ITEM 5. OTHER EVENTS AND REGULATION FD DISCLOSURE

The Company changed its segment reporting structure effective January 1, 2004 in conjunction with an organizational realignment it announced on August 21, 2003. In addition, on February 9, 2004, the Company announced its intent to sell the assets and business of the Remote Sensing Systems operation, including the stock of Kodak's wholly owned subsidiary, Research Systems, Inc., collectively known as RSS, to ITT Industries. Accounting Principles Generally Accepted in the United States of America requires that when a company changes its reportable segments or when a component of an entity, such as RSS, has been reported as a discontinued operation, financial statements for prior periods must also be reported using the new segment reporting structure or report the financial results of the component in discontinued operations.

In response to these requirements, on May 14, 2004, the Company filed a Form 8-K that presented revised financial results reflecting the Company's new segment reporting structure and RSS as a discontinued operation as of December 31, 2003 and 2002 and for the three years in the period ended December 31, 2003. The purpose of this Form 8-K is to present the results of operations for each quarter of 2003 under the new reportable segment structure, with RSS reflected as a discontinued operation.

The results of the Digital and Film Imaging Systems (formerly known as Photography) and Health Imaging segments have not been presented below because these segments were not impacted by the change in the reportable segment structure, nor were they impacted by the RSS discontinued operation.
