included:

- Investment securities gains, net: The Company recognized a \$134,628 gain on the sale of corporate securities totaling \$2,991,872 in the first quarter of 2007. These securities were sold primarily to fund 2007 growth in the loan portfolio. No securities were sold during the first two quarters of 2008.
- Service charges on deposit accounts: Service charges on deposit accounts grew \$26,094 on a quarterly basis and \$83,664 or 6.38% year-to-date. Approximately 69% of the 2008 improvement was attributable to increased analysis charges on commercial accounts; the remaining improvement resulted from higher volume of regular checking fees.

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

- c) Other operating income: The other operating portion of noninterest income grew \$40,228 during the second quarter of 2008 versus 2007 and \$81,829 year-to-date. The recognition of \$58,410 quarterly income and \$116,874 year-to-date income on bank-owned life insurance was the predominant factor in the comparative results. Specifically, the Company purchased \$5,000,000 in bank-owned life insurance in November 2007; this single premium insurance currently yields 7.00% on a federal taxable-equivalent basis. By type and amount, the chief components of other operating income at June 30, 2008 were surcharge fees – ATM, \$195,500; mortgage origination fees, \$154,230; income on bank-owned life insurance, \$116,874; income on sale of check products, \$57,571; safe deposit box rentals, \$45,138; and commissions on the sale of credit life insurance, \$45,290. Together, these six income items comprised 81.78% of other operating income at June 30, 2008. In 2007, these same income components comprised 81.20% of other operating income. The Company is in the process of expanding and revamping its mortgage origination department and is optimistic that these initiatives will increase fee production and cross-sell opportunities long-term.

Noninterest expense declined \$19,501 during the second quarter of 2008 compared to 2007 but increased \$71,205 or 1.03% year-to-date. The main factors impacting quarterly and year-to-date results comprised:

- a) Salaries and employee benefits: Personnel costs declined a nominal 1.08% or \$45,558 year-to-date. Declines in incentive accruals accounted for virtually all of the variation as base salary expense actually increased year-over-year and fringe benefit costs remained flat. The vast majority, or 84%, of employee expenses remained concentrated in salaries and other direct compensation, including related payroll taxes, at June 30, 2008. Profit-sharing accruals and other fringe benefits constituted the remaining 5% and 11% of employee expenses. The division of employee expenses between compensation, profit sharing, and other fringe benefits remained consistent with historical norms in 2008.
- b) Occupancy and equipment, net: When compared to the same periods in 2007, net occupancy and equipment expense increased \$18,776 on a quarterly basis and \$73,110 year-to-date. Operating costs and depreciation associated with technology programs and the Company's permanent facility at 15 Trade Street in Brunswick were primary factors in the increase.
- c) Other operating expense: Other operating expenses increased \$43,653 or 3.14% year-to-date; net losses versus gains on sales of foreclosed real estate and other assets was the chief variable. Besides advertising expense, which approximated \$161,000 in 2008 and \$175,000 in 2007, no individual component of other operating expenses aggregated or exceeded 10% of the total in 2008 or 2007.

Overhead related to the Company's new Trade Street facility, as noted above, expansion/revamping of the mortgage origination department, and renovation of SEB's older facilities are expected to increase noninterest expense approximately \$325,000 in 2008 compared to 2007.

Critical Accounting Policies

The Company's consolidated financial statements are prepared applying certain critical accounting policies. Critical accounting policies affect accounts such as the allowance for loan losses, income taxes, investment securities, and goodwill and other intangibles and require numerous estimates and strategic or economic assumptions that may prove inaccurate or subject to variations and may significantly affect the Company's reported results and financial position for the period or in future periods. Changes in underlying factors, assumptions, or estimates in any of these areas could have a material impact on the Company's future financial condition and results of operations. The Company's critical accounting policies are further discussed in the 2007 Form 10-K. There have been no material changes in the Company's critical accounting policies since December 31, 2007.

Table of Contents

Recent Accounting Pronouncements

Recent accounting pronouncements affecting the Company are discussed in the notes to the consolidated financial statements.

Various other accounting proposals affecting the banking industry are pending with the Financial Accounting Standards Board. Given the inherent uncertainty of the proposal process, the Company cannot assess the impact of any such proposals on its financial condition or results of operations.

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements made by or on behalf of the Company. The Company and its representatives have made, and may continue to make, various written or oral forward-looking statements with respect to business and financial matters, including statements contained in this report, filings with the Securities and Exchange Commission, and press releases. Generally, the words believe, expect, intend, estimate, anticipate, project, will, should, and similar identify forward-looking statements. All statements which address operating performance, events or developments that we expect or anticipate will occur in the future, including statements related to loan growth, deposit growth, per share growth, and statements expressing general sentiment about future operating results and non-historical information, are forward-looking statements within the meaning of the Act. The forward-looking statements are and will be based on management's then current views and assumptions regarding future events and operating performance. The Company undertakes no obligation to publicly update or revise any forward-looking statements in light of new information or future events.

Forward-looking statements involve inherent risks and uncertainties. Certain factors that could cause actual results to differ materially from estimates contained in or underlying forward-looking statements include:

Competitive pressures between depository and other financial institutions may increase significantly.

Changes in the interest rate environment may reduce margins and impact funding sources.

General economic or business conditions in the geographic regions and industry in which the Company operates may lead to a deterioration in credit quality or a reduced demand for credit.

Legislative or regulatory changes, including changes in accounting standards, monetary policies, and taxation requirements, may adversely affect the Company's business.

Other factors include:

Changes in consumer spending and saving habits as well as real estate markets.

Management of costs associated with expansion of existing and development of new distribution channels, and ability to realize increased revenues from these distribution channels.

The outcome of litigation which depends on judicial interpretations of law and findings of juries.

Table of Contents

The effect of mergers, acquisitions, and/or dispositions and their integration into the Company.

Other risks and uncertainties as detailed from time to time in Company filings with the Securities and Exchange Commission. The foregoing list of factors is not exclusive. Many of the factors that will determine actual financial performance and values are beyond the Company's ability to predict or control. This Analysis should be read in conjunction with the consolidated financial statements and related notes.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The discussion on market risk is included in the Interest Rate and Market Risk/Interest Rate Sensitivity section of Part I, Item 2.

Item 4T. Controls and Procedures.

An evaluation of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Act") as of June 30, 2008, was carried out under the supervision and with the participation of the Company's Chief Executive Officer (CEO), Chief Financial Officer (CFO), Treasurer, and other members of management. The CEO and Treasurer concluded that, as of June 30, 2008, the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is: (i) accumulated and communicated to the Company's management, including the CEO and the Treasurer, in a timely manner, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Act) that occurred during the quarter ended June 30, 2008 that has materially affected, or is likely to materially affect, such internal controls.

The Company does not expect that its disclosure controls and procedures will prevent all error and fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies and procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

The Company intends to continually review and evaluate the design and effectiveness of its disclosure controls and procedures, to improve its controls and procedures over time, and to correct any deficiencies it may discover in the future. The goal is to ensure that management has timely access to all material financial and non-financial information concerning the Company's business. While the Company believes the present design of its disclosure controls and procedures is effective to achieve its goal, future events affecting its business may cause the Company to modify its disclosure controls and procedures.

Table of Contents

Section 404 of the Sarbanes-Oxley Act of 2002 requires that the Company evaluate and annually report on its system of internal control over financial reporting. For several years, the Company has used the widely accepted Committee of Sponsoring Organization of the Treadway Commission (COSO) framework for its evaluation of such internal controls. Going forward, the Company s independent accountants must report on management s evaluation. The Company is in the process of evaluating, documenting, and testing its system of internal control over financial reporting to provide the basis for its independent accountant s attestation report that is anticipated to be a required part of Form 10-K for the fiscal year ending December 31, 2009. Due to the ongoing evaluation and testing of internal controls, there can be no assurance that any control deficiencies identified will be remediated before the end of the 2009 fiscal year, or that there may not be significant deficiencies or material weaknesses that would be required to be reported. In addition, the Company expects the evaluation process and any required remediation, if applicable, to increase accounting, legal, and other costs and divert management resources from core business operations.
