2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements have been prepared in accordance with accounting practices adopted in Brazil, in accordance with Brazilian corporation law, rules of the Brazilian Securities Commission (CVM) and rules applicable to Switched Fixed Telecommunications Services (STFC) concessionaires.

As the Company is registered with the Securities and Exchange Commission (SEC), it is subject to its standards, and should annually prepare financial statements and other information by using criteria that comply with that entity's requirements. For complying with these requirements and aiming at meeting the market's information needs, the

Company adopts, as a principle, the practice of publishing information in both markets in their respective languages.

The notes to the financial statements are presented in thousands of reais, unless demonstrated otherwise in each note. According to each situation, the notes to the financial statements present information related with the Company and the consolidated financial statements, identified as PARENT COMPANY and CONSOLIDATED, respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED.

The accounting estimates were based on objective and subjective factors, based on management's judgment to determine the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, provision for doubtful accounts, inventories and deferred income tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to benefits for employees. The settlement of transactions involving these estimates may result in significant different amounts due to the inherent imprecision of the process of determining these amounts. Management reviews its estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the Company and its subsidiaries mentioned in Note 1.

Some of the main consolidation procedures are:

- Elimination of intercompany balances, as well as revenue and expenses of transactions among them;
- Elimination of the investor's shareholdings, reserves and accumulated results in the investees; and
- Segregation of the portions of shareholders' equity and result of minority shareholders, indicated in the specific items.

The reconciliation between the Parent Company net income and the consolidated figures is as follows:

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refer to the practices adopted by the Company and its subsidiaries which are reflected in the consolidated balance sheet.

a. Cash and Cash Equivalents: Cash equivalents are short-term, high-liquidity investments, with immediate mature. They are recorded at cost, plus income earned to the balance sheet date, not exceeding market value. The investment fund quotas are valued by the quota value on 3/31/05.

b. Trade Accounts Receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff in effect on the date the service is rendered. Unbilled services provided to customers at the balance sheet date are also included in trade accounts receivable. Receivables resulting from sales of cell phones and accessories are recorded by the amount of sales made, at the moment in which the goods are delivered and accepted by the customer. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion, maintenance and also, in relation to consolidated statements, goods inventories for resale, mainly composed by cell phones, accessories and electronic cards - chips. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and long-term assets, in accordance with the period in which they will be used, and the resale inventories are classified as current assets, whose composition is stated in note 19. Obsolete inventories are recorded as allowance for losses. About cell phones and accessories, the subsidiary BrT Celular records the adjustments for the trading prices held as of the balance sheet date, in the cases in which the acquisitions presented higher values.

d. Investments: Investments in subsidiaries are valued using the equity method. Goodwill is calculated based on the expectation of future results and its amortization is based on the expected realization/timing over a forecasted period of not more than ten years. Other investments are recorded at cost less allowance for losses, when applicable. The investments resulting from income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas, they remain recognized in long-term assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued at cost or market prices, when the latter is lower, and allowances for losses are recorded if required.

e. Property, Plant and Equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

The costs incurred, when they represent improvements (increase in installed capacity or useful life) are capitalized. Maintenance and repair are charged to the profit and losses accounts, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 25.

f. Deferred Charges: Segregated between deferred charges on amortization and formation. Their breakdown is shown in Note 26. Amortization is calculated using the straight-line method, for the period of five years, in accordance with the legislation in force. When benefits are not expected from an asset, it is written off against non operating income.

g. Income Tax and Social Contribution on Income: Income tax and social contribution of legal entity are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses and the negative social contribution base are recorded under assets or liabilities, as applicable, according to the assumption of realization or future demand.

h. Loans and Financing: Updated to the balance sheet date for monetary or exchange variations and interest incurred to the balance sheet date. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: Recognized based on management's risk assessment and measured based on economic grounds and legal counselors' opinions on the lawsuits and other contingency factors known as of the balance sheet date. The basis and nature of the provisions are described in Note 7.

j. Revenue Recognition: Revenues from services rendered are accounted for on an accrual basis. Local and long distance calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards (Public Use Telephony - TUP), cell phones and accessories are recorded upon sale. For prepaid services subject to mobile telephony, the revenue is recognized in accordance with the utilization of services. A non-recognized revenue is recognized if there is a significant uncertainty in its realization.

k. Recognition of Expenses: Expenses are recognized on an accrual basis, considering their relation with revenue realization. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on overdue accounts receivable from services, gains on financial investments and hedges. Financial expenses comprise interest incurred and other charges on loans, financing and other financial transactions.

Interest on Shareholders' Equity is included in the financial expenses balance; for financial statement presentation purposes, the amounts are reversed to profit and loss accounts and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects subject to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period from the beginning of the operations.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed by three Institutions. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis. As of December 31, 2001, the subsidiary Brasil Telecom S.A. recorded its actuarial deficit on the balance sheet date against shareholders' equity, net of its tax effects. As from 2002, as new actuarial revaluation show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts.

Complementary information on private pension plans is described in Note 6.

o. Profit Sharing: The provisions for employee and directors' profit sharing are recognized on an accrual basis. The calculation of the amount, which is paid in the subsequent year after the provision is recognized, is based on the target program established with the labor union, in accordance with Law 10,101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of outstanding shares on the balance sheet date, which comprises the total number of shares issued net of treasury stock.

4. RELATED-PARTY TRANSACTIONS

Related party transactions refer to existing operations carried out by the Company with its Brasil Telecom S.A., Nova Tarrafa Participações Ltda. and Nova Tarrafa Inc subsidiaries.

Operations between related parties and the Company are carried out under normal prices and market conditions. The main transactions are:

The nominal value of these debentures will be paid in two installments equivalent to 30% and 40% with maturities on July 27, 2005 and July 27, 2006, respectively. The debenture remuneration is equivalent to 100% of CDI, received semiannually. The balance of this asset is R\$935,195 (R\$972,006 on December 31, 2004), and the yield recognized in the income statement for the quarter represents R\$37,313 (R\$49,698 in 2004).

The balance payable is R\$386 (R\$184 on December 31, 2004) and the amounts recorded in the income statement for the quarter comprise operating expenses of R\$1,056 (R\$667 in 2004).

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiary assessed the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts, which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this note was made based on their materiality. Instruments whose values approximates their fair values, and risk assessment is not significant are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks; the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's and subsidiaries' business are the following:

a. Credit Risk

The majority of the services provided by the subsidiary Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit

policy, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the subsidiary may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the Company's default was 2.24% of the gross revenue (3.01% in 2004). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense.

Concerning mobile telephony, credit risk in cell phones sales and in service rendering in the postpaid category postpaid is minimized with the adoption of a credit pre-analysis of eligible customers. Still in relation to postpaid service, whose client base at the end of the quarter was 32.1% on 03/31/05 (33.1% in 12/31/04), the receivable accounts are also monitored in order to limit default and to cut the access to the service (out of phone traffic) if the bill is overdue for over fifteen days.

b. Exchange Rate Risk

Assets

The Company has loan agreements in foreign currency, and, therefore, subject to exchange rate fluctuation. The assets exposed to exchange rate risk are as follows:

	PARENT COMPANY		CONSOLIDATED	
	Book Value		Book Value	
	03/31/05	12/31/04	03/31/05	12/31/04

Long-term	186,806	192,796	116,200	118,273

The loans receivable in dollars were transferred to the Company at the time of the split off of Telebrás. Due to their original characteristics, no financing is available on the market under similar conditions, which led to the presentation of the book value only.

Liabilities

The Company and the subsidiary Brasil Telecom S.A. has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 27.2% (27.2% on December 31, 2004) of the total liabilities of borrowings and consolidated financing, minus the contracted hedge balances. In order to minimize this kind of risk, the Company enters into exchange hedge agreements with financial institutions. Out of the installment of the debt consolidated in foreign currency, 70.1% is protected against exchange variation. Unrealized positive or negative effects of these operations are recorded in the profit and loss accounts as gain or loss. To the quarter, consolidated net losses totaled R\$47,771 (net gains of R\$1,082 in 2004).

Net exposure as per book and market values, at the exchange rate prevailing on the balance sheet date, is as follows:

	PARENT COMPANY

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was future cash flows associated to each contracted instruments, minus the market rates in force on the balance sheet date.

c. Interest Rate RiskAssets

The private debentures issued by subsidiary Brasil Telecom S.A were fully subscribed by the Company.

The book values are equal to market values since the current conditions for contracting this type of financial instrument are similar to those in which they come from or do not have parameters for quotation or contracting.

Edgar Filing: BRASIL TELECOM HOLDING CO - Form 6-K

The sum of the Company's debentures, loans and financing concentrated in the subsidiary represents 89.6% (89.8% on December 31, 2004) of this type of assets.

Liabilities

In 2000, the Company issued private debentures convertible into preferred shares. This liability was contracted at the interest rate subject to TJLP. The risk subject to this liability arises from possible increase in this rate.

The subsidiary Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates subject to indexing units (TJLP, UMBNDES, CDI etc.). The risk inherent in these liabilities arises from possible variations in these rates. The Parent Company has contracted derivative contracts to hedge 39.9% (38% on December 31, 2004) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates. The Company also issued non-convertible private and public debentures. These liabilities were contracted at interest rates tied to the CDI, and the risk linked with this liability is the result of the possible increase in the rate.

The aforementioned liabilities at the balance sheet date are as follows:

PARENT COMPANY				
	03/31/05		12/31/04	
	Book Value	Market Value	Book Value	Market Value

Long-term	2,466,395	2,530,593	2,583,736	2,413,910

Book and market values are equivalent because the current contractual conditions for these types of financial

instruments are similar to those in which they were originated or they did not present parameters for quotation or contraction.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by subsidiary Brasil Telecom S.A. are not subject to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates which affect the subsidiary's debts. Consequently, a risk arises from this lack of linking.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risk are recorded in liabilities. Details on this risk are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity method and stated at acquisition cost. Brasil Telecom S.A., the Nova Tarrafa Participações Ltda. and the Nova Tarrafa Inc. are subsidiaries, the investments of which are carried under the equity method.

Investments valued at cost are immaterial in relation to total assets. The risks related to them would not cause significant impacts to the Company's if losses were to occur on these investments.

In the balance sheet date the investments were represented as follows:

	03/31/05		12/31/04	
	Book Value	Market Value	Book Value	Market Value
Investments	4,366,730	4,594,133	4,364,939	5,144,159

Not Listed in Stock Exchange	39,227	39,227	40,553	40,553
Other investments	8,530	8,530	8,765	8,765

The investment quoted on the stock exchange refers to the interest in Brasil Telecom S.A., and its market value valued based on the market quotations in trading between minority shareholders.

g. Temporary Cash Investment Risks

The Company has several temporary cash investments in exclusive financial investment funds (FIFs), whose assets are constituted by post-fixed federal securities, pre-fixed and exchange rates indexed to CDI, through future contracts indexed to the exchange rate of the Futures and Commodities Exchange - BM&F, federal public securities (NBC-E) referred to commercial dollar variation plus exchange coupon, foreign currency and own portfolio investment funds, backed in American treasury bonds and overnight operations. The Company has financial investments in the amount of R\$948,959 (R\$828,234 as of December 31, 2004). Income earned to the quarter date is recorded in financial income and amounts to R\$38,167 (R\$20,607 in 2004). In the consolidated financial statements the amounts is as follows: temporary cash investments in the amount of R\$2,731,519 (R\$3,154,730 as of December 31, 2004) and income earned in the amount of R\$97,861 (R\$71,989 in 2004).

i. Risk Related to Rules

On June 20, 2003, ANATEL ratified the Resolution 341, which forecasts new types of concession agreements, in force as from January 1, 2006 up to 2025. The new kind of concession agreement forecasts changes in how tariffs are adjusted, such as the General Price Index – Internal Supply (IGP-DI), would no more be used to set forth the tariff adjustments based on the annual inflation rate. Consequently, the Company's operations and competitive position can be affected by these changes.

6. BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company, its subsidiary Brasil Telecom S.A. and its wholly-owned subsidiary. These companies are better described together, and can be referred to as Brasil Telecom (group) and for the purpose of the pension scheme cited in this note, are also denominated Sponsor.

(a) Private Pension Plan

Brasil Telecom (group) sponsors private pension schemes related with retirement for its employees and assisted members, and in the case of the latter, medical assistance in some cases. These plans are managed by the following foundations: (i) Fundação 14 de Previdência Privada (Fundação 14); (ii) Fundação BrTPREV (FBrTPREV), former CRT, a company merged by the Company on 12/28/00; and (iii) Fundação SISTEL de Seguridade Social (SISTEL), which originated from certain companies of the former Telebrás System.

The bylaws stipulate approval of the supplementary pension policy and the joint liability attributed to the defined benefit plans is subject to the acts signed with the foundations, with the consent of the National Supplementary Pension Plan Superintendence – PREVIC, previously represented by the Supplementary Pensions Department - SPC, where applicable to the specific plans.

The sponsored plans are valued by independent actuaries on the balance sheet date and, in the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. The full liabilities are provided for plans showing deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Ruling 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing the surpluses.

Below the characteristics of the supplementary pension plans sponsored are described.

FUNDAÇÃO 14

Since the split of the only pension plan managed by SISTEL, PBS, in January 2000, the evolution tendency for a new stage was already forecasted. Such stage would result in an own and independent management model for TCSPREV pension plan, by means of a specific entity to manage and to operate them, and this fact has become more and more evident throughout the years. This tendency also occurred in the main SISTEL pension plan sponsoring companies, which created their respective supplementary pension plan foundations. In this scenario, Fundação 14 de Previdência Privada was created in 2004, with the purpose of taking over the management and operation of the TCSPREV pension plan, which started as from March 10, 2005, whose process was backed by the segment's specific legislation and properly approved by the National Supplementary Pension Plan Superintendence – PREVIC.

In accordance with the Transfer Agreement entered into between Fundação Sistel de Seguridade Social and Fundação 14 de Previdência Privada, SISTEL, by means of the Management Agreement, it will provide management and operation services of TCSPREV and PAMEC-BrT plans to Fundação 14, after the transferring of these plans, which took place on March 10, 2005, for a period of up to 18 months, while Fundação 14 organizes itself to take over the management and operation services of its plans.

Plans

TCSPREV (Defined Contribution, Settled Benefit and Defined Benefit)

This defined contribution and settled benefit plan was introduced on 2/28/00. On 12/31/01, all the pension plans sponsored by the Company with SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pension Department - SPC, due to the need for adjustments to the regulations. Thus, TCSPREV is constituted of defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, Convênio de Administração BrT, and the Termo de Relação Contratual Atípica, and the conditions established in the original plans were maintained. In March 2003 this plan was suspended to employees who wanted to be included in the supplementary pension plans sponsored by the Company, but it was reopened in February 2005. TCSPREV currently assists to around 54.7% of the staff.

PAMEC-BrT Health Care Plan for Supplementary Pension Beneficiaries (Defined Benefit)

Destined for health care of retirees and pensioners subject to Grupo PBT-BrT, which was merged to TCSPREV on 12/31/01.

Contributions Established for the Plans

TCSPREV Contributions to this plan, by group of participants, are established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV (defined contribution). In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the Company, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the Company. In the case of the PBS-TCS group, the sponsor's contribution in the quarter was 12% of the payroll of the participants; while the employees' contribution varies according to the age, service time and salary. An entry fee may also be payable depending on the age of entering the plan. The sponsors are responsible for the cost of all administrative expenses and risk benefits. In the quarter, contributions by the sponsor to the TCSPREV group represented, on average, 6.25% of the payroll of the plan participants. For employees, the average was 5.67%.

The contribution by the company in the quarter totaled R\$ 3,750 (R\$ 3,732 in 2004).

PAMEC-BrT

The contribution for this plan was fully paid in July 1998, through a single payment. New contributions are limited to future necessity to cover expenses, if that occurs.

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL (SISTEL)

The supplementary pension plan which remains under SISTEL's management comes from the period before the Telebrás Spin-off and assists participants who had the status of beneficiaries in January 2000 (PBS-A). SISTEL also manages the PAMA/PAMA-PCE pension plan, formed by participants assisted by the PBS-A Plan, the PBS's plans segregated by sponsor in January 2000 and PBS-TCS Internal Group, merged to the TCSPREV plan in December 2001.

Plans

PBS-A (Defined Benefit)

Maintained jointly with other sponsors subject to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000.

PAMA - Health Care Plan for Retired Employees/ PCE - Special Coverage Plan (Defined Contribution)

Maintained jointly with other sponsors subject to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000, and also for the beneficiaries of the PBS-TCS Group, incorporated into the TCSPREV on December 31, 2001 and beneficiaries of the plans of definite benefits PBS of other sponsors of the SISTEL. According to a legal/actuarial appraisal, the sponsor's liability is exclusively limited to future contributions. During 2004, an optional migration of retirees and pensioners of PAMA took place for new coverage conditions (PCE). The participants who opted for the migration began to contribute to PCE.

Contributions Established for the Plans

PBS-A

Contributions may occur in case of accumulated deficit. On 12/31/04, the actuarial appraisal date, the plan presented a surplus.

PAMA/PCE

This plan is sponsored with contributions of 1.5% on payroll of active participants subject to PBS plans, segregated and sponsored by several SISTEL sponsors. In the case of Brasil Telecom, the PBS-TCS was incorporated into the TCSPREV plan on 12/31/01, and began to constitute an internal group of the plan. Contributions by retirees and pensioners who migrated to PCE are also carried out.

Contributions to PAMA, in the part attributed to the Sponsor, in the quarter totaled R\$ 29 (R\$ 29 in 2004).

FUNDAÇÃO BrTPREV

The main purpose of the Company sponsoring BrTPREV is to maintain the supplementary retirement, pension and other provisions in addition to those provided by the official social security system to participants. The actuarial system for determining the plan's cost and contributions is collective capitalization, valued annually by an independent actuary.

Self-financing funds

They correspond to the credits of financial participation, paid by engaged subscribers, for acquisition of the right of use of switched fixed phone service, still under the elapsed self-financing modality. It happened that, as the shareholders of the subsidiary Brasil Telecom S.A. Branch Rio Grande do Sul (former CRT) had fully subscribed the capital increase made to repay in shares the credits for financial participation, on shares remained to be delivered to the engaged subscribers. Part of these engaged subscribers, who did not accept the Public Offer by the Company for devolution of the referred credits in money, as established in article 171, paragraph 2, of Law Nr. 6,404/76, are awaiting resolution of the ongoing lawsuit, filed by the Public Prosecution Service and Others, aiming at reimbursement in shares.

Self-financing Installment Reimbursement - PCT

Refers to the payment, either in cash or as offset installments in invoices for services, to prospective subscribers of the Community Telephony Plan - PCT, to compensate the original obligation of repayment in shares. In these cases settlements were agreed or there are judicial rulings.

37. FUNDS FOR CAPITALIZATION

Self-financing funds

The expansion plans (self-financing) were the means by which the telecommunications companies financed network investments. With the issue of Administrative Rule nr 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the existing consolidated amount of R\$7,974 (R\$7,974 in December 31, 2004) is

derived from plans sold prior to the issue of the Administrative Rule, the corresponding assets to which are already incorporated in the Company's fixed assets through the Community Telephone Plant - PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.

38. EARNINGS BEFORE INTEREST, TAXES, DEPRECIATION AND AMORTIZATION - EBITDA

The consolidated EBITDA, reconciled with the operating income, is as follows:

	CONSOLIDATED	
	03/31/05	03/31/04
Operating Income	100,623	41,850
Financial Expenses, Net	52,186	251,464
Depreciation	645,099	588,610
Amortization of Goodwill/Negative Goodwill in Acquisition of Investments ⁽¹⁾	26,351	10,064
EBITDA	824,259	892,088
Net Revenue	2,447,576	2,075,295
Margin EBITDA	33.7%	43.0%

(1)	It does not include the amortization of special goodwill of incorporation registered in account of the deferred asset, in the permanent assets, whose amortization expense composes the non-operating income.

39. COMMITMENTS

Services Rendered due to Acquisition of Assets

BrT SCS Bermuda acquired fixed assets from an already existing company. Together with the assets of underwater cables acquired, it assumed the obligation of providing data traffic services, initially contracted with the company that sold the assets, which was a beneficiary of the financial resources of the respective advances. The time remaining for the providing of such assumed services is around nineteen years.

Financing

On July 19, 2004, the BNDES approved a financing amounting to R\$1,267,593 billion to Brasil Telecom S.A., which will be used for investments in the fixed telephony plan and operational improvements to comply with the targets set in the General Plan of Universalization Targets - PGMU and in the General Plan of Quality Targets - PGMQ. The financing will be directly provided by the BNDES for a total period of six and a half years, with a grace period of one and a half years. The cost of the financing will be the long-term interest rate (TJLP) plus 5.5% p.a. for 80% of the total financing and a basket of currencies plus 5.5% p.a. for the remaining 20%. Out of the amount approved, the funding of R\$ 741,640 has already been made. The funds will be released until 2006.

Material Facts

Brasil Telecom S.A. (BrT) and Brasil Telecom Participações S.A. (BrTP) published material facts, dates and texts of which are shown as follows:

I April 28, 2005, joint material fact of BrT and BrTP:

1 Brasil Telecom S.A. and Brasil Telecom Participações S.A. (hereinafter jointly referred to as Brasil Telecom Group), in compliance with Instruction 358 of January 3, 2002, of the Brazilian Securities and Exchange Commission (CVM), announce that, on April 28, 2005, TIM International N.V. (TIMINT) and TIM Brasil Serviços e Participações S.A. (TIMB)(collectively referred to as TIM Group) on one side and Brasil Telecom S.A. (BrT) and 14 Brasil Telecom Celular S.A. (BTC)(collectively referred to Brasil Telecom) on the other side entered into a Merger Agreement and a Merger Justification Protocol with respect to the merger of BTC into TIMB.

2 This transaction allows Brasil Telecom Group to settle, on a business manner, the overlapping of regulatory licenses and authorizations among Brasil Telecom and TIM Group arising from ANATEL 's Act No. 41,780 dated January 16, 2004, published in the Official Gazette dated January 19, 2004, and also preventing ANATEL from imposing severe sanctions and penalties.

3 BTC is a wholly-owned subsidiary of BrT and holds authorizations to exploit mobile services in Lots 4, 5 and 6 of Region II under the General Licensing Plan and the relevant radiofrequencies of sub-bands E . BTC s commercial operation begun in September 2004. After 8 months of full commercial operation, BTC reached over 1.000.000 clients.

4 TIMINT is the controlling shareholder of TIMB, which, in turn, is the direct or indirect controlling shareholder of certain companies that hold mobile services and domestic and international long distance authorizations in Regions I, II and III under the General Licensing Plan. TIM Group has approximately 14.6 million clients.

5 The closing of this transaction will result in other material benefits to the Brasil Telecom Group, such as:

(i) Maintenance of Brasil Telecom Group s valuable and unique clients base through proposals of national coverage and added value services, with focus in convergence;

(ii) Merger of the mobile operations of both BTC and TIMB;

(iii) BrT s participation in the shareholding structure of TIMB;

(iv) Execution of a national roaming services agreement between BTC and TIMB, as well as the facilitation for the entering into international roaming services agreements for the benefit of BTC with companies/partners of TIM Group outside of Brazil, in order to allow the increase of coverage for the clients and the reduction of investments for the existing network s capacity increase;

(v) Substantial increase of scale and revenues of the Brasil Telecom Group through TIM Group s use of Brasil Telecom Group s long distance services;

(vi) Elimination of new capital expenses as well as initial losses relating to the mobile operations;

(vii) Increase of Brasil Telecom s Group commercial presence s capillarity in TIM Group s sales/distribution points;

(viii) Equal competition possibilities between Brasil Telecom Group and other players in the rendering of national coverage services within the Brazilian telecommunications market; and

(ix) Final solution of all pending claims among entities of the Brasil Telecom Group and the Telecom Italia Group;

6 The appraisals to determine the intrinsic equity value of each of BTC and TIMB, to define the value of TIMB s capital increase, will be prepared by a top-tier financial institution of international reputation selected by BrT.

7 - Closing of this transaction is subject to usual conditions precedent for transactions of similar nature and legal requirements, including the approval of ANATEL. Brasil Telecom Group will keep its shareholders and the market in general informed about any material fact regarding this transaction.

8 The Brasil Telecom Group reinforces its positioning in the telecommunications market.

With the merger, the superimposed licenses will be given back to ANATEL. The completion of this instrument is subject to the approval of the qualified agencies of Brasil Telecom S.A., as well as ANATEL. It is not possible, at this moment, to foresee possible effects in the Companies financial statements, resulting from the consummation of this agreement.

II April 29, 2005, joint material fact of BrT and BrTP:

1 - Brasil Telecom S.A. (BrT) and Brasil Telecom Participações S.A. (BTP), in compliance with Instruction 358, dated January 3, 2002, of the Brazilian Securities and Exchange Commission (CVM), announce that the companies took notice that Techold Participações S.A. (Techold), alongside Timepart Participações Ltda. (Timepart) and Telecom Itália International N.V. (Telecom Italia), as shareholders of Solpart Participações S.A. (Solpart), company which controls, directly, BTP, and, indirectly, BrT and 14 Brasil Telecom Celular S.A. (BTC) (BTC, in conjunction with BTP and BrT, hereafter denominated Brasil Telecom Group), entered into an Agreement on April 28, 2005, seeking the reestablishment of Telecom Italia s original position in the controlling group of Brasil Telecom Group, condition which was temporarily suspended until pertinent regulatory issues were resolved, through the restoration of political rights and the repurchase of the shareholding interest sold to Techold and Timepart in August of 2002. On April 29, 2005, a copy of the 2nd Amendment to the Shareholders Agreement Consolidated on August 27, 2002 was filed at the headquarters of BrT and BTP.

2 The aforementioned notice informs that Techold and Telecom Italia converted the totality of their preferred shares issued by Solpart into voting shares on April 28, 2005, pursuant to the bylaws of Solpart. Telecom Italia will nominate members of the Board of Directors of Solpart, BTP and BT, in accordance with the abovementioned shareholders agreement. This agreement was reached considering that the Merger Agreement and the Merger s Protocol entered into with TIM Brasil Serviços e Participações S.A. (TIM Brasil) allow for the removal of legal issues that obstructed the restoration of Telecom Italia s right of returning to the controlling group of Brasil Telecom Group.

3 - Techold, Timepart, Solpart, BTP, and BrT entered into an Agreement ending lawsuits and disputes between the companies, including reciprocal settlements, with respect to the return of Telecom Italia to the controlling group of Brasil Telecom Group.

4 Brasil Telecom Group is to keep its shareholders and the general public informed about any material facts concerning current developments.

III April 29, 2005, material fact of BrTP:

In compliance with Instruction 358/02 of the Brazilian Securities and Exchange Commission (CVM), Brasil Telecom Participações S.A. (Company) announce that, according to the agreement entered into by Techold Participações S.A. (Techold), Timepart Participações Ltda. (Timepart) and Telecom Italia International N.V. (Telecom Italia), Solpart Participações S.A. (Solpart), which directly controls the Company, presents the following ownership structure:

	Solpart s Total Capital
Techold Participações S.A.	61.98%

In the 1Q05, Brasil Telecom installed 41.1 thousand lines, ending the quarter with 10.8 million terminals.

The plant in service totaled 9.5 million lines in the 1Q05, result of a net addition of 9.2 thousand lines in the quarter. Following the segmentation strategy of the client base, with a view at improving profitability and preventing default, we continue to encourage migration of customers from economic plans to the hybrid plan, what caused a 14.0% increase in these terminals in the quarter.

Traffic

Operating Data	1Q04	4Q04	1Q05/4Q04 (%)
Exceeding Local Pulses (Million)	2,305	2,773	(16.9)
Long Distance Minutes (Million)	1,334	1,437	(7.1)
Inter-network Minutes (Million)	1,089	1,238	(12.0)
Exceeding Pulses/LMES/Month	80.8	96.7	(16.5)
Long Distance Minutes/LMES/Month	46.8	50.1	(6.7)
Fixed-Mobile Minutes/LMES/Month	38.2	43.2	(11.6)

Exceeding Local Pulses Due to the seasonality characteristic of the first quarter of each year, the local traffic showed a 16.9% reduction. In addition to that, cell phone record sales in December 2004, aligned to the increase in ADSL access number in service, contributed to the reduction in the local traffic.

Long-Distance Traffic In the 1Q05, the LD traffic decreased by 7.1% compared to the previous quarter. The seasonality in the period also affected long-distance traffic. **In the intra-sector segment, Anatel's determination on commuting areas explains the traffic variation compared to the 1Q04.**

LD Market Share **Brasil Telecom closes the 1Q05 well positioned in the long-distance market, having reached a 51.0% share in the inter-regional segment and a 29.1% share in the international segment** (quarterly average). This result reflects the success of our marketing campaigns - Viaje com 14 (Travel with 14) and Aniversário das Cidades (Cities Birthday) and of the Brasil Telecom brand in the Region.

In the 1Q05, the quarterly average of **Brasil Telecom's LDN (domestic long-distance) market share increased by 0.6 p.p. in the intra-regional segment** compared to the previous quarter, reaching 82.9%. In the intra-sector segment, Brasil Telecom reached a 91.0% market share.

Inter-network Traffic The inter-network traffic had a 12.0% reduction compared to the previous quarter. **Brasil Telecom has implemented measures in order to increase its operations profitability.** In this sense, the Company has been offering prepaid and hybrid plans which, for their nature, enable a reduction in the fixed-mobile traffic. Additionally, customers of residential plans are trying to control this type of traffic. Besides, seasonality is also a factor which influences reduction of this traffic.

In the 1Q05, there were 378.5 thousand lines in service, against 376.8 thousand in the 4Q04. In addition, the 3.4% tariff readjustment as from 11/01/2004 influenced the increase in this revenue.

Long Distance **Gross revenue from LD calls, minus inter-network revenue, amounted to R\$430.2 million in the 1Q05**, representing a 3.3% decrease compared to the 4Q04. This drop is mainly due the 7.1% reduction in the traffic, in view of the seasonality characteristic of the first quarter of the year.

Inter-network **Gross revenue from inter-network calls reached R\$832.5 million in the 1Q05**, a 2.6% decrease compared to the 4Q04, due to a 12.0% reduction in the inter-network traffic, offset by the increase in VC-2 and VC-3 traffic share in the mix of these calls, which had their fees readjusted in February 2005, according to the maximum amount authorized by Anatel in February 2004.

Interconnection **Interconnection gross revenue in the 1Q05 was 7.6% lower compared to the 4Q04**, due to the increase in the market share of Brasil Telecom in the long-distance segments and to the seasonality effect in the 1Q05.
