Exhibit 99

-----  
Press release issued July 18, 2005 in which the Registrant announced that recent drill results at its 100% owned Courageous Lake project suggest the potential for a further 850 meter strike extension of the FAT deposit to the south. The FAT deposit was previously thought to be limited to the south by a gabbro dyke at section line 3800N. In the recent program, eight holes were drilled to test for the southern extension, four on section 3650N, three on section 3050N and one on section 2950N. Two of the three main mineralized zones of the FAT deposit were encountered on these section lines with encouraging results.
