No financial product offered by State Street Global Markets, LLC or its affiliates is sponsored, endorsed, sold or promoted by S&P, its affiliates or its third party licensors.

Table of Contents**SUMMARY****Investment Objective**

The Trust seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of the Dow Jones Industrial Average (the DJIA).

Fees and Expenses of the Trust

This table estimates the fees and expenses that the Trust pays on an annual basis, which you therefore pay indirectly when you buy and hold Units. It does not reflect brokerage commissions that you may pay for purchases and sales of Units on the secondary markets.

Unitholder Fees:

(fees paid directly from your investment)

None

Estimated Annual Trust Ordinary Operating Expenses:

(expenses that you pay each year as a percentage of the value of your investment)

Current Estimated Annual Trust Ordinary Operating Expenses	As a % of Trust Average Net Assets
Trustee's Fee	0.06%
DJIA License Fee	0.04%
Marketing	0.06%
Other Operating Expenses	0.01%
<u>Expenses</u>	0.17%

Future expense accruals will depend primarily on the level of the Trust's net assets and the level of expenses.

Growth of \$10,000 Investment Since Inception⁽¹⁾

(1) Past performance is not necessarily an indication of how the Trust will perform in the future.

Table of Contents

The Trust's Investments and Portfolio Turnover

The Trust seeks to achieve its investment objective by holding a portfolio of the common stocks that are included in the DJIA (the Portfolio), with the weight of each stock in the Portfolio substantially corresponding to the weight of such stock in the DJIA.

In this prospectus, the term Portfolio Securities refers to the common stocks that are actually held by the Trust and make up the Trust's Portfolio, while the term Index Securities refers to the common stocks that are included in the DJIA, as determined by S&P Dow Jones Indices LLC (S&P). At any time, the Portfolio will consist of as many of the Index Securities as is practicable. To maintain the correspondence between the composition and weightings of Portfolio Securities and Index Securities, State Street Bank and Trust Company, the trustee of the Trust (the Trustee), adjusts the Portfolio from time to time to conform to periodic changes made by S&P to the identity and/or relative weightings of Index Securities in the DJIA. The Trustee generally makes these adjustments to the Portfolio within three (3) Business Days (as defined below in Purchases and Redemptions of Creation Units Purchase (Creation)) before or after the day on which changes in the DJIA are scheduled to take effect.

The Trust may pay transaction costs, such as brokerage commissions, when it buys and sells securities (or turns over its Portfolio). Such transaction costs may be higher if there are significant rebalancings of Index Securities in the Index, which may also result in higher taxes when Units are held in a taxable account. These costs, which are not reflected in estimated annual Trust ordinary operating expenses, affect the Trust's performance. During the most recent fiscal year, the Trust's portfolio turnover rate was 3% of the average value of its portfolio. The Trust's portfolio turnover rate does not include securities received or delivered from processing creations or redemptions of Units. Portfolio turnover will be a function of changes to the DJIA as well as requirements of the Trust Agreement (as defined below in Organization of the Trust).

Although the Trust may fail to own certain Index Securities at any particular time, the Trust generally will be substantially invested in Index Securities, which should result in a close correspondence between the performance of the DJIA and the performance of the Trust. See The DJIA below for more information regarding the DJIA. The Trust does not hold or trade futures or swaps and is not a commodity pool.

Dividends

Payments of dividends are made monthly, on the Monday preceding the third (3rd) Friday of the next calendar month. See Dividends and Distributions and Additional Information Regarding Dividends and Distributions.

Table of Contents

Redemption of Units

Only certain institutional investors (typically market makers or other broker-dealers) are permitted to purchase or redeem Units directly with the Trust, and they may do so only in large blocks of 50,000 Units known as Creation Units. See Purchases and Redemptions of Creation Units Redemption and Trust Agreement for more information regarding the rights of Beneficial Owners (as defined in Book-Entry-Only System).

Voting Rights; Book-Entry-Only-System

Beneficial Owners shall not have the right to vote concerning the Trust, except with respect to termination and as otherwise expressly set forth in the Trust Agreement. See Trust Agreement. Units are represented by one or more global securities registered in the name of Cede & Co., as nominee for The Depository Trust Company (DTC) and deposited with, or on behalf of, DTC. See Book-Entry-Only System.

Amendments to the Trust Agreement

The Trust Agreement (as defined below in Organization of the Trust) may be amended from time to time by the Trustee and PDR Services, LLC (the Sponsor) without the consent of any Beneficial Owners under certain circumstances described herein. The Trust Agreement may also be amended by the Sponsor and the Trustee with the consent of the Beneficial Owners to modify the rights of Beneficial Owners under certain circumstances. Promptly after the execution of an amendment to the Trust Agreement, the Trustee arranges for written notice to be provided to Beneficial Owners. See Trust Agreement Amendments to the Trust Agreement.

Principal Risks of Investing in the Trust

As with all investments, there are certain risks of investing in the Trust, and you could lose money on an investment in the Trust. Prospective investors should carefully consider the risk factors described below, as well as the additional risk factors under Additional Risk Information and the other information included in this prospectus, before deciding to invest in Units.

Passive Strategy/Index Risk. The Trust is not actively managed. Rather, the Trust attempts to track the performance of an unmanaged index of securities. This differs from an actively managed fund, which typically seeks to outperform a benchmark index. As a result, the Trust will hold constituent securities of the DJIA regardless of the current or projected performance of a specific security or a particular industry or market sector. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause the Trust's return to be lower than if the Trust employed an active strategy.

Table of Contents

Index Tracking Risk. While the Trust is intended to track the performance of the DJIA as closely as possible (*i.e.*, to achieve a high degree of correlation with the DJIA), the Trust's return may not match or achieve a high degree of correlation with the return of the DJIA due to expenses and transaction costs incurred in adjusting the Portfolio. In addition, it is possible that the Trust may not always fully replicate the performance of the DJIA due to the unavailability of certain Index Securities in the secondary market or due to other extraordinary circumstances (*e.g.*, if trading in a security has been halted). In addition, the Trust's portfolio may deviate from the DJIA to the extent required to ensure continued qualification as a regulated investment company under Subchapter M of the Code.

Equity Investing Risk. An investment in the Trust involves risks similar to those of investing in any fund of equity securities, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in securities prices.

An investment in the Trust is subject to the risks of any investment in a portfolio of large-capitalization common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of such investment. The value of Portfolio Securities may fluctuate in accordance with changes in the financial condition of the issuers of Portfolio Securities, the value of common stocks generally and other factors. The identity and weighting of Index Securities and the Portfolio Securities change from time to time.

The financial condition of issuers of Portfolio Securities may become impaired or the general condition of the stock market may deteriorate, either of which may cause a decrease in the value of the Portfolio and thus in the value of Units. Since the Trust is not actively managed, the adverse financial condition of an issuer will not result in its elimination from the Portfolio unless such issuer is removed from the DJIA. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic and banking crises.

Holders of common stocks of any given issuer incur more risk than holders of preferred stocks and debt obligations of the issuer because the rights of common stockholders, as owners of the issuer, generally are subordinate to the rights of creditors of, or holders of debt obligations or preferred stocks issued by, such issuer. Further, unlike debt securities that typically have a stated principal amount payable at maturity, or preferred stocks that typically have a liquidation preference and may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding. The value of the Portfolio will fluctuate over the entire life of the Trust.

Table of Contents

The Trust may have significant investments in one or more specific industries or sectors, subjecting it to risks greater than general market risk.

The Trust may invest a larger percentage of its assets in the securities of a few issuers. As a result, the Trust's performance may be disproportionately impacted by the performance of relatively few securities.

There can be no assurance that the issuers of Portfolio Securities will pay dividends. Distributions generally depend upon the declaration of dividends by the issuers of Portfolio Securities and the declaration of such dividends generally depends upon various factors, including the financial condition of the issuers and general economic conditions.

Trust Performance

The following bar chart and table provide an indication of the risks of investing in the Trust by showing changes in the Trust's performance based on net assets from year to year and by showing how the Trust's average annual return for certain time periods compares with the average annual return of the DJIA. The Trust's past performance (before and after taxes) is not necessarily an indication of how the Trust will perform in the future. Updated performance information is available online at <http://www.spdrs.com>.

The total returns in the bar chart, as well as the total and after-tax returns presented in the table, have been calculated assuming dividends and capital gain distributions have been reinvested in the Trust at the net asset value per Unit (NAV) on the Dividend Payment Date (see Additional Information Regarding Dividends and Distributions). No dividend reinvestment services are provided by the Trust (see Dividends and Distributions), so investors' performance may be different from that shown below in the bar chart and table.

Annual Total Return (years ended 12/31)

Highest Quarterly Return: 15.71% for the quarter ended September 30, 2009

Lowest Quarterly Return: -18.39% for the quarter ended December 31, 2008

Table of Contents

Average Annual Total Returns (for periods ending December 31, 2016)

The after-tax returns presented in the table are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Units through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. The returns after taxes can exceed the return before taxes due to an assumed tax benefit for a holder of Units from realizing a capital loss on a sale of the Units.

	Past One Year	Past Five Years	Past Ten Years
Trust			
Return Before Taxes	16.23%	12.72%	7.34%
Return After Taxes on Distributions	15.55%	12.13%	6.85%
Return After Taxes on Distributions and Sale or Redemption of Creation Units			
Units	9.66%	10.11%	5.89%
Index (reflects no deduction for fees, expenses or taxes)	16.50%	12.92%	7.52%

PURCHASE AND SALE INFORMATION

Individual Units of the Trust may be purchased and sold on NYSE Arca, Inc. (the Exchange), under the market symbol DIA, through your broker-dealer at market prices. Units trade at market prices that may be greater than the net asset value per Unit (NAV) (premium) or less than NAV (discount). Units are also listed and traded on the Singapore Exchange Securities Trading Limited (stock code D07) and Euronext Amsterdam (ticker symbol DIA). In the future, Units may be listed and traded on other non-U.S. exchanges. Units may be purchased on other trading markets or venues in addition to the Exchange, the Singapore Exchange Securities Trading Limited and Euronext Amsterdam. Euronext Amsterdam is an indirect wholly owned subsidiary of NYSE Holdings LLC.

Only certain institutional investors (typically market makers or other broker-dealers) are permitted to purchase or redeem Units directly with the Trust, and they may do so only in large blocks of 50,000 Units known as Creation Units. Creation Unit transactions are conducted in exchange for the deposit or delivery of in-kind securities and/or cash constituting a substantial replication of the securities included in the DJIA.

Table of Contents**TAX INFORMATION**

The Trust will make distributions that are expected to be taxable currently to you as ordinary income and/or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account. See Federal Income Taxes, below, for more information.

THE DJIA

The DJIA was first published in 1896. Initially composed of 12 companies, the DJIA has evolved into the most recognizable stock indicator in the world, and the only index composed of companies that have sustained earnings performance over a significant period of time. In its second century, the DJIA is the oldest continuous barometer of the U.S. stock market, and the most widely quoted indicator of U.S. stock market activity.

The companies represented by the 30 stocks now composing the DJIA are all leaders in their respective industries, and their stocks are widely held by individuals and institutional investors.

S&P is not responsible for and shall not participate in the creation or sale of Units or in the determination of the timing, pricing, or quantities and proportions of purchases or sales of Index Securities or Portfolio Securities by the Trust. The information in this prospectus concerning S&P and the DJIA has been obtained from sources that the Sponsor believes to be reliable, but the Sponsor takes no responsibility for the accuracy of such information.

The following table shows the actual performance of the DJIA for the years 1896 through 2016. The results shown should not be considered representative of the income yield or capital gain or loss that may be generated by the DJIA in the future. THE RESULTS SHOULD NOT BE CONSIDERED REPRESENTATIVE OF THE PERFORMANCE OF THE TRUST.

Year Ended	DJIA Close	Point Change	Year % Change	Divs	% Yield
2016	19762.60	2337.57	13.42	477.49	2.42
2015	17425.03	398.04	2.23	436.18	2.5
2014	17823.07	1246.41	7.52	388.77	2.18
