Russell E. Hallbauer, President and CEO, of Taseko stated:

"Management's decision to leave Gibraltar production unhedged has resulted in increased returns from sales as the price of copper has risen. With the combination of expected ongoing strength in metal prices and planned production growth, we believe Taseko is poised to continue to generate significantly increasing cash flow from operations."

Taseko may or may not in future elect to update quarterly sales and production prior to release of quarterly financial statements and related management's discussion and analysis.
