RESEARCH FRONTIERS INC Form 10-Q August 04, 2016

UNITED STATES SECURITIES AND EXCHANGE COMMISSION WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For Quarter Ended June 30, 2016 Commission File No. 1-9399

RESEARCH FRONTIERS INCORPORATED

(Exact name of registrant as specified in charter)

Delaware 11-2103466
(State of incorporation or organization) (IRS Employer Identification No.)

240 Crossways Park Drive, Woodbury, N.Y. (Address of principal executive offices)

11797 (Zip Code)

(516) 364-1902

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes X No ___

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes X No ___

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [] Accelerated filer [X] Non-accelerated filer [] Smaller reporting company []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes [] No [X]

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: As of August 4, 2016, there were outstanding 24,043,846 shares of Common Stock, par value \$0.0001 per share.

RESEARCH FRONTIERS INCORPORATED Notes to Consolidated Financial Statements June 30, 2016 (Unaudited)

Basis of Presentation

The accompanying unaudited consolidated condensed financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All such adjustments are of a normal recurring nature. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2016. For further information, refer to the consolidated financial statements and footnotes thereto included in the Annual Report on Form 10-K relating to Research Frontiers Incorporated (the Company) for the fiscal year ended December 31, 2015.

Business

Research Frontiers Incorporated (Research Frontiers or the Company) operates in a single business segment which is engaged in the development and marketing of technology and devices to control the flow of light. Such devices, often referred to as light valves or suspended particle devices (SPDs), use colloidal particles that are either incorporated within a liquid suspension or a film, which is usually enclosed between two sheets of glass or plastic having transparent, electrically conductive coatings on the facing surfaces thereof. At least one of the two sheets is transparent. SPD technology, made possible by a flexible light-control film invented by Research Frontiers, allows the user to instantly and precisely control the shading of glass/plastic manually or automatically. SPD technology has numerous product applications, including: SPD-Smart windows, sunshades, skylights and interior partitions for homes and buildings; automotive windows; sunroofs, sun-visors, sunshades, rear-view mirrors, instrument panels and navigation systems; aircraft windows; train windows; eyewear products; frames, cases and partitions protecting light-sensitive artwork, documents and artifacts; and flat panel displays for electronic products. SPD-Smart light control film is now being developed for, or used in, architectural, automotive, marine, aerospace and applications.

The Company has historically utilized its cash and the proceeds from the sale of its investments to fund its research and development of SPD light valves, for marketing initiatives, and for other working capital purposes. The Company s working capital and capital requirements depend upon numerous factors, including the results of research and development activities, competitive and technological developments, the timing and cost of patent filings, and the development of new licensees and changes in the Company s relationships with its existing licensees. The degree of dependence of the Company s working capital requirements on each of the forgoing factors cannot be quantified; increased research and development activities and related costs would increase such requirements; the addition of new licensees may provide additional working capital or working capital requirements, and changes in relationships with existing licensees would have a favorable or negative impact depending on the nature of such changes. There can be no assurance that expenditures will not exceed the anticipated amounts or that additional financing, if required, will be available when needed or, if available, that s its terms will be favorable or acceptable to the Company. Eventual success of the Company and generation of positive cash flow will be dependent upon the commercialization of products using the Company s technology by the Company s licensees and payments of continuing royalties on account thereof. To date, the Company has not generated sufficient revenue from its licensees to fully fund its operations.

Patent Costs

The Company expenses costs relating to the development, acquisition or enforcement of patents due to the uncertainty of the recoverability of these items.

Revenue Recognition

The Company has entered into a number of license agreements covering its light-control technology. The Company receives minimum annual royalties under certain license agreements and records fee income on a ratable basis each quarter. In instances when sales of licensed products by its licensees exceed minimum annual royalties, the Company recognizes fee income as the amounts have been earned. Certain of the fees are accrued by, or paid to, the Company in advance of the period in which they are earned resulting in deferred revenue. Such excess amounts are recorded as deferred revenue and recognized into income in future periods as earned.

Fee Income

Fee income represents amounts earned by the Company under various license and other agreements relating to technology developed by the Company. During the first six months of 2016, three licensees accounted for 10% or more of fee income of the Company; these licensees accounted for approximately 30%, 26% and 15%, respectively of fee income recognized during such period. During the first six months of 2015, two licensees accounted for 10% or more of fee income of the Company; these licensees accounted for approximately 30% and 14%, respectively of fee income recognized during this period. In addition, during the six months ended June 30, 2015, approximately 23% of revenues related to fees generated by a large architectural glass project.

Stock-Based Compensation

The Company has granted options/warrants to consultants. GAAP requires that all stock-based compensation be recognized as an expense in the financial statements and that such costs be measured at the fair value of the award. These awards generally vest ratably over 12 to 60 months from the date of grant and the Company charges to operations quarterly the current market value of the options using the Black-Scholes method. During the six months ended June 30, 2016 there were no charges related to options granted to consultants. During the six months ended June 30, 2015 a charge of \$10,007 was recorded to operations reflecting the fair value of the options using the Black-Scholes method with the following weighted average assumptions:

	2015
Risk free interest rate	1.7%
Option Life	8.9 years
Volatility	65%

The Company did not grant any stock options to employees and directors during the three and six months ended June 30, 2016 and 2015.

In connection with the restricted stock grants to employees and directors, the Company charged \$57,967 to operations during the three months ended June 30, 2015 and \$115,923 was charged to operations during the six months ended June 30, 2015. During the six months ended June 30, 2016 there were no charges related to options granted to employees and directors.

Income Taxes

Since inception, the Company has incurred losses from operations and as a result has not recorded income tax expense. Benefits related to net operating loss carryforwards and deferred items have been fully reserved since it was not more likely than not that the Company would achieve profitable operations.

Equity

The Company did not sell any equity securities during the six months ended June 30, 2016.

The Company received proceeds of \$490,623 during the six months ended June 30, 2015, in connection with stock issued by the exercise of options and warrants previously granted.

Treasury Stock

The Company did not repurchase any of its stock during the six months ended June 30, 2016 and 2015.

Investments

The Company classifies investments in marketable securities as trading, available-for-sale or held-to-maturity at the time of purchase and periodically re-evaluates such classifications. Trading securities are carried at fair value, with unrealized holding gains and losses included in earnings. Held-to-maturity securities are recorded at cost and are adjusted for the amortization or accretion of premiums or discounts over the life of the related security. Unrealized holding gains and losses on available-for-sale securities are excluded from earnings and are reported as a separate component of accumulated other comprehensive income (loss) until realized. In determining realized gains and losses, the cost of securities sold is based on the specific identification method. Interest and dividends on the investments are accrued at the balance sheet date. At June 30, 2016 and December 31, 2015 all investments were classified as held to maturity and consisted of the following:

		June	2016	Decem	ber 31, 2015
		Valu	ue of Held to	Value o	of Held to
Certificates of Deposit	Ma	aturity Mat	urity Investment	Maturit	y Investment
Investmen		Date	(based on cost)	(ba	sed on cost)
1,503,525	Au	igust 27, 2016	1,518,925		1,513,784
		\$	1 518 925	\$	1 513 784

Fair Value Measurements

We value financial instruments using a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities; Level 2, defined as inputs other than quoted prices for similar assets or liabilities in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Financial assets accounted for at fair value on a recurring basis at June 30, 2016 include cash, cash equivalents and short term investments of approximately \$5.3 million. These assets are carried at fair value based on quoted market prices for identical securities (Level 1 inputs).

Management s Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Policies

The following accounting policies are important to understanding our financial condition and results of operations and should be read as an integral part of the discussion and analysis of the results of our operations and financial position. For additional accounting policies, see note 2 to our consolidated financial statements, Summary of Significant Accounting Policies in our Form 10-K report for the period ending December 31, 2015.

The Company has entered into a number of license agreements covering products using the Company s SPD technology. The Company receives fees and minimum annual royalties under certain license agreements and records fee income on a ratable basis each quarter. In instances when sales of licensed products by its licensees exceed minimum annual royalties, the Company recognizes fee income as the amounts have been earned. Certain of the fees are accrued by, or paid to, the Company in advance of the period in which they are earned resulting in deferred revenue.

The Company expenses costs relating to the development or acquisition of patents due to the uncertainty of the recoverability of these items. All of our research and development costs are charged to operations as incurred. Our research and development expenses consist of costs incurred for internal and external research and development. These costs include direct and indirect overhead expenses.

The Company has historically used the Black-Scholes option-pricing model to determine the estimated fair value of each option grant. The Black-Scholes model includes assumptions regarding dividend yields, expected volatility, expected lives, and risk-free interest rates. These assumptions reflect our best estimates, but these items involve uncertainties based on market conditions generally outside of our control. As a result, if other assumptions had been used in the current period, stock-based compensation expense could have been materially impacted. Furthermore, if management uses different assumptions in future periods, stock-based compensation expense could be materially impacted in future years.

On occasion, the Company may issue consultants either options or warrants to purchase shares of common stock of the Company at specified share prices. These options or warrants may vest based upon specific services being performed or performance criteria being met. In accounting for equity instruments that are issued to other than employees for acquiring, or in conjunction with selling, goods or services, the Company would be required to record consulting expenses based upon the fair value of such options or warrants on the earlier of the service period or the period that such options or warrants vest as determined using a Black-Scholes option pricing model.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates. An example of a critical estimate is the full valuation allowance for deferred taxes that was recorded based on the uncertainty that such tax benefits would be realized in future periods.

Results of Operations

The majority of the Company's fee income comes from the activities of several licensees participating in the automotive market. The Company currently believes that the automotive market will be the largest source of its royalty income over the next several years. The Company's royalty income from this market may be influenced by numerous factors including various trends affecting demand in the automotive industry and the rate of introduction of new technology in OEM product lines. In addition to these macro factors, the Company's royalty income from the automotive market could also be influenced by specific factors such as whether the Company's SPD-SmartGlass technology appears as standard equipment or as an option on a particular vehicle, the number of additional vehicle models that SPD-SmartGlass appears on, the size of each window on a vehicle and the number of windows on a vehicle that use SPD SmartGlass, fluctuations in the total number of vehicles produced by a manufacturer, and in the percentage of cars within model like produced with SPD-SmartGlass, and changes in pricing or exchange rates.

Certain license fees, which are paid to the Company in advance of the accounting period in which they are earned resulting in the recognition of deferred revenue for the current accounting period, which will be recognized as fee income in future periods. Also, licensees may offset some or all of their royalty payments on sales of licensed products for a given period by applying these advance payments towards such earned royalty payments. Because the Company s license agreements typically provide for the payment of royalties by a licensee on product sales within 45 days after the end of the quarter in which a sale of a licensed product occurs (with some of the Company s more recent license agreements providing for payments on a monthly basis), and because of the time period which typically will elapse between a customer order and the sale of the licensed product and installation in a home, office building, automobile, aircraft, boat or any other product, there could be a delay between when economic activity between a licensee and its customer occurs and when the Company gets paid its royalty resulting from such activity.

Six months ended June 30, 2016 Compared to the Six months ended June 30, 2015

The Company s fee income from licensing activities for the six months ended June 30, 2016 was \$653,564, as compared to \$1,182,891 for the six months ended June 30, 2015. A substantial majority of this decrease was principally the result of non-recurring fees earned last year associated with the Company s participation in the Milan Expo, and non-recurring fee income under several licenses in 2015. To a much lesser extent, fee income from automobiles and aircraft using the Company s technology was lower in the first half of 2016 due to: (1) lower production levels of certain car models in the first half of 2016; (2) lower costs to the OEM (and therefore lower royalties per car to the Company) for glass incorporating the Company s technology on certain car models, and (3) a design improvement in certain aircraft that caused a short-term reduction in new window installations. These factors were partially partially offset by (4) higher sales volumes on other car and aircraft models using the Company s technology. The Company believes that the temporary factors causing reduced royalty income in the first half of 2016 to be short term, and the Company has been informed to expect increased production of vehicles in automotive and aircraft using the Company s technology, as well as higher take rates on all cars offering the Magic Sky Control option, starting with the second half of 2016 when the 2017 model year cars are produced by Mercedes-Benz. In the first six months of 2016, the Company received royalty revenues from sales of the Magic Sky Control option on the S-Class Coupe, Maybach and S-Class Sedan, and SL and SLK/SLC roadsters in excess of the minimum annual royalty levels for the two licensees supplying products using the Company s technology to Daimler. As such, royalties from these five car models will be accretive to the Company's royalty revenue. Production efficiencies are expected to continue and accelerate with the introduction of the higher vehicle production volumes for various car models going forward, and the Company expects that lower pricing per square foot of the Company s technology could expand the market opportunities, adoption rates, and revenues for its technology in automotive and non-automotive applications. The Company expects to generate additional royalty income from the near-term introduction of additional new car and aircraft models from other OEMS (original equipment manufacturers), continued growth of sales of products using the Company s technology for the marine industry in yachts and other watercraft, in trains, in museums, and in larger architectural projects.

Operating expenses decreased by \$82,168 for the six months ended June 30, 2016 to \$2,052,096 from \$2,134,264 for the six months ended June 30, 2015. This decrease was principally the result of lower payroll costs principally due to noncash stock and option grant compensation costs of \$102,000 in the prior year period. In addition, the Company incurred lower professional fees (\$18,000) partially offset by higher depreciation related to trade show displays (\$52,000).

Research and development expenditures increased by \$144,817 to \$913,789 for the six months ended June 30, 2016 from \$768,972 for the six months ended June 30, 2015. This increase was principally the result of higher payroll costs (\$186,000) partially offset by lower allocated facility and office expense costs (\$22,000) and lower materials cost (\$11,000).

The Company s net investment income for the six months ended June 30, 2016 was \$18,870 compared to \$22,680 earned for the six months ended June 30, 2015

As a consequence of the factors discussed above, the Company s net loss was \$2,293,451 (\$0.10 per common share) for the six months ended June 30, 2016 as compared to \$1,697,665 (\$0.07 per common share) for the six months ended June 30, 2015.

Three months ended June 30, 2016 Compared to the Three months ended June 30, 2015

The Company s fee income from licensing activities for the three months ended June 30, 2016 was \$244,432, as compared to \$803,494 for the three months ended June 30, 2015. The factors underlying this decrease are the same temporary and non-recurring factors discussed above.

Operating expenses decreased by \$96,137 for the three months ended June 30, 2016 to \$865,590 from \$961,727 for the three months ended June 30, 2015. This decrease was principally the result of lower payroll costs (\$104,000).

Research and development expenditures increased by \$169,054 to \$503,572 for the three months ended June 30, 2016 from \$334,518 for the three months ended June 30, 2015. This increase was principally the result of higher payroll costs (\$170,000).

The Company s net investment income for the three months ended June 30, 2016 was \$7,972 compared to \$11,464 earned for the three months ended June 30, 2015 with the reduction due to lower cash balances available for investment.

As a consequence of the factors discussed above, the Company s net loss was \$1,116,758 (\$0.05 per common share) for the three months ended June 30, 2016 as compared to \$481,287 (\$0.02 per common share) for the three months ended June 30, 2015.

Financial Condition, Liquidity and Capital Resources

The Company has primarily utilized its cash, cash equivalents, short-term investments, and the proceeds from its investments to fund its research and development, for marketing initiatives, and for other working capital purposes. The Company s working capital and capital requirements depend upon numerous factors, including, but not limited to, the results of research and development activities, competitive and technological developments, the timing and costs of patent filings, and the development of new licensees and changes in the Company s relationship with existing licensees. The degree of dependence of the Company s working capital requirements on each of the foregoing factors cannot be quantified; increased research and development activities and related costs would increase such requirements; the addition of new licensees may provide additional working capital or working capital requirements, and changes in relationships with existing licensees would have a favorable or negative impact depending upon the nature of such changes.

During the six months ended June 30, 2016, the Company s cash and cash equivalents balance decreased by \$1,922,519. The decrease was mainly due to cash used for operations of \$1,912,360 and the purchase of fixed assets of \$5,018 as well as the change in the value of investments of \$5,141. As of June 30, 2016 the Company had working capital (total current assets less total current liabilities) of \$6,010,020 and total shareholder s equity of \$6,782,354.

The Company expects to use its cash to fund its research and development of SPD light valves, its expanded marketing initiatives, and for other working capital purposes. The Company s working capital and capital requirements depend upon numerous factors, including the results of research and development activities, competitive and technological developments, the timing and cost of patent filings, the development of new licensees and changes in the Company s relationships with its existing licensees. The degree of dependence of the Company s working capital requirements on each of the foregoing factors cannot be quantified; increased research and development activities and related costs would increase such requirements; the addition of new licensees may provide additional working capital or working capital requirements, and changes in relationships with existing licensees would have a favorable or negative impact depending upon the nature of such changes. Based upon existing cash reserves and historical revenues and cash expenditures, the Company believes that it's current cash and cash equivalents would fund its operations through early 2018. There can be no assurances that expenditures will not exceed the anticipated amounts or that additional financing, if required, will be available when needed or, if available, that its terms will be favorable or acceptable to the Company. Eventual success of the Company and generation of positive cash flow will be dependent upon the extent of commercialization of products using the Company s technology by the Company s licensees and payments of continuing royalties on account thereof. To date the Company has not generated sufficient revenue from licensees to fully fund its operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The information required by Item 3 has been disclosed in Item 7A of the Company s Annual Report on Form 10-K for the year ended December 31, 2015. There has been no material change in the disclosure regarding market risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act, are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. We designed our disclosure controls and procedures to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officer, to allow timely decisions regarding required disclosure. Our chief executive officer and chief financial officer, with assistance from other members of our management, have reviewed the effectiveness of our disclosure controls and procedures as of June 30, 2016, and, based on their evaluation, have concluded that our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the six months ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Forward-Looking Statements

The information set forth in this Report and in all publicly disseminated information about the Company, including the narrative contained in Management s Discussion and Analysis of Financial Condition and Results of Operations above, includes forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and is subject to the safe harbor created by that section. Readers are cautioned not to place undue reliance on these forward-looking statements as they speak only as of the date hereof and are not guaranteed.
